

115. Attention is still paid to the importance of preparing "records of tribal usages." Out of the six old districts I reported last year, those of Amritsur and Gurdaspore had been published. This year the Vernacular Book on the history, customs, and statistical account of Goojrat compiled by Mirza Azeem Beg, received the approval of Government; and under authority given, Captain Wace is superintending the printing of it. It contains an account of the tribal usages of Goojrat district. I have only just heard that a work of this kind was given in with the records of the districts for Goojranwalla by Gopal Dass, but never sent to this office. I will send for it. The book for Sealkote district is also ready, and has been translated into English by Mr. Roe. Regarding Kangra, Amee Chund has just reported that these records were prepared and bound up in volumes and have been deposited in the Pergunnah offices.

The materials for writing an account of the history and customs of the district have been collected, and by March or April he hopes to be able to compile this in the form of a book.

As regards the three circles now in operation, progress cannot be reported till we arrive nearer to the close of work. Bakhtawar Lall in Montgomery has commenced to prepare the record for this district.

116. The rules laid down for rendering village title-deeds more valuable, as reported last year, are being duly carried out in all districts, they are now drawn up as proceedings of Settlement with greater formality, as to their being accepted, attested, and signed by the whole proprietary body; the Superintendents have received strict orders to verify the records for every village, as they are the foundation of our new system of records. I have examined a large number of these in Montgomery and Oona-Shahpore Circles, and can certify to the increased pains taken to secure real accuracy. I am inclined to go one step further and require the Settlement Officer to verify each of these, and record his notes therein, that greater weight may be given to them hereafter in our Courts.

117. In Mukutsur, the Superintendent has displayed much energy; and conducted his attestation of them in the village at the close of the measurements. In Dehra Ghazi Khan this work has not made head even in the rough. Hookum Chund has not given that attention to the matter which he has been several times instructed to do. Until such records are made out in those parts, we can scarcely feel our way as to what is a separate estate or property and what is only part of a mere system of fiscal management. I will stir up this work when I visit Dehra Ghazi Khan very shortly.

118. These are the four matters which appear to me to be the guarantees of a really reliable system of records of rights and usages. I am doing my best to improve their usefulness for future purposes. The more I gather experience, the more certain I am that if we can prepare these, viz: (1) a record of canal usages; (2) tribal title-deeds; (3) a record of tribal usages, giving us the *lex loci* on matters frequently disputed in our Courts; and (4) village title-deeds; and by searching investigations and attestations if we can bring them to a higher standard of accuracy and completeness of information, we shall effectually diminish litigation here-

after, and remove the stigma which has so often attached to settlement records, that they are not reliable. I believe it is possible to make them so truly and correctly to represent facts as they are in the rural life, as to enable Government some day to declare, after a given period is allowed for challenging them, that the contents are finally accepted.

119. The way to do this is to relegate all Judicial work of a contentious character to the ordinary Civil Courts, even when a settlement is in progress, so that the Settlement Officer and his Assistants may give their whole time to personally verifying the four valuable records above mentioned; and the matter is one, to my mind, of the highest importance, when we see the Chief Court accept or reject, on grounds of questionable cogency, what has taken years of patient local inquiry to bring to record.

120. During this year no steps have been taken to lithograph on cloth the field maps and pedigree title-deeds of Sealkote and Kangra; the two districts reported last year as remaining to be done. In the Settlements in progress, of course we shall not be ready for this before July next year.

121. I have thought it better to postpone all further lithographing until we know what can be done towards setting up a Lithographing establishment of our own at Lahore for this purpose. I have been in communication with the Surveyor General's Office. The photo-zincographic process is indisputably the best, as it enables us to reduce or enlarge; a specimen has been sent beautifully executed, an exact facsimile of a field map reduced to half the size, in which every line and figure comes out clear.

The cost of this process is said to be heavy, but if we can do them at a rate of not more than 1 rupee per copy, I am disposed to incur the extra expense, provided that from the receipts by sale we can make it self-supporting. I think it can be done, but the calculations and estimate have still to be made out.

122. And this brings me to notice here the desirability of transferring to the Revenue Survey Department the conduct of all our measurements and maps, still controlling the mode in which these records should be prepared, while the scientific department gave us a higher perfection of accuracy; we providing the funds for the photo-zincographic establishments, while they turned out the maps. We should then secure perfect accuracy in the maps whether original or copies, and by sale thereof on cloth at a cheap rate, so that every landholder may have a really true copy of the map of his village, their title-deeds would be complete, would be immensely prized, disputes would be diminished, and a great boon given to the country.

123. As a Revenue Survey party breaks ground in Dehra Ghazi Khan this next cold weather, it is a capital opportunity for making the experiment in a district eminently suitable. The whole system of canal irrigation would be correctly delineated, and the Canal Officers saved the necessity of all future survey, for the levels also could be taken and shown in these maps.

124. I believe if this reform could be effected at the same time the *Revenue and Judicial* administrations are separated ; if Settlement Officers could be freed of all Judicial work, so as to give their entire time to their real duties of enquiry and record ; if the Revenue Officers were then constituted as the Settlement Officers, and so became an agency *permanently* maintained ; and these officers specially selected had the verification of the four chief records previously described ;—settlement work would be admirably executed, with the highest guarantees for accuracy and economy, and freedom from risks and delay.

125. The Settlements under review this year were none of them sufficiently advanced for the appointment of Chief Lumberdars. The work has since commenced in Oonah Pergunnah. There is a difficulty there in appointing Zaildars. Circles have been formed and leading men have received charge of them as “Purtalees” or Overseers of the field work, but I trust they will be maintained as Zaildars in future. In Montgomery, Zaildars were all appointed last year. In Dehra Ghazi Khan, Mr. Fryer will turn his attention to this on his return, and carry this out in whatever way is approved by Deputy Commissioner.

126. I think the time has come when the recognition of this agency, a Chief Lumberdar for every village and a Zaildar for every 30 or 40 villages tribally grouped, should be extended to every district in the Punjab.

The experiment now tried in six districts has been found to work very successfully.

