1	Cotton-ginning Mill.	Ginning	Gins very sharp, and produces full cotton.	30,000	Europe, England.	M. Imám Dín, Tahsildár, Muzaffargarh.	...	The native agriculturists use their native instruments for the purpose and have not yet taken to the cotton gin, which is a novelty to them and cannot conveniently be used by them.	This machine was started at Muzaffargarh on the 5th October 1896 by a company, the share-holders of which are chiefly Mooltanis. It is said to have cost them about Rs. 38,000, including the cost of building. It has only worked 40 days during the last year, the produce of cotton in the district being unable to meet the requirements of the machine. Moreover there exist no facilities for the cotton produce of Alipur tahsil and that of those portions of Muzaffargarh and Sanáwán tahsils which are away from railway stations being brought to the cotton-gin for ginning, hence the machine has not yet had a fair trial. Only that much cotton was ginned by the machine which the share-holders could conveniently afford to purchase for the purpose. Unfortunately there has been proportionately less produce of cotton in this district during this and the last year, due to excessive untimely rains and presence of sub-soil water. The machine works for 13 hours a day, giving employment to 22 female and 12 male labourers. Daily cost amounts to Rs. 80. Four hundred and fifty maunds of unginned cotton are ginned in a day, giving an outturn of 130 maunds of cotton and 320 maunds of seeds.
2	Ditto	Do.	...	...	...	Deputy Commissioner, Shahpur.	These machines are well known in the Province and do not require any remarks.	Agriculturists do not appreciate it much.	The new machine set up by Malik Devi Dás at Bhera had been working 14 hours daily and had employed 30 labourers at a daily cost of Rs. 35. The machine turns out 20 maunds cleaned cotton daily.

 LIST OF IMPLEMENTS AND MACHINES ALREADY REPORTED AS HAVING MET WITH SUCCESS IN
THE YEARS 1882-83 to 1896-97.

DISTRICT.	Name of implement.	Summary of previous Report.	REMARKS.
ROHTAK GURGAON DELHI KARNAL HOSHIARPUR JULLUNDUR FEROZEPORE MOOLTAN LAHORE HAZARA	Beheca Sugar Mill	...	The advantages are portability and economy of bullock power without extra cost. Extensively used in these districts, but the disadvantages are that the iron rollers break up the fibres of the canes, so that it cannot be made into ropes, and that the metal, and also the oil used for lubrication, give a taint to the juice. Also that the iron rollers cannot be repaired or readjusted except where there is a Workshop with special machinery
PESHAWAR	Rurki-made Sugar Mill	...	The advantages are portability and economy of bullock power without extra cost. Extensively used in this district, but the disadvantages are that the iron rollers break up the fibres of the canes, so that it cannot be made into ropes, and that the metal, and also the oil used for lubrication, give a taint to the juice. Also that the iron rollers cannot be repaired or readjusted except where there is a Workshop with special machinery.
LAHORE	Kaisar plough	...	Used by a few native agriculturists, but said to be too heavy of draught for general use. Its supposed advantage is that it inverts the soil.
SHAHPUR	Cotton Gin	The machine is not patronised by the agricultural population. Cotton traders have their cotton ginned here in considerable quantities.	The owners of the machine sustained a great loss owing to fall in the price of cotton, and sold the machine to one Devi Dás. The machine is not worked at present.
FEROZEPORE	Burke's improved plough	...	This has been tried again by horse power with very fair result, but the native agriculturists have not taken to it, and it seems to have but little advantage over their ordinary ploughs. It does not invert the soil, but this is not a desideratum here.
FEROZEPORE	Reapers	These reapers were tried with success, but the native agriculturists do not take to them. 54 Ghumáos of crops were reaped by two reapers last year.	These reapers were again tried with success, but the native agriculturists generally do not take to it. During the year under report the two reapers reaped 75 Ghumáos of crop in all.
