This tract, consisting of 14 Jágir and one Khálsa estate, was transferred to Hissár at the conclusion of the Karnál-Umballa Settlement. The revenue shown in columns 7, 11 and 12 includes Khálsa revenue and service commutation.

The assessment in Indri was introduced in 1886, in Pehowa in 1887, and in Kaithal in 1888. In submitting the Settlement Report the Financial Commissioner has recommended that the Settlement be sanctioned for a period of 20 years. At the recent Settlement certain villages in the Indri Nardák were put under fluctuating assessment. The Khálsa fluctuating assessment averages about Rs. 8,000 per annum.

The new assessments were introduced in 1887 and 1888. The assessments will probably be confirmed for 20 years. A few estates have been assessed for five years only.

A term of 30 years has been sanctioned by the Punjab Government subject to confirmation by the Government of India.

In submitting the Settlement Report the Financial Commissioner has recommended that the Settlement may be sanctioned for a period of 20 years.

At last Settlement part of the district was put under fluctuating assessment. The average annual receipts since Settlement have been Rs. 85,707. The total income in Mooltan in 1891-92 amounted to Rs. 64,908. The Settlement Report was reviewed in Financial Commissioner's letter No. 69, dated 25th January 1886.

There is a fluctuating assessment on certain Chhamb villages in the Gurdaspur Tahsil. The average assessment is Rs. 3,800.

In submitting the Settlement Report the Financial Commissioner has recommended that the Settlement may be sanctioned for a period of 20 years.

STATEMENT No. XXXV—continued.

						Rs.					Rs.	Rs.									
Kángra	...	673	Kharif 1850	Rabi 1889	39	6,27,599								
Montgomery	Montgomery	2,531	Rabi 1871	Kharif 1890	19	2,60,713	At the last Settlement abiana amounting to Rs. 38,614 was replaced by fluctuating canal rate to be credited to land revenue. Since Settlement a large number of riverain villages assessed at Rs. 80,000 have been put at various times under fluctuating assessment and this has led to a decrease in the fixed assessment given out by the Settlement Officer. The Khálsa income from fluctuating assessments on sailáb lands for the last three years averaged Rs. 29,165. The tirni income in 1891-92 was Rs. 86,879.								
	Gágera																				
	Dipálpur		Kharif 1873	Rabi 1893	20																
	Pákpattan																				
Lahore	...	1,438	Kharif 1868	Rabi 1891	23	5,93,511	A probable increase of Rs. 183,628 has been shown in Statement I.								
Amritsar	...	978	Kharif 1865	Rabi 1890	25	8,31,429	An enhancement of Rs. 2,24,000 has been shown in Statement I as likely to result from re-assessment. The number of villages shown in column 3 is that of Khálsa and shared villages, and villages of which the whole revenue has been assigned have been excluded.								

Sialkot	2,528	Kharif 1865	Kharif 1891	26	11,42,668	An enhancement of Rs. 2,23,308 has been shown in Statement I.
Gujrat	1,425	Kharif 1868	Rabi 1890	22	6,39,886	An enhancement of Rs. 1,33,092 has been shown in Statement I as likely to result from reassessment.
Gujranwala	1,172	Kharif 1867 Kharif 1868	Rabi 1890	23	5,22,086	An enhancement of Rs. 1,66,000 has been shown in Statement I. The increase has been calculated on the assumption that the new assessment of the Gujranwala Tahsil which has been sanctioned by Government, and the proposals for the Wazirabad Tahsil now under consideration will take effect from Kharif 1892 and that the new assessment of the Hafizabad Tahsil will take effect from Kharif 1893.
Shahpur	837	Various dates	Kharif 1889	...	4,75,478	An enhancement of Rs. 1,22,000 has been shown in Statement I as likely to result from re-assessment.
Peshawar	733	Kharif 1873 Kharif 1874	Rabi 1893 Rabi 1894	20	7,01,883	The resources and capabilities of the district have been increased considerably owing to the opening of the Swat and Michni and Naushera Canals.

Rohtak	...	514	At various dates.	Rabi 1879	...	8,83,077	Kharif 1879	Rabi 1909	...	30	9,31,126	9,26,227	Government of India, Revenue and Agricultural Department, No. 476, dated 1st September 1882.	The demand in the first year of the New Settlement was Rs. 9,31,126, but reductions were subsequently given in a certain number of villages. These were in part temporary, and Rs. 5,167 were re-imposed from Kharif 1889. Moreover since Settlement 12 estates have been removed from the fixed to the fluctuating system of assessment. The present assessment is, exclusive of owners' rate, estimated by the Settlement Officer to amount to Rs. 1,17,179.
Gurgaon	...	1,264	About 1842	Rabi 1877	25	10,86,113	Kharif 1877	Rabi 1907	...	30	10,87,922	11,70,724	Government of India, Revenue and Agricultural Department, No. 139-66-2, dated 29th April 1890.	The former Settlement was made at different dates for different parts of the district. The Settlement introduced in 1877 raised the Khalsa demand to Rs. 12,28,535, but the assessment of a large number of estates was revised in 1882-83, and reductions, partly permanent and partly for a period of seven years ending Rabi 1889, were given. That period having expired, the assessments were again considered, and Rs. 79,000 were added to the demand for Kharif 1889.

