AGRICULTURAL STATISTICS

OF

INDIA

FOR THE YEARS

1904-05 TO 1908-09

VOLUME I—BRITISH INDIA

Prefatory Note

In 1866 a set of tables, proposed by a specially appointed Statistical Committee, was prescribed by the Government of India for general adoption as appendices to the annual reports on general administration.

In 1884, at the instance of the Secretary of State for India, some of these forms, relating to agriculture, land, and tenures were re-considered and modified after examination and discussion by a conference of officers of the Agricultural Departments. The modified tables, eight in number, were compiled for the first time for 1884-85, and published under the title of 'Returns of Agricultural Statistics of British India.' These tables were prepared and published annually until 1887-88, when a re-arrangement was made of the headings of four statements dealing with area, irrigation, crops, and agricultural stock, though no modification was made in substance.

In 1891, the tables were again revised and, to some extent, re-cast. The revised series of 1891 has, with a few unimportant alterations, been maintained to the present time, with the exception that two tables (wholesale prices and varieties of tenure) have been discontinued, other arrangements having been made to secure a record of prices.

The following schedule compares the three series of 1866, 1884, and 1891:—

1866	1884	1891
IA. 1.—Area cultivated and uncultivated.	A.—Area cultivated and uncultivated.	A.—Total acreage, classification of areas (including irrigation), area under crops, and stock.
	Irrigation	
	B.—Crops cultivated.	
IIID. 1.—Crops cultivated.	IIID. 2.—Agricultural stock.	B.—Prices of produce. (Discontinued from 1894-95.)
IIID. 2.—Agricultural stock.	IIIE. 1.—Prices of produce.	
IIIE. 1.—Prices of produce.		C.—Incidence of the land revenue on area and population.
IE. 2.—Surveyed and assessed area.	C.—Surveyed and assessed area.	D.—Varieties of tenure held direct from Government. (Discontinued from 1901-02.)
IE. 3.—Varieties of tenure held direct from Government.	IE. 3.—Varieties of tenure held direct from Government.	
IE. 4.—Varieties of tenure not held direct from Government.	(Discontinued.)	(Discontinued.)
IE. 5.—Register of transfers.	IE 5.—Register of transfers.	E.—Register of transfers of landed property. (Discontinued.)
IIID. 3.—Rates of rent and produce.	(Discontinued.)	

The tables of the series of 1891 as published in this volume consist of six separate tables numbered, 1 (area), 2 (classification of area), 3 (area under crops), 4 (live-stock, etc.), 5 (land revenue), and 6 (transfers of land). Each table gives the figures for each province for five years, with a total for British India, and is followed by subsidiary statements numbered 1-A, 1-B, 1-C, etc., giving similar figures for each district in each province. * Besides these there is an Appendix * consisting of two statements of a special nature, which deal with A—average yield per acre of principal crops, and B—changes in district, divisional, and provincial boundaries. Statement B is explanatory of the variations in the areas shown in table No. 1.

The general scope of the figures given in these tables may be explained as follows:—

The total area of India is 1,136,879,015 acres, or 1,776.373 square miles, with a population of 294 millions. This may be divided as follows:—

	Acre.	Population.
(1) British Provinces (including Native States under the control of Local Governments) .	754,350,199	252,453,850
(2) Native States under the control of the Government of India	315,603,376	40,358,452
(3) Certain Native States (i.e., Shan States) in Burma not included under (1)	37,065,600	1,137,444
(4) British Baluchistan (including administered areas)	29,859,840	343,187

The area of British Baluchistan is excluded entirely from the Agricultural Statistics of India. The area of British Provinces only is dealt with in this volume—tables 1—6 and Appendix B. In Appendix A figures relating to certain Native States are included. Volume II deals only with Native States.