We shall then have an agency ready to be formed into Rural Committees alongside of the Municipal Committees already representing the urban population ; every administrative measure could then be carried out with ease and efficiency, and District Officers be better able to inaugurate plans of general improvement, when they see they can carry the people with them.

CONCLUSION.

127. I may now appropriately close, but before doing so it would be as well to say a word as to how far we have advanced the work generally in the three Circles.

In Montgomery the measurements are all over, it may be said, in 3 Purgunnahs ; much of the attestation has since been done in 2 Purgunnahs (Montgomery and Googaira), their assessments will be finished and announced this cold season.

It is hoped that the attestation and fairing will all be done by April 1871. Hoojra may be finished by December 1871. Pak Puttan certainly not before April 1872, unless the establishments are all increased. Still the Settlement Officer might take up the Mooltan Settlement from next April.

Neither Mokutsur Purgunah nor Illaqua Mumdoté will be quite finished before December 1871 ; there is still a good deal of work, and Mumdoté is now being brought under a regular Settlement for the first time. Efforts shall be made to finish earlier, if this is possible.

In Oona-cum-Shahpoor, there are only two Superintendents' Circles; about half the measurements were over at the close of the year. They will all be over by next December; and I see no reason why Talooquas Shahpoor Kundi should not also be finished by December 1871. In Pergunnah Oona the work is heavier, will take till April 1872, but the Settlement officer and some of the establishments will be ready in December to proceed to another settlement. I suggest the two districts of Jhung and Shahpoor be then taken up by him.

Dehra Ghazi Khan is only in its first year, the measurements even have been prohibited until a Revenue Surveyor can take the field. As they are about to take up this district, the prohibition might be removed this cold weather, establishments should now be increased to the full number, that field measurement may be started in all 4 Purgunahs after Mr. Fryer's return.

It is altogether too early to say when this district will be finished. The work will be heavy.

* * * * *

129. On the whole these results show much progress though not so satisfactory as may have been wished. But a high order of accuracy is still being maintained, and efforts are not spared to give reliable results.

Conclusion. Whatever has been faulty we have taken steps to correct; whatever has been successful is due to the exertions of my officers, from all of whom I have received most hearty co-operation; while my acknowledgments are now rendered to them, I trust their services will be considered entitled to the thanks of Government.

Lieutenant Colonel F. R. Pollock, C. S. I., Commissioner and Superintendent, Peshawur Division, has furnished the following remarks on Settlement operations in the Huzara and Peshawur districts during the year 1869-70, to which has been added extracts from reports of the Settlement Officers of these districts :—

75. With this report I cannot do better than submit the Annual Settlement Reports for the Hazara and Peshawur districts, together with their appendices, received from Captains Wace and Hastings. Both officers have written fully and at length on every topic connected with the work now going on. Captain Wace has already received the acknowledgment of Government for his Settlement Report on the Agror Valley. I feel every confidence that this officer will bring the Settlement of the district to a very satisfactory conclusion in the shortest period consistent with full and careful enquiry, and looking to the delay that has already occurred from circumstances adverted to by him, and beyond his control, I am of opinion that he is correct in calculating that 2 years more will be required before his report can be completed and submitted. I am able to concur in the good opinion he has expressed of his subordinates, and I am glad to believe that their work is being carried on with full consideration for the people. No complaints have reached me either officially or by hearsay, and the people of Hazara are quite ready to represent their grievances.

76. It will be seen from Captain Hastings' report that it was not till July last that he was joined by a trained assistant, and that he himself was only relieved from district work late in April, and enabled to commence on a new and difficult task, in a department of which he had no previous experience whatever. It was very trying to him and his subordinates to find, just as their work was beginning to run smoothly, that unparalleled sickness was devastating the district, and paralyzing their operations; as already reported in other departments, at least 6,000 persons succumbed during the autumn to cholera or fever.

I believe that all that was possible was effected by the Settlement Establishment during the year under report. Captain Hastings is new to the work, but has many of the most valuable qualities for a settlement officer. He is most careful and pains-taking, accessible and patient, and therefore I need hardly add popular; and he has commenced his task in an admirable spirit. With the merits of Gopal Dass the Financial Commissioner is already acquainted.

I can quite confirm what Captain Hastings has written of the bad spirit and extreme laziness of the Peshawur Putwarees, it is extremely to be regretted, and the more so that such men can hardly be replaced when dismissals occur.

HUZARA DISTRICT.

Extract from Report of Settlement Officer Huzara District, No. 185 dated 2nd May 1870.

This is the second year of the progress of regular settlement operations in this district. In my report for the first year I gave an account of the summary settlements of this district; of former regular settlement operations and their failure; and of the transfer to this district in May 1868, of the settlement establishment set free by the close of settlement proceedings in Goojrat. I also described the physical features of the district, with especial reference to the difficulty of measuring so large and mountainous a tract, and the leading features of landed property in it, with reference to their confused and uncertain state and the consequent difficulty of ascertaining the true status of rights. I also offered a few remarks on the incidence of the land revenue in Hazara as compared with that of other districts in the Punjab.

I also pointed out in that report how the Black Mountain disturbances on the one hand, and the non-receipt of definite instructions concerning a measuring staff on the other, had delayed the fair launching of my measurements till near the close of 1868-69. Judicial work was also at a stand-still for want of orders as to the period of limitation for the reception of claims; and lastly, I had worked through the year with an insufficient and under-paid establishment.

Weighted with all these difficulties the only progress I had to report for that year was—

- (1.) The disposal of a small number of cases and the measurement of 36,000 acres.
- (2.) The training of a considerable staff of moonserims and measurers.

- (3.) The acquirement by myself and subordinates of considerable local knowledge.
Most of us had commenced the year with none.

- (4.) And the acquainting of the people with the nature and objects of our system.

I recount all this in order that you may be able to judge of the progress made this year.

2. In the first place the Supreme Government (Foreign Department No. 1021) on the 7th June 1869, sanctioned a scale of establishment for the Hazara settlement, which remedied the shortcomings of my Perganah establishments. In the next place, just before the previous year closed, I received instructions which enabled me to place on a proper footing my measuring staff, and to levy from the zemindars the fees required for its payment.

