Note.—Owing to paper restrictions and other circumstances in connexion with the War, the Editor has most reluctantly been compelled to omit the usual list of Private Banks in the British Empire and Abroad, which ordinarily follow on here.

...ight list on the following two pages contains the names of all the more important British Life offices, of eight Colonial companies (marked C), and of three American offices (marked A), all of which transact business in this country.

Claims or Business.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors (P) who form part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are indicated by letters in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches.

Figures.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31st December, 1906.

Life Funds.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

Premium Income.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

Expenses.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 20%, of which about 9% is expended on commission and 8% on other expenses. This ratio taken by itself is frequently misleading. Thus, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are indeed the average may sometimes of percentages should be considered, with due regard to this feature, a profit to the policy-holder through reduced premiums being equivalent to an immediate cash bonus.

Interest.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. Owing to the unprecedentedly high rate of income-tax now leviable, a reduction in the net yield in most must be anticipated in nearly every case.

Valuations.—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^M and O^M, and the corresponding Tables H^M(5) and O^M(5) which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^M and O^M(5) tables in conjunction are more stringent than the O^M table alone, the H^M is more stringent than the Actuaries, and with every table the lower the rate of interest assumed the more stringent is the valuation.

The O^M Tables, which are founded on the latest and largest Life assurance experience, usually require slightly stronger reserves than the H^M. Some offices carry forward large additional reserves beyond the amount required by the valuation tables adopted by them.

## ADVICE REGARDING LIFE ASSURANCE AND ANNUITIES.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Recent increases in income-tax have added to its attractions, for policyholders can claim relief from assessment to this duty in respect of life assurance premiums not exceeding in amount one-sixth of their incomes, in most cases.

The selection by an intending proposer for Life Assurance of the office best suited to his requirements and likely to produce the best results should be carefully made under reliable expert advice. Whilst we have above indicated some points for consideration, the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits and attractions of the various companies. There are many good offices, but in the very best and most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers during the continuance of policy, which may be life-long, through the precaution having been taken of obtaining reliable advice before a proposal is made.

On receipt of an inquiry containing full particulars of requirements, accompanied by a remittance of a fee of 5s., addressed to the Publishers of Whitaker's Almanack, 12, Warwick Lane, Paternoster Row, E.C., and marked "Insurance," the Insurance Editor will be prepared—

(1) To advise any intending assurant as to the system and descriptions of policies best adapted to suit the special circumstances as described, and to assist inquirer in the choice of the Life office which seems from its financial strength and varying capabilities best qualified to do justice to his requirements, and most likely to yield the most satisfactory and profitable results. Selection is of special importance from the investment point of view in case of endowment assurances.

(2) To similarly advise any person contemplating the purchase of an annuity. Some annuities on given lives have been offered at rates of 20 per hundred, or 5 per cent. on the purchase price, whilst others considered equally unimpeachable yield 10 per cent. or more.

C = Colonial Office.
A = American Office.
F = Transacts Fire Business also.
b = Transacts Accident Business also.
I = Transacts Industrial Business also.
c = Does not pay Commission.
m = Transacts Marine Business also.

* Alliance. Including funds of acquired businesses.
* Caledonian. Fire business commenced 1809.
* Century Accident business commenced 1885.
* Clerical, Medical & General. Large additional valuation reserves. Expenses of quinquennials valuation included in expenses 1910.
* Commercial Union. Excluding figures of acquired businesses.
* Equitable. Additional reserves beyond valuation liability £500,000.
* Equity and Law. Gross interest yield on funds excluding reversions and unpaid calls 22/6/1.
* General Accident. Life business commenced 1906.
* Guardian. Excluding figures of acquired businesses.
* Legal and General. Gross interest yield on funds excluding reversions.
* London and Lancashire Life and General. Includes figures of acquired Scottish Metropolitan business.
* Marine and General. Also Insures Mariners', &c., transit risks, figures in regard to which are excluded in statement of premiums.
* National Mutual. Net interest yield excluding reversions.
* Norwich Union Life. Includes figures of acquired Scottish Imperial business.
* Phœnix. Fire business commenced 1782.
* Scottish Amicable. The premiums valued are the O$^{m}$ 3 per cent. net premiums, adjusted to increase to 4 per cent. the difference between the office premiums and net premiums in the case of without profit policies and of policies effected under the midsummum premium system.
* Scottish Insurance. Accident business commenced 1875.
* Scottish Provident. 1 per cent for all except a small and diminishing section of old policies. Additional reserves £600,000. Specially low premiums.
* Scottish U and S. Includes acquired City of Glasgow business.
* United Kingdom. Net O$^{m}$ reserves in combination with O$^{m}$ and O$^{m}$(5) mortality tables and special additional reserves.

## ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses may usually be applied either to increase sum assured or to reduce premium if not discounted for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

### AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The next table shows the annual premiums payable throughout life for assurance of £100 at death with participation in profits. Premium rates alone are not sufficient for judging the relative attractions of life offices. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

* Eagle & British Dominions—Lower rates are quoted for "Sceptre Abstainers Section."

† London *Life*—These rates are for men not exceeding 5 feet referred to, allowances being made for quarters of age, and are under the Society's (full participation) reversionary bonus plan.

‡ Abstainers' Rates.

, Mutual of New York—Rates are for nearest age.

§ Sun Life—Reductions granted to total abstainers.

## ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium providing more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

## ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death. The annual premiums payable throughout the endowment period, or till death if previous, for the assurance of £100 at various ages of entry and maturity, participating in profits, are given in this table.

| Name of Office. | Sum Assured Payable at Age 55 or at Death if Previous. | | | | | Sum Assured Payable at Age 60 or at Death if Previous. | | | | |
|---|---|---|---|---|---|---|---|---|---|---|

| Life and Annuity Funds .. .. .. | 128,699,580 | 350,477,278 | 1,529,965 | 60,380,282 |

| | Ordinary Life Assurances. | | Industrial Life Assurances. | |
|---|---|---|---|---|
| | No. of Policies. | Net Sums Assured. | No. of Policies. | Net Sums Assured. |
| | | £ | | £ |
| Assurances in Force as shown by the Dec., 1915, Returns published by the Board of Trade | 2,033,771 | 869,738,964 | 38,004,256 | 423,900,643 |

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to *day of death*. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same, in others it is a little less. Some offices grant special terms in case of impaired lives.

* Australian Mutual, Colonial Mutual, and Mutual and Citizens' Rates are for quarterly payments.
† London Life Rates are for exact age stated, but are apportioned for actual age at time of purchase.
‡ These are P.O. annuity rates when average price of Consols is under £98 10s. Otherwise P.O. rates are lower.

# Directory of Insurance Companies.

ABBREVIATIONS.—A=Accident or Employers' Liability, Bo=Boiler, Bu=Burglary, Ca=Horse and Cattle, F=Fire, G=Guarantee, H=Hailstorm, I=Life, Li=Idiocess, Ma=Machinery, M=Marine, Mo=Mortgage, P=Plate Glass, V=Various classes.
NOTE.—Most companies transacting fire also transact burglary insurance.

* The name of the Horse, Carriage, and General was altered to the Wesleyan Insurance Company" in November 1907

## Fire Insurance Rates

Most large fire offices belong to the tariff association, charging identical rates of premium There are, however, a number of non tariff offices which claim to assess individual risks independently on merits. Tariff rates of *premiums per £100 insured against fire for the more* common classes of risk are as follows —

*Private Dwelling Houses*, built of brick or stone and tiled or slated and in no hazardous proximity, 1s. 6d.

*Household goods* therein, usually 2s.

*Shops and Warehouses*, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on from 2s

*Stock and Utensils* in trade, fixtures, and household furniture in such shops and warehouses, from 2s.

*Private Dwelling Houses*, brick and timber built and tiled or slated, in no hazardous proximity, from 2s. 6d.

*Aircraft and Bombardment Insurance.*—The Government rates run from 1s. per cent. against aircraft risks and 2s. 6d. per cent. against air craft and bombardment risks in cases of private dwelling houses and contents, to larger amounts in other cases. All other buildings, and farming stock, 1s. 6d and 2s. 3d per cent respectively, contents, 2s. 6d. and 3s 6d. per cent. respectively *Merchandise at docks*, &c., 3s. 9d and 5s. per cent respectively These insurances can be arranged with most fire offices as Government agents. It should be noted that unless these policies are effected for the full amount of existing fire policies they are subject to average, so that a policyholder should insure for the full value of buildings and contents, otherwise, should a claim arise, it would be proportionately adjusted. Thus, if the amount of the fire policy is £1,000 and a policy for only £500 is effected, compensation would be obtainable only to the extent of half the value of the property destroyed, but if the aircraft policy were for £1,000 the compensation would cover the whole loss up to the sum assured. It was announced, however, in November, 1915, that compensation to extent of £500 would be given by the Government without premium.

## INLAND POSTAL SERVICES.

*** In consequence of the War, it has been necessary to modify or suspend certain of the postal, telegraph, and telephone services announced hereunder

Within the United Kingdom, including the Orkney and Shetland Islands, the Channel Islands, Isle of Man, and the Scilly Islands.

*Letters.*

Not exceeding 1 oz. .. ... ... .. .. ... 1d.
Exceeding 1 oz., but not exceeding 8 oz. ... 2d.
For every additional 2 oz., or fraction of 2 oz. .. .. .. .. .. .. ½d.

*Book Rate.*

Not exceeding 2 oz. .. ... ..... .. .. ½d.
For every additional 2 oz., or fraction of 2 oz. ... ... ... ... ... .. .. ½d.

Limits 2 lb. in weight, 2 ft. in length, 1 ft. in width or depth.

## GENERAL REGULATIONS.

UNPAID PACKETS (*letters, newspapers, post cards*) are charged *double postage* on delivery. UNDERPAID PACKETS, *double the deficiency*

RE DIRECTION.—(a) By agent of addressee *Letters post-cards, book packets, sample packets, and newspapers* may be re-posted free not later than the day after delivery (Sundays and public holidays not being counted), and must not have been opened or tampered with. *Parcels* may be redirected free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being regarded for this purpose as one Town Delivery Area), otherwise they are charged on delivery at the ordinary prepaid rate. *Registered packets* must be taken to a Post Office. (b) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Notice of removal and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen, and signed by the person to whom the letters are to be addressed. Separate forms must be filled in for parcels, and for the re-direction and (postal) forwarding of telegrams. The notice holds good for twelve months, and may be extended by payment of 1s. for second, 1s. third, and 5s. each subsequent year

REGISTRATION.—Registered letters and parcels *must be handed to an officer of the Post Office, and a receipt taken.* The registration fee is 2d. exclusive of postage. With a further 2d. the sender may obtain advice of delivery The latest time for registering for the night mails is usually half an hour before the box closes for letters, in the case of parcels, half an hour before the latest time for posting ordinary parcels. Inland packets marked "Registered" or containing coin or jewellery, if found in a letter-box undergo compulsory registration (4d.), carrying no compensation. COMPENSATION for loss or damage.—The fees for *compensation inclusive of registration* are —Fee 2d., compensation £5, 3d., £10, and 1d. for each additional £5 up to the maximum 1s. 10d. for £60. *Compensation* up to £2 is given on (a) *unregistered parcels* (for loss, only if certificate of posting is obtained at the time of posting), (b) *unregistered packets* conveyed by Express Delivery Service No. (1). Compensation in respect of *money* of any kind (*coin, notes, orders, cheques, stamps, &c.*) is only given when the money is enclosed in one of the Registered Letter envelopes sold by the Post Office and the packet is tendered for transmission by Registered *Letter* Post, the maximum compensation for *coin* is £5. Compensation for *jewellery, watches, &c.*, is only given on *registered* packets, for *glass, crockery, grasses, liquids, colour powders, eggs, fish, meat, fruit, and vegetables* only when sent as *parcels*. Compensation is not given for *damage* to (a) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles. In any case, (b) registered *letters*, unless conspicuously marked "*Fragile, with care.*"

CERTIFICATE OF POSTING unregistered parcels, free, other unregistered postal packets, ½d.

EXPRESS DELIVERY SERVICE (in London this service is suspended for the present).—There are three services —(1) By special messenger all the way, from all offices which deliver telegrams. Charge, *which must be prepaid*, 3d per mile, or part of a mile, *inclusive* of all charges, but with a special charge of 3d. on each packet over 1 lb. in weight, and 1d. on each packet after the first up to ten. Live animals and loose money may be delivered by this service, and persons may be conducted. The messenger may take back an Inland telegram *gratis*. (2) By special messenger after transmission by post (charge 3d. as before, *exclusive* of postage, with special charges as before). (3) In advance of the ordinary deliveries at the request of addressee (3d. per mile for one packet, and 1d. for every ten or less additional packets). For (1), packets must be handed over the counter with "Express" clearly marked in left-hand top corner, for (2), may be handed in or posted, and must be marked "Express," with a broad vertical line back and front. Waiting fees 30 minutes free, each additional 15 minutes or part thereof, 3d. For Sundays and Holidays, see p. 352.

CONVEYANCE OF SINGLE LETTERS BY RAIL.—On payment of 2d. to a servant of any of the chief railways, in addition to postage at the ordinary rate, letters not exceeding 1 oz. will be forwarded, and passed on from one company to another at a junction, by the next available train or steamship, to be called for at the station to which the letter is addressed, or to be transferred thence to the nearest letter-box for postal delivery The letter may be taken to a passenger

station of the railway company or headed in at any express delivery post office (express fee of 2d. per mile). The letter may be forwarded after conveyance by train by express service (if clearly so marked, crossed front and back with a vertical line, and properly prepaid). Express messengers may be telegraphed for to meet it.

DEAD-LETTER OFFICE.—*Inland letters*, packets, post-cards, and parcels.—*Inland letters and parcels*, undelivered, bearing full name and address of sender are returned unopened; others are opened by the Returned Letter Office and returned to senders without charge, a registration fee of 8d. being charged should anything of value be inside. Letters containing neither sender's address nor any enclosure of importance are at once destroyed. Parcels containing no address, and not applied for are generally disposed of after 3 months; or if perishable are dealt with as requisite. Undelivered *foreign letters*, etc. are returned unopened, after a short detention to the countries whence received; parcels are disposed of after a reasonable time for inquiry. If containing sender's address, he is advised, and parcel will be returned on payment of fresh postage. *Post-cards*, *newspapers*, and *book packets* are redelivered to sender on payment of a second postage, if his name and address, with a request for return in case of non-delivery appear on the outside: those without such request are disposed of. The Chief Returned Letter Office is at Mount Pleasant E.C.

POSTE RESTANTE.—Solely for the accommodation of strangers and travellers and for three months only.—Letters and parcels may be addressed as a rule to all Post offices except Town Sub-Offices. *Letters or parcels* should have the words "Poste Restante *or* to be called for" in the address. If addressed to initials, or fictitious names, or Christian names only, they are not taken in, but are at once treated as undelivered, and all persons applying for "Poste Restante" letters must furnish sufficient particulars to ensure delivery to the proper owner. *Poste Restante parcels* are kept three weeks before returning *letters*, etc., from abroad, or at a request for an expected ship, are kept two months from places in the United Kingdom, one fortnight; from one part of London to another one fortnight. After these intervals they are sent up to the Returned Letter Office. Poste Restante correspondence however which bears request for return within a less time, if not delivered, is dealt with accordingly.

### *Letter Post.*

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, meat, fruit, and vegetables). The weight is unlimited. Maximum length 2 ft., width 1 ft., depth 1 ft.

### *Post Cards.*

Postage, ½*d*. The left-hand half of the address side may be used for correspondence, both inland and foreign. Plain cards (maximum size 6½ × 3½, minimum 4 × 2¾ in.), correspondence in thickness to official cards, may be used inland also for abroad, provided they have "Post Card" printed or written on them. Reply halves are available for transmission to the country of origin, and to that country alone and must bear the words "Post Card—Gt. Britain and Ireland," and "Reply."

### *Book Packets Post.*

This section takes the place of "Halfpenny Packet Post."

For printed or written matter not in the nature of a letter, and not exceeding 2 oz. in weight, ½*d*., with ½*d*. for every additional 2 oz. The limits of size are as for letters. Limit of weight 5 lb.

By this post may also be sent printed commercial forms, *e.g.*, invoices, receipts, estimates, share transfer notices, applications for employment, deeds and agreements, circulars, Christmas cards, MS. proofs and examination papers with corrections, drawings or photographic prints (when not on bristle or fragile substance); together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication *in the nature of a letter*; any writing must refer solely to subject-matter of the document, or consist of formulæ of courtesy or of a conventional character not exceeding five words or initials.

Typewritten documents, or facsimiles thereof are only admissible by this post if at least as identical copies are handed together *explicitly as such* over the counter.

### *Newspaper Post.*

This post is available for newspapers registered at the G.P.O., including any supplements thereof. Limit of size, 3 × 1 × 1 ft., ½*d*. for every 6 oz. Packing as for "book packets." No writing or printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered and a reference to a page. Newspapers not registered as such at G.P.O., and Christmas or special issues of registered newspapers are treated as book packets. Limit of weight 2 lb.

### *Magazine Post to Canada and Newfoundland.*

(British Newspapers, Magazines, and Trade Journals.)

4 oz., 1*d*. 1½ lb., 1½*d*., and ½*d* for each additional ½ lb. to 5 lb., 5*d*.

Packets not exceeding 2 oz. in weight are transmissible for ½*d*. as ordinary printed papers.

### *Parcel Post.*

For bulky and heavy matter. The limit of weight is 11 lb. Maximum length 3 ft. 6 in., greatest length and girth combined, 6 ft. The parcel should be marked "Parcel Post" and handed across the counter or given to a rural postman and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be on the outside of every parcel. More than 11 lb. must not be accepted from one person by a rural postman on foot or bicycle, without notice on the previous day, and he may refuse parcels if already loaded. A mounted postman must accept what he can conveniently carry.

Parcels to or from the Channel Is. or I. of Man are liable to customs duty, which may not be evaded by Letter Post, the sender must, in the former case, declare contents when posting.

### *Literature for the Blind.*

Papers not registered at G.P.O., periodicals and books, if printed in special type and subject to certain conditions of posting, 4 oz., ½*d*. 5 lb., 1*d*., 6 lb., limit, 8*d*. Maximum size, 3 × 1 × 1 ft.

## STAMPS, ENVELOPES, POST CARDS, &c.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to £2. 6*d*.—*for list of latter see p.* 365) are sold of the respective values of ½*d*., 1*d*., 1½*d*., 2*d*., 2½*d*., 3*d*., 4*d*., 5*d*., 6*d*., 7*d*., 9*d*., 10*d*., 1*s*., 2*s*. 6*d*., 5*s*., and 10*s*. Books of 12 1*d*. and 12 ½*d*. stamps, 2*s*. Rolls of 500 and 1,000 1*d*. and ½*d*. stamps are also sold, 1*d*. or 2*d*. extra. Stamps may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell ½*d*. and 1*d*. stamps and registered letter envelopes.

### *Spoiled Stamps.*

Embossed or impressed postage stamps cut out of envelopes, post-cards, letter-cards, newspaper wrappers, or telegram forms may be used as adhesive stamps in payment of postage pro-

vided they are not imperfect, mutilated, or defaced in any way. Stamps are considered defaced when marked on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials for identification. Embossed or Impressed Inland Revenue stamps cannot be used in payment of postage, and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Applications for the recovery of the value of spoiled or unused stamps, whether postage, revenue, or Insurance, can be made to the Postmaster at most large Post Offices (see also p. 360).

EMBOSSED ENVELOPES.—Halfpenny Envelopes—*W* (Commercial), 5⅛ × 3⅛, ½*d.* each, 21 for 1*s.* Penny Envelopes are in two sizes—*A*, 4¾ × 2½, 1½*d.* each, 10 for 1*s.*, Commercial, 5⅛ × 3⅛, 1½*d.* each, 23 for 2*s.*

REGISTERED LETTER ENVELOPES, for foreign and inland letters, with a 3*d.* embossed stamp for the payment of the registration fee and postage 1*d.*, are of five sizes. *F*, 5½ in. × 3¼ in., 3½*d.* each; *G* 6 in. × 3¾ in., 3½*d.* each, or 2*s.* 6*d.* per pkt. of 12; *H*, 6 in. × 4 in., and *HF*, 9 in. × 4 in., 4*d.* each; *K*, 11½ in. × 6 in., 4½*d.* each.

LETTER CARDS, with 1*d.* stamp, 1¼*d.* each, 1*s.* for 10.

POST CARDS impressed with a halfpenny stamp. Thin cards (3½ × 3¼ in.), ½*d.* each, 11 for 5*d.* stout cards (4½ × 3½ in.), 1 for ½*d.*, 10, 6*d.*, impressed with 1*d.* stamp, 1½*d.* each. Reply Post Cards with ½*d.* stamp on each half. Thin 1½*d.* each, 11, 1*s.*, stout, 1 for 1½*d.*, 10, 1*s.* with 1*d.* stamp on each half, 2½*d.* each, 11, 2*s.*

WRAPPERS bearing a halfpenny stamp may be had at ½*d.* each or 7 for 4*d.*, 21 for 1*s.* With a penny stamp the price is, singly 1¼*d.*, or 7 for 7½*d.* 23 for 2*s.*

## LONDON POSTAL ARRANGEMENTS.

To facilitate collection and delivery the Metropolis is divided into eleven districts, marked:—

| | |
|---|---|
| Battersea | Norwood |
| East Central (E.C.) | Paddington |
| West Central (W.C.) | South Eastern (S.E.) |
| Eastern (E.) | South Western (S.W.) |
| Northern (N.) | Western (W.) |
| North Western (N.W.) | |

Each has a head-district (p. 352) and numerous sub-district offices.

FOR THE COUNTRY AND ABROAD.—*Letters and cards* to go by Night Mail should be posted, throughout head-districts, by 6 p.m., elsewhere, up to three hours earlier, registered letters, half an hour earlier than ordinary. The most popular mails, with their days of departure and latest time of posting (without late fee), at King Edward Street are—Europe generally daily 6 p.m. Canada, Jamaica, Bahamas, Bermuda, and British Honduras, Wed. and Sat. 2 a.m. Japan and China, *viâ* United States, also *viâ* Vancouver Wed. and Sat. 2 a.m.; Australia, by Orient Packet, Sun. 2 a.m.; India, Egypt, Ceylon, Straits Settlements, China, Japan, Australia, New Zealand (*viâ* Fremantle) *letters* and post cards, Fri. 2 a.m.; printed papers, &c., Wed. 12 (night). West Coast of Africa, *viâ* Liverpool (Elders Service), irregular 8 a.m. non-Elders Service, 8 p.m. Canada, *viâ* Liverpool, Fri. 7 a.m. Brazil, River Plate and Chile, by French Packet *viâ* Bordeaux, 7 a.m. at intervals, *viâ* Liverpool or by Dutch Packet, 8 p.m. River Plate, by Nelson Line, Tues. 8 p.m. United States, Cuba, Mexico, Central America, &c., Mon. and Thurs. 9 p.m.; United States, by American Packet, Thurs. 9 p.m. (Some of these services are liable to modification or suspension in consequence of the War.)

LATE FEE LETTERS.—Inland letters and post-cards bearing an extra ½*d.* stamp are forwarded by the night mails if posted at Charing Cross and the City offices before 7 p.m., London Bridge Station and Pastoral St. Post Office before 6.30 p.m., at Mount Pleasant before 7 (6, or at King Edward St. before 7.30. At certain district offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters with an extra ½*d.* stamp, or registered letters with 1*s.* late fee, may also be posted at the various railway termini up to the time of the departure of the train bearing the mails, varying from 8.30 p.m. to 8.30 a.m.

## POSTAGE, &c., ABROAD.

N.B.—In certain colonies and foreign countries the rates of postage *to* the United Kingdom are higher than those *from* the United Kingdom given below.

### *Letters.*

The letter rate *from* the United Kingdom to the *British Empire* generally and *Cameroons*, and to *Egypt*, the *United States of America*, and the British Postal Agencies in *Morocco** is 1*d.* the ounce. The charge to *all other places* is 2½*d.* the first ounce and 1½*d.* per ounce afterwards. Transmission of merchandise by letter post to Russia and N. Persia is strictly prohibited. Limits of size, 8 × 1 × 1 ft.

SPECIAL CORRESPONDENCE.—Letters to or from H.M. ships abroad are 1*d.* per oz. Non-commissioned officers, private soldiers and seamen, schoolmasters and mistresses, and certain others serving abroad where the 2½*d.* rate would otherwise apply may send and receive letters, not over ½ oz. in weight, for 1*d.* The postage must be prepaid and address and description must be completely given. They should be addressed c/o G.P.O., London.

NOTE.—Correspondence for members of the British Expedy Forces abroad is subject to special conditions, ascertainable at any P.O.

### *Posting in Duplicate.*

Firms sending documents abroad can now post in *duplicate* the original and duplicate going by different ships. The original and duplicate must be put into covers addressed in the ordinary way, with stamps affixed to each cover sufficient for the postage and 6*d.* registration fee (or insurance fee if it is desired to insure the letter). The duplicate must be marked "Duplicate," and stamps to the value of 6*d.* affixed. Both letters must be put in an outer envelope and addressed "Urgent—Duplicate Letters.—The Superintendent on Duty Registered Letter Section, King Edward Building, G.P.O., London, E.C."

### *Urgent Letters.*

Senders of letters for the United States, for Portugal, or for any neutral country in Europe or America may secure that it shall be treated as specially urgent by the P.O. and Military Censors by affixing stamps of the value of 2*s.* 6*d.* in addition to the ordinary postage and handing it over the counter at any district or branch P.O. in the London area.

### *Post Cards.*

1*d.* single, 2*d.* reply. (*See also previous page.*)

### *Reply Coupons.*

Coupons exchangeable for stamps of the value of 20 centimes (2½*d.*) (each in any country participating in the arrangement can be purchased at any Money Order Office in this country at the price of 3*d.* each for the purpose of prepaying

* Casablanca, Fez, Larache, Marrakesh, Mazagan, Mogador, Rabat, Sefil, Tangier, Tetuan.

replies to letters. The coupons can be exchanged by the addressees at the Post Office of the place of destination for local postage stamps.

*Books, Newspapers, Samples, &c.*

(a) NEWSPAPERS, BOOKS, CATALOGUES, PHOTOGRAPHS, ENGRAVINGS, MUSIC, and other wholly printed matter, ½*d.* per 2 oz.

(b) COMMERCIAL and LEGAL PAPERS, MSS., INVOICES, TYPEWRITTEN MATTER, &c., partly written, ½*d* per 2 oz., minimum charge of 2½*d.*

(c) PATTERNS, SAMPLES, AND SCIENTIFIC SPECIMENS, ½*d.* per 2 oz., minimum charge of 1*d.*

To the British Empire or non-Union countries* the limits are Size, 2 × 1 × 1 ft., weight, generally 5 lb. (Arabia and German Solomon Is., (a) and (b) 4 lb., (c) 12 oz.). To countries in the Postal Union Size, (a) and (b) 1½ × 1 × 1 ft., (c) 18 × 8 × 4 in., weight, (a) and (b) 4 lb., (c) 12 oz. (Egypt 5 lb.). If in the form of a roll, the limits of size in all cases are (a) and (b) 30 × 4 in., (c) 18 × 8 in. Postage must be prepaid. Wholly unpaid packets are stopped. Double the deficit is the maximum charge on underpaid packets. Regulations as to packing, writing, &c., are similar to those for inland packets.

*Parcels sent abroad.*

Customs declaration respecting the contents must be made on a form obtainable at any Post Office. Some countries, *e.g.*, Argentine, impose in addition a fiscal charge on parcels entering. The sender may arrange to prepay all charges to certain colonies and foreign countries (*not* Argentine) by paying a fee of 6*d.* depositing 1*s.* for each 5*s.* or fraction (minimum deposit 2*s.*), Australia, Canada, New Zealand, S. Rhodesia, S.W. Africa, Union of S. Africa, or U.S.A., 2*s.* or fraction (minimum deposit 5*s.*), of the value, and signing an undertaking to pay all Customs and other charges on demand, otherwise they are collected on delivery. Certain articles are *prohibited*, others *liable to letters nearly* everywhere.

*Imperial British Parcel Rates.*

The "triple system" of 3 lb. 1*s.*, 7 lb. 2*s.*, 11 lb. 3*s.* is charged to Aden, Ascension, Bahamas, Barbados, Bermuda, Brit. E. Africa, Brit. Guiana, Brit. Honduras, Brit. N. Borneo, Brit. Somaliland, Brunei, Canada, Ceylon, China (Brit. Agencies),** Cyprus, Falkland Is., Gambia, German E. Africa, Gibraltar, Gold Coast, Grenada, Hong Kong, India † Jamaica, Labuan, Leeward Is. (Antigua, Montserrat, Nevis, St. Kitts, Turtola), Malay States, Malta, Mauritius, Mesopotamia, Morocco (Brit. Post Agencies), Newfoundland, New Zealand, St. Helena, St. Lucia, St. Vincent, Sarawak, Sierra Leone, Straits Settlements, Tobago, Trinidad, Turks and Caicos Is., Uganda, and Zanzibar.

For 3, 7, and 11 lb. the rates to Fiji are 1*s.* 8*d.* 3*s.* 6*d.*, to Tonga 1*s.* (*via* New Zealand) 3*s.* 3*s.* 6*d.*, to Nigeria, 1*s.* 8*d.*, 3*s.* 6*d.*, Seychelles (*via* Aden) 1*s.* 8*d.*, 3*s.* 6*d.*, 3*s.* 6*d.* The charges to other parts of the Empire for the first lb. and for each succeeding lb. to 11 lb. are as follow:—

Australia (with Norfolk I.) 1*s.*, 6*d.*; Gilbert and Ellice, New Hebrides and Papua Orna, 1*s.* 8*d.*, 1*d.*; Brit. Solomon Is. and Papua, 1*s.* 8*d.*, 2*d.*; N. Rhodesia, 1*s.* 6*d.*, 1*s.* 6*d.*; S. Rhodesia, 1*s.* 8*d.*, 1*s.* 8*d.*; Nyasaland Prot., 2*s.* 7 D. 1*s.*, 4*s.* 8*d.*, 8*d.*; Brit. S. Africa (Cape, Natal, Orange F. S., Transvaal), 8*d.*, 8*d.*; S.W. Africa (formerly German), 1*s.*, 1*s.* Special Rates for Expeditionary Forces and Prisoners of War. See special leaflets obtainable at Post Offices.

To most countries the maximum length is 3 feet 6 inches, or length and girth combined 6 feet. Parcels for Canada, however, except umbrellas, &c., must not be longer than 2½ feet. To Italy and Greece and their Colonies, to the Argentine, Brazil and Paraguay, the maximum length is 3 feet, length and girth combined about 4 feet. In many cases, however, narrow parcels (umbrellas, sticks, &c.) may be longer

INSURANCE.—Insurance may be effected on parcels to almost all countries up to £490, according to destination, at the following rates —4d. for £12, and 2d for every additional £12 up to 5s. 10d. for £490. Parcels sent to the U.S. by the *semi-official* service are insurable at 6d. per £12 up to £120 Compensation up to £1 is also given on *uninsured* parcels to or from Egypt, India and the smaller colonies, with the larger foreign countries, including the semi official U.S.A. service.

INSURED BOX POST.—Jewellery and similar articles (not money) may be sent in strong boxes by letter mails to Belgium Denmark, Egypt France, Holland, Italy Norway Portugal, Rumania, Switzerland Postage is 2s. maximum weight 2 lb. size 18 × 4 × 4 in. Customs declarations must be filled in. Insurance rates as for parcels, limit £500.

CASH ON DELIVERY.—A service of "cash on delivery" of parcels has been established between the U.K. and the following Bahamas (Nassau) Barbados, Bermudas, Brit. Guiana. Brit. Honduras, Cayman Is., Cyprus, Egypt, Fiji Is. Gambia, Gibraltar Grenada, Hong Kong Jamaica, Leeward Is., Malta, Morocco (Casablanca, Mazagan, Mogador Tangier Tetuan), Nyasaland, St. Rhodesia St. Lucia, St Vincent, Sarawak, Seychelles, Brit. Somaliland Str Settlements, Shanghai, Tobago, Trinidad. Maximum collected, £50. Charges for collecting *up to* £5, 4d; £10, 6d; £15, 8d; £20 1s. *exclusive* of poundage on £1 or £5 by which amount is realized *in the given countries*, according to a graduated scale—*e.g.* £1, 2d. to 1s. 1d.; £5, 1s. to 5s. 6d., £10, 1s. 11d. to 9s. 8d; £20, 3s. 8d. to 11s., *exclusive* of poundage.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence to or from certain colonies and foreign countries, or certain towns in the same, has now been arranged. 1d extra is paid by the sender on parcels, 2d. on other matter The rest of the charge is collected from the addressee.

## MONEY AND POSTAL ORDERS.

The Chief Money Order Office is at Manor Gardens, Holloway, N

¶ The parcel post with the United States is carried on by means of two distinct services, namely an official service (United States Post Office) and a semi-official service (American Express Company) Customs charges cannot be prepaid by sender in the official service A parcel forwarded by the semi-official service may, however, attain charge, be sent through New York in Bond for Customs examination at any one of the "United States Ports of Entry" or Inland Custom Houses. The addressee must, however make arrangements for the delivery of such parcels after they have been cleared at the Inland Port. Such parcels must be plainly marked by the sender, "in bond to ——" naming the Inland Port chosen, and the same words must also be written in the same handwriting on the Customs declaration and dispatch note.

ADVICE OF PAYMENT 2d. for inland, 2½d. for foreign and colonial orders.

### *Inland Ordinary Money Orders.*

The poundage charged is for sums not exceeding £1, 2d., £2, 3d., £10, 4d., £30, 6d., £30, 8d., £40 (maximum), 10d. No order may contain a fractional part of 1d.

The rules and regulations are on the forms issued.

### *Inland Telegraph Money Orders.*

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 2d., and cost of official Telegram of Advice If the order is to be delivered at payee's address any charge for portsrage must be prepaid.

### *Postal Orders*

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week days. They are also issued and paid in almost all parts of the Empire they are *paid* at chief Canadian offices, and *paid* in Australia only when issued to soldiers, in Egypt, and at the British Agencies at Panama, China (p. 347, *note* **), and Morocco (p. 347, *note* *, except Alcazar and Mequinez). They are issued, with a counterfoil to be retained by the sender, for every 6d. up to 30s. and for 31s., those of 6d, 1s 1s 6d., 2s, 2s 6d., 3s., 3s 6d. &c., up to 15s, at a charge of 1d., those of 15s 6d. &c., up to 21s, 1½d They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Adhesive British Postage Stamps (not perforated and not exceeding 2 in number) to the amount of 6d but not fractions of 1d., may be affixed to the *face* of an order

### *Ordinary Money Orders Abroad.*

Orders payable in British Dominions, Colonies, Protectorates, &c., at British Postal Agencies abroad or in Allied countries or their colonies (not Serbia or Amerles), not exceeding £1. 5d. Neutral countries or their colonies, £1. 4d up to £40 (maximum). Some countries have £30 limit.

### *Telegraph Money Orders Abroad.*

Only to some colonies and foreign countries, *e.g.*, to Canada, but not Australia. Poundage at same rate as for Ordinary Money Orders abroad, *plus* supplementary fee of 6d. for foreign countries, 1s. for British Colonies and Dependencies (except Canada and Newfoundland), for Canada and Newfoundland 3d ordinary rate, 1s. deferred rate and cost of official Telegram of Advice. (Ordinary rate for foreign countries. Ordinary or deferred rate for a British Colony, &c.)

## TELEGRAMS

### *Inland.*

Telegrams may be posted or handed in at a telegraph office, or to a rural postman. Rate throughout British Isles, 12 words or less 8d., each further word ½d. . payment in stamps affixed to the form by the sender Replies may be prepaid up to 48 words, the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges, 1d. Certified copy 8d. The address of the

receiver is charged for. The charge includes delivery within three miles of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6d. per mile, calculated from the free delivery limit. Porterage to be paid by sender Telegram forms are issued gratis. Usual hours 8 a.m. to 7 p.m. Some Offices 8 a.m. to 8 p.m. In London and a few of the largest towns at the Head Offices and in many railway stations telegrams are dispatched at any hour of the day and night.

SUNDAY TELEGRAMS.—See p. 351 and below

*Note.*—It is usually possible to get a telegram through from an office which is open to one which may perhaps be closed for telegraphic business by payment of the following extra fees: 1s. for the telegraphist, 1s. for the messenger and 6d. an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1s. for the postmaster 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist.

The following count one word:—(1) All names of towns and villages in U.K. (not of branch or sub-offices or districts in towns, unless in addition to street name); (2) all names of railway and consignment stations (not in towns) with public telegraph. (3) words (not names ordinarily written as one or with hyphen, including "double L," etc. (4) *Names* with prefix "St." Do. "De la"; (5) each five figures (6) each initial, except London Postal Districts (p. 352—E.C. to W.C.—E.M.S. (In address) which count one word each group.

NIGHT TELEGRAMS LETTER for delivery by first morning post may be sent before midnight between towns whose Head Telegraph Offices are open always, at 8d. for 36 words or less, and ¼d per 3 words beyond 36.

OFFICES ALWAYS OPEN *London*—G P O Central and West Strand P O *The Provinces*—Birmingham, Bradford (except between midnight Saturday and 8.30 a.m. Sunday), Brighton (except from midnight Saturday to 9 a.m. Sunday), Bristol, Derby Devonport, Exeter, Falmouth (no delivery between 8 p.m. and 9 a.m.) Holyhead, Hull Leeds, Liverpool, Manchester Newcastle-on-Tyne, Newport (Mon.), Norwich, Nottingham, Plymouth Portland Plymouth, Portsmouth, Sheffield, Southampton Docks, and Swansea (no delivery to ships on dark nights) Scotland—Aberdeen, Dundee, Edinburgh, Glasgow *Ireland*—Belfast, Cork, Dublin, Londonderry Queenstown. *All the Wireless Stations and Cable or Signal Stations at* Alexandria, Bedford (M.R.), Blackburn, Bolton (L.N.), Bradford (M.R.) except from 11 p.m. Saturday to 9 a.m. Sunday) Burton (M.R.), Chester (Northgate), Christon Bank, Crewe, Darlington (*not*), Doncaster, Ely Folkestone Harbour (*not*) Gloucester (M.R.), Grantham Harbour Row Mill, Ipswich Kettering, Killingworth station, Kingsbridge (Dublin, *d*), Leicester (M.R.), Manchester March, Newton Abbot (*not*), Peterboro (G.E. *Deferred Telegrams*

Telegrams in plain English or French, for certain Extra-European places,‡ are accepted at rumious other wise unenlisted reduced rates on condition that they may if necessary be deferred during the suspension for not more than 24 hours in favour of Full-rate Telegrams.

