for fees to Pleaders; (e) cost of typing Session Records required by Magistrates and Public Prosecutors; and (f) payment of grain compensation allowance

for the whole year.

46. Jails.—The estimate for 1907-08 was Rs. 24,09,000 against Rs. 26,63,436 the actuals of 1906-07. The actuals of the first ten months of the current year show an increase of Rs. 21,000 as compared with the figures of last year, and the revised estimate for the year has accordingly been raised to Rs. 27,25,000. The increase is chiefly under Dietary charges on account of the unusually high prices of food-grains, and also, to a smaller extent, under allowances for the payment of grain compensation, and under Jail Manufactures owing to the higher prices paid for raw materials. The estimate for 1908 09 is Rs. 26,50,000, and includes the pay of a Forms and Jail Press Manager, and larger grants for Dietary charges, Miscellaneous Services and Supplies, owing to local requirements, and for the payment of grain allowances. It also contains a lump provision of Rs. 32,000 for the improvement of the warder service.

47. Police.—The following table compares the figures under this

head :-

|  | ACTUALS. 1907-08. |           | 1908-09.  |           |           |            |

| 11) Criminal Investigation Department. |                   | •••       | 74,000    | 1,31,000  | 1,15,090  | 3,40,000   |
| Total                                  | 61,67,000         | 58,93,000 | 69,05,000 | 71,00,000 | 74,87,000 | 77,63,000  |

The actuals of the first ten months of the current year indicate that there will be a considerable excess under this head, and the revised estimate has been raised to Rs. 74,37,000. The estimate for next year has been placed at Rs. 77,63,000, which includes a lump provision of 4 lakhs for further reorganization of the Police Department, of which Rs. 40,000 has been provisionally allotted for Presidency Police and the balance Rs. 3,60,000 for District Police. Further details are shown in Appendix B.

48. Ports and Pilotage.—The budget provides for a total expenditure of Rs. 17,77,400, against Rs. 15,71,000, the sanctioned estimate for 1907-08. The budget for the current year includes Rs. 4,00,000 to meet part of the cost of a second steam cruiser for the Sandheads, while the estimate for next year includes Rs. 5,47,000, being the balance of the cost of the vessel, and Rs. 40,000 for the purchase of marine stores, etc., for the same. A provision of Rs. 37,000 has also been made for establishment, mess and victualling allowances as the vessel is expected to arrive in the port of Calcutta in May next.

49. Education.—In order to give a correct idea of the growth of expenditure under Education it is necessary to show the disbursements both in

the Provincial and District Fund Accounts, since most of the expenditure under the latter is met from grants from the Provincial Revenues. The following table shows the charges since the year 1902-03:—

|   |      |          | (The fig | ures are in t | housands.)   |          |         |         | and the same        |

80. Medical.—The budget grant for next year is Rs. 27,80,000, against Rs. 22,64,000, the revised estimate for 1907-08 and Rs. 21,98,753, the actuals of 1908-07. The estimate includes a lump provision of Rs. 4,50,000 allotted by the Government of India for sanitary improvements with special reference to the prevention of plague, Rs. 21,000 for an additional Deputy Sanitary Commissioner and a new vaccine depôt at Ranchi, and Rs. 30,000 for a special Engineering Division and additional Medical Officers for making enquiries of a systematic and organized character as recommended by the Drainage Committee. It also includes a provision of Rs. 10,000 for the improvement of the pay and position of Civil Hospital Assistants, larger grants for diet of patients in hospitals, for the appointment of a whole-time Professor of Biology, and for a probationary Chemical Examiner and an Assistant Chemical Examiner.

51. Political.—The estimate for 1908-09 is Rs. 50,000, against Rs. 48,000,

the revised estimate for 1907-08 and Rs. 41,248, the actuals of 1906-07.

52. Scientific and other Minor Departments.—The expenditure under this head is estimated at Rs. 12,78,000, against Rs. 10,50,000, the budget estimate for 1907-08 and Rs. 9,73,964, the actuals of 1906-07. Provision has been made in the budget for the following charges:—

|  | Rs.                |
|--|--------------------|
| Recurring cost of experimental farms                   | 24,000             |
| Annual grant for Fraserganj farm                       | 3,000              |
| Ditto Kalimpong farm                                   | 5,000              |
| Maintenance of Government gardens in and near Calc     | utta 48,000        |
| Provincialisation of Inland Labour Transport Fund      | 19,000             |
| Lump provision for fittings and furniture of Agricultu | ral College 50,000 |
| Improvement of Silk industry                           | 22,000             |
| Purchase of cinchona bark                              | 50,000             |
| Rebuilding the office in the Darjeeling Botanic Garde  | a a. 5,000         |
| Additional Establishment for the revision of the       | ne District        |
| Gazetteers   | 14,000             |

<sup>53.</sup> Superannuation.—The charges under this head rise year after year, owing to the increase in the number of claims to pension. The estimate for 1908-09 is Rs. 26,81,000, against Rs. 25,97,000, the revised estimate for 1907-08 and Rs. 24,86,467, the actuals of 1908-07.

•54. Stationery and Printing.—The estimate for 1908-09 is Rs. 12,92,000, against Rs. 13,66,000, the revised estimate for 1907-08 and Rs. 12,85,202, the actuals of 1906-07. The following table compares the figures:—

| Hraps.   | Actuals.  | Revised<br>Estimate.  | Budget<br>Estimate.   |
|--|---|---|---|
|  | 1906-07.  | 1907-08.  | 1908-09.  |
| Stationery Office at the Presidency Stationery purchased in the country Government Presses Printing at Private Presses Stationery supplied from Central Stores Refunds Total | Rs.<br>63,563<br>33,584<br>4,83,453<br>2,715<br>7,01,191<br>696 | Rs.<br>65,000<br>34,000<br>5,75,000<br>2,000<br>6,89,000<br>1,000 | Rs.<br>69,000<br>37,000<br>5,14,200<br>3,000<br>6,68,000<br>800 |

55. Miscellaneous.—The budget estimate under this head for 1907-08 was Rs. 3,70,000, but in the revised estimate this has been raised to Rs. 4,97,000. The increase is due to the purchase of a trawler in England in connection with the Fisheries enquiry, and to special refunds owing to the reduction in the rate of interest on the Howrah and Rajapur Drainage advances from 5 to 4 per cent., with retrospective effect, under Act II of 1902, and to the actual maintenance charges being found much less than the amount estimated at the time of their capitalization. The estimate for 1908-09 is Rs. 3,93,000, and includes Rs. 1,00,000 for the Fisheries enquiry and Rs. 17,000 for grants to District Boards for general purposes.

56. Irrigation—Major Works (Working Expenses).—The actual expenditure during 1906-07 was Rs. 11,88,907 and Rs. 11,04,000 was passed as the budget grant for 1907-08. During the year there were floods which necessitated larger expenditure on repairs. The maintenance charges were also high, and the revised estimate has now been placed at Rs. 13,49,000. The grant for 1908-09 has been passed for Rs. 12,75,000, which includes Rs. 50,000 for clearance of silt in the Midnapore Canal and Rs. 25,000 for the renewal of plant in the

Dehri workshop, Sone Canals.

• 57. Irrigation—Major Works—Interest on debt.—The budget estimate for 1907-08 was Rs. 24,52,000, but owing to the reduction in the rate of interest on the productive portion of the debt in reference to the average incidence of interest actually paid in each year, the revised estimate for 1907-08 has been reduced to Rs. 21,23,000, and the budget estimate for 1908-09 has been placed

at Rs. 21,24,000.

