## LIST OF THE KHALIFS OF BAGHDAD AND EGYPT.

The names and dates of the kings of the many dynasties who issued Musalman coins will be found in Lane Poole's "Mohhammadan Dynasties" and in the volumes of the British Museum Catalogue. A list of them would be too long to be given here, but as the names of the Khalifs of Baghdad and of the Egyptian Khalifs are upon the coins of many dynasties who acknowledged the authority of the Khalif, more or less, and the name often helps to fix a doubtful date, the following may be useful.

### POETICAL LEGENDS.

The legends on coins in the Persian language are often in verse, called بیت, couplet, distich. Sometimes they are in a double couplet. Owing to the way in which the words are arranged to bring the verse within the compass of the area, they are difficult to make out, so a fairly full list of them is given below, with translations, the latter being those in R. S. Poole's "Shahs of Persia," S. Lane Poole's "Moghul Emperors," L. White King's "Barakzai," M. Longworth Dames' "Durrani Dynasties," and C. J. Rodgers' various writings.

The verse begins most often, as is the case too when the legend is not in verse, at the bottom, and is to be read upwards, as in (a) Persian Shah Nadir Shah No. 2; sometimes at the top, as (b) Persian Shah Mahmud No. 2; sometimes at the second line from the top, as (c) Persian Shah Ashraf No. 2, or lower still, as (d) Ashraf No. 3: in these two, (c) and (d), it will be seen the reading is first upwards for the first verse and then downwards for the second. In all these examples, too, the words or parts of words are not consecutive in the way given in the couplets as written out and as the metre and rhyme require, but are placed or divided in a fanciful way. Often one verse of the couplet is on the obverse and the other on the reverse of the coin, as (e) Jahangir No. 22, which begins at the top of the obverse and bottom of the reverse. (f) The double distich on the five muhr piece of Jahangir No. 7 gives an example of several of these difficulties on one coin.

## CHRONOGRAMS.

## The Abjad.

The تاریخ, chronogram, composed by means of the Abjad system, is but seldom found on coins, although it is commonly used to record dates in MSS and inscriptions. The Abjad, so called from the first four letters ا ب ج د in its table, is an arrangement by which each letter of the Arabic alphabet represents a number in the following scale:—

ا = 1	ك = 20	ج or ج = 200
ب or ب = 2	ل = 30	ش = 300
ج or ج = 3	م = 40	ت or ت = 400
د or د = 4	ن = 50	ث = 500
ه = 5	س = 60	ز = 600
و = 6	ع = 70	ذ = 700
ز or ز = 7	ف = 80	ض = 800
ح = 8	ص = 90	ط = 900
ط = 9	و = 100	غ = 1000
ى = 10		

The date is found by adding together the value of the letters composing the word or words indicated, as will be seen in the following examples.

On a coin of Fakhr al Din Kara Arslan, Urtukid of Kayfa, there is alongside the head on obv. سَنَةْ سِوَّتْ = 500, ن = 50, و = 6, i.e.  $500 + 50 + 6 = 556$ , or ٥٥٦ سنة of Hijra.

A coin of Nadir Shah of Persia has on its obv. a couplet and date ١١٤٨, and on rev. arranged in Tughra form بتاريخ الخير فيما وقع By the Tarikh, "Whatever happens is best."

ال خ ي ر ف ي م ا و ق ع  
 70 + 100 + 6 + 1 + 40 + 10 + 80 + 200 + 10 + 600 + 30 + 1 = 1148.

One of the varieties of the Muhr of Jahangir the Moghul emperor, representing him as seated with a goblet in his hand, has on the obv. this couplet:—

قسا برسکه زر کرد تصویر  
شنبیه حضرت شاه جهانگیر

Destiny has drawn on money of gold  
The portrait of His Majesty Shah Jahangir;

and on the rev. :—

حروف جهانگیر و الله اکبر  
زروز ازل در عدد شد برابر

The letters of Jahangir and Allahu Akbar's  
Are equal in value from the beginning of time.

This latter couplet is an anagram rather than a chronogram, but is to be made out by the Abjad, and therefore is noticed here.

۲۰۰ + ۱۰ + ۲۰ + ۵۰ + ۱ + ۵ + ۳ = ۲۸۹.

۲۰۰ + ۲ + ۲۰ + ۱ + ۵ + ۳۰ + ۳۰ + ۱ = ۲۸۹.

