STATEMENT NO. XIII.

Translation of Record of Customs and Village History of the Nandawgôn Kwin.

- (a) Land passes by inheritance from parents to children in usual way. It is also transferred by sale and mortgage.
- (b) The members of a family generally work their holdings jointly.
- (c) The common boundaries of adjacent holdings are the field bunds or kazins which lie on their limits. The kazins thus forming the boundaries are considered as the property of the two adjacent landholders and cannot be interfered with except by mutual consent. The waste-land, if any, adjoining a holding is considered the property of the owner of the holding and he exercises his right of extending his cultivation up to recognized boundaries.
- (d) After death of one or both parents, if children are young, the holding is usually worked on their behalf by some relation. When children grow up the holding is, if large, divided amongst them; if small and insufficient for their subsistence, one of the heirs takes the whole holding, buying out the shares of his co-heirs.
- (e) Land is usually let to tenants for one year only. Rent is reduced when tenant makes extensions of cultivation, such extensions belonging to the owner.
- (f) There are few trees in the kwin except mango and jack, which are found in the gardens.
- (g) Nil.
- (h) From harvest-time until the ploughing season every one has a right of way over the fields.
- (i) After the paddy is planted, some cattle are grazed on the kazins, and others are sent to the regular grazing-grounds. Permanent cattle-paths exist.
- (j) The village headman is in the pay of Government and has some authority.
- (k) Pagodas, zayats, and other erections are usually maintained by the community jointly, but sometimes by individual well-to-do persons.

-
- (a) The kwin receives its name from the erection here of a temporary palace (or nandaw) by the Kônbaung Min.
 - (b) Of fruits, mangoes and plantains are produced in limited quantities. They are not exported and are bought up locally.
 - (c) Bullocks are universally used for ploughing. There are no buffaloes.
 - (d) All paddy-land is planted out from nurseries.
 - (e) Harrows are of two kinds, with four and eight teeth respectively.
 - (f) Agricultural labourers are Burmans and Natives of India, the former being generally Upper Burmans.
 - (g) Residents in the kwin are all Burmans. In Burman times there were but 20 houses in the kwin, there are now 200.

STATEMENT NO. XIV.—*Fisheries.*

Circle.	Serial No.	FISHERY.		Annual rental in 1889-90.	Description.	Remarks.
		No.	Name.			
				Rs.		
Danubyu myoma.	1	7	Thayutthut ...	40	Stream ...	Screens should not be used in Wazo; should be amalgamated with Dalaban fishery (No. 12).
	2	26	Yinbaungthe ...	1,495	Lake and stream.	
	3	28	Lahgayi-Kamadut ...	270	Lake ...	Tawgalo pool (Rs. 15) should be thrown open for watering cattle.