FINANCIAL COMMISSIONER'S OFFICE :

LAHORE, dated the 17th January 1893.

FROM

M. W. FENTON, ESQUIRE, C.S.,

Senior Secretary to Financial Commissioner, Punjab,

TO

R. G. THOMSON, ESQUIRE, C.S.,

Revenue Secretary to the Government of the Punjab.

SIR,

I am directed to submit the Annual Progress Report of the Director, W. M. Young, Esquire, Land Records and Agriculture, and with reference thereto, C.S.I., C.S. to convey the following remarks of the Financial Commissioner :—

2. Steady progress is being made in the maintenance of the land records of the Province. The Director exercises constant and regular supervision by means of his inspections, and by analysing the statements of work submitted to the Financial Commissioner.

3. The attestation of changes involves, in some districts, an enormous amount of work which cannot be kept under by the existing establishments. The remedy is probably to be found in empowering experienced Kánungos to attest undisputed alterations. The subject is under consideration.

4. The working of the rules contained in Chapter VIII of the volume of rules under the Land Revenue Act regarding the conditions under which survey numbers are to be separately maintained, has not been equal. In some districts the numbers have been unduly reduced, and the steps taken will have to be retraced. Unnecessary multiplication of field numbers is to be avoided, but even this is a less evil than a system which makes supervision of the annual records of crop returns impossible. This subject is also under consideration.

5. The rules regarding mutation fees have also been differently worked in different districts, and in some there is no doubt cause for complaint in the result of their strict application. The income from these fees has very largely increased, and modifications are in contemplation which will probably reduce the amount.

6. The method of classifying soils is imperfect; this fact is brought prominently to notice in the statistics which form the basis of reassessment in districts of which the term of assessment has expired. The matter is under consideration.

7. The Financial Commissioner concurs with the remarks contained in para. 11 of Mr. Francis' report regarding the relations between the Director and District officers. He is their adviser, and friendly critic, and it is important that he should not assume a superior position which belongs to Commissioners. There is, however, no reason to anticipate any upsetting of these relations from the orders recently passed by the Government of India directing him to notice District officers' inspections, and this will be done more fully in future years.

8. The great improvement which has taken place in the revenue records of late years has not been purchased without some corresponding disadvantages. It is not in the nature of things that the people should entirely appreciate the closer supervision which is being exercised over their agricultural proceedings, and alienations of land. The old system involved periodical interference and worry during the operations of a settlement. The new

system distributes this source of annoyance over the whole course of agricultural existence, the patwáris' half yearly inspection is followed by the visits of at least three grades of Supervisors in succession, and all the advantages of a more accurate record do not compensate the agriculturist for the disturbance in his daily routine caused by such visitation. The conditions of success which are so much insisted on, viz., constant touring and supervision by all grades of revenue officers, are precisely those which the agriculturist least likes; which interfere with his habits and pursuits, and often touch his pocket seriously. The strong aversion to the mere mention of fluctuating assessments which is almost universally exhibited in the Punjab testifies to this feeling. It is one which should be carefully watched and allayed as far as possible by improving the character of the revenue agency and by simplification of the record. A great deal has been, and is being done, in both directions: the officials of every grade are now of far better status than 10 or 15 years ago, and the system of record requires but little amendment. The year under report shows sufficient progress in both respects.

I have, &c.,

M. W. FENTON,

Senior Secretary to Financial Commissioner, Punjab.

FROM

E. B. FRANCIS, ESQUIRE,

Director of Land Records and Agriculture, Punjab,

TO

M. W. FENTON, ESQUIRE,

Senior Secretary to the Financial Commissioner, Punjab.

Dated LAHORE, 4th January 1893.

SIR,

I have the honor to submit the Annual Progress Report of the Department of Land Records and Agriculture, Punjab, for the year 1891-92:

2. Charge of this office was held throughout the year by Mr. F. A. Robertson with the exception of three months in the hot weather; Mr. E. B. Steedman acted from 18th April to 19th May, Mr. G. C. Walker acted from 20th May to 5th July, and Mr. Steedman again from 6th to 18th July. I did not take charge until after the end of the year under report and am therefore only able to write of the year's work from the materials which I find in the office.

3. The character of the inspection work performed by Mr. Robertson was described by him in the 3rd paragraph of his last report, the substance of which need not be repeated. He visited the head-quarters of 16 districts and 34 tahsils situated in 17 districts; he travelled through no less than 74 Field Kánungos' Circles in those districts and examined village papers on the ground. He spent 191 days on tour, viz., 133 days under canvas and 58 in journeying by road and rail using staging bungalows and other houses. The distance travelled by him was 5,201 miles by rail and 879 by road. No touring was done by the officers who acted while Mr. Robertson was on leave.

