MONEY.—1 Tael = 10 Mace = 100 Candareens = 1,000 Cash. These moneys are formed by weights under the same denomination of Sysee silver, the cash being also represented by cast pieces of coarse metal.

The value of the Tael, as being pure, and as weighing 1½ oz. Avoirdupois, or 583½ grains Troy, would, at 60d. per ounce standard, be worth 78½d. sterling; but as it averages only about 98 touch, or 980 fine, a little above 13 dwts. better than standard, its value is 77½d., to which may be added 1½d. for the worth of the gold which it contains, and which makes the full value 78½d. sterling.

Accounts are kept by foreign merchants trading with China in Dollars, each of 100 cents. This mercantile currency is valued at the nominal rate of 720 Taels for 1,000 Dollars, with a variable percentage for the reduction into Sysee silver.

The contents in pure silver of a Spanish Dollar are, say, 370.9 grains; the contents in pure silver of a Dollar's weight of Duty, Sysee are, say, 409.75 grains. The Sysee is therefore at its intrinsic par when it sells at about 10½ per cent. premium, as paid for Spanish Dollars.
