MINT AND COINAGE.

MINT AND COINAGE.

MEMORANDUM OF PARTICULARS RELATING TO GOVERNMENT COINS.

SILVER.

On 31st August 1835, the only Rupees of legal tender in British India, within local limits specified in the several Regulations prescribing the coinage, were the Sicca, Furruckabad, and Sonat Rupees, and the Bombay and Madras Rupees.

Act XVII of 1835, which took effect on 1st September 1835, directed the coinage of a Company's Rupee weighing 180 grains, and of a standard of eleven-twelfths, or 165 grains of pure silver, and one-twelfth, or 15 grains of alloy; and declared it equivalent to the Bombay, Madras, Furruckabad, and Sonat Rupees, and to fifteen-sixteenths of the Calcutta Sicca Rupee.

Act XIII of 1836 discontinued the Sicca Rupee as legal tender in discharge of any debt, but permitted its receipt by collectors of land revenue, and at all other public treasuries, by weight, and subject to a charge of one per cent. for re-coinage.

By Notifications dated 21st March and 12th May 1838, the Madras, Bombay, and Furruckabad Rupees, "and generally the Rupees issued from any Mint of the British Government that may still be a legal tender in any part of India," were declared to be receivable by the Calcutta Mint for re-coinage, if of full weight, at their intrinsic par, viz., as equal to Company's Rupees, without any charge of seignorage for re-coinage.

All Rupees, and the Half-Rupee introduced by Act XVII of 1835, and continued by Act XIII of 1862, which are legal tender in satisfaction of all engagements, continue (unless clipped, or filed, or defaced, or diminished otherwise than by use) to be legal tender for their full weight, until by gradual wear they have lost more than two per cent. of their original weight: in this last condition the coins when tendered at a treasury should be paid for at the rate of one Rupee a tolah, and should not be re-issued.

Four-anna and two-anna pieces are legal tender for only fractions of a Rupee. If coined under Act XIII of 1862 they are allowed to pass current so long as they have lost weight only by fair abrasion; but if they have lost weight from any other cause, they are treated as bullion.

Act XXIII of 1870 repealed all the Acts referred to above. The definition of silver coins was unchanged and the quality of legal tender was reserved for coins made under the previously quoted Acts.

By Act IX of 1876 the Government Mints may coin money for Native States, such coin being identical in weight and fineness with British Indian coin. Under the Act such coin is legal tender in British India.

SILVER AND COPPER.

The full weight of the coins that were prescribed by Act XVII of 1835 and Act XI of 1844 (authorising half-pice), and that were continued by Act XIII of 1862 (which changed the designation of the Rupee from Company's to Government) and by the Indian Coinage Act XXIII of 1870, is as follows:—

MINT AND COINAGE.

SILVER AND COPPER —continued.

1 Rupee = 165 grains of pure silver.

1 Shilling = $80\frac{1}{4}$ grains of pure silver.

1 Rupee = shillings 2·0439 or 2s. 0 $\frac{1}{2}$ d.

Silver, at 58. 6d. per oz. standard = for the 165 grains of pure silver in a Rupee, 2·043s.

or at 5s. 2d. per oz. standard = 1·92·004s. per Rupee.

The Company's pice, or the foregoing copper coinage, was introduced into the Bengal Presidency by Act XVII of 1835, and into the Madras and Bombay Presidencies (with retrospective effect in the latter) by Act XXII of 1844.

The title of "Government Rupee" in supersession of "Company's Rupee," was introduced by Act XIII of 1862, which rescinded further an inoperative clause of Act XVII of 1835 that had empowered the issue of a Double Rupee.

Rupees and Half Rupees not worn to the extent of 2 per cent. of their weight are, by Act XXIII of 1870, legal tender if coined under it. For coins under the previous Acts the allowance remains as laid down by them.

GOLD.

The old standard for gold coinage in Bengal was 99 $\frac{1}{4}$ parts of pure gold to three-quarters of a part of alloy. This was altered by Regulation XIV of 1818 to eleven-twelfths of pure gold to one-twelfth of alloy; but the law having become inoperative, the old standard was reverted to for a time, until Act XVII of 1835 re-established the standard of eleven-twelfths fine, but declared that no gold coin should thenceforth be a legal tender of payment in India.

By Act XXIII of 1870, the under-mentioned gold coins only can be coined at a Government Mint in British India, viz. :—

GOLD COINS.	PURE GOLD.			ALLOY.			TOTAL.

By a Notification dated 28th October 1868, Sovereigns and Half-Sovereigns coined at any authorised Royal Mint in England or Australia, of current weight, may be received in all the treasuries of British India and its Dependencies in payment of sums due to Government as the equivalent of ten rupees and four annas, and of five rupees and two annas, respectively; and whenever available at any Government treasury, they may be paid at the same rates to any person willing to receive them in payment of claims against the Government. There is no limit laid down by law as that at which gold coins are to be received, but by a Notification, dated 24th November 1869, the following rates of allowance are laid down as limits for their receipt at their nominal value in Treasuries, viz. :—

TABLES SHOWING OUTTURN OF SILVER BULLION OR SPECIE REMITTANCE
FROM ENGLAND TO INDIA.

EXPLANATORY REMARKS.

The calculations used in the preparation of this table are as follows :—

- A.—To the cost of an ounce troy of standard silver in London, 1 per cent. is added for freight and charges for remitting, and to the total cost $\frac{1}{4}$ per cent. is added as interest for the time taken by a bullion remittance in excess of the time occupied by a remittance by bill. This sum is divided by the Mint outturn of an ounce of fine silver bullion received into the Mint after cutting, as given below, and the quotient, showing the cost of a Government Rupee in India in Pence, is entered in column A :—

					Rs.
One ounce troy of English standard silver	...	...	...	...	= 2.6908
Mint duty and melting charge	...	...	...	...	= .0564
				NET VALUE	2.6344
Mint loss in cutting	...	...	...	...	= .0003
				MINT NET OUTTURN	2.6341

- B.—The rates in this column are based on the Mint outturn of an ounce of silver in specie, or bullion of inferior quality, received into the Mint after melting, as given below, the transit charges being 1 per cent. :—

					Rs.
Net value as above	...	...	...	...	2.6344
Mint loss in melting	...	...	...	...	.0046
				MINT NET OUTTURN	2.6298

- C.—The rates in this column are based on the transit charges, being $1\frac{1}{4}$ per cent., viz., freight $\frac{1}{2}$ per cent., insurance $\frac{1}{2}$ per cent., boxes, packing, &c., $\frac{1}{8}$ per cent., brokerage $\frac{1}{8}$ per cent., interest at $\frac{1}{4}$ per cent., and on Mint outturn of an ounce of fine silver bullion, viz., Rs. 2.6341.

- D.—The rates in this column are based on the transit charges of $1\frac{1}{4}$ per cent., interest at $\frac{1}{4}$ per cent., and on Mint outturn of an ounce of silver in specie, or bullion of inferior quality, viz., Rs. 2.6298.

- E.—The rates in this column are calculated on the same data as in column A, except that interest is taken at $\frac{1}{2}$ per cent.

- F.—The rates in this column are calculated on the same data as in column B, except that interest is taken at $\frac{1}{2}$ per cent.

- G.—The rates in this column are calculated on the same data as in column C, except that interest is taken at $\frac{1}{2}$ per cent.

- H.—The rates in this column are calculated on the same data as in column D, except that interest is taken at $\frac{1}{2}$ per cent.