The total area of the British Provinces dealt with in this volume—754,350,199 acres, or 1,178,672 square miles—includes 131,216,167 acres, with a population of over 22 millions, belonging to Feudatory and Tributary States, which are under the political control of Local Governments. These include, in Burma, the Mông Mit State, the Hsawnghsup State, the Singkaling State, and the Chindwin States; in Eastern Bengal and Assam, the Khási and Jaintia Hill States, Manipur, and Hill Tippera; in Bengal, Sikkim, Cooch Bihar, and the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur and Tehri; in the Panjab, the Phulkian States, Bahawalpur, the Delhi, and the Jallandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and the Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Satara Jagirs, and the Southern Maratha States; in the Central Provinces, the Ohhattisgarh States; in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States Agricultural Statistics are prepared for most of the States in the Panjab, viz., Patiala, Nabha and Bahawalpur, Jhind, Faridkot, Kapurthala, Malerkotla, the Delhi Division States and the Simla Hill States and all the States in Madras. Thus by deducting 131,216,167 acres belonging to Feudatory and Tributary States from the total area of 754,350,199 acres included in British Provinces, a

* In previous issues this Appendix consisted of three statements—

A—Area and yield of certain crops.

B—Average yield per acre of principal crops, and

C—Changes in district, divisional and provincial boundaries.

The two statements A and B used to be published separately first and then included in this volume. Beginning with this issue, Appendix A will be published as a separate compilation, while Appendix B, which becomes now Appendix A, will be incorporated in this volume only. Former Appendix C now becomes Appendix B.

Balance of 621,384,032 acres is left, as shown in table No. 1, which represents the area for which Agricultural Statistics are forthcoming. These statistics are, however, prepared in a number of provinces or parts of provinces from village papers; and the area given in the village papers of the United Provinces, the Central Provinces, Madras, the Panjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The actual area, therefore, for which statistics are prepared is 621,384,129 acres, or 970,913 square miles.

Less than two-thirds of this area is available for cultivation; 82,489,268 acres are under forests; and land absolutely barren or unculturable or covered by buildings, water, and roads, or otherwise appropriated to uses other than agriculture amounts to 157,636,249 acres. The balance 381,258,612 acres represents the area available for cultivation, of which 218,039,793 acres were actually cropped during the year. The remainder is divided between current fallows (50,153,050 acres) and land available for cultivation but not cultivated and not classed as current fallows (113,065,769 acres).

Table No. 3 shows the number of acres cultivated with each kind of crop in each year. In the case of land from which more than one crop is taken, the area actually cultivated is shown under each crop-heading, but the total number of acres from which more than one crop was taken in the year is also recorded. Thus, in 1908-09, the total area cultivated with different crops was 246,189,064 acres. But 28,149,211 acres were cropped more than once. The net area cropped according to the available statistics is therefore only 218,039,793 acres.

The proportion which this area bears to the whole area of India may be seen from the following summary :—

	Acres.
Total area of India	1,136,879,015
<i>Deduct.</i> —Area not dealt with in this Volume—	
1. British Baluchistan	29,859,840
2. Shan States	37,065,600
3. Native States under the Government of India (partly dealt with in Volume II)	315,603,376
Balance dealt with in this Volume, tables 1—6 and Appendix B	754,350,199
<i>Deduct.</i> —Area for which no Agricultural Statistics are available—	
Tributary and Feudatory States under Local Governments	131,216,167
Balance for which Agricultural Statistics are prepared	623,134,032
Corresponding area in village papers	621,384,129
<i>Deduct.</i> —Area not available for cultivation—	
1. Forests	82,489,268
2. Others	157,636,249
Balance available for cultivation—	
1. Uncultivated	113,065,769
2. Fallow	50,153,050
3. Actually cropped	218,039,793

The notes prefixed to each table explain the changes which have been made since 1866 in the tables now published. The general instructions for compilation are given in the General Notes, and local peculiarities or methods of compilation are mentioned in the Provincial Notes.

Such statistics as have been supplied for the permanently-settled tracts of Bengal and Eastern Bengal have been included in the tables since 1892-93; but, with the exception of the North Bihar and Orissa districts in Bengal and

Chittagong and Backerganj in Eastern Bengal, which have recently been surveyed, they are not based upon accurate surveys or village papers, and must therefore for the most part be regarded as estimates.

The Native States from which agricultural statistics are received are Mysore, from 1886-87 ; Jaipur, from 1892-93 ; Gwalior, from 1896-97 ; Bikaner, Marwar and Tonk, from 1898-99 ; Alwar, Bharatpur, Kishangarh, Jhalawar and Kotah, from 1900-01 ; Indore, Rajgarh, Narsingarh, Nagod, Patiala, Nabha and Bahawalpur from 1907-08 ; Sundur, Jhind, Faridkot, Kalsia, Patandi, Loharu, Dujana, Sirmoor, Kapurthala, Malerkotla, Simla Hill States, Bhopal, Barwani, Travancore, Cochin, Banganapalle and Pudukottai from 1908-09. The statistics relating to all these States, which in some cases are very imperfect, are separately printed as volume II.

