* See explanation given in the Explanatory Notes (page 283)

The cultivated portion of the zamindari area is not known and the incidence is on the raiyatwari area only

S T 2

TABLE No. 6—TRANSFERS OF LAND.

This table is intended to exhibit the number of voluntary and compulsory transfers of ownership of land or tenant-right, and the area so transferred. Voluntary transfers mean transfers made by actual contract or gift, transfers by inheritance not being taken into account. Transfers of land under the Land Acquisition Act are outside the scope of table.

The table now in use was prescribed in 1891; it differs from the tables formerly in use in the following respects:—

1866 I E—5	1884 I E—5	1891 E
<i>Nature of tenure</i>	<i>Nature of tenure</i>	<i>Nature of tenure</i>
Great zamindaris, complete.	Proprietors.	Revenue-paying.
Shares in such zamindaris, complete.		
Large zamindaris	{	Revenue-free.
Shares in such zamindaris		
Small zamindaris	{	Wholly or partially revenue-free
Shares in such zamindaris.		
Villages owned by cultivating communities.	{	(No alteration.)
Shares in villages owned by cultivating communities.		
Holdings of proprietary cultivators.	{	(No alteration.)
Intermediate holdings of a transferable character.		
Holdings of raiyats at fixed rates.	{	(No alteration.)
Holdings of raiyats with right of occupancy.		
Revenue-free tenures.	{	(No alteration.)
<i>Number of transfers recorded</i>	<i>Number of transfers</i>	
a) By voluntary sale or gift.	(a) By private contract or gift	{
(b) By compulsory sale.	(b) By order of court.	
(c) By inheritance.	(Omitted)	
<i>Average area in acres of each holding transferred</i>	<i>Total area transferred</i>	(No alteration)
(a) By voluntary sale.	(a) By private contract or gift.	{
(b) By compulsory sale.	(b) By order of court.	
(c) By inheritance.	(Omitted.)	

GENERAL NOTES.

It is optional with local Governments to enter or omit transfers of lands held by tenants.

In August 1896 the following rules were prescribed:—

- (1) Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and should be excluded from the table, as also should redemptions of mortgage;
- (2) All temporary transfers such as leases should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table;
- (3) All transfers made by order of a court should also be included in the table;
- (4) The word "court" in the entry "by order of court" should be held to include a revenue court.

Instructions were issued in 1891 to the authorities of the Panjab and the Central Provinces to the effect that the entries under "by order of court" should state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court.

PROVINCIAL NOTES.

Transfers of property in land are not as yet registered in Upper Burma; the information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by gift, sale, or other transaction, for valuable consideration. The term "court" includes a revenue office as well as a civil court.

No record of transfers of property in land was kept in the Kamrup district for 1903-04 and 1904-05

Columns 12 to 21 (page 335) exclude the areas transferred in the Sylhet and Goalpara districts, the information not being available.

Previous to 1896-97, in most districts all kinds of transfers, including transfers by inheritance and non-permanent transfers, such as leases, or usufructuary mortgages, were entered. Since 1896-97 transfers by order of a revenue court have been included: transfers by inheritance and non-permanent transfers have been excluded.

The table is not prepared, the information not being available.

Eastern Bengal.

The table was prepared for the first time in 1908-09. It is however still incomplete as *Bengal*. the transfers shown under head "orders of court" relate to transfers under orders of the Revenue Officers only. Figures for transfers under orders of Civil Courts are not yet available.

Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded, but mortgages with possession are included, as also all transfers made under order of a court. *United Provinces*

Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate, not amounting to proprietary rights, which were formerly included in the table, have been excluded since 1905-06.

Statistics of transfers of tenant-right are not given. Transfers by gift have been included since 1896-97.

The figures exclude all changes due to successions, partitions simple mortgages, redemptions of mortgages, and temporary transfers, such as leases; but mortgages with possession are included. The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, as also all other transfers effected by order of courts, civil and revenue. *Ajmer-Merwara.*

Transfers of property in land are not permitted in Manipur.

Manipur.