4. Examinations of Kánungos and candidates for the office of Kánungo were held in 6 districts. The number of persons who appeared for examination was 60, of whom 29 passed. The standard of examination was the same as in the previous year. The examinees' weak points were most commonly mensuration and arithmetic. They generally know the rules well.

5. In the last report it was mentioned that there were only 7 Kánungos remaining who had not passed the examination; one of these since passed. The number of unpassed Kánungos in the Province is however now 17. This increase is due to unpassed candidates having been appointed during the year owing presumably to passed candidates not being always available in the districts in which vacancies occurred. Two District Kánungos have been promoted during the year to higher posts, one to the Readership of a Criminal Court and the other to the post of Deputy Collector of Canals. In both cases the vacant place was given to a Revenue Accountant and both these are efficient men. In Shahpur the District Kánungo retired and was succeeded by the Head Clerk of the Settlement Office.

6. In the districts of Kangra and Gajrat the Patwári establishment was revised during the year and shortly after its close a reorganization of the Patwári Circles in the Umballa District was sanctioned. Temporary increases of establishment were allowed in the Dera Ismail Khan, Gurdáspur and Muẓaffargarh Districts. The number of old and inefficient Patwáris is steadily decreasing. During this year 93 Patwáris were allowed to retire on receipt of gratuities paid from the Patwári Fund of which the amount aggregated Rs. 8,757.

An improvement has been introduced this year into the record of Patwáris' character and services. Hitherto the records kept up have been local, that is to say, relating to the Patwáris' Circles, rather than personal. A form of character book has now been prescribed for each Patwári which will show how he has worked from the commencement of his employment wherever he may have been posted, also all rewards and punishment, leave, promotions, &c., and also a note of any landed property held by the Patwári.

7. No change has been made in the existing system of Patwári Fund accounts, the additional establishment necessary for auditing the accounts in this office not having yet been sanctioned. The Patwáris are paid quarterly. An attempt to distribute their pay monthly through the agency of Field Kánúgos has been made in the Pesháwar District, but it is open to several objections and will probably be abandoned. The Deputy Commissioner of Umballa introduced last year a system of remitting the Patwáris' pay by money orders, but this system has not been adopted in any other districts. The difficulty is in paying the cost of the money order.

8. Endeavours are being made to effect the separation of permanent and annual records of rights in District offices from other records. The records of rights being placed in the charge of the district Kánúgo in a separate room. Arrangements of this nature were carried out in the Muzaffargarh and Hissár Districts in the previous year and in the Umballa and Bannu Districts during the year under report. In Ferozepore a similar change has for some time been in contemplation and is now in progress, but its execution has been delayed by the necessary alterations in the record room buildings not being quite complete.

Result of Director's inspections.

9. The general results of the Director's inspections may be briefly summarized as follows:—

Office Kánúgos' rooms at tahsils are generally commodious and are almost always well kept, but in some places too many old and useless books are kept. Statistics are regularly and neatly entered in village, circle and tahsíl statistical registers. The totalling work, with some rather bad exceptions where the Office Kánúgo has been inattentive, is correct. The rules and orders regarding the maintenance of these statistics are understood and are usually acted up to. There have unfortunately been a good many changes made in the last two or three years in the forms of some of the statements in these books. It is somewhat difficult considering the enormous number of village registers to get all these changes regularly introduced. There are some mistakes made in the entry of various classes of soil and crop. The rules on this subject have been more than once modified and are not yet quite satisfactory. The statement of the Revenue account is not always so free from error as such a statement ought to be. It is occasionally found to differ from the Kistbandi or Demand Statement. The abstract of Revenue assignments again does not always tally with the corresponding columns in the Revenue account. A continuance of regular inspection will soon have the effect of removing these blemishes. The Jamabandís are mostly very well written, especially the detailed Jamabandís which are prepared every fourth year, but the bad habit of making alterations by writing one word over another is often observed to exist. The proper explanation of changes in areas are not always attached to these Jamabandís. The copy of the Field map which accompanies them is sometimes far from being a satisfactory document. Tahsildárs in only a minority of instances write up useful remarks in the village note books of villages especially attested. These quadrennial attestations seem to require more attention from superior officers.

Mutations are not nearly so well written as the Jamabandís and are sometimes hardly legible besides being disfigured by erasures; nor are the orders passed by attesting officers above criticism either in form or matter. The immense bulk of this work which has to be got through in certain districts partly accounts for these defects.

Accounts of mutation fees when examined often disclose errors in the demand and errors in the collection also.

The accounts of the Patwári Fund though usually set right at District head-quarters by comparison with the Treasury books are often found to be incorrectly kept by the Office Kánungo at the tahsíl. It is also found in some districts that charges have been made which ought not properly to have been defrayed from this Fund.