*Cable Letters*

Plain-language (non-code) messages in English or French are telegraphed at reduced rates by certain cable companies, on condition that delivery shall be deferred. WEEK END CABLE LETTERS must reach the companies' British stations (by post or telegraph) by Saturday night, and will not be delivered before the following Monday

## POST OFFICE TELEPHONES.

*London Telephone Area.*—The office of the Controller of the London Telephone Service is at 144a Queen Victoria St., E.C. *Annual Subscription*, in the London area, for an *unlimited* number of calls (unlimited or flat rate), £20, £17 for second and subsequent connexions, two party lines, £7 10s., four party lines, £5 (for existing flat rate subscribers only). In the Provinces unlimited service rates have not been available for some years to new subscribers. For each call on an exchange within the Telephone District of London, 2d., outside the Telephone District, 3d., Minimum payable yearly for calls, 24s. on party lines, £3 each party Private subscribers may use their lines for trunk messages, or for sending telegrams and express messages (each 20 words, 2d. per mile), on paying a deposit to cover the credit given, also for receiving telegrams addressed to their exchange and number, and letters arriving at G.P.O., London, early Sunday Morning can be delivered on Sunday by telephone to subscribers. *Call Office Fee*, for subscribers or others, 2d each 3 (night, 6) minutes.

*Telephone Trunk Lines.*—These connect Exchanges in different towns. Rates in day-time — 4d. for 25 miles, 9d. for 50 miles, 1s. for 75 miles, 1s. 4d. for 100 miles, and an additional 6d. for every further 40 miles. Trunk fees formerly 1d. or 3d. are now increased to 2d. and 6d. respectively Special rates are charged over submarine lines. 3 minutes are allowed, on the air expiry the option of another 3 minutes is given, if double fee is previously deposited, or the line may be engaged outright for the *maximum* of 6 minutes. The charge for a 6 minutes conversation during the night period from 7 p.m. to 7 a.m. will be the same as for a 3 minutes' conversation during the day During the night period also a 3 minutes' conversation may be had for half the day fee when that amounts to 1s. 4d. or more. When the day fee is 1s. the night fee is 9d.

## SUNDAY AND HOLIDAY ARRANGEMENTS.

On SUNDAY throughout the U.K no Parcel Post, Money and Postal Order Savings Bank, or Express Delivery Services, No. 1, pau business is transacted. In London all but forty offices are closed. These forty open in the morning (thirty four of them, including those on p. 352, except the N.W District Office, also in the evening) to sell stamps and send telegrams About ninety suburban stations, chiefly N.E. and S.W. send telegrams at train times and fee 1d. to 2d. There is no delivery of anything except of telephoned express letters, as well as, from G.P.O. of express letters fully prepaid, marked with one thick vertical line and the words "Express Delivery on Sunday"; nor any general collection till midnight. Letters, etc. with extra ½d. stamp, posted in special boxes at one of the above-mentioned thirty-four offices before times varying from 5 to 8 p.m., or at any great railway terminus before 6 p.m. (after if at the appropriate terminus) leave by the usual night mails. Letters may be registered at these offices up to 3 min. of latest time of posting or with 1s. fee at the Sorting Carriage on the mail train at the appropriate terminus, at times varying between 8.13 and 8.35 p.m. Parcels are neither delivered, nor accepted on Sunday in any part of the U.K. *In the Provinces* all Head Offices and most Sub offices open from 8.30–10 a.m. for stamps, telegrams, registering letters (Scotland 9–10 a.m.). Many railway stations send telegrams at train times. There is only one delivery of letters in most Scottish towns, and the smaller English and Irish villages, none: any one may prevent even this so far as relates to himself but letters can be obtained at most Head Offices. CHRISTMAS DAY ARE GOOD FRIDAY in *Provinces* as in London. Hours in the early morning, delivery of letters and parcels. When Christmas Day falls on a Sunday parcels and express letters only are distributed. The G.P.O. and Evershott Street offices open from 8–7 p.m. (stamps, registered letters); also certain Telegraph Offices (stamps, telegrams (p. 352), telephone, registered letters) Ordinary letters are not accepted for delivery under Service 1, but may be posted in Pillar Boxes (p. 352) and parcels are not collected. The *Provinces* In Scotland business is as on week-days, in England and Ireland as Sundays, but with one morning delivery of letters and parcels, even if Christmas be a Sunday. OTHER PUBLIC AND BANK HOLIDAYS.—*London* One morning delivery of letters and parcels. Collection of letters, evening and midnight, of parcels, morning only G.P.O. and Head District Offices (p. 352) open for all business except Savings Bank Old Age Pensions, and ordinary Money Order business. The Provinces, in England and Ireland the chief town and country offices and sub-offices, if also telegraph delivery offices, generally open as usual, closing at noon for Savings Bank, Pension and Money Order business. The smaller offices of all kinds open either only in the morning or not at all. In Scotland the same holds good, but on New Year's Day no Money Order etc., business is done. Throughout the U.K. there is only one letting and parcel delivery in Scotland, also on SACRAMENTAL FAST DAYS and Holidays fixed by Local Authorities.

‡ The coloured rate tables "d/¶" system applies to places and rates marked thus.

¶ Per Brazilian Inland Lines, 2d. d/¶ 2½d.) less.

¶§ Cable letters not telegraphed from Montreal to places in B.C. to which the normal rate is over 1s. 6d.

# Customs Tariff of the United Kingdom (1917–1918)

Showing the several Articles subject to Import and Export Duties in the United Kingdom, and the Duty levied upon each Article, according to the Tariff in operation upon the 1st day of November, 1917

| ARTICLES. | Rates of Duty £ s. d. |
|---|---|

LAND TAX.—The quota payable by each Parish, as fixed in the year 1798 (less the amount redeemed), is raised by an equal pound rate, the rate of Assessment not to exceed 2*s.* in the £. Where the income of the owner of the land (when not a body of persons, corporate or incorporate) does not exceed £160 he is exempt from payment of land tax, and if the owner's income does not exceed £400 one-half of the tax is remitted, but he must claim this relief before payment of the tax.

LAND VALUES DUTIES—

(I.) INCREMENT VALUE DUTY payable on the occasion (*a*) of any transfer or sale of land or any interest therein, (*b*) of any lease for more than 14 years, (*c*) of the land, or interest in it, passing on death (*d*) In the case of Corporations, in addition to (*a*) and (*b*), and in place of (*c*), the duty is payable in 1924 and every 25 years thereafter

*Rate of duty* (payable as a stamp duty by (*a*) the seller, (*b*) the lessor, (*c* the deceased's estate, or (*d*) the Corporation) £1 for every £5 of "increment value" *i.e.*, the increase in the value of the site—apart from the value of buildings, &c., there in—since April 30, 1909, or since the last payment of duty

*Exemptions, &c.*—Agricultural land, while it has no higher value than for agricultural purposes only.—Small residences occupied by the owner or holder of lease of 50 years, where annual value does not exceed £40 in London, £26 in towns of 30,000 population, and £16 elsewhere.—Small agricultural holdings, where land and dwelling do not exceed £30 annual value, occupied and cultivated by the owner, and not exceeding 50 acres (if average value not exceeding £75 an acre).—Recreation grounds owned by corporate and other bodies, without view of profit, are not liable to the periodical charge (*d*).—Flats (transfer, lease, &c., of separate dwelling).—Ten *per cent.* of increment allowed free on first and on any subsequent occasion, but such allowances not to amount to more than 25 *per cent* in any period of five years.—Allowance is made where Reversion Duty has been paid for the same benefit or increment.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909.—Minerals not so exempt are subject to a special basis of charge to Increment Value Duty, as an annual duty

(II.) REVERSION DUTY payable by the lessor on the determination of a lease.

*Rate of Duty* £1 for every £10 of the value of the benefit accruing to the lessor

*Exceptions, &c.*—Reversions purchased before April 30, 1909, under leases which determine within 40 years of purchase.—Leases of agricultural land.—Leases the original term of which did not exceed 21 years.—Allowance made where fresh lease is granted before expiration of original lease, 2½ *per cent.* of duty for each unexpired year, up to 50 *per cent.* of whole duty.—Allowance is made where Increment Value Duty has been paid for the same benefit or increment.—Mining leases are not charged.

(III.) UNDEVELOPED LAND DUTY payable by the owner (including a lessee for a term of 50 years or more) of any land which has not been developed by the erection of dwelling houses or buildings for the purpose of any trade, &c., other than agriculture (but including glasshouses or greenhouses as trade buildings), or is not otherwise used *bond fide* for any trade, &c., other than agriculture.

*Rate of Duty.*—One halfpenny annually for every £1 of the "site value" *i.e.*, the market value of the fee simple of the land if divested of build ngs timber, &c., and less the value of any minerals.

*Exemptions, &c.*—Land the site value of which does not exceed £50 an acre.—Agricultural land, except on such part of the site value as exceeds its agricultural value.—Parks and spaces open to the public as of right, or to which the public are allowed reasonable access.—Recreation ground, used as such under agreements for not less than 5 years.—Land not exceeding 1 acre occupied with a dwelling-house.—Garden (with a dwelling house) up to 5 acres, when site value of the whole does not exceed 20 times its *annual* value.—Agricultural land held under an existing agreement not chargeable until agreement terminates.—Agricultural land occupied and cultivated by the owner if *all* land owned by him does not exceed £500 in value.—Allowance is made where Increment Value Duty has been paid in respect of undeveloped land.

(IV.) MINERAL RIGHTS DUTY payable in respect of the rental value of all rights to work minerals and of all mineral wayleaves.

*Rate of Duty* payable by the proprietor where he works the minerals, or, in any other case by the immediate lessor of the working lessee] 1*s.* 6*d.* annually *for* each £1 of rental value.

EXCESS MINERAL RIGHTS DUTY payable in addition to Mineral Rights Duty, where the amount payable as rent varies according to the price of the minerals, and exceeds the pre-war rent.

A duty equal to 80 per cent. of the excess.

*Exemptions, &c.*—Common clay, common brick clay, common brick earth sand, chalk, limestone, and gravel are not charged.—*Reversion Duty* is not charged on the determination, nor *Increment Duty* on the grant, of a mining lease.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909, are exempt from *Increment Value* Duty and minerals not so exempt are charged *to that Duty* on a special basis in the form of an annual duty

*LEASES.—Lease or tack of any dwelling house or part thereof for any definite term not exceeding a year at a rent not exceeding £10 per annum, nil., for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £25, 5*s.*, of any lands, tenements, &c., at a yearly rent —

| Not Exceed. | Not exceeding 35 years. | Between 35 years and 100. | Exceeding 100 years. |

100, for £50, or fractional part of £50. 0 10 0 — 3 0 0 — 6 0 0

Lease of any kind not specially charged 1 0 0

Agreement for lease not exceeding 35 years, same as actual lease.

* Section 15 of the Revenue Act, 1911, provides that in cases where the consideration or any part of the consideration consists of any money stock, or security (other than rent), the amount or value of which does not exceed £500, and the instrument contains a certificate that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration other than rent exceeds £500, duty shall be charged at half the rates set out under the heading "Conveyance or Transfer on sale of any property," &c.

This Section, however, does not apply in any case where part of the consideration for any lease or tack consists of rent and that rent exceeds £20 a year

LEGACY AND SUCCESSION DUTIES.—*Also see "Estate Duty"*

If the de ceased died on or after the 21st June, 1881, every pecuniary Legacy or Residue or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.—Except in the cases of small estates, see note to Estate Duty

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100 (16 & 17 Vict. c. 51, s. 28).

Rates of duties payable on legacies annuities, and residues, and of Succession Duties where deceased died bef ore 21st July, 1888, or where Estate Duty, Finance Act, 1894, is payable

To Husband or Wife or Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (*see* above) £1 per cent

*Exceptions.*—Estates not exceeding £15,000.—Legacies and successions of less than £1 000 (£2,000 in the case of widow or child under the age of 21 of deceased), whatever may be value of whole estate.

To Brothers and Sisters of the Deceased or their Descendants .. .. £3 per cent

To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants .. .. .. } £6 per cent

To Brothers and Sisters of the Grandfather or Grandmother of the Deceased or their Descendants .. .. ..

To any Person in any other degree of collateral Consanguinity or to a Stranger in Blood to the Deceased .. ..

Where deceased died on or after 1 July 1888, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 12½ respectively

The Husband or Wife is chargeable with Estate Duty and Legacy and Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

*Penalties.*—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same, persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

Schedule A Lands, Tenements, &c. See above
Owner must allow deduction from rent payment of rent when tax paid by tenant.
Relief is given in certain cases in respect of Income Tax under Sch. A to the extent of either ⅓ or ⅙ part of the assessment (57 & 58 Vict. c. 35).

† Special rates of tax and scales of allowances are applicable to the official pay of persons who have served during the year as members of any of the naval or military forces of the Crown, or in service of a naval or military character in connection with the present war, for which payment is made out of money provided by Parliament, or in any work abroad of the British Red Cross Society or the St. John Ambulance Association, or any body with similar objects.

*Allowance to Owners of Land and Houses*, for average cost of maintenance, repairs, insurance and management, may be claimed in addition. This special allowance does not apply to houses of annual value exceeding £12. Five years average taken.

Schedule B Nurseries & Market Gardens } See above

In respect of the Occupation of Farms, &c on full Annual Value, *or* (by special request, if made before 5th June (5th August in Scotland) in the current Income tax year) on *pro rata* of husbandry as in case of Trades, under Schedule D

Schedule C Dividends or Annuities from public revenue (Government Stocks &c.) — — — — —

Schedule D Trades, Professions, Remittances from Abroad, Interest, &c.

Schedule E Salaries, pensions, and other emoluments of Officers of Army Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c — — — — —

†Exemption and Abatements.

Income not exceeding £130 Exempt.

| Exed. | Not Exed. | |
|---|---|---|
| £130 | £400 | Abatement of £120 |
| 400 | 600 | 100 |
| 600 | 700 | 70 |

When the total joint income of a husband and wife does not exceed £500, a wife can separate her claim for exemption or abatement from that of her husband on account of profits derived from any business carried on by means of her own personal labour (56 & 57 Vict. c. 24. s. 3), provided the husband is assessable under Sch. D, and that his income is unconnected with the business of the wife. Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income, but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 3 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £100 in all

A Clergyman or Minister paying rent for dwelling house and using part of the house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent. (Finance Act, 1907, s. 28.)

ALLOWANCE FOR CHILDREN may be claimed by persons whose total incomes do not exceed £700. £25 to be free of tax in respect of each child under 16 years old.

RESIDENTS ABROAD.—No exemption or other relief dependent on total income is given to persons not residing in the United Kingdom *Exceptions* present or former servants of the Crown, widows in receipt of pensions granted in consideration of the employment of their late husbands in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons residing abroad for their health.

| Maximum Fee | 50 | 0 | 0 |
| For registering any document required or authorised by the Act | 0 | 5 | 0 |
| For making a record of any fact required or authorised to be recorded by the Registrar | 0 | 5 | 0 |

Deed stamp 10s to be put both upon Memorandum and Articles of Association.

Fees on Registration of Mortgage 10s. up to £200 £1 above £100.

**Hours at Somerset House.**

Inland Revenue Office, 10 to 4 (Saturdays, 1).

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10s. or less — ½d

On goods pledged for more than 10s — 1d

For INTEREST on pledges not exceeding 40s., for every 2½, or part of 2½, per month — ½d

And after the first month any time not exceeding 14 days to be charged as half a month.

On pledges exceeding 40s for every half crown or part of half a crown, per month ½d.

FORFEITURE.—Pledges for 10s and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker

Pledges above 10s, if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—*i.e.*, the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under the charge on form of declaration is one halfpenny, when the loan is above 5s, one penny

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40s, provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn ticket, signed by the pawnbroker

(2.) The duplicate of the special contract pawnticket shall be signed by the pawner

The pawnbroker may also charge —For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10s.

## BIRTHS, MARRIAGES, DEATHS, WILLS, AND OTHER USEFUL INFORMATION

### BIRTHS.

Where a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened, 3. A person present at the birth, or 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. One of these must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided but the registration of a birth will be free when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees, amounting to ten shillings. No birth occurring in England and Wales can be registered after the lapse of seven years from the date thereof. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father or person in attendance on the mother to the district medical officer of health. The notice must be sent by post within 36 hours of the birth, and is to be in addition to, and not in substitution for the notices above mentioned.

### DEATHS.

When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death, or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of these must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register, or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not, however, delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the burial, to notify the Registrar thereof within seven days. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees amounting to ten shillings.

Coroners' Inquests.—Sudden deaths are supposed by the law to demand inquiry, and Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person *drowned*, or *dying suddenly* and of any person dying in prison. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which

the death took place. Any person summoned as a *witness* is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting *jurymen* being £5. In the case of sudden or suspicious death in Scotland, the Lord Advocate may order a public inquiry to be held in the manner prescribed by the Fatal Accidents Inquiry (Scotland) Act, 1895, as altered by an amending Act passed in 1906.

## VACCINATION

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth the Public Vaccinator is required to give 24 hours notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate or make the declaration, will still be liable to penalties for not having a child vaccinated and by the Vaccination Order 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions. (See also Vaccination *Order, 1907.*)

## MARRIAGE BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety and exclude clandestine marriages. The Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV c. 76, which repealed most of the laws then in force (see also 6 & 7 Will IV c. 85, and 1 Vict. c. 22). Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married. It may be noted that, by Scottish law only omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., 'Marriages in Scotland," *post*). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Midgeley* v *Wood*, 4 Sw & Tr 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages, but where a district has been assigned to a chapel and it becomes a vicarage, or 'ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse the banns become useless, and the parties must either obtain a licence or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are 'forbidden." By the Act 6 & 7 Will IV c. 85, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the *Ecclesiastical* parish of the church in which the marriage is to take place.

Marriage licences are of two kinds—(a) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages, (b) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 366). The Act of 1844 severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence and every Registrar or other person who knowingly unduly solemnises a marriage is also guilty of felony. By a subsequent alteration in the law the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 58 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service.

*Marriage with a deceased wife's sister*—including a sister of half blood—was legalised in 1907. No clergyman, however, can be compelled to solemnise such a marriage, but he can allow his church to be used for the purpose by another minister.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 1d. Searches in the register-books may be made on payment of small fees, viz., 1s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if extensive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

## MARRIAGE LICENCES.

Marriage Licences can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 19, Knightrider Street, Doctors' Commons, E.C., are available for London and all England and Wales; those procured at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4 (Saturdays 10 to 2), are available for London and all England and Wales, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of Sealy'smounting to thirty shillings, in addition to the cost of stamp, 10s. 6d. *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 19s. to £2 12s. 6d. By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and *collusion* in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage, and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

## SPECIAL MARRIAGE LICENCES.

Special Licences are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c., but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 19 Knightrider Street, Doctors' Commons, E.C. £3 3s. 6d., 10s. Oath (extra). Fee for licence stamp, &c., £4 4s.

## MARRIAGES BEFORE A REGISTRAR AND IN NONCONFORMIST BUILDINGS.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (a) by Certificate, (b) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

### Notice of Marriage by Certificate.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

### Notice of Marriage by Licence.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

### Issue of Certificate (without Licence) for Marriage.

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

### Issue of Certificate and Licence for Marriage.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

Regulations to be Followed as to Marriage.

(c) *Marriage by Certificate*:—

a. If both parties live in the same district:—The certificate of the Superintendent Registrar of that district.

b. If they live in different districts:—A certificate from the Superintendent Registrar of each district.

(d) *Marriage by License*:—The certificate and license of the Superintendent Registrar of the district in which the notice is given.

### Place of Marriage.

The marriage must generally take place at a building within the district of residence of one of the parties, but there are exceptions, as follows:—

a. Section 24 of 19 & 20 Vict. cap. 119, provides that, if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given.

b. The Act 3 and 4 Vict. cap. 92, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, the marriage may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Gaillat* v *Gaillat*, 29 T.L.R. 406).

### Marriage Ceremony.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows — "I do solemnly declare that I know not of any lawful impediment why I, *A B*, may not be joined in matrimony to *C D*", and each of the parties must say to the other, "I call upon these persons here present to witness that I, *A B*, do take thee, *C D*, to be my lawful wedded wife (*or husband*)." A wedding-ring may be, and is generally, used at a marriage at a register office.

### Marriage Act, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the manner of the Jews or of the Society of Friends) provides for the appointment of an "authorised person" (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained.

The parties must at some time during the ceremony make the following declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*"

Thereupon the parties must say to the other:—"I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife (*or husband*)", or, in lieu thereof —

"I, *A B.*, do take thee, *C. D*, to be my wedded wife (*or husband*)."

Rules and Regulations relating to this Act were published in October, 1899. (See *Statutory Rules and Orders*, 1899, No. 1199.)

### Naval Marriages Act, 1908.

This Act, which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage.

It provides that any officer, seaman, or marine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays before the issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by license can take place under this Act.

### Fees.

| | s. | d. |
|---|---|---|
| For entering notice of a marriage by certificate in the marriage notice-book | 1 | 0 |
| For entering notice of a marriage by license in the marriage notice-book... | 1 | 0 |
| For a certificate for marriage without license... ... ... ... ... ... ... | 1 | 0 |
| For a certificate for marriage by license | 1 | 0 |
| For a license for marriage ... ... ... ... | 23 | 0 |
| Stamp duty on a license for marriage. ... | 10 | 0 |
| For a marriage by certificate in the presence of a Registrar ... ... ... ... | 3 | 0 |
| For a marriage by license in the presence of a Registrar ... ... ... ... | 10 | 0 |

Exclusive of the fee for a certificate of the marriage (marriage lines), the total fees for a marriage by certificate, when the parties live in the same district, amount to 5s., if they live in different districts, to 9s.

For a marriage by license the total fees are £3 12s. 0d.

## CERTIFICATES OF BIRTHS, DEATHS, OR MARRIAGES.

Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3s. 9d., viz. 1s. for search, 2s. 6d. for the certificate, and 2d. for the stamp affixed thereto. They can also be obtained from the registration officer having the legal custody of the registers, book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place. For the certificate of a birth in *Scotland*, application should be made to the Registrar-General in Edinburgh.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament,

Friendly Societies Act, 1896, Birth or Death, 2s., Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 2d., Savings Banks Act, 1887, Birth, Death, or Marriage, 2s., National Insurance Acts, 1911 and 1913, Birth, 6d., Marriage, 2s., Industrial Assurance Companies Act, 1896, and Trade Unions Amendments Act, 1876, death of child under 10 years of age, 2s., but only from the local Registrar

*MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.*

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 29 of the Marriages and Registration Act, 1837.

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling house at any hour the marriage must be registered by the secretary of the synagogue of which the man is a member

If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house, the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1907. The marriage of a woman with her deceased husband's brother is still illegal, and the Act forbids the marriage of a man with the sister of his *divorced* wife during the wife's lifetime.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns, as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD

Act passed June 27 1892, came into force Jan. 1, 1893. Order in Council dated Nov 22, 1913, whereby previous Orders are repealed and regulations for marriages under the Act are laid down.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the *Foreign Marriages Act*, 1892. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

(a) That both the parties are British subjects, or,

(b) If only one of the parties is a British subject, that the other is not a subject or citizen of the country, or,

(c) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country, or,

(d) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

(a) That the marriage will be recognized by the law of the country to which the foreigner belongs, or,

(b) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognised by the law of the country to which the foreigner belongs, or,

(c) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the above-named Act.

It is necessary for one of the parties to the intending marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (c) notice must be given in like manner as if the party so

resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

(a) That he or she believes that there is no impediment

(b) that both the parties have had their usual *place of residence in the district* of the consular marriage officer for three weeks immediately preceding or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district, [illegible] to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 10, 1899, and are payable to His Majesty's Govt.

| | £ | s. | d. |
|---|---|---|---|
| For receiving notice of an intended marriage | 0 | 10 | 0 |
| For receiving notice of a caveat | 1 | 0 | 0 |
| For every marriage solemnized by or in the presence of a Marriage Officer and registered by him | 0 | 10 | 0 |
| For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place | 0 | 5 | 0 |
| For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same | 1 | 0 | 0 |

Marriages may be solemnized 8 a.m. to 3 p.m.

No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which *would not be* valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Brook* v *Brook*, 1861, 29 T. L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

### MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW

ACT OF 1906.—Under the *Marriage with Foreigners Act*, 1906, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, before giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any person may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (*re Goaz Fergus v Pitkin*, 1909, 25 T.L.R. 222).

## MARRIAGES IN SCOTLAND.

The marriage laws of Scotland are peculiar among those of all nations for the latitude allowed the contracting parties, and, beyond requiring proof of present consent, the utter absence of direction as to celebration. No religious ceremony is obligatory, although the intervention of the Church is recognised, and is usual in practice. That the parties give their free and serious consent is the only requisite. Males *over fourteen* and *females over twelve* may contract marriage without consent of their parents or guardians.

Marriages are of two kinds (a) Those solemnised by a minister after (*a*) banns, or (*b*) publication of notice by the Registrar, called Regular Marriages, and (*s*) those celebrated without the assistance of a clergyman, called Irregular Marriages.

*On Banns.*—The proclamation of banns in Scotland has been customary *authentically* since 1552, and is probably of greater antiquity. It is regulated chiefly by the Acts of Assembly of the Church of Scotland. One of the parties must have resided in the parish where the banns are to be proclaimed for the space of fifteen clear days immediately preceding the proclamation in the parish church. The banns are proclaimed in the parish church on two separate Sundays during service, but it is customary to complete the publication by proclamation at two services on the same Sunday. Where the parties reside in different parishes, the proclamation is made in both. There is no provision for cases where one of the parties resides in England, but it is usual to accept an English certificate. Application for proclamation of banns is made to the session clerk of the parish church. A certificate of residence signed by two householders is usually required to accompany the application. The fee for banns is 2s. 6d.

The certificate of publication of banns is authority to a clergyman of any denomination *to celebrate the marriage. After the lapse of* three months the banns are useless. The marriage must take place in presence of at least two witnesses capable of giving evidence. It need not be celebrated in a church, but may be in a dwelling house or elsewhere, and at any hour, the time and place is a matter of absolute indifference to the law. After the marriage a schedule, signed by the parties, the clergyman, and two witnesses, must be transmitted to the registrar within three days, under penalties. Clergymen do not charge fees.

*After Notice by Registrar.*—This procedure is regulated by the Marriage Notice (Scotland) Act, 1878. Both parties must have resided in Scotland for at least fifteen days prior to publication of the notice. Application is made to the registrar, who publicly exhibits the notice of the intended marriage for seven days. At the expiry of this period, unless written objections have been filed, the registrar issues a certificate of publication, which is equivalent in effect to banns. The fee is 2s. 6d. Roman Catholics avail themselves of this method exclusively.

*Irregular Marriages.*—By declaration or acknowledgment. One of the parties must have resided in Scotland for twenty-one days immediately preceding. The parties, being capable of marriage and without legal impediment, may express either verbally or in writing, in presence of two witnesses (to whom the parties are known) capable of giving evidence, their mutual consent to take each other then and there for husband and wife. This act constitutes marriage. Registration is not essential to the validity of the marriage. If, however, it is desired to register the marriage, application is made to the sheriff of the county where it has been contracted. It is advisable to employ a solicitor to conduct the matter. The fees are £2 2s. A copy of the entry in the register duly signed by the registrar *is sufficient proof of the marriage.*

## DIVORCE FOR THE POOR.

An unhappy outcome of the war, revealed by Police and Divorce Court records, is the large number of cases of infidelity on the part of wives of soldiers while their husbands have been fighting in the trenches or away from home on duty. While the symptom has been observed among all classes of the community, the cases of the breaking up of poor households that have been brought to notice have been so frequent that the matter has drawn wider attention to the question of cheap divorce. That facilities are in existence to assist persons with small resources to obtain relief in the Divorce Court is not generally known. A special department, where free legal advice can be obtained, and solicitor and counsel provided for husband or wife who has a case for divorce but who is not possessed of the means of proceeding in the ordinary way, was set up at the Royal Courts of Justice some four years ago, its official style being that of "London Prescribed Officers (Poor Persons)," with Mr Adrian Hassard-Short as Secretary.

Although no fees are payable for the help given by the department, the applicants must find the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings do not cost more than £10, and can be completed for *as little as £4*, compared with from £25 to £60 necessitated by the normal procedure. Before a case is taken up, the applicant has to satisfy the department that he or she is really poor—not possessed of more than £30, exclusive of wearing apparel and trade tools, and not earning more than £3 a week. If this condition is fulfilled, a *prima facie* case for divorce must be shown, the names and addresses must be supplied of two persons, other than witnesses or near relatives, to whom reference may be made as to the applicant's character and means, and a declaration must be made as to means. When the system was initiated, it was proposed that a fund should be created for the payment of out-of-pocket expenses, the money to be provided either by the State or by private benevolence. The suggestion has again come into prominence with the increased demand for help to secure the severance of unhappy unions, while another method of reducing the cost that has secured favour is to make divorce cases triable at Assizes, on the lines of the Royal Commission's recommendations.

Partly through ignorance of the work *of this*

Poor Persons' Department, cases in which petitioners use the *forma pauperis* have comparatively seldom been before the judges of the Divorce Court, but the number of suits is expected to show a large increase owing to the war. In the first six months of 1917 the appeals for assistance received at the High Court totalled 24,000, and of this number over 900 were granted and the cases taken up for hearing. As a result of the attention called to the hostilities by a metropolitan magistrate, over 500 applications were made to the department in two days, the majority of the applicants being soldiers who complained that their wives had been unfaithful during their absence.

## BRITISH NATIONALITY AND NATURALISATION

The following is an abstract of the British Nationality and Status of Aliens Act, 1914, *which comes into force on Jan.* 1, 1915, and which consolidates and amends the common law and the statute law previously existing on the subject of British Nationality and Naturalisation —

BRITISH NATIONALITY — The following are British subjects —

1. Every person born, of whatever parentage, within His Majesty's Dominions and allegiance.

2. Every person born out of His Majesty's Dominions whose *father* was born within His Majesty's Dominions, and had not, at the time of the child's birth, lost the British nationality so acquired. As to the children of naturalised British subjects, see below at (*g*).

3. Every person born out of His Majesty's Dominions, *before Jan.* 1, 1915, whose *father's father* was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.

4. Every person born on board a British ship.

5.* Every person to whom a Certificate of Naturalisation under the Naturalisation Act, 1870, or the British Nationality and Status of Aliens Act, 1914, or of Re-Admission to British Nationality has been granted, or who has acquired British nationality by special Act of Parliament or by conquest or annexation.

6. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

7. The children of naturalised British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions —

(*a*) In the case of a child born *before* January 1st, 1915,

(i) If a Certificate of Naturalisation has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or

(ii) If a Certificate of Naturalisation is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

(*b*) In the case of a child born *after* January 1, 1915,

(i) If before his birth a Certificate of Naturalisation had been granted to his father or his mother, or

(ii) If a Certificate of Naturalisation is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

LOSS OF BRITISH NATIONALITY — A British subject loses his British nationality :—

(*a*) If by any voluntary or formal act he becomes naturalised in a foreign country,

(*b*) If, in certain cases, he makes a declaration of *alienage*. These cases are :—

(i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship and is also by birth or becomes during minority a subject of any foreign State,

(ii) where a person is a British subject, but was born out of His Majesty's Dominions, and

(iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that State who has been naturalised as a British subject may divest himself of that status,

(*c*) If during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality,

(*d*) In the case of a woman, if she marries an alien,

(N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalisation.)

(*e*) In the case of a person to whom a Certificate of Naturalisation is granted after January 1, 1915, if the Secretary of State revokes the Certificate,

(*f*) If the territory of which he is an inhabitant is severed from the Crown, *e.g.*, the cases of the inhabitants of Hanover and Heligoland.

ACQUISITION OF BRITISH NATIONALITY — An alien may acquire British nationality —

(*a*) by special Act of Parliament,

(*b*) by the conquest, annexation, or cession of the territory of which he is an inhabitant,

(*c*) in the case of a woman, by marriage with a British subject, and

(*d*) by naturalisation.

*Naturalisation* — All Certificates of Naturalisation granted in the United Kingdom between May 23, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalisation Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalisation is granted in accordance with its provisions after Jan. 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalised prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalisation under the new conditions.

* See "Acquisition of British Nationality" below

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:—

(a) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year *immediately preceding* the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;

(b) be of good character and have an adequate knowledge of the English language; and

(c) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization may be obtained free on application to the Home Office, Whitehall, London, S.W.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £8, of which £5 is payable on submission of the application and the remainder on the grant of the Certificate. The £5 payable on submission of the application *is not returnable*, whether or not a Certificate is granted.

*N.B.—In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.*

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate linguæ*, but are triable in the same manner as if they were natural born subjects.

UNDESIRABLE ALIENS.—An undesirable alien —*e.g.*, one who is without means, or who is a lunatic, or an idiot, or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he proves to be "undesirable" within the meaning of the Aliens Act, 1905.

## NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act, of 1889 were extended to the whole of England and Wales on the January 1, 1890. Every case of infectious disease, as defined by the Act, is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40*s.* fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets 2*s.* 6*d.* for every case in his private practice and 1*s.* for every case in a public institution of which he is officer. The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the following fevers typhus, typhoid, enteric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious: measles, rötheln or German measles, whooping cough, chickenpox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

## INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(a) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering, or, (a) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed, or (g) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40*s.*, and, if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection, but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, &c., in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907, the Local Government Board has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease, nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairymen must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle must

conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. *The occupier of a house in which there has been* infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that washing, &c. would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c., the same.

## WILLS, TESTATORS AND EXECUTORS.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers, but has to be shared with a distant cousin of her husband's. Negligence, or unreasoning dislike to making a will becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being 'settled' as it is called—*e.g.*, the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to *suit different cases, the following* directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others —

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes titles and advowsons, as well as freehold land and houses, while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEE.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is —"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows — "And I hereby appoint the said —— sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this —— day of ——, 19—."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid, but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient. —

Signed by the testator [or testatrix, as the case may be], in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses. [Thomas Smith. [Signature of Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be —"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin —"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors; although one is sufficient. The name and address of each executor should be given in full, as follows —"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. *See* PUBLIC TRUSTEE, *post*.

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees — "I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of *x* years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of *x* years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and to limit no grandchild of mine (such being whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words — "upon trust for my wife during her life [or during her widowhood, and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY.—A minor cannot make a will. A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (1)). As to the powers of a woman married before that date it is advisable to consult a solicitor

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will), for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read —"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely"

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of *x* years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1886, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of soldiers and sailors while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 26,

Duties of Executors.—After the death of the testator, the duties of the executor may be stated briefly as follows.—The first duty of the executor, or of one of them, is to see that the funeral takes place in a suitable and becoming way, then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will, to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

Administrators.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator

## WHERE TO FIND A PROVED WILL.

To find a will proved before 1st January 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date, the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be consulted and any will read on payment of a search fee of one shilling. In the latter case, the particular will, proved in the District Registry, is likewise kept, and may be seen, or a copy obtained, but it only is sent up and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administration, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

| *Registry.* | *Registrar* | *District.* |
|---|---|---|
| Bangor ... | G. H. Reid (£330) | Carnarvon and Anglesey |
| Birmingham | John Gladyer (£800) | Warwickshire. |
| Blandford | H. F. C. de Crespigny (£250) | Dorsetshire. |
| Bodmin ... | W. H. L. Shadwell (£300) | Cornwall. |
| Bristol ... | Arthur Frederick Nepean (£600) | Bristol & Bath, County Court Districts. |
| Bury St. Edmunds | Ronald Southey (£500) | Suffolk, West. |
| Canterbury | H. Mapleton Chapman (£350) | Kent, East, and Canterbury |
| Carlisle ... | E. L. Hunt (£700) | Cumberland and Westmoreland. |
| Carmarth'n | H. M. Fraser (£400) | Carmarthen, Cardigan, Pembroke, with the Deneries of East and West Gower (including the town of Swansea) in the county of Glamorgan. |
| Chester ... | H. A. Jenner (£800) | Chester. |
| Chichester | W. B. B. Freeland (£300) | Sussex, West. |
| Derby ... | C. T. B. Wilde (£600) | Derbyshire. |
| Durham | W. J. Maynard (£300) | Durham. |
| Exeter | O. H. Hardy (£1,200) | Devonshire. |
| Gloucester | R. Fuller (£600) ... | Gloucestershire (except Bristol County Ct. Dist.). |
| Hereford ... | H. O. M. Nolan (£400) | Herefordshire, Radnor, and Brecknock. |
| Ipswich ... | G. Pritchard, B.A. (£450) | Suffolk, East, & Essex, North. |
| Lancaster | Frederic Upton (£700) | Co. of Lancs., except the Hundreds of Salford and West Derby, and the City of Manchester. |
| Leicester ... | H. Pickering Clarke (£300) | Leicester and Rutland. |
| Lewes ... | J. W. Heisch (£350) | Sussex, East. |
| Lichfield .. | H. G. Fennett Osborne (£600) | Staffordshire. |
| Lincoln .. | John Streatfeild, K.C. (£500) | Lincolnshire. |
| Liverpool | J. C. Bromfield (£750) | W. Derby Hdrd. Glamorgan Pembroke Carmarthen W. Gower, Swansea. |
| Llandaff ... | Raymund Allen (£350) | |
| Manchester | R. S. G. Mair (£800) | City of Manchester and |

| Registry | Registrar | District. |
|---|---|---|
| Newcastle-on-Tyne | H. R. Edwards (£300) | Northumberland. |
| N'th'mpton | W Young (£250) | Northants, Bdn, and Beds. |
| Norwich ... | Charles H. Wilkinson (£750) | Norfolk. |
| Nottingh'm | Dr. F Oswald (£400) | N'tinghamshire. |
| Oxford .. ... | John T Lewis .. (£400) | Oxon, Berks, and Bucks. |
| Peterboro' | C. S. Magee (£400) | Northants, N'th, Hunts, & Cambs. |
| St. Asaph | J P Lewis (£350) | Flint, Denbigh, & Merioneth. |
| Salisbury.. | J F M. Fawcett (£350) | Wiltshire. |
| Shrewsbury | R. K. A Green (£300) | Salop and Montgomery |
| Taunton | R. T Alms (£350) | Somerset, West. |
| Wakefield | B. H Thomson (£1,000) | Yorks, West Riding. |
| Wells ..... | V F Englehearst (£300) | Somerset, East, except Bath C. C. District. |
| Winchester | G G Phillimore (£800) | Hampshire. |
| Worcester | G. F Adams (£300) | Worcestershire. |
| York.. ... | G L. Simpson (£1,000) | Yorks, N & E. Riding (including York). |

### SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vic. c. 77 but the provision has been almost a dead letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar (*See also* PUBLIC TRUSTEE, post.)