Before 1895-96, the statistics of the different kinds of tenure were presented collectively, separate figures for each kind not having been available, and the figures included all kinds of transfers relating to the tenant-rights of proprietors and occupancy tenants, but excluded transfers by inheritance. The transfers included were, (1) partitions, (2) gifts and exchanges, (3) mortgages with possession, (4) redemption of mortgages, (5) sales and permanent transfers for value, (6) other transfers, which last included cases of a miscellaneous nature, such as enhancement of rent or corrections of errors. The few cases of transfers for arrears of revenue which occurred were included under "by order of court." *Panjab.*

From 1895-96 the table includes only transfers by mortgage and sale.

Transfers by mortgage and sale only are included.

N.-W. Frontier.

The table has been prepared since 1901-02.

Bombay and Sind.

Transfers of tenant-right have been included since 1892-93. The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession as well as transfers by sale but excluding transfers by inheritance. The statement does not include leases or mortgages without possession. *Central Province*

The information is obtained from the Registration Department.

Berar.

The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

Only permanent transfers, as by sale or gift, are included, when the parties concerned apply for and obtain transfers of revenue registry. These are entered under "private contract or gift." Cases in which lands are sold for arrears of revenue due to Government are also included if the lands are purchased by private parties, but excluded if the lands are purchased by Government. *Madras.*

Transfers of tenant-right are not entered, the information not being available.

The entry under the head "revenue-paying" includes raiyatwari holdings paying full assessment, and permanently-settled estates paying *peshkash*; and the entry under the head "wholly or partially revenue-free" relates to minor inams and whole inam villages

The statement includes all legal transfers of property (a) by voluntary action of the owners and (b) by virtue of decrees of civil and orders of revenue courts. *Coorg.*

Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

APPENDIX

APPENDIX A*—AVERAGE YIELD OF CROPS.

This statement shows the average yield in lbs. per acre of the principal cultivated crops, revised with reference to the results of experiments made up to the year 1906-07.

GENERAL NOTES.

At the instance of the Secretary of State for India a provisional return of the yield of the principal crops cultivated in India was first compiled in 1892, from various statistical publications, such as, agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc., and to provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which were to be reported in quinquennial returns.

The instructions for the preparation of these returns are that the estimate given should be that of the average outturn on average soil in a year of average character as deduced from a consideration of the information obtained on experiments made during the years under review, so that when multiplied by the average area cropped, it may give as near an approximation as possible to the outturn of the crop in an average year. The Agricultural Department of each Province has at its disposal a provisional estimate of the average yield of land of average quality (under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments annually made is to test the accuracy of these estimates, and to enable the head of the Agricultural Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of exceptionally poor harvests which are reflected in the crop experiments received by the Agricultural Department from the districts, this would not necessarily involve the reduction of the standard estimates for the district or for the province, unless there were other reasons for thinking that, as estimates of yield in average years, they had been pitched too high.

The experiments made during the present quinquennium (1901-02 to 1906-07) are more numerous and are believed to be more accurate than in any of the preceding periods. In all but two provinces they have justified considerable modification of the provincial averages previously accepted as correct, the general trend of the changes being in the upward direction. In the case of Bengal and Bombay, the old provincial averages have been repeated without alteration, as the results of the experiments made in the present quinquennium have not been held to justify any revision. As regards Bengal, however, the district figures have been revised in many instances.

Though the figures of provincial average outturns are believed to approximate to the outturn on average soil in a year of average character, yet the variations between the results of experiments on the same crop in different provinces are so divergent, that some of the returns must still be regarded as problematic.

PROVINCIAL NOTES.

The experiments made from 1902 to 1907 have been more numerous than those in the preceding quinquennial period and give evidence of increasing care and judgment, but the results in Upper Burma are still susceptible of improvement. The experiments have, as before, been usually conducted by Township Officers and occasionally by Deputy Commissioners and Sub-Divisional Officers. In order to show the main product only the following deductions, as in the last quinquennium, have been made from the gross outturn of the crops, namely, for rice 83 per cent, for jawar 30 per cent and for cotton 70 per cent. The estimate of average outturn of husked rice in Lower Burma has decreased from 1,200 to 1,176 lbs. and in Upper Burma from 1,060 to 1,028 lbs., and the yield of wheat and jawar has also been reduced slightly. The average outturn of gram, til and cotton on the other hand has been raised. The variations in outturn are explained to be due mainly to a new method of procedure in calculating the averages. Figures for peas are shown for the first time, as the cultivation of this crop in the province is said to be extending.