Tipu Sultan of Mysore, not content with the Abjad, introduced another system, wherin the value was given to each letter according to its position in the Arabic alphabet. This was called the **أبتس** Abtas, from the first four letters in it, and was used on Tipu's coins after the fourth year of his reign to give the number of the cycle year, as will be described under "Cycle Years."

#### The Abtas.

ب	ت	ث	ج	ح	د	ذ	ر	ز	س	ش	ص	غ	ظ

1000	900	800	700	600	500	400	300	200	100	90

## DENOMINATIONS OF COINS.

Until comparatively modern times no other denominations were put upon Muslim coin than دينار, dinar, on gold; درهم, dirham, on silver, and فلس, fals, on copper. Exceptions to this are the fractional pieces of the dinar noticed below.

The دينار, or, as it was spelt in the oldest times and very rarely afterwards, دسر, was of good gold, weighing at the time of the first Khalifs about 66 grains, and being about 75 inch in diameter. Later on the same denomination was used for gold coins of greater or less weight and size. The quality of the metal was almost always fine gold, exceptions being Turkish and Morocco coins, some of which were far from being so. Divisions of the dinar were but rarely noted in words, the legend being هذا دينار, this dinar, whether the coin was a whole, half, or quarter one; but sometimes they were in these terms: هذا نصف, this half, هذا ثلث, this third, هذا ربع, this fourth, without the word دينار following. So they are called *nasf*, a thlith, a ruba, in much the same way as we speak of a tiers or a cent. The value of a dinar is now so small in Persia that a copper piece of Nasir al-Din, A.H. 1290, of the size of a penny is marked ٥ دينار and a smaller piece ٢٥ دينار.

The درهم is the general name for a silver coin, as the دينار is of gold. It corresponds to the drachma, and when used as a weight should equal 48 grains. But silver coins having the name dirham on them vary much in weight and size, and although half and double dirhams are not uncommon, they are not so denoted in the legends they bear. The character of the metal varies very much; some of almost all periods is of very poor quality. A plural form of the word is seen on a Morocco coin, عشرة دراهم, ten dirhams. On some coins of the Dehli king

الدرهم الشرعي في زمان، The Muhammad b Taghlak is the phrase dirham legal in the age.

فلوس or فلوس is the ordinary name for the copper or, in a few cases, bronze coinage. The plural form فلوس is often used in a general way as 'a falus.'

Besides the above denominations several special ones must be mentioned.

The nomenclature of the Turkish coinage is difficult to comprehend; the changes have been so many and various. The denominations are not, however, denoted upon the coins, so an account of them need not be given here; but some have their value given; thus, ت and ش with ciphers above them represent so many piastres or ghurush, and ب stands in the same way for paras.

The coinage of Persia has much changed in nomenclature during the last 200 years, but none of the names are upon the coins except اشرفی, Ashrafi, and يومان دسار on gold, and the already referred to on copper and on silver. The autonomous copper coins of Persia, too, are nearly all marked فلوس. The curious wire coins called Larin, from Lar, a Persian district at the head of the Persian Gulf, where they were produced, were between 200 and 300 years ago the chief currency of the traffic between the Western India coast and that Gulf, so much so that they became a standard of value in the Konkan and Dekkan, and were made there also, the Adil Shah dynasty of Bijapur adopting the pattern. The coin is a piece of silver wire of the size of a crow-quill, and from five to six inches long, doubled on its middle, and struck at the folded part with a stamp on which was some Persian legend, but only three or four letters of the stamp are upon any Larin, and the legend has not been made out beyond - سلطان عادل شاه. The source of issue of the Larin is not known, nor its origin. Probably it was found to be a convenient form of money for carrying about, as they could be so easily stuck into the folds of the turban or waist-cloth, and in that way too be

concealed in case of trouble in those piratical times and regions. About Ceylon they are often found bent up in the form of a hook, and are known in those parts as the 'fish-hook money.'

Gold pieces of Khwarizm and of Afghanistan are called tilla; the name, however, is not put upon the coins except in a part of the legend, as سُم وَ تِلّا, in silver and gold.

The words سکه and شادی, meaning coinage or currency, are very common upon the coins of India and the neighbouring countries, the former word especially so, and often in the phrase سکہ مبارک, auspicious coinage.