58. Irrigation—Minor Works and Navigation in charge of the Public Works Department.—The actual charges in 1906-07 were Rs. 19,06,731, while the budget grant for 1907-08 was Rs. 19,00,000. This included Rs. 27,000 on account of the balance of the cost of the suction dredger brought out from England, Rs. 3,00,000 for a canal to connect the Bhangore Canal with the Calcutta Canal and Rs. 1,28,000 as a reserve for unforseen requirements. The revised estimate for 1907-08 has been passed for Rs. 18,33,000, while the estimate for 1908-00 has been placed at Rs. 20,26,000. The budget includes Rs. 25,000 for raising the Pattamundi Canal flood bank, Rs. 2,01,000 for the Dhappa-Bamanghatta Canal, Rs. 2,30,000 for the Madaripur Bhil project, Rs. 45,000 for a new bridge in place of the existing one over the Circular Canal on the Barrackpore Road, and Rs. 1,60,000 for repairs to the breaches caused by floods in the embankments in the Midnapore district.

59. Civil Works in charge of the Civil Department.—The estimate for 1908-09 is Rs. 21,35,000. This includes provision for grants to Excluded Local Funds and Municipalities (Rs. 7,49,000), and to District Funds and District Road Funds (Rs. 12,76,000); which were hitherto adjusted under Contributions

fron. Provincial to Local.

17,18,100

60. Civil Works.—The estimate of expenditure in charge of the Public Works Department for 1908-09 has been placed at Rs. 55,71,000, which is distributed thus:—

|                 |     |     |       |     | Rs.       |
|-----------------|-----|-----|-------|-----|-----------|

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal

1. 1

The Council met in the Council Chamber on Saturday, the 4th April 1908, at 11 A.M.

## Bresent:

The Hon'ble Sir Andrew Fraser, R.C.S.I., Lieutenant-Governor of Bengal, presiding.

The Hon'ble Mg. W. C. MACPHERSON, C.S.I.

The Hon'ble Mr. R. T. GREER, C.S.I.

The Hon'ble Mr. P. O'KINEALY. Advocate-General of Bengal.

The Hon'ble Mr. E. W. COLLIN.

The Hon'ble MR. E. A. GAIT, C.I.E.

The Hon'ble Mr. W. A. Inglis.

The Hon'ble Mr. H. C. STREATFEILD.

The Hon'ble Mr. C. E. A. W. OLDHAM.

The Hon'ble Mr. E. P. CHAPMAN.

The Hon'ble SIR CHARLES ALLEN, Kt.

The Hon'ble BABU RADHA CHARAN PAL.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE, M.A., B.L.

The Hon'ble BABU KALI PADA GHOSH, M.A., B.L.

The Hon'ble Mr. G. H. SUTHERLAND.

The Hon'ble Rai Kishori Lal Goswami Bahadus, M.A., B.L.

The Hon'ble Maharaja-Dhiraj Bijay Chand Mahtab Bahadur, of Burdwan.

The Hon'ble BABU GAJADHAR PRASAD.

The Hon'ble BABU DEBA PRASAD SARBADRIKARI, M.A., B.L.

The Hon'ble MR. F. A. LARMOUR.

#### NEW MEMBERS.

The Hon'ble Mr. R. T. Greer, c.s.i. and the Hon'ble Mr. E. P. CHAPMAN took their seats in Council.

[Babu Jogendra Chandra Ghost; Mr. Oldham; Mr. Streatfeild.]

## QUESTIONS AND ANSWERS.

#### MALARIA IN MIDNAPUR AND BANKURA

The Hon'ble Babu Jogendra Chandra Ghose asked :-

Is the Government aware that Malaria is slowly advancing west-wards in the districts of Midnapur and Bankura, which were quite free from it a few years ago? Will the Government be pleased to institute an inquiry into the causes of it, and prevent the further spread of Malaria, if possible?

The Hon'ble MR. OLDHAM replied :-

"Government is not aware that Malaria is advancing into tracts of Midnapur and Bankura which were quite free from it a few years ago, but will cause inquiry to be made into the matter. The Lieutentant-Governor will be glad if the Hon'ble Member will place at his disposal any definite information that he may have obtained in this connection, which may facilitate the investigation. Government hopes to be able shortly to depute a special Medical Officer, with the necessary staff, to make systematic inquiry into the nature and causes of the fevers prevalent in certain parts of the Province."

#### MANUFACTURE OF SALT IN THE BENGAL AND ORISSA SEA COASTS

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :-

Will the Government be pleased to consider the advisability of encouraging the manufacture of Salt in the Bengal and Orissa Sea Coasts, where Salt was manufactured before, by giving concessions by way of remission of the Salt-tax for a time, and by small subsidies to one or two Companies that may be prepared to make the experiment of manufacturing Salt again in these Provinces?

The Hon'ble Mr. OLDHAM replied:-

"The Hon'ble Member is referred to the answer given by the Hon'ble Mr. McIntosh to a similar question asked by himself in this Council on the 2nd of February last year, when the Hon'ble Member was informed that after careful consideration in 1902, the revival of the industry in this Province was held to be impracticable, and that Government did not propose to take any steps in the direction suggested."

#### CHINESE CARPENTERS.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked :-

- (a) Has the attention of the Government been drawn to the fact that Chinese Carpenters are slowly monopolizing all Government work, and that Indian Carpenters, as a class, are slowly dying out? The European colonies object to Chinese labour, because it is cheap. Does not the Government consider that the Indians have more reasonable cause of complaint at the introduction and employment of Chinese labour, which is dearer than Indian labour?
- (b) Will the Government be pleased to take such measures as may enable Indian carnetters to hold their own against Chinese carpenters?

The Hon'ble Mr. STREATFEILD replied :-

"(a) There is no justification for the suggestion that Chinese carpenters are slowly monopolizing all Government work and that Indian carpenters are

# [Mr. Streatfeild; Babu Jogendra Chamera Ghose; Babu Kali Pada Ghosh.]

dying out. It is unfortunately the fact that Chinese earpenters are more skilful and are therefore necessarily employed where fine work is required; but the Government believes that ample employment is available for competent Indian carpenters.

"(b) It is no part of the policy of Government to interfere with any person of whatever race, class or creed in the exercise of his trade or profession, provided that trade or profession is unobjectionable and is carried on in a legitimate manner."

#### CHINESE SHOR-MAKERS.

# · The Hon'ble Babu Jogendra Chandra Ghose asked :-

Has the attention of the Government been drawn to the fact that a very large portion of the trade of boot and shoe-making is in the hands of the Chinese? Will the Government be pleased to take such measures as may enable Indian shoe-makers to hold their own against the Chinese?

The Hon'ble Mr. STREATFEILD replied :-

"The Hon'ble Member is referred to the reply to the preceding question."

#### KABULI TRADERS.

The Hon'ble BABU JOGENDRA CHANDRA GHOSE asked:-

Has the attention of the Government been drawn to the annual influx of Kabuli traders in Bengal and their oppressive ways of disposing their wares and realizing their supposed dues from the simple people in the Mufassal? Has the Government considered why the trade in which these Kabulis engage is not in the hands of the Bengalis?

