PART II

NOTE

WHOLESALE PRICES OF STAPLE ARTICLES OF TRADE AND CONSUMPTION

The tables in this part of the volume contain figures of the wholesale prices of some of the principal staples of the imports and exports, the wholesale prices of food-grains and other articles in Indian markets, and the price paid by the Supply and Transport Corps for articles for the consumption of troops in India.

Table No. 14—Staple articles of Imports—The articles in this table, though few in number, represent in their aggregate value a large share of the total import trade. On the average of the last three years the imports of cotton-goods (yarn and manufactures), of metals, and sugar represent about 58 per cent of the whole imports into India. In consequence of the development of the Indian coal-fields, foreign coal is no longer a considerable item in the import trade; and the rapid increase in the imports of kerosene oil, which began in about 1888, has been checked by the competition of oil produced in Burma.

The quotations are taken for Calcutta from the Price Current and Market Report of the Bengal Chamber of Commerce. The price of coal at Bombay is taken from the Bombay Market Report, and of gold from the Calcutta Price Current and Money Market Report, and the prices of Mauritius sugar and of silk are reported monthly by the Commissioner of Customs, Bombay. The average price of bar silver in London as quoted daily by the Bank of Bengal is also given in this table.

The prices quoted are those for the first week of January and July in each year, or where quotations are not available for these weeks, for the nearest period.

Table No. 15—This table shows the variations in the prices quoted in table No. 14, taking the prices of the year 1873 as 100. In case of articles for which the record of prices began in a year later than 1873, the price of the first year for which quotations are given is taken as 100.

Table No. 16—Staple articles of Exports—The prices in this table are taken from the following sources:—

Calcutta:—The Price Current and Money Market Report of the Bengal Chamber of Commerce.

Bombay:—Current quotations of the Chamber of Commerce, Bombay Market Report and Trade Journal published in connection with the *Times of India*, the Current quotations of the Millowners' Association for the price of yarn and T. cloth, and a Monthly Report from the Commissioner of Customs for the price of wheat.

Karachi:—Price Current and Market Report of the Karachi Chamber of Commerce.

Madras:—Price Current and Market Report of the Madras Chamber of Commerce.

Rangoon:—Monthly Report from the Chief Collector of Customs.

The price of opium is obtained from the Finance Department.

The number of articles in this table is very much larger than the number of articles in the import table, and their aggregate value represents about 86 per cent of the total value of exports from India in the last three years.

The prices quoted are those for the first week of January and July in each year with a few exceptions which are mentioned in foot-notes below the tables.

Table No. 17—This states the variations of the prices in table No. 16, the price of 1873 (in most cases the price in March) being taken as 100. In case of articles added to the list after 1873, the price of the first year for which quotations are given is taken as 100.

Tables Nos. 18 and 19—Comparison of the average prices in India and London of staple trade commodities and variations in the prices—Table No. 18 was prepared with figures from 1870 for the consideration of the Royal Commission appointed in 1886 to enquire into the changes in the relative values of gold and silver. It was published for the first time in the volume of Prices and Wages in India in 1890. It has now been limited to the last twenty-five years with the base year 1873.

The London prices, excepting those for wheat, are the annual averages of weekly quotations given in the *Economist*. As regards wheat, the quotations published in the earlier issues represented "Gazette averages" as given in the *Economist*; but it has been found that there is no relation between the said averages and prices of Indian wheat. For this reason "Gazette averages" have been discarded in the present issue, and in their place "Liverpool futures" which actually bear a close relation to prices of Indian wheat have been substituted for the entire series of years. The rates quoted represent averages of the monthly mean quotations of Red American wheat as given in the *Corn Trade News*.

The Indian prices quoted are all Calcutta prices except those of cotton and rice. They represent the average of weekly quotations given in the Calcutta Price Current, which is published by the Bengal Chamber of Commerce. The price of cotton is taken from the Current quotations of the Bombay Chamber of Commerce. The price quoted for Rangoon (Ngatsain and Ngakyouk) rice is the average of the prices reported in a special monthly return which is received from the Chief Collector of Customs, Rangoon. In 1898 prices of Burma rice were substituted for those of Bengal rice.

Tables Nos. 20 to 22—Average prices in London of sixteen principal staples of trade and of bar silver and variations—Table No. 20 was prepared in 1885 for the Royal Commission mentioned above. It was reproduced in the volume of Prices and Wages in India in 1890, with the addition of two descriptions of cotton, namely, (1) Cotton, raw, Dhollera, mid, fair, and (2) cotton, upland, mid, fair. It has also been limited to the last twenty-five years with the base year 1873.

The prices in table No. 20 excepting those of wheat are the annual averages of prices reported in the monthly Trade Supplement to the *Economist*; wheat prices are taken from the *Corn Trade News* as in the case of table No. 18 mentioned above.