### TRUST FUNDS AND INVESTMENTS.

*The Act of 1893* enacts that Trustees may invest in any Parliamentary Stocks or Government Securities of the United Kingdom or real or heritable Securities in Great Britain or Ireland in Bank of England Stock Bank of Ireland Stock India 3½ per cent. and 3 per cent. Stocks any Stock hereafter issued by authority of Parliament charged on revenues of India any Securities having interest guaranteed by Parliament Metropolitan Board of Works or London County Council Stocks Debenture Stock created by Metropolitan Police District Receiver Debentures, Rent-charge, Guaranteed or Preference Stocks of any railway in Great Britain or Ireland that has paid not less than 3 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment any railway or canal Stock in Great Britain or Ireland leased for 200 years or more at a fixed rental to any railway specified above Indian Railway Debenture Stocks of companies with interest paid or guaranteed by Indian Council: "B" Annuities, Eastern Bengal, East Indian, and Scinde, Punjab, and Delhi Railway, "C" and "D" Annuities of the East Indian Railway, and any like annuities of any other railway hereafter created any Indian railway with fixed or minimum dividend paid or guaranteed by Indian Council any Debenture, Guaranteed or Preference Stocks of any incorporated or chartered Water Company in Great Britain or Ireland that has paid not less than 3 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment any Corporation Stock of any borough having 50,000 inhabitants any County Council Stock authorised by Act of Parliament or Provisional Order any Water Stocks issued by incorporated Commissioners levying compulsory rates over areas containing 50,000 inhabitants, such rates not having exceeded 8s per cent. of authorised amount for 10 years and in any Securities authorised by order of the High Courts of Justice of England or Ireland. Provided Stocks redeemable within 25 years are not purchased at a premium over the redemption price, or at more than 25 per cent. premium over such redemption price if redeemable after 25 years.

*The Rule of the Supreme Court*, 1893, authorises investment in—Debenture, Preference, Guaranteed, or Rent-charge Stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on Ordinary Stock or Shares, and in like Stocks if guaranteed by Railway Companies of the same description and in Nominal Debentures or Nominal Debenture Stock under the Local Loans Act, 1875, or under the 40th of Metr. Loans Act, 1869, provided such Stocks are not liable to redemption within fifteen years from the date of investment.

*The Trusts Amendment Act*, 1884 (*Scotland only*), excludes Irish real or heritable Securities or Stocks, and British Railway contingent Preference and Waterworks Stocks, admits all Railway Debenture Stocks and Guaranteed Stocks of railways that have paid Ordinary Dividends for the past ten years, and all Municipal Loans, and East India Stocks, and registered Colonial Stocks if approved by Court of Session.

*The Colonial Stock Act*, 1900, permits Trustees, both English and Scottish, to invest in certain Colonial Stocks registered in the United Kingdom which the Treasury publishes a list of in the London and Edinburgh Gazettes, but subject to the clause as to Redeemable Stocks in the Trustee Act, 1893.

### THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The Office has proved a great success. The value of the trusts accepted up to March 31, 1917, was £97,249,361, while the value of the future estates represented by the applications of 6,300 intending testators which have still to mature, was £56,301,141 Official figures give the total value of the business, present and future, negotiated to date, at over £153,550,000.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee. He can act solely or jointly with others.

In the case of a Will about to be made, the appointment may be effected with even greater

testator. All that the solicitor need say is "I suggest the Public Trustee executor [and trustee] of this my Will"; or the appointment may be a joint one with friends or relatives. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while his success ensures that he is highly skilled in his duties.

The large funds placed in his care, and his official position, give him manifest advantages in respect of investment; he not only endeavours to ensure that the capital shall be preserved intact, but also to invest as productively as is prudent under his powers.

The Public Trustee is not, as such, limited in his powers of investment to trustee securities, but, like a private trustee, he is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts. In his last report he shows that he has found it possible to secure a return of £3 7s. 10d. per cent. on his non-trustee investments.

The success of the Department may doubtless be ascribed to the wide public need for such an office, secondly, to the State guarantee which accompanies the remedy provided, and thirdly, to the energy and efficiency with which the Department is administered. The Public Trustee makes a point of giving the personal attention of himself and of his senior officials to the personal details of any trust. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The fees are devised to pay the expenses and no more, so that the Office is a mutual one in that those using it are intended to have their estates administered at cost price.

The principal fees are of two kinds—a fee on capital and a fee on income. The fees on capital are taken in two instalments—half at the beginning, and half at the end of the trust—each instalment being calculated at the following rates:—

On the first £1,000, fifteen shillings per cent.
On the excess of £1,000 to £30,000, five shillings per cent.
On the excess of £30,000 to £50,000, 2s. 6d. per cent.
On the excess of £50,000, 1s. 3d. per cent.

The fee on income is 1 per cent. if, as is usual, the income be paid direct from its source to the person entitled, on any income in excess of £2,000 a year the fee is only ½ per cent. Where the income is paid through the Department then the fee is 2 per cent. up to £500 a year, and 1 per cent. on any excess of £500 a year, and ½ per cent. on income in excess of £2,000 a year. The fee on investment is ½ per cent., the Public Trustee, out of the fee, paying the brokerage.

An interview with the Public Trustee or with either of his senior officers can be arranged by letter or telephone, and a pamphlet giving full information can be obtained post free on application to the Office of the Public Trustee, Kingsway, W.C. (*tel.*, Holborn 2,400), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester.

(For list of Officers, see p. 735.)

## Intestates' Estates.

### PERSONAL PROPERTY, INCLUDING LEASEHOLDS.

### TABLE *of Succession applicable to England and Scotland, and showing persons entitled to administer*

The persons entitled to administer are shown in brackets.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* *Where this is prefixed the Regulation applies to Scotland only.*]

By the Intestates' Estates Act, 1890, the widow of a man dying in England, Wales, or Ireland intestate and without issue is entitled to the whole estate both real and personal if under £500 in value, if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act. The provisions of this Act are now applied to Scotland by the Intestate Husband's Estate (Scotland) Act, 1911.

| *If the Intestate die, leaving* | *His representatives take in the proportions following:—* |
|---|---|
| Widow only | Half to widow. Half to the Crown. [Widow.] |
| Widow and child or children | One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.]* |
| | One-third to widow. One-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate during life must collate the advances). One-third amongst issue of children *per capita* and issue of deceased children *per stirpes*. See Note A, page [illegible]. |
| Widow and father | Half to widow. Half to father. [Widow.] |
| Widow and mother, no father | Half to widow. Half to mother. [Widow.] |
| | *Half to widow, one-sixth to each parent. [Widow.] |
| | One-sixth to Crown. |

| | |
|---|---|
| Widow, brothers or sisters | Half to widow Half equally amongst brothers and sisters, whether of the whole or half blood, if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share. [Widow.] |
| Widow, mother, nephews or nieces | Half to widow One-fourth to mother One-fourth to nephews and nieces *per stirpes*. [Widow.] |
| | *Half to widow One-sixth to mother, two-sixths to nephews and nieces *per stirpes*. |
| Husband, with or without children | All to husband. [Husband.] |
| | *Half to husband. Half to wife's next-of-kin. [Husband.] |
| Father, brothers, and sisters | All to father. [Father.] |
| | *One-half to father One-half equally amongst brothers and sisters. |
| Mother, brothers, and sisters | All equally [Mother.] |
| | *Mother one-third. Brothers and sisters two-thirds equally |
| Mother, but no other kin | All to mother [Mother.] |
| | *One-third to mother Two-thirds to the Crown. |
| Child, children, or grandchildren by deceased child | Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share. [Any number of children not exceeding three.] |
| Brother or sister, and nephews or nieces | Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share. [Brother or sister.] |
| Brother or sister, and grandfather | All to brother or sister [Brother or sister.] |
| Brother or sister, and uncles or aunts | All to brother or sister. [Brother or sister.] |
| Grandfather, no nearer relation | All to grandfather [Grandfather.] |
| Father's father, and mother's mother | Equally to both. [Either or both.] |
| Grandmother, uncles, and aunts | All to grandmother [Grandmother.] |
| | *All to uncles and aunts if paternal |
| Great-grandfather, uncles, and aunts | Equally *per capita*. [To either or any number not exceeding three.] |
| Uncles and aunts | All equally [To either or any number not exceeding three.] |
| Uncle, and deceased uncle's child | All to uncle [Uncle.] |
| | All to uncle. [Uncle.] |
| Uncle by mother's side, and deceased uncle or aunt's child | *Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle. |
| Aunts, nephew, and niece | All equally [Either not exceeding three.] |
| | *Nephew and niece. |
| Cousins | Equally *per capita*. [Any number not exceeding three.] |
| Nephew by brother, and nephew by half-sister | Equally *per capita*. [Any number not exceeding three.] |
| | *All to nephew by brother |

NOTE A.—Taking *per capita* is taking by head individually Taking *per stirpes* is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, *i.e.*, *per capita*. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, *i.e.*, *per stirpes*.

NOTE B.—By English Law, brothers and sisters of the half blood share equally with the whole blood. By Scottish Law, brothers and sisters-german (both by the same father and mother), and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father only) and their issue And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother only) and their issue.

NOTE C.—Posthumous children take equally with those born in the lifetime of their father.

## Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. The Dower (viz., widow's thirds) of widows married since 1833 is in the majority of cases barred.

In each instance it is supposed that there are no nearer relations than those named.

| *If Intestate die, leaving* | *Real Property would descend to—* |
|---|---|
| Wife only, no blood relations | One-third to wife for life, rest to Crown, copyholds to lord of manor |

| | |
|---|---|
| Wife and child or children, and children of a deceased child | One-third to wife for life in any case.<br>Rest to eldest son of his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female.<br>If no son, rest to daughters equally<br>If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter. |
| Wife and father | One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will. |
| Wife and mother | One-third to wife for life, rest to mother, there being no heirs on father's side. |
| Wife, brother, or sister, and children of a deceased brother or sister | One-third to wife for life in any case, rest to eldest brother or his issue. (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.)<br>Sister and children of deceased sister, rest equally between sister and nephew (eldest).<br>Sisters and nieces, only children of deceased sister, rest equally between sisters and nieces, nieces taking *per stirpes*. |
| Wife, mother, nephews, and nieces | One-third to wife for life, rest to nephew (eldest), or nieces, if brother left no son. |
| Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters) | One-third to wife for life in any case, rest to eldest brother<br>Rest to nieces, equally, if children of elder brother deceased. |
| No wife or child or issue of a deceased child | Lineal ancestor paternal, males of whole blood first. |
| Children by one or more wives, and the issue of deceased children | All to eldest son, or his issue. (*See* above, "Rest to eldest son or his issue," under head "Wife and child," &c.)<br>Daughters equally |
| Husband and child or children | Husband for life (provided the wife, or the husband in her right, was at some time during the coventure solely seised in possession of the legal or equitable estate), afterwards to only child or to eldest son or issue of a deceased eldest son.<br>If all daughters, to them equally |
| Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father | All to mother in default of lineal ancestors on the father's side, or issue of such ancestors. |
| Mother, and brothers and sisters | All to eldest brother |
| Mother and sisters | All to sisters. |
| Father, and brothers and sisters | All to father |
| Child and grandchild by deceased child | *See* above, "Rest to eldest son or his issue," under head "Wife and child," &c. |
| Brother and grandfather | All to brother |
| Brother's grandson, and brother or sister's daughter | All to great-nephew, if eldest brother's grandson<br>All to brother's daughter, if child of eldest brother |
| Brother and two aunts | Brother, all |
| Brother and wife | One-third to wife for life, rest to brother |
| Grandfather (no nearer) | All to grandfather |
| Father's father & mother's mother | All to father's father |
| Grandmother & Uncle, or aunt on father's side (no nearer) | All to uncle or aunt. |
| Uncle, and deceased uncle's child | Uncle, unless deceased uncle was elder brother, when his child takes all |
| Uncle by mother's side, and deceased uncle or aunt's child | Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side |
| Two aunts, nephew, and niece, children of deceased brother | Nephew |
| Uncle or aunt's children, and brother's grandchildren through a son | Eldest brother's grandson, or if granddaughters between them equally |
| Nephew by brother, and nephew by half-sister | Nephew by brother |
| Nephew by deceased brother, and nephews and nieces by deceased sister | All to eldest nephew, son of deceased brother. |

NOTE A.—By the Land Transfer Act, 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate, but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir-at-law, if not one of the next-of-kin, shall be equally entitled to the grant with the next-of-kin.

### Arbitrations.

The minimum is to charge 5 per cent. on the cost of their work, if estimated at £2,000. Below that sum, an increased scale is usual. An increased charge is also made for alterations to existing buildings, and for designs for decorations, fittings, and furniture. If PLANS, &c., are prepared for which which are never carried out, the charge is one-half the above, with a further half per cent. if tenders have been invited and received. These charges do not include negotiations for purchase of site, &c., nor settlement of differences with adjacent owners and public authorities, nor taking out quantities. For repetitions a modified charge is usually arranged. The minimum charge per day is three guineas. In all cases, travelling and other out-of-pocket expenses are paid by the employer in addition to the fees. For furnishing or checking a Schedule of Dilapidations and Estimate the usual charge is 5 per cent. on the estimate, but in no case less than two guineas. For valuing and negotiating the settlement of claims under the Lands Clauses and similar Acts the charge is on Ryde's Scale.

### QUANTITY SURVEYORS.

A fee of 2½ per cent. upon the amount of the lowest tender received for the contemplated building, or upon its estimated cost should the work be abandoned before tenders are received, is charged by Quantity Surveyors for preparing Bills of Quantities.

For Measuring and Adjusting Variations the fees are 2½ per cent. on the amount of additions, and 2½ per cent. on the amount of omissions brought into accounts.

For Services in Connexion with Litigation or Arbitration, a charge per day (dependent upon the Surveyor's professional position) is made.

The above charges are exclusive of the cost of printing, lithography and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

### AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

#### 1. Sales by Auction.

*Freehold, Leasehold, and Copyhold Properties*, including the preparation of particulars, and advising as to reserves.—On the first £100, 5 per cent., on the next £4,900, 2½ per cent., on the residue, 1½ per cent.

In addition to the above charges:—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber*, and *Tenant-right* under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and 2½ per cent. on residue, to include inventory and valuation.

*Sale before Auction.*

After issue of advertisements, the same scale as by auction.

*Non-Sale.*

Charge equivalent to one-fourth of the commission which would have been earned on a sale up to £5,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

*Sale after Auction.*

In the event of the property being sold within three months after the auction, the charges for such sale would merge into the ordinary commission there payable.

*Stock-in-trade, Trade Fixtures, and Chattels.*—5 per cent. on the amount realised, exclusive of any valuation of premises.

*Plant and Machinery.*—5 per cent. on the amount realised, exclusive of preparation of catalogues.

*Live and Dead Farming Stock* (except *Horses* and *Pedigree Cattle*).—2½ per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

*Horses and Pedigree Cattle.*—5 per cent. on the amount realised.

*On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor.*—One half the commission on sale, calculated on the amount of reserve or buying-in price.

#### 2. Private Treaty Sales.

*Freehold and Copyhold Estates and Houses, and Ground Leases.*—On the first £100, 5 per cent., on the next £4,900, 2½ per cent.; on the residue, 1½ per cent., and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right*, of 5 per cent up to £500, and 2½ per cent. on the residue, to include inventory and valuation.

#### 3. Purchases.

*Freehold, Copyhold, or Leasehold Property.*—One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000, half a guinea on next £9,000, and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5s.

#### 4. Lettings.

*Business Premises, Unfurnished Houses, Flats, &c., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise.*—Where the term is for three years or less, 5 per cent. on one year's rent, where the term is for more than three years, 7½ per cent. on one year's rent, and upon the premium or consideration, 5 per cent. up to £2,000, and 2½ per cent. on the residue, and the commission on any sum obtained for fixtures, furnitures, or effects of any kind, of 5 per cent. up to £500, and 2½ per cent. on the residue. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable.

*For negotiating the Renting of Unfurnished Houses or Flats, including Survey or Valuation.*—Half the commission payable for a letting.

*On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent.*—5 per cent. on the first year's rental, and 2½ per cent. for the remainder of the term.

*For negotiating the Renting of Furnished Houses or Flats, including Survey or Valuation.*—Half the commission payable for a letting.

*For Making or Checking Inventories of Furniture and Effects.*—A minimum fee of two guineas per day, exclusive of expenses.

*On Letting Land on Building Leases.*—One year's ground rent in each case. Where the rents differ in each case, the average rent to be taken.

3. Collections or Receiverships.

10 per cent. upon gross rental of weekly property, 5 per cent. upon gross rental of other property or tithes, 2½ to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

4. Laying Out or Development of Estates.

*For Road Construction*, 5 per cent. upon the outlay, exclusive of expenses.

5 Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties.*—A guinea per cent. on the first £1,000, half a guinea per cent. on the next £9,000, and a quarter of a guinea per cent. beyond on the value of the property, subject to a minimum fee of five guineas.

2. *Of Property taken under Compulsory Powers.*—The charge is on Ryde's Scale. The fee is exclusive of five guineas per day for attendance. Plans and disbursements extra.

3. *Valuing for Annual Rental.*—(a) *Agricultural Property*—5 guineas per cent. up to £500, and 2½ guineas per cent. beyond. (b) *Urban and Residential Property*—5 guineas per cent. up to £100, and 2½ guineas per cent. beyond

4. *Valuation of Furniture, Fixtures, and Effects.*—5 per cent. up to £500, and 2½ per cent. on the residue.

5. *Valuation of Plant, Machinery, and Trade Stocks.*—5 per cent. up to £500, and 2½ per cent. on the residue.

6. *Valuation of Live and Dead Farming Stock.*—5 guineas per cent. up to £500, and 2½ guineas per cent. on the residue.

7. *Valuation of Hotel and Public House Fixtures, Fittings, and Stock.*—5 guineas per cent. up to £1,000, and £5 5s. per cent. on the residue.

8. *Valuation for Probate and Estate Duty Purposes.*—(a) *Freehold, Copyhold, and Lease hold Property.*—One guinea per cent. on the first £1,000, and one quarter-guinea per cent. on the remainder of the amount of the valuation of each property Minimum fee, £5 5s. on each property

(b) *Of Furniture and Effects.*—2½ guineas per cent. on the first £500, and 1½ guineas per cent. of the remainder of the amount of valuation, to include Inventory Minimum fee, £5 5s.

9. *Valuations under the Finance (1909-10) Act, 1910. For Survey, Completion of Government Returns, Valuation, and Report.*

*Country Residential Properties, Agricultural Land, and Undeveloped Land.*—One half-guinea per cent. up to a "total value" of £10,000, and one quarter-guinea per cent. on the balance above that amount.

*Urban Properties.*—One quarter-guinea per cent. on a "total value" of £10,000, and one-eighth guinea per cent. on the balance above that amount. Minimum fee, £3 3s.

10. *Preparing Specification of Dilapidations and settling the amount if required.*—5 guineas per cent. on the amount. Minimum fee, £5 5s.

11. *Valuation or Sale of Timber.*—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue.

12. *Valuation of Tenant-Right.*—5 guineas per cent. on the first £100, and 2½ guineas per cent. on the next £900, and 1½ guineas per cent. on the residue.

Where one valuer acts between both parties, the minimum charge shall be scale and a half, divisible between both parties.

ACCOUNTANTS' CHARGES.

For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, £1 1s. to £5 5s.

Chief clerk's time, 10s 6d. to £1 10s. 6d.

Other clerks' time, per day of seven hours, 5s. 6d. to 16s.

These charges to include stationery, except the forms used.

MEDICAL FEES.

*Patients are charged according to their supposed incomes*, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners —

| General Practitioners. | Rental. | | |
|---|---|---|---|
| | £10 to £60. | £60 to £150. | £150 to £1000 |
| Ordinary Visit | 10s. 6d. to 21s. | 21s. 6d. to 31s. 6d. | 31s. 6d. to 105s. 6d. |
| Night Visit | Double an ordinary visit. | | |
| Mileage beyond two miles from Home | 2s. 6d. | 5s. | 10s. 6d. |
| Detention per ¼ hour | 5s. 6d. to 5s. | 5s. 6d. to 5s. | 5s. to 10s. 6d. |
| Letters of Advice | Same charge as for an ordinary visit. | | |
| Attendance on servants | 10s. 6d. | 21s. 6d. | 31s. 6d. to 5l. |
| Midwifery | 10s. | 10s. to 42s. | 42s. to 105s. |
| Administering Chloral | 10s. 6d. | 21s. | 42s. |
| Consultants. | | | |
| Advice or Visit alone | 10s. | 10s. | 21s. |
| Advice or Visit with another practitioner | 10s. | 10s. to 42s. | 10s. to 42s. |
| Mileage beyond two miles from Home | 10s. 6d. | 10s. 6d. | 10s. 6d. |

Special visits—*i.e.*, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 10s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two-guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their books when requested.

## SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official, and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £500 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent., this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £500 need not exceeding £1,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

## STREETS AND FOOTPATHS.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c., or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground, or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway, or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway, or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

## RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

BLINDS TO BE PULLED DOWN From 1 Nov to 15 Jan., 4.30 P.M., from 16 Jan. to 31 Jan., 5.0 P.M.

## THE BANK RATE, 1914-1917

## BANK HOLIDAYS.

ENGLAND AND IRELAND.—Banks of England and Ireland, and the Exchequer Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day, and Boxing Day. The Stock Exchange is closed on Good Friday, Christmas Day, and Bank Holidays, and on Jan. 1, May 1, and November 1. There is a *special* Bank Holiday *for Ireland* on *St. Patrick's Day* March 17.

SCOTLAND.—New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

SCOTLAND has also special Term (Quarter) Days, and there are special holidays in Edinburgh and Glasgow. The Scottish *Quarter Days* are Candlemas, 2 Feb., Whit Monday, Lammas, 1 Aug., and Martinmas, 11 Nov.

## INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

THE entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £80, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present in force will be found in detail under "Estate Duty."

In no case can any correspondence be entered into, nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the "District Probate Registries" (q.v.) application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £300, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

## THE DERBY.

The *Jubilee* of the Derby is a mile and a half, or 2,820 yards. (See Notes below.) Including 1890, Mr. J. Hawley passed four successes with Teddington, Sainfoin, Minting, and Rock Sand, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. The Duke of Portland, Lord Rosebery, and Mr. Bowes have won twice consecutively. The late King Edward VII. won three times (twice before his accession); Lord Falmouth, Mr. W. T. Assheton, Mr. Merry, Sir F. Johnstone, Sir J. Miller, and Mr. Fabris twice.

Notes.—1884—Gladiateur first French-bred horse that won; 1889—since fell during the day; 1889—second running; no nom. and the third no nom. one of the stakes; 1892—start altered to New Level Post; 1896—Kisber, the first Hungarian-bred horse that won; 1903—Mr. C. Bower Ismay's Cragganmore (J. Reiff) finished first, but was disqualified for boring. The Derby is now a stake of £5 each, with at least £100 to the second and £50 to the third, according to the subscriptions, 1913. Owing to the War the race was reopened to those originally nominated. It was decided over the Suffolk Stakes Course (1¾ miles) at Newmarket, and called the New Derby. The value was altered on this occasion, and the second received only one sovn. In 1916 and 1917 owing to the continuance of the War the same terms and conditions applied as in 1915.

† Starting gate first used. ‡ In a breakaway race. § Including £1,000 given by Lord Derby.

a Won the St. Leger. d Record time (previous best, Spearmint's, in 1912). e Won the Oaks.

a "New" Oaks, Suffolk Stakes Course, at Newmarket.

† Established in 1908 received names in 1908 and of compliments to Col. St. Leger and run on Doncaster Spring Meet. In 1912 these were no St. Leger. A race with similar conditions, called the September Stakes, was established at Newmarket, and won by Pommern, but the entry was a mere one, not confirmed to entrants originally nominated, as was the case with the New Derby and the New Oaks. The same state of affairs prevailed in 1916 and 1917, when the substance of the Suffolk and September Stakes became the New Derby, Oaks, Gay Crusader, respectively.

## WORLD'S AQUATIC CHAMPIONSHIP

| Yr | Winner |
|---|---|
| 1906 | J. Stanbury b. C. Towns. |
| 1908 | G. Towns b. J. Stanbury |
| 1907 | G. Towns b. R. Durnan. |
| 1907 | W. Webb b. G. Towns. |
| 1908 | R. Arnst b. W. Webb. |
| 1910 | R. Arnst b. W. Webb. |
| 1911 | R. Arnst b. H. Barry |
| 1912 | E. Barry b. R. Arnst. |
| 1913 | F. Barry b. R. Durnan. |
| 1914 | E. Barry b. H. Pearce. |
| 1915 | E. Barry b. Jas. Feddon. |

After Trickett had carried off the Championship to Australia in 1876, a Championship of England Cup was instituted, which, after being held in turn by E. W. Boyd, J. Higgins, and W. Elliott, was finally won by Hanlan, who he defended the latter in 1880. A second cup was finally won outright by E. Barry when he beat Durnan in 1911, that race carrying with it both World and English Championship finally.

1 In Australia. 2 In New Zealand.
3 On the Zambesi, South Africa.
4 First race for a third cup. The title of English Champion was also included.
5 English Championship also included.

## OLD BILLIARD CHAMPIONSHIP.

| Yr | Winner. |
|---|---|
| 1906 | W. Cook b. J. J. Roberts, jr. |
| 1907 | W. Cook b. J. J. Roberts, jr. |
| 1908 | J. J. Roberts, jr., beat Cook. |
| 1909 | J. J. Roberts, jr., beat Cook. |
| 1910 | J. J. Roberts, jr., beat Cook. |
| 1911 | J. Bennett beat W. Cook. |
| 1912 | J. Bennett beat T. Taylor. |
| 1913 | J. J. Roberts, jr., beat Cook. |
| 1914 | J. J. Roberts, jr., beat Cook. |
| 1915 | J. J. Roberts, jr., b. J. Bennett. |
| 1916 | Bennett resigned. Cook d. wins. |
| 1917 | Roberts made the largest break of these matches—456. This and the previous match were 3,000 up the others, being the first. Also the champion Billiard Association rules. C. Dawson, then H. W. Stevenson. In 1909 H. W. Stevenson defeated C. Dawson several times. In 1910 beat 1907 there was no match. In 1908 M. Inman, aged 15, and became champion, by defeat of 1907 answer. In 1909, 1910 and 1911 there was no match. In 1912 W. Inman beat T. Reece for the title. There was no challenge in 1913, 1914, 1915, and 1916. In 1917 W. Inman also holds the Billiards Control Club Championship. |

On July 16, 1910, J. Donaldson was credited with running 220 yds. in 21 4-5th secs., but it was in a handicap, and he finished second.

Professional Records.—Greatest distance run in 1 hour, 11 m. 1,088 yds., by H. Watkins, Sept. 16, 1890, at Rosedale, 2 hours, H. Holmes 22 m. 1,600 yds. (about), at Edinburgh, Jan. 3, 1911. His 20 miles' time was 1 hr. 38 mins. 30 secs., and he covered 20 miles in 2 hrs. 4 mins. 4 secs. J. Bailey (Wales) ran 22 m. in 4 hours. H. Rowell 83 m. 1,320 yds. in 12 hours, and 150 m. 220 yds. in 24 hours. Feb. 1880. W. Kolstrup ran 2 (1911 at miles 385 yards (Marathon distance) in 2 hrs. 49 mins. 30 1-5 secs.

Amateur Records.—Jean Bouin ran 22 m. 1320 yds. in 1 hr., July 6, 1913, at Stockholm; H. Green, Mayne, 1913, ran 20 m. 1320 yds. in 2 hrs. 4 m. Stamford Bge.

## WALKING (AMATEURS).

| Mls. | Name. | Year. | m. s. |
|---|---|---|---|

| Standing High Jump | Leo Goebring c | 5 | 5¾ | 1913 |
| Pole Jump | C. Harleman c | 12 | 6¼ | 1913 |

## (PROFESSIONALS).

| Name. | ft. | in. | Year. |
|---|---|---|---|
| B. W. Scott | 22 | 7 | 1902 |
| W. Barker | 22 | 6¼ | 1904 |
| E. A. Johnson | 6 | 04 | 1882 |
| J. Darby g | 6 | 0 | 1890 |

a Made in America. b On grass. c In New Zealand. d Made in Australia. e British amateur records. f Not 12 yards. Half exhibitions, but all doubtful. g With spikes tied. h On the same day Ross walked 22 m. in 2 hours, 56 mins. 26 secs., and 25 m. 3901 yds. in 3 hours. i A. W. Shrosbie walked 100 miles in 20hrs. 35 mins. 50 secs. in 1882, in a match against time. j In A.A.A. have 300 miles passed on their books. k Made in Canada.

## BILLIARDS.

Rose "spotin" break (spotting game, match), 2,500, by W. Peall, 1844; match for money 2,500, by W. Peall, 1844. Best spot-barred breaks, 1,500 by J. Roberts, 1892, and 1,567 by A. Prince, 1892. Greatest number of spot-barred in succession (on by W. J. Peall, 1888, 44 min. Fastest 1,000 spot-barred by Roberts, 1892, 221 min. Under Billiard Association Rules, Mr. Gresham* is the amateur champion. The highest breaks are 1,296 (pot and 1,600 off the red) by Geo. Gray March 19 and 26, 1901, in London, 1,218 by H. W. Stevenson (under Billiards Control Club Rules), in London, Oct. 11, 1910 (and break with ivory balls, under B.C.C. rules, 1,050 by George Gray); 800 by H. W. Stevenson, Feb. 16, 1909, recognised by the B.A.; and 800 by John Roberts, Jan. 29, 1910, in Scotland. By means of the now abolished cradle cannon, W. Cook, in June, 1907, scored 42,702.

† Balls jammed in mouth of pocket. ‡ Both the break and the number scored off the red are records, though not under B.A. rules. Geo. Gray was 19 years old.

## SWIMMING

(Captain Matthew Webb swam from Dover to Calais in 22 hrs. 45 mins. August 24 and 25, 1875.

Miss. William Burgess swam from Dover to Calais on Sept. 5 and 6, 1911, in 22 hrs. 35 mins.

Longest time under water: Georges Poulbenen, 6 mins. 58 secs., Piscine de la Cluse, Paris, Nov. 2, 1901.

At Stamford Bridge in May, 1914, R. Bridge, Newcastle Walking Club, broke amateur walking records from 22 miles 1 fur. 29 yds. (4 hrs. 29 mins. 8 4-5 secs.) to 22 miles 1 fur. 29 yds. (4 hrs. 29 mins. 8 4-5 secs.) in 26 miles 1 fur. 29 yds. (5 hrs. 28 mins. 54 secs.)

## BRITISH AMATEUR RECORDS.

220 yds., 3 4-5th secs.; by A. F. Duffy (U.S.A.), 1900, on grass. W. A. Schick (Harvard), 1903, and W. R. Applegarth 1906. 220 yds., 22 3-5th secs., E. R. Walker (1906). 220 yds. (hurdles), 25 secs., by F. C. Bacchus (Olympic Games), 1908. 250 yds., 25 1-5th secs., by E. R. Walker (1906). 300 yds., 32 4-5th secs., by F. R. Applegarth (1908). 300 yds., 35 1-5th secs., by W. E. Applegarth, 1909 (equals World's record). 440 yds., 47 4-5th secs. by E. H. Pelling, 1888. 500 yds., 52 1-5th secs., by W. Halsewelle, 1908. 500 yds. (hurdles), 58 3-5th secs., by O. Groombridge, 1907. 600 yds., 68 2-5th secs., by W. Halsewelle, 1908. 1,000 yds. (hurdles), 88 4-5th secs., by G. R. L. Anderson, 1900. 600 yds., 83 1-5th secs. by H. C. Bredin, 1889. 600 yds., 1 m. 12 secs. by H. H. Montagu, 1908. 880 yds., 1 m. 54 secs., by W. W. Sheppard, 1908. 1,000 yds. 2 m. 22 4-5th secs., by W. N. Latrens, 1898. 1,500 yds., 3 m. 53 3-5 secs., by R. W. Hutson 1904. 1 mile, 4 m. 28 4-5th secs., by J. Blake, 1900. (Other British Amateur records from 2 mile to 100 will be found in table of Best on Record.) High Jump, 6 ft. 4½ in., by P. J. Leahy, 1898. Throwing the Hammer, 150 ft. 4½ in., by J. J. Flanagan, 1908. Putting the Weight, 36 lb., 7 ft. 8½ in., 48 ft. 2 in., by D. Horgan, 1899. Pole Jump, 12 ft. 6½ in. C. Hartmann 1903.

Putting the Weight (28 lb., 7 ft. 8½ in., 42 ft. by Ralph Rose at, 1909, (56 lb.), 43 ft. 7½ in., by Matt McGrath, America, 1909 (world's record). Throwing the Hammer (16 lb., 9 ft. circle) P. J. Ryan, 169 ft. 6½ in. 1909 in New York. J. Flanagan, 184 ft. 4 in., 1900, in Canada, from 7 ft. circle, A.A.U. rules, wire handle with loops. The British record is 170 ft. 4½ in., by Flanagan, 1908. A. E. Tajiale holds the Discus Throwing record; 138 ft. 4½ in., Copenhagen, 1909. His British record is 124 ft. 8½ in., London 1904. Pros Skyle 136 ft. 4½ in., R. Niklander Tampere, Finland 1909. Javelin Throwing, 201 ft. 8½ in., by U. Peltinen. Helsingfors, 1908. British record, 168 ft. 11 in., by M. Korman, London 1909.

The pole-jumping record is held by an American amateur Mark R. Wright, 13 ft. 8½ in. in America, 1900.

## *CYCLING RECORDS—KILOMETRES

## Cycling—Road Records.

12 *Hours.*—Tandem (H. Bird and G. Nutt), 224 miles, 1220. 12 *Hours.*—Safety, 245 miles (F. E. Goodwin, 1899).

24 *Hours.*—Safety (F. R. Goodwin, 1898), 408 miles paced, unpaced, 392 miles in 1902. Tandem safety (M. A. Holbein and J. A. Bennett), 397½ miles, 1895.

50 *Miles.*—Safety, 1h. 55m. 50s. (A. E. Walters, 1899) paced; 2h. 1m. 39s. (H. Grosch, 1900) unpaced. Tricycle, 2h. 26m. 39s. (H. G. Cook, 1911) unpaced; 2h. 22m. 52s. (F. T. Bidlake, 1911) paced. Tandem Tricycle (unpaced), 2h. 29m. 39s. (R. Hulbert and J. B. Patmore, 1913). Tandem bicycle, 1h. 58m. 33s. (F. J. Parker and V. J. Viol, 1914).

100 *Miles.*—Safety 4h. 26m. 39s. (A. A. Chase, 1897, paced); tandem safety 4h. 36m. 29s. (R. J. and A. F. Haley), 1900. Tricycle (unpaced), 5h. 32m. 9s. (H. G. Cook, 1911).

200 *Miles.*—9d. 13h. 37m. (H. Welsh, 1900).

The Land's End to John o' Groats record (about 900 miles) safety (H. Green), 2d. 19h. 9m., 1908. London to Brighton and back safety (S. R. Gruibl), 9h. 22m. 42s., 1912 tandem safety (G. H. Briault and A. E. Ward), 4h. 23m. 28s., on Aug. 12, 1909. York to Edinburgh (J. W. Kirk), 11h. 14m. 1912, tricycle (E. W. B. Martin), 13h. 34m., Oct. 12, 1912. London to York (F. H. Goodwin), 20h. 26m. Edinburgh to London, unpaced (E. Shirley), 23h. 43m., Oct. 14, 1905. Bath to London and back (F. W. Barns), 21h. 48m. 44s., 1897.

**English 1 Hour Records (Path).**—Safety W. T. Hall, C. T., April, 1906 (43m. 20sec.). Tandem safety (E. James and G. A. Nelson, 1897), 32m. 1,66oyds.

25 Miles (in a Championship), C. B. Kingsbury 1h. 0min. 7⅘s., 1912.

**Amateur Tandem Paced Record** by H. C. Akers and F. W. Wells —1 hr. = 19½m. 1300yds.

**Path Motor Paced Records.**—10 miles (W. T. Hall, 1906), 13 min. 32⅘ secs. 12 miles (H. E. Ellis, 1912), 2h. 14m. 3⅘ secs.

At the Stadium, on July 2, 1910, J. H. Bishop established an amateur record, riding 923 miles 1320 yards in 24 hours.

On Sept. 27-28, 1897, M. Cordang at The Hague, Holland, rode 620 miles 968 yards in 24 hours, but owing to his suspension at the time by the U.V.F. the record is not recognised. At Madison Square Gardens, New York, December 1896, Charles Miller rode 1,007 miles 4 laps in 142 hours. In Oct. 1912, at Berlin M. Weiss covered 704 kilometres in 24 hours, without pacemakers.

At Munich, on Sept. 10, 1899, Paul Guignard rode 100 kilos 893 metres (62 miles 993 yards) in 1 hour. He was paced by Hoffman on a three-cylinder machine with a wind shield.

On July 22, 1911, W. J. Bailey (Polytechnic Cy. C.) beat his own quarter-mile flying start record of 23 4-5th secs. by 2 secs. Bailey's new record being 20 4-5th secs. This beats the professional world's record of 23 2-5th secs. made by T. J. Gascoyne, at Catford on May 2, 1910.

The record attendance at a football match in England is 120,810, when Tottenham Hotspur and Sheffield United first met in the final Tie for the F.A. Cup in 1901.

On April 14, 1900, in a football match between Sunderland and Manchester City, at Sunderland, Charles Williams (M.C.) kicked a ball from goal to goal, and scored.

## AMATEUR SWIMMING RECORDS. Passed by the Fédération Internationale de Natation Amateur

There has been no meeting of the International Board since 1912, but many fresh records are reported from America, the most notable being 100 yards in 53 4/5 secs. by Duke Kahanamoku, at Honolulu, Sept. 2, 1911.

## BRITISH WEIGHTS AND MEASURES.

### THEORY.

THE Theory now stated covers the Metric System and the British Weights and Measures, explaining practically all that is incomprehensible in the latter system, and linking the two systems (usually considered to be at variance) together as parts of one complete scheme.

