Commencing under each of its significant figures write the corresponding tabular figure.†				
The sum of the tabular figures so placed is the converted amount.				
If it is Sterling, the decimal point is one place before (i. e., to the left of) the vertical line. If it is Rupees, it is one place after (i. e., to the right of) the vertical line.				
* Fractions must be expressed in decimals.				
Fractions of Rupees carried to two places, and of Pounds sterling carried to three places, will give results accurate within the limit of one pie, or one farthing.				
† In converting from sterling into Rupees the first of the tabular figures corresponding with the significant figure must be placed under the previous significant figure, if the tabular figure begins with 1, and the significant figure is 8 or 9.