In India the Musalman coinage began with adaption of the Hindu currency it was to replace, as will be seen by the early coins of the Delhi kings who introduced the tankah, سکه, as the standard in both silver and gold, of the weight of about 171 grains in each metal, and the kani کانی,  $\frac{1}{4}$  of a tankah, and equal to four fals. These words are found, but rarely, on coins of this class. In the reign of Sher Shah, A.H. 916-932, came into use the silver rupee, روپیہ, of 178 grains weight, which with little variety in weight has been the standard coin of India to this day, the gold piece being the مهر, muhr, and the copper the دام, dam. The Emperor Akbar, with his other reforms, instituted an elaborate coinage with great varieties of value and of shape, each variety having a special name, but as none of these names, except those of some of the copper, are found on the coins, they need not be mentioned here. The muhr and the rupee, however, remained the standard. On the copper coins of Akbar we find several denominations given, تالکہ, ملوس, and تالکہ, with their divisions, نیم half, چھارم fourth part, هشتم eighth part, and شانزدھم sixteenth part, and their multiples دو and چو (in Hindustani); the دمری, damri, the half-dam, and نصفی also meaning a half-dam. On the copper coins of Akbar's son Jahangir we find روانی rawani and رائج raij, both words meaning current coin, and their half بیم, bim, the former corresponding in weight with the tankah, the latter with one-eighth of a tankah.

The gold coin called **نیسہ**, was made for the purpose of distribution on the occasions of great festivals, such as State processions or at marriages, when they were scattered amongst the crowd. They are usually somewhat thinner than the coins of currency, and are marked with the word **نیسہ**. The custom of scattering coin on great occasions is still kept up in the East, but the pieces for the **میار** are usually now only of very thin gold, little more than gold-leaf. Also there are the large handsome gold pieces of 200, 100, 50, and 10 muhrs of Akbar and his three successors, which were, no doubt, not for currency use exactly, but for presentation in the way of honour from the emperor or offered to the emperor or king, for tribute or acknowledgment of fealty, **بدر امداد**, **بازارینا** as it is called.

Under the East India Company the rupee remained the standard, and its fineness and weight were fixed. So it has been since. Gold muhrs of the value of at one time 16 and at others 15 rupees have been struck, with half third, quarter, eighth, and sixteenth of muhr gold pieces at various dates, but the issue of a gold currency was only temporary. Some were made in imitation of the Delhi emperor's coinage others have the arms of the Company and the legend **کمپنی اشرفی** **اسٹریفی** **بادر** Ashrafi, or gold coin of the Honourable English Company. In 1815 and 1854 the lion and palm-tree muhr and double muhr, marked **دو اشرفی** - **نک اشرفی** - **نک** **بادر** **بادی**, were issued, and in 1870 a 10 rupee gold piece of Queen Victoria.

In silver, besides the rupee, there are its divisions  $\frac{1}{2}$ ,  $\frac{1}{4}$ , and  $\frac{1}{8}$ , marked respectively **دو آنے** - **چھار آنے** - **ہش آنے**. The copper money is the **انہانا**, 16 to a rupee, the **پیسا** paisa, 4 to an ana, and the **پائی** pai, 3 to the paisa. The ana is but a money of account, the copper coins being the **ہلہ** half-ana, the **پیسا** or quarter ana and the **چھار پائی** with its multiples **دو پائی** and **چھار پائی**.

But in Southern India the Hindu system of currency, which had remained unchanged during the time of the Musalman power, continued to be in use for a considerable period under the East India Company. In gold the **ہون**, or pagoda, and double pagoda

دو ہون، one being marked as ہوں پھولیوں flowery pagoda In silver the half and quarter pagoda, the فلم fanam, and in copper the فلوس filus, and the کاس kas The money table being 20 kas = 1 falus 4 falus = 1 fanam, 42 fanam = 1 pagoda or hun But owing to attempts made by orders to equalize the currencies of the Presidencies the relative value of the coins became altered, and we have copper coins of Madras with a variety of legends stating their value such as اس چبل کاس اسٹ this is forty kas, others of twenty, ten, five, two and a half, and two kas of a like character, and others bearing their relative value, such as دد کاس دو فلوس اسٹ this is forty kas, others of twenty, ten, five, two and a half, and two kas of a like character, and others bearing their relative value, such as دو فلوس ہاریل کمپی ۱۸ عمسوی when 5 kas were equal to 1 falus The coins bearing the following inscriptions were proofs not made current