(*a*) The inch ought to be the one 500-millionth part of Earth's Polar Axis, the International Earth Line, about which the whole globe revolves daily

(*b*) The base of all systems ought to be the chain of 792 inches, the number 792 being the Least Common Multiple of all numbers from 1 to 12, *except* 5 and 10, the decimal numbers, provided for in the decimal scale, and 7, which is seldom used, except to multiply

(*c*) The chain, divided into 10, 11, and 12 parts, gives us respectively the double-*metre*, the double-yard or fathom, and the double duodecimal unit. The halves of these bases are 39·6 inches, 36 inches, and 33 inches, respectively

The British System is a mixture of the three scales—decimal, fractional, and duodecimal—of the above scheme, which has been called by the re-discoverer "the Theory of the Tripod." Of the three scales, the duodecimal has practically vanished from our tables. The only traces are the Troy pound, the carat, and, in India, the *gudge* and its duodecimal subdivision, the *jow*. The British meter is directly descended from the ancient Belgic yard, and is still employed in the rod, pole, or perch of 5, the chain of 22, and the furlong of 200 meters, and in square measure, in the rood of 1,000 and the acre of 4,000 square meters. The British Ton of 2,240 lb is practically the weight of this cubic meter of pure water at the temperature of melting ice, and the *cwt.* is obviously 100 half kilograms of 1 lb. each. The 9-gallon cask is very nearly 40 British litres, which explains the scale of nine in the Ale measure, and the Bushel is 36 litres, very nearly. Very trifling corrections would make the whole System thoroughly scientific and logical.

The Metric System is based on a *metre* which is too short, and which appears to be an approximative modern substitute for the ancient meter or Belgic yard. If the French *metre* were 39·6 inches in length, like the British rector, the two systems would be in all respects, in practice, commensurate and brothers.

The Theory is framed upon the practical fact that pure decimals or tens do not meet all human needs.

---

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for the United Kingdom, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

Acts of 1889 and 1904 deal with the verification of weights and measures, and Board of Trade regulations of 1907 with the inspection and stamping of same.

The Yard and the Pound are the only two independent standards for weights and measures. The Gallon, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

#### Apothecaries' Weight.

For the use of Apothecaries and for selling drugs retail.

*Measures of Weight.*

| | | |
|---|---|---|
| 20 grains | = | 1 scruple (℈). |
| 3 scruples | = | 1 drachm (ʒi). |
| 8 drachms.. | = | 1 Apothecaries ounce (oz. Apoth.). |

*Measures of Capacity*

| | | |
|---|---|---|
| 60 minims (*mxx.*) | = | 1 fluid drachm (*f. dr.*). |
| 8 fluid drachms | = | 1 fluid ounce (*f. oz.*). |

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437·5 grains). A fluid *drachm* (54·6875 grains) is equal in weight to two Avoirdupois *drams*.

#### Avoirdupois Weight.

(*a*) *For minute weighments—*

| | | |
|---|---|---|
| 7000 grains (*gr*) .. | = | 1 pound (lb.). |

(*b*) *Retail—*

| | | |
|---|---|---|
| 16 drams (*dr*) | = | 1 ounce (oz.). |
| 16 ounces ... .. | = | 1 pound. |
| 28 pounds .. .. | = | 1 quarter (of a *cwt.*). |

The quarter is halved into stones.*

(*c*) *Wholesale—*

| | | |
|---|---|---|
| 4 quarters - | = | 1 hundredweight (*cwt.*). |
| 20 hundredweight | = | 1 ton (2,240 lb). |

A (quartern) loaf = 4 lb., a peck of flour, 8 gallons = 14 lb. a firkin of butter = 56 lb., a firkin of soft soap = 64 lb., a box of fish, about = 90 lb., a barrel of gunpowder = 100 lb., a barrel of raisins = 112 lb., a seam of glass, 24 stones of 6 lb. = 120 lb., a barrel of butter, 4 firkins = 224 lb., a faggot of steel = 120 lb., a pig of ballast = 56 lb. a fodder of lead, London and Hull = 19½ cwt., Derby = 20½ cwt., Newcastle = 21½ cwt., a cask of blacklead = 21½ cwt., a sack—potatoes, 168 lb., flour, 280 lb., coals, 224 lb., a ton of coals, 20 sacks.

#### Troy Weight.

For gold, silver, and precious stones. The ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains in weight.

#### Jewellers' Weight.

By an Order in Council of Oct. 24, 1907, the metric carat of 200 *milligrammes* is ordained the legal standard of weight for precious stones and pearls.

#### Measures of Capacity

(*a*) *Retail and Liquid—*

| | | |
|---|---|---|
| 4 gills - | = | 1 pint. |
| 2 pints .. | = | 1 quart. |
| 4 quarts | = | 1 gallon. |

(*b*) *Wholesale—*

| | | |
|---|---|---|
| 8 gallons | = | 1 bushel |
| 8 bushels .. | = | 1 quarter |

A measure of 2 gallons is called a peck.

A chaldron is 36 bushels = 4½ quarters.

*Corn.*

Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned —

Wheat, English, 60 lb. Foreign, 62 lb.

* The *Smithfield* stone (for dead meat) is 8 lb. only

Barley, English, 50 lb. French, 52½ lb. Mediterranean, 50 lb.
Oats, English, 32 lb. Foreign, 36 and 40 lb.
Rye and Maize, 56 lb. Buckwheat, 52 lb.
The U.S. barrel of flour is 196 lb.

*Hay and Straw*

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb
Load, 36 Trusses—Straw, 11 cwt. 2 qr. 8 lb., Old Hay, 18 cwt., New Hay, 19 cwt. 2 qr. 4 lb.

**Liquid Measure.**

| *Size of Barrels.* | Gals. |
|---|---|
| Firkin or Quarter Barrel | 9 = 9 × 1 |
| Kilderkin, Rundlet, or ½ Barrel | 18 = 9 × 2 |
| Barrel ,, ,, | 36 = 9 × 4 |
| Hogshead (1½ barrels) | 54 = 9 × 6 |
| Puncheon (2 barrels) | 72 = 9 × 8 |
| Butt of Ale (3 barrels) | 108 = 9 × 12 |
| *Other barrels*— | |
| Anker | 10 |
| Tierce ,, ,, | 42 |

Pipe of Port or Madeira = 115 gals., Teneriffe = 100 gals., Marsala = 53 gals. Madeira and Cape = 92 gals. Sherry and Teut = 108 gals., Butt of Lisbon and Tunellas = 127 gals. Aum of Hock and Rhenish = 30 gals. Hogshead of Claret, 46, Port, 57, Sherry, 54 Madeira, 46 gallons.

*Bottle Measure*

The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26⅔ fluid ounces.

In the drug trade two new bottles are used —
Carboy = 240 fluid oz. (quart).
Winchester quart = 80 ,, (½ gallon).

*Water*

The British Ton is the weight of a cubic British Meter (the ancient Royal yard, as it has come down to us) of pure water at the temperature of melting ice very nearly. At present, the following relations hold good —

| | | |
|---|---|---|
| Cubic inch | = | 252.458 grains. |
| Gallon (277·274 cub. in.) | = | 10 lb. (distilled). |
| Cubic foot | = | 62.321 lb |
| 35.943 cubic ft (224 gals.) | = | 1 ton. |

Water for Ships Tun 252 gals., Butt 126, Pun cheon 72, Barrel 36, Kilderkin 18 gals.

*Cisterns* A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 22·6 lb. in addition to its own weight.

**Measures of Length.**

(*a*) *Trade* and *Manufacture* —
12 inches (ins.) = 1 foot (ft.).
3 feet = 1 yard (yd.).
Any of the above units may be used singly and as a prime unit, to be divided fractionally or decimally, as required, to any necessary extent.
(*b*) *Travellers' Measure*—
220 yards = 1 furlong.
8 furlongs = 1 mile.
3 miles = 1 league (seldom used).
(*c*) *Surveyors' Measure*—
100 links = 1 chain (22 yards).
10 chains = 1 furlong.
8 furlongs = 1 mile
A pole of 5½ yards is merely a name for a quarter of a chain.

**Nautical Measures.**

6 feet = 1 fathom.
100 fathoms = 1 cable length.
15 feet, or 5 yards, is called a chain, and 1,000 fathoms make a nautical mile, or knot, in practical navigation.

**Birmingham Gauge.**

The Weights and Measures Act of 1878 makes standards on and after Nov 1, 1924, certain new divisions of an inch. The equivalent of an inch is 18/0 B.G. The numbers proceed by units down to 1/0 B.G., which = 0·3964 inch. Thereafter, from 1 B.G (·3625 inch) by units to 36 B.G (·0095 inch).

**Square or Surface Measure**

(*a*) *Trade* and *Manufacture*—
144 square inches = 1 square foot.
9 square feet = 1 square yard.
(*b*) *Travellers' Measure*—
Square miles and fractions or decimals are sufficient for all practical purposes
(*c*) *Surveyors' Measure*—
Either in links and square chains when —
10 square chains = 1 acre.
640 acres = 1 square mile.

Note.—The Anglo-Saxon acre's length is the furlong, and the acre's breadth the chain.

Or for legal and civil purposes —
30¼ square yards = 1 square rod or perch.
40 rods = 1 rood.
4 roods = 1 acre.

Surveys being usually made with the chain of 100 links the only difficulty presented by the above table lies in the reduction of the balances of rods into square yards.

**Circular Measure**

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
90 degrees = 1 sign.
12 signs = 1 circumference.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere.
Diameter cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.
Diameter of cylinder × 3·1416, product by length or height, gives the surface
Diameter squared × ·7854, product by length or height, gives solid content.

Note — A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain. This relationship is of great importance in the laying out of railway curves by range-finding, &c., since the relationship between diameters in multiples of 7 yards, and circumferences in chains, holds good for circles of any size.

**Cubic Measure.**

1,728 cubic inches = 1 cubic foot.
27 cubic feet = 1 cubic yard.

**Electrical Measures.**

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units) and the value of the units has been fixed by international agreement. The principal units are as follow —

As a unit of resistance, the international OHM, which is based upon the ohm equal to 10⁹ units of resistance of the C.G.S. system of electro-magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14.4521 grammes in mass, of a constant cross-sectional area, and of a length of 106·3 centimetres.

As a unit of current, the international AMPERE, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units, and which is represented sufficiently well for practical use by the unvarying current which,

whose passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0·00118 of a gramme per second.

As a unit of electro-motive force, the international VOLT, which is the E.M.F that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere and which is represented sufficiently well for practical use by 1⅓⅓ of the E.M.F between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15° C., and prepared in the manner described in a certain specification.

As a unit of quantity, the international COULOMB, which is the quantity of electricity transferred by a current of one international ampere in one second

As a unit of capacity, the international FARAD, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the JOULE, which is 10⁷ units of work in the C.G.S system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampere in an international ohm In practice the watt-hour is usually employed It represents the work done by such a current in an hour, and equals 3,600 joules.

As the unit of power, the WATT, which is 10⁷ units of power in the C G S. system and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B.O T U) is 1,000 watt-hours, or 3,600,000 joules, or 1½ horse-power hours.

As the unit of induction, the HENRY, which is the induction in the circuit when the E.M F induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampere per second.

### Builders' Measurements.

| | | |
|---|---|---|
| Stock or kiln bricks. | 8¾ inches | × 4¼ × 2⅝ |
| Welsh fire-bricks .. | 9 ,, | × 4½ × 2½ |
| Paving bricks | 9 ,, | × 4½ × 2½ |
| Square tiles.... .... .. | 9½ ,, | × 9½ × 1 |
| ,, .. | 6 ,, | × 6 × 1 |
| Dutch clinker bricks | 9¼ ,, | × 3 × 1⅝ |

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11½ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar The rod being 5 British meters a rod of brickwork is 25 square meters 1½ bricks thick = very nearly 10 cubic meters.

Ordinary bricks weigh about 7 lb. each, a load of 500 weighs about 1 ton 11 cwt. 1 qr

A Piece of Wall Paper is 12 yd. long × 21 in. wide (English), and 9 yd. × 18 in. (French).

### *Timber and Wood.*

40 cubic feet unhewed, 50 cubic feet squared = 1 load.
50 cubic feet of planks = 1 load.
100 superficial feet = 1 square of flooring.

A standard hundred of deals contains 120 pieces. The Petersburg standard consists of 165 cubic feet, or 200 pieces 1¼ in. × 11 in. × 12 ft. or 120 pieces 3 in. × 11 in. × 6 ft.

A Batten is not more than 7 inches wide, a Deal not more than 9 inches Planks are 2 to 4 inches thick, and 10 inches and up in width.

A Cord of Wood is 4½ tons, or 128 cubic feet.

### *Sizes of Slates.*

| | in. in. | | in. in. |
|---|---|---|---|
| Empress .. ... | 26×18 | Ladies .. ..... | 16×10 |
| ,, Small | 26×14 | ,, Small | 16× 8 |
| Princesses .... | 24×14 | ,, Large | 24×12 |
| Duchesses | 24×12 | ,, ,, | 12× 8 |
| Marchionesses | 22×12 | Plantation | 12×12 |
| ,, Small | 22×11 | Doubled .. | 13×10 |
| Countesses | 20×10 | ,, .. | 12× 7 |
| ,, Wide | 20×12 | Smalls | 12× 6 |
| Viscountesses. | 18×10 | Ditto .. .. | 10× 6 |
| ,, Small | 18× 9 | Ditto .. | 10×5½ |

### Specific Gravities.

*Weight of following substances compared with the weight of a similar quantity of water*

| | | | |
|---|---|---|---|
| Alcohol | 0·79 | Milk .. | 1·03 |
| Aluminium | 2·67 | Olive Oil | 0·92 |
| Basalt | 2·96 | Petroleum .. | 0·82 |
| Beer | 1 00 | Platinum | 21 45 |
| Blood .. | 1 06 | Portland Stone. | 2·10 |
| Brandy .. | 0.84 | Sand, river | 1·50 |
| Brass | 8·00 | ,, pit | 1·80 |
| Chalk | 1·28 | Shingle .. | 1·60 |
| Cider ... | 1·00 | Silver .. | 10·51 |
| Clay | 1·90 | Sodium | 0·97 |
| Coal, Welsh | 1·60 | Steel | 7·78 |
| ,, Newcastle | 1·24 | Thames ballast. | 1·80 |
| Cork | 0 24 | Tin .. .. | 7·29 |
| Earth .. | 1·60 | Turpentine .. | 0·87 |
| Glycerine | 1 26 | Urine ... | 1·00 |
| Gold ... .... | 19·32 | WATER ..... | 1·00 |
| Gravel, coarse | 1·85 | Wine Bordeaux | 0·99 |
| Iridium | 22·38 | Wood — | |
| Iron, cast | 7·20 | Beech .. ... | 0·85 |
| ,, wrought | 7·79 | Cedar .. | 0·56 |
| Lead | 11·35 | Cherry | 0·70 |
| Limestone | 2·50 | Ebony | 1·33 |
| Marble. | 2·70 | Poplar | 0·38 |
| Marl | 1 90 | Walnut | 0·67 |
| Mercury | 13·60 | Zinc .. | 7·19 |

To find the weight of a cubic foot, multiply 62·321 lb. by the specific gravity To find the number of cubic feet in one ton, divide 35·903 by the specific gravity

### Yarn Measures

*Cotton and Spun Silk Count.*—
Thread = 1⅛ yards.
Lea or Skein *slay* = 120 yards.
Hank, *hk.* = 7 Skeins, or Leas = 840 yards.
Spindle *spdl.* = 18 Hanks
Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb. or 10 lb
Reels of cotton vary from 30 to 1,760 yards, they must be marked correctly
Bundles of Cotton are chiefly made up for export.

*Worsted Count.*—Wrap, 80 yards, Hank = 560 yards — 7 Wraps Counts or Numbers are the number of hanks in a lb

*Lowen Count*—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn A Spindle is 48 hanks, a Bundle is 200 hanks.

*West of England Count*—The Hank is 300 yards, and the number of hanks in 1 lb. is the count of the yarn.

### Temperature Measures.

Variations of temperature are measured by thermometers, which are graduated on three different systems, viz. —

The Fahrenheit thermometer
The Centigrade, or Celsius thermometer
The Réaumur thermometer

In the *Fahrenheit* thermometer the distance from the freezing point of water to the boiling point is divided into 180 degrees. The freezing point is marked 32°, and the boiling point 212°.

In the *Centigrade* thermometer the freezing point is marked 0°, and the boiling point 100°

In the *Réaumur thermometer* the freezing point is marked 0° and the boiling point 80°

To convert Centigrade degrees to Fahrenheit, multiply by $\frac{9}{5}$ and add 32°

To convert Réaumur degrees to Fahrenheit, multiply by $\frac{9}{4}$ and add 32°

For example —

$$20° \text{ Centigrade} = 20 \times \tfrac{9}{5} + 32 = 68° \text{ Fahrenheit.}$$

$$20° \text{ Réaumur} = 20 \times \tfrac{9}{4} + 32 = 77° \text{ Fahrenheit.}$$

To convert Fahrenheit degrees to Centigrade, subtract 32° and multiply by $\frac{5}{9}$

To convert Fahrenheit degrees to Réaumur, subtract 32° and multiply by $\frac{4}{9}$

For example —

$$68° \text{ Fahrenheit} = \tfrac{5}{9}(68-32) = 20° \text{ Centigrade.}$$

$$77° \text{ Fahrenheit} = \tfrac{4}{9}(77-32) = 20° \text{ Réaumur}$$

To convert Centigrade degrees to Reaumur degrees, multiply by $\frac{4}{5}$

To convert Réaumur degrees to Centigrade degrees, multiply by $\frac{5}{4}$.

For example —

$$20° \text{ Centigrade} = 20 \times \tfrac{4}{5} = 16° \text{ Réaumur}$$

$$20° \text{ Réaumur} = 20 \times \tfrac{5}{4} = 25° \text{ Centigrade.}$$

### Time Measures.

Measurements of time are based on the time taken by the earth to revolve round its axis, by the moon to revolve round the earth, and by the earth to revolve round the sun. As these motions are not exactly commensurable with one another, it has been necessary to adopt average or mean intervals of time for ordinary use.

Of these the first is the *Day*, which commences at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds.

The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight.

The *Astronomical Day* commences at noon and is counted up to 24 hours at the following noon.

With the *Jews* and *Muhammadans* the day begins, not at midnight, but at sunset on the previous day. It is important to remember this when comparing dates in different calendars, as the hours between sunset and midnight belong to the *previous* day in the ordinary calendar, and to the *succeeding* day in the Jewish and Muhammadan calendars.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year but the length of the different months varies as follows:—

**January**, March, May, July, August, October, and December have each 31 days.

April, June, September, and November have each 30 days.

**February** has 28 days, except in leap year, when it has 29 days.

The Jews and Muhammadans use the lunar month, based on the length of time that the moon takes to revolve round the earth. The month commences not at true new moon but at sunset of the day when the new moon is first seen after sunset. The length of the lunar month varies, so the Jewish and Muhammadan months have sometimes 30 and sometimes 29 days.

The *Year* is the length of time that the earth takes to complete one revolution round the sun, which is 365·2422 mean days. The ordinary year is taken as 365 days, and every *fourth* year, called *Leap Year*, has 366 days. Every year the date of which is divisible by 4, without remainder, is leap year. But the last year of each century that is not divisible by 400 without remainder is not a leap year. For example, the year 1900 had only 365 days.

The Muhammadan year always consists of twelve lunar months, and is sometimes 354 and sometimes 355 days in length.

### Time and Watch on Board Ship.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds then two more strokes with a second's interval apart, then a rest of two seconds, thus 'Seven Bells' is sounded —

BELL, ONE SECOND, BELL TWO SECS., B. S., B. SS., B. S., B. SS., B.

The bell is struck every half hour In the *morning* 1 bell sounds at 12.30 a.m., and every half hour the number increases until 8 bells at 4 a.m., then 1 bell again at 4.30 a.m. to 8 bells at 8 a.m., 1 bell at 8.30 a.m. and 8 bells at noon. In the *afternoon* 1 bell sounds at 12.30 p.m. and 8 bells at 4 p.m., after which is the *First Dog Watch* (1 bell 4.30, 2 bells 5.0, 3 bells 5.30, 4 bells 6.0) and the *Second Dog Watch* (1 bell 6.30, 2 bells 7.0, 3 bells 7.30, 8 bells 8.0), and thence 1 bell at 8.30 to 8 bells at midnight.

WATCH —for purposes of discipline, and to divide the work fairly the crew is mustered in two divisions the *Starboard* (right side, looking forward) and the *Port* (left). The day commences at noon and is thus divided —

| | | |
|---|---|---|
| Afternoon *Watch* | | noon to 4 p.m. |
| First Dog | ,, | 4 p.m. to 6 p.m. |
| Second Dog | ,, | 6 p.m. to 8 p.m. |
| First | ,, | 8 p.m. to midnight. |
| Middle | ,, | midnight to 4 a.m. |
| Morning | ,, | 4 a.m. to 8 a.m. |
| Forenoon | ,, | 8 a.m. to noon |

This makes seven WATCHES, which enables the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day and the men who have only four hours rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two Watches.

### Fish.

In Scotland, and at certain places in England and Wales at which the Cran Measures Act, 1878 has been put into operation, fresh herrings must be sold by the Cran, containing 37½ Imperial gallons *or Quarter Cran* of 9¼ Imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Mease* which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish 33 Warps = 1 Long Hundred, 132, 20 Hundred = 1 Thousand, 1,320, 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 26½ Imperial gallons, or in half barrels of 13¼ gallons. Herring barrels or half barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

### Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is

a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

*A Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, *every minute of Latitude would be of the same* length, but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

### Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads = a Tun of wine = 60 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

*Gross tonnage* is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

*Net tonnage* is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

*Dead-weight tonnage, or carrying capacity*, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q.v.*).

*Displacement tonnage* is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.v.*).

*Load-water-line* is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

*Draught* is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

*Free Board* is the distance from the main or upper deck to the load-water line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

### Speed of Ships.

The *Knot* is a measure of speed of ships; the expression "14 knots" indicates that the vessel in question is capable of steaming at the rate of 14 nautical miles in one hour. The *Nautical Mile* = 6,080 feet (the *Statute Mile* being 5,280 feet and the *Geographical Mile* 6,080·8 feet). The following table shows the equivalents of 1 to 33 knots in statute miles —

| Knots. | Miles. | Knots. | Miles. | Knots. | Miles. |
|---|---|---|---|---|---|
| 1 | 1·1513 | 12 | 13·8156 | 23 | 26·4799 |
| 2 | 2·3026 | 13 | 14·9669 | 24 | 27·6312 |
| 3 | 3·4539 | 14 | 16·1182 | 25 | 28·7825 |
| 4 | 4·6052 | 15 | 17·2695 | 26 | 29·9338 |
| 5 | 5·7565 | 16 | 18·4208 | 27 | 31·0851 |
| 6 | 6·9078 | 17 | 19·5721 | 28 | 32·2364 |
| 7 | 8·0591 | 18 | 20·7234 | 29 | 33·3877 |

### Paper and Book Measure.

*Writing Paper*

24 sheets = 1 quire.
20 quires = 1 ream.

*Printing Paper*

516 sheets = 1 ream.
2 reams = 1 bundle.
5 bundles = 1 bale.

*Sizes of Printing Paper*

| | | | |
|---|---|---|---|
| Foolscap | = | 17 | × 13½ inches. |
| Crown | = | 20 | × 15 " |
| Post | = | 20 | × 16 " |
| Demy | = | 20½ | × 17 " |
| Medium | = | 22 | × 17 " |
| Royal | = | 23 | × 20 " |
| Super Post | = | 24 | × 25½ " |
| Double Foolscap | = | 27 | × 17 " |
| Super Royal | = | 27½ | × 20½ " |
| Double Crown | = | 30 | × 20 " |
| Imperial | = | 30 | × 22 " |

| Royal Folio | = | 20 × 12½ | ,, |
| Music | = | 14 × 10½ | ,, |

*Sizes of Type.*

All Founders cast their type to one uniform height ("type high"), though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Newspaper*. The column contains 75 lines, and is, technically 12 Pica ems wide, on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains 20 nmns (1,800) ems, he then, doubling that number, charges as 3 nmns (3,600) ems.

A very minute type, used only occasionally, is—

*Brilliant*. A column the size of this in the Almanack if set in Brilliant would contain 124 lines, and about 7 300 letters.

Printing is the art of producing impressions, from characters or figures.

*Diamond* is the next size, the column would contain 107 lines, and about 6,000 letters.

Printing is the art of producing impressions, from characters or

*Pearl*, 95 lines, 4,270 letters—

Printing is the art of producing impressions, from chara

*Ruby*, 87 lines, 3,740 letters—

## METRIC WEIGHTS AND MEASURES.

*Tables for the conversion of British and Metric Weights and Measures will be found on page 396, headed* "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in the United Kingdom in 1897.

In the Metric system, the standard of length is the Metre, the standard of weight is the Kilogram, and the standard of capacity is the Litre. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

The names of the sub-divisions and multiples of each of the standard measures of the Metric system are as follows.

For the sake of comparison, the equivalent value of the nearest British measure is given.

1.—MEASURES OF LENGTH.

| | | |
|---|---|---|
| 10 millimetres (*mm*) | = 1 centimetre (*cm*) | = 0·3937 inch. |
| 10 centimetres | = 1 decimetre (*dm.*) | = 0·32864 foot. |
| 10 decimetres | = 1 METRE (*m*) | = 1·09614 yard. |
| 10 metres | = 1 dekametre (*dam.*) | = 1·9884 poles. |
| 10 dekametres | = 1 hectometre (*hm*) | = 0 4971 furlong. |
| 10 hectometres | = 1 kilometre (*km*) | = 0·6214 mile. |

2.—MEASURES OF WEIGHT

| | | |
|---|---|---|
| 10 milligrams (*mg*) | = 1 centigram (*cg*) | = 0·1543 grain |
| 10 centigrams | = 1 decigram (*dg*) | = 1·5432 ,, |
| 10 decigrams | = 1 gramme (*gram.*) | = 15 4323 ,, |
| 10 grammes | = 1 dekagram (*dag*) | = 5·6438 drams. |
| 10 dekagrams | = 1 hectogram (*hg*) | = 3·5274 oz. |
| 10 hectograms | = 1 KILOGRAM (*kg*) | = 2·2046 lb |
| 10 kilograms | = 1 myriagram | = 1·5747 stones |
| 10 myriagrams | = 1 quintal (*q*) | = 1·9684 cwt. |
| 10 quintals | = 1 tonne (*t.*) | = 0·9842 ton. |

3.—MEASURES OF CAPACITY

| | | |
|---|---|---|
| 10 millilitres (*ml.*) | = 1 centilitre (*cl*) | = 0 0704 gill |
| 10 centilitres | = 1 decilitre (*dL*) | = 0·1759 pint. |
| 10 decilitres | = 1 LITRE (*lit.*) | = 0·8799 quart. |
| 10 litres | = 1 dekalitre (*dal.*) | = 2·1997 gals. |
| 10 dekalitres | = 1 hectolitre (*hl.*) | = 2·7497 bushels. |

4.—MEASURES OF LAND

| | | |
|---|---|---|
| 100 sq. metres | = 1 are (*a*). | = 0 0988 rood. |
| 100 ares | = 1 hectare (*ha.*) | = 2 4711 acres. |
| 100 hectares | = 1 sq. kilometre | = 0 386 sq. mile. |

NOTES

| | |
|---|---|
| 1 hectolitre | = 2·75 bushels. |
| 1 hectolitre per hectare | = 1·11 bushels per acre. |
| 1 quintal | = 3·67 bushels. |
| 1 quintal per hectare | = 1 49 bushels per acre. |
| 1 franc a hectolitre | = 3·6 pence a bushel |
| 1 ,, a quintal | = 4 3 ,, a cental. (11·3 ,, a quarter. |
| 7 ,, ,, (duty) | = 12s. 6d. ,, |

THE UNITED STATES.

The weights and measures are those of the United Kingdom, with the following differences:—

*Weight.*—In the short ton of 2,000 lb., the

Cantal of 100 lb. takes the place of the Cwt. in the long ton. There are TWO tons, therefore, the one of 2,240 lb., the other of 2,000 lb.

*Capacity.*—For corn, the old bushel of 2,150·42 cubic inches, its gallon = 268·8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the Imperial gallon and = 58,317·5 grains of water. It is divided into 8 pints = 7,289·7 grains of water = 26·6 Imperial ounces. In medicine the pint is divided into 20 fluid *ounces* = 455·6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

### BRITISH DEPENDENCIES.

#### Channel Islands.

| | Jersey | Guernsey |
|---|---|---|
| Vergée (Normandy rood) | = 44 acre | 4 acre. |
| Bushel | = 8·9 gallons | 8·8 gallons. |
| Pound | = 7,562 grains | 7,623 grains. |
| Cwt. (104 lb.) | = 112·3 lb. | (100 lb.) = 108·9 lb. |

#### British India.

Gaz, usually 33 inches, also the yard.

| | |
|---|---|
| Bigha (Bengal) | = usually 6⅔ acre. |
| Cawny (Madras) | = 1·33 " |
| Tola (rupee-weight) | = 180 grains |
| Seer, 80 tolas | = 2 lb 2 oz |
| Maund, 40 seers | = 82 lb. |
| " (Madras) | = 24 lb |
| Candy | = 500 lb |
| Visham = 3 lb. Dangali | = 3 pints. |
| Parah | = 15 gallons. |
| Catty (Singapore) | = 1⅓ lb. |
| Pikul " | = 100 catties = 133 lb. |

#### South Africa.

*Money, Weights, and Measures.*—The coins and the standard weights and measures are British, but the following old Dutch measures are still used:—*Liquid Measure* Leaguer=about 128 imperial gallons, half anm = 63¼ imperial gallons, anker = 7½ imperial gallons. *Capacity* Muid = 3 bushels. The general surface measure is *Morgen*, equal to 2·116400 acres 1,000 Cape lineal feet are equal to 1,033 British imperial feet. The short ton of 2,000 lb. is used. Recently a Bill was introduced to provide for the standardisation of the metric system for weights and measures, with the optional use of imperial standards except in the case of chemists, who are compelled to use the metric system.

### FOREIGN WEIGHTS AND MEASURES.

The *Metric System* has been adopted by the whole of Europe (except the *United Kingdom* and *Russia*) and is *permissive* in all countries.

#### Russia.

The standard of length is the Sashine, which is equal to seven British feet; the standard of weight is the Pound, equal to 9-10ths of the British lb.

1.—MEASURES OF LENGTH.

| | | |
|---|---|---|
| 16 versbuk | = | 1 arschine. |
| 3 arschine | = | 1 sashine |
| 500 sashine | = | 1 verst = 0·663 mile. |
| 1 sq verst | = | 0·44 sq mile. |
| 1 dessiatine | = | 2·7 acres. |

2.—MEASURES OF WEIGHT.

| | | |
|---|---|---|
| 3 zolotnik | = | 1 loth. |
| 32 loth | = | 1 pound. |
| 40 pounds | = | 1 pood (36 12 lb.). |
| 10 poods | = | 1 berkovets. |

3.—MEASURES OF CAPACITY

| | |
|---|---|
| 1 vedro (8 shtoffs) | = 2·709 imperial gallons. |
| 1 chetverik (chetverika) | = 5·733 imperial bushels. |

#### Greece.

| | | | |
|---|---|---|---|
| 1 oocque | = 2·84 lb. | 1 livre | = 1·1 lb. |
| 1 quintal | = 130·2 lb. | 1 drachme | = 0·321 oz. |

#### Egypt.

| | |
|---|---|
| Pic (textiles) | = 22·63 inches. |
| Feddan (land) | = 1·038 acres. |
| Oke | = 2·752 lb. |
| Cantar | = 99·09 lb. |
| Ardeb of wheat or maize | = 118 okes = 324·66 lb. |
| Ardeb of barley | = 88 okes = 242·22 lb. |
| Ardeb of rice | = 132 okes = 363·33 lb. |

#### China.

| | | |
|---|---|---|
| Tael weight | = | 1·33 oz. |
| Catty " | = | 1·33 lb. |
| Picul " | = | 133·33 lb. |
| Ta'ur | = | 1·42 inches. |
| Ch'ih | = | 1·773 feet. |
| Chang | = | 11·75 feet |
| Li | = | 2,125 feet |

#### Japan and Formosa.

| | | |
|---|---|---|
| Ri | = | 2·4403 miles. |
| Square ri | = | 5·9533 sq. miles. |
| Cho | = | 2·452 chains. |
| Square cho | = | 2·4507 acres. |
| Ken | = | 1·9884 yards. |
| Tsubo | = | 3·9536 sq. yards. |
| Liquid koku | = | 39·7035 gallons. |
| Dry koku | = | 4·9629 bushels. |
| Koku of capacity | = | 0·2 ton. |
| Liquid sho | = | 1·3262 quarts. |
| Dry sho | = | 0·1985 pecks. |
| Kwan | = | 8·2673 lb. |
| Kin | = | 1·3228 lb. |

### OLD MEASURES.

#### Old British Measures.

| | |
|---|---|
| Cubit | = 18 inches. |
| English Ell | = 45 inches. |
| Scottish Ell | = 37·2 inches. |
| The hand (still used in measuring horses) | = 4 inches. |
| Scottish mile | = 1,984 yards |
| Irish mile | = 2,240 yards. |
| Scottish acre | = 6,150 4 sq yards. |
| Cunninghame acre | = 6,290 sq yards. |
| Irish acre | = 7,840 sq yards. |
| Cheshire acre | = 10,240 sq yards. |
| Hide | = 120 acres (average). |
| Yard of land | = ¼ of a hide. |

#### Old French Measures.

Toise of 6 feet, Foot = 12 789 in

Aune (ell) of 4 Roman feet = 46 77 in.

League, 3,000 toises = 3 6 miles.

Perch, 22 feet or 6 aunes = 23 44 feet.

Arpent, 100 sq perches = 1 26 acres.

Pound = 7,554 grains. Setier = 34 317 gallons. Boisseau ($\frac{1}{12}$) = 2 86 gallons. Pinte = 1 76 pints.

#### Old Hebrew Measures.

Common Egyptian Cubit = 18 24 in., Cubit of Talmud = 21 924 in.

Cubit of Ezekiel = 25 26 in., Reed = 121 6 in.

Kikkar (Alexn. talent) = 50 minas of 60 shekels.

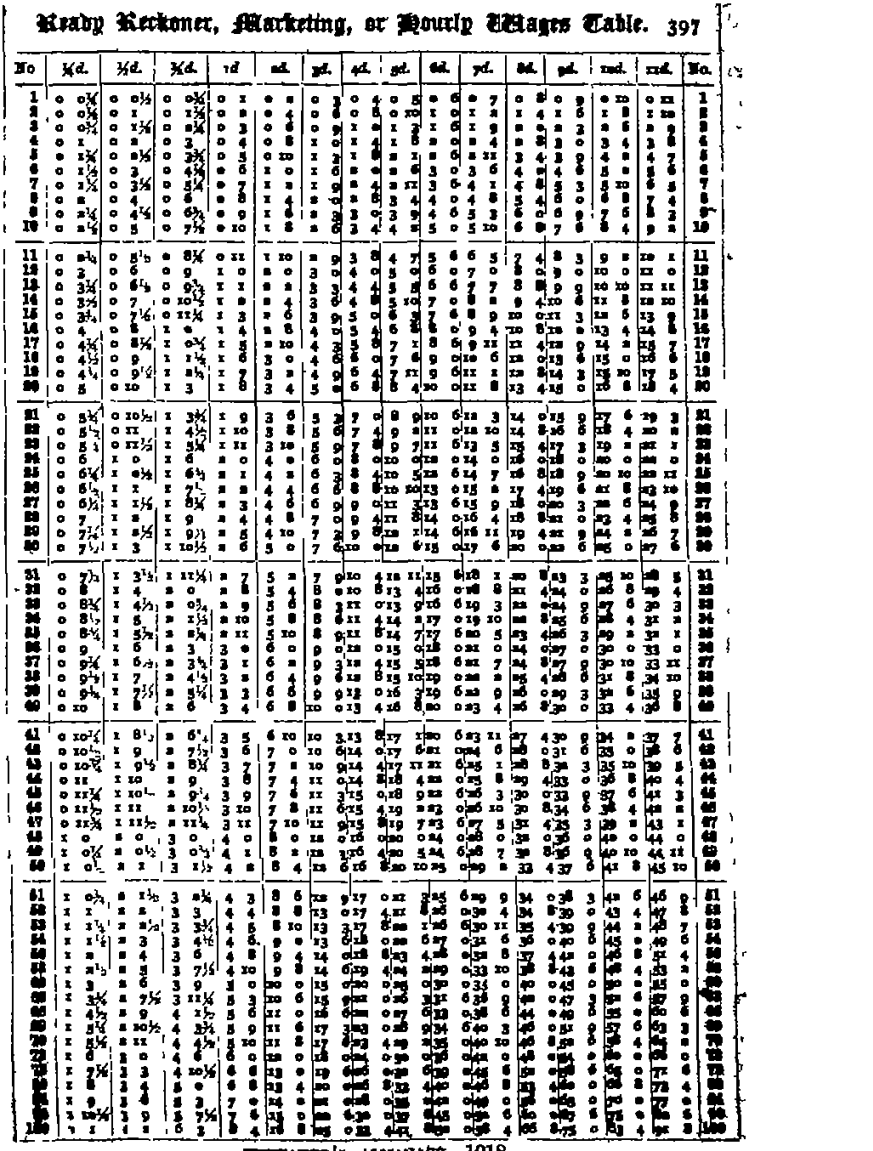
Shekel = ½ oz., of 2 gerah, or (Shekel of the Sanctuary) of 2 beka, 4 rebe, 20 gerah.

Bath (fluid), Ephs (corn) = 7·776 U.S. gallons, or 6 hin, 18 cab, 72 log.

Cor or Homer (10 ephas) = 5 391 bushels.

The Talmudic cubit is exactly $\frac{1}{1}$ millionth of the Equatorial circumference.

N.B.—The Egyptian royal cubit, = 20·64 inches, appears to have been the common cubit increased by the ratio of a degree of latitude to one of longitude in Lower Egypt at 29° N. It was divided into 7 palms. The (Persian) Cubit of Ezekiel was divided into 8 palms.



