

P. 341. Edgeworth, Catal. of pl. found in the Banda district, maintains 3 species of *Rhodia*: 1. *R. viminea*; 2. *R. sericea*, Edgew., with silky pubescence, stems procumbent, as thick as one's wrist, and 5-6 ft. long, abounds in the bed of the Sarju river, ascending to 2500 ft.; 3. *R. fluvialis*, Edgew. (*glabra* in List), wholly glabrous, very peculiar in habit, growing upon granite rocks in the bed of the Ken river, Banda, often submerged for weeks, its long branches hanging down into the water when the rocks are left exposed. These branches are so flexible and tough, that they may be tied in a knot without breaking.

P. 361. The following interesting data regarding the durability of *Teak* timber in Bengal were communicated to me by J. C. Marshman, C.S.I.: The fort of the Dutch settlement of Chinsurah was erected about the year 1695, and the beams, the scantling of which was, if I remember aright, 12 in. by 15, were brought from the *Teak* forests in Java. The settlement was transferred to the English Government about the year 1826, when the old fort was pulled down to make room for barracks, and the beams which I saw were all as sound and perfect as when they were put in. Moreover, the Shah-in-Shah, a vessel built at Cochin of Malabar *Teak*, which sank in the Sundarbans some thirty or thirty-five years ago, was authentically known to have been at the time more than a hundred years old.

P. 364. *Clerodendron Siphonanthus*.—Sans. *Barbaru, brāhmani*.

P. 369. *Vitex Negundo*.—Sans. *Sinduka*.

P. 379. In a subsequent paper (Journ. As. Soc. xviii. i. 632) Madden calls *Tetranthera Roxburghii*, *Gar bijaur*, which is right.

P. 386. *Daphne papyracea*, Wall.—Vern. *Bhattu soang, bhalua*, Nepal, described and figured in As. Researches, xiii. 385, under the name *D. cannabina*, Loureiro. There are 2 varieties in Kamaon, according to Madden, As. Soc. Journ. xviii. i. 610; one with white flowers and yellow fruit, 4000-8000 ft.—the other with purple flowers and fruit, 7000-8000 ft.

P. 387. *Aquilegia Agallocha*.—Sans. *Aquru, ageru*.

P. 418. It is remarkable that the *Fig*, though a soft-wooded tree, is long-lived. Pliny mentions several aged wild *Fig*-trees in Rome, among others, one in the Forum existing in his time (70 A.D.) under the shade of which, according to tradition, the wolf had suckled Romulus and Remus. Whatever the truth of this and similar stories may be, the *Fig*-tree in Italy attains a great age.

Dr Cleghorn believes that the wild *Fig*-tree in Kaghan may be only *F. virgata*.

Garden *Figs* (with eatable fruit) have repeatedly been raised from the seeds of the wild *Caprifig*, and the two kinds are certainly of the same species.—(Targioni Tozzetti, Historical Notes on the Introduction of Various Plants into Tuscany, Journ. Hort. Soc. 1854, 168.)

P. 424. In general appearance *F. tuberculata*, Wall., agrees with the specimens which Wallich distributed under *F. lanceolata*, Roxb. (Cat. No. 4512), and with the Burma specimens of *F. pyrrihocarpa*, Kurz. Roxburgh's description, and his Ill. in herb. Kew, No. 1736, also agree as far as they go; the question is whether the Burma shrub and the plant cultivated in the Calcutta Bot. garden show the same structure of the female flower. This I have been unable to verify. This species, whatever it may be called, should not be confused with *F. pyriformis*, Hock. & Arn.; Benth. Fl. Hongk. 328; Miq. Ann. iii. 294, a shrub with similar leaves, which grows in similar localities, in water-courses, and between rocks in torrents in East Bengal, Burma, and China, but has pedunculate receptacles in the axils of the leaves, and does not belong to the section *Covellia*.