The Native States of India which owed allegiance to the Moghul emperor, usually coined silver in the name of the emperor, and copper of their own style, often of irregular shape and bearing a stamp of some figure or device without a legend The common name for them was 'dub'

The coinage of the Native States of India is a difficult but interesting subject The legend on the silver is usually a part, sometimes but a small part, of the coin legend of one of the later emperors, without date or mint place, moreover, the die was generally a good deal longer than the coin to be struck, and consequently there is but a portion of this imperfect legend on any

one piece. There are almost always marks or symbols which were intended to be indicative of the mint-place or State, and sometimes they are so, but too often the same symbols were used at different times by more than one State, and a great number of the coins remain still unassigned. The money-changers and dealers in India know them generally by some nickname, but care and know little as to what State they are the coinage of. During the last twenty years or so the chiefs of many States have adopted coinage of a modern pattern struck from dies made in England, usually bearing some figure as a characteristic mark; thus, there is the horse's hoof and fetlock for Baroda and the sun-face for Indore.

Tipu Sultan of Maisur had a coinage of muhrs, rupees, and paisa or kas, but gave new names to them in the 5th year of his reign. These names appear on some of his coins, and are as follows :—

*Gold.*—احمدی *Farوقی* for muhr, صدیقی for half muhr, and for pagoda.

*Silver.*—عابدی *Hamamī* for double rupee, حمدری for rupee, half rupee طاری for quarter rupee حعمری for one-eighth rupee, کاظمی for one-sixteenth of a rupee, and خضری for one thirty-second of a rupee.

*Copper.*—زہرا *Mishtri* for double paisa, عثمانی for one paisa, بھرام for half paisa, اختر for quarter paisa, and نطب for one-eighth of a paisa.

The names were no doubt derived for the most part from the names of the Prophet and the Imams. احمد one of the names of the Prophet himself, ابو بکر صدیق the 1st Khalif, حضرت علی the 2nd Khalif, عمر فاروق the 1st Imam, امامی موسی کاظم - جعفر - محمد باقر - زین العابدین the 4th, 5th, 6th, and 7th Imam, خضر a Prophet who is supposed to have discovered the Water of Life, عثمان the 3rd Khalif, مشتری the planet Jupiter, زہرا Venus, بھرام Mars, اختر a star.

Travancore is a Hindu State, and has still a Hindu coinage, but there are Hindustani words in Persian characters on a few of the coins, viz., مهر پنج روپیہ muhr, five rupees, پا روپیہ - نیم روپیہ - نیم روپیہ. The money table, according to Mateer, is :— *Copper* : 16 kas = 1 chuckram. *Silver* : 4 chuckram = 1 fanam; 7 fanam = 1 rupee. *Gold* : Panam of various sorts = from 4½ to 7 chuckram; rasi = 10 chuckram; varahan = 52½ fanam.

Kutch and Kathiawar have a special currency, the standard for which is a small silver coin called a kori. The denominations are :— *Copper* : ترانبیہ tranbiya; دوکھہ dokha = 2 tranbiya. *Silver* : کوری kori = 24 dokha. The word is dokta on the coins, but is really dokha.

On coinage of the Malay Peninsula and Archipelago we find some other denominations. Native States have the مس mas, in gold, the کفخ kapang, the کاس kas, and the فلوس falus, in copper. A ducat of the Dutch East India Company, written in Malay كمثني ولنديس and كمثني ولندوى, and of the Netherlands Government, is called درهم dirham, a دعیت dirham, and a rupee روپیه, with divisions of the rupee of ¼, ½, ¾, and 2½ in Malay (see p. 6).

A Java rupee of the English East India Company is marked سکه کمثني هنگلیش, coin of the Henglish Company, a Fort Marlborough rupee is called اواخ کمثني دوا سوكو, money of Company two soko, and there are also کٹھے and multiples of the same.

A soko corresponds to a quarter dollar. A kapang is a small copper coin of which 400 equal a Spanish dollar.

The small currency of these parts was, and still is, made of tin, or of pewter largely composed of that metal, which is the commonest one there, the tin-mines of the Peninsula and neighbouring islands being the source of supply of it in the East. The Portuguese made every endeavour, early in their traffic with Sumatra and the Peninsula, to get the trade and to control the

mines, and the Dutch were not slow in doing the same in the islands where their possessions and influence lay. Following on this the Portuguese Government in the sixteenth century made pewter, or tutenag coins for currency in Western India, and as it became recognized and acceptable for trade, the English Government made tutenag coins early in the eighteenth century for use in the same parts of India, in very close imitation of the Portuguese coinage. There are also some rare coins in this metal struck in the name of the Dehli emperor Shah Jahan, made probably at Surat.