### The Hon'ble Mr. STREATFEILD replied :-

"As far as the trade of the so-called Kabulis is legitimate, the Government has no desire to interfere with it. There have been complaints of oppression by traders of this class, but there is no information before the Government, which would lead to the belief that the ordinary law is insufficient to meet the case."

#### THE CASE OF GIRIDHARI LALL MARWARI.

#### The Hon'ble BABU KALI PADA GHOSH asked :-

- (a) Has the attention of the Government been called to the case of Giridhari Lall Marwari, reported in the Calcutta papers of the 18th March, 1908?
- (b) Is it a fact that Mr. Lyall, the District Magistrate, ordered a further inquiry into the case of Giridhari Lall Marwarı for having attested a bond on which one Chargolal brought a suit which was dismissed for default, after the Marwari was discharged by a Deputy Magistrate who held the preliminary inquiry?
- (c) Is the Government aware that after the order for further inquiry was quashed by the High Court, a Civil Suit was instituted by the alleged debtor upon the bond to have it declared a forgery; and has the attention of the Government been called to the fact that the plaintiff in the suit admitted that he engaged his Fleader under orders of Mr. Lyall and he did not pay the Pleader's fees?

[Babu Kali Pada Ghosh; Mr Gait; Mr Oldham; Mr Streatfeild.]

- (d) Is it a fact that, after the bond was declared a forgery by the Munsif and while an appeal was pending, the Public Prosecutor moved Mr. Lyall for further inquiry, and that further inquiry was granted and Giridhari Lall Marwari was arrested on a non-bailable warrant issued by the Magistrate?
- (e) Will the Government be pleased to state if it approves of the District Magistrate being mixed up in the trial of Civil Suits between private parties?
- (f) If not, will the Government be pleased to take notice of the conduct of Mr. Lyall?

The Hon'ble Mr. Gair replied:-

"The attention of Government has been called to the statements made in the Calcutta papers of the 18th March, concerning the case of Giridhari Lall Marwari. Government has at present no information concerning the facts of the case. It is understood that the case is now pending before the High Court, and it is not proposed to consider whether any action on the part of Government is called for until it has been disposed of."

### FRES AND FINES UNDER THE PUBI LODGING-HOUSE ACT, 1871.

The Hon'ble BABU KALI PADA GHOSH asked :-

- (a) Will the Government be pleased to state the amount of fees and fines collected annually under the Puri Lodging-house Act, taking the average of the last three years, and the amount of annual contribution out of the fund to the Municipality of Puri?
- (b) In view of the important object for which the fund is collected, will the Government be pleased to take into consideration the desirability of appointing a Committee, consisting of responsible local men, who may co-operate with the Magistrate of Puri in attributing the fund to its proper object?

The Hon'ble Mr. OLDHAM replied :-

"(a) The following figures give the information asked for :-

| Years.  |     | •       |     | Amount of fees<br>and fines<br>collected. | Amount of annual contributions to Municipalities. |
|---------|-----|---------|-----|---|---|
|         |     |         |     | Rs.                                       | $\mathbf{R}s$                                     |
| 1904-05 | ••• |         | ••• | 29,257                                    | 8,444   |
| 1905-06 | ••• | •••     | ••• | 39,297                                    | 11,656  |
| 1906-07 | ••• | •••     | ••• | 30,935                                    | 6,226   |
|         |     | Tetal   | *** | 99,489                                    | 26,326  |
|         |     | Average | ••• | 33,163                                    | 8,775   |

"(b) The Lieutenant-Governor has under his consideration the desirability of having a Committee to assist with their advice the District Magistrate and Health Officer in carrying out the provisions of the Act at Puri."

# THE SAMBALPUR (EVIDENCE) BILL, 1908.

The Hon'ble Mr. Streatfelld moved that the Report of the Select Committee on the Bill to repeal the Central Provinces Laws Act, 1879, in the district of Sambalpur, be taken into consideration. He said:—

"This Act is really a formal matter; its object being purely to bring the Civil Courts of Sambalpur into line with the rest of Bengal, as regards their

# [Mr. Streatfeild; Mr. Oldham; Maharaja of Burdwan.]

procedure in recording evidence. Formerly, the Courts were under the Central Provinces Laws Act, but now that Sambalpur has been joined to Bengal and that its Courts are subject to the High Court and are presided over by Members of the Judicial Branch of the Provincial Civil Service, there is no reason why this condition of things should continue."

The motion was put and agreed to.

The Hon'ble Mr. Streatfied also moved that the clauses of the Bill be considered in the form recommended by the Select Committee.

The motion was put and agreed to.

The Hon'ble Mr. Streatfelld also moved that the Bill, as amended, be passed.

· The motion was put and agreed to.

# THE PURI LODGING-HOUSE (AMENDMENT) BILL, 1908.

The Hon'ble Mr. OLDHAM presented the Report of the Select Committee on the Bill further to amend the Puri Lodging-house Act, 1871.

### THE BENGAL FINANCIAL STATEMENT FOR 1908-09.

In the absence of the Hon'ble Nawab Bahadur of Murshidabad, the Hon'ble Maharaj-Adhiraj Bahadur of Burdwan, at the request of the President, read the following speech on behalf of the former:—

"Your Honour—I propose not to make any elaborate criticism on the Bengal Financial Statement of 1908-09; but only some remarks on matters

which appear to me to be of special importance.

"With regard to Receipts, I see the revised estimate for 1907-08 of Land-revenue was two crores, ninety-four lakes and fifty thousand; but the estimate of 1908-09 is two crores, ninety-nine lakes and fifty thousand, i.e., five lakes in excess of the current year's land-revenue. In view of the famine and scarcity in Bengal, it is difficult to understand how improvement in Land-revenue can be expected next year.

"Then as regards the revenue from Excise, I beg respectfully to deprecate the progressive increase of Rs. 5,00,000. Increase of revenue from Excise is undesirable, and the Administration should try to secure the maximum of

revenue with the minimum of consumption.

"The estimated increase of Rs. 1,50,000 in the Assessed Taxes does not commend itself to me. The provision in the budget estimate gives encouragement to Government officers in the assessing department to increase the tax, and this gives rise to an idea, which the public entertain, rightly or wrongly, that the assessees are overtaxed and their valid and genuine objections

are not properly dealt with.

"As regards expenditure it is, no doubt, very satisfactory to find that Education has attracted greater attention of the Government than hitherto, and the expenses are increasing. But, I venture to think that the amount provided is not enough. I regret to find that, with regard to Primary Education, only Rs. 1,800 have been provided for Inspecting Maulvies, and Rs. 3,420 for Model Muktabs. It is no doubt very kind of the Government to start Muktabs and have Inspecting Maulvies for spreading Primary Education amongst the Muhammadans, but, what I beg to observe is, that efficiency and utility cannot be secured by observing too much economy.

"Then with regard to Female Education, the provision of Rs. 1,200 for Muhammadan female education is not at all adequate. A monthly expenditure

of Rs. 100 on this head cannot be expected to further the cause.

"The question of Free Education has attracted the attention of the Government, and I believe the time has come when there ought to be not only free, but compulsory education, and provision ought to be made in the budget estimate for the same.

"It is very gratifying to find that there will be special assessment from Imperial Revenue for Police re-organization, and we feel grateful to the Government of India for the liberality shown. I should, however, like to observe

# [Maharaja of Burdwan; Mr. Larmour.]

that hitherto the attempt to improve the efficiency and honesty of the Police, by increasing pay, has not proved a success; and therefore the expenditure of money for the re-organization of the Police should be made carefully. I venture to suggest that the public might, with advantage, be taken into confidence for effecting the desired reform.