In justice to the Kánungos it must be remarked that, in addition to their proper work, they are generally found to have had other subjects made over to them which do not fall properly within their duty.

The Field Kánungos' diaries mostly show good and sufficient inspection of Patwáris' work and Mr. Robertson has generally noted favourably on the work of Patwáris which he personally tested in the field. District Kánungos are, with few exceptions, decidedly efficient men; they inspect the Tahsíl offices regularly and with good effect.

A practice still prevails in too many districts of collecting Patwáris at the Tahsíl head-quarters for the preparation of their annual papers. This arrangement suits the officials and may no doubt prevent bad work being done, but it must cause inconvenience and expense to the Patwáris and it is unfair on efficient hands who, besides being put to unnecessary trouble are often made to do the work of others.

On the whole there can be no doubt that the land record work is greatly improving and is rapidly attaining a wonderful degree of accuracy. Its most vital necessity is severe inspection, by all officers from the Field Kánungo to the Revenue Assistant, of the Patwáris' work in the field to ascertain how far what he has written really corresponds with the existing fact. This test cannot be applied to any considerable extent by the Director himself, his business being rather to see that such matters, right or wrong as have been entered by the Patwári, are correctly dealt with, recorded and tabulated. Even the latter task is of course more than he can execute personally. He cannot for example see that the Patwáris' totalling of the field areas to make up the village area is correctly done, though this operation obviously requires even more scrutiny than the Kánungos' totalling of village areas to make up the circle and tahsíl areas.

10. A note on the points to be attended to when inspecting Kánungos' offices was prepared by the Director under the orders of the Financial Commissioners and was circulated to all Deputy Commissioners for guidance.

11. The orders of the Government of India upon last year's report of this Department require that the Director shall in addition to his own inspections notice also the inspections of land records made by District Officers. These orders were not received until long after the close of the Revenue year and very shortly before the time for preparing the present report, it is therefore difficult to give effect to them until a future period. The Director has hitherto not assumed the duty of criticising the work of Deputy Commissioners, nor is it at present desired by the Financial Commissioners that he should do so. His position is defined as being rather that of an expert appointed to assist the Deputy Commissioners in a special branch of their work. In order however to comply as far as is possible with the wishes of Government, I have done what I could by obtaining for perusal copies of Deputy Commissioners' notes of inspection of Tahsíl offices, and endeavouring to ascertain therefrom to what extent Deputy Commissioners have examined the Kánungos' registers belonging to this Department.

I must here premise (a) that the notes of inspections received (from Commissioners' offices) were not complete, some districts having apparently failed to comply regularly with the rules prescribed in Circular No. 34 of 1890 (Correction slip No. 57, page 108 of Consolidated Circular No. 23, para. 3) that copies of inspection notes are to be forwarded to Commissioners for information, and (b) that six districts are under settlement and that in these districts the Deputy Commissioners have naturally not considered it necessary for them to take up the work of the Office Kánungos who are under the

Settlement Officer, while on the other hand Settlement Officers carry on their inspections continually; not at stated periods, and do not usually record inspection minutes like Deputy Commissioners. I must also observe that the inspections made by Deputy Commissioners of Field Kánungos' and Patwáris' work in the field which are sometimes careful and searching, are not generally included by them in the notes recorded at the head-quarters of the tahsíl. Proceeding however to analyse such inspection notes as I have received, I find the following results, which may be put in a tabular form. Under A. I place the number of inspections in which the District Officer appears to have made a full examination of the annual records, revenue statistics, and other work of the Office Kánungo, sufficient to ascertain its real merits and demerits; under B, those in which this department of the revenue work was less closely scrutinized, and under C. those in which the land records were not noticed in the inspection minute.

The Director's note on inspections of Kánúngos' offices was followed through serially by Deputy Commissioner, Dera Gházi Khan, and in one or two other cases. I prefer to refrain from making any general remarks upon so imperfect and probably misleading a record of this part of Deputy Commissioners' inspection work, except to observe that in many cases the Deputy Commissioners' remarks sufficiently show that the attention they bestowed upon other administrative matters left them no time for going into these statistics. A Deputy Commissioner when inspecting a tahsil has eight or ten other subjects to attend to each of which is equally important with this one.

I have no information of the inspections made by Revenue Assistants except in a few cases where their remarks being written in English were forwarded to the Commissioner's office like Deputy Commissioners' notes, and such cases I have included in the above table. This department of work may, I think, be entrusted generally to the District Kánúngo and the Revenue Assistant, the Deputy Commissioners exercising occasional supervision, and the Deputy Commissioner's action might be more appropriately reviewed by the Commissioner of the Division than by this office.