P. 424. *F. Chincha*, Roxb. iii. 534, is (doubtfully) identified by Madden (As. Soc. Journ. xviii. i. 644), with *F. squamosa*, Roxb. 531. A shrub; at the foot of the mountains a small spreading tree (Madden). Leaves alternate, rough, 3-

nerved, with distant veins running into each other along the margin of the leaf; petioles very short, hairy. Fruit axillary, solitary, sessile, rough, globular, about the size of a small gooseberry (Hardwicke in As. Soc. Res. vi. 379).

P. 446. *Bischofia javanica*, Blume; Bedd. Fl. Sylv. t. 259.

P. 480. A. De Candolle distinguishes *Q. Baloot*, Griff. (Afghanistan), from *Q. Ilex*, Linn., mainly by the pubescence on the under side of the leaves, "Stellæ planæ, parenchyma sub limbo tegentes iis *Q. Ilicis* triplo minores, puncto centrali magis distincto, radiis gracilioribus et multo brevioribus." I have been unable to trace any essential difference in the pubescence between the Afghanistan and Kunawar specimens on the one hand, and those of Spain, France, and Greece on the other. As regards shape and spinescence of the leaves, the Afghanistan and Indian specimens show the same variations as those from the Mediterranean; there is no difference in cup and gland, and the only point apparently of any importance is, that the anthers are hairy in all Eastern specimens, while the Mediterranean tree has sometimes glabrous, sometimes hairy anthers.

P. 553. The branching Date-Palm at Indore is figured in Jour. Ag. Hort. Soc. Ind. iv. N.S., 1873.

The following names of species should be written with small initials: *Berberis kunawarensis*, p. 12; *Salmalia malabarica*, p. 31; *Balsamodendron gileadense*, p. 65; *Zizyphus*, var. *hysudrica*, p. 87; *Piptadenia oudhensis*, p. 168; *Prunus avium*, p. 193; *Pyrus kumaonensis*, p. 206; *Arabis cashmirica*, p. 248; *Willughbeia martabanica*, p. 320. The following should have large initials: *Swietenia Chlorozylon*, p. 74; *Rhus Kakrasingee*, p. 122.

The spelling of the following Sanskrit and Arabic names should be corrected: *Swādu*, p. 18; *Sālmali*, p. 31; *Nāgaranga*, *Nārany*, p. 56; *Mālūra*, p. 57; *Kachha*, p. 72; *Inab*, p. 98; *Nīlī*, p. 135; *Jayā*, *jayanti*, p. 137; *Sinsapa*, p. 149; *Kharavallikā*, p. 160; *Chukrā*, *chinchā*, p. 163; *Padmāksha* (doubtful), p. 194; *Baheduka*, p. 222; *Haritakī*, p. 223; *Dhātṛī pushpitā*, p. 238; *Dālīma*, *rumman*, p. 241; *Mallikā*, *asphōtā*, *saptalā* (*Yāsmīn*, Persian), p. 311; *Ayugmā chhada*, p. 325; *Karavīra*, p. 328; *Syonāka*, p. 347; *Tūla*, p. 408; *Kākodumbara*, p. 423; *Putranjīva*, p. 451; *Dhātṛī*, p. 454; *Bhūrja*, p. 458.

ANALYTICAL KEY TO THE CHIEF ARBOREOUS CONIFERS OF THE NORTH-WEST HIMALAYA.

BY J. L. STEWART, M.D.