The result of this assistance was that, by the 3rd quarter of the year my measurements had been completed. By the same time a comparatively complete account of the history of property in each tribe and in each village, showing the present state of possession, and including the deposition of each tenant and of his proprietor concerning the origin, duration and conditions of the tenancy, had been prepared, and to a certain extent reviewed by me. (This statement goes by the name of *Nuksha Soorut Deh.*)

3. Consequently, when in October, under the Agror Valley Act, the Lieutenant Governor became the legislative authority for Hazara, and I was called on to submit draft rules for guidance at this settlement, I was in a position to lay before you definite information and proposals on the complex questions of limitation and rights that have hitherto so hampered settlement operations here; as well as on all other minor questions connected therewith. In reply thereto just before the close of the year, I received the orders of Government on these proposals, viz:

- (1.) Secretary to Government No. 138 dated 22nd February 1870, sanctioning Hazara Settlement Rules.

- (2.) Proceedings of the Punjab Government in the Land Revenue Department, No. 164 dated 3rd March 1870, sanctioning amended Rules for the Hazara Forests.

These orders leave no previously disputed principles connected with this settlement undisposed of; and as ample enquiry and considerable discretion of judgment are the points mainly relied on by the rules, and as the previously existing checks of appeal and revision remain unaltered, it is hoped that they will result in a sound settlement of the district. I am now doing my best to put the rules into operation, and am confident that the end of the year now opening will, if all else goes well, show the completion of my operations in a considerable part of the district.

4. Another very important business disposed of during this year is the settlement of the Agror Valley. It cost me and my establishment the best part of the months of June, December and January.

* * * * *

5. I have also submitted during the year a full report on the jageer tenures of the district. The subject was previously in great confusion, and it cost me 2 or 3 months of exclusive application to bring the papers into order. But the result is that all doubtful

points have been cleared up, and the whole subject elucidated in a report; only on a few minor points were any orders required, and these I now await in reply to my report.

6. These being the main results of the year, I will now offer a few remarks on the enclosed statements.

Passing over statements XXI and XXII, it will serve every purpose to notice in detail statement XI:—

Part I.—Litigated cases—381 disposed of, 2,282 pending. I will only say here that so long as the principles that were to guide the Courts were undecided, progress under this head was impossible. The balance undisposed of is no measure of the work remaining to be done.

Statement XI.—Liti- so long as the principles that were to guide the Courts were undecided, progress under this head was impossible. The balance undisposed of is no measure of the work remaining to be done.

Part II.—Rent free people or to those of Government, dispose of these till the status of investigations. rights is properly ascertained. But the work on this head is no anxiety to me; at the proper time it will be easily disposed of.

Part III.—Sub-officials. Part III calls for no remarks.

Part IV.—General tribal and village statements, described in para 2 of this letter. **matters of record.** They come under this head because these statements in a revised settlement are only supplementary to the pre-existing record, but in this settlement they are the indispensable foundation of all my work.

Part V.—Measure- Nearly all the maps have been compared with those of the Revenue **ments.** Survey; they agreed for the most part with great accuracy; where discrepancies existed, they have been enquired into and cleared up. The boundaries of each map have been compared with those of the adjoining villages. A very large number have been mounted. The original field map has been carefully preserved, and a rough copy made for daily use.

The area measured is 13,86,581 acres or 2,167 square miles. This is the whole district except the Umb Nawab's territory and the wastes of Kagan. Of the two excepted tracts, the Nawab's territory (200 square miles) is not included in settlement operations, and the Kagan wastes (600 square miles) are only inhabited by wandering shepherds; but in the latter instance, the Revenue Survey maps will be protracted, and all valuable information be duly recorded.

A very great part of the information necessary to assessment has been collected: in nearly every village the produce and soil statements have been **Part VI.—Assessment.** fared, and full information as to rents has been recorded, and as each tract comes under assessment the village note books will be written up. The 51 villages that are returned as assessed, constitute the Agror Valley.

* * * * *

On the statement of business remaining to be done I will only remark that I do not think it possible to conclude my operations under two years **Statement D.—Re-** **maining business.** hence. The first year 1868-69 was practically lost, this second year

I hope it will be admitted I have used well, and as no difficulties remain to be removed we may hope to see all finished in two years.

* * * * *

I should have noticed in my report the great sickness that prevailed during October and November. During these two months my establishment was completely paralyzed, and it was impossible to get the zemindars to attend to business: our working power was scarcely completely recovered till January.

The settlement was under the control of the Settlement Commissioner till December, and since then under your own.

PESHAWUR DISTRICT.

Extract from Report of Settlement Officer Peshawur District, No. 115, dated 13th April 1870.

* * * * *

10. The last summary settlement of the Peshawur district was made in 1855 by Syud Jamal Ali, Extra Assistant Commissioner, under Major James, Deputy Commissioner; it was to last for 5 years, but is in force up to the present. In Eusafzai a regular settlement was commenced in August 1862, which was stopped by orders received from Government in the month of October 1868, the work done was not to be relied on, and has been commenced *de novo* as far as measurements are concerned.

A professional survey had only been completed in Eusafzai, the Hushtnugger Tehseel and in some Khuttuk villages of the Nowshera Tehseel along the river banks; but since and just before settlement operations were started the survey of the remaining portion of the Peshawur district was commenced, and is being carried on concurrently with the settlement measurements.

* * * * *

11. Nearly all the boundaries of the interior villages, one with another, have been laid down; but there are a large number on the border which have not been measured yet, owing to the boundaries of British territory and Independent territory being unsettled. Measurements will now be made, leaving the outer limits undefined till such time as the boundaries are settled by you or the Deputy Commissioner in your Political capacity. Where the survey has taken place and the outer limits of British villages have been laid down, up to that point measurements are carried; in the event of a dispute, Superintendents have been ordered to prepare a plan skewing the disputed land, how it lies with reference to the survey line, and a short report, which after being heard by me is forwarded to the Deputy Commissioner.

* * * * *

19. Under the head of Judicial it will be seen that there are 443 cases pending, and they include cases in Section I under Classes 1, 2, 3, 4, 5, 6, 8, 9 and 13.