"Sanitary improvement of the Province is a subject to which, I crave leave to urge, greater attention ought to be paid, and a lump provision of Rs. 4,50,000 seems to me to be inadequate. I regret to find that the improvement of the Bhagirathi River finds no place in the Budget Estimate; a subject which in the last budget debate I endeavoured to bring very prominently to the notice of the Government. In view of the development of the Railway lines, as a means of communication, the Bhagirathi may perhaps be left out of consideration; but for the supply of drinking water and the preservation of the health of the large population on both sides of the river from its entrance so Nadia, the necessity of the improvement cannot be overestimated. No private successful effort in this direction is possible, and the Government certainly ought to consider the question seriously in view of its importance.

"The price of food-grains has risen very high, and there is very little chance of fall in the price in the near future. Grain Compensation Allowance to officers on small pay has been provided for, and this allowance, I am afraid, is likely to be a burden of a permanent nature. The public is grateful to the Government for the concession made in favour of officers of certain classes. I beg to suggest that the compensation allowance ought also to be given to officers who do not enjoy the privilege, on account of the pay limit. The concession ought to be extended to officers whose pay does not exceed fifty rupees per month, and will be very greatly appreciated.

"A special assignment of Rs. 2,60,000 has been made from the Imperial Revenues in connection with the Famine Relief Scheme, and, in the budget under discussion, besides Rs. 8,50,000 for Grain Compensation Allowance, provision of Rs. 1,56,000 has been made for Famine Relief Charges. In my humble opinion, the amount is not sufficient. I have every reason to believe that the Government will not fail to make adequate provision for saving the lives of famine-stricken people, who will be in need of help. The Government has got a very onerous duty, and though the public also have come forward for raising funds to tide over the difficulty and to relieve the Government to a certain extent in the discharge of its duty, I am sure the administration will successfully cope with the present situation and will not be charged with allowing a single human being to die from starvation."

The Hon'ble Mr. Larmour said:—"Your Honour—Even if I had the desire to criticise the Financial Statement which has been presented to the Council, it appears to me that the time is somewhat out of joint for doing so. It is not, and does not claim to be, a Prosperity Budget, for we have fallen on a series of lean years, due probably to causes quite beyond our control, and we must all earnestly hope that they will soon come to an end. I am fully aware that we cannot ask for any alteration of, or amendment in, the Statement before us, nor for any remission of, or relief from, taxation of any sort, direct or indirect; but there are certain subjects referred to, and arising out of, this budget, on which perhaps a few words would not be out of place.

"The first subject that suggests itself to me, as I suppose it would suggest itself to any one and everyone having the welfare of this great City at heart, is the Calcutta Improvement Scheme, regarding which it may surely be said that 'hope long deferred maketh the heart sick,' and sick we certainly are, when year after year rolls by and nothing is apparently done. Ten years ago, Sir Herbert Risley unfolded in this Council a fearful and gruesome tale of the state of Calcutta, and his remarks on that occasion gave us hope that in the not far distant future something would be done to ameliorate the condition of affairs which he had disclosed. What has been done and how far have those hopes been justified? A year or so later, Sir John Woodburn submitted proposals for a scheme of Suburban improvement. Five years later, a Conference was held,

### [Mr. Larmour.]

and in 1905 various public bodies were asked for their views, which were communicated promptly and without loss of time, and there apparently the matter ended; save that last year a second Conference was held, but to us who are not behind the scenes, it does not seem that a Conference means an improvement. Just a year ago, Sir Hervey Adamson stated in the Supreme Council that the scheme would probably 'soon' be taken in hand; but here again we are left very much in the dark, for the Government definition of the word 'soon' would appear to differ considerably from the generally accepted meaning of the word. It may be urged that a few years in the life of a nation or a city are no more than a few days in the life of an individual, and that in this sense the word 'soon' is justified; but we, as individuals, would prefer to see it applied in its literal sense, for there is not a man in this room, there is not an intelligent citizen of Calcutta, who does not consider that the sanitation and improvement of this City are clamant wants; yet it may be fairly asked what has been done during the last ten years and the answer could be equally fairly summed up in one word, nothing, literally nothing?

"In this connection, I note that so far back as 1903-04, say five years ago, the sum of rupees fifty lakhs were set aside in the nature of a trust to be utilized towards the Improvement Scheme. If, through causes at present unknown to the public, that scheme has been delayed with the indefinite prospect of being taken in hand 'soon,' that does not afford any valid reason why this large sum, if it cannot be utilized for any other purpose, should be allowed to lie idle. I am subject to correction, but it does not appear that any attempt has been made to put it out to interest. If it had been invested, say at even  $3\frac{1}{2}$  per cent., which might have been done very easily, it would have made a very substantial and useful addition to the trust and would have been of material assistance in the financial arrangements of the scheme, when and if it does assume a practical form. If I am correct in my assumption, is it unreasonable to ask that this oversight should now be rectified?

"Another matter to which a little attention might be given is, the housing of the poorer classes of Government servants. We hear all round a great deal of the increased rents in Calcutta; we hear of the necessity of official residences being provided, and we hear occasionally of such residences having been bought. This is quite as it should be, and no possible exception can be taken to such action, so long as the tax-payer is satisfied that a fair remunerative return is made on the capital outlay. But, Sir, I do not think that what is being done, or has been done, goes far enough. So far, these residences are apparently intended only for officials on large salaries, who, it would appear to the uninitiated, are in a position to secure suitable residences, if they choose to pay for them. I speak with all reserve and only from the information placed before us; and from this it does not appear that anything has been done, or is contemplated to be done, to provide decent house accommodation for the poorer class of clerks and others on salaries of about Rs. 300 a month and under. These are the men on whom largely depends the efficient working of the machinery of Government, and these are they who are mostly in need of, and are unable to obtain, decent accommodation with the very limited means at their disposal. I trust, Sir, that some attention may be drawn in this direction, where improvement is so much wanted.

"I trust I may be pardoned if I take up a very little of the time of the Council by alluding to a subject which I personally and naturally have very much at heart, and that is the important question of industrial training, which appeals not only to a few directly interested individuals, but to every thinking man, who is concerned in the advancement of the best interests of the country. We fully recognize that Government has been no niggard in the provision that has been made for the promotion of Education, nor would I for one moment advocate any retrograde movement in this direction. Let us educate our youths by all means, even though at present there would seem

# [Mr. Larmour; Babu Deba Prasad Sarbadhikari.]

to be a considerable excess of supply over demand for men with University letters after their names, who find it difficult to obtain outlets for the exercise of their attainments. But, Sir, the man who can work with his hands, aided by his brains, will never lack for lucrative employment. The upraising of a nation will never be accomplished by platform oratory or political agitation, but will materially depend upon the men who know how to turn to good account the workmanship of the trained and skilful handicraftsman. It is in this cause, that I plead for the assistance of Government. I fully recognise that this is not an opportune moment to ask for much in the way of a grant for Industrial Training. I am also aware of the fact that some progress has already been made in this direction; but I would urge it as a matter of imdortance that, when we have passed through our times of depression and when it shall once more become the pleasing duty of the Financial Secretary to present a Prosperity Budget, this subject should receive more attention at the hands of Government.