	1. <i>Pinus longifolia</i> , Rox.	2. <i>P. Gerardiana</i> , Wall.	3. <i>P. excelsa</i> , Wall.	4. <i>Cedrus deodara</i> , Loud.	5. <i>Abies Smithiana</i> , Forb.	6. <i>Picea Webbiana</i> , L ^{al}	7. <i>Cupressus torulosa</i> , Don.	8. <i>Juniperus excelsa</i> , Bieb.	9. <i>Taxus baccata</i> , L.
Crown. ...	Young, ovate; older, long ovate, with broadish top.	Short ovate, bushy.	Conical, long ovate.	Pyramidal, ovoid conical, or compressed columnar.	Tall, narrow, cylindrical.	Very narrow, cylindrical.	Long conical, like garden cypress.	Like 7, diffuse, irregular.	Broad oval, irregular.
Branches of a tree in the open.	Begin high, droop somewhat, then upcurved.	Begin low, straightish, horizontal, curving up at ends.	Begin low, sub-horizontal, ends upturned, when not fruit-laden.	Begin low, straight, horizontal.	Begin low, horizontal, or downward, with tassol-like twigs.	Begin low, short, declined.	Begin lowish, of young horizontal, sub-declining; of old horizontal, with drooping, subdivided tips.	Begin low, large, numerous, spreading, diffuse, an exaggeration of 9.	Trunk short or none, branches lax, irregular.
Colour of the foliage.	Young, light; old, dark green.	Darker green than 1, and grey branches showing through.	Bluish or greyish green.	Lightish green, young; very dark, old.	Like 3, but with a rather darker tinge.	Very dark.	Young, bluish green; old, darker, like (but browner than) 6.	Grey, green; not unlike 8.	Darkish green.
Bark. ...	Rough, grey plates, and deep irregular furrows.	Large, long, greenish-grey plates, peeling off, darker under.	Dark, smoothish, furrowed into irregular, small, whitish plates.	Dark, smooth, cut into long, narrow scales, by vertical fissures.	Very smooth, cut into small quadrangular plates by shallow furrows.	Young, smooth silvery; old, grey, cut into long narrow scales by anastomosing spiral clefts.	Brown, smooth, sulcate, fibrous, peeling off in long strips, often sub-twisted.	Rather like 7, but smoother, and more fleshy.	Young, silvery, old, smooth, brown, fibrous, compact, not sulcate, peeling off in layers.
Leaves. ...	6-18" long, in 3s, stiff, erect, in persistent sheath, 6'-1" long.	3" long, in 3s, stiff, in deciduous sheath.	6-7" long, usually in 5s, thin, drooping, sheath caducous.	1" or more long, trigonous, stiff, sharp, in tufts of 3-40, on short branchlets, at last scattered.	1½" long, compressed tetragonal, stiff, sharp, solitary, scattered all round branches.	2" long, 2 pointed, a silvery band on each side under, quasi-bifarious.	Scale-like, quadrifurcally close imbricate.	As of 7 nearly.	Flat, falcate, entire, sharp mucronate, alternate distichous.
Duration of leaves.	2-3 years.	2-3 years.	4 years.	5 years.	8-10 years.	8-10 years.	?	?	?
Cone. ...	Pendulous sub-globular or ovate, young; old, conical, 5-7" long, 13" girth at base, brown.	Erect, young sub-globular, old ovate oblong, narrowed upward, 6-9" long, 14-15" girth low, bluish.	Pendulous, tight, conical, cylindrical, 6" long, 5-8½" girth, resinous young, bluish green.	Erect, thick cylindrical, oval or oval-oblong, obtuse, 3½-4" long, 7½-9" girth, dark brown.	Pendulous from tips, oblong cylindrical, sub-narrowed upward, 3-4½" long, 4½-6½" girth, brown or purplish.	Erect, sub-globular or oval cylindrical, narrowed above, 3-4½" long, 5-9" girth, dark purple.	Globular or sub-oval, 6" long, 1½" girth, fuscous, bluish, glaucescent.	Glabrous 5'6" diam.; young, yellowish green, ripe dark purple or black.	Sub-drooping, 4-5½" long, 1-1½" girth, cup red, fleshy, nodule greenish olive.
Scales. ...	With very thick, knobby points, persistent.	Thick, spinous apex, persistent, seed edible.	Close imbricate, acute edged, terminal thickish umbo, persistent.	Close imbricate, broad, thin, deciduous.	Thin, membranous edged, persistent.	Broad, thin, dark, deciduous.	Each scale with 4-6 facets.	...	...

Textile Manufactures and Costumes of the People of India,

As originally prepared under the Authority of the Secretary of State for India in Council. By J FORBES WATSON, M.A., M.D., F.R.A.S., Reporter on the Products of India. Folio, half-morocco. With numerous Coloured Photographs. £3. 5s.