Certain statements are prepared for the Agricultural (or the Revenue) year which ends on different dates in different provinces :

Year ending 31st March	.	.	.	in Bengal, Eastern Bengal and Assam, Coorg and Manpur ;
„ „ 31st May	.	.	.	in the Central Provinces and Berar ;
„ „ 30th June	.	.	.	in Madras, United Provinces, Burma and Ajmer-Merwara ;
„ „ 31st July	.	.	.	in Bombay ;
„ „ 30th September	.	.	.	in the Panjab and the North-West Frontier Province.

The crop statistics, however, in every province refer to the year closing with the harvesting of the *rabi* or spring crop.

A glossary is attached to this note giving the meaning of vernacular words used in the explanatory notes which are prefixed to the tables in this volume.

Vernacular terms used in the Explanatory Notes.

Band (Coorg).—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.

Bhagdari.—See *Narvadari*.

Gorait (United Provinces).—Village watchman.

Indam (Madras).—Whole *indam* villages are entire villages held on such tenure; *minor indams* are portions of villages, generally a number of fields held on *indam* tenure.

Istamrari (Panjab, Ajmer-Merwara).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.

Izafat (Bombay).—A form of service tenure.

Isdra (Berar).—Land leased under the waste-land rules on stipulated terms.

Jagir (Berar).—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.

—(Ajmer-Merwara).—Land granted revenue-free on condition of military service or as a charitable endowment.

—(Bombay).—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.

—(Coorg).—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.

Jamma (Coorg).—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

Jodi (Madras).—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, minus the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.

Khdlsa (Bombay).—Government occupancy or raiyatwari tenure.

—(Central Provinces).—Areas settled on *malguzari* or *thekadari* tenure, in contradistinction to *zamindari*.

—(Berar, Ajmer-Merwara).—Land paying full revenue to Government.

Khatedar (Berar).—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam).—Land assessed to full revenue.

Kholi (Bombay).—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Kwin (Burma).—A tract of land separated from other tracts by some well-defined boundaries, such as creeks or belts of forest.

Lakhtiraj (Assam).—Revenue-free land.

Mahalkari (Bombay).—A revenue and police officer in charge of a sub-division of a taluk.

Malguzari (Central Provinces).—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

Malikmakbuza (Central Provinces).—A person owning one or more plots of land separately assessed to revenue in a village, who is not a *malguzar*, inferior proprietor, or a member of the proprietary body of that village.

Mamlatdar (Bombay).—The chief revenue and police officer (native) in charge of a taluk.

Mehwari (Bombay).—A proprietary tenure assessable to revenue at a lump sum.

Milankhasra (Bombay and Central Provinces).—An abstract record in which the village area is classified.

Mittas, Palayams (Madras).—Certain classes of permanently-settled estates differing in their origin from *zamindaris*. *Mittas* were artificial estates created under Madras Regulation XXV of 1802, while *palayams* are the estates of *poligars* or old chieftains. Most of the latter have been granted title-deeds of permanent settlement under the Regulation mentioned, but a few have not been settled, though in practice their revenue is treated as fixed.

Muafi (Manpur).—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to *jagirs*.

Munsaram (Berar).—A head native revenue officer.

Narnadari, Bhagdari (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.

Nasul (United Provinces).—Property escheated or lapsed to the State.

Nisfkhiraj (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.

Palampat (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.

Parpatigar (Coorg).—A revenue officer in charge of a sub-division of a taluk.

Patel (Coorg).—Village headman appointed by Government.

Peakkash (Madras).—The fixed land revenue payable to Government on all permanently settled estates.

Poramboke (Madras).—Lands reserved for public or village communal purposes.

Pot indams (Bombay).—Lands sub-alienated in alienated villages.

Pot khardb (Berar).—The unculturable area included in a survey number.

Shandog (Coorg).—A village accountant appointed by Government.

Shrotriem (Madras).—Village held on grant (originally to Brahmans), wholly or partially revenue-free.

Talukdari (Bombay).—A form of proprietary right in force in the northern districts of Bombay.