12. Quarterly statements of work done in the maintenance of village records are scrutinized and noted upon by the Director before submission to the Financial Commissioner. The subject which generally requires most attention in these statements is the progress made in disposing of mutation work. The statements exhibit the number of villages in which such work was done by each Tahsildár and Naib-Tahsildár during the quarter and during previous quarters, the number of cases attested and the number of cases entered up in each tahsil by the Patwáris and awaiting attestation. The work is exceedingly heavy in the large and fully populated districts in the central part of the Province where land is valuable and dealings are active, most of these districts having from 20,000 to 40,000 mutation cases annually to dispose of, which often falls on each officer employed at the rate of as many as 20 to 40 cases a day for the whole available camping season. In some of these districts, it will probably be found necessary to provide additional agency for the disposal of the mutation work. Further remarks upon this subject and upon the work of Patwáris and Kánúngos will be made under the appropriate heads in Part I of the Revenue Administration Report.

Supply of Patwári stationery.

13. No further change has been made in arrangements for the supply of Patwári stationery.

Duties of the Director.

14. The duties of the Director in regard to Annual Reports for the Financial Commissioner's and Government offices, Crop and Weather Reports, Reports on Horse and Cattle Fairs, the supervision of the Civil Veterinary Department, and Lahore Veterinary School, except in regard to Imperial horse-breeding, and the supervision of rainfall statistics remain as described in paras. 13, 14, 16, 17 and 19 of last year's Report which need not be repeated every year. These subjects have also a place in Part I of the Revenue Administration Report which is prepared by the Director.

Agri-Horticultural Gardens.

15. A separate report on the Agri-Horticultural Gardens is prepared. The gardens continue to be excellently managed by Mr. Hein, the Superintendent, and the produce, especially young trees, brings in a large proportion of the cost of maintenance.

Agricultural experiments.

16. As remarked last year, there is no land at the disposal of this Department for experimental cultivation. New seeds and plants are tried in the Agri-Horticultural Gardens or through the agency of District Officers, Local Bodies, and a few gentlemen who interest themselves in such matters.

Maize.

17. American maize of different varieties was sent out from the Agri-Horticultural Gardens to 21 District Officers and 2 private gentlemen during the year. The results of the sowings have not yet been reported. Rupees. 150 have been allowed from the Agricultural grant for the importation of American maize for the Simla and Kangra Districts.

18. It appears that rye straw is in demand for making charcoal used in the manufacture of gunpowder, and the Superintendent of the Gunpowder Factory at Ishapore has asked whether rye straw can be supplied from this Province. Accordingly 39 lbs. of acclimatised seed were obtained from the Botanical Gardens, Saharanpore, and were distributed to the Deputy Commissioners of Hazára, Ráwalpindi, Jhelum, Gujrát, Hoshiárpur and Gurdáspur. The result of the cultivation will be reported next year.

English wheat. 19. English wheat proved a complete failure last year, the seed refusing to germinate. It seems likely that the seed had been subjected to too much heat or moisture on shipboard. A small quantity of wheat which I happened personally to have brought out in the ear, germinated perfectly. It would perhaps be worth while to try getting out a larger quantity in the ear, as it is known that some seeds keep better in their natural covering than when exposed.

English potatoes. 20. Some English potatoes were received from the Director of the Northern India Botanical Department, Saharanpore, and distributed to the Deputy Commissioners of Kangra, Ráwalpindi, Hazára and Simla. They are reported to have done fairly well at Dharmasála (Kangra), but not very well in Hazára. The other districts have not yet sent their reports.

Inga dubis mimosese. 21. Some seeds of this plant which is said to be useful for forming hedges and for fodder were imported from Madras in 1891. The Deputy Commissioners of Multán, Muzaffargarh and Dera Gházi Khan have all succeeded in growing a number of plants which are now one to two feet high. The Deputy Commissioner of Dera Gházi Khan applied for a further consignment of 3 maunds of the seed and has been supplied with it by the Director of Agriculture, Madras.

22. *Sweetenia Macrophylla*.—The seeds of this tree which is a sort of Mahogany were obtained from the Botanical Gardens, Calcutta, and were distributed to several districts last year. No further reports have been received except from the Superintendent, Agri-Horticultural Gardens at Lahore who states that many of the plants died last summer; 14 which survived are healthy.

23. *Date palm*.—The reports received this year regarding imported date palms (Egyptian, Tunisian, and Persian) which have been distributed to various districts for cultivation are not very favourable. A further supply of seed from Saharanpore during this cold weather is promised. A very large number of Arabian dates were sown in the Ferozepore District some time ago, and are mostly still alive, but do not grow more rapidly than the country date, or promise to fruit early, as was expected.