In 1899 the following additions and alterations were made:—

1. Coffee (Ceylon) was changed to coffee (East India plantation)

2. Indigo (Bengal), Jute, Linseed (Bombay), Rapeseed (Calcutta), Rice (Bengal), Silk (Surdah), Cotton—raw (Dhollera) and Shellac were omitted—as London prices for all these articles, except shellac are shown in table No. 18.

3. Coals—Hetton Wallsend, Beef—inferior, and Bar Silver were added.

4. A new table (table No. 21) shewing variations in the prices in table No. 20 was added.

The following changes in the tables were made in 1900 :—

1. Iron—Scotch pig, flour, leather, and butter were added.

2. Another new table (No. 22) shewing variations in the prices measured in silver was added.

The system on which table No. 22 is compiled is fully explained in a foot-note printed below the table.

Table No. 23—Annual wholesale prices of food-grains and other articles—Since 1897 wholesale prices of food-grains and certain other articles have been reported for selected marts in each province of India under orders issued by the Government of India in 1896. The following is a list of the articles for which fortnightly wholesale prices are reported, and the provinces from which reports are received. The number shewn under each province indicates the number of marts in that province from which wholesale prices for the article in question are reported.

(a) Red gram

(b) Sheep or goats

* These additions have been made from May 1900

† Added from October 1910

The prices are those governing actual wholesale transactions on the last day of each fortnight or the day preceding, and unless wholesale transactions have actually taken place within the fortnight, no prices are quoted. The definition adopted for a "wholesale transaction" is one in which not less than 10 maunds of food-grains, seeds, grass and straw, and one maund of other articles, such as turmeric, tobacco, etc., change hands. In the case of live-stock, prices are quoted for a score of sheep and for a pair of bullocks. The prices are only quoted for those marts where the article in question is a staple of local trade. The total number of articles for which wholesale prices are reported, as given in the list above, is 47, and there are 104 separate marts from which reports are received. Prices for 29 of these articles shewing 69 marts are published in the *Supplement to the Gazette of India* each fortnight. Table No. 23 contains prices for the following 23 articles shewing transactions in 86 separate marts:—

Rice (husked)	Ragi or Marua	Poppy seed	Jute
Wheat	Maize	Sesamum (<i>til</i> or <i>jinjili</i>)	Tobacco leaf
Flour (wheat)	Gram or Kadalai	Ghi	Turmeric
Barley	Arhar dāl	Sugar, raw (<i>gur</i>)	Sheep
Jawar or Cholum	Linseed	Sugar, refined	Plough bullocks
Bajra or Cumbu	Mustard and rapeseed	Cotton	

The prices given are the simple average of the half-monthly prices quoted from each reporting district.

Tables Nos. 24 and 25—Wholesale prices of certain staple articles in Calcutta and variations—A special statement of the prices of certain staple articles in Calcutta was obtained in 1885 in connection with enquiries into the fluctuations in prices. It was incorporated in the tenth issue of Prices and Wages in India in 1893. No change has been made in the form of the table except that the prices of 2nd and 3rd class bricks, which were quoted up to 1901, have been omitted since that year. The sources from which prices for this table are taken, are stated in the note prefixed to the table. These tables have been limited to the last twenty-five years with the base year 1873.

Tables Nos. 26 and 27—Annual average prices per 100 lb paid by the Supply and Transport Corps, Peshawar, Rawalpindi, Lahore, Meerut, and Lucknow Divisions, for articles for consumption by troops, and variations—These statistics were first prepared in 1885 and were incorporated in the tenth issue of the volume of Prices and Wages (1893) together with a table of variations. These tables have continued unaltered up to the present date, but are now confined to the last twenty-five years with the base year 1875-76.

1911	100	240	101	137	158	353	142	125	161	209	199	180	173	168	230	137	156	223

NOTE.—In this table, the variations in the prices of gold (measured in silver) are arrived at by multiplying the price of bar silver in London in 1873 (=59½d.) by 100 and dividing the product by the price of bar silver in the particular year

Example—

Price of silver in 1899 = 27½d. (table No. 20); price of silver in 1873 = 59½d.; price of gold in 1873 = 100. The variation in the price of gold in 1899 is then worked out thus— $27\frac{1}{2} \times 59\frac{1}{2} : 100 :: 215$

The variations in the prices of the other articles in this table are calculated thus: As the variation in the price of gold in table No. 21 is to the variation in the price of gold in this table, so is the variation in the price of the article in table No. 21 to the variation required

Example—

Variation in the price of gold in table No. 21 = 100; variation in the price of gold (measured in silver) in 1899 in this table = 215. variation in the price of copper (measured in gold) in 1899 = 86 (table No. 21). Therefore— $100 : 215 :: 86 : 185$

(a) Price of 1874 being taken as 100

(b) " " 1878 " " "

No. 23—AVERAGE ANNUAL WHOLESALE PRICES of FOOD-GRAINS and OTHER ARTICLES—(Prices are stated in rupees and decimals of a rupee per ten maunds for all articles except Live-Stock)

RICE (husked).