This work—by affording a key to the Fashions of the People, and to the Cotton, Silk, and Wool Textiles in actual use in India—is of special interest to Manufacturers, Merchants, and Agents; as also to the Student and lover of ornamental art.

"We congratulate Dr. Forbes Watson on having produced so useful and so practical a work, and on having diffused knowledge upon all material points connected with the clothing of the people of India, which heretofore had been unattainable. His book is written in a clear and thoroughly intelligible style throughout; it is handsomely got up, and embellished by numerous coloured photographs, from which the various styles of costume and portion of clothing, male and female, will be more readily understood than from mere description. The colours, too, of the various fabrics are given from the articles themselves, and we would in particular invite attention to the plates at page 118, all or most being figures of respectable Mohammedans in Upper India in rich dresses, as conveying excellent impressions of colour and effect in native Indian costume."—*Times*.

Theories of History.

An Inquiry into the Theories of History.—Chance,—Law,—Will. With Special Reference to the Principles of Positive Philosophy. By WILLIAM ADAM 8vo. 15s

"The whole book bears the evident mark of maturity of thought. The third chapter is full of thoughtful and able argument, in which the positions of Comte, and even of Mill, are powerfully and successfully assailed."—*Spectator*.

"It is well thought and weightily written. We have not come across a book of the present day for a considerable while so far removed from the common run of writing and of thinking as this one is."—*Athenæum*.

A CHRONOLOGICAL AND HISTORICAL

CHART OF INDIA,

*Price, fully tinted, mounted on roller or in case, 20s.
size, about 40 in. by 50 in.*

Showing, at one view, all the principal nations, governments and empires which have existed in that country from the earliest times to the suppression of the Great Mutiny, A.D. 1858, with the date of each historical event according to the various eras used in India.

BY

ARTHUR ALLEN DURTNALL,

Of the High Court of Justice in England.

By this Chart, any person, however ignorant of the subject, may, by an hour's attention, obtain a clear view of the broad lines of Indian History, and of the evolutions which have resulted in the dominion of Her Majesty as EMPRESS OF INDIA. It will be found invaluable for EDUCATIONAL PURPOSES, especially in Colleges and Schools, where an Indian chart is in contemplation. It will also be found of PERMANENT UTILITY in all Libraries and Offices as a work of ready reference for the connection of events and dates. Besides the History of India, it includes the contemporaneous histories of ASSHANIETAN, CENTRAL ASIA, and EUROPE.

A RELIEVO MAP OF INDIA.

BY

HENRY F. BRION.

In Frame, 21s.

A map of this kind brings before us such a picture of the surface of a given country as no ordinary map could ever do. To the mind's eye of the average Englishman, India consists of 'the plains' and 'the hills,' chiefly of the former, the hills being limited to the Himalayas and the Nilgiris. The new map will at least enable him to correct his notions of Indian geography. It combines the usual features of a good plain map of the country on a scale of 100 miles to the inch, with a faithful representation of all the uneven surfaces, modelled on a scale thirty-two times the horizontal one; thus bringing out into clear relief the comparative heights and outlines of all the hill ranges, and showing broad tracts of uneven ground, of intermingled hill and valley, which a common map of the same size would hardly indicate, except to a very practised eye. The plains of Upper India are reduced to their true proportions; the Central Provinces, Malwa, and Western Bengal reveal their actual ruggedness at a glance; and Southern India, from the Vindhya to Cape Comorin, proclaims its real height above the sea-level. To the historical as well as the geographical student such a map is an obvious and important aid in tracing the course of past campaigns, in ascertaining the conditions under which successive races carried their arms or settlements through the Peninsula, and in comprehending the difference of race, climate, and physical surroundings which make up our Indian Empire. Set in a neat frame of maplewood, the map seems to attract the eye like a prettily-coloured picture, and its price, a guinea, should place it within the reach of all who care to combine the useful with the ornamental."—*Home News.*