Thakameda (Upper Burma).—Household tax.

Thakadar (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.

Udkab-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umbli (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Zamindar (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Summary of the Agricultural Statistics of British India.

SUMMARY OF THE AGRICULTURAL

Area in acres :	1899-1900	1900-01	1901-02	1902-03	1903-04
1. By professional survey (a)	547,502,788	548,738,661	552,920,151	554,052,949	554,284,736
2. Under forest	65,843,024	66,305,506	66,363,530	67,562,698	67,402,822
3. Not available for cultivation .	138,150,727	138,488,965	137,963,527	136,767,571	138,107,666

(a) Excluding areas for which no returns are available.

TABLE No. 1.—AREA.

In this table is entered the total area of each district, the areas for which statistics are and are not available being separately entered.

The corresponding tables of the earlier series are I A—1 of 1866, A of 1884, and A—1 of 1891. The headings differ as set out below:—

	1866 I A—1	1884 A	1891 A—1
Total area in square miles	Area according to Survey Department in acres.		Area according to professional Survey in acres.
	Deduct—		Deduct—
	(a) Feudatory and Tributary States.		(a) Feudatory and Tributary States.
	(b) Area for which returns are otherwise not available.		(b) Area for which no returns exist.
	Net area dealt with in this return.		Net area by professional survey. Corresponding area in village papers.

GENERAL NOTES.

Column 2 (pages 13—15).—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma.

Column 3—In this column is entered the area of any Feudatory or Tributary States included in column 2.

Column 4.—In this column is deducted the entire area (exclusive of Native States) for which the statistics required for tables Nos 2 and 3 are not forthcoming in whole or in part. This area comprises chiefly estates held in permanent settlement or on privileged tenure, which have not been cadastrally surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (5 and 6) and dealt with in tables Nos 2 and 3 correspondingly increased.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns often do not include the forest areas. In such cases, column 6 must be taken to be the total area for which statistics are available, corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns.

In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of table No. 2.

PROVINCIAL NOTES.

*Upper and Lower
Burma:*

Column 2 (pages 16—19).—Where there has been no professional survey of the district the best information available is accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Katha Districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08.

Assam.

Columns 4 to 6 (pages 20 and 21).—Previous to 1906-07 column 4 stated all the hill districts, all permanently settled and *lakhiraj* estates, and areas not cadastrally surveyed in Cachar and Sylhet, except—(1) reserved forest areas, and areas under tea; (2) estimated cultivated areas in the permanently settled estates in Sylhet and Goalpara and certain cultivated areas in the Khasi and Jaintia Hills; and (3) the plains portion of the Garo Hills district. From 1906-07 returns based mainly on estimates have been prepared for the unsurveyed areas in Cachar, the permanently settled and *lakhiraj* estates in Goalpara, and the hill tracts of the Garo Hills district; from 1907-08 such returns have been prepared for the Naga and the Lushai Hills and for the remaining unsurveyed tracts of Sylhet; and from 1908-09 for the remaining area of the Khasi and Jaintia Hills district. These areas have therefore been excluded from column 4 and included in columns 5 and 6.

The statistics shown under Eastern Bengal deal with the 15 districts transferred from Eastern Bengal. Bengal and combined with the old province of Assam to form the new province of Eastern Bengal and Assam. The figures for the Assam districts have been kept separate from those of the Eastern Bengal districts.

The area cadastrally surveyed is limited to 5,556,175 acres, which is only about 19 per cent of the whole area of Eastern Bengal (exclusive of Native States).

• *Columns 2 and 3 (pages 22-23).*—Hill Tippera has been entered under a separate head as Feudatory State.

Column 4.—Prior to 1907-08 the whole area of the Chittagong Hill Tracts district used to be shown in this column; but from that year, the forest area of the district and an estimate of the cultivated area were excluded from this column and included in columns 5 and 6; and from 1908-09 estimates for the whole area of the district have been prepared and shown in the proper columns.

The area cadastrally surveyed is limited to 31,458,845 acres, which is about 46 per cent Bengal of the area of the province (exclusive of Native States).

Columns 2 and 3 (pages 24-27).—Since 1894-95 Sikkim, Cooch Bihar, and the Tributary States in Orissa and Chota Nagpur, have been classed under a separate head as Feudatory States.

