NOTE.—This table has been recast, the prices being calculated to a common unit of weight and both prices are now stated in sterling. The London represent averages of monthly mean quotations of Red American wheat as given in the *Corn Trade News* and those for cottonseed are taken from represent the average of maximum weekly quotations given in the *Calcutta Prices Current* which is published by the Bengal Chamber of Commerce. The prices of average of the prices reported in a special monthly return by the Chief Collector of Customs, Rangoon. In 1898 prices of Burma rice were substituted by the *Times of India*.

(a) Bhavnagar from 1899 to 1904 and Oomrawati from 1907
(b) American middling from 1903

(c) Small to medium from 1899
(d) European Filature from 1899
(e) China, Canton from 1904

CERTAIN STAPLE TRADE COMMODITIES in 1873 and from 1891 to 1915

NOTE. -In this table, the variations in the prices of gold (measured in silver) are arrived at by multiplying the price of bar silver in London in 1873 (59½d.) by 100 and dividing the product by the price of bar silver in the particular year

Example—

Price of silver in 1899 = 27½d. (table No. 10); price of silver in 1873 = 59½d.; price of gold in 1873 = 100. The variation in the price of gold in 1899 is then worked out thus— $27\frac{1}{2} \times 59\frac{1}{2} : 100 :: 100 : 215$
The variations in the prices of the other articles in this table are calculated thus: As the variation in the price of gold in table No. 11 is to the variation in the price of gold in this table, so is the variation in the price of the article in table No. 11 to the variation required

Example—

Variation in the price of gold in table No. 11 = 100; variation in the price of gold (measured in silver) in 1899 in this table = 215
variation in the price of copper (measured in gold) in 1899 = 86 (table No. 11). Therefore— $100 : 215 :: 86 : 185$

(a) Price of 1874 being taken as 100