About 300 have been disposed of. Many cases are left undecided pending the answer to my reference on the question of limitation, which is before you.

20. You will perceive that the mafee work for this district is very heavy; and owing to the out-turn of previous work being so meagre every month, and not bearing the proportion it should to the expenditure, I have asked for permission to appoint a separate mafee superintendent whose sole duty it will be to work up this matter, I hope with better results than up to the present. It is important to have these enquiries made before the measurements are completed.

21. The pending appeal file is light, 14 cases only pending before me and 2 before the Assistant Settlement Officer.

* * * * *

22. The measurement in acres effected during the year is 2,34,406, leaving still 10,07,546 acres to be completed. The greatest progress has been made in Eusafzai and Nowshera, in the former Perganah owing to there being no former number to compare with as in other Perganahs, and in the latter (Nowshera) owing to the grand trunk road running through the Perganah, which enabled the Superintendent to get the few Ameens who first came up, and since to pick the best among those who pass up in search of service: the measurements in the Peshawur Perganah are carried on slowly, owing to the Patwaries showing a bad spirit and the measurement being generally difficult compared with other Perganahs. The Hushtnugger measurements are behind all, owing to the difficulty in getting men to go there, the Superintendent being quite new to the work and not being joined by his Sudder Moonserim till a late date.

Doaba and Daoodzai measurements are not what they should have been, owing to the fever prevalent there during the latter part of last year, which prostrated many of the Putwaries and kept men from down below going there for employment.

23. The question of appointment of Lumberdars will have to be gone very carefully into, it is my intention if possible to take it up myself. In many villages former information regarding the appointment of Lumberdars is not forthcoming; to remedy this and help me in arriving at proper conclusions, the Superintendents have been ordered to prepare for each village a short history of the Lumberdars, showing who were appointed at last summary settlement, why, if possible, by whom they were succeeded, and trace down to the present Lumberdars; in the event of there being cases to support what they report, to note the case, if not to enter the names of those from whom the information is obtained.

APPENDIX TO SETTLEMENT COMMISSIONER'S REPORT.

STATEMENT SHEWING THE BUSINESS REMAINING TO BE DONE IN THE

Prescribed by Secretary of State, in his despatch No. 71, (Reve.) dated 11th

APPENDIX A.

GOVERNMENT ADVOCATE'S REPORT ON GOVERNMENT SUITS.

From H. M. Plowden, Esquire, Offg. Government Advocate, Punjab, to J. A. E. Miller, Esquire, Secretary to Financial Commissioner, Punjab, No. 146, dated 11th July 1870.

I have the honor to submit the annual report of the work done in this office during the year 1869-70.

2. Mr. Cunningham, by whom the post of Government Advocate was filled during the greater part of the year under notice, was removed to the Bench of the Chief Court, on the 13th February 1870, and the duties of the office were carried on by me from the 17th of that month to the close of the official year.

3. The report on the earlier period can, therefore, be a little more than an abstract of the full returns furnished herewith.

4. Only one original suit instituted by Government, was entrusted to the Government Advocate, "*Commissariat Department v. Mitchell*," in which the claim was admitted by the defendant.

Original Suits by Government.

5. Three original suits were instituted against Government, in which the defence was conducted by the Government Advocate.

Against Government.

6. The case of *Bhugwan Sing v. Secretary of State*, was a claim to proprietary rights in Rakh Nág near Umritsur; a Rakh which had been resumed and re-granted by the Board of Administration, with sanction of the Supreme Government, to the plaintiff's cousin Raja Tej Sing in 1862.

7. The claim was dismissed by the Deputy Commissioner of Umritsur, on the ground that the Municipal Courts of the Province had no jurisdiction to question the propriety of the exercise of the Sovereign power of the State.

8. The question raised is one of great importance, but, as the appeal in the above case is still pending in the Chief Court, to which it was transferred by consent, from the Commissioner's Court at Umritsur, a discussion of it will fall more properly in the report for the current year.

9. Of the remaining original suits, Mussumat Mehr Janee's was dismissed, and Rughbeer Dass' is still pending.

10. Of 5 appeals in which the Government Advocate appeared for Government respondents, Sahib Singh's case, better known as the Delhi Ticket case, alone calls for lengthened comment. The Chief Court reversed the order of the Court below, on the ground that there was a *bonâ fide* belief as to the tickets in 1862 and 1863, that the profit to be paid upon them was to be paid to the class of non-purchasers alone, that this belief was created by the acts of Government officers within the scope of their authority, and apparently, if not in fact, duly authorized by Government, and that the plaintiff was therefore entitled to a decree.

Appeals.

11. Grounds of appeal to the Privy Council were drawn, but it was eventually considered more prudent to abandon the appeal on the grounds that it was inexpedient to expose the mistakes, which, it could not be denied had been frequently committed by officers of the Punjab Government, that the case was the last of its class, and would form no precedent likely to prove injurious to Government, and lastly, that no principle of such importance was at stake as to warrant incurring the expense of an appeal, the costs of which would in all probability not be recovered, even if Government were successful.

12. The appeal to the Privy Council was therefore withdrawn under the sanction of His Honor the Lieutenant Governor.

13. In the remaining appeals, the decrees in favor of Government were upheld.

14. One review of judgment was applied for in the course of the year, and granted, to correct an error in calculation in the decree of the Chief Court in *Mahomed Ruffee v. Secretary of State*. An application with a similar object by the appellant, in "*Sahib Singh v. Secretary of State*" was also granted.

15. In the Execution Department a sum of Rs. 1,000 was realized on a decree held by the Roorkee Workshops against the late Mr. Ter Arratoon, and remitted to the Superintendent of that office.

16. No execution was taken out of the decree in favor of the Commissariat Department against Mr. Mitchell of Meean Meer, as there appeared to be no available assets and the judgment-debtor was in prison.

17. The annual instalment of Rs. 10,000 was realized from Major Strutt on account of the balance due of the purchase money of the Holta Tea Estate.