# Double Conversion Tables for Weights and Measures.

NOTE.—The central figures in heavy type represent either of the two columns beside them, as the case may be. *Examples*:—1 centimetre = 0·393 inch and 1 inch = 2·540 centimetres. 1 metre = 1·093 yards and 1 yard = 0·914 metre. 1 kilometre = 0·621 mile and 1 mile = 1·609 kilometres.

| Centimetres. | | Inches. | Metres. | | Yards. | Kilometres. | | Miles. | Hectares. | | Acres. | Square Kilometres. | | Square Miles. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 2·540 | 1 | 0·393 | 0·914 | 1 | 1·093 | 1·609 | 1 | 0·621 | 0·404 | 1 | 2·471 | 2·590 | 1 | 0·386 |
| 5·080 | 2 | 0·787 | 1·829 | 2 | 2·187 | 3·218 | 2 | 1·243 | 0·809 | 2 | 4·942 | 5·180 | 2 | 0·772 |
| 7·620 | 3 | 1·181 | 2·743 | 3 | 3·280 | 4·827 | 3 | 1·864 | 1·214 | 3 | 7·413 | 7·770 | 3 | 1·158 |

## A Table showing the Profits upon Investments in the Funds or in Stocks and Shares at the Undermentioned Prices.

Example:—To ascertain the yield of Consols at a price of £93 19s. 6d. look in the column headed 3½ Pr. Ct. for 93¾, and it will be seen that the yield (column headed Return Per Cent.) is £3 15s. per cent. Similarly, shares paying a fixed dividend of 6 per cent., if purchased at £98, will yield £6 2s. 9d. per cent.

| Return Per Cent. | 3½ Pr. Ct. | 3⅝ Pr. Ct. | 3¾ Pr. Ct. | 3⅞ Pr. Ct. | 4 Pr. Ct. | 4½ Pr. Ct. | 5 Pr. Ct. | 5½ Pr. Ct. | 6 Pr. Ct. | 7 Pr. Ct. | 7½ Pr. Ct. | 8 Pr. Ct. | 9 Pr. Ct. | 10 Pr. Ct. |

In the following Table, compound interest at the rates of 3, 4, 5, 6 and 7 per cent. is reckoned:

| Years. | 3% | 4% | 5% | 6% | 7% | Years. | 3% | 4% | 5% | 6% | 7% |
|---|---|---|---|---|---|---|---|---|---|---|---|
| ½ | 0 49 | 0 49 | 0 49 | 0 49 | 0 48 | 44 | 23 03 | 19 00 | 15 91 | 13 48 | 11 56 |
| 1 | 0 97 | 0 97 | 0 97 | 0 97 | 0 97 | 45 | 23 20 | 19 12 | 15 98 | 13 52 | 11 58 |
| 2 | 1 92 | 1 92 | 1 91 | 1 91 | 1 90 | 46 | 23 36 | 19 23 | 16 05 | 13 56 | 11 60 |
| 3 | 2 86 | 2 85 | 2 83 | 2 82 | 2 81 | 47 | 23 52 | 19 34 | 16 11 | 13 60 | 11 62 |
| 4 | 3 78 | 3 76 | 3 74 | 3 72 | 3 70 | 48 | 23 67 | 19 44 | 16 17 | 13 64 | 11 64 |
| 5 | 4 69 | 4 66 | 4 63 | 4 60 | 4 57 | 49 | 23 81 | 19 54 | 16 23 | 13 67 | 11 66 |

| | | | | | | 100 | 26 71 | 21 22 | 17 03 | 14 14 | 11 89 |
| | | | | | | In Perpetuity | 33 33 | 25 00 | 20 00 | 16 66 | 14 28 |

Example 1.—What is the present value of a Lease having 30 years to run if the net annual value of £200, interest being reckoned at 4 per cent.? Answer.—£934 years' purchase, or £5,868.

Example 2.—A man, aged 30, in the receipt of a pension or annuity of £200 a year net, wishes to commute that for a present payment, interest being reckoned at 4 per cent. How much will he receive? Answer.—Looking at the Table of Expectation of Life (p. 2) it will be seen that the expectation for age 30 is about 27 years; and from the above table an annuity certain for 27 years, interest at 4 per cent. is worth 16·33 years' purchase. The present payment required would therefore be £3,266 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

## THE ENGLISH MILE COMPARED WITH OTHER EUROPEAN MEASURES.

| 48 | 3·2715 | 4·1323 | 5·2138 | 6·5705 | 8·2715 | 10·4013 |
| 49 | 3·3533 | 4·2562 | 5·3965 | 6·8333 | 8·6437 | 10·9213 |
| 50 | 3·4371 | 4·3839 | 5·5849 | 7·1067 | 9·0326 | 11·4674 |

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year [see 5], must be taken. Thus, for £1 at 4 per cent. for 4 years, take 4 years, 4·3246, and deduct £1—4·3246.

## REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1888, and examined by the actuary of the National Debt Office. It gives the sums needed as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

| Years. | 3 per Ct. | 3½ per Ct. | 4 per Ct. | 4½ per Ct. | 5 per Ct. |
|---|---|---|---|---|---|
| | £ s. d. | £ s. d. | £ s. d. | £ s. d. | £ s. d. |
| 10 | 11 14 2 | 11 17 4 | 12 0 7 | 12 3 11 | 12 7 5 |
| 20 | 6 14 4 | 7 0 2 | 7 5 9 | 7 11 7 | 7 17 6 |
| 30 | 5 2 7 | 5 9 8 | 5 17 0 | 6 4 10 | 6 12 10 |
| 40 | 4 6 8 | 4 13 11 | 5 2 6 | 5 11 4 | 6 0 3 |
| 50 | 3 17 | 4 5 9 | 4 13 9 | 5 3 11 | 5 14 2 |

If the loan be for £5,000, each annual instalment as shown above must be multiplied by 50; if for £2,000, then by 20, and so on.

IMPERIAL COINS ISSUED.

| Year | Gold. London Mint. | Gold. Australian and Ottawa Mints. | Gold. Total. | Silver. | Bronze. | Total. |
|---|---|---|---|---|---|---|
| 1907 | £20,931,000 | £10,843,980 | £31,774,980 | £1,019,808 | £207,330 | £33,002,118 |

| 1916 | 1,854,000 | 6,647,449 | 8,501,449 | 8,192,408 | 452,800 | 17,046,677 |

*Mint Marks.*—The designs adopted for gold coins are identically the same in the Mints of London, Sydney Melbourne, and Perth, with minute "Mint Marks" immediately above the date on the reverse side—the letter S (Sydney), M (Melbourne), and P (Perth). The letter C is borne on Imperial gold coins struck at the branch Mint at Ottawa, Canada, which are otherwise of identical design.

The authorised Coinage of the United Kingdom consists of the following pieces, those marked* only being issued on special occasions the issue of crowns and double florins has been discontinued for several years —

| Denomination. | Standard Weight. | Least Current Weight. | Remedy of Weight. |
|---|---|---|---|
| GOLD | Grains. | Grains. | Grains. |
| *Five Pound | 616 37439 | 612 500 | 1·00000 |

| Halfpenny | 87·50000 | — | 1·75000 |
| Farthing .. | 43·75000 | — | 0·87500 |

STANDARD GOLD contains twenty-two twenty fourths (carats) of fine gold and two twenty fourths of alloy fineness, 916·66, or 22 carats. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign, one troy ounce is, *therefore*, intrinsically worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d

STANDARD SILVER consists of thirty-seven parts of fine silver and three-fortieths of alloy, fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 958·33, is practically obsolete. It is occasionally used however, for high-class plate.]

†BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

THE 'REMEDY' is the amount of variation *permitted in fineness and in weight of coins when* first issued from the Mint

TOKENS.—No person is allowed to coin any token to pass for, or as representing bronze or other money under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight but under the provisions of the Coinage Act 1891, and an Order in Council of 26 March, 1892 light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50, also for £100, £200, £500, and £1 000.

TREASURY NOTES of the value of £1 and 10s are now issued, and are legal tender to any amount.

BANK POST BILLS can be obtained at the Bank of England for amounts of £10 and over at seven days sight. They are issued for the full sum named therein, without allowance for discount No charge is made for bills so drawn they may be obtained at the Chief Office in London, or at any of the branches

LEGAL TENDER, OR MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change Gold if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling

† It may be noted that the legal weight of a penny is one-third, of the halfpenny one-fifth and of the farthing one-tenth of an ounce avoirdupois Further the halfpenny is one inch in diameter

PRICE OF SILVER, 1906-1915.—*The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows* —1907, 30 1/8 d., 1908, 24 15/16 d., 1909, 23 1/16 d., 1910, 24 1/16 d., 1911, 24 7/16 d., 1912, 28 1/16 d., 1913, 27 1/16 d., 1914, 23 1/16 d., 1915, 23 1/16 d., 1916, 27 1/16 d.

In the United States the price of silver is quoted in cents per troy ounce *fine* In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2·192, to express a United States price on the English system, multiply the cents by 0·456.

COINAGE STATISTICS.—During 1914, 265,369,285 Imperial coins were struck at the Royal Mint. The total of Imperial coins is the highest figure reached in any year for coinage at the Royal Mint. The bronze issue was greatly in excess of that of any previous year, the highest previous issue having been £303,433 in 1911.

# Currency of British Dominions and Colonies.

IMPERIAL sterling coins are the sole legal metallic currency in the following British Colonies:—

UNION OF SOUTH AFRICA AND SOUTH AFRICA GENERALLY
FALKLAND ISLANDS.
FIJI.
GIBRALTAR.
NEW ZEALAND.
ST HELENA
WEST INDIAN ISLANDS.

In the following Dominions special coins are current in addition to the Imperial series —

AUSTRALIAN COMMONWEALTH. — Special florins, shillings, sixpences, and threepences in silver, and pence and half pence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs.

BRITISH GUIANA.—A special groat or fourpence.

GUERNSEY —Eight doubles (= 1 penny), 4 s, and 1 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY — Special pence, halfpence, and farthings.

MALTA.—One-third of a farthing.

NIGERIA, NORTH AND SOUTH —Silver 2s., 1s., 6d., and 3d. One penny, one halfpenny, and one-tenth penny (nickel-bronze).

## COLONIES POSSESSING SPECIAL METALLIC CURRENCIES.

| Colony | Monetary Unit (Standard Coin). | Value. In English Currency | Value. Pieces to the Pound Sterling. | Gold Coins. | Silver and Other Subsidiary Coins. |

| Canada | Silver Dollar on gold basis | 4 1⅓ | 4 867 | Canadian 10 & 5 dollars; also British gold & United States 10 and 5 dollars. | *Silver*—1 dollar, 50, 25, 10, and 5 cents. *Bronze*—cents. |
| Ceylon .. | Indian Rupee, fixed rating | 1 4 | 13 | British gold. | *Silver*—50, 25, and 10 cents *Nickel*—5 cents. *Copper*—2, 1, ½, and ¼ cent. |
| Cyprus .. | Piastre .. .. | 0 1½ | 180 | British gold | *Silver*—18, 9, 4, and 2 piastres. *Bronze*—1, ½, and ¼ piastre. |
| East Africa | Indian Rupee fixed rating | 1 4 | 13 | .. | *Silver*—50 and 25 cents. *Nickel* (perforated)—10, 5, 1, and ½ cent. |
| Hong Kong (and Labuan) | Dollar, Mexican or British | 3 1½* | 6 47* | | *Silver*—50, 20, 10, and 5 cents. *Bronze*—1 and ½ cent. |
| India .. .. | Rupee (fixed rating) = 16 annas = 64 pice | 1 4 | 13 | British gold. | *Silver*—½, ¼, and ⅛ rupee. *Nickel* (scolloped)—¼ rupee (anna). *Copper*—2, 1, ½ and ⅓ pice or pie. |
| Mauritius (and Seychelles) | Indian Rupee fixed rating | 1 4 | 13 | .. | *Silver*—50 and 10 cents. *Bronze*—5, 2, and 1 cents. |
| Newfoundland | Dollar on gold basis | 4 1⅓ | 4 867 | | *Silver*—50, 20, 10, and 5 cents. *Bronze*—cents. |
| Straits Settlements | S.S. dollar at fixed rating | 2 4 | 8 37 | British gold. | *Silver*—1 dollar, 50, 20, 10, and 5 cents. *Bronze*—1, ½, and ¼ cent. |
| Uganda .. .. | Same as East Africa. | | | | |

* Variable with the price of silver—now about 44 pence per standard ounce.

The currency systems of many nations are disturbed as a consequence of the war

* Values thus marked are subject to fluctuation.
† The only gold coin in general use is the English sovereign, which is current at 25 piastres.

Presumed loss of the French battleship *Suffren* with crew of 18 officers and 700 men. Further atrocities at Athens reported, control of posts and telegraphs regained by Greek Royalists. 8. Allied blockade of Greece until adequate reparation by the Greek Government is made for outrages on Allies in Athens. 9. Germans in their offensive against Rumania claimed to have taken since Dec 1 70,000 prisoners, 284 guns, 120 machine-guns. 10. Wireless message from King Constantine to Berlin intercepted. 11. Mr Lloyd George's new Ministry announced. French War Ministry formed, with M. Briand as Premier, and a smaller War Council established. Allied Note to Greece demanding complete demobilisation, restoration of Allied control over posts, telegraphs and railways, and the release of Venizelists. 12. German Chancellor announced in the Reichstag that peace overtures had been made by four enemy Powers to the Allies through neutral Governments. 13. Gen. Neville succeeded Gen. Joffre in command of the Western front. Resignation of Dr. von Körber, Austrian Premier, Dr von Spitzmüller becoming his successor. British resumed the offensive towards Kut and bombarded Sannaiyat. Rumania south of the Bucharest-Targovishte line in possession of Mackensen. 14. Rumanians still retreating, Buzeu evacuated. Allied ultimatum to Greece demanding the withdrawal of entire Greek force from Thessaly. New Army Council appointed by the King. The *Russia*, an empty British transport, submarined. 15. French gained a great victory at Verdun, breaking the enemy front over a depth of two miles, and taking the villages of Vaux-Chapitre, Louvemont, and the works of Hardaumont and Bézonvaux. 16. Bézonvaux captured, and progress by French in the Bois des Caurières. 17 French gains increased. 19. 12,987 prisoners, including 384 officers, 115 guns, 70 trench machine-guns. Warrant issued by the

Greek Government for the arrest of M. Venizelos on the charge of high treason. 18. Official text of the German "Peace Note" delivered to the Foreign Office. German advance on Braila, the grain port of the Danube, checked by the Russians at Bologn. 19. The Government decided to take over control of shipping and mining, to institute National Service, and to call an Imperial Conference. Mr Neville Chamberlain appointed Director-General of National Service. £539,000,000 reported to have been subscribed to the fifth German War Loan. 20. President Wilson's Note, requesting them to state their peace terms, communicated to the belligerents. Germans advance on Braila in two columns, Mackensen's army marching from the south. 21. New Allied Note to Greece demanding, *inter alia*, an inquiry by a mixed commission into the Athens "disturbances." El Arish, Sinai Peninsula, entered by British troops. 22. King's Speech proroguing Parliament declared that "the rigorous prosecution of the war must be our sole endeavour." 23. Strong Turkish position at Magdhaba, near the Syrian border, attacked by British cavalry, 1,230 prisoners, 7 guns captured. Swiss Note to the belligerent Powers supporting President Wilson's Note. 24. The whole of the Dobrudja, except the N.E. corner, in the hands of the Germans. 25. The King sent a Christmas message to his Navy and Army throughout the Empire. German reply to President Wilson's Note ignoring his suggestion to state terms, but proposing an immediate Peace Conference. Dominion Premiers invited to the "Special War Conference of the Empire." Indian representatives to be included. 26. British took over a further portion of the French line on the Western front. General Joffre created a Marshal of France. 27 Old French battleship *Gaulois* torpedoed in the Mediterranean. 28. Battle of Rimnic. 10,000 Russian prisoners claimed by Falkenhayn, who penetrated N.W. and S.E. beyond. German reply to the Swiss Note. 29. Germans stormed several positions in Moldavia. Scandinavian Note to Germany supporting President Wilson. Murder of the notorious Russian monk Rasputin. 30. Allies' reply to the German Note rejecting the enemy's overtures as an "empty and insincere" proposal, and demanding safeguards against future aggression. 31. Germans resumed their advance along the left bank of the Danube towards Braila, continuous fighting on a front of 120 miles east Rimnic to the Ottos Pass. Renewed Allied ultimatum to King Constantine. (1917.) Jan. 1. Sir Douglas Haig created a Field-Marshal. King sent a New Year's Message to the citizens of London. British transport *Ferona* submarined in the Mediterranean, 183 missing. British stormed enemy's strong lines in the Mageta Valley, E. Africa, and advanced near to Kilambawe. Paris Treaty 1898 and Berlin Treaty 1878 denounced by Turkey. 380,423 prisoners on fronts in Europe taken by the Allies in 1916. 2. Reconstituted Rumanian Cabinet, M. Bratiano Premier. 3. Mackensen's army before the Sereth lines at Foscani, Macin bridgehead captured. Admiralty defines its policy as to the arming of merchant ships, reasserting the "immemorial right" of the seaman to defend his vessel "against attack or search by an enemy." 4. German successes in the valley of Milcovu. 5. Germans captured Braila, and also took Gurguesi and Romanul. Mr Lloyd George and Lord Milner in Rome in conference with representatives of French and Italian Governments. 6. Foscani captured by the 9th Army under Falkenhayn, 8,499 rank and file taken prisoners. Russians advanced near Riga, capturing guns and prisoners. Ypres heavily shelled by Germans. 9. Allies reply to President Wilson's Note, with a Note from Belgium vindicating her scrupulous neutrality before the war. Allied statement of terms defined. Resignation of M. Trepoff, Russian Premier succeeded by M. Golitsine. Battleship *Cornwallis* torpedoed and sunk in the Mediterranean, with the loss of 13 lives. Strong enemy position at Rafa taken by Anzac mounted troops and Imperial Camel Corps. Ellerman liner *Lesbian* sunk, Captain Fry taken prisoner by Germans. 10. Russians in Rumania reported to have retired to new positions along the line of the Sereth and the Putna. Germans masters of all Wallachia. Russians advanced in the Riga district between the Tirul Marsh and the Aa, and took German positions. Prices of wheat and potatoes of 1917 crop to growers fixed for the current year by Food Controller. 11. Issue of New War Loan at 5 and 4 per cent. 12. Similar Notes handed to neutral Governments by Germany and Austria-Hungary in reply to the Allies' refusal to consider the German "peace proposals." 13. Brisk fighting on the French front between the Aisne and the Argonne. War Office announced that Gen. Smuts would represent S. Africa at the Special War Conference. 17. Mackensen's Rumanian advance checked. Continuous heavy fighting in the Moldavian hills resulted in favour of the Allies. 18. Acceptance by the Greek Government of Allied demand, including the release of all imprisoned Venizelists. 19. Explosion at a munitions factory in the E. of London, near the river, 69 killed, 72 seriously injured, 398 slightly wounded, much property damaged. 20. Fundeni, a strong position on the Sereth, captured by Germans. 21. Kut-el Amara, on the south bank of the Tigris, reported to have been cleared of the enemy. 22. Dispatches from E. Africa reported progress of encircling columns against the enemy on the Lower Rufiji River, and successful operations against the Germans in the Mahenge region. Two naval engagements in the North Sea between British light forces and enemy destroyers resulted in the sinking of a German destroyer and the torpedoing of a British destroyer with the loss of 3 officers and 44 men, enemy vessels scattered, greatly damaged. 23. Labour Party at a Conference at Manchester by a large majority approved the acceptance of office by Labour members in the Ministry. 24. German attack between the Tirul Marsh and the Aa forced the Russian army under Gen. Dmitriaff to fall back 1½ miles. 25. British auxiliary cruiser *Leasowle* sunk off the Irish coast, 12 officers, 200 men saved. Greek Government formally apologised to the Allied Powers for the occurrences of Dec. 1. German war vessel fired shells on Southwold, but inflicted little damage. 26. Order in Council making compulsory the sale or loan to the Treasury of foreign securities, to regulate exchange. 27. In Southern Bukovina the Russians defeated the Germans and captured 1,228 rank and file. 28. Lt.-Gen. Hoskins succeeded Lt.-Gen. Smuts in the command of the B. African Expeditionary Force. 30. Fighting at Hill 304, Verdun. 31. Policy of "unrestricted

naval warfare," to take effect from Feb. 1, announced to neutrals by Germany, all sea traffic to be prevented by wide zones round Great Britain, France, Italy, and the Eastern Mediterranean. Foreign Office announced the intention of Germany to sink hospital ships on the plea that they were used for conveyance of troops and munitions. Feb. 1 United States officially informed that Germany "must abandon the limitations she has hitherto imposed upon herself in the employment of her fighting weapons at sea," and proposing that the U.S. Government should warn their vessels against entering the dangerous zones. Great indignation in America, and alarm in neutral countries; Danish and Dutch vessels stopped their sailings. Further British success at Kut reported. 2. Appeal to the nation by Lord Devonport, Food Controller, to economise in food to avoid compulsory rationing. 3. United States broke off diplomatic relations with Germany, Count Bernstorff was given his passports, and Mr Gerrard recalled from Berlin, seizure of interned German cruisers and Hamburg-America liners. U.S.s.s. *Housatonic* sunk in daylight off Scilly Is. by a German submarine. 4. Summary of Pres. Wilson's Note sent to neutral Powers expressing his opinion that similar action on their part would advance the cause of peace and civilisation. Crews of German ships at Manila wreck their engine-rooms. Defeat of Senussi near the Siwa oasis. 5. Swiss Federal Government replied to Pres. Wilson's Note declining to break off relations with Germany. Resignation of Said Halim, new Turkish Cabinet formed, with Talaat Bey as Grand Vizier. 6. Mr Neville Chamberlain announced his scheme for National Service. 7. Parliament opened by the King, his escort formed by officers of the Dominions and India. Grandcourt, on the south bank of the Ancre, taken by British. 8. Hill 193, Gailly-Saillisel Ridge, captured, advance made from Grandcourt on both sides of the Ancre. Anchor Liner *California* torpedoed, 43 passengers and crew reported missing. 9. Rout of Bulgars the Austrians attacked and captured some Italian trenches. War Office report issued of recent operations in Western Egypt against Said Ahmed, the Senussi leader. 10. Strong system of German trenches S. of Serre Hill taken by British. Turkish trenches W of Kut stormed by General Maude, and "Liquorice Factory" captured. Further answers by neutral Powers to the German submarine Note published. 11 German attempt, through the Swiss Government, to re-open negotiations with the United States. 12. President Wilson refuses to re-open negotiations with Germany until her submarine proclamation of Jan. 31 is withdrawn. 13. Submarine debate in the House of Lords, counter-measures to meet the peril announced by Lord Lytton. 15. Germans broke through the French line between Talure and Maisonnes and took 800 prisoners. The Dahra bend of the Tigris cleared of Turks by General Maude. 16. War Loan lists closed, over £1,000,000,000 now money subscribed. 17. British advanced up the valley of the Ancre and captured enemy positions on a 2½-mile front. Failure of British attack on Sarrail-Yaz. 18. Junction between Italians and Turks in S. Albania, isolating Greece from the central Powers. 19. Government decided to revise exemption certificates of all men under 25 years. 20. New British Blockade Order published, extending the examination of neutral ships. Sir E. Carson, introducing the Naval Estimates, referred to the gravity of the submarine problem, but expressed his confidence it would in time be overcome. 22. Germans torpedoed 7 Dutch vessels outside Falmouth and sank 3. Business Names Act came into operation. Formation of a "Labour Corps" authorised by Royal Warrant. 24. ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish, and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. The mother has the custody of her bastard child. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the registrar the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A domestic servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

## PIRACY STATISTICS.

THE following table gives the results of nine months' operations of the *German* submarine boats on British Merchant Shipping :—

| Week ending | Sunk. 1,600 tons and over. | Sunk. Under 1,600 tons. | Sunk. Fishing Vessels. | Unsuccessfully attacked. | Arrivals and Sailings. |

# The British Empire.

## AREA AND POPULATION

| Continental Distribution. | English Square Miles. | Estimated Population, 1921 |
|---|---|---|
| In Europe | 121,512 | 45,878,500 |
| In Asia | 2,187,550 | 323,158,000 |
| In Africa | 3,618,245 | 49,458,150 |
| In North America | 3,893,020 | 7,458,000 |
| In Central America | 8,600 | 50,000 |
| In the West Indies | 12,300 | 1,730,000 |
| In South America | 97,800 | 314,000 |
| In Australasia | 3,214,685 | 6,240,000 |
| Total | 13,153,712 | 434,286,650 |

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies about one-quarter of the known surface of the globe, and its population exceeds one-quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere. The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons, one half of the Empire enjoying summer while the other half is under winter conditions. In spite, however, of the uneven distribution east and west, daylight and darkness are almost equally divided, on account of the position of Australasia near the limit of east and west.

ETHNOLOGY.—By far the greater portion of the Empire lies within the temperate zones, and is suitable for white settlement, the tropical areas being Southern India, West and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Empire in 1921 was 60,000,000, mainly Anglo-Saxon, but partly French, Dutch, and Spanish. This white population includes a considerable sprinkling of Jewish blood. The remaining 370,000,000 include 240,000,000 of the native races of India and Burma, 40,000,000 black races, 6,000,000 Arabs, 5,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 Red Indians in Canada.

RELIGIONS.—Of the total population over 240,000,000 are Hindus, 100,000,000 Mohammedans, 70,000,000 Christians (63,000,000 Protestants, 7,000,000 Catholics), 12,000,000 Buddhists, 10,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol-worshippers.

CONSTITUTION AND GOVERNMENT.—There is no fundamental law upon which the Constitution of the Empire rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the Imperial Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference* (*post*).

SELF-GOVERNMENT.—(1) *The United Kingdom.*—The Constitution recognises certain great principles, *including the fair administration of* justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons. The component parts of the British Government are the King, the Legislature (House of Lords and House of Commons), the Executive Ministry, appointed by the Sovereign and responsible to Parliament, and the Judicature.

(2) *The Indian Empire.*—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. In certain matters the actions of the Secretary of State and Council are not valid unless sanctioned by Parliament. The Governor-General of India in Council (the Council, in this case, being the Council of the Governor-General) acts for executive purposes very much on the lines of the governing body of a Crown colony.

(3) *Imperial Dominions.*—All British dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a dominion unless that dominion is specially mentioned. If the legislature of a dominion enacts a law which is repugnant to an Imperial law affecting the dominion, it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a *measure for the consideration of the Crown*,

and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent. Subject to what has been already stated, the parliament of a self-governing dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—(a) *Those having responsible government.* The principal government departments are administered by political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa. (b) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, Mauritius, and Malta. (c) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, St. Vincent, Sierra Leone, Straits Settlements, Trinidad. (d) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Gibraltar, Labuan, and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown. (e) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the King-Emperor. The protectorates of the British Empire include British East Africa, Somaliland, Nyasaland, Uganda, Swaziland, and Nigeria. (f) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation.

SELF-SUPPORT.—With but few exceptions the Imperial Dominions are self-supporting, revenue being raised locally to meet the expenditure. *Occasional grants are made by the Imperial* Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, *e.g.*, the Nigerian purchase, the Uganda Railway, &c. This practice has grown up in effect as a corollary of the principle, "No taxation without representation," which was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous experiment the principle has become an accepted maxim of British administration.

SELF-DEFENCE.—For many years the Imperial Dominions have contributed to the defence of the Empire, and a movement has recently been made by the various self-governing Dominions to provide land and sea forces to defend their territories against aggression. Canada has reorganised her old-standing militia, and has a naval defence scheme in contemplation. Australia and New Zealand are parties to a naval scheme which is to be replaced by an Australasian fleet, while their land forces have recently been reorganised. South Africa is developing a scheme of military service for home defence, and makes considerable contributions to the naval defence of the Empire. These schemes are largely the outcome of the deliberations of the Imperial Conference, held periodically at London, and consisting of representatives of the Ministry of the Imperial and Dominion Governments. Other Dominions provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Imperial Government.

THE IMPERIAL CONFERENCE.—The Imperial Conference has gradually become recognised as the Cabinet of the Empire. Its origin may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their countries at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in 1897, 1902, 1907, and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of the United Kingdom. The constitution of the Conference is as follows:—*President*, The Prime Minister of the United Kingdom; *Chairman* (*in the absence of the President*), The Secretary of State for the Colonies. *Members*, The Prime Ministers of Canada, Commonwealth of Australia, New Zealand, Union of South Africa, and Newfoundland. *Secretary*, Sir H. W. Just, K.C.M.G., C.B., *Assistant do.*, C. T. Davis, C.M.G., A. B. Keith, D.C.L.

THE LEGISLATURE.—The Parliament of the United Kingdom is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs through the medium of the Colonial Office. The Secretary of State for the Colonies is a member of the Cabinet of the United Kingdom, his active participation in the government of the Imperial Dominions varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State. (*See* also "Imperial Conference," *infra.*)

THE JUDICATURE.—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for the United Kingdom is the House of Lords.

DEFENCE.—The general defence of the Empire is undertaken by the Imperial Government, aided in an increasing degree by the governments of India (*q.v.*) and the self-governing Dominions (*see* Canada, Australia, New Zealand, and South Africa). The "first line of defence" is the Royal Navy (*see* United Kingdom), the "second line" being the Regular and Auxiliary troops of the British Army (*see* United Kingdom). Questions

affecting general strategy are considered and determined by the Defence Committee, which secures co-ordination between the sea and land forces of the Empire.

Imperial Defence Committee.

*President*, The Prime Minister of the United Kingdom.

*Members*, The Secretary of State for War, the First Lord of the Admiralty the Secretaries of State for Foreign Affairs, Colonies, and India, the Chancellor of the Exchequer, the Chief of the Imperial General Staff, the First Sea Lord of the Admiralty, the Director of Military Operations, the Director of Naval Intelligence. Naval and Military Officers of experience and Ministers of the Dominions also attend by invitation.

*Secretary of the Imperial Defence Committee*, Lt.-Col. Sir M. P. A. Hankey, K.C.B.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. University Colleges and Universities have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at various colleges of Oxford University. These *Rhodes Scholarships* are tenable for three years, are of the annual value of £300, and are open to scholars of each Province of Canada, of each State of Australia, of New Zealand, Newfoundland, Natal, Cape of Good Hope (6), Jamaica, and Bermuda. Each State of the U.S.A. has a similar nomination, and 23 scholarships, each of £250, were formerly in the nomination of the German Emperor, but this provision has since been rescinded by an Act of Parliament.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. The tariff of the United Kingdom is imposed without distinction on foreign and Imperial merchandise. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need.

PRODUCTION.—In 1913 the wheat crop of the world was about 452,200,000 quarters, of which 83,750,000 quarters were produced in the British Empire. India, Canada, Australia, and the United Kingdom are the principal wheat-producing units. Barley, oats and maize, and tea, coffee, sugar, and rubber are largely cultivated. Australia and New Zealand are the greatest wool producing countries of the world, and the output of coal in the United Kingdom exceeds that of every country except the U.S. Cotton is extensively grown in India and Egypt, and its cultivation is increasing elsewhere. Iron ore is found in many of the Dominions, and pig iron is largely produced, tin is produced mainly within the Empire, while more than half the world's supply of gold is drawn from South Africa and Australasia. Precious stones are found in various parts of the Empire, South Africa producing the principal supply of diamonds, and India rubies and emeralds.

EXTERNAL TRADE.—The Imports of all Nations may be valued at £3,300,000,000 to £3,750,000,000, and their Exports at £3,000,000,000, to £3,400,000,000, the difference in the totals being made up by the value of services rendered in transport and insurance. The total trade of the British Empire in 1913 was valued at £2,108,686,000 (Imports £1,284,436,000, Exports £824,250,000), of which 73·8 per cent. was Foreign and 26·2 per cent. Inter Imperial. The United Kingdom (total value £1,403,555,000), India (£297,224,000), Canada (£233,200,000), Australia (£136,274,000), New Zealand (£45,275,000), and South Africa (£102,000,000) are the principal trading units of the Empire.

SHIPPING.—On June 30, 1913, there were 21,383 vessels (over 100 tons) flying the British flag, of which total 9,285 were registered in the United Kingdom and 2,028 in other parts of the Empire. These figures include 10,228 steam vessels of 20,830,928 tons (U.K., 8,675 vessels of 19,235,705 tons, Dominions, 1,543 vessels of 1,595,213 tons) and 1,735 sailing vessels of 443,150 tons (U.K., 610 vessels of 305,663 tons, Dominions, 925 vessels of 137,487 tons).

TOWNS.—*Capital*, London (England). Population (1911), 4,522,961 (with suburbs, 7,256,963).

At the Census of 1911 there were 94 towns in the British Empire exceeding 100,000 inhabitants, of which 39 were in the United Kingdom (England 41, Wales 2, Scotland 4, Ireland 2), 29 India, 4 Canada, 4 Australia, 2 Egypt, and 1 each in New Zealand, South Africa, Ceylon, Hong Kong, and Straits Settlements.

## THE FRANCHISE.

The following table shows the number of Electors in the three Kingdoms, classified according to their respective qualifications. It will be seen that about one-sixth of the whole population, or about one-third of the male population, are in possession of the franchise.

| Division | Electors for Counties. | | | Electors for Boroughs. | | | University Electors. | Total Electors (1913) | Population, July, 1914. |
|---|---|---|---|---|---|---|---|---|---|
| | Owners. | Occupiers. | Lodgers. | Occupiers. | Lodgers. | Freemen, Freeholders, &c. | | | |
| England & Wales | 568,306 | 3,263,643 | 141,890 | 2,548,264 | 205,731 | 22,198 | 21,303 | 6,771,264 | 37,302,583 |
| Scotland | 65,098 | 392,141 | 47,472 | 283,878 | 39,530 | 20,000 | 685,009 | 4,749,167 | |
| Ireland | 10,686 | 598,875 | 5,720 | 125,090 | 2,885 | 2,885 | 4,138 | 700,473 | 4,381,258 |
| Grand Total | 644,120 | 4,253,359 | 195,082 | 2,949,132 | 249,674 | 24,972 | 31,471 | 8,220,848 | 46,432,248 |

## AREA, POPULATION, AND TRADE OF THE IMPERIAL DOMINIONS.

affecting general strategy are considered and determined by the Defence Committee, which secures co-ordination between the sea and land forces of the Empire.

Imperial Defence Committee.

*President*, The Prime Minister of the United Kingdom.

*Members*, The Secretary of State for War, the First Lord of the Admiralty, the Secretaries of State for Foreign Affairs, Colonies, and India, the Chancellor of the Exchequer, the Chief of the Imperial General Staff, the First Sea Lord of the Admiralty, the Director of Military Operations, the Director of Naval Intelligence. Naval and Military Officers of experience and Ministers of the Dominions also attend by invitation

*Secretary of the Imperial Defence Committee*, Lt.-Col. Sir M. P. A. Hankey, K.C.B.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. University Colleges and Universities have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at various colleges of Oxford University. These *Rhodes Scholarships* are tenable for three years, are of the annual value of £300, and are open to scholars of each Province of Canada, of each State of Australia, of New Zealand, Newfoundland, Natal, Cape of Good Hope (4), Jamaica, and Bermuda. Each State of the U.S.A. has a similar nomination, and 29 scholarships, each of £240, were formerly in the nomination of the German Emperor, but this provision has since been rescinded by an Act of Parliament.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. The tariff of the United Kingdom is imposed without distinction on foreign and Imperial merchandise. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need.

PRODUCTION.—In 1913 the wheat crop of the world was about 4,324,000,000 quarters, of which 853,750,000 quarters were produced in the British Empire. India, Canada, Australia, and the United Kingdom are the principal wheat-producing units. Barley, oats and maize, and tea, coffee, sugar, and rubber are largely cultivated. Australia and New Zealand are the greatest wool producing countries of the world, and the output of coal in the United Kingdom exceeds that of every country except the U.S. Cotton is extensively grown in India and Egypt, and its cultivation is increasing elsewhere. Iron ore is found in many of the Dominions, and pig iron is largely produced, tin is produced mainly within the Empire, while more than half the world's supply of gold is drawn from South Africa and Australasia. Precious stones are found in various parts of the Empire, South Africa producing the principal supply of diamonds, and India rubies and emeralds.

EXTERNAL TRADE.—The Imports of all Nations may be valued at £5,520,000,000 to £5,750,000,000, and their Exports at £3,000,000,000, to £3,400,000,000, the difference in the totals being made up by the value of services rendered in transport and insurance. The total trade of the British Empire in 1913 was valued at £2,168,686,000 (Imports £1,168,436,000, Exports £943,250,000), of which 73·8 per cent. was Foreign and 26·2 per cent. Inter Imperial. The United Kingdom (total value £1,403,556,000), India (£307,205,000), Canada (£233,000,000), Australia (£198,273,000), New Zealand (£68,775,000), and South Africa (£103,000,000) are the principal trading units of the Empire.

SHIPPING.—On June 30, 1914, there were 11,283 vessels (over 100 tons) flying the British flag, of which total 9,285 were registered in the United Kingdom and 2,068 in other parts of the Empire. These figures include 10,228 steam vessels of 20,830,938 tons (U.K., 8,675 vessels of 19,435,705 tons, Dominions, 1,543 vessels of 1,395,213 tons) and 1,135 sailing vessels of 443,130 tons (U.K., 610 vessels of 305,667 tons Dominions, 525 vessels of 137,487 tons).

TOWNS.—*Capital*, London (England). Population (1911), 4,521,961 (with suburbs, 7,252,962).

At the Census of 1911 there were 94 towns in the British Empire exceeding 100,000 inhabitants, of which 50 were in the United Kingdom (England 41, Wales 3, Scotland 4, Ireland 2), 29 India, 4 Canada, 4 Australia, 2 Egypt, and 1 each in New Zealand, South Africa, Ceylon, Hong Kong, and Straits Settlements.