"In connection with this subject, I note certain questions in the paper this morning regarding Chinese labour. I am quite prepared to emphasize what has been put forward by the Hon'ble Member, and it is certainly a fact which my experience has proved that the Indian, or more strictly speaking the Bengali, Carpenter, is being slowly, but surely, supplanted by his Chinese competitor. What the Chinaman's system of training may be I am not in a position to say, but it undoubtedly is far superior to anything that the Indian Carpenter can or does get. Again, speaking from my own experience, this gradual dying out of the Bengali Carpenter is very materially due not only to his lack of training, but also to the disinclination of parents to let their children follow the calling of mechanics. I have known several instances of Bengali Carpenters, in my own employ, bringing their sons to me to be taken on as clerks in my office, with an Entrance or First Arts qualification. Twenty-five years ago, our workmen were nearly all Bengali Hindus, and there was not a single Chinaman in our employ and only one or two Muhammadans. Now we have a large number of Chinamen, and among the Indians the Bengalis are in a very small minority. The Chinaman it is true gets larger wages, but he earns his money to the hilt; works steadily; takes only one or at most two holidays in the year; is sober, punctual and intelligent, and does not need to be continually urged to his work. The Bengali, I am constrained to say, is very much to the contrary. He gets small wages certainly, but he earns for his employer even less than he gets. As a rule, he takes little or no real interest in his work, and if not carefully watched, will scamp his job. This, therefore, is an argument which forcibly brings to the front the necessity that exists for some system of training that will improve the status of the Indian Mechanic.

"I feel sure that in taking this opportunity of thanking Your Honour's Government for the liberal grants made to the Medical Institutions of Calcutta, I am only expressing the unanimous sentiments of the whole community, official and non-official, European and Indian, alike. This is money well spent, and will invoke the blessings of all those whose lot it may be to derive benefit from those institutions."

The Hon'ble Babu Deba Prasad Sarbadhikari said:—"The Hon'ble the Financial Secretary deserves every praise and congratulation for the painstaking and sympathetic frame of his maiden Budget, and for the clear and lucid manner in which it has been handled and presented under severely trying circumstances. If it is not given to us to be able to compliment him, on what in Council parlance has come to be known and called a 'Prosperity Budget,' a phrase that I confess I have not been able to understand, it is none of his fault, but more our misfortune; and the Hon'ble the Financial Secretary has the fullest measure of our sympathy and commiseration.

"Thanks to the exigencies and mysteries of a system, that is one other thing that I do not understand, hardly two successive budgets are framed or presented by the same Financial Secretary, and the wonder is "that they do it so well. It makes non-official Members look small in their own estimation

and that of their constituents, that during two years of their term they achieve so little in comparison.

"I also gladly bear willing testimony to the marked and ready courtesy of the Financial Secretary and Your Honour's other Secretaries and the Members of the Board of Revenue, to the non-official Members of Your Honour's Council, who were fortunate enough to be associated with them, in the consideration of the draft budget at the informal Conferences that Your Honour was pleased to have convened. Failing a constitutional basis for exercise of rights, in regard to preparation and control of the annual budget, such Conferences come nearest to what may, in the existing state of things, be done for giving Members of the Council an advance insight, as it were, into what would be laid, cut and dried, on the table in a few days or weeks, and which no criticism or debate would in any way alter or amend. In regard to an undoubted concession and indulgence, one is loath to offer remarks and criticisms that may be regarded as ungracious; particularly on the part of one who, almost immediately after his joining the Council was, through Your Honour's kindness, permitted to enjoy the distinguished honour of being invited to these Conferences. But Your Honour's well-known telerance for criticism, however unreasonable, if well-meaning and bond fide, encourages me to observe that if these Conferences are to be really useful, it would be an advantage to associate with them as many of the non-official Members as would have the time and inclination to join. They should, moreover, have timely access to materials for effective study of, and comment on, the proposed provisions; and should have some slight measure of that trained assistance, which is a strong point of one of the largest and best organized and most resourceful of Secretariats in British India.

"Association with the Conferences, to which I have just referred, was to me personally an honour for which I cannot be sufficiently thankful. At the same time, I cannot help thinking and observing, ungracious though it may appear, that if the number of non-official Members invited to these Conferences was really to be limited, newer and less experienced Members like me, might, with advantage, make room for the more capable and the more experienced.

"And it would be a distinct advantage to allow non-official Members, willing to work and study, facilities and assistance in the shape of reference clerks and Non-official Members are mostly busy men, generally shorthand typists. without the adventitious aids that so largely contribute to successful undersecretariat work. At such a time of stress, amidst their own engrossing work, assistance, such as I speak of, would be of great value and would be highly appreciated. If their work in Council is not as well done as it might and would be done under other circumstances, it is really a matter for consideration, as to whether some such slight assistance might not be forthcoming. The outward and visible symbol of the glory and dignity of their office is the awe-inspiring Chaprassi, that Your Honour with great effect and felicity classed and characterized not long ago; and if non-official Legislators are to be of some use to Your Honour's Government, as it is their place to be, and not mere budgettime show things of no consequence, I would, on behalf of my Colleagues, respectfully ask Your Honour to consider whether some slight office help, of the description that I have indicated, may not be given, before it is time for us to lay down our office. Through the courtesy of the Legislative Secretary and the Superintendent of Government Printing, which I desire to acknowledge, I had prompt and welcome 'first aids' in pressing matters that I brought to their notice the like of which may much contribute to permanent healing: this their notice, the like of which may much contribute to permanent healing; this makes me think that organized assistance, such as I ask for, need not be prohibitive in costs or upset the Secretarist machinery.

"I sincerely trust that my critics will not tell me that there is no formidable legislative measure likely to be before the Council during my time; that such extravagance cannot be thought of, when money is needed for other and more pressing expenditure, and that there is no sufficient plea or warrant for such an unprecedented departure. In the very budget now before us, we have provisions for strengthening the Legislative Secretarist, by the

welcome accession of a member of my own profession, which would ordinarily connote present or expected accession of work. Shorthand typists, attached to convenient groups of non-official Members and authorized to obtain necessary information and papers from the departments concerned, would make the Members' work light, acceptable, efficient and welcome; and any slight extra expenditure would so far be a really profitable investment, if our association in Council work is to be more than nominal.

"Before passing on from the question of these Conferences, I desire further to add that our hurried and ill-thought-out suggestions and observations were received with patience and some information was supplied; some comments were made and some slight additions and alterations, in minor and inconsiderable matters, were vouchsafed. I am not at liberty to refer at length to these confidential proceedings, but am bound to say that for the most part our recommendations which, we were in the first instance expected to make on the spur of the moment and on the spot, and were subsequently embodied in notes, were put off; generally with replies to the effect that funds were not forthcoming for the schemes that we urged and that the Government was pledged to the schemes objected to, or they had already been undertaken. Thus it was, that no substantial impression has been made on the budget by these Conferences.

"Regarding the accessibility to materials, I would respectfully ask Your Honour to consider if, for due consideration of the matters in issue, in their proper perspective, it is not only desirable but absolutely necessary, that full information in the shape of budgets, prepared and sent up by the different departments, should be made available to Members who may desire to consult them. If non-official Members be regarded as the proverbial sand-grain in official optics, my plea would necessarily fail. If, on the other hand, in the spirit in which Council expansion is supposed to be moving they be regarded as valued auxiliaries, and not opponents of the departments concerned or the Government generally, they should be welcome to know all that they want to know or should know and should have opportunities of bringing home to Your Honour's Government and this Council on behalf of their respective constituencies, as it were, which for present purposes would be the various departments, their special needs and requisitions.