18. I have also the honor to append to this report a detailed list of 90 opinions, which have issued from this office in the past year. The list has been prepared upon the same principle as was adopted by my predecessor in his report* of 1869. Of these, nearly 50 per cent were upon questions referred from the office of the Financial Commissioner, and of the remainder rather more than 20 per cent were in reply to references made by the Secretary to Government, and nearly 13 per cent to the heads of different branches of the Public Works Department.

19. Separate statements containing details of the Civil cases in which the Government Advocate has actually appeared, are forwarded herewith in addition to the list of opinions.

LIST OF GOVERNMENT CASES FROM 1ST APRIL 1869 UP TO 31ST MARCH 1870.

ORIGINAL SUITS.

Number.	Date of Suit.	Plaintiff.	Defendant.	Amount of Claim.	Judgment or Decree.	Subject or Remarks.
1.	Heard on 21st July 1869, in Court of Deputy Commissioner Amritsur.	Sirdar Bhugwan Singh, of Amritsur.	Secretary of State for India.	Claim to the proprietorship of Rakh Nág	Suit dismissed.	Appeal pending in Chief Court.
2	On 23rd November 1869, in the Court of Assistant Commissioner Lahore.	Commissariat Department Meean Meer.	Mr. Mitchell, of Meean Meer.	Claim Rs. 555-4-5	Claim admitted by defendant.	
3	On 3rd March 1870, in Court of Assistant Commissioner Lahore.	Mussumat Mehr Jani.	Secretary of State in Council.	Proprietary right in 1 kanal 4 merlas of land in Baghbanpore assessed at 0-5-6.	Suit dismissed.	
4	In the Court of Assistant Commissioner Lahore.	Rugbeer Dass.	Secretary of State in Council.	Inheritance of proprietary right in 1 gumao, 4 kanals, 4 merlas of land in Bela Busti Ram, Zillab Lahore.	...	Pending.

LIST OF APPEALS FROM 1ST APRIL 1869 UP TO 31ST MARCH 1870.

Number.	Court where heard.	Appellant.	Respondent.	Claim.	Result.
1	Chief Court,	Sahib Singh of Delhi.	Secretary of State for India in Council.	Rs. 15,000 on Delhi Demolition Tickets.	On June 14th appeal accepted, and decree in plaintiff's favor at 3 annas 5½ pie in the rupee on all tickets assigned to plaintiff and sued upon, with costs in proportion.
2	Chief Court,	Yousuf Allee and 11 others.	Hoona Mull and Secretary of State.	...	Heard on 30th June 1869, decided in respondent's favor. Costs allowed to Hoona Mull but refused to Government.
3	Chief Court,	Kurree Bux, Mootwalee of Futahporee Mosque.	Secretary of State and Choonna Mull of Delhi.	Land belonging to Mosque worth Rs. 25,000.	Heard on 19th July 1869, decided in favor of respondents, appeal dismissed.
4	Chief Court,	Mohun Lall.	Hazaree Singh and Secretary of State.	Malikana.	Heard by Chief Court on 2nd February 1870, appeal dismissed. Costs allowed to both respondents.
5	Chief Court,	Sree Ram and Runjeet Singh.	Secretary of State and Abdoolah.	Possession of trees on 4 bighas and 7 biswahs of land in the garden known as Bagh i Mohun Khan.	Heard on 8th February 1870. Appeal dismissed without costs.

REVIEWS OF JUDGMENT DURING THE YEAR 1869-70.

Number.	Court where heard.	Petitioner.	Opposite Party.	Claim.	Result.
1	Chief Court,	Mahomed Ruffee, of Am- balla.	Secretary of State.	Estate of Mahomed Shuf- fee.	Review of judgment applied for on behalf of Government. Correction in the accounts applied for decreed.
2	Chief Court,	Sahib Singh,	Secretary of State.	Alteration of 3-5½ into 5-4.	Application made by Sahib Singh for correction of a clerical error in the judgment. Granted.

(Sd.) H. M. PLOWDEN,

Officiating Government Advocate.

APPENDIX B.

REPORT ON THE OPERATIONS OF THE NORTH WESTERN FRONTIER
REVENUE SURVEY, FOR THE YEAR 1869-70.

1. The Survey year now under notice commenced on the 1st October 1869, and ended on the 30th September 1870. It opened with the inspection of the North West Frontier Survey Party by Colonel Gastrell, Deputy Surveyor General and Superintendent of Revenue Surveys Upper Circle. The Deputy Superintendent in charge, Assistant and Sub-Surveyors, were much gratified at finding that the Deputy Surveyor General was highly pleased with all he saw.

Inspection by Superin-
tendent of Revenue Surveys.

2. The establishment left Murree for the Survey of the Peshawur district on the 22nd October 1869. This was later than was at first intended. The postponement of the date for starting was approved of by Colonel Gastrell. A very bad type of fever was prevalent throughout the Rawul Pindee and Peshawur districts, and in addition in the latter, cholera was raging. From both diseases several deaths occurred during the winter among the Survey Measurers, and from the former both Assistants and Sub-Surveyors suffered much.

Take field in Peshawur
district.

3. Three (3) Main Circuits, with a portion of their contained villages, comprising the Pergunnahs of Doaba and Daoodzai, had been surveyed in boundary during the previous field season of 1868-69. The calculations connected with these, as well as their plot on sheets for Survey up to margin, were completed during the recess of 1869. The Deputy Superintendent was thus able to send into the field, and fully employ, the interior Surveyors from the first.

Boundary Survey in
advance.

4. Field work was commenced on the 9th November 1869.

Field work commenced.

5. The total area surveyed in the Peshawur district, on a scale of 4 inches to the mile, was 932.12 square miles. Of this, 285.89 square miles were triangulated, and the remainder divided into 5 Main Circuits. They were numbered from 10 to 14; added on in fact to the numbering of the Eusofzai, or Hushtnuggur and Murdan Circuits surveyed in 1863-64 and 1864-65. In some parts the Main Circuits and triangulation stations overlap each other, but this could not be avoided.

Area.

6. This portion of the district comprised the Pergunnahs of Doaba, Daoodzai, Peshawur, and that portion of the Nowshera to the south of the Kabul or Loondai rivers. They contained 396 hulkas or villages, averaging in size 1,506 acres.

