

exciting local opposition. Given a good start, *i.e.*, favourable harvests for a few years, to enable the people to recover, and a vigilant and sympathetic revenue administration in the future, I am hopeful that the settlement will mark the return of an era of prosperity to the State and the people; not because I claim any special merit for the settlement itself, which has been rather roughly and hurriedly carried out, but because any settlement which secures a fair and well-distributed assessment and an accurate record of rights must be an immense improvement on the chaos which has hitherto reigned.

The cost of the settlement operations up to 30th June 1900 has been Rs. 2,44,626-10-9, and the operations will be completed at a cost of less than 3½ lakhs, which, considering the size of the State and the revenue involved, nearly 24 lakhs, is not excessive.

The statements and appendices attached to this report are in the same forms as those submitted with previous reports (see paragraph 130 of report in central tahsils), 1898-99 taking the 1897-98 as the year of attestation. For all practical purposes the summary given in the text is sufficient.

Points on which orders are required. 137. The main points on which orders are now required are—

(1) The proposal as to the remission and collection of the arrears since 1890 (paragraphs 52 and 59A).

(2) The abolition of miscellaneous cesses (110).

(3) The principles laid down for the assessment of *sairaba* land generally (116) and their application to these tahsils (117).

(4) The rates and assessment now proposed (125 and 121).

(5) Subsidiary matters connected with the assessment, *viz.*, the taxation of mango and other fruit trees (80), the arrangements for the leasing of culturable waste (74) and for simplifying and reducing the taxation on the betel leaf (79).

(6) The fixing of the term of settlement (121), rates of *malba* (112) as in the northern tahsils, and the alteration of the dates of the revenue instalments (127).

(7) The abolition of the *Nankar* and *Chhut* payments and the creation of a fund for the remuneration of Chaudhris to be appointed in each tahsil (134).

138. This report completes the proposals for the reassessment of Bharatpur, and before closing it I must put on record the valuable aid I have received through all stages of the work from my three Assistants. Munshi Hira Singh has been in direct charge of the operations in five out of the present eleven tahsils. His thorough knowledge of the Punjab revenue system enabled him to readily grasp local conditions in Bharatpur. I have throughout relied much on his judgment and advice, and have never found them at fault. The credit of the speedy and I hope satisfactory termination of the settlement is largely due to him. Munshi Mahmud Hosain, the State Deputy Collector, in addition to his own duties, was in charge of the settlement work of three tahsils, and his previous experience as a settlement official enabled him to bring it to a satisfactory issue. Mr. A. H. Pyster is an officer whose services my predecessor obtained from the Bengal Survey. Although he had little previous knowledge of assessment, he has by hard work and perseverance got a good grasp of the subject and has furnished me with a very useful report on the three tahsils in his charge. He has received much help from his Assistant, Lala Gurdial, an official borrowed from the Mooltan Settlement who has shown exceptional capacity and power of work. Of the Sadar Munsarims in these tahsils, Amrik Rai and Gurdit Singh have both done well.

In order to wind up the operations during the coming cold weather it is essential that the assessment should be announced in August so as to be distri-

buted and brought into working from the coming *kharif* harvest. I hope therefore I shall not be considered importunate if I ask the favour of very early orders on this report. Lengthy though it is, the proposals are on all fours with those already sanctioned for the northern and central tahsils. No new principle is involved, and it will therefore be possible, I hope, to obtain orders within the time desired.

SIMLA;
The 12th July 1900. }

(Sd.) M. F. O'DWYER, I.C.S.,
Settlement Commissioner, Alwar-Bharatpur.