## THE FRANCHISE.

The following table shows the number of Electors in the three Kingdoms, classified according to their respective qualifications. It will be seen that about one-sixth of the whole population, or about one-third of the male population, are in possession of the franchise.

| Division. | Electors for Counties. | | | Electors for Boroughs. | | | University Electors. | Total Electors (1913) | Population, July, 1914. |
|---|---|---|---|---|---|---|---|---|---|
| | Owners. | Occupiers. | Lodgers. | Occupiers. | Lodgers. | Freemen, Freeholders, &c. | | | |
| England & Wales | 568,328 | 3,269,643 | 241,859 | 2,548,284 | 205,752 | 22,298 | 21,393 | 6,777,564 | 37,302,983 |

## THE BRITISH ISLES.

THE British Isles, including the United Kingdom of Great Britain and Ireland, the Isle of Man and the Channel Islands, lie between the 48th and 61st degrees of N latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 77,683,084 acres, or 121,377 sq miles, with a population in July 1914 of 46,431,548. In 1915 there were 1,024,378 births (22·2 per 1,000), 730,035 deaths (15·6 per 1,000), and 421,311 marriages (18·3 per 1,000) in the United Kingdom In 1915 the Police numbered 72,624. The number of Immigrants was 73,468, and of Emigrants 104,919, in 1915. The number of Paupers and Dependents in Jan. 1916 was 847,503, and 6,994 Criminals were convicted in 1915. There were in 1915 65,986 registered Joint-Stock Companies trading in the United Kingdom, the paid-up capital amounting to £2,657,406,964. There were also 1,514 Building Societies, with a share capital of £45,305,824 and £59,698,316 outstanding on mortgage securities, and 2,525 Industrial and Provident (Co-operative) Societies, with 3,221,068 members and a share capital of £44,259,302. In 1915 there were 18,191 applications for Patents, of which 11,457 were sealed, and 17,390 Designs and 3,241 Trade Marks were registered. There were 2,684 cases of Insolvency in 1915. In 1915 shipping to the extent of 53,355,901 tons entered and 51,142,310 tons cleared at various ports of the United Kingdom, while in 1914 sailing (115) and steam (110) vessels numbering 225, exclusive of losses by enemy action, were totally lost, their tonnage being 106,441, and 1,778 lives, including 1,011 on the *Empress of Ireland*, were lost. Of the total area, 46,675,487 acres were under cultivation in 1915, 8,505,066 acres being under corn crops, 3,876,352 under green crops, 33,791,093 other crops, grass, permanent pasture, &c. The live stock included 1,711,658 horses, 12,171,452 cattle, 28,275,970 sheep, and 3,795,131 pigs; 2,335,091 acres of wheat, 1,524,316 acres of barley and bere, and 4,182,296 acres of oats were grown in the United Kingdom, while 88,667,900 cwt. of wheat and 10,482,170 cwt. of wheatmeal and flour were imported in 1915

UNITED KINGDOM BIRTHS, MARRIAGES, AND DEATHS, 1908–1915.

| 1915 | 129,490 | 17,537 | — | 147,027 | 1915 | 30,434 | 17,763 | 24,907 | 12,890 | 104,994 |

## CENSUS POPULATION OF THE BRITISH ISLES.

Previous to 1801 there existed no official return of the population of either England or Scotland nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate framed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

| | | | |
|---|---|---|---|
| 1570. | 4,160,221 | 1670. | 5,773,646 |
| 1600. | 4,811,718 | 1700. | 5,045,008 |
| 1630. | 5,600,517 | 1730. | 6,517,035 |

The first general Census of the United Kingdom was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results

| | | | |
|---|---|---|---|
| 1801 | 16,345,646 | 1861 | 29,321,288 |
| 1811 | 18,309,116 | 1871 | 31,845,379 |
| 1821 | 21,272,187 | 1881 | 35,241,482 |
| 1831 | 24,391,485 | 1891 | 38,104,971 |
| 1841 | 27,076,450 | 1901 | 41,576,817 |
| 1851 | 27,724,036 | 1911 | 45,370,1371 |

* The population of the United Kingdom, a month before the outbreak of war, was officially estimated at 46,089,849. The number of persons to the square mile was in 1911: England, 618 6, Scotland, 156 5 Ireland, 138 6.

POPULATION ENUMERATED AT EACH DECENNIAL CENSUS IN ENGLAND AND WALES AND SCOTLAND, 1801 1911, IRELAND, 1821-1911, AND ISLANDS IN THE BRITISH SEAS, 1831-1911.†

| | Population. | | | Increase. | | Families. | | Inhabited Houses. | |
|---|---|---|---|---|---|---|---|---|---|
| England and Wales. | Males. | Females. | Total. | Decennial. | Per Cent. | Number | Persons in each. | Number. | Persons to each. |

COAL EXPORT DUTY.—A duty was charged upon exported coal during the financial years 1901-2 to 1906-7, the amounts derived therefrom being as follows:—

| | | | |
|---|---|---|---|
| 1901-2 ..... | £2,321,708 | 1904-5 ..... | £2,230,774 |
| 1902-3 ..... | 2,290,769 | 1905-6 ..... | 2,178,872 |
| 1903-4 ..... | 2,251,893 | 1906-7 ..... | 1,994,777 |

CORN AND GRAIN IMPORT DUTY.—A duty was charged upon imported corn and grain in the financial year 1902-3, and was repealed in 1903-4. The following amounts were raised:—

| | | | |
|---|---|---|---|
| 1902-3 ..... | £2,168,736 | 1903-4 ..... | £104,488 |

MOTOR SPIRIT DUTY, imposed in 1901-02, produced £200,680 in 1901-02, £300,596 in 1902-03, £1,000,000 in 1903-04, £1,000,000 in 1904-05, £1,000,000 in 1905-06, £1,000,000 in 1906-07.

## GOVERNMENT

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), the *Habeas Corpus Act* (1679), the *Act of Settlement* (1701), the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), and the *Parliament Act* (1911). The first secured annual parliaments and the equal administration of justice, the second established the liberty of the person, the third provided for the *Protestant succession* to the throne, the fourth and fifth created the United Kingdom and the last enabled the Commons to pass certain Acts without the adherence of the other Chamber. The constituent parts of the British Constitution may be thus briefly described

1. *The Sovereign.*—The throne is hereditary in the English house of Saxe-Coburg-Gotha with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto *Bills passed by both Houses of Parliament*, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress. While, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General (*Dyson v. Attorney-General* [1911], 27 T.L.R. 143).

2. *The Legislature.*—Parliament consists of two Houses, the House of Lords and the House of Commons. (a) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops, Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

While the House of Lords was formerly entitled to alter or reject any Bill passed by the House of Commons, these powers are much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the *House of Lords* within a month of its being sent up, it becomes law upon the Royal assent being signified, without the consent of the Upper House. The Speaker of the Commons decides what is a Money Bill within the meaning of sect. 1 (2) of the Act. As for a Public Bill other than a Money Bill, such a measure will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act.

(b) *The House of Commons.*—This body consists of 670 members, elected by the registered male electors in county, borough, and university constituencies. Roughly speaking, about one-sixth of the population are electors. The maximum duration of Parliament is five years. Members of the House of Commons, since 1906, receive annually salaries of £400.

(3) *The Executive.*—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The *Cabinet*, or Inner Council, under the presidency of the Prime Minister, consists of Ministers, drawn from the *ranks of the party in power and appointed by* the Sovereign on the advice of the Prime Minister. The Cabinet has no corporate existence. The *Ministry* includes a number of minor posts, whose occupants have no seat in the Cabinet. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office *during the Sovereign's pleasure*, they may be dismissed at any moment.

*The Judicature.*—(a) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. The High Court comprises the King's Bench, Chancery and Probate, Divorce and Admiralty Divisions. Two Courts of Appeal hear appeals from those divisions, the ultimate Court of *Appeal from all the courts in the United Kingdom* being the House of Lords. Civil cases arising in London and Middlesex are tried at the Royal Courts of Justice, but civil cases arising in the country are tried on circuit by judges of the King's Bench. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, *e.g.*, the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court, while in the provinces the County Courts have jurisdiction in bankruptcy.

With regard to criminal law in England, it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction are (1) The judges of the High Court sitting at Assizes for the trial of cases in the provinces, and in London at the Central Criminal Court for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions in respect of cases arising within their districts. (3) Courts of Petty Sessions, consisting of *at least two justices of the peace or* a stipendiary magistrate. These courts hear and decide *minor offences*, and have *power to* commit offenders to take their trial in more serious cases. (4) *Court of Criminal Appeal.* This Court, which was established by an Act passed in 1907, has power to hear appeals against convictions and sentences. It will not, however, re-try a case, nor will it upset the verdict of a jury unless it is manifestly unreasonable.

(b) *Scotland.*—Scots civil law, which is *entirely different from that of England*, is administered by the Court of Session, which is a *court* of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and at

a rule it is confined to the trial of serious cases. The Sheriff of each county is the proper criminal judge in all crimes occurring within the county, which merit only an arbitrary punishment. Burgh magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

(c) *Ireland.*—The civil courts in Ireland are very similar to the English courts. In the main the criminal procedure is also similar, except that in Ireland there is no Court of Criminal Appeal, and accused persons are precluded from giving evidence at their trial.

LOCAL GOVERNMENT.—Local Government is carried out under the central control of Local Government Boards. The subjects which local bodies administer, are, *inter alia*, the poor law, the laws relating to public health, the maintenance of the police, the control of the sale of intoxicating liquors, the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and other schools. Scotland and Ireland each have an elaborate system of local government. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chairmen), for each City and County Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, and the Parish Councils with Chairmen. Ireland has elective Boards of Guardians and Councils for Counties, County Boroughs, other Boroughs, and Urban and Rural Councils, the municipalities having Lord Mayors, Mayors or Chairmen.

## DEFENCE.

The *Royal Navy* is recruited by voluntary enlistment, and is administered by the "Commissioners for executing the office of Lord High Admiral of the United Kingdom" (commonly called Lords of the Admiralty) under the control of the King Emperor in Parliament. Many additions to both fleets and personnel have been made since the commencement of the war, but a very proper reticence on the part of the Naval authorities has prevented any fresh knowledge of either being communicated.

The *British Army.* An Act to provide compulsory service received the Royal Assent on 25 May, 1916, when it was stated that, since the commencement of the war, no less than 3,421,000 men had been raised by voluntary enlistment.

## EDUCATION

(*Figures for 1913-14.*)

The Educational System of England and Wales is twofold, being mainly under State and Local control and management, and partly under parental and private arrangements.

### *Elementary.*

Elementary Education is compulsory for all children between 5 and 14 years of age, and is provided free in Public Elementary Schools maintained by Local Authorities and aided by State Grants.

In England and Wales out of the whole number of such children (about 6½ millions) about 6 millions are on the books of such schools, which are 22,477 in number, and staffed by 168,498 adult teachers. Included in the above number there are (in populous districts) special schools for defective children, but no Poor Law schools are now included.

### *Secondary.*

Considerable progress has been and is being made towards a public provision of accessible Secondary Schools affording suitable courses for pupils of about 12-16 (in some cases 18) years of age.

In England and Wales there are 1,148 Secondary Schools regarded as efficient by the Board of Education, and attended by 209,830 pupils and staffed by 10,126 full-time teachers. About two-thirds of the pupils pay fees or hold scholarships, the remainder come from Public Elementary Schools with free places, entering on about 12 years of age as a rule. Of Secondary Schools 1,057 receive State grants, about 230 are controlled by County or County Borough Authorities; and of the remainder most are endowed, and many are also aided by Local Authorities.

### *Continuation and Technical.*

(*Figures mostly for 1912-13.*)

Technical Education in England and Wales is provided in Evening and similar schools (mostly controlled by Local Authorities), 6,876 in number, and attended by 796,882 students on whom State grants are paid, and of whom nearly one-half are under 17 years of age. The average attendance of a student is about 32 hours per annum. There are also Teachers' Courses (178), University Tutorial Classes (121), Technical Institution Courses (82), with 1,303 grant-earning students, and last, but not least, Day Technical Classes (283), held in 213 Institutions, with 22,636 students on whom State grants are paid, and also 208 Schools of Art. 37 Junior Technical and 5 Nautical Training Schools also are now provided.

*Training* is provided by the State for Elementary School Teachers, of whom about 62 per cent. have been trained in Colleges having nearly 23,000 places. Some progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the purpose.

### *Universities.*

There are 18 Universities in the United Kingdom, of which 10 are in England, 4 in Scotland, 1 in Wales, and 3 in Ireland. These, with dates of foundation, are Oxford (1249), Cambridge (1257), Durham (1832), London (1836), Manchester (1851), Birmingham (1900), Liverpool (1903), Leeds (1904), Sheffield (1905), and Bristol (1909) in England; University of Wales (1893), in Wales; St. Andrews (1411), Glasgow (1450), Aberdeen (1494), and Edinburgh (1582), in Scotland; and Dublin (1591), National (1910), and Belfast (1909), in Ireland.

Besides these 18 Universities there are 4 independent University Colleges providing higher instruction.

Most of these Universities and University Colleges receive State grants in respect of technological and professional work under Board of Education Regulations. The number of students in attendance (upwards of 9,000 in 1913) will probably have fallen by at least 50 per cent. owing to the war. The total number of past and present members of the Universities of Oxford and Cambridge away on active service in 1916 was 20,491. Of these, the casualties numbered 4,227 and the honours and distinctions obtained amounted to nearly 5,500.

## ELEMENTARY EDUCATION STATISTICS, UNITED KINGDOM.

*(Compilation of Statistics suspended during the War.)*

### I.—ENGLAND AND WALES.

| Year ended July 31. | Ordinary Public Elementary Schools. | | | | Evening Schools and Classes. | | |

## FINANCE.

The Revenue and Expenditure of the United Kingdom for the five years ended March 31, 1917, are stated as follows :—

| Year | Revenue | Expenditure. |
|---|---|---|
| 1912–13 | £188,620,000 | £188,620,000 |
| 1913–14 | 198,243,000 | 197,492,708 |
| 1914–15 | 270,332,000 | 1,132,654,000 |
| 1915–16 | 336,767,000 | 1,559,706,000 |
| 1916–17 | 571,428,000 | 2,108,113,000 |

The Accounts for 1916–17 and *Budget Estimates* for 1917–18, on basis of existing taxation, are shown below :—

### Revenue.

| Revenue. | Receipts, 1916–17 | Estimate, 1917–18. |
|---|---|---|
| Customs | £70,561,000 | £64,750,000 |
| Excise | 36,380,000 | 34,890,000 |
| Estate Duties, &c. | 32,238,000 | 29,000,000 |
| Stamps | 7,876,000 | 8,000,000 |
| Land Tax | 640,000 | 650,000 |
| House Duty | 1,940,000 | 1,950,000 |
| Income Tax (including Super Tax) | 201,033,000 | 224,000,000 |
| Excess Profits Duty (including Munitions Levy) | 139,980,000 | 180,000,000 |
| Land Value Duties | 522,000 | 400,000 |
| Total Tax Revenue | £514,109,000 | £543,600,000 |
| Postal Service | 24,350,000 | 24,200,000 |
| Telegraph Service | 3,360,000 | 3,250,000 |
| Telephone Service | 6,400,000 | 6,250,000 |
| Crown Lands | 650,000 | 600,000 |
| Sundry Loans, &c. | 8,098,000 | 7,300,000 |
| Miscellaneous | 16,817,000 | 27,100,000 |
| Total Non Tax Revenue | £59,373,000 | £68,900,000 |
| Total Revenue | £573,482,000 | £612,500,000 |
| Money raised under the War Loan Acts, 1914–16 | 1,531,859,000 | — |
| Ways and Means Advances | 197,630,000 | 958,000 |

### Expenditure.

| Expenditure. | Payments, 1916–17 | Estimate, 1917–18. |
|---|---|---|
| National Debt, Interest, &c. | £ 29,783,000 | £ 27,000,000 |
| National Debt, Interest on War Debt | 127,687,000 | 194,500,000 |
| Payment to Local Taxation | 9,856,000 | 9,700,000 |
| Other Consolidated Fund Services | 1,974,000 | 1,695,000 |
| Army | Nom. incl. | 25,000 |
| Navy | | 27,000 |
| Minis. of Munitions | | 1,000 |
| Old Age Pensions | Est 12,654,000 | 12,200,000 |
| Ministry of Labour Insurance, &c. | „ 7,603,000 | 8,542,000 |
| Education | „ 19,584,000 | 87,387,000 |
| Total Civil Services | 54,113,000 | 62,224,000 |
| Customs, Excise, and Inland Revenue | 4,728,000 | 5,249,000 |
| Post Office Services | 22,454,000 | 25,980,000 |
| Votes of Credit | £1,972,885,000 | 1,975,000,000 |
| Total Expenditure | 2,193,113,000 | 2,290,381,000 |
| Expenditure against Capital | 638,000 | 958,000 |

### Final Balance-Sheet, 1917–18.

*Estimated Revenue, 1917–18.*

| | |
|---|---|
| Customs | £64,750,000 |
| *Add* Prop. additional taxation | 6,000,000 |
| | £70,750,000 |
| Excise | 34,890,000 |
| *Add* Prop. additional taxation | 100,000 |
| | £34,990,000 |
| Estate Duties, &c. | 29,000,000 |
| Stamps | 8,000,000 |
| Land Tax | 650,000 |
| House Duty | 1,950,000 |
| Income-Tax (including Super-Tax) | 224,000,000 |
| Excess Profits Duty (including Munitions Levy) | 180,000,000 |
| *Add* Prop. additional taxation | 20,000,000 |

| Sundry Loans, &c. | 7,300,000 |
| Miscellaneous | 27,100,000 |
| Total Non Tax Revenue | 68,900,000 |
| Total Revenue | 638,600,000 |
| Deficit | 1,651,781,000 |
| | £2,290,381,000 |
| Revenue (Borrowed) | 958,000 |

*Estimated Expenditure, 1917–18.*

| | |
|---|---|
| National Debt, Inside Fixed Debt Charge | £17,000,000 |
| National Debt, Outside Fixed Debt Charge | 194,500,000 |
| | £211,500,000 |
| Payment to Local Taxation | 9,700,000 |
| Other Consolidated Fund Services | 1,695,000 |
| Total Consol. Fd. Services | £222,895,000 |
| Army | 25,000 |
| Navy | 27,000 |
| Ministry of Munitions | 1,000 |
| Old Age Pensions | £12,200,000 |
| Ministry of Labour, Insurance, &c. | 8,542,000 |
| Education and other Civil Services | 40,482,000 |
| | 61,224,000 |
| Customs, Excise, and Inland Rev | 5,249,000 |
| Post Office Services | 25,980,000 |
| Total Supply Services | £92,453,000 |
| Votes of Credit | 1,975,000,000 |
| Total Expenditure | £2,290,381,000 |
| Expenditure against Capital | 958,000 |

## PRODUCTION AND INDUSTRY

*Occupations.*—In 1911 the total number of occupied persons in the United Kingdom was 18,368,300 (12,134,259 males and 3,234,041 females). Of this total the largest percentage, or 22·86, were employed in agriculture, 11·39 in commerce, 8·2 in conveyance, 5·6 in mines and quarries, 7·89 in metals and machinery, 6·77 in building and construction, 6·92 in textile fabrics, and 7·23 in dress.

*Trade Unions.*—On Jan. 1, 1913, there were 2,123 Trade Unions, with a total membership of 4,232,883, while the 100 largest Trade Unions (1,816,926 members) had an income of £4,436,734 and invested funds at December 31, 1911, of £8,870,630.

### Agriculture.

The revised statements of areas and production under crops and number of live stock on agricultural holdings, as returned in 1913, enable the following summary for the U.K. to be compiled. The Channel Islands and the Isle of Man are not included

| Crops. | Production | Acreage. |
|---|---|---|
| | Tons. | |
| Wheat | 2,048,200 | 2,333,354 |
| Barley | 2,112,200 | 1,522,646 |
| Oats | 3,148,000 | 4,189,274 |
| Beans | 272,000 | 284,069 |
| Peas | 69,000 | 98,572 |
| Potatoes | 7,540,000 | 1,802,859 |
| Turnips and Swedes | 24,431,000 | 1,625,066 |
| Mangold | 9,696,000 | 497,740 |
| Hay (all kinds) | 12,449,000 | 9,230,325 |
| Hops | 13,000 | 34,744 |

### Live Stock.

| Description. | 1913. | 1914. | 1915. |
|---|---|---|---|
| Horses | 2,894,264 | 2,891,048 | 2,722,858 |
| Cattle | 12,263,600 | 12,284,308 | 12,172,452 |
| Sheep | 27,629,208 | 27,563,477 | 26,275,670 |
| Pigs | 3,365,772 | 3,252,813 | 3,786,731 |

### Fisheries.

The Fisheries of the United Kingdom employed 102,000 men and boys in 1911, 2,155 steam vessels and 21,827 sailing vessels being used. The total value of the fish landed in 1913 was £10,189,903 (exclusive of salmon), the weight being 8,697,865 cwt.

### Minerals.

The chief metallic minerals produced in the United Kingdom are iron ore, tin, and lead, of which the output and value of the first far exceed the remainder. The following table shows the weight and value of the principal metals won in 1914, the total value being £34,806,548 :—

| Metal. | Tons. | Value. |
|---|---|---|
| | | £ |
| Iron (from U.K. ores) | 4,766,190 | 17,652,697 |
| " (from Foreign Ores) | 4,737,683 | 15,320,804 |
| Tin | 8,056 | 800,547 |
| Lead | 29,878 | 871,677 |
| Zinc | 3,208 | 122,383 |
| Copper | 341 | 29,777 |
| Silver (oz.) | 148,444 | 13,443 |
| Gold (oz.) | 97 | 373 |

The non-metallic minerals include coal (of which the produce of the United Kingdom is second only to that of the United States) and various stones and shale, salt, and oil shale. The output and value of coal produced in the five years 1910–1914 is as follows :—

| Year | Tons. | Value at Pits. |
|---|---|---|
| | | £ |
| 1910 | 271,892,000 | 120,792,000 |
| 1911 | 250,436,000 | 127,922,000 |
| 1912 | 267,430,472 | 145,619,669 |
| 1913 | 268,694,303 | 132,896,853 |
| 1914 | 253,006,082 | 127,830,870 |

1,049,897 persons were employed in the 3,200 coal mines in 1912.

The coal production is mainly in England and Wales, the counties producing over 20,000,000 tons annually being Durham, Yorkshire, Glamorganshire, and Lancashire, and those over 10,000,000 tons annually are Derbyshire, Northumberland, Staffordshire, Monmouthshire, and Nottinghamshire. The most productive county for iron ore is Yorkshire, the next counties being Northamptonshire, Lincolnshire, Cumberland, and Staffordshire.

### Manufactures.

The United Kingdom imports annually (for home consumption) about 2,000,000,000 lb. of cotton and 800,000,000 lb. of wool (in addition to 150,000,000 lb. produced at home), the former principally from the U.S., the latter principally from Australasia and South Africa. Of the Textile Industries cotton is the most important, employing 576,800 hands (219,342 males and 357,078 females) in 1907, the output permitting exports valued at £129,466,536 in 1914 (the imports being £9,272,304). Woollen industries employed 282,192 persons in 1907, the exports being valued at £37,499,884, in 1914 (imports £7,648,404). Flax (linen) industries employed 130,143 persons, the exports being £12,000,000. Hemp and jute, silk, hosiery, and lace are also important. The *Metal Industries* are next in importance, the manufacture of iron and steel permitting exports in 1914 valued at £41,668,000, exclusive of machinery (£32,000,000). *Chemicals and Drugs* (exports, 1914, £19,968,000), *Shipbuilding* (imports, 1914, £7,000,000), Cutlery and Hardware (exports, 1914, £6,512,000), Electrical Goods and Apparatus (£3,000,000), Leather (£4,885,000), Earthenware and Glass (£4,127,000), and Paper (£3,136,000) are also important industries, in addition to Printing and Brewing and Distilling, which are mainly for the home market.

## INTERNAL TRADE.

The aggregate value of the merchandise imported and exported by the United Kingdom exceeds that of any other nation, but the value of the merchandise exported by the U.K. was exceeded in 1913–14 by that exported by the United States. The total value of the trade in the five years 1910–1914 is as under :—

### Merchandise.

| Year. | Imports. | Exports. | Total. |
|---|---|---|---|
| | £ | £ | £ |
| 1910 | 724,630,631 | 525,631,139 | 1,250,261,770 |
| 1911 | 768,134,137 | 634,120,308 | 1,402,254,445 |
| 1912 | 856,833,113 | 525,125,923 | 1,381,959,036 |
| 1913 | 885,899,207 | 489,497,803 | 1,375,397,010 |
| 1914 | 768,208,250 | 629,897,884 | 1,398,106,134 |

## COMMUNICATIONS.

*Railways.*—On Dec. 31, 1914, there were 23,701 miles of railway open for traffic, the capital of the various companies being £1,421,848,000. The total receipts were £139,098,000 and working expenses £88,173,000, leaving net receipts at £50,925,000. The total number of passengers carried (exclusive of season ticket holders) was 1,484,761,000, and the total weight of goods conveyed 368,201,000 tons, as against 390,379,126 in 1913. (The returns for 1915 and 1916 are incomplete.)

*Tramways.*—The total tramway mileage was 2,703 on Dec. 31, 1914. The total receipts were £13,767,877, the working expenses £10,139,956, and the net receipts £3,588,121, the total paid up capital being £76,858,990. During 1914 3,426,473,150 passengers were carried. (The information for 1915 is not available.)

*Roads.*—The maintenance and repair of bridges and main roads is within the jurisdiction of the County Authorities in each Division of the United Kingdom, other roads being maintained by Borough, Urban, Rural, and Parish Councils. The increase of motor traction and the consequent use of highways by other than county or district residents has led to a movement in favour of the nationalisation of the highways, and a *Development and Road Improvement Fund* (the latter derived from duty on motor spirit and from carriage licences) has been formed for the creation and improvement of highways. On March 31, 1916, this fund amounted to £694,395.

*Posts and Telegraphs.*—In the year ending March 31, 1915, 3,409,000,000 letters (74 per head of the population) were delivered in the United Kingdom, in addition to 880,000,000 post-cards, and 1,302,000,000 halfpenny packets. There were in 1914–15, 87,000 miles of telegraph and telephone lines (3,271,867 miles of wire), transmitting 82,798,000 inland and 14,580,000 foreign messages, and 796,347 telephones, giving 40,699,877 trunk calls in 1914–15.

*Navigation.*—In 1915 there were 4,673 miles of canals, carrying 43,161 gay tons of merchandise, the revenue being £2,880,720 and expenditure £1,832,213. Of the total mileage 1,383 miles were owned or controlled by railway companies. The total paid-up capital was £47,550,768. The *Manchester Ship Canal*, opened in 1894, has a total length of 36 miles and connects Manchester with the Mersey port of Liverpool.

*Shipping.*—In 1914 the mercantile marine of the United Kingdom consisted of 12,802 steamers (20,122,240 gross tons) and 8,223 sailing vessels (864,679 gross tons), a total of 21,025 vessels (20,986,819 tons). In 1914 282 sailing vessels (28,107 net tons) and 898 steam vessels (1,008,064 net tons) were built in the United Kingdom. In 1915 there were 286,802 seamen employed in British vessels (exclusive of vessels employed on rivers and inland navigation, but inclusive of fishing vessels), of this total, 208,698 were British, 32,960 foreigners, and 47,211 were Lascars and Asiatics. Germans (4,000), Swedes (3,600), Norwegians (8,130), and Russians (2,000) were the most numerous of the foreign nationalities. The total tonnage of British and Foreign shipping entered and cleared at the various ports of the United Kingdom in 1915 (exclusive of vessels engaged in coasting trade or in connexion with the war) is shown below —

## U.K. COTTON IMPORTS, 1908-1913.

| Year | Total Imports. (1,000 lb.) | From U.S. (1,000 lb.) | From Egypt. (1,000 lb.) | From India. (1,000 lb.) |
|---|---|---|---|---|
| 1908 | 2,060,627 | 1,568,503 | 249,910 | 70,373 |
| 1909 | 2,188,761 | 1,640,485 | 411,344 | 75,770 |
| 1910 | 1,972,741 | 1,470,129 | 389,441 | 108,041 |
| 1911 | 2,207,088 | 1,682,369 | 364,942 | 79,373 |
| 1912 | 2,805,817 | 2,164,872 | 492,284 | 98,824 |
| 1913 | 2,791,200 | 2,384,667 | 402,669 | 50,324 |
| 1914 | 1,884,133 | 1,484,434 | 236,102 | 104,290 |
| 1915 | 2,647,628 | 2,202,385 | 448,490 | 93,982 |

The total imports in 1913 amounted to 26,496,261 centals of 100 lb., of which 20,806,967 centals were from Foreign Countries, and 5,689,294 centals from British Dominions. Of the total imports 23,039,781 centals were retained for home consumption and 3,456,480 centals were re-exported. The sources of the British cotton supply in 1913 were the U.S., 20,203,899 centals, Egypt, 4,484,208 centals, Indian Empire, 998,608 centals, Peru, 384,120, Brazil, 86,792, British East Africa, 120,453, British West Africa, 20,891, British West Indies, 20,243, and Chile, 4,908 centals. The total value of the raw cotton imported in 1913 was £64,871,823.

## STREET ACCIDENTS IN U.K., 1916.

In addition to the accidents on the various railways of the U.K. there were no fewer than 54,978 accidents caused by vehicles on streets and roads in 1916. Of this number 2,837 were fatal and 52,141 non-fatal, compared with 3,024 fatal and 60,189 non-fatal accidents in 1913.

| Cause. | Fatal. | Non-fatal. |
|---|---|---|
| Electric tramcars .. | 353 | 9,135 |
| Horse-drawn Vehicles .. | 894 | 19,925 |

| 1914-15 | 168,308,080 | 520,888,404 | 47,369,820 | 80,298,073 | 814,844,304 | 20* | 2,169,694 |

* The rates of the tax in force with the Finance Acts will be found on p. 49.

## OLD AGE PENSIONS.

*By the Old Age Pensions Act, 1908, every man or woman who has attained the age of 70 years,* who has been a British subject and has had his residence in the United Kingdom for 20 years, and whose means do not exceed £31 10s., is entitled to receive a pension of an amount which varies according to his or her means (from 1s. to 5s. a week. The scale is as follows: Where the yearly means of the Pensioner as calculated under the Act do not exceed £21, the rate of pension per week is 5s.; exceed £21, but do not exceed £23 12s. 6d., the rate is 4s. exceed £23 12s. 6d. but do not exceed £26 5s., the rate is 3s., exceed £26 5s., but do not exceed £28 17s. 6d., the rate is 2s., exceed £28 17s. 6d., but do not exceed £31 10s., the rate is 1s., exceed £31 10s., no pension is payable. To meet economic conditions arising from the war, such as high food prices an additional grant not exceeding 2s. 6d. was made to pensioners who proved the necessity, in Sept., 1916. The following table shows the number of Claims received, Pensions payable, revoked, lapsed, &c., during the year ended 31st March, 1918 —

| | England. | Wales (including Monmouth) | Scotland. | Ireland. | Total. |
|---|---|---|---|---|---|

N B.—The figures include casual paupers, and no deductions are made for persons counted twice, such as persons who received indoor and outdoor relief on the days mentioned.

## THE INCOME TAX.

THE old Land Tax was levied on personalty, including Salaries, Pensions, and Profits from the occupation of land, but the beginning of the modern Income Tax dates back to 1799, when, to meet the expenses of the French War, Pitt imposed a tax on Property and Employments. He allowed an abatement for children, a lower rate of tax on incomes below £200, and exempted incomes below £60. At the conclusion of peace in 1802 the tax was abolished, but was revived in 1803, divided into Schedules A, B, C, D and E, as at present, the rate being 1s. in the £, incomes under £60 were exempt, and an abatement was allowed to incomes below £150. In 1806 the exemption limit was lowered to £50 and restricted to Earned Income. On the restoration of peace the Income Tax ceased for 26 years, and was re-imposed by Sir Robert Peel in 1842, when the rate was fixed at 7d. in the £, incomes below £150 were exempted, but no abatement was allowed.

In 1853 *Mr Gladstone extended the tax to* Ireland, and the limit of exemption was lowered to £100, with a lower rate of tax for incomes between £100 and £150. In 1853 the differential rate was abolished, and in lieu thereof an abatement of £60 granted to incomes between £100 and £200. In 1870 the abatement was increased to £80 and extended to incomes of £300. During the Crimean War (1854-1856) the Income Tax stood at 1s. 4d. (its highest point prior to 1914), but in 1857 it was 7d., and in subsequent years was gradually lessened till in 1874 it fell to 2d. in the £, and at the preceding General Election Mr Gladstone proposed to abolish it. In 1876 the exemption limit was again raised to £150, with an abatement of £120 for incomes up to £400. In 1894 exemption was allowed to incomes not exceeding £160, and abatements of £180 and £100 to incomes of £400 and £500 *respectively, and an allowance made under* Schedule A to landlords for repairs. In 1898 the scale of abatements was revised and extended to incomes not exceeding £700. In 1907 a distinction was made between Earned and Unearned Income the rate for the former being fixed at 9d. and for other income 1s., but the relief was restricted to incomes not exceeding £2,000.

Mr Lloyd George further developed the principle of graduation by his famous Finance Act for the year 1909-10, which did not become law till April 29, 1910. The relief for Earned Income was extended to incomes not exceeding £2,000, the allowance to landlords for repairs was increased to one-fourth of the Schedule A value in place of the expenditure, and an allowance for children was made to incomes not exceeding £500. The right to exemption and abatement was *withdrawn from persons residing abroad* (see p. 382), except in regard to Foreign and Colonial Income.

An additional tax (named Super Tax) was imposed on incomes exceeding £5,000. This was fixed at 6d. in the £ on excess income over £5,000.

From 1909 to 1913 the rate of tax had been 1s. 2d. in the £, but in 1914, after the outbreak of war, the tax was increased to 1s. 6d., but important modifications were introduced. The limit of relief for Earned Income was lowered to £2,500, the rates were graduated according to the total income, and in addition a rebate was granted to Unearned incomes not exceeding £500. This year the Super-Tax was extended to incomes exceeding £3,000, the tax being graduated and an abatement of £2,500 allowed. The restriction as to the amount to be allowed under Schedule A for landlords' repairs was removed. In 1915 the Income Tax was raised to 3s., the Super Tax rates increased (see p. 382), and the assessment under *Schedule B for farm* profits raised from one-third of the rental to the full annual value. At the same time the exemption was lowered to £130, and the scale of abatements revised (see p. 382), provision being made for the assessment of weekly wage-earners on their actual receipts for each quarter.

The Finance Act, 1916, raised the Income Tax to 3s., extended the rebate on Unearned Income to incomes not exceeding £2,000 (see p. 382), and in addition granted relief for Colonial Income Tax. This relief, however, is restricted to 1s. 6d. in the £, and only benefits incomes exceeding £1,000.

By the Finance (No. 2) Act, 1915, Mr McKenna imposed a new tax called the Excess Profits Duty (see p. 399). This was fixed at 50 per cent. for the first year, and the Finance Act, 1916, increased the rate to 60 per cent. for the *subsequent period up to* Dec. 31, 1916. From Jan. 1, 1917 the duty is 80 per cent. The Finance Act, 1917, makes no change in the rates of tax, but extends the children's allowance to incomes not exceeding £700 (see p. 382), and in order to work the principle of graduation fairly it provides that incomes exceeding the limit by a small margin may get the benefit of the lower scale. In addition, during the war, various concessions are made to taxpayers suffering a loss of income. In 1914 the Income Tax yielded £35,000,000, or £100,000 for each 1d. In 1915 it yielded £72,000,000, or considerably over £100,000 for each 1d. (see p. 497). In its first year (1916) the Super-Tax receipts were less than £3,000,000 from 21,300 persons, and in 1917 they were £17,000,000 from 44,000 persons. In 1916-17 the persons returned an income exceeding £100,000. The Excess Profits Duty up to March 31, 1917, yielded £140,000,000.

## THE DEBT OF THE UNITED KINGDOM. (No later figures available.)

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £2,600,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £36,000,000, part of which was paid off in the time of George I. In the reign of George II. about £37,000,000 were added, but the first twelve years of George III. saw £20,000,000 of this paid off. The American War added £120,000,000, making the total nearly £200,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £620,900,343 were added to the debt for the purposes of the war, the following amounts being raised:—

| Year. | £ | Year. | £ | Year | £ |
|---|---|---|---|---|---|
| 1793... | 4,877,998 | 1801 | 27,396,272 | 1809... | 12,056,375 |
| 1794... | 6,998,389 | 1802 | 14,458,234 | 1810. | 7,790,444 |
| 1795... | 30,464,891 | 1803. | 8,758,765 | 1811. | 19,143,963 |
| 1796... | 22,244,480 | 1804. | 14,990,763 | 1812. | 24,790,697 |
| 1797. | 30,366,873 | 1805. | 16,649,801 | 1813 | 39,649,280 |
| 1798... | 26,856,303 | 1806. | 13,035,344 | 1814. | 34,563,603 |
| 1799. | 41,714,863 | 1807. | 10,432,934 | 1815. | 20,241,607 |
| 1800. | 25,050,320 | 1808. | 12,035,244 | 1816... | 314,050 |

The amount of the Debt in January, 1816, was £900,436,000 (Funded, £826,312,000, Unfunded, £44,707,000, Annuities, £29,327,000), the annual charge being nearly £32,000,000, but the following amounts were paid off from 1817–1837:—

| Year | £ | Year | £ | Year | £ |
|---|---|---|---|---|---|
| 1817... | 1,826,824 | 1820. | 2,960,984 | 1827 | 2,023,228 |
| 1818. | 1,624,666 | 1823. | 5,261,785 | 1828. | 4,667,569 |
| 1819. | 3,163,130 | 1824. | 7,456,359 | 1829... | 2,760,003 |
| 1820. | 1,928,229 | 1825. | 9,600,794 | 1830... | 1,935,465 |
| 1821. | 4,204,457 | 1826... | 1,195,531 | 1831 .. | 2,673,898 |

| Year. | £ | Year | £ | Year | £ |
|---|---|---|---|---|---|
| 1832... | 1,496 | 1834... | 1,776,398 | 1836... | 1,220,597 |
| 1833... | 1,203,784 | 1835... | 1,070,230 | 1837... | 1,185,869 |

At the accession of Queen Victoria the amount stood at nearly £788,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837–1854, when the Russian War added £32,000,000 to the Debt. Repayments were made from 1858 onwards, with slight increases in 1868, 1875, 1878, 1879 and 1888, the following being the actual amounts paid off:—

| Year | £ | Year | £ | Year | £ |
|---|---|---|---|---|---|
| 1858. | 2,971,797 | 1870 | 3,443,023 | 1886. | *Nil.* |
| 1859. | 58,442 | 1871. | 5,830,300 | 1887 | 5,993,793 |
| 1860... | 2,988,254 | 1874 - | 15,022,807 | 1888... | 30,703,815 |
| 1861. | 381,892 | 1875 - | *Nil.* | 1889... | 7,408,822 |
| 1862... | 1,158,372 | 1876 | 7,994,138 | 1890... | 8,696,332 |
| 1863 | 968,099 | 1877 - | 1,106,831 | 1891... | 4,909,820 |
| 1864. | 9,236,915 | 1878... | *Nil.* | 1892... | 1,420,352 |
| 1865. | 4,554,490 | 1879. | *Nil.* | 1893... | 1,491,203 |
| 1866. | 2,789,090 | 1880... | 4,494,395 | 1894... | 4,843,840 |
| 1867... | 1,885,960 | 1881... | 5,350,843 | 1895... | 8,443,417 |
| 1868. | *Nil.* | 1882... | 23,647,738 | 1896... | 7,620,392 |
| 1869... | 1,091,700 | 1883 - | 6,665,422 | 1897... | 7,630,298 |
| 1870... | 4,073,603 | 1884... | 9,850,525 | 1898... | 8,643,376 |
| 1871... | 5,323,406 | 1885... | 6,033,263 | 1899... | 6,873,219 |

On 31 March, 1899, the *gross* total was £625,040,965, being a decrease since 1817 of £153,000,000. For the South African and China wars £116,000,000 were raised, but since 1903 large reductions have been made.

The total gross Debt on 31 March, 1916, was £2,129,838,245, against which must be set the value of the Suez Canal Shares (£4,284,882), other assets (£3,428,851), and Exchequer balances (£93,575,006), a total of £53,873,877, leaving the *net* amount of the Debt at £2,075,964,368.

### STATEMENT OF THE DEBT OF THE UNITED KINGDOM, 1893–1916.

| Year | Dead weight Debt. | Old Sinking Fund and Exchequer Balances. | Gross amount Redeemed. | Debt Created. | | Net increase + or Decrease − | Year ended 31 Mar | Average Price of £100 Stock. | Yield at Mean Price. |

[1] The rate of interest on Consols was reduced from £3 per centum per annum to £2 10s. od. per centum in March, 1888; and from £2 10s. od. per centum to £2 5s. od. per centum in April, 1889.