Names of pergunnahs sur-
veyed in 1869-70.

7. The triangulation, Main Circuit boundaries, and most of the Village boundaries were surveyed by Assistants. Seven-inch theodolites were used for the Main Circuits, five-inch for the villages, twelve-inch for the principal and secondary triangulation, and seven-inch for the minor and intersections.

Boundary Survey.

Instruments used.

8. Field work was closed on the 15th April finally, so occupied five (5) months and six (6) days. The establishment returned to Murree on 17th April, and recess work was commenced on the following day. Counting from date of departure from Murree to date of return, the establishment was absent five (5) months and twenty-five (25) days.

9. Two (2) Sub-Surveyors were left at Peshawur for the survey, when settled, of unsettled boundaries. Good trustworthy men were selected for this duty. Owing to delay in the settling of these the Sub-Surveyors were withdrawn in May and August. A few still remain unsettled.

10. The Deputy Superintendent himself did not get back to Murree until the 4th of May. He first remained at Peshawur to arrange some matters with the Settlement, and to see field work closed. He then started by Van to overtake the establishment. On his arrival at Rawul Pindie he was invited by the Commissioner to remain and aid in the reception and entertainment of the Viceroy on his way up to Peshawur and back; with the concurrence of the Superintendent Upper Circle, he accepted. As arrangements for the Viceroy and suite had to be made at eleven (11) places in the Division, the resources of the Civil Officers were severely taxed, and the Survey tents and establishments proved most useful.

11. Azimuths were observed all round the Main Circuits at intervals of about ten (10) miles. For the triangulation of the Khuttuk hills the G. T. Azimuths were used. For that of Independent territory, those from the Main Circuits, the stations of which were always the starting points.

12. Pir Sahak G. T. Station was used as the origin of the work. It had been previously used in the Survey of Eusofzai in 1863-64 and 1864-65, so the whole of the Peshawur district is on one meridian.

13. The corrections on the Angular work of the Circuits were very trifling.

14. The average traverse corrections are in excess of what they ought to be. It has been already explained in the Deputy Superintendent's monthly reports, that the chaining was a weak point throughout the season. The Measurers, from having had little or no chaining to do for some years, it may reasonably be allowed, had become somewhat rusty at such work. Several have been kept on during the past recess, on purpose to practise, and so check the evil. Average corrections were 3.80 links per 100 chains on the meridian, and 2.80 on the perpendicular.

15. The average triangular error on the principal and secondary triangulation was under 4". Principal sides 1.4 inch per mile. Secondary 4.2 inches per mile. Intersected points 8.5 inches per mile.

16. The comparative areas of Main Circuits and those by contained villages seem fair, under the circumstances of indifferent traverses. The average is 0.094 per 100 acres.

17. One hundred and twenty nine (129) miles of purtal were run through the Circuits with satisfactory results, except in the work of one Sub-Surveyor. Portions of two sheets had to be re-surveyed. The Sub-Surveyor was allowed to resign. His fault was more carelessness and inaptitude for the work, than deliberate fudging.

18. The area in Peshawur has been already stated to be 932.12 square miles. Beyond the border 1,400 square miles were surveyed or sketched in addition, on a scale of one inch to the mile, a map of which has been prepared, between Lat. $33^{\circ}35'$ and $34^{\circ}35'$ and Long. 71° and 72° . Further, a great deal both from actual sight and from information has been added to the new frontier map, on a scale of four miles to the inch, now being compiled in this office.

19. The interior detail work has been done with all care. The desire was to show every topographical feature of which the scale would admit. The cultivation by wells was taken out distinct from that by canals and that dependent on rain only.

20. Interior Survey was done on sheets up to margin, of which there were 104, each measuring 400 chains by 250 chains for convenience. Had they been made larger, interior Surveyors could not have been kept continuously employed. In future years, when arrangements can be made to keep the boundary work well ahead, the sheets will be larger. The plane table only was used for interior detail. The work was plotted in the field at time of survey.

21. The copies for reduction of the Peshawur maps on a scale of four (4) inches to the mile, are the only part of past season's work incomplete on this date. Instructions for the preparation of these maps were not received until the very end of June, and they could not be commenced until the beginning of July. The Deputy Superintendent had but two (2) Assistants who could be employed on the drawing. Early in July he was directed by the Supreme and Local Governments to send a competent Assistant to join Dr. Cayley at Ladak. He was to survey trade routes through the wild mountainous regions extending from the Turkistan boundaries of Kashmir to Lahoul, Kooloo &c. Mr. Reynolds, one of the two Assistants alluded to, was sent, as a thoroughly efficient man. He started at twenty four (24) hours' notice! Mr. Gibson, the second of the two Assistants mentioned above, had then to do the drawing alone, aided by Baboo Hurree Sing in the printing. The progress has been good, 49 sheets have been drawn and printed, 55 sheets remain. They will be gone on with, and, it is hoped, completed during the coming field season.

22. At the time of taking the field the demarcations in many places were backward, but the Settlement pushed on the work. A few boundaries still remain unsettled. This will delay the completion of the Peshawur Survey until next year. The comparisons with Thakbusts were good. It may here be mentioned that the Thakbusts of the Derah Gaze Khan district, now about to be taken up, are the best the Deputy Superintendent has ever seen.

23. For the survey of 1,400 square miles of Independent territory beyond the British border, the arrangement was as follows:—The Deputy Superintendent was accompanied by Mr. Scott, Assistant Surveyor. Commencing on the south bank of the Swat river, near Abazai, they went right round the border to the peak of Cherat. This is in the Khuttuk hills to the south of the cantonment of Nowshera, and is used, in seasons of sickness especially, as a sanitarium for the troops at that station and Peshawur. It is 4,445 feet above sea level. It is situated close to some of the Settlements of the Independent Afreedees.