In the previous quinquennium, before the constitution of the new province, figures for Eastern Bengal and Assam were shown separately. In the present returns figures for Assam and the districts transferred from Bengal have been combined to give the average of the new province. Detailed figures for each district are not available except for winter rice, rape and mustard, sugarcane, and cotton. In the case of cotton a deduction varying between 40 and 50 per cent has been made as indicating the proportion of lint to seed cotton.

During the quinquennium there has been some improvement in the number and quality of the experiments made, but the results are still far from satisfactory. In many cases representative crops have not been selected and sometimes the area cut has been less than one-tenth of an acre. The experiments are too few and the results too discrepant to justify any general conclusions as to the average yields of the various crops, or afford grounds for

* Appendix B of previous issues

modifying the provisional estimates previously adopted by the Agricultural Department, which are in part a reproduction of the estimates of 1892. In tabulating the returns these unrevised provisional estimates continue to appear in the statement of provincial averages, but in the detailed table the average outturn based upon the experiments conducted during the quinquennial period are shown for each district, irrigated and unirrigated crops being classified separately.

United Provinces

The experiments made during the quinquennium have not necessitated any considerable changes in the provincial averages. Such alterations as have been made are, with the exception of barley, in the upward direction, showing that outturns had been underestimated previously. The yield of maize has increased from 950 to 1,050 lbs., of sugarcane from 2,500 to 2,600 lbs., and of cotton from 150 to 160 lbs. The other changes are unimportant.

Ajmer-Merwara

During the quinquennium, 162 crop cutting experiments (70 in Ajmer and 92 in Merwara) were carried out. The average yield of jawar has been raised, and of maize, cotton and barley lowered, the most important change being the reduction of the yield of maize unirrigated from 1,428 to 960 lbs. A deduction of 70 per cent has been made to obtain the yield of cleaned cotton.

Panjab

Experiments in districts under settlement and in the canal colonies have usually been made on much more extensive areas than one-fortieth of an acre adopted in ordinary districts, and the returns in consequence show fewer abnormal results. Though the accuracy of the experiments is not yet as great as desirable, there has been a steady improvement in the last few years. In the case of most crops the average yield has been raised. The most important changes are as follows:—Average outturn of irrigated rice increased from 1,126 to 1,183 lbs., of irrigated wheat from 935 to 994 lbs., and of irrigated and unirrigated barley from 903 to 1,053 lbs. and from 520 to 652 lbs. respectively. The average outturn of irrigated sugarcane has decreased from 1,727 to 1,607 lbs., and of unirrigated from 1,390 to 1,283 lbs.

N-W. Frontier

The estimates of average outturn are believed to approximate much more closely to accuracy than previous figures, as they are based in all districts, except Peshawar, on the estimates framed by Settlement officers. The average outturn of rice has been raised from 843 to 1,202 lbs., of bajra from 402 to 497 lbs., of maize from 1,159 to 1,342 lbs., and of sugarcane from 1,813 to 2,673 lbs. The outturn of wheat has decreased from 669 to 618 lbs. and of jawar (unirrigated) from 602 to 326 lbs.

Sind

In all districts figures taken from previous returns have been repeated for the majority of crops. Of the experiments selected as giving results typical of an average crop during the present quinquennium four were on wheat, three on jawar and bajra, and one each on sugarcane, rapeseed, and barley. As a result of these experiments, the provincial average outturn of wheat has been raised from 1,066 to 1,222 lbs., of barley from 965 to 1,076 lbs., and of bajra from 763 to 776 lbs. The very high yield of jawar given in the previous return, 1,798 lbs., has been reduced to 1,238 lbs. The average outturn of sugarcane also has decreased from 4,315 to 4,233 lbs., and of rapeseed from 653 to 590 lbs.

Bombay

The estimates of 1897 were prepared with great care and the experiments made in the last two quinquennial periods have not justified any general revision. No change, therefore, has been made in the provincial averages previously reported, though there are indications that the average outturn of wheat and ragi has been pitched a little too low and that of sugarcane somewhat too high.