[2] The average price in 1914, in the end of July was £74 3s. 4d. and the yield £3 0s. 6d.

[3] Excludes £170,112,203 funded under Section 1 (3) of the War Loan Act, 1914.

[4] Includes £277,251,899 cancelled under Section 1 (3) of the War Loan Act, 1914, and £200,901,429 cancelled on conversion into 4½ per cent. War Loan under Section 1 (2) of that Act, of which £18,000,000 was subsequently re-converted into Treasury Bonds.

[5] Includes £1,250,000,000 at 5 per cent. War Loan created in respect of conversions under the War Loan Act, 1915, of which £80,000,000 was in exchange for Bonds cancelled on account of Russian Bonds.

The Debt is of three descriptions —I. Funded (*a*) *Permanent*, (*β*) *Terminable*, II. Unfunded, III. Certain other Liabilities. The Funded and Unfunded (*or Floating*) Debts are included in the fixed annual charge, and details of the various descriptions are given below —

### I. Funded Debt —(*a*) *Permanent.*

That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on March 31, 1916 —

| | 1914. | 1916. |
|---|---|---|
| 2½ per cent. *Consols* | £336,036,659 | £280,466,338 |
| 2½ per cent. *Consols* | 3,765,183 | 2,708,677 |
| 2½ per cent. (26 Vict.) | 29,812,408 | 21 639,392 |
| *Bank of England Debt* | 11,015,100 | 11,015,100 |
| Bank of Ireland do. .. | 2,630 769 | 2,630,769 |
| | £383,250,056 | £328,460,276 |

### (*β*) *Terminable Annuities.*

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off year by year, and after a certain time the capitalised sum entirely extinguished, the Treasury giving an Annuity for a certain number of years in exchange for permanent stock.

The following is a list of these terminable annuities with their amount, the dates when they expire, and their capitalised value as on March 31, 1915 —

| | |
|---|---|
| (1) Annuities for Life and Terms of Years (£1,485,965, created 1830–1888) .. .. .. .. | £13,883,100 |
| (2) Annuities created by Finance Act 1899 — | |
| (*a*) Savings Banks Annuities (£745,213 expiring in 1924–1963) .. .. .. | 6,405,206 |
| (*b*) Book Debt Annuities £745,213 expiring in 1924) .. .. .. | 5,870,365 |
| (3) Sinking Fund Annuity (£13,547 created in 1884 and expiring in 1934) .. .. .. | — |
| Total Capital value. | £26 158,671 |

### II. Unfunded Debt

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government is bound to pay off at certain dates, it is represented by certain loans having currency for periods varying from a few months to five or more years.

| | |
|---|---|
| Pre-War Treasury Bills .. .. .. | £14,400,000 |
| Temporary Advances .. .. .. | 19,895,800 |
| Total Unfunded Debt, included in Fixed Annual Charge .. .. | £34,295,800 |
| Unfunded Debt on which interest is excluded from the Permanent or Fixed Annual Charge | |
| 3½ % War Stock and Bonds (repayable 1925–28) .. .. | £62,774,400 |
| 4½ % War Stock and Bonds (repayable 1925–45) .. .. .. | 899,697,072 |
| Exchequer Bonds | |
| 3 % repayable March 1920 | 21,658,700 |
| 5 % " " " | 265,371,198 |
| Treasury Bills .. .. .. .. | 352,306,000 |
| War Saving Certificates .. | £1,387,191 |
| Other Debt under War Loan Act, .. .. .. | 9,216,874 |
| American Loan .. .. | 51,369,857 |
| Total .. .. .. | £1,754,231,496 |

### III. Other Capital Liabilities.

These sums are not included in the capital on which interest is arranged for in the permanent charge They stood as follows on 31 March, 1916 —

| | |
|---|---|
| Under Telegraph Acts, 1892 to 1913 | £14,239,835 |
| " Uganda Railway, 1896 to 1900 | 2,737,009 |
| " Public Offices Act, 1898 .. | 360,623 |
| " (Whitehall Site) Act, 1897 | 399,889 |
| " Royal Niger Company Act, 1899 | 472,983 |
| " Naval Works Acts, 1895–1905 | 14,921,661 |
| " Military Works, 1897 to 1903 | 8,465,297 |
| " Land Registry Buildings, 1900 | 295,480 |
| " Pacific Cable Act, 1901 .. | 2,728,996 |
| " Public Offices Site (Dublin) Act, 1903 .. .. .. | 280,684 |
| " Public Buildings Expenses Act, 1903 .. .. .. | 1,278,373 |
| " Cunard Agreement Act, 1904 | 1,560,000 |
| " Telephone Transfer Act, 1911 | 9,049,386 |
| " Housing Act, 1914 .. | 844,000 |
| Total .. .. | £56,890,621 |

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On 31 March, 1916, these consisted of the following sums —

| | |
|---|---|
| Liability to Suitors (Chancery) .. | £1,836,136 |
| " " Bankrupts Estates .. | 1,124,575 |
| " " Suitors, &c. (Ireland) .. | 628,435 |
| Court of Bankruptcy .. .. | 49,542 |
| Unclaimed Dividends (Bank of England) | 43,813 |
| " South Sea Annuities, &c. " | 39,768 |
| " Dividends (Bank of Ireland) .. | 1,932 |
| " Prize Money .. .. | 2,217 |
| Life Annuities, &c. (Nat. Debt Office) | 20,000 |
| Unclaimed Dividends " | 362,008 |
| Deferred Annuity Fund .. .. | 94,856 |

### COST OF THE DEBT

The Cost of the National Debt for the last two years is detailed below —

| | 1914–1915 | 1915–1916 |
|---|---|---|
| | £ | £ |
| I. Annual Interest— | | |
| Perpetual Annuities | 14,390,861 | 12,534,406 |
| Government Debts | 341,146 | 341,146 |
| Terminable Annuities | 2,932,218 | 2,897,758 |
| Unfunded Debt .... | 1,771,644 | 4,339,772 |
| II. Cost of Management | 168,390 | 174,322 |
| Interest on War Debt, | — | 38,442,857 |
| Expenses under War Loan Acts, 1914 and 1915 .. | — | 1,465,227 |
| Total .. | £20,497,187 | £60,290,488 |

### Sinking Fund.

Large sums are paid off annually by means of (*a*) the New Sinking Fund, which is the balance of the Annual Charge after providing for interest and cost of management; (*b*) the Old Sinking Fund, which is the application of the surplus revenue of any year for the redemption of debt; and (*c*) Terminable Annuities, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable.

# THE KINGDOM OF SCOTLAND.

## His Majesty's Household in Scotland

*Great Steward of Scotland*, H.R.H. the Prince of Wales, K.G. (Duke of Rothesay).

His Majesty's Honourers.

*Hereditary High Constable*, Earl of Erroll, K.T.
*Hereditary Master of Household*, Duke of Argyll.
*Hereditary Standard-Bearer*, H. Scrymgeour Wedderburn.
*Hereditary Armour-Bearer* (claimed by), Sir Douglas Archibald Seaton-Stewart, Bart.

In Scotland the principal local court is the Sheriff Court. The Sheriff is the chief judge, but the judge who usually sits is the Sheriff Substitute. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is practically unlimited, whatever be the money value of the cause. On the criminal side the Court has cognizance of all serious crime, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

The Procurator-Fiscal is peculiarly a Scottish official. Criminal prosecutions are in Scotland conducted by Crown officials at the public expense, the Lord Advocate and his deputies prosecute in the High Court, the Procurators-Fiscal in the Sheriff Court.

# BURGH DIRECTORY OF SCOTLAND.

## ROLL OF THE CONVENTION OF ROYAL BURGHS (203).

POPULATION—Burghal, 2,100,505; Rural, 1,880,400; Scotland, 4,180,905.
VALUATION— " £21,340,277; " £13,096,583; " £34,437,860.

## ROYAL BURGHS (66).

The order of the Royal Burghs on the Convention Roll is the same as in the Scots Parliament *prior to the Union in 1707*

| Counties of Cities and Royal Burghs. | Population. | Rate per 1,000. Births. | Deaths. | Rateable Value. £ | * Lord Provost or Provost. | Town Clerk. |

### THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′–54° 29′ N and long. 4° 18′ – 4° 49′ W., nearly equidistant from England, Scotland, and Ireland. The total land area is 141,267 (see sq miles) acres, with a population (1911) of 52,022. The cultivated area (1919) was 92,109 acres, and the live stock included 5,826 horses, 21,388 cattle, 76,628 sheep, and 3,814 pigs. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1829 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Fifty miles of railway have been constructed, and about 23 miles of electric tram road.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL, Douglas. Pop. (1911), 21, 150 (Castletown is the ancient capital), the other towns are Peel and Ramsey

### THE CHANNEL ISLANDS

situated off the north-west coast of France (at distances of from ten to thirty miles) are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest.

The land under cultivation in 1918 was 49,678 vergées (4¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes (of which, in 1918, the crop amounted to 92,700 tons), valued at £3,268,980), tomatoes, and wheat, all of Guernsey grows crops and oats, fruits and potatoes. There were 2,118 horses, 10,850 cattle, 1,113 sheep, and 1,492 pigs in Jersey; and in Guernsey, &c., 2,104 horses, 7,468 cattle, 289 sheep, and 2,989 pigs in 1919. The famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Courts, and the old Norman dialect is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The climate of these islands is mild, and the soil exceptionally productive. The islands being all but exempt from imperial taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre Port, on the east coast.

| Islands. | Acreage. | Population. 1901. | Population. 1921. |

* The above is abstracted from the 685th "City's Cash Account" of the series extant—i.e. 1916 to 1908. (The Accounts earlier than A.D. 1629 were believed to have been destroyed in the Fire of London 1666 two years' Accounts, 1509, Queen Elizabeth, have been recently discovered among the Corporation Archives, as exemptions to this belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The extract is from the 1916 Annual Printed Account of the Corporation, A.D. 1916 to 1916. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 9th June, 1910, and the 19th December, 1912, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th standing Order of the Court of Common Council. The Accounts are issued in the form prescribed by those Orders, and show the Income and Expenditure applicable to the year on the various Funds.

### London within various Boundaries.

| | Area in Statute Acres. | Population. 1911. | 1916. |
|---|---|---|---|
| Within the Registrar-General's Tables of Mortality | 74,826 | 4,536,267 | 4,521,885 |
| Within the Limits of the County of London | | | |
| City of London within Municipal and Parliamentary Limits | 675 | 26,923 | 19,697 |
| Central Criminal Court District | 668,356 | 6,079,215 | 6,620,032 |
| Metropolitan Police District (not including City) | 442,749 | 6,354,449 | 7,031,701 |
| Metropolitan and City Police Districts | 443,424 | 6,381,372 | 7,051,398 |

*Parliamentary Boundaries.*—In consequence of changes of boundaries under the London Government Act, 1899, the County of London does not now include the whole of certain *Metropolitan* Parliamentary Divisions; on the other hand, it includes portions of certain *Extra-Metropolitan* Parliamentary Divisions.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1915-1917 of £87,311,307, and embraces an area of upwards of 699 square miles. The number of new houses built since 1879 up to and including the year 1916 is 600,059, with 190 in course of erection, the new mileage since 1879 being 1,658.

Hours 9.30 to 5 (Saturday 9.30 to 1).—Meets on Tuesday (fortnightly during the War) at 2.30 p.m.

*The triennial election was due in March, 1916, but was postponed by the Elections and Registration Acts, 1915 and 1916.*

THE London County Council was constituted under the Local Government Act of 1888. London is an *administrative* county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c. and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 19 aldermen, and 118 councillors, together 138, or, if the chairman be also an elected member or alderman, 137. The term of office for aldermen is 6 years and 10 or 9 retire every 3 years. The councillors are elected for 3 years, but the present term of office was extended by one year by the Elections and Registration Act, 1915, and was again extended by the Act of 1916. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multifarious duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken.

The Finance Committee have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £49,187,800 (of which £11,978,790 represents debt incurred for revenue-producing undertakings), and an annual expenditure (in normal times) of about fourteen millions, of which about seven millions are expended on education. The Asylums and Mental Deficiency Committee administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has lunatic asylums with accommodation for over 20,000 patients. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital outlay on the erection of working-class dwellings up to 31st March, 1917, was £3,005,830. It has always been the aim of the Council to make its working-class dwellings self-supporting, and in this, taking all the dwellings as a whole, it has succeeded, the last accounts, for the year 1916-17, showing a total net surplus of £12,000 on a total rent-roll of about £296,000.

The Improvements Committee are responsible for the carrying out of street improvements and the construction and maintenance of bridges (outside the City of London) and tunnels across the river Thames. The largest improvements carried out in recent years are the new streets between Holborn and the Strand, now known as Kingsway and Aldwych, tunnels under the Thames at Rotherhithe and Woolwich, and an extensive improvement at Westminster, including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge.

The metropolitan main drainage system covers about 149 square miles, including certain districts outside the county, and comprises 300 miles of main, storm relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and six sludge vessels. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea. The total capital outlay on main drainage is upwards of £12,700,000.

The Council is the tramway authority for London. On 31st March, 1917, the system extended over 130 street miles, of which 144 miles were electric lines (mostly underground conduit). Practically the whole of this great system is worked by the Council, and through running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on 31st March last, to £13,370,119, and the net debt outstanding to £9,141,828. The report presented to the Council on the results of the year 1916-17 showed gross receipts of £2,492,884, a surplus on working of £734,910, and a net surplus, after payment of interest on capital outlay and providing for repayment of debt, of £11,349, which was transferred to the Renewals Fund. The Renewals Fund amounted to £282,978, and the General Reserve Fund to £72,300. 49,476,273 car miles were run and 276,127,976 passengers were carried during the year.

The Education Committee comprises thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. The Council is responsible for the education of about 540,000 children in elementary schools, and has done much to improve the facilities for higher education and technical education. Much anxious thought is being given to the problem of widening educational facilities of all kinds and the perfecting of a programme to meet the *after-war demands and needs*. The estimates of expenditure on rate account for education for the year 1917-18 amount to £6,492,026, of which £5,433,384 is for elementary and £1,058,642 is for higher education.

Amongst the other powers and duties of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs, the sanctioning of local sewers, controlling the building line, and the naming and numbering of streets, supervising buildings and district surveyors, dangerous structures, cattle diseases, controlling storage of explosive substances and petroleum, infant life protection, gas, gas-meter, and electric-meter testing, testing weights and measures, licensing of slaughter-houses and of cow-houses, supervision of common lodging-houses, the granting of music and dancing licences, public health, historic buildings and monuments, inspection of factories and certain other buildings to secure means of

escape from fire, administration of the Shops Act, the Children Act, the Midwives Act, and the Mental Deficiency Act, licensing and inspection of employment agencies, licensing of premises under the Cinematograph Act, registration of motor cars, collection of duties on dog and establishment and certain other local taxation licences, and registration of War charities. A motor ambulance service has recently been installed, with six stations spread over the county and special facilities for calls by telephone.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock or Bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. Owing to the war, expenditure on capital account has been reduced to very small proportions for the time being, and large sums available from the sinking fund and other sources have been invested in War Loan. An idea of the nature and amount of the expenditure on rate account will be gathered from the statement given below. Some particulars of the revenue-producing undertakings have already been given.

No issues of London County Consolidated Stock has been made by the Council since May, 1909. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure within a period of 60 years. The total Stock now outstanding amounts to £71,862,472, out of total issues of £77,898,012.

The rating for the year 1917–18 amounts to 2s. 11·75d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 4·44d. in the pound, together 3s. 8d., the same rate as for the previous year, but a reduction of 3d. in the pound on the rate of the year 1915–16, effected chiefly by war-time economies. The rate includes 2s. 9d. for education. The assessable value of the County of London on 6th April 1917 was £48,307,322—a 1d. rate over the whole county producing £188,864.

## LONDON FIRE BRIGADE. *Headquarters* 94 Southwark Bridge Road, S.E.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries, though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On 1st January, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On 12th January, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade." The amount expended on the Brigade for the year ended 31st March, 1913, was £62,092 on capital account and £300,672 (including pensions) on maintenance. Towards the latter amount the Treasury and the various insurance companies contributed £49,770, while £4,836 was received from miscellaneous sources.

On 31st March, 1913, the complement of the Brigade consisted of —1 chief officer, 2 divisional officers, 2 assistant divisional officers, and 2,340 officers, firemen, coachmen, and pilots, a technical and clerical staff of 128, and an ambulance service staff of 98. There were the land fire-stations, 6 ambulance stations, 3 river stations, and the appliances included 42 horsed fire-engines, 28 horsed fire-escapes, 73 motor fire-engines, 77 motor fire-escapes, 3 motor hose-tenders, 4 electrically driven turntable long ladders, 22 long ladders, 28 smoke helmets, 20 hose-carts, 4 fire-floats and 4 steam fire-engines on rafts, 4 oil-tank wagons, 23 motor-cars, and 9 motor ambulances. There were 44 horses and 98 miles of hose in use by the Brigade. The fire-alarms distributed over London numbered 1,872. The number of calls to which the Brigade responded during the year ended 31st December, 1912, totalled 2,373, and the fires numbered 3,014, of which 54 were classed as "serious," including calls and fires due to air raids.

PRINCIPAL OFFICERS.

*Chief Officer*, Lieut.-Commdr Sampson Slader, R.N ..... ...(with certain allowances) £1,200
*Divisional Officers*, Sidney G Gamble, C.B., Arthur R. Dyer
*Assistant Divisional Officers*, Major Cyril C. B. Morris, M.C., Commdr H. Spencer, R.N.

## LONDON POLICE.

THE CITY POLICE district comprises an area of 673 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (*see p. 491*). Although the area is comparatively small, the rateable value is enormous, and there are 19,697 night residents.

The Force comprises 1 Assistant Commissioner, 3 Superintendents, 6 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 54 Sergeants, and 1,025 Constables, also 1 Sergeant and 46 Constables on private service duty. The amount required out of City Rates in 1913 was £ 235,250.

THE METROPOLITAN POLICE district embraces an area of 447,626 statute acres, with a population of between seven and eight millions. There are within this area fourteen Police Courts, viz. Bow Street, Clerkenwell, North London, Lambeth, Marlborough Street, Marylebone, Old Street, Thames, Tower Bridge, Westminster, West London, Greenwich and Woolwich, South Western, and West Ham (*see p. 492*).

The Force on Oct. 14, 1913, consisted of 318 Superintendents, 692 Inspectors, 2,004 Sergeants, and 18,311 Constables, making a total of 21,325, with 837 horses.

Dockyard Station for Barracks, Rotunda, &c.

# Laws Relating to Cabs in London.

THE Secretary of State has, by Order dated Oct. 29, 1917, authorised that in addition to the fares specified below there shall be payable the sum of sixpence for every hiring of a motor cab fitted with a taximeter recording the fare by a combination of time and distance, provided that a notice to this effect, in a form approved by the Commissioner of Police, is kept conspicuously displayed inside the cab in such a position as the Commissioner may direct. The Order came into force on Nov 2, 1917, and will remain in force until the termination of the present war.

## HORSE VEHICLES.

FARES BY DISTANCE (Cabs either with or without a Distance Recorder, but without a Taximeter) If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles .. .. .. s. d. 2 0

The driver may notify, by means approved by the Commissioner of Police, that he is willing to accept a fare of 6d. for any journey not exceeding a mile. s. d.

For every additional mile or part of a mile 0 6

If hired *outside* the Four Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile .. .. 2 0

If hired *within*, but discharged *outside* the Four-Mile Circle, whole distance not exceeding one mile, 1s., exceeding one mile, then for each mile *ended* within the circle, 6d., and for each mile or part of a mile *ended* outside .. .. .. .. 2 0

FARES BY TIME *Inside* the Four Mile Circle. Four-wheeled Cabs, for one hour or less, 2s., two-wheeled Cabs.. .. .. 2 6

If above one hour, for every quarter hour or part of a quarter of the whole time, four-wheeled Cab, 6d., if a two-wheeled Cab" 0 3

If hired *outside* the Circle, wherever discharged, for one hour or less .. .. 2 6

If above one hour, then for every quarter hour or part of quarter of the whole time.. 0 3

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE OR BY TIME.

LUGGAGE.—For each bicycle, child's mail cart, or perambulator, 6d., for each package carried outside the carriage .. 0 2 s. d.

EXTRA PERSONS For each above two (two children under 10 years of age count as one person).. .. .. .. .. 0 6

WAITING —By distance for every 15 minutes completed—If hired within the Four-Mile Circle, 4 wheels, 6d., 2 wheels .. 0 3

If hired without Circle, 2 or 4 wheels .. 0 3

## MOTOR CABS.

The fare payable for the hiring of a *Motor Cab fitted with a Taximeter* shall be according to the following scale —

(a) Not exceeding one mile, or for a period of time, or a journey not exceeding ten minutes .. .. .. s. d. 0 6

(b) Exceeding one mile or ten minutes —

(1) For each quarter of a mile, or for a period of time, or a journey, not exceeding two and a half minutes .. 0 2

(2) For any less period or distance. .. 0 2

In addition to the above the driver may be entitled to charge the following extra payments —

(1) Luggage —Whether hired by distance or by time—for each bicycle, child's mail cart, or perambulator, 6d., for each package carried outside .. .. 0 2 s. d.

NOTE.—Luggage carried on the footboard of a hansom-pattern cab so that the doors do not close over it is deemed to be outside within the meaning of this clause.

(2) Extra persons —When licensed to carry more than two persons—for each additional person beyond two, the whole journey .. .. .. .. 0 6

Provided that two children under the age of ten years shall count as one person.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*, if not otherwise expressed, the fare to be paid according to distance, but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time, further, if hired by time, the driver may be required to drive at any rate

not exceeding four miles an hour, if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by these, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40*s*.

The driver of every cab shall have with him, and when required produce, the Authorised Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40*s*., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation, or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare, or, fraudulently endeavours to avoid payment of a fare, or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40*s*.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner, such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of 5*s*.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard, but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

## HACKNEY CARRIAGE STATISTICS.

During 1916 there were licensed public carriages—Hansoms, &c., clarences—animal power 687, mechanical power 2,458; omnibuses—animal power 20, mechanical power 2,236; tramway cars—mechanical power 2,683; total, 13,464. Drivers and conductors—Cab drivers—animal power 1,038, mechanical power 6,485; stage drivers—animal power 13, mechanical power 7 626; composite licences (stage driver and conductor)—animal power 20, mechanical power 1,807; conductors, 11,683; total, 28,923.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1916, of 229 men examined, 224 were successful. The proportion of drivers to hackney carriages is 10·8 drivers to 10 carriages.

## LOST PROPERTY

Of lost property, 70,298 articles were deposited, of which 32,408 were claimed by the owners. The number of awards paid to drivers, &c., was 32,052.

*Newspapers.*—It has been stated that over 60,000 newspapers are now appearing at daily or weekly intervals in the various quarters of the globe. Of these considerably over one-half are in the English language, there being 23,000 in the United States, and over 13,000 in the British Empire. The most justly celebrated newspaper in the world is *The Times*, founded in London in 1788. The greatest circulation ever yet reached by any daily morning newspaper in any country is that of the *Daily Mail*, founded in London on May 4, 1896.

*Royal Society Medals.*—Awards in November were as follows: Royal Medal to Dr John Aitkin for his researches on cloudy condensations; Royal Medal to Dr. Arthur Smith Woodward for his researches in vertebrate palæontology. The Copley Medal to M. Emile Roux for his services to bacteriology and as a pioneer in serum therapy; the Davy Medal to M. Albin Haller for his researches in the domain of organic chemistry; the Buchanan Medal to Sir Almroth Wright for his contributions to preventive medicine; and the Hughes Medal to Professor C. G. Barkla for his researches in connection with X-ray radiation.

LONDON PRINTED BY WILLIAM CLOWES AND SONS, LIMITED, DUKE STREET, STAMFORD STREET, S.E.

The Indian Empire extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any officer subordinate to him; while "India" means British India, together with any territories of any native prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or any officer subordinate to him (Act 52-3 Vict., c. 63, s 18) There are tracts of tribal territory on the N W and N E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government, and within the Indian sphere of influence lie the self-governed States of Afghanistan, Nepal, and Bhutan

*Boundaries.*—The political boundary of India marches with Persia from the Gulf of Oman to near Zulfikar on the Hariud, then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab, thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of that lake by the line demarcated in 1895 up to Povalo Schvelkovski on the Taghdumbash Pamir, where three empires—the British, Russian, and Chinese—meet. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire, mainly along the crests of the Muztagh (Karakoram) range and the Himalayas, till the limits of French Indo-China are reached on the Upper Mekong The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf Continental India, including Baluchistan, reaches from 8° to 37° N latitude, and from 61° to 101° E. longitude Delhi, the new capital, lies in 77° E. long

*Area and Population.*—The total area of India proper is about 1,803,000 square miles, with a population of over 315 millions (about three-fourths of the population of the British Empire) The British Provinces, as distinguished from the States under native administration, comprise 61 per cent. of the area, and nearly 78 per cent. of the population The details are as follows —

| Province, State, or Agency | Area in square miles (1901). | Persons. | | | | Difference since 1891 (+ or −) |
|---|---|---|---|---|---|---|
| | | 1901. | | | 1891. | |

* Districts and Administered Territories. † Includes an estimated population of 1,800,000. ‡ Included in Punjab.

*Physical Features.*—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land

*The Himalayas*.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N W to S E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kanchanjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range, and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S W of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

*The Great Plain*.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W and S W for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S, then to the W, and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal, it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea, while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India Native States. To the N W of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

*The Deccan*.—Just as the Himalayas on the N and the Hindu Kush and Sulaiman Mountains on the N W form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Narbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N W, south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Narbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanaddy, in the extreme N.E. (520 m.), the Godavary (900 m.), the

Kistna (600 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India *has shaped its history*: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern table-land has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

*Burma.*—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

*Climate.*—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

*Population.*—The fourth general census of India was taken on the 10th March, 1911. The enumeration embraced the whole of the Indian Empire, but only estimates could be made for a few outlying tracts and tribal areas on the frontier. The census returns gave a population of 315,156,396, as compared with 294,361,056 in 1901 (for details *see* p. 499), an increase in the ten years of about 7 per cent. The returns were in some parts much affected by severe malarial fever and plague, which caused a large temporary decrease in certain towns, particularly Cawnpore and Nagpur. The census total of 1911 is divisible into 244,267,542 (or 78 per cent.) for British India, and 70,888,854 (or 22 per cent.) for Native States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1911 29 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

*Caste.*—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet.

*Religions.*—The population by religions, so far as ascertained, includes 217,586,892 Hindus (69 per cent. of the total), 66,647,299 Muhammadans (21 per cent.), 10,721,483 Buddhists (3 per cent.), nearly all in Burma, leaving 7 per cent. for all other religions, including 3,876,203 Christians (three-fifths of whom are in Madras, Travancore, and Cochin), 3,014,466 Sikhs (a large increase), 1,248,182 Jains (a decline, ascribed to plague), 100,096 Parsis, and 10,295,168 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly three-fold since 1872.

*Occupations.*—Over 72 per cent. of the population was in 1911 dependent on pasture and agriculture. Industrial occupations support 35,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 5,000,000 persons.

*Sex.*—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1911

...

Languages.—India has over 'fourscore' languages, of extraordinary variety. The languages spoken by 322,912,624 persons in 1901 are grouped in four families; and all languages belonging to these families are spoken by not less than one million persons. The principal languages are Hindi (spoken by 80,629,835 persons), Bengali (44,856,764), Telugu (20,541,861), Marathi (19,806,636), Tamil (16,148,365), Panjabi (13,515,752), Gujarati (9,063,339), Kanarese (10,604,346), Burmese (7,722,000), Malayalam (6,955,400), Oriya (14,067,550), Western Hindi (14,037,882), other which some (Gujarati, Kanarese, Burmese, and Malayalam Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

## India under the Crown.

*For a brief sketch of Indian History from 326 B.C., the date of Alexander's invasion of India, to 1858, see* WHITAKER'S ALMANACK *for 1901, page 368 et seq.*

The 1857, during Earl Canning's administration, a military of sepoys broke out on the 10th May, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the better Government of India," established the Imperial Council, and a Proclamation to the Princes, Chiefs, and People of India, dated 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

*Sir John (Lord) Lawrence* (1864-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864), and by the terrible Orissa Famine of 1866. He encouraged irrigation.

*Lord Mayo* (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII. (then Prince of Wales) visited India. The Viceroy devoted attention to finance and to famine relief. By reforms in taxation, reductions in expenditure, and improvements in methods of collection, he was enabled to remit taxation to the amount of £3,000,000 sterling.

*Lord Lytton's* administration (1876-80) was clouded over chiefly by a terrible famine in Southern India, and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The principal publications relating to India presented to Parliament in the past year were:—Statistical Abstract, 1892-3 to 1901-2; Moral and Material Progress Report, 1902-3; Tables of Trade of India, 1901-2 to 1902-3; Review of the Trade of India in 1902-3; Statement of Revenue and Charges, 1902-3; Indian Financial Statement for 1903-4; Home Accounts, 1902-3; Explanatory Memorandum regarding the Accounts and Finances of the year; Return of Net Income and Expenditure, 1901-2 to 1903-4; Report of the Municipal Administration, Income and Expenditure Returns of Bodies of the Public Services Commission, 1901-2; Returns of Imports and Exports, 1902-3; Statistics of British Commerce, 1902-3; Statistical Abstract relating to British India, 1892-3 to 1901-2; Report on the Moral and Material Progress and Condition of India, 1902-3; Report on the Administration of the Department of Revenue, Agriculture, and Commerce in

[illegible] by the institution of [illegible] [illegible] and by [illegible] [illegible] [illegible] [illegible] and [illegible] railways.

The succeeding years saw the *Marquess of Dufferin* in office. In 1885–6 occupied with Third Burmese War, for which Upper Burma with the Shan States was annexed. The N W frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888–94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in India by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894–99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896–7 an area of 307,000 sq. ms., with a population of 30,000,000, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

*Lord Curzon* (1899–1905, and 1905–) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899–1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, exotas, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan Boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1903 a mission with a military escort proceeded to Tibet, and secured a convention treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Ampthill* presided. His post of Viceroy, *Lord Minto* was appointed in Dec., 1905. In 1904 a treaty with Afghanistan was renewed. The Viceroy initiated the dismemberment of Bengal, and the creation of a new province, called Eastern Bengal and Assam, with a population of 31 millions, and a capital at Dacca. Chief in importance among the [illegible] measures made [illegible] was that he initiated the enactment of the Indian Councils Act, 1909 (9 Edw. VII. c. 4).

Lord Minto continued in Nov., 1906, the policy of Lord Curzon in the matter of the partition of Bengal, and sanctioned (April, 1907) the creation of the new province of Eastern Bengal and Assam, with a population of 31 millions, a revenue of £2,200,000, and a capital at Dacca. The Viceroy also sanctioned the creation of a Board of Examiners for the Indian Civil Service, and the appointment of Indians to the Executive Councils of Governors and Lieutenant-Governors. He also sanctioned the appointment of Indians to the Secretariat of the Government of India, and to the Council of the Secretary of State for India.

the war. The outbreak of war in Europe in August, 1914, was the signal for a great outburst of loyalty and devotion to the King Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government, and large forces of Indian troops were despatched for service in Europe Asia, and Africa.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North West Frontier were promptly and vigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1917, that it had been decided eventually to abolish the system of indentured emigration from India.

*Lord Chelmsford* succeeded in April, 1916. A strong Commission was appointed to examine and report on the possibilities of further industrial development in India. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India," formulated by Mrs. Besant and her party. Restrictions, afterwards removed, were placed on Mrs. Besant, in consequence of her methods. The Secretary of State for India is now in India in connexion with a development of constitutional progress, for some time under consideration by the Home and Indian Governments, directed towards the progressive realisation of responsible government in India as an integral part of the British Empire.

The Mesopotamia Commission strongly criticised the administration from India of the early stages of the campaign, and its conclusions are expected to have an important bearing on the organisation of the Indian Army. The Public Services Commission, appointed during Lord Hardinge's administration, reported, and its recommendations are under consideration. Three Indian leaders attended the Imperial War Cabinet. As regards indentured Indian labour in the Colonies, the Dominions' representatives have accepted the principle of reciprocity of treatment, and have commended to the favourable consideration of their Governments three general principles that the facilities for settlement accorded to Indians should not be less advantageous than those allowed to other Oriental nations, that facilities should be accorded to educated Indians visiting the Colonies for travel and study, and that Indians who have been permitted to settle should receive sympathetic treatment. Action was taken against the Mahsuds and Mohmands on the North West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced. During the year the Viceroy made the following important announcements:—The grant of King's Commissions to Indians, a contribution of £100,000,000 towards the cost of the war, further grants towards the improvement of education. The Industrial Commission appointed in 1916 continued its activities. The special conditions arising from the war induced the Government of India to anticipate the findings of the Commission by organising at once, as far as is possible, the resources of the country, with a view to making India more self contained. It also devoted itself to the supply of essential stores for the armies in the field. A Munitions Board was created for the purpose of mobilising the resources of India for the war.

IMPERIAL LEGISLATION.—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act* (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), which still regulates Indian affairs, all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act, as amended by Acts of 1869 and 1907, at least 9 members of Council must have resided in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 14. Their term of office is now 7 years, with power of extension. There are now three Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the Imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1915) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 13 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915.

INDIAN LAW.—The law administered in the Indian courts consists mainly of (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India, (3) the Hindu and Muhammadan laws of inheritance and domestic law, (4) the customary law affecting particular castes and races.

# The Government of India.

## EMPEROR OF INDIA—H.I.M. GEORGE V

*Secretary of State*—The Rt. Hon. EDWIN SAMUEL MONTAGU, P.C., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. In all matters the Secretary of State can impose his orders on the Government of India. No expenditure from Indian revenues is legal unless sanctioned by him and a majority of his Council. In matters requiring secrecy (*e.g.*, foreign policy and the affairs of native States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office (*see* pp. 109-10).

The King Emperor appoints the Governor-General, the Governors of Madras, Bombay, and Bengal, the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of the Governors of Madras, Bombay, and Bengal, and the Judges of the High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the Secretary of State's approval. The term of these appointments, except judgeships, is usually five years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs is the Governor-General in Council. The Governor-General's Executive Council now contains six ordinary members (of whom three must have served in India ten years), as well as himself and the Commander-in-Chief, who is an extraordinary member. All Acts of the SUPREME GOVERNMENT IN INDIA run in the name of "The Governor-General in Council." Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. The Governors of Madras, Bombay, and Bengal, and the Lieutenant-Governor of Bihar and Orissa have each an Executive Council of three members, including one Indian. The Governor-General's Legislative Council, in accordance with the Indian Councils Act, 1909, consists of 68 official and 28 non-official members (including 27 elected), in addition to the *ex-officio* members. There are similar Legislative Councils in Madras, Bombay, Bengal, Bihar and Orissa, the United Provinces, the Punjab, Burma, Assam and the Central Provinces and Berar. For the first five of these the maximum number of members is 98, and for the last four 50, in addition to *ex-officio* members. The Governor-General's Legislative Council has an official majority, while all the provincial councils have non-official majorities. Every Indian Act requires the Governor-General's assent, but the Crown may disallow it. The seat of the Supreme Government is now at Delhi, the summer headquarters being still at Simla.

Business is conducted by ten Departments—Finance, Foreign and Political, Home, Legislative, Revenue and Agriculture, Public Works, Commerce and Industry, Education, Army, and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Supreme Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with Afghanistan, Kapal, and other conterminous countries, and, through its Political Residents and Agents in the various native States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The *Home Department* deals with the civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connection with the *Legislative Department*. The most important subjects that come before the *Revenue and Agriculture Department* are land revenue and surveys, forests, agricultural development, famine, and meteorology. The *Public Works Department* deals with irrigation, roads, buildings, &c. The department of *Commerce and Industry* deals with trade and shipping, customs, excise, salt ports, post-office, telegraphs, mines, factories, statistics, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education Department* has the control of education, local government, sanitation, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce and Industry Member of Council, and controlled by a Railway Board.

British India is divided into 19 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, under Lieutenant-Governors, the provinces of Bihar and Orissa, the United Provinces of Agra and Oudh, the Punjab, and Burma, under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the Central Provinces and Berar, Assam, Ajmer Merwara, Coorg, British Baluchistan, the North West Frontier Province, Delhi, and the Andaman Islands. The chief Local Governments enjoy a large measure of financial and administrative independence, which was further extended in 1912. The Governors of Madras, Bombay, and Bengal have greater independence than the others, being alone permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are about 270 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal, Bihar and Orissa, and in the North Western Provinces. Appeals may be carried to the English Privy Council. The Punjab and Lower Burma have *Chief Courts*. The Central Provinces, Berar, Oudh, Sind, North-West Frontier Province, and Upper Burma have each a *Judicial Commissioner's Court*.

## THE SUPREME GOVERNMENT, DELHI.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees *per mensem*.]

*Viceroy and Governor-General*, His Excellency the Right Hon. Frederick John Napier, Baron Chelmsford, P.C., G.M.S.I., G.M.I.E., G.C.M.G., *b.* 1868 (assumed charge 4th April, 1916) ... ... ... ... ... ... ... ... ... ... *per mensem* Rs. 80,000

## PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

(1) MADRAS (area, 142,330 sq. miles; pop. 41,405,204) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 90 per cent. of the people are Hindus. There are about 1,200,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are *Tamil* and *Telugu*. The Governor of Madras is assisted by an Executive Council of three members. The Legislative Council consists of 48 members, 21 nominated (including not more than 16 officials) and 21 elected according to regulations made under the Indian Councils Act, 1909, in addition to 4 *ex-officio* and 2 extra members. Madura (134,130) and Trichinopoly (123,512), famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Madras. Population, 518,660.

*Governor*, H R. the Rt. Hon. Baron Pentland, P.C., G.C.I.E. (Oct., 1912) .. .. ...Rs. 10,000

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1661), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The provinces (including *Sind*, but not *Aden* and *Perim*, which are also attached to it) contains 122,279 square miles (nearly equal in size to Prussia), with a population of 19,826,477. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 78 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards, south-eastwards in the Madras and Southern Mahratta system, *while Karachi (Sind) is the port for the extensive* North-Western Railway system. The Governor has an Executive Council of three members, while the Legislative Council comprises 48 members, 21 nominated (including not more than 14 officials) and 21 elected, in addition to 4 *ex-officio* and 2 extra members. Ahmedabad (216,777), Poona (158,898), Surat (114,868), and Karachi (151,903), the capital and chief port of Sind, are the most important cities. For Aden and Perim, *see* p. 513.