Column 2 (pages 28-32) includes from 1907-08 the area of the Siwalik Range in the United Dehra Dun district, which was formerly excluded. *Provinces.*

• *Column 4.*—Included until 1906-07, the area of hill tracts which possess no agency for collecting statistics. It also included the area of the family domains of the Maharaja of Benares situated in the Benares and Mirzapur districts, and some portions of Jhansi and Ballia. From that year returns have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Column 2 (page 33) states the area as given in the settlement records.

Column 4.—Up to 1907-08 this column included areas of certain khalsa muafi, jagir, and Ajmer-Merwara. istimrar villages for which no returns were available. From 1908-09 details for all these areas have been ascertained and they have therefore been excluded from this column and included in columns 5 and 6.

Column 2 (page 14).—There is no record of area according to professional survey. The area stated is that of the whole pargana including jagir and mām villages as given in the settlement records. *Manpur.*

Column 4 (pages 34-36).—Prior to 1906-07 the figures in this column represented, except Panjab. in Simla and Kangra, the area in river beds not accounted for in the revenue papers: in Simla and Kangra the figures referred to high mountainous tracts. From 1906-07 all these areas have been excluded from column 4 and included in column 5.

• *Column 6.*—Up to 1905-06 this column excluded the area in river beds not accounted for in the revenue papers, and high mountainous tracts. In 1906-07 such areas were included except in the districts of Gurgaon, Simla, Kangra and Gujrat; but from 1907-08 figures, based more or less on estimates, for all these areas have been included.

Column 3 (page 33) represents the area of the Phulera and the Upper Tanawal States in N.-W. Frontier. the Hazara district, which was formerly shown in column 4 as area for which no returns exist.

Column 2 (pages 37-39) states the area as returned by the provincial revenue survey Bombay and and settlement department, supplemented in the case of Native States by the returns of the Sind. topographical survey. The revenue survey being incomplete in Sind, the exact area of that province is not known: the column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

Column 4.—Up to 1906-07 this column included areas of all unsurveyed villages for which no returns were available. From 1907-08 estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Column 6.—The figures of column 5 are repeated because the areas in village papers are derived from the revenue survey records.

Column 4 (pages 40 and 41) included up to 1905-06 the unsurveyed areas of zamindari *Central estates and waste land grants for which no returns were available. From 1906-07 returns *Provinces.* based on estimates have been prepared for these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

* In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects.

Column 6.—The area for which accurate statistics are available is steadily increasing and until the survey is complete and resettlement finished, there will always be changes which render comparison difficult.

Berar. *Column 2 (page 42)* states the area as ascertained by the local survey and settlement department.

Madras. *Column 2 (pages 43—45)* states the area as ascertained by the provincial survey department supplemented, for tracts which have not come under the operations of that department, by areas calculated from the returns of the topographical survey.

Column 4.—Up to 1906-07 this column included chiefly areas of zamindaris or large proprietary estates permanently settled, which have not been cadastrally surveyed and possess no adequate agency for the collection of statistics, except some of the estates under the Court of Wards and private European managers which furnished returns. It also included certain raiyatwari and whole inam villages for which no returns were forthcoming. From 1907-08, however, estimates have been prepared for all these areas, and they have therefore been excluded from this column and included in columns 5 and 6.

Columns 5 and 6.—Up to 1906-07 these columns excluded the major portion of the zamindari estates and certain raiyatwari and whole inam villages for which statistics were not available, but from 1907-08 estimates for these estates have been prepared and included. It should, however, be borne in mind that these estimates are not comparable for accuracy with the figures which are collected by adequate agency employed for the purpose. Of the total area (89,571,650 acres) entered in column 6 for 1908-09, 65,655,600 are based on actual returns and 23,916,050 on estimates.

(a) The area of Kamptee cantonment

(b) In 1905-06 the major portion (about 78 per cent) of the Sambalpur district was transferred from the Central Provinces to Bengal. The remaining portion, together with the districts of Raipur and Bilaspur, was formed into the three districts of Drug, Raipur and Bilaspur. The figures for the years 1903-04 and 1904-05 for the whole of the old Sambalpur district are shown in the tables for Bengal in this volume.

* See explanation given in the Explanatory Notes (page 11.)