24. Between Abazai and Eimul Chabootra, at the mouth of the Kohat pass, several passes were entered, routes explored, and commanding peaks ascended. It was impossible to encamp beyond the border in these parts, though night often fell before the Survey party got out of the hills. Several errors were discovered in the old maps: notably one in the course of the Kabul river. Instead of flowing tolerably straight, from west to east, from Dukka to Michni, it takes a bend to the north, and flows many miles in that direction before it turns to the south again. Owing to this mistake both the sizes and positions of Bajour and adjoining valleys have hitherto been shown wrong, and much out of their proper places. Between the Swat and Kabul rivers two (2) high peaks beyond the border were ascended. A hill in Momund country over the village of Hyder Khan, which is the first march on the Kafila route from Michni to Jellalabad and Kabul, was visited. The spurs of Tartara were also ascended on one occasion to a point not very far from the summit. By these trips the error about the Kabul river was established beyond a doubt, a great deal of surveying and sketching done, and much information gained. In the valleys of Gundao, Alizai, Pundiali &c. several new villages were accurately laid down, and the drainage from the west into the Swat river properly shown. The course of the Khyber Pass required to be corrected, and some fresh detail was obtained regarding both hills and plains to its south. To the west of the Bara Fort is a broad valley extending for several miles, before the base of the hills is reached. It is inhabited by Spahis, a section of the Independent Afreedees. A few miles from the fort is their principal village of Sumgoodhur, with its half dozen towers. The Spahis took the Deputy Superintendent and his Assistant all round this valley.

25. It was amusing to watch the excitement created among those wild cut-throat borderers, true Puthans, when allowed to use the Snider rifle. Many had served in the regiments of the Punjab Frontier Force; they had been accustomed to the use of that excessively inferior weapon, the two-grooved rifle, with which that force is armed. Some had used, or seen used, the Enfield, but very few had ever touched a breach-loader. Many a man professed friendship in the hope that he would be allowed to fire a few shots with this wondrous weapon, and the effect of allowing was good and of use. The metal cases of the cartridges were carefully collected and carried off!

26. An amusing incident one day occurred. Somehow the crest of the Deputy Superintendent was seen, the "flying spur," and its meaning asked by some Afreedees. They were told how, that in former days in Scotland, men were lawless like themselves, that when the larder was getting low,

a dish would be placed before the Chief of the clan, who sat at the head of the board, containing only a spur and a pair of feathers attached; that this was a signal to the followers to boot and spur, and be off to raid the cattle of the Southern over the border, and that this flying spur then became the badge worn by the clan, and by which they were recognized. Verily, the hearts of the North West Frontier Afreedees warmed to the speaker when they found he was the descendant of the British Afreedees!

27. On another occasion the usual early morning start was made. By the time the pass had been traversed, and the foot of the hill proposed for ascent reached, the instrument carriers were done up. *Friendly feeling.* This was an unexpected predicament. The inhabitants of a neighbouring, of course independent, Momund village turned out, and supplied milk &c. Having thus received and made guests of the survey party, they agreed to carry all the instruments up the hill. With those men as sole companions, the ascent was made. Both a pleasant and profitable day it proved. The Momunds were handsomely rewarded, and went away pleased.

28. More exploring might perhaps have been managed, but there were great difficulties in the way. *Exploring difficult.* It would never have done to compromise the Government by rash action. The Khyber tribes were at feud among themselves. The Afreedees about the Kohat Pass were having daily fights. As it was, when the ascent of Mount Jelala at the west extremity of the Cherat range was attempted from the British side, the crest being the proper British boundary, large numbers of men turned out from the villages on the other side. Down the slopes they came, and opened a rather smart fire. A retreat was of course imperative. They would listen to no overtures. They said they claimed the whole hill right down to the base on the British side! Their advice to the Survey party was, to be off. It was discovered, when too late unfortunately, that the confidential agent of a Momund Jageerdar who accompanied, had been exciting the people beyond the border with all kinds of tales about the Surveyor's intention. This accounted for much that latterly occurred to prevent going about as before.

Expenditure.

29. The expenditure was as follows :—

Professional,	Rs. 56,296-8-10
Contingent,	Rs. 14,201-10-5
Total,			Rs. 70,498-3-3

Rate per square mile.

30. The area surveyed within British boundary was 932.12 square miles, the rate per square mile then is Rs. 75-10-3.

31. But some allowance should be made for 1,400 square miles of Independent territory, to say nothing of the work done on the scale of four (4) miles to the inch. *Rate per square mile.* Calculating the former at six (6) rupees per square mile will give Rs. 8,400. If this be deducted from the expenditure shown in para 29, there will remain Rs. 62,098-3-3, and the rate on the Peshawur work will then be Rs. 66-8-5. It must further be remembered that more field work could have been done if there had been more to do.

32. Copies of the Huzarah maps, drawn in this office on a scale of two (2) inches to the mile, and reduced by photography to a scale of one (1) inch to the mile, were received in August, to have the village boundaries laid on. This work has been done, and the maps will be returned to Calcutta. The Deputy Superintendent ventures to consider them beautiful specimens of hill drawing.

Huzarah maps.

* * * * *

34. There is one subject which the Deputy Superintendent wishes to allude to before closing this report. He trusts that the Deputy Surveyor General will give him credit for again bringing it forward, because he really considers his views sound and practical. On the 7th January 1870 the Deputy Superintendent forwarded to the Deputy Surveyor General a proposal to modify the present system of carrying on Revenue Survey operations in the field. It is of no use going into all the detail again. The proposal was strongly and severely condemned by the Surveyor General of India, and was disapproved of by the Deputy Surveyors General of both Upper and Lower Circles. The Deputy Superintendent has for months past given the plan his serious and constant consideration, and he is more and more convinced of its goodness. In a few words it is, that with the same establishment, and the same budget grant, he will turn out at least one-fifth more area than the present system does, and with no sacrifice in any point whatever of efficiency or accuracy. His chief reason for alluding to the subject now is, that the fact of his having proposed the plan, may remain on permanent record. He would beg to add that the plan is in no way borrowed from any one.

Modifications in Survey system.