"In this view of things and as representing the Educational interests of the Province, I took the hiberty of trying to ascertain its real Educational requirements and requisitions, and nearly all that departmental rules have permitted me to know is to be found in the published budget papers, accessible not only to the Members of the Council but to all diligent students of public affairs, interested in the question. I do not mean for a moment to suggest that a Solicitor should take a Civilian's place in the department, which, after by no means unpleasurable and unprofitable experiences of a departure which has been justified in every way, in the fulness of time is now getting back its own. But I do venture to suggest and claim that the real and living needs of the department should be better known to one who has the honour of representing the University and is supposed thereby and therefrom to represent the general educational interests of this great though divided Province; so that the views of the department might be supported or challenged if need be in this Council and before Your Honour's Government.

"And in this connection, I am free to confess, Sir, the partial weakness of my position in so far that, although I happen to represent the University interests of both the Provinces, I represent but a fraction of their non-university interests. But this admitted weakness is of no vital consequence to the points at issue, and, if anything, it proves that the University, which has before it a veritable giant's work that must be performed with a lapidary's skill, firmness and tact, should be represented on the Eastern Bengal Council as well; particularly because it is so unworthily represented at the present moment in Your Honour's Council. It is a pity, no less than a wonder, that a University representative on the Eastern Bengal Council was not

thought of by the framers or critics of the scheme that gave Bengal a second Province and a second Legislative Council; and may, for aught one know, give it a second High Court and a second University in time: for Education, on all admissions, is the most important interest that could be thought of or provided for by any responsible Government.

"And this, Sir, is not my own assertion, though it well accords with my I shall not, at this time and place, inflict on the Council educational platitudes and educational truisms that are hoary with age, for it is alike needless and useless to do so. I shall content myself by referring to the pronouncement of Your Honour's gifted and capable Secretary, the Hon'ble Mr. Gait, whose confirmation as Chief Secretary has been welcomed all round, who, in closing the last year's Budget debate, rightly characterized the Educational as the most important subject of all. In his recent able and exhaustive Quinquennial Educational report Mr. Earle, the outgoing Director of Public Instruction, says in effect the same thing, which is endorsed by Your Honour's own frank and forceful resolution on the highly interesting and instructive report. His Excellency, the Viceroy, in replying to the address of the Bharat Dharma Mahamandal the other day made similar remarks, which were repeated by His Excellency, as Chancellor of the Calcutta University, in his Jubilee Convocation address the other day. And our distinguished Vice-Chancellor who, without having had the chance of having been an Educationalist by profession, has made educational questions his life work, and whose re-appointment has been welcomed by alt, more than endorsed the Chancellor's utterances. These are all pronouncements fresh in public memory. And it is hardly necessary to go back to more ancient times or to quote more interested authorities, for illustrating the truth of the Hon'ble Mr. Gait's claim that Education is the most important question of all, important from the point of view of the ruled and the ruler alike, important intrinsically as well as from the low-grade point of view of economy and expediency, political and otherwise. It is not necessary to labour points of admitted truth, except as an insurance against 'Lest we forget', and to see and test how far theory and practice are reconcilable.

"Coming at once to details which, having regard to the importance and supreme interest of the subject, I beg leave to examine at length the figures for the year under the head Education, which stand somewhat as follows:—

"In the Hon'ble Mr. Oldham's speech, laying the budget on the table, we were told that the Educational outlay, from Provincial Funds, has steadily risen from 26 lakhs in 1902-03 to  $42\frac{1}{2}$  lakhs in the revised estimate for the current year. We are also told that part of this increase has been borne by the Imperial Government. The one or the other statement must, however, be incorrect; for, if the Imperial Government is bearing any portion of the 42½ lakhs (which is really the case), the outlay from the Provincial Funds cannot be 42½ lakhs. Turning to the budget proper (pages 20 and 21), we find the budget estimate for the next year is Rs. 50,00,000 in round numbers, which similarly includes Imperial grants, such as those under the heading of 'University and Private Collegiate Grants,' amounting to Rs. 1,60,000. Coming, however, to the General Review (page 12), we find that the Educational budget of the year is not Rs. 50,00,000, but is so much as Rs. 61,60,000. If this was any but a mere transfer entry, we should have expected the Financial Secretary triumphantly claim, in his introductory speech, that the Educational budget of Bengal, Provincial or otherwise, has risen from 26 lacs in 1903 to near upon 62 lacs in 1908. He judiciously refrains, however, from such a claim with discreet modesty, because the figures as. 62,60,000 are made up as a result of the recent classification of accounts under the orders of the Imperial Government, by which the adjusting head of contributions between Provincial and Local has been abelished; and more than 111 lacs of rupees spent on Education by local bodies is shown in the Provincial Budget, because it is said that most of the expenditure from the District Fund Accounts is met from grants from Provincial Revenues, that is, revenues which used to be available for Provincial purposes in pre-Self-Government times, such as receipts from ferries and pounds which were localized on the introduction of Local Self-Government.

"Local Self-Government is some years old, and, with increasing age, is soon expected to expand. The framers of the Localization Scheme had never thought of giving the Provincial Government credit for what the local bodies themselves would do by virtue of localization; but, apparently, the scheme is working so well that the Imperial Government thinks that to put their work and the Provincial work together as one whole would make a braver show than to let Provincial work appear all by itself. The methods of classification of accounts, now introduced, may not actually take away with one hand what the other has given; but the paper array of munificence, of which the Hon'ble Mr. Oldham would not lay undue stress in his opening speech or in the budget itself, finds unaccountably prominent reference in the General Review.

"The figures given in the General Review require more than passing examination. Whereas by way of popularizing an unpopular institution, Rs. 80,000, the gift of the Government of India, is devoted to University Education. As can be gathered incidentally, from page 2 of the General Review and nowhere else, Rs. 80,000 out of a lakh and 60 thousands more are given by the Government of India for Collegiate Education, that is, to assist the private colleges to meet the requirements of the University. Neither of these sums is anything like adequate, having regard to the immensity of the area and the vastness of the requirements. For European and Eurasian education there is an Imperial grant of Rs. 65,000, and for Technical Education there is a grant of Rs. 35,000. The total extent of educational assistance that Bengal gets from the Imperial Government is thus Rs. 2,10,000.

"Imperial liberality is not so stinted and limited in some other directions, for the state of affairs is a shade better in regard to Famine Relief, for which Rs. 2,60,000 have been allotted, and in regard to Sanitation, for which a strictly ear-marked sum of Rs. 4½ lakbs has, by way let us hope, of a beginning, been allotted.

"Imperial liberality is, however, the most marked in the case of the Police; because, for Police re-organization, 12 lakhs of rupees has been allowed, and a further sum of Rs. 21,000 has been allowed for relieving Municipalities of police charges. It can serve little useful purpose to repeat the hard things that have been said often regarding such patent disparity; and if the Police requires strengthening and re-organizing, as it admittedly does, we have no reason to grudge the necessary grants, particularly when Provincial revenues are relieved and the grant happens to be Imperial, as it well may be. A better, more efficient, less corrupt and more civil Police would be a boon that no one can reject or resent, and it ought to afford some further field of employment for our educated men by holding out better pay and prospects in its ranks than obtains at the present moment. But Education has stronger claims and higher rights that the Imperial Government has not adequately recognized, which is a grievance that we respectfully ask Your Honour's Government to bring home to the Imperial Government, for this, if for no other reason, that a better educated community will require less Police and Jail expenditure, which between them cost more than a crore and a half, and will require possibly less famine relief. We are glad and thankful that Your Honour made a brave stand in the Imperial Council for Your Honour's own Province, for assistance in regard to Grain Compensation Allowance and for release of Public Works Cess for the benefit of the Province; or, in other words, for a more liberal Provincial Settlement that would not oblige us to go up to the Government of India at every turn, hat in hand, for special allotments. But so long as the special allotment system obtains and Provincial Governments have to resort to mendicancy, few claims can be higher or ought to be better recognized than those of Education and Sanitation.