(b) Travancore and Cochin

(c) Excludes a gross area of 3,194,931 acres in North Arcot, South Arcot, Salem and Madura, for which details for succeeding Tables are not available

• See explanation given in the Explanatory Notes (page 12)

TABLE No. 2—CLASSIFICATION OF AREA.

The first part of this table deals with the classification of the area entered in column 6 of table No. 1, and gives the proportions (columns 2 and 3) withdrawn from cultivation by inclusion under forests or, for some other reason, (column 4) cultivable land available but not yet taken up, (column 5) land occupied but not under crop during the year of report, (column 6) the net area under crop, that is, after deduction of the area cropped more than once in the year. The second part (columns 8 to 13) gives the area irrigated from various sources, and (columns 14 to 18) the distribution of the irrigated area under specified crops.

The headings altered since 1866 are noted below:

1866 I A—1	1884 A	1891 A—2
Cultivated	{ Actually cropped	Net area cropped.
	{ Current fallows	Current fallows.
Culturable	Available for cultivation	Culturable waste other than fallow.
Unculturable	Not available for cultivation.	Not available for cultivation.
Unappropriated cultivable waste.	(Omitted)	(Omitted).
Communications	(Omitted)	(Omitted).

GENERAL NOTES.

Column 2 (pages 50 and 52).—“Forests” means “any land classed or administered as forest under any legal enactment dealing with forests” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note.

The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain forest areas worked and returned by the Forest Department are not included in the areas for which village papers exist, and are therefore excluded from these tables.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area. From 1901-02 areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

Columns 8 to 13 (pages 50—53) state the area actually irrigated during the year, areas cropped more than once being counted once only.

Columns 14 to 18 (pages 51 and 53) state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests.

The variations in the areas shown in different years under the same item in the same district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

PROVINCIAL NOTES.**Upper and Lower Burma.**

*Column 2 (pages 54—60).—*The area entered in this column is that given in the forest administration report, and includes reserved forests and fuel reserves. From 1906-07 estimates of the forest areas in certain hill tracts have also been included.

Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.

Column 4 includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos, when not grown in forest areas, are also included in this column.

Column 5 includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma such lands are assessed at privileged rates, but in Upper Burma no assessment is levied on land left uncultivated.

Columns 14 to 18 include only crops actually irrigated; for instance, where an unirrigated crop of sesamum is taken off land which is afterwards irrigated and planted with paddy, the area grown with sesamum is not included in this column.

Column 2 (page 62).—“Forests” formerly included protected and reserved forests. *Assam.* Since 1903-94 reserved forests only have been entered. The figures differ slightly from those in the forest administration report because of the difference in the period embraced in the two statements.

Column 5 includes generally all lands which are thrown out of cultivation or not cultivated, but remain in the occupation of leaseholders. Estimated figures for the Naga and the Lushai Hills have been included from 1907-08.

Columns 8 to 18.—No figures are available of areas irrigated except for Kamrup, Darrang, Sibsagar, and the Lushai Hills.

Column 2 (pages 64—66).—The figures represent Government forests only.

Eastern Bengal.

Columns 3 and 4 include private forests and unclassified State forests.

Columns 8 to 18.—No reliable figures are available of areas irrigated except for Rajshahi and Rangpur and for certain cadastrally surveyed tracts in some other districts.

Column 2 (pages 68—74).—Up to 1905-06 the figures represented Government forests only. From 1906-07 estimates of other forest areas, furnished by district officers, have also been included.

Columns 3 and 4 included private forests and unclassified State forests up to 1905-06.

Columns 8 to 18.—Since 1898-99 the areas and crops irrigated from Government canals are stated, estimate for areas irrigated from all sources have been given from the year 1908-09.

From 1906-07 estimates have been prepared and included for Almora, Garhwal, the hill United portion of Naini Tal and of pargana Kera Mangraur in Mirzapur, for which complete figures were not available before.

Column 2 (pages 76—84) includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which exclude these areas. From 1907-08 this column also includes the Siwalik Range in the Dehra Dun district which was formerly excluded.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Columns 8 to 13.—Government canals include private canals except in Naini Tal, for which district separate figures for private canals have been obtained since 1895-96. From 1903-04, however, the areas irrigated from certain private canals in Budaun and Basti and from 1907-08 such areas in Gorakhpur, which were formerly included under “other sources”, have been shown under the proper head “private canals.” There are very few private canals in the United Provinces.