Central Provinces and Berar

In the previous quinquennium separate figures were given for the Central Provinces and for Berar, but the provincial averages are now compiled for the first time from the combined figures. The bulk of the experiments have been carried out by Settlement officers; but such experiments as have been made by District officers show greater care in selection of crops for experiment and fewer gross errors than in the previous quinquennium, though it is stated there is still room for improvement. The tendency has been on the whole to lower average outturn of different crops. The relatively small yield in comparison with the average yield of other provinces is due to the fact that most of the crops are not irrigated.

Madras

The experiments accepted as unobjectionable during the quinquennium were 3,348 in number against 2,619 in the previous quinquennium. The average assessment of the plots of land selected for experiment is in excess of the average assessment of the whole province, and the average yield of the several crops exceeds the standard figures based upon settlement estimates for all sorts and kinds of soil, which, however, are believed to be

below the mark. The average yield of the majority of crops is higher than the average of the previous quinquennium, especially in the case of sugarcane, the outturn of which has been increased from 5,127 to 6,089 lbs. Figures for rice, bajra, and ragi (irrigated and unirrigated) are also higher, and the only decreases are jawar and jingili (unirrigated). The yield has been reported of paddy instead of husked rice, and a deduction of 38 per cent has been made to obtain the yield of rice (husked).

The only experiments made have been on rice. The average outturn has been raised Coorg from 1,446 to 1,507 lbs., which is very high in comparison with the reported yield of other provinces, but is accounted for by favourable climatic conditions, the average rainfall being 123 inches.

Experience gained in the conduct of experiments is believed to have improved the results Mysore considerably. The somewhat unfavourable conditions of two years in the quinquennium are counterbalanced by the favourable conditions of the two preceding years, and the average of the whole period may therefore be taken as fairly correct. The average yield of sugarcane has been reduced from 3,399 to 3,279 lbs., of til (sesamum) from 231 to 215 lbs., and of ragi from 578 to 562 lbs. The average outturn of cleaned cotton has been increased from 52 to 89 lbs., and of horse gram from 212 to 229 lbs.

AVERAGE YIELD OF CROPS
(ALL PROVINCES)

372

NOTE.—The average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped adding the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

* The estimates for Bengal are the standards, adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1906-07, as recorded in Appendix B-f iii, are not considered sufficiently reliable to justify a revision of the provisional estimates.

APPENDIX A—vii

AVERAGE YIELD (lb per acre) of PRINCIPAL CROPS (all irrigated) in each DISTRICT of SIND

DISTRICT	Wheat	Barley	Jowar	Bajra	Gram	Til or jinja (sesamum)	Rape and mustard	Sugarcane (gur)	Cotton (cleaned)
Karachi	1,083	1,279	1,222	482	325	480	426	4,320	...
Hyderabad	828	960	1,719	1,280	373	515	621	4,146	255
Sukkur	1,451	720	1,308	980	656	480	711	...	...
Larkana	1,608	...	1,108	...	...	...	...	...	...
Upper Sind Frontier	969	902	882	640	522	373	768	...	...
Thar and Parkar	1,436	1,518	...	516	...	393	426	...	300
Average for the Province	1,229	1,076	1,238	776	469	448	590	4,233	308

NOTE.—The average for the province is the sum of the district averages divided by the number of districts

APPENDIX A—viii

AVERAGE YIELD (lb per acre) of PRINCIPAL CROPS in each DISTRICT of AJMER-MERWARA

DISTRICT		Barley	Jowar	Maize	Cotton (cleaned)
Ajmer	Irrigated	1,181	600	1,110	210
	Unirrigated	1,020	239	1,660	..
Merwara	Irrigated	1,084	625	821	127
	Unirrigated	507	609	200	30
Average for the Province	Irrigated	1,107	562	965	169
	Unirrigated	763	424	960	30
	Both	1,046	429	714	110

NOTE.—(1) The yield reported in uncleaned cotton has been reduced by 70 per cent to allow for the removal of the seed
 (2) The average for the province is the sum of the district averages divided by the number of districts

APPENDIX A—ix

AVERAGE YIELD (lb per acre) of PRINCIPAL CROPS in COORG.

DISTRICT		Rice (husked)	Rice straw (bye-product)
Coorg	Unirrigated	1,507	2,452

AVERAGE YIELD OF CROPS
(BOMBAY)

890