"Between directing, inspecting and miscellaneous charges, whatever that may include, we have Rs. 8,25,000 out of the total of 50 lakhs. The Government Colleges, general and professional, that are not within the range of inspection cost 12 lakhs and a half. The Government Schools (general and special, whatever that distinction again may be) cost over 14 lakhs. Grants-in-aid to private schools amount to over 151 lakhs, and

Scholarships come up to only Rs. 1,70,000. Last year there was an item of Rs. 1,41,000 under the heading of 'Re-organization of Salaries', but there is no charge under this important head this year; nor is there any provision for Primary Education and other educational schemes this year, as against a provision of Rs. 4,54,000 last year, which had not been expended we suppose.

"There may be some provisions, covering this ground, under the heading 'Special Government Schools' which, among other things, shelters remarkable charges like those of Reformatory Schools and increased dietary for Reformatory school students. The whole thing is so much mixed up that it is impossible to get a sufficient idea as to how much is for Education proper and how much is for absolutely extraneous purposes, which ought not to have been permitted to swell the Educational budget. For example, according to the General Review as well as the actual budget figures, we have a lump provision of Rs. 35,000 for Technical Education; whereas, in the Hon'ble Mr. Oldham's speech, we have it that Technical Education, in all its branches, accounts for an aggregate provision of more than six lakhs. The most curious and diligent will find a difficulty in making up the six lakhs from any of the figures in pages 20 and 21, even if the whole of the costs of the Civil Engineering College, amounting to Rs. 3,27,700, be taken into consideration.

"If there was any real object in making mere paper entries, the charges for Agricultural and Veterinary Colleges and similar other institutions, might well have been brought under Education, instead of Agriculture; and if Reformatory Schools are to come under Education, Jails and the Police, which are supposed in some quarters now-a-days, to have excellent educative effect, may as well do so and the array would be braver still. This cannot and ought not to be the idea and the object, for, from page 22 of the budget, we find that the charges for the Medical Schools and Colleges, amounting to Rs. 3,76,000, rightly come under the heading 'Medical' and not 'Educational'; and if there was to be a mixing up, I would much rather have the Medical Education charges included in Education proper than the Reformatory Schools charges, though there may be authority and precedent for this. What I have urged at some length ought to constitute a powerful plea for timely publication of details, for intelligent appreciation of the situation, and for determination, as to how much is for education proper and how much is for educational paraphernalia, of which we are apt to have more now-a-days than of the real article.

"An outstanding feature of the Educational figures is the preponderance of the directing and inspecting charges, though that which is to be directed and inspected has not proportionately expanded. According to the General Review, inspection charges amount to  $6\frac{1}{2}$  lakhs, and the charges for the legitimate subject-matter of inspection, the 'General' Government schools, amount to Rs. 6 lakhs and 17 thousand. The 'Special' schools, costing 7 lakhs, 15 thousand, cannot claim or need any very considerable share of this inspection, for we have Reformatory Schools and such like things included under the heading. The Private Schools, which cost 15 lakhs, 51 thousand, in grants-in-aid, also do not undergo very extensive inspection, though it is fairly exacting. These classes of institutions, which are the only institutions requiring or capable of inspection under present arrangements, come up to a total of less than 29 lakhs, and the inspection charges by themselves come up to  $6\frac{1}{2}$  lakhs, according to the General Review. If, however, the figures under the head 'Inspection', at page 20.of the budget be correct, the inspection charges are not  $6\frac{1}{2}$  lakhs but 6 lakhs and 87 thousand. The discrepancy, though hardly requiring reconciling, is another plea for publication of details. Out of Rs. 2,31,000, representing the year's addition of non-recurring Educational charges, only Rs. 29,000 is for purposes other than inspection; and 2 lakhs and 2 thousand are for inspection proper. Inspection may be, and no doubt is, highly necessary for sound Education; but inspection whether more money ough not to be spent on the articles to be inspected than off the inspecting machinery. And some of the schools, receiving quits vulgar fractions of the grant of 15 lakhs, would be decidedly the better for less exacting inspections and more liberal grants.

Inspection on inspection and inspection of inspection is apt to end in shrimps and water-weed floating in the improved milk-supply, as happened in the case of the fabled Royal consumer of old. The University proposes to have its own inspections to see that schools are conducted in accordance to its prevailing idea of things; and it would be a move in the right direction to help the University in getting its inspecting staff instead of augmenting the Government inspecting agency, whose very strength may prejudicially affect the University proposals. It is a matter for serious consideration, and I earnestly invite the attention of the Government to this phase of the Educational problem. Now that the University is in direct touch with the schools, University inspections would be much more needed and useful than Government Inspections; and here is a field of co-operation with the University, which Government should welcome and make full use of It should spend more on Education itself than on Inspection of Education, which somehow or other seems to be the dominant idea according to recent notions.

"In connection with the recent augmentation of inspecting agencies, I desire to draw your Honour's attention to some Educational transfers. It struck me that there is now-a-days much freer interchange between the teaching and inspecting staffs than is likely to be beneficial to either branch of the service. It may be erroneous to speak of them as two branches of the service, under the exsisting order of things. But teaching is hardly likely to be of a superior order, so long as teachers and professors have to look to inspectors' posts for remuneration and recognition; and there is bound to be loss of administrative efficiency, if trained inspectors are likely to be drafted on to teaching work indiscriminately. A well-marked line of cleavage seemed to be apparent in recent times, and if that was judiciously maintained it would hardly be necessary to have two distinct branches of service. But, if for any object, interchange of officers, like what has been going on of late, be deemed necessary, the sooner the branches are separated and the teaching branch be made self-contained and permanently more attractive, the better for real Educational reform.

"We cannot gather from the budget before us as to what the exact and actual requirements of the Education Department for the year was; and all that we have is what the Financial Department, out of regard to its own resources, has been able or has thought fit to allow, possibly in consultation with the Hon'ble Mr. Streatfeild who is directly in charge of the Department. We do not know how and on what principles and by whom the process of cutting and clipping has been conducted; and whether an arbitrary line has been drawn somewhere in the expert budget? I trust I shall be pardoned for giving expression to these misgivings, for such arbitrary lines are not entirely a myth. Instances are not wanting, though fortunately rare, in which experts in Science have made requisitions for scientific instruments, which a superior department or a superior officer in the same department has sanctioned up to a certain length down the list of requisitions, without thinking fit to have the requisition suitably revised and re-cast as a whole, by reason of the proposed retrenchment. Such interference is least tolerable in the Education Department; and if the Government is not able to sanction more than portions of the departmental requisition either the departmental requisitions should be carefully revised in the light of the possible sanction, or a lump sanction should be made and the department should be left to re-adjust its requirements. This may be anticipating Decentralization to a certain extent, but would undoubtedly contribute to good work and efficiency; and if the idea cannot be immediately or entirely worked out a certain amount of departmental elasticity ought to be permissible, so that the pressing wants, that the Financial Department may have failed to appreciate, may to some extent be attended to.