Column 2 (page 86).—The forest area relates to khalsa, jagir, and minor istamiat *Ajmer-Merwara.* villages, but excludes village lands managed by the Forest Department which do not technically constitute Government forests.

Column 2 (page 50).—The forest area relates to Government forests including those in jagir lands. *Manpur.*

Column 6 includes the area cropped in khalsa (Government) as well as in jagir villages.

Column 2 (pages 88—94) includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality. *Panjab.*

Column 3.—From 1907-08 this column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, 3,896,960 acres of mountain tracts in Kangra, and 24,998 acres of the “Pabbi” forest area in Gujrat. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually. Previous to 1901-02 this column also included the lands on which the crops wholly failed, as well as a fraction of those on which they partially failed proportionate to the degree of the deficiency.

Column 6.—Previous to 1901-02 the figures in this column represented the area on which the crops harvested would have been grown in a year of normal productiveness. That is to say, each of the returns of the actual areas from which crops were taken was multiplied by a

fraction representing the relation of the crop harvested to a normal crop, and the difference between this product and the actual area was added to the fallow area. From 1901-02, however, the area sown has been reported without reference to the area harvested or the condition of the crops.

Columns 8 to 18 state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1906-07, areas which bore two crops under irrigation in a single harvest were also counted twice; but from 1906-07 such areas are only counted once. As regards columns 14 to 18, prior to 1906-07, the figures were those of harvested areas reduced to a standard of normal productiveness (see note to column 6 above); but from that year areas actually sown have been entered.

N.-W. Frontier. Column 2 (page 96) includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

Columns 8 to 18 (pages 96—97) state the gross area irrigated, that is, land irrigated in both seasons is counted twice. As regards columns 8 to 13, prior to 1907-08, areas which bore two crops under irrigation in a single season were also counted twice, but from that year such areas are only counted once. As regards columns 14 to 18, prior to 1906-07 the figures shown in them were those of harvested areas, that is, excluding areas on which the crops failed, but from that year areas actually sown have been entered.

Sind. Column 2 (page 98).—The figures do not agree with those in the forest administration report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision survey, which the revenue records do.

Bombay. From 1907-08 estimates have been prepared and included for all unsurveyed villages for which no figures were available before.

Column 2 (pages 100—102) includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the forest settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3 includes all land recorded at the survey and settlement as unculturable though at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Columns 8 to 13.—The figures given for private canals, tanks, wells, and other sources are rough estimates.

Column 16.—By "miscellaneous food crops" are understood the crops entered in table No. 3, as sugar, orchards and garden produce, and miscellaneous food crops.

Central Provinces.

Column 2 (pages 104—106) shows the areas administered by the Forest Department; but the figures differ from those in the forest administration report because the actual area of the forests is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance lease villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur and Bilaspur districts, this column also includes from 1906-07 all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

Column 3 states areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4 states (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2 (page 108) includes the forest area administered by the Forest Department, but *Barar*, excludes a large area of cultivated land in the Melghat taluk in Ellichpur shown as forest in the forest report.

Column 3 includes village sites, tanks and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4 includes land available for cultivation but not given out.

Column 5 includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 9 (pages 110—112) includes from 1895-96 the area cultivated within forests, and *Madras*, excludes the area of forests in the Native State of Sandur, in Bellary, not included in the village papers. As this is included in the forest administration report, it accounts partly for the disagreement of its figures with those in this table.

Column 5 includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 6.—Of the total net cropped area for 1908-09 (33,755,304 acres) stated in this column, 27,252,780 are based on actual returns, and 6,502,574 on estimates.

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs.

Column 13.—Of the total area irrigated in 1908-09 (9,444,490 acres), 6,865,170 acres are based on actual returns, and 2,579,320 on estimates.

Columns 14 to 18 (crops irrigated) were discontinued in 1898-99, but re-instated in 1907-08.

Column 2 (page 52) includes reserved and protected forests only. The management of *Coorg*, the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the area of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

Column 3 includes unculturable Government waste and unculturable *banés*.

Column 4 states the estimated area of culturable Government waste.

Column 5 shows (1) the estimated area of culturable *banés*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banés*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

Columns 8 to 13.—Figures for land partly irrigated from springs and mountain stream are not available.