24. *American Vines*.—A quantity of American vine cuttings imported by Mr. Coldstream, Deputy Commissioner, Simla, were taken over from him by this Department and distributed to various districts and to the Agri-Horticultural Gardens. The American vines are said to be remarkably successful in Kulú where they have been cultivated for some years by Mr. Carleton. It is believed that they withstand the Phylloxera, which disease was reported to have destroyed the vineyards formerly existing in Kanawar (Bushahar State) and to be doing much harm in the Kashmir vineyards also. Dr. Watt, the Reporter on Economic Products to the Government of India, however doubts whether the disease in question is really Phylloxera. He has recommended that instead of importing American vines an attempt should be made to utilize indigenous wild vines on which cultivated varieties would be grafted. A similar experiment is already being tried in Kashmir, but so far without much success. Mr. Minniken, Deputy Conservator of Forests, Bushahar, has cultivated 1,500 to 2,000 plants of the new vines at various places.

25. *Spanish Chestnut*.—Mr. Minniken has also been occupied for some years with the cultivation of the Spanish chestnut and has raised some 250 trees. So far however they have not fruited properly. A pamphlet on the subject of the cultivation of this tree has been received from the Government of India and has been distributed to Deputy Commissioners of Hill districts.

26. *Supply of fruit trees from Mahásu orchards and from Agri-Horticultural Gardens.*—During the year 600 fruit trees of various kinds have been supplied to the Deputy Commissioner, Kángra, the Deputy Conservator of Forests, Kángra, and the Dharmsála Municipality from the Agri-Horticultural Gardens. From the Mahásu orchards 1,945 fruit trees were placed at the disposal of the Director and were distributed to Deputy Commissioners of Simla, Kángra, Gurdáspur, Hazára, Ráwalpindi and Deputy Conservator of Forests, Kángra. A conference, presided over by Sir Edward Buck was held at Simla last summer, to consider measures for further developing the cultivation of fruit in the Simla hills, and proposals were made which are still under the consideration of Government.

An Apprentice paid from the sum placed at Director's disposal by the Agricultural Department is under training at the Annandale Gardens and is reported to be making satisfactory progress.

27. *Sorghum Saccharatum.*—In November 1891 seeds of several varieties of *Sorghum Saccharatum* were supplied to 11 districts for experiment. In Siálkot and Multán some of the stalks were crushed and the juice boiled, but it failed to yield crystallizable sugar: only a sort of treacle was produced. In Hoshiárpur an inferior specimen of *gur* or crude sugar was obtained. In other districts the plants were destroyed by bad weather or by insect pests. It seems certain that this plant will never compete with sugar-cane as a source of sugar, and even as a fodder plant it seems to be wanting in the very necessary quality of hardiness as compared with the ordinary *Jowár*.

28. *Seedling sugar-cane.*—In accordance with a Circular issued by the Government of India some seeds of sugar-cane were obtained for experiment from the Saháranpore Gardens and were tried in Hoshiárpur and in the Agri-Horticultural Gardens at Lahore, but at both places entirely failed to germinate.

29. *Supply of seeds, &c., to other Provinces, &c.*—Some buck-wheat was supplied through this office from the Kángra District for the Imperial Institute in London, also sesamum, linseed and specimens of wheat and barley to the India Office, and cotton-seed of several varieties was supplied to Mr. Middleton, Professor of Baroda College.

Specimens of the wild cotton plant which grows in the Kárnál District were sent to the Director of Agriculture, Bombay, at his request. A further supply of seeds of aquatic plants, waternut, lotus, &c., was sent to the Director of Agriculture, Sydney, where it is desired to use such plants to check evaporation in water-storages and for other purposes.

30. *New Implements.*—Messrs. Thomson and Mylne's shallow evaporating pan for boiling cane-juice was tried again in Hoshiárpur and Jullundur. The report from the former district is that the pan has several practical disadvantages and no advantage except that it requires less fuel than the ordinary deep pan. The Jullundur report is more favourable.

The sand pump and boring apparatus for sinking tube wells which has for some time been on trial in the Ferozepore and Hissár Districts has now been abandoned by the local officers as landholders cannot be induced to use it. Mechanical difficulties arise in the boring work which are beyond the means and resources of the peasantry except where the depth is small and the soil soft, and under such conditions they have no need to sink a tube well as a trial. Such wells seem to be more suitable for yielding a small supply of drinking water. One of Albis Domestic Flour Mills recommended by the Government of India has been obtained and sent to Deputy Commissioner, Umballa, for trial. A report on it will be made next year.

A cream separator was tried by the Deputy Commissioner, Muzaffargarh, who reported that the cream and butter produced by it were of excellent quality, but that it is too complicated for native use and also too costly. The chief advantage of the machine seems to be that it leaves the butter-milk sweet, but without some special demand for the butter-milk, this advantage can hardly be turned into money. It appears from trials made by European dairy experts that more *ghi* is made from a given quantity of milk by the native processes than by European methods.

31. *Silk products*.—A collection of specimens illustrative of silk produce and manufactures was made through the Deputy Commissioner of Kangra and the Secretary of the Municipal Committee, Amritsar, for transmission to the Imperial Institute.