"The most noticeable omission in the Education budget of the year is, that of sufficient or any provision for extension of the Presidency College. After straining one's eyes all through the budget, one comes across an item of Rs. 20,000, at pages 3 and 13 of the General Review, for improvements in the

Presidency College, a non-recurring charge, which must be intended for purchase of instruments and implements and such like things; and neither the strengthening of the staff, nor for puchase of land or erection of buildings. At A page 13, there is a lump provision of Rs. 25,000, for strengthening the staffs of Government Colleges, against the necessary minimum of ten times as much, in which the Presidency College may no doubt duly share. It is well-knownthat all our Government Colleges are undermanned, and if College authorities were invited or encouraged to complain or suggest we should have requisitions for two, if not three, Professors and Demonstrators, instead of a solitary one that has now to do all the work. And they should have to be Professors and Demostrators on higher pay, with better prospects and of quite a superior calibre. In this connection, Dr. Moris Travers' note on his inspection of the Presidency College affords grounds for serious reflection; and if the Presidency College is not as well-equipped and as well-manned, as it ought to be, the University will be powerless in regard to other colleges, with far lesser resources. down of Rs. 20,000, for improvements or the possiblity of participation in the lump provision of Rs. 25,000 for strengthening of staffs, would be wholly inadequate; and the provision of Rs. 20,000, for improvements, brings one back to the question of removal or extension in situ. If the College is ever and at all to be removed, expenditure of Rs. 20,000, or any sum for improvement, would be wholly misspent. I should like, in passing, to make similar remarks in connection with the expenditure of Rs. 36,000 on the improvement of the Sibpur Laboratory, in view of its proposed removal to Ranchi. If, on the other hand, the Presidency College is not to be removed substantial outlay on the Laboratories and the Library will be needed, and, removal or no removal, the staff must be materially strengthened as soon as possible, for many important branches of study are and have to be neglected.

"And then comes the substantive question of Extension or Removal. Government has definitely pronounced that there is to be no removal; but there will be improvement in situ as decided at the Belvedere Conference of the 3rd of July last. It is not correct to say that the conclusion come to at the Conference was that, subject to the sanction of the Secretary of State and to the existence of funds, land might be acquired in the vicinity of the present building for expansion. It was declared that the scheme had been definitely decided on and must be carried out gradually; that it was necessary at once to notify the land required for acquisition, and to provide funds for that in the first place. It was admitted and declared that the longer the matter was delayed the greater the prices would have to he paid for the land, and that it was essential, therefore, to take up the land without delay. It was observed, with great justice and propriety, that it would be harsh and impolitic to notify the land and not proceed with the acquisition, as fast as it was reasonably possible. It was stated that it would be well to acquire the land within 2 years, and funds ought to be provided for that purpose, which the Financial Department was asked to do in July last; so that land might be acquired within the last and present year, or rather the present and the next financial year. The acquisition notifications were ordered to be issued at once, and were as a matter of fact issued at once and are carrying important legal incidents, to which even the Government cannot shut its eyes. Steps were ordered to be taken at once with regard to acquisition, which meant something more, I suppose, than more issue of notifications. Nothing was done last year. This year's budget is also a perfect blank, so far as this important question is concerned; and there is no explanation for the omission in the Financial Secretary's speech, or in his General Review or in the budget. We have of course Dr. Traver's powerful plea, renewed in his report for removal of the College. It is dated so late as the 24th of January, 1908, and the public could hardly be blamed if, reading Dr. Traver's report between the lines, it were uncharitable enough to construe the omission of this essential budget provision as an index of the disinclination of the Government to embarrass future and further consideration of the question, by including easily avoidable expenditure. Nothing could be more explicit and definite than the decision of the Belvedere Conference, or Your Honour's pronouncement after

the last year's Budget debate; and, if the sanction of the Secretary of State was needed, it is greatly to be regretted that it was not sought or obtained before the notifications were issued and people's ordinary and inalienable rights were interfered with to their serious detriment and prejudice. It is, in relation to projects above ten lacs, that the sanction of the Secretary of State is needed; and as the idea was to acquire the land in two years, the estimate might have been spread over two years and the delay, due to the formality of obtaining the sanction of the Secretary of State, might and may yet be avoided. If Provincial Revenues are inadequate, the Imperial Government, which can afford a gift of 12 lakhs of rupees for Police re-organization, might easily afford a similar or even lesser gift in aid of Education; and we would strongly and earnestly beseech Your Honour to impress the urgent nature of the need upon the Government of India, so that work may be partially begun next year and completed the year after. Till the Presidency College is placed on a proper basis, the educational standard of the country will not be adjusted and this delay will throw back all real reform for a number of years. The matter is thus not of the every-day type, but is one of truly vital importance to the educational future of the country. We do hope and trust that, before the time comes for Your Honour to lay down the reins of your exalted office, it will be possible for Your Honour to mark its close with this great educational work, greater in value in our eyes because out of deference to public opinion; and at variance with Your Honour's cherished ideas and wishes in the matter, Your Honour has been graciously and generously pleased to consent to the retention and improvement of the Presidency College, where in the midst of many memories it stands and has stood. We have great confidence, Sir, in your suasive powers, and we feel sure that if matters are put before the Government of India, with proper vigour and emphasis, the prevailing wail due to this serious omission will yet be turned into a joyous pæan of praise.

"There has no doubt been a clear increase of eleven lacs and-a-half of rupees in three years of Your Honour's regime, for which we have every reason to be grateful; for it betokens a sincere and sustained desire to give its due share of importance to this most important question. Considering how the Provincial revenues are dealt with by the Government of India under the Settlement system, it would be difficult to say that Your Honour's Government is not doing nearly all that can be done; but our and Your Honour's Government's plea must persistently be for more generous treatment of the educational situation, the verities of which have been abundantly realized, recognized and admitted by the Government of India in more than one place and on more than one occasion. And how such pleas can operate, when strongly and earnestly put forth, must be shown by the success or otherwise of Your Honour's appeal in aid of the Presidency College extension scheme, which I invite and beg of Your Honour to make. In the Viceroy and in the Finance Member of the Government of India, we have friends of Education who are able and willing to see things in their proper perspective; and if the other Provinces have claims, that ought to be recognized, we certainly do not propose to press and push ours to their exclusion. For, Sir, with regard to Education more than with regard to other things, we must realize that 'India forms one great Empire; that the Provinces are largely connected in interest, and that in this great body if one member suffers the other members suffer with it. badly-educated India is bad for the rulers as it is certainly bad for the ruled; and a better educated, strong, loyal and resourceful India will require far less policing and far less internal militarism, than the Government thinks is good for it at the present day. He will be a friend of Bengal, among our pro-consuls, who is able to impress this view of things on the responsible Advisers of the Imperial Government; and we shall rejoice to feel and to be able to say that Your Honour has laid the foundation of a lasting superstructure of national gratitude. We propose to give ourselves and Your Honour no rest, till, between Provincial and Imperial resources, a substantial beginning of the Presidency College scheme has been made; and if Your Honour takes up the matter in right earnest, as I have no doubt Your Honour will, we ought to get the first instalment of beneficence earlier than we think