Another denomination is to be found on a coin of Zanzibar, viz. علیٰ real.

On some coins of Dehli and Bengal kings, instead of the denomination the word سکہ! the silver (coin), is used.

## PLACE AND TIME OF MINTAGE

The usual legend about the striking of a Musalman coin is سُمِّ اللَّهُ صَرْبٌ هَذَا الْدِيْنَارُ [درهم]. In the name of God this dinar (or dirham) was struck, followed by the name of the mint place and the date. Instead of the word صَرْبٌ on some Murabit coins is اَمْرٌ بِصَرْبٍ, ordered to be struck, on some Delhi and Gujarat coins, دَارُ الصَّرْبِ, place of the striking on other Gujarat ones, ضَرْبَتْ, struck, and on a Great Kair coin طَبَعَ, struck, and on some of the Norman kings of Sicily عمل, made, are used instead of صَرْبٌ.

The following phrases are used with reference to the time of the striking:—

بِأَيَّامِ دُولَةِ - فِي أَيَّامِ دُولَةِ	In the days of the state or empire
فِي أَيَّامِ الْمَلْكِ	In the days of the king.
فِي أَيَّامِ دُولَةِ الْمَوْلَى السُّلْطَانِ	In the days of the Lord Sultan
In the days of the empire of the Lord Sultan	
فِي عَهْدِ	In the time of
فِي تَارِيخِ - فِي التَّارِيخِ	At the date.
فِي دُولَةِ الْمَوْلَى السُّلْطَانِ	Under the empire of the Lord Sultan
فِي زَمَانِ - فِي الْرِّمَانِ - فِي رِمَانِ	In the time of.
فِي زَمَانِ الْإِمَامِ	In the time of the Imam
عَنْ أَمْرِ	By order
فِي وَلَابَةِ	Under the governorship.
بِمَاءِ أَمْرِهِ الْأَمْرِ	By authority of the Amir.

The mint name had the preposition **فِي**, in, attached to it on the older coins, but not often on the later ones; for instance, بواسطہ in the time of the early Khalifs and واسطہ in that of the Mongols of Persia. The article **اللَّ**, the, is prefixed to some names and not to others, and a few mint names are sometimes

written with and sometimes without it, and that too even at about the same date.

Before or after the mint name there is often a word or two meaning place, city, port, etc., بَنْدَرٌ - بَلْدَةٌ - مَدِيْنَةٌ, or expressive of quality, title, or condition, as المَسَارِكُ the blessed, مَقْدَسٌ the holy, مَدِيْنَةٌ مَحْفُوظَةٌ the new, or both, such as الْجَدِيدَةُ the guarded city, سَلَدَه طَيْمَه the good city, بَنْدَرٌ مَسَارِكُ the blessed port. These are called the titles of mint towns, and a list of them follows that of the mints, showing the places to which the title is given in each case.

The List of Mint Towns has been compiled from the one in Soret's "Numismatique Musulmane," with the addition of such other places as have been found in numismatic writings since that book was published. For the purpose of greater accuracy as to the geographical position of the towns—such general descriptions as "in Iraq Alabi," "in Khurasan," not being satisfactory—the latitude and longitude are given when they have been ascertained.

Some names have not been located, although they are mentioned in Yakut's "Mu'jam al-Buldan"; in such cases a few words of description by that author are quoted. A few more yet remain uncertain; some of them probably have disappeared or sunk into insignificance; others may have been new names given to places on their capture by a Musalman king, but since forgotten; and others are most likely misreadings. When the mint name has been noticed by only one writer his name is added, in brackets, as the authority for including it in the list, all the other mint names have been given by more than one writer. The class of coin upon which the mint name is found follows the geographical description, and then the title or titles of the town, which are given as prefix or suffix according to whether they precede or follow the name.

The spelling of the names is not, as will be seen, always the same; Arzerum is an instance of this: أَرْزُرُومٌ - أَرْزَرُومٌ - أَرْزَالْرُومٌ. Misreadings may account for this sometimes, but there are misspellings and variations in spelling some of the names on the coins.