32. *Plant diseases and insect pests*.—Specimens of potato tubers exhibiting disease have been forwarded to Dr. Cunningham for examination.

Some boring beetles which injure trees were sent from Dera Ismail Khan and were forwarded to the Indian Museum, Calcutta, for identification.

33. *Locusts*.—The subject of locusts has been dealt with in the Revenue Report. Reports on the appearance of locust swarms and their destruction are regularly sent by Deputy Commissioners to this office.

34. *Horse Breeding*.—Active measures are being taken in many places by the District Boards to promote the cause of horse breeding by keeping a few stallions suitable for serving the mares of the country, especially those mares which are too small to be branded for service by Imperial stallions. This subject will be dealt with in Part I of the Revenue Report.

The question of empowering District Officers to grant certificates to the owners of branded mares enabling them to obtain the services of Government stallions is still under consideration. Orders have been issued at the desire of the Government of India requiring all Patwaris to maintain registers of the mares in their circles.

Endeavours are being made to bring the Veterinary Assistants employed by District Boards under better professional supervision by Civil Veterinary Officers.

35. *Horse and Cattle Fairs*.—This subject will be dealt with in the Revenue Report.

36. *Hissar Bulls*.—In the present year 72 Hissar bulls were indented for by District Officers as against 42 in the preceding year; but in the indent for 1893 only 45 are asked for. Most districts prefer medium sized bulls, finding the larger breeds too heavy for the local class of cows, but Lahore and Shahpur ask for large bulls with a view of increasing the size of the stock.

A note by the Veterinary Surgeon to the Punjab Government has been circulated advocating that these bulls instead of being turned loose, as they now usually are, should be kept under control.

37. *Imported Bulls*.—Of the Brittany cattle which were imported in the years 1885 to 1888, 4 bulls and 6 cows are now living and the following progeny is in existence :—

Pure breed	6 bulls & 4 cows.
Half breed	23 „ & 23 „

A half-bred bull was sent last year to Deputy Commissioner, Rawalpindi, and another to Deputy Commissioner, Hazara. The former reports that the cows served by this bull all slip their calves. The latter states that 10 cows were covered and all calved, but only 3 of the calves have survived. The natives say that the stock is small and the cows give little milk. Probably these imported breeds all require more care than the native cattle owner considers necessary.

Three Kerry bulls were imported this year by the Government of India and consigned to this Province, of which two were made over to Mr. Goad at Simla, and the third to a tea-planter in the Kangra District, but unfortunately all three have died before any results were obtained.

38. *Civil Veterinary Department*.—The complement of Veterinary Officers required for this Province under the Civil Veterinary scheme has not been made up. Only one Veterinary Superintendent, instead of two, has been appointed. The office of Veterinary Surgeon to the Punjab Government has been abolished, but until a second Superintendent joins Mr. Blenkinsop has

been desired to continue his former duties of inspection, though his whole time is urgently needed for his professional work at the Veterinary School, where the Principal, Veterinary Captain Nunn, is now single-handed.

None of the Veterinary Officers serving in this Province have elected to join the Civil Veterinary Department, and their employment in their present posts can therefore only be regarded as a temporary arrangement.

39. *Buceabad Farm.*—A separate report on the Buceabad Farm by the Deputy Commissioner, Dera Gházi Khan, is attached. The land is mostly held by tenants who pay rents in kind by division of the crop. This year owing to failure of river floods the produce was very poor and the receipts correspondingly small. The tenants seem to need help in the shape of advances for grain and for purchase of bullocks to enable them to farm properly. Some minor improvements in means of irrigation were made during the year.

40. *Public Gardens in Lahore and Delhi Districts.*—Statements of the results of these gardens are given in Appendix B.

The expenses were larger than usual in the Shalimar and Shahdera Gardens in consequence of large repairs being necessary.

41. *Archæology.*—Some sculptured fragments from Ránigát in Yusafzai were acquired through Dr. M. A. Stein, for the Lahore Museum.

42. *Minerals.*—The annual report on minerals was submitted as usual by this office.

43. *Budget and Expenditure.*—The Budget grant for the year under the head of Scientific and other Minor Departments (Agriculture) was Rs. 2,100 and the expenditure was as follows:—

	Rs.
Agricultural experiments	788
Economic products	10
Rain gauges	113
	<hr/>
	911

44. *Personal Assistant to Director.*—Lála Paira Rám has filled the post of Personal Assistant to the Director throughout the year and has afforded very great assistance, particularly in matters relating to the Patwári and Kánúngo rules and in the examination of Kanúngos.

I have, &c.,

E. B. FRANCIS,

Offg. Director of Land Records and Agriculture.

APPENDIX A.

Report on the working of the Bruceabad Farm during the agricultural year of 1891-92.

1. This includes the Bruceabad and Pahárpur estates and the Patti Sarkári situated at the tail of the Dhundi and the Patti called Northern and Southern Jagír Pattís.