35. The Deputy Superintendent has every reason to write most favorably of his establishment generally for their conduct and labors during the past year. Lieutenant J. E. Sandeman, Covenanted Assistant, left on furlough to England on the 20th February 1870. He worked zealously and well up to the date of his departure. The Deputy Superintendent would be very glad to get him back on his return from furlough. Mr. Housden, Surveyor 1st Grade, has fully upheld the high character for zeal, hard work, and efficiency, for which he has been favorably noticed for many years past. The Deputy Superintendent again ventures to hope that some increase of salary may be given him. He has served on his present pay for upwards of three (3) years. The Deputy Surveyor General, Upper Circle, when inspecting this party in October 1869, held out hopes that some arrangement for an increase of one hundred (100) rupees a month might be managed. Mr. Reynolds, as has already been said, was one of the best draftsmen in this party. He is invaluable both in field and office. As related in para 33, he has left the Survey. Mr. Gibson is another first rate Surveyor and draftsman, and most zealous both in field and office. He too, *vide* para 33, is anxious to leave the Survey, and is looking out for other employment. Promotion might stop this, but is very doubtful. Mr. Scott, throughout the field season, worked well. In addition to a considerable quantity of Boundary Survey, he accompanied the Deputy Superintendent throughout the Survey of Independent territory, and all round the border. He took all the observations, and did all the sketching, under the Deputy Superintendent's own eye. He is admirably suited for work of this sort. The Deputy Superintendent regrets to say that he has not been so pleased with him during the latter part of the recess. He shewed a tendency to disregard the wishes of those above him, and somewhat

Assistants.

of a sullen temper, (on being refused an indulgence), which was very reprehensible. He has latterly however come to his senses again, and behaved as of old. The change in his conduct commenced when the order appeared promoting a junior over the heads of the Senior Assistants of this party, and is fairly attributable to the great disappointment he experienced. Mr. Smith continues to improve. He is a capital Surveyor, and will be a good draftsman. He is very neat and pains-taking in all he does, and most attentive to all his duties. He is entitled to promotion to the next grade on the 1st April 1871, and the Deputy Superintendent sincerely trusts the step will be given him. Baboo Hurree Sing continues an efficient and most useful Assistant both in field and office. Owing to his not having passed his examination, he is a kind of Supernumerary in his grade. The Deputy Surveyor General Upper Circle last year said that on this account he could not be promoted so quickly as other Assistants who had passed, nor must he hope ever to reach the higher grades, but that continued good service in his present grade for five (5) years, would give him claims for a step. These five (5) years will expire on the 1st April 1871, when the Deputy Superintendent trusts this Assistant will receive the reward he so well deserves. The Native Establishment now on the rolls have given every satisfaction.

36. No attempt has been made to write an elaborate report on the district of Peshawur. Bellew's work on Eusofzai and James' report exist.

Report. The present Settlement Officer will as a matter of course issue his report. The Government is having an exhaustive Gazetteer of every district in the Punjab compiled. As for similar reasons a report on the Huzarah district was dispensed with, the Deputy Superintendent presumes that one on Peshawur will not be required.

37. The establishment will leave Murree for Rajunpoor, the southern pergunnah of the Derah Ghazee Khan district, on the 10th instant, and ought to reach their destination, travelling by boat from Jhelum to Mithunkote, by the end of the month; field work then would be fairly started by the 1st of November. When this establishment worked formerly in the Derahjat, its members received an extra monthly allowance, called Trans-Indus or Derahjat Batta, at the following rates: Uncovenanted Assistants of all grades, one-fifth of salary, Sub-Surveyors Rs. five (5) per mensem, Measurers and Guard, one rupee, Covenanted Officers, nothing. This was granted as some compensation for extra expense of living and travelling, and as a reward for hardships incurred. It is true that regular travelling allowance is now granted, and was not in those days, throughout the field season, but every Survey in India draws this, wherever it may be. Exceptional service might perhaps be specially considered, and the Covenanted Assistant included in the arrangement. In Assam all hands receive special allowances, and used to, it is understood, in Sindh.

Returns.

38. The following returns accompany this report:—

1. Table A. Expenditure.
2. Table B. Maps, &c., drawn.
3. Table C. Mathematical results.
4. Table D. Each Assistants' work.
5. Table E. List of Assistants.
6. Table F. Sub-Surveyors recommended for promotion.

Index map in separate case.

39. For a list of maps completed during the last year, or in course of preparation, see Table B, appended.

40. It has been mentioned that Mr. W. J. Smith, Assistant Surveyor, did all the levelling. As none was required in the neighborhood of Peshawur by any Department, a line of levels was run from above Abazai, where the Swat river leaves the hills down to Attock, along the banks of that, and the Kabul or Loondai rivers, and back across the Eusofzai plain. This was done with reference to a canal that has been spoken of to irrigate this plain, which is entirely dependent on rain. The number of linear miles was 172, and the cost up to this date Rs. 1,831-12-9, as follows :—

Professional,	Rs.	1,315- 0-0
Contingent,	„	516-12-9
Total,					1,831-12-9

This is exclusive of the cost of the Survey of Peshawur district, as stated in para 29.

H. C. JOHNSTONE, *Lieut. Colonel,*

1st October 1870.

Supt. of Survey, N. W. Frontier.

Extract from copy of despatch No. 7, dated India Office London, 5th May 1870, from the Right Honorable the Secretary of State for India, to His Excellency the Right Honorable the Governor General of India in Council.

GEOGRAPHICAL.—I have received your Excellency's despatch dated March 15th (No. 7) 1870, and have perused the Revenue Survey Reports for 1868-69 which accompany it.

* * * * *

3. Colonel Johnstone and his staff performed valuable service while attached to the Huzarah Field Force, in the face of considerable difficulties; and his survey has corrected an error respecting the course of the Indus which is of some geographical importance. It is very gratifying to find that tangible scientific results have been derived from the Huzarah Expedition, and that such excellent use was made by Colonel Johnstone of the opportunities for surveying unknown and unexplored country, which his employment in that expedition afforded him.

* * * * *

True extract,

H. C. JOHNSTONE, *Lieut. Colonel,*

Supt. of Survey, N. W. Frontier.

P. S.—Since closing this report, the Sub-Surveyors sent to Rajanpoor to superintend line cutting, have written to say that wheat flour is selling at eight (8) seers per rupee. The subject is here noticed with reference to the latter part of para 37 of this report.

No. I.

LAND REVENUE.

1869-70.