2. The staff is as last year, but the pay of Superintendent has been reduced from Rs. 40 to 30* per mensem from 1st December 1891. The total monthly expenditure is Rs. 68-3-4 as follows:—

	Rs. a. p.
1 Superintendent	on 30 0 0
1 Muharrir	on 20 0 0
5 Karáwas	on Rs. 3 each 15 0 0
Miscellaneous	3 3 4

The total amount expended during the agricultural year from September 1891 to August 1892 was Rs. 848-8-0.

3. In comparison to Kharíf 1947, this kharíf harvest of 1948 was very bad. The income falling from Rs. 580 to Rs. 264, thus the decrease is Rs. 316; and if compared with Kharíf 1946 the decrease is Rs. 990. The reasons for this are:—

- (1.) This year the river overflow was less than it has ever been before, and consequently the area culturable at kharíf was also very small.
- (2.) The locusts destroyed what crops there were in the Pattís Janúbí and Shumáli.

The income in Rabi 1949 was also less than it had been in Rabi 1948 by Rs. 6,350, and if compared with Rabi 1947 the decrease during this year is of Rs. 5,964. This shows that the income this year has been less than in any previous year.† This is due to the fact that last autumn the river did not rise high enough to flood more than one-fourth of the cultivated area of Bruceabad which is mostly high land. Further much harm was done by the "Gari" (cold wind). In Pahárpur the decrease is due to the failure of floods, only four wells being cultivated and the crops sown in Jagír Janúbí and Shumáli suffered likewise from want of rain.

4. The condition of the tenants is the same as reported last year, viz., that they are very thriftless and involved in debt. Almost all of them borrow grain for seed. They formerly paid 25 per cent. per harvest, viz., for every four maunds of grain borrowed they had to pay five maunds. During the current year the shop-keepers located at Bruceabad agreed to take interest at the rate of 12½ per cent. viz., for every four maunds they now take 4½ maunds at the harvest time. The rate of rent is much lighter than that in the neighbouring villages, but it is to be regretted that the tenants should run short of their produce before the next harvest is reaped. One main cause of this is to be found in the high rate of interest they had to pay formerly, but their extravagant manner of living and the occasional bad harvests account for their indebtedness to a great extent. The shop-keepers first refused to advance grain for seed to the tenants for the coming Rabi harvest, but afterwards agreed to do so as usual. I also advanced Rs. 400 as *taccávi* from the Bruceabad income. Although the former exorbitant rate of interest or 25 per cent. per harvest has been reduced to 12½ per cent. per harvest, yet I think it is still very high. To relieve the tenants from the high charge of interest made by the shop-keepers, I think the Government, as the landlord, should give *taccávi*, advances for seed grain more liberally than has hitherto been the practice.‡ These advances could be easily recovered at harvest time unless there be an exceptionally bad harvest.

5. The rates of *batái* are also the same as in last year, viz.:—

In Bruceabad and Pahárpur—

- (i) For *sailába* and *cháhi* land, $\frac{1}{2}$ *mahsúl* and $\frac{1}{16}$ = *lich*.
- (ii) For Bruceabad *jhalári* lands $\frac{1}{4}$ and $\frac{1}{8}$ *mahsúl* and $\frac{1}{16}$ *lich*.
- (iii) For Kutab *jhalári* lands in the Northern and Southern Jagír Pattís $\frac{1}{8}$ *mahsúl* and $\frac{1}{16}$ *lich*.

* The pay of the Superintendent has always been Rs. 30 per mensem. The late Superintendent received an extra allowance of Rs. 10 a month.

(Sd.) R. E. Y.

† The outturn of grain in all the *sailáb* lands of the Rájanpur tahsíl was very small partly owing to the failure of the winter rains and partly owing to the hot winds in March.

(Sd.) R. E. Y.

‡ This can easily be done out of the Bruceabad income. The E. A. C. will be instructed accordingly.

(Sd.) R. E. Y.

In addition to this tenants pay *abiāga*. The *karāwas* get paid in cash. The *chūng* is therefore credited to Government (*karāwas* four *topās* per *path*; *Dhanvāi* one *topa* per *path*).

The tenants pay the *chūng*, *kotāna*, in kind (2 *topās* per *path*).

I have nothing to add to the remarks made by Mr. C. P. Thompson last year, but to note that one new well has been sunk in Mauza Pahārpur which cost

General remarks. Rs. 200 and the income thereby during the year under report was about Rs. 20, and it is expected that the income will improve. Two old water cuts were cleared out during the year for irrigation of the Bruceabad lands and the old Kadra was cleared and a new water cut dug for the irrigation of the Pahārpur lands. Two bunds were also thrown across the creeks in Bruceabad to raise the water for irrigating the lands.

The present area in comparison with the area at settlement is shown in Statement A.

The gross income for the last three years is given in Statement B.

(Sd.) AMIR CHAND,

Extra Assistant Commissioner.