CHIEF CITY, Bombay. Population, 979,445.

*Additional ditto*, H. N. Crouch ..... Rs. 3,000
" " M. H. W. Hayward Rs. 3,000

* The areas and populations of the separate provinces are for British territory only. The populations are according to the Census of 1911.

(1) BENGAL (area of newly-constituted province, 76,699 sq. miles, with population of 42,482,977) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 53 per cent. of the population are Muhammadans and 45 per cent. Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. The recently created Governor is assisted by an Executive Council of three members, created in 1912. There is a Legislative Council of 53 members, as nominated (including not more than 26 officials) and 46 elected, besides 2 ex-officio and 2 extra members. Important cities are Dacca (108,551), now the second capital, and Howrah (179,206), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta. Pop., including suburbs and Howrah, 1,222,313.

(2) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 107,267 sq. miles; pop. 47,182,044), forms the upper part of the great Gangetic plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1833 a separate administration was formed under a Lieutenant-Governor. Oudh was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Western Hindi are the chief tongues. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1887 a Legislative Council was established. Under the Indian Councils Act it consists of 49 members, 28 nominated (including not more than 20 officials) and 21 elected, besides 2 extra members. Among the important cities may be named the ancient city of Agra (185,449), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (209,804), the great manufacturing centre, Cawnpore (178,569), Bareilly (129,482), and Meerut (118,207).

(3) The PUNJAB (area, 99,209 sq. miles, pop. 19,974,718) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1859 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. More than half the population are Muhammadans, and more than a third are Hindus. Of the former, the Pathans are found chiefly in the north-western hill districts. The Sikhs number about 2,880,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western and Southern

Punjab Railways serve the province. In 1897 a Legislative Council was constituted, which now consists of 30 members, 17 nominated (including not more than 11 officials) and 12 elected, besides 2 extra members. After the close of the war the Punjab Chief Court is to be converted into a High Court. Amritsar, the sacred city of the Sikhs, has 152,756 people.

(6) BURMA is bounded by China, French Indo-China, and Siam on the east, by Bengal and Assam on the north, and by the Bay of Bengal. It is the largest province, having a total area of 230,839 sq miles, with a population of 12,115,209. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States are administered by local sawbwas, or chiefs, under the superintendence of a political officer. The province is thinly peopled, but, owing to remarkable prosperity, the population has increased over 25 per cent. in 10 years. The inhabitants—of the common Indo-Chinese stock—belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Karen are the chief languages. Buddhism, now almost confined to Burma, is the religion of 89 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. The Lieutenant-Governor of Burma has a Legislative Council consisting of 30 members, 13 nominated (including not more than 7 officials) and 4 elected, besides 2 extra members.

CHIEF CITY, LOWER BURMA, Rangoon. Pop. 293,316.

,, ,, UPPER BURMA, Mandalay Pop. 183,649.

(7) BIHAR AND ORISSA (area of new province, 83,181 sq miles with pop. of 34,490,084). This province, which came into existence on 1 April, 1912, comprises Bihar, Orissa, and Chota Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota Nagpur are thinly peopled and contain a large aboriginal population. The Lieutenant-Governor has an Executive Council of 2 members, created in 1912. There is a Legislative Council of 44 members, 22 elected and 19 nominated (including not more than 12 officials), besides 3 *ex-officio* and 1 extra member. A new High Court for the province has been established at Patna. The Court finally came into existence on 1 March, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar, and tobacco are cultivated. The bulk of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North Western, and Bengal-Nagpur.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 84,037 sq. miles; pop. 12,839,126). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal Nagpur Railways, possesses coal and manganese ore, and produces rice wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1903, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,766 sq. miles; pop. 3,027,169), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £163,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds &c. The chief language is Marathi and most of the people are Hindus.

In 1913 a Legislative Council was established. It consists of 25 members, 17 nominated (including (a) not more than 10 officials and (b) 3 non-official persons resident in Berar) and 8 elected, besides 1 extra member.

CHIEF CITY, Nagpur. Population, 101,415.

CENTRAL PROVINCES.

(9) ASSAM (area, 53,015 sq. miles; pop. 6,713,532), was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1826. It was combined in 1905 with part of Bengal to form a *new province, Eastern* Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Gauhati and Sylhet respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. In 1912 a Legislative Council was established. It consists of 25 members, 13 nominated (including not more than 9 officials) and 12 elected, besides 1 extra member. Chief of Government, Shillong. Population of the [illegible]

[illegible] Hon. Sir Archdale Earle, [illegible] Rs. 4,667

*Chief Secretary*, J. E. Webster, C.I.E. . . Rs. 2,250

*Public Works Sec.*, F. O. Lochmaere-Oertel Rs. 2,500

(10) The NORTH WEST FRONTIER PROVINCE (area, 13,418 sq. miles; pop. 2,196,933, partly estimated) was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan, with the addition of Kurram, Malakand (Dir, Swat, and Chitral), Khaibar, Tochi, Gomal, and Shirani. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

CHIEF CITY Peshawar. *Population*, 97,993.

*Agent to the Gov. and Chief Comnr.*, The Hon. Lt.-Col. Sir G. O. Roos-Keppel, K.C.S.I., C.I.E. Rs. 4,000

*Revenue Comnr.* Lt.-Col. D. B. Blakeway, C.I.E. . . . . Rs. 2,750

(11) AJMER-MERWARA (area, 2,711 sq. miles; pop. 501,395), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmer-Merwara and the chief executive and judicial authority.

CHIEF CITY Ajmer. Population, 86,000.

*Chief Commissioner*, The Hon. Sir E. G. Colvin, K.C.S.I. . . . . Rs. 4,000

(12) COORG (area, 1,582 sq. miles; pop. 174,976), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.

*Chief Com.*, The Hon. H. V. Cobb, C.S.I., C.I.E. Rs. 4,000

(13) BRITISH BALUCHISTAN (area, 54,228 sq. ms. pop. 414,412) was constituted a separate administration in 1887, under the Governor General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin Thal-Chotiali, Nushki, Zhob, Chagai Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gandamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan Baluch frontier was demarcated in 1896–7. To Chaman, on this frontier, a railway runs *viâ* Quetta. A new trade-route between India and Seistan, in Persia, *viâ* Nushki, was opened in 1896. A railway runs from Quetta to Nushki. The Khan of *Kalat, the head of a loose confederacy, receives* about £18,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass and have the treaty right to occupy any other position.

*Chief Commissioner of British Baluchistan*, The Hon. Lt.-Col. Sir J. Ramsay, K.C.I.E., C.S.I. Rs. 4,000
*Rev. and Judl. Comnr.*, H. R. C. Dobbs, C.S.I., C.I.E. . . . . Rs. 2,750

(14) DELHI.—This province (area, 592 sq. miles; pop. 232,837) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi.

*Chief Commissioner*, W. M. Hailey, C.S.I., C.I.E. Rs. 3,000

(13) The ANDAMANS and NICOBARS (area, 3,143 sq. miles, pop. 26,459) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port *Blair*, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coco-nuts.

*Chief Commissioner and Superintendent* (Port Blair), Lt.-Col. M. W. Douglas, C.I.E. Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,620.)

*Aden, Perim*, and Protected Chiefships.—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small uninhabited island serving as a coaling station at the northern entrance to the Red Sea, occupied in 1857—form part of the Bombay Presidency and have an area of 80 square miles and a population of 46,265 (1921). Aden is a free port. The traffic in arms and ammunition is subject to special regulations. The total trade in 1914-15 was £6,940,000. In 1914-15, 2,204 vessels called at Aden, and 355 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Bab-el Mandeb to Muscat territory at Ras Fartr.

The *Kuria Muria* Islands, to the S. of Oman, have been in British possession since 1854. In 1854 the East India Company occupied *Socotra* (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. *The Sheikh* receives a small subsidy, and is pledged not to cede the island to any foreign Power.

*Aden* *Political Resident*, Maj. Gen. James Marshall Stewart, C.B. *per annum* Rs. 3,000

## INDIAN APPOINTMENTS.

The higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

*The Civil Service of India.*—The annual examination ordinarily commences in London Aug. 1. Candidates must be over 22 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission London, W. 1. Examination fee, £8. Selected candidates are on probation in England for one year, and generally receive an allowance of £150 if they pass their probation at one of the Universities or Colleges approved by the Secretary, conduct themselves well, and comply with *all the rules* laid down for their guidance. A final examination is held in Indian law, language, &c. The salary of a covenanted civil servant commences usually at Rs. 4,800 (£320) a year. No person will be eligible for admission to the Indian Civil Service who has made before any tribunal established under the Military Service Acts, 1916, an application for the issue to him of a certificate of exemption from the provisions of those Acts on the ground of a conscientious objection to the undertaking of combatant service.

The annual Competitive Examination will continue to be held under normal conditions, but a greatly reduced number of places will be offered for competition while the war lasts. Any person not engaged in military or naval services, otherwise eligible, may enter for the Open Competition. Concessions as to the age limits, in the case of candidates who have served in the Army or Navy, are made, and full particulars can be obtained from the Civil Service Commissioners. Under the special powers conferred by the Indian Civil Service (Temporary Provisions) Act, 1919, a proportion of the vacancies are now filled by nomination.

*The Indian Army.*—Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners three times a year. Candidates must be between 17½ and 18½ years of age (or in the case of candidates already serving in the Army). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India and by the War Office the remainder being offered to candidates in the order of their passing the entrance examination. At the end of the period of training at Sandhurst (at present 12 months), cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. Cadets are also selected at the Army Entrance Examination or nominated by the Army Council for training at Quetta or Wellington in India. Officers holding commissions in the British Service, who were under 28 years of age at the time they were called to Army Service as officers (or, in the case of regular officers, at the date of their nomination), may apply through their commanding officers for transfer to the Indian Army. On appointment to an Indian regiment, an officer's minimum initial pay is Rs. 4,860 (£324 a year). Regulations and examination papers can be obtained from His Majesty's Stationery Office.

Further information regarding these appointments—*e.g.*, Civil Service of India, the Indian Army, the Public Works Dept. the Imperial Forest Service of India, the Indian Police, the Indian Medical Service, the Indian Ecclesiastical Service, the Educational Service, &c., &c.—is contained in "The India Office List" (published by Harrison & Sons, 45, Pall Mall, S.W.), or can be obtained on application from the Under-Secretary of State, India Office, Whitehall, London, S.W. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a summary also appears in the "India Office List."

## NET FINANCES OF INDIA, FOR THE THREE YEARS 1914, 1915, AND 1916

*The figures below are given in £, rupees being converted at 1s. 4d. the rupee, or 15 rupees to the £.*

### GROSS REVENUE AND RECEIPTS.

Gross and Net Receipts and Expenditure.—The statement of Gross Revenue and Expenditure exhibits all revenue receipts and payments therefrom, except that railway working expenses and the surplus profits paid to certain railway companies are deducted from revenue. A clearer view of the financial position is obtained from the following statement of Net Revenue and Expenditure, in which departmental receipts, which are a set-off against expenditure, have been deducted, as also interest charges and working expenses of railways and irrigation works, refunds and assignments, cost of cultivating and manufacturing opium, &c.

In 1904-05 there was a deficit of Revenue as compared with expenditure of £1,788,000, in 1905-06 a deficit of £1,288,682, and in 1906-07 (revised estimate) a surplus of £3,988,700.

**Net Revenue.**

| *Provincial Balances* | | | |
| Increased by Unspent Grants | −2,750 | 232 | 1,607 |
| | £58,503 | £60,170 | £62,172 |
| Surplus or Deficit | £7,319 | £4,288 | £5,004 |

Capital Expenditure.—In addition to the expenditure from revenue there was a capital outlay in 1905-06 of £4,278,000 on State Railways, £837,000 on Irrigation Works, and £392,000 in connection with the new capital at Delhi.

Burden of Taxation.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Native States, the burden in 1906-07 was 1s. 6d. per head, or, if land revenue (which is akin to rent) be added, 3s. 2d. per head. The Budget for 1907-08 introduced a super-tax on large incomes, enhanced the export duties on raw jute, increased the import duties on cotton manufactures, and imposed, as a war measure, a surcharge on railway goods and traffic.

Debt and Assets.—On 31 March, 1907, the debt of India amounted to £284,300,000, viz., Sterling Debt, £174,140,000, and Rupee Debt (converted into sterling at 1s. 4d. the rupee), £111,168,000. Miscellaneous obligations (Savings Bank balances, &c.) amounted to about £13,600,000, besides a charge of £994,000 for various railway annuities. Up to the same date the *Indian Government had devoted* £178,492,000 to the construction of railways and £43,878,000 to the construction of irrigation works. It had purchased from companies, by cash payments, annuities, or the issue of India stock, nine railways, on which, at the time of purchase, £108,090,000 had been spent; its advances to Native States, corporations, agriculturists, &c., stood at £12,130,000, and to railway companies £300,000. Other assets were the Gold Standard Reserve of £20,500,000, and the cash balances in England and India, £8,191,000 and £23,259,000 respectively. In 1906 a 4 per cent. rupee loan was issued, and realised £4,487,000. The Budget for 1907-08 provided for the issue of a 3½ per cent. rupee War Loan and of 5½ per cent. War Bonds, the latter being free of income tax.

Land Revenue.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Bombay and Sind, Assam, and most of Madras) the ryotwari or fairer prevails, and each cultivator or peasant-proprietor holds direct from the State. In temporarily settled *zamindari* districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled ryotwari districts the revenue varies from [illegible] per cent. of the gross produce down to much lower proportions, averaging about 8 per cent. Improvements are exempt from assessment.

[illegible] gross land revenue paid for the [illegible] amounted to £20,600,000, of which [illegible] was remitted or suspended, and [illegible] that on account of the [illegible]

THE OPIUM REVENUE.—Poppy may now be grown only in parts of the United Provinces (Bengal opium) and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly In 1909–10 10,000 chests of Bengal opium were sold for export. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £7,923,514. The expenses of production, &c., were £1,144,332. Formerly, most of the opium exported from India was consumed in China, but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from 31 March, 1917, export of Indian opium to China is prohibited.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded in recent years, and amounted to £8,468,000 net in 1909–10. Reforms in excise administration are in progress.

CUSTOMS.—The net revenue was £4,720,000 in 1913–14. (For tariff see page 514.) The export duty on rice yielded £508,800, and the countervailing duty on Indian cotton goods £308,000 in 1909–10. New and enhanced duties were brought into effect on 1 March, 1916.

INCOME TAX on incomes of Rs. 2,000 (£133) a year and over is levied on non-agricultural incomes at the following rates —

| *Annual Income* | *Rate of Tax. Per Rupee = per £* |
|---|---|
| Rs. 2,000 and over ... ... | 4 pies 5d. |
| ,, 3,000 ,, ... | 6 ,, 7½d. |
| ,, 5,000 ,, ... | 9 ,, 11¼d. |
| ,, 10,000 ,, ... | 12 ,, 1s. 3d. |
| ,, 25,000 ,, ... | 15 ,, 1s. 6d. |

Super-tax is leviable in addition to ordinary income tax on incomes above Rs. 50,000 at rates equal to 1s. 3d. to 3s. 9d. in the £.

STAMPS.—Stamps yielded £3,377,000 (net) in 1913–14. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (82⅔ lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1¼ with effect from 1 March, 1916.

FORESTS.—About 96,000 square miles of forests are reserved and scientifically worked by the State, while about 130,000 square miles besides are under State control. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1913–14 conveyed 2,091 millions of letters, postcards, newspapers, &c., and issued over 32 millions of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on 31 March, 1916, was 338,000 miles, and the number of messages sent in 1913–14 was 18,130,000. Their capital cost to the end of 1913–14 was £8,483,000. The Indian Postal and Telegraph services were amalgamated on 1 April, 1914. The combined services yielded for the year 1913–14 a net income of £698,000. The Indo-European Telegraph Department yielded a profit of 7·72 per cent. on its capital expenditure of £1,008,000.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on 31 March, 1916, was 36,872, while the mileage under construction was 2,194. Of the mileage open about 31 per cent. was on the standard gauge (5¼ ft.), and about 42 per cent on the metre gauge. On the 31st March, 1916, the total capital at charge was £360,389,000. The net earnings of the railways in 1913–14 amounted to £17,826,000. The number of passengers increased to 478 millions, and the goods traffic to 89 million tons. Rates are very low, third-class passengers travelling on the average over five miles for a penny The net working profit from State railways was £4,076,000 in 1913–14. The total capital expenditure on railways in 1913–14 was about £8,436,000.

IRRIGATION.—The total capital outlay on State irrigation works up to 31st March, 1916, was £48,859,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,899,000. The area irrigated was over 25 million acres, while the annual value of the crops raised is estimated at over 100 per cent. on the capital outlay Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1913–14 to £19,404,000. Interest on Railway Debt and Annuities, £9,304,000, Interest on Irrigation Debt, £127,900, Interest on Ordinary Debt and Management of Debt, £2,176,000; Stores, £1,355,000, of which £874,000 was for Marine and Military Stores, payments for British forces, troop service, &c., £1,322,000, Army non-effective charges, £2,230,000, Civil annuities, pensions, &c., £1,496,000 Furlough payments, civil and military, £435,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1872 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1906, was practically stable at 1s. 4d. This rate has now a legal sanction, since an Act of 1899 makes the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount. In 1907–8 and 1908–9 half the profit on silver coinage was applied to capital expenditure on railways. With this exception the whole of the net profit on silver coinage since 1 April, 1900, has been held as a special reserve, now called the Gold Standard Reserve, which is partly invested in England in sterling securities, for the purpose of maintaining the rate of exchange between England and India. On 31 March, 1917, the investments of this fund in sterling securities amounted to £21,026,000 (estimated value), while £20,000,000 was held in India in

gold and £8,000,000 in cash in England. In June, 1920, it was decided that no portion of the profit on coinage will be used for railways till the total sterling assets of the Reserve amount to at least £40,000,000. The Royal Commission on Indian Currency and Finance made certain recommendations bearing on the Gold Standard Reserve, but in view of the disturbance of financial conditions caused by the war, decisions on the more important of these recommendations have been deferred. India has a paper currency. The 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. It is proposed to issue 1 rupee notes. The exchange rate varied considerably in 1919.

ARMY.—In peace time, the Army in India consists, first, of British troops, about 76,000; and, secondly, of Indian troops (largely Muhammadans), about 160,000. In addition, the native Army Reserves number nearly 40,000 men, and the Imperial Service Troops furnished by native States contribute 21,000, including cavalry, transport corps, and sappers. Further, there are 30,000 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1914–9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organization and training of the Army. On 1 June, 1909, there was a redistribution of the Army of India, which now consists of the Northern and Southern Armies, each under a general officer and staff. The artillery has been increased. Factories for making rifles, cordite, and gun carriages have been erected. The transport service has been improved. A flying school has been established at Risalpur. A General Staff has been formed. A Staff College has been established at Quetta, and colleges have been established at Quetta and Wellington, on the lines of the Royal Military College, Sandhurst, for the training, with a view to the appointment to the Indian Army, of cadets selected in the United Kingdom. The net military expenditure (including marine) in 1919–20 was £52,262,000. During the war the Army of India has been engaged in operations of war in France and Belgium, East and West Africa, Egypt, Somaliland, Aden, Mesopotamia, Persia, China, and on the North West frontier of India. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed, the pay and pensions of the Indian soldiery were improved, compulsory military training for Europeans was introduced, Indians were invited to volunteer for service, and special Indian units were enrolled for general service within the confines of India for the duration of the War. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of ten sea-going vessels, and numerous smaller steamers and launches for harbour and river navigation, surveying, and submarine mining. The principal officers are as follows:—

*Director R.I.M., Bombay*, Rear Adm W Lumsden, C.I.E., C.V.O., R.N. (retd.), A.D.C. Rs.2,500
*Deputy ditto*, Capt. H J F Wilson.
*Asst. ditto*, Capt. R J C. Hordern.

A great part of the Royal Indian Marine fleet has been lent to the Admiralty.

EDUCATION has benefited by larger grants for primary education. A Department of Education has been created, and increased attention is being given to primary, commercial, and technical education. There are five Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, and the Punjab. A denominational Hindu University is being established at Benares, and there are movements for a Muhammadan University at Aligarh, and for Universities at Dacca, Patna, Rangoon, Nagpur, and Mysore. In State institutions education is secular. The institutions in 1919–20 numbered 189,000 and the scholars 7,632,000, including 1,288,000 females. Of the institutions, about 70 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1919–20, £7,408,000, £2,027,000 came from fees, and £4,154,000 from provincial revenues or local and municipal funds. The census of 1911 showed that only 108 males and 10 females per mille can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1919–20 numbered 713, controlling a total population of 27 millions, and receiving an income of £3,849,000 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £2,899,000 from other sources (excluding loans). Out of 9,799 members of municipal bodies 8,822 were Indians, and 7,963 were non-official. In almost all districts in British India there are local district boards, partly representative. Over one-half of their total expenditure of about £5,335,000 in 1919–20 was devoted to civil works, over one-fourth to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are nearly 10,000 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1919 2,297,000 civil suits were instituted, while in 1914 2,120,000 persons were tried, and 929,000 convicted, in criminal cases, of whom 618 were sentenced to death, 2,168 to transportation, and 170,484 to imprisonment. The strength of the police in 1919 was 14,000 officers and 189,660 men. There were 764 prisons, with a daily average of 117,000 prisoners, in 1919. At the convict settlement of Port Blair (Andamans) there were 12,400 prisoners on 31 March, 1916.

VITAL STATISTICS.—The reporting of vital occurrences is still defective, and proposals have recently been formulated with a view to securing more complete and accurate vital statistics. The recorded death rate for British India in the decennium ended 1913 ranged between 36·22 per 1,000 in 1906 and 28·72 in 1913. It was 29·34 per 1,000 in 1918. Fevers of various kinds are by far the commonest cause of death. Cholera, dysentery and diarrhœa, small-pox, and (since 1896) plague, being other chief causes. The reported deaths from plague up to the end of 1918 were about 9,258,000 in India as a whole. About 22,000 people are annually killed by snakes. In 1,908 hospitals and dispensaries, maintained mostly from public funds, 23,091,000 patients were treated in 1919. The number of persons vaccinated was 9,370,683. According to the census of 1911 there were 110,000 lepers.

SURVEYS.—The Survey Department supervises trans-frontier and cadastral surveys, as well as trigonometrical and topographical surveys, special

explorations, and many productions. Marine, geological, botanical, and archæological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire, India comes second to the United Kingdom alone in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. During the five years ending 1913-14 both imports and exports were, on the average, twice as great as they were 20 years ago. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The following table exhibits the leading figures for the last five years in thousands of pounds sterling:—

| SEA BORNE TRADE. | 1912-13. £ (000 omitted.) | 1913-14. £ (000 omitted.) | 1914-15. £ (000 omitted.) | 1915-16. £ (000 omitted.) | 1916-17. £ (000 omitted.) |
|---|---|---|---|---|---|
| Imports of Private Merchandise | 307,330 | 122,265 | 92,963 | 87,992 | 99,748 |
| Government Stores | 3,754 | 5,273 | 4,556 | 4,120 | 7,070 |
| Total Merchandise | 311,086 | 127,538 | 97,520 | 92,113 | 106,820 |
| Treasure—Private | 34,730 | 24,424 | 14,324 | 7,903 | 9,633 |
| Government | 7,087 | 4,648 | 85 | 61 | 24,720 |
| Total Treasure | 41,817 | 28,972 | 14,409 | 7,964 | 34,353 |
| Total Imports | 152,903 | 156,498 | 111,929 | 100,077 | 141,173 |
| Exports of Private Merchandise | 160,899 | 169,811 | 118,303 | 128,396 | 126,438 |
| Indian Produce, &c. | | | | | |
| Foreign Goods (re-exports) | 3,280 | 3,118 | 2,773 | 2,851 | 3,156 |
| Government Stores | 86 | 86 | 390 | 1,400 | 1,440 |
| Total Merchandise | 164,244 | 168,014 | 121,467 | 132,647 | 130,034 |
| Treasure—Private | 4,657 | 4,701 | 2,208 | 4,631 | 2,313 |
| Government | 2,951 | 21 | 1,324 | 331 | 367 |
| Total Treasure | 7,608 | 4,722 | 3,532 | 4,964 | 4,680 |
| Total Exports | 171,852 | 172,737 | 124,977 | 137,611 | 134,714 |
| Total Sea-borne Trade | 323,540 | 327,235 | 236,136 | 237,688 | 275,887 |
| Net Imports of Treasure | 34,232 | 24,250 | 11,877 | 3,000 | 29,673 |
| Net Imports of Merchandise | 32,839 | 38,657 | 24,831 | 40,874 | 24,412 |
| Excess of Imports | 18,926 | 14,229 | 13,218 | 36,324 | 53,846 |

In 1913-14 both imports and exports of merchandise were of unprecedented magnitude, but the outbreak of war during the course of the year 1914-15 brought the figures for the year down to the level at which they stood five or six years earlier. There was, however, a recovery in 1916-17. The rise in prices has been a very potent factor in the increase in values, in all the main classes there was an increase on account of a higher level of prices, while there was a decrease in the volume of trade. In imports all principal articles showed considerable increases on 1913-16, with the exception of railway materials (£2,786,000 decrease), sugar (decrease £779,000), iron and steel (decrease £208,000), and matches (decrease £191,000). Cotton goods were better by £8,276,000, mainly imports from the United Kingdom and Japan. The latter country appears to be rapidly finding an increasing market in India for twist and yarn, hosiery, and grey unbleached piece goods. The increased imports from the United Kingdom were mainly comprised of sewing thread, white, bleached, and coloured, &c., piece goods. The imports of grey unbleached piece goods from the United Kingdom further declined.

In the export trade raw cotton increased by £8,267,000, seeds by £1,211,000 hides and skins by £2,277,000, leather and cowhides by £1,834,000, and jute goods by £1,491,000. There were smaller increases in the case of barley, lac, opium, hemp and rubber. The chief falling off was in tea (£2,124,000).

As will be seen, the bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1916-17:—

IMPORTS.

| | (000 omitted.) | | (000 omitted.) |
|---|---|---|---|
| Cotton Goods | £31,677 | Chemicals | £1,631 |
| ,, Yarn | 2,699 | Instruments, &c. | 1,307 |
| Sugar | 10,390 | Apparel | 1,288 |
| Iron and Steel | 5,929 | Railway Material | 1,248 |
| Machinery, &c. | 3,620 | Glass | 1,202 |
| Mineral Oils | 2,950 | Drugs & Medicines | 929 |
| Hardware, &c. | 2,272 | Haberdashery, &c. | 850 |
| Silk Goods | 1,894 | Fruits and Vegetables | 779 |
| Provisions | 1,873 | Matches | 772 |
| Paper, &c. | 1,524 | Paints | 749 |
| Liquors | 1,353 | Dyes | 705 |
| Motor Cars and Cycles | 1,430 | Silk (raw) | 723 |
| Woollen Goods | 1,314 | Government Stores | |
| Spices | 1,298 | Metals | £1,402 |
| Salt | 1,277 | Railway Material | 263 |

EXPORTS.

| | (000 omitted.) | | (000 omitted.) |
|---|---|---|---|
| Jute Manufacts | £27,770 | Lac | £1,889 |
| Cotton (raw) | 22,750 | Opium | 1,358 |
| Rice | 12,498 | Rubber | 1,298 |
| Tea | 12,180 | Hemp | 1,223 |
| Seeds | 12,462 | Oils | 1,027 |
| Jute (raw) | 12,839 | Manganese Ore | 1,000 |
| Hides and Skins, Raw | 9,806 | Chemicals | 746 |
| Cotton Yarn and Manufactures | 8,926 | Spices | 722 |
| Wheat & Flour | 6,822 | Coffee | 677 |
| Leather & Cow hides | 4,994 | Paraffin Wax | 678 |
| Barley, Pulse, Millets, &c. | 3,989 | Oilcake | 582 |
| Wool (raw) | 2,900 | Re-Exports. | |
| Dyes, &c. | 2,897 | Cotton Yarn and Cloth | £2,946 |
| | | Wool (raw) | 1,842 |
| | | Sugar | 1,000 |

The following table shows the distribution of the Indian private sea-borne trade in 1926–27 :—

| Countries. | Private Merchandise only. | |
|---|---|---|
| | Imports. | Exports. |
| Total Value (not omitted) .. | £560,748 | £780,492 |
| | Per cent. | Per cent. |
| United Kingdom .. .. .. | 36 7 | 22 3 |
| France .. .. .. .. .. | 1 4 | 5·9 |
| Italy .. .. .. .. .. .. | 1·7 | 4·0 |
| Russia .. .. .. .. .. .. | 0 2 | 2 3 |
| Java .. .. .. .. .. .. | 3 4 | 1 2 |
| Ceylon .. .. .. .. .. .. | 0 8 | 4 4 |
| China (excluding Hong Kong) | 1 1 | 0 4 |
| Hong Kong .. .. .. .. .. | 0 7 | 1 8 |
| Japan .. .. .. .. .. .. | 8 9 | 18 0 |
| Straits Settlements .. .. .. | 2 8 | 2·6 |
| Egypt .. .. .. .. .. .. | 0 4 | 1 3 |
| Mauritius .. .. .. .. .. | 0 2 | 0 7 |
| United States .. .. .. .. | 7 5 | 12 9 |
| All other countries .. .. .. | 31·7 | 26 2 |

In imports, the United Kingdom comes easily first with 36 per cent. of the total, but is much less prominent in exports from India, on account of the wide demand for India's raw produce for food and manufactures. England re-exports a large quantity of her imports from India. In 1913–14, the last pre-war year, India's imports from Germany, Austria Hungary, and Belgium represented 6 p, 2 p, and 2 per cent. respectively of her total imports, while her exports to those countries were 10 p, 3 p, and 4 p per cent. respectively of the total.

Customs Duties.—The Indian Tariff (Amendment) Acts, 1926 and 1927, introduced new and enhanced Customs duties which effect from 1 March, 1926, and 1 March, 1927, respectively. The general import tariff, which has stood at 5 per cent. *ad valorem* since 1894, was raised to 7½ per cent. The principal exceptions to the general rate are as follows :—Cotton yarn and thread are exempt, but the duty on other cotton goods is 9½ per cent., an Excise duty of 3½ per cent. being levied on those woven in Indian mills. Arms and ammunition pay 20 per cent., sugar 10 per cent., cigars and cigarettes 50 per cent., spirits generally Rs. 12½ a gallon, salt Rs. 2½ a maund (2s 1b.), silver coin or bullion An. 4 an ounce, silver plate, silver thread and wire, and silver manufactures 10 per cent., refined petroleum An. 2½ a gallon (with an additional 6 as. per gallon on motor spirit, an excise duty of 6 as. per gallon is levied on motor spirit produced in India), coal An. 8 a ton. Iron and steel goods, grain, tea-chests, printing materials, machinery other than cotton machinery, railway materials, and a few other articles pay 2½ per cent. Gold, living animals, raw hides, skins, cotton and wool, certain agricultural requisites, cotton machinery, quinine, and a few other articles are free. There are export duties of An. 3 a maund on rice, Rs. 2½ per 100 lb. on tea, Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, in the case of which the rate is Rs. 2½ per bale, Rs. 20 per ton on jute matting, and Rs. 30 per ton on hessians.

Shipping.—In 1926–27 the number of vessels engaged in the foreign trade which entered and cleared at ports in British India was 20,388, with a tonnage of 21,442,000. Of this tonnage, 72 per cent. was under the British flag.

Ports.—The chief ports are Calcutta and Bombay, which together do about 70 per cent. of the foreign trade. Next come Karachi, Rangoon, and Madras. These ports are administered by port trusts having wide powers, but subject to Government supervision.

Foreign Land Trade of India.—As registration is difficult, the statistics are of doubtful accuracy. The most important countries in the land trade are Afghanistan and the Shan States. The total imports of merchandise and treasure in 1926–27 were £8,879,000, and the total exports £7,092,000.

Agriculture is by far the most important occupation of the people of India. In British territory in 1924–25, 262 million acres were cropped, of which about 22 per cent. was under wheat, 30 per cent. under rice, and 38 per cent. under other food-grains and pulses, 6 per cent. under oilseeds, and 7 per cent. under cotton, jute, and other fibres. Jute cultivation has been extraordinarily profitable. Sugar, tea, and tobacco are other important crops. The agricultural departments (central and provincial), which have been much developed since 1905, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. There is also a civil veterinary department.

Banks and Co-operative Credit Societies.—Besides the three Presidency Banks, closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. Much success has been achieved in rural districts by co-operative credit societies. In 1913–14 there were 584 central, 17,108 agricultural and 880 non-agricultural societies, with a total membership of 842,000 and a capital of £6,200,000.

Minerals.—The output of coal in India in 1926 was 17,494,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 29 million gallons in 1896 to 297 millions in 1926. The production of salt is about 1,360,000 tons. The production of manganese ore in 1926 was about 644,000 tons, and of saltpetre 25,000 tons. The yield of gold (nearly all from Mysore) was about 398,000 oz. in 1926. There is a considerable output of mica and a fascinating output of rubies and jade. Monazite and wolfram have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1926 was 1,290 tons, and of the latter 3,760 tons.

Manufactures.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 269 cotton mills at work in India in 1924–25, mostly in Bombay and Ahmedabad, contained 6,896,000 spindles and 208,000 looms. Up-country cotton mills have increased. The production in 1925–26 was 700 million lb. of yarn (mostly of low counts) and 320 million lb. of woven goods. There is a tendency to produce finer yarns, and to pay more attention to weaving. The 70 jute mills, mostly situated in or near Calcutta, contained 820,000 spindles and nearly 40,000 looms. There were, in 1924, 6 woollen mills, 11 paper mills, 28 breweries, and various other factories.

TABLE OF THE PRINCIPAL INDIAN RULING CHIEFS, SHOWING THE SALUTES TO WHICH THEY ARE ENTITLED, AND THE AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES.

| State, Salute, and Title of Chief | Date of succession. | Area in sq. miles. | Population in 1901. | Prevailing Religion. | Revenue for last year recorded or agreed upon. |

N.B.—There are also 11 other chiefs entitled to salutes of 11 guns.

## NATIVE STATES OF INDIA.

*Two Native or Feudatory States, whose chiefs* are in subordinate alliance with, or under the *suzerainty of*, the King Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military forces they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the *Supreme Government can* dethrone the *chief or* temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tributes, most do not. Tributes aggregating £700,000 (£350,000 from Mysore) were paid to the Government of India in 1923–24. Generally speaking, the States are governed by their native Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. *A common characteristic of all* native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate, and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kolat (Quetta and Pishin), and Berar are still technically Native States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the native States have a combined area of 709,583 square miles, and a population of 70,886,844. *They maintain in the aggregate* a considerable body of troops of inferior military organization in addition to their Imperial Service troops. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of native States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is as large as Italy, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and

* The present chief has a personal salute of two additional guns.

elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over a native State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the native States, large and small, number 693, only about 100 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1901, when a new native State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the native princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 520–1 are the names of 72 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H.H. the Aga Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Burdwan, K.C.S.I., K.C.I.E., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 278 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, Gwalior, Indore, and Travancore and Cochin.

The native States may be thus classified — 1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 500,627—the fourth city in India). This State is roughly co-extensive with the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1713, and then independent of the Mogul Emperor Tirhaqu. Urdu, Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar, and much interlaced with British districts. The ruling Gaekwar was the adopted heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 128,344) was granted to Ghulab Sing by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar, while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the divided plain, south of the Sutlej. The most important of these is *Patiala*. 7. Rajputana, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 12,292,434) extends some 480 miles from north to south, and is 290 miles in breadth. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer, he has under him Residents for Kaitwa and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The *States of Central India*, lying to the north of the Narbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 21 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. 9. The Malayalim States of *Travancore* and *Cochin*, lying together in S.W India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur. 11. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 12. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 13. The Southern Mahratta States. 14. The numerous Afghan and Baluch tribes of the N.W frontier, inhabiting the mountains from the north of Peshawar to the base of the Sulaiman range, a distance of 600 miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizianagram) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

# Countries within the Indian Sphere of Influence.

The native States of Nepal and Bhutan, though in India, enjoy a large measure of independence, and may be most conveniently treated as within the Indian sphere of influence. Outside India, but within its sphere of influence, is Afghanistan. Great Britain declared in 1902 that no administrative changes in Tibet would be allowed to affect the integrity of Nepal or Bhutan, whose interests and rights England is prepared to protect. *See also* French and Portuguese possessions in *India*.

## NEPAL.

*Sovereign*, H.H. Maharaja Dhiraja Tribhubana Bir Bikrama Shah Bahadur Shamsher Jang, *succ.* 1911. Salute to British territory, 21 guns.

*Prime Min.*, H.E. Maharaja Sir Chandra Shamsher Jang, Bahadur Rana, G.C.B., G.C.S.I., G.C.V.O., D.C.L.

Nepal (area, about 54,000 sq. miles; pop. 5,639,250) lies between India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1906-7 its exports to British India were £2,646,000, while its imports amounted to £1,362,000. The chief trade route is that between Katmandu and the Bengal frontier (96 miles). Nepal exports rice and other grains, hides, oilseeds, ghi, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister, who paid a most successful visit to England in 1908. The British Political Resident does not interfere in internal affairs, but the Indian Government controls foreign relations. The army numbers about 46,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

CAPITAL, Katmandu (pop. 30,000).—*British Res.*, Lt.-Col. S. F. Bayley ..... .....Rs.2,750

## BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S. slopes of the Himalayas, and its products resemble those of Nepal. In 1865, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £50,000, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, Sir Ugyen Wangchuk, K.C.S.I., K.C.I.E., was chosen hereditary Maharajah in 1907. He has a salute of 21 guns in British territory. The estimated annual revenue is 1,675,000 rupees. Bhutan's total trade with India in 1909-10 was 2,000,000 rupees. There is a British Resident.

CAPITAL, Punakha.

## AFGHANISTAN.

*Amir of Afghanistan and its Dependencies*, His Majesty Siraj-al millat-wad-din Amir Habibullah Khan, G.C.S.I., G.C.M.G., b. 1872, *succ.* October 7, 1901. Salute in British territory, 21 guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India. Estimated area, 250,000 sq. miles, and pop. 4,600,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1905), on the S. by Baluchistan (boundary fixed 1893-7), on the E. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the Punjab and N.W. Frontier Province (boundary fixed 1893). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1905. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, *who are much influenced by mullahs*.

Mountains, chief among which are the Hindu Kush, cover three fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Afghans (or Durranis) have predominated since 1747, especially in Kandahar, next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu.

Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakshan (with Kafiristan and Wakhan), which are under governors, with subordinate police and judges, police, and revenue officers. The late Amir (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lapis-lazuli, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by yaks,

animals. The chief trade routes to India are the Khaibar Pass, from Kabul to Peshawar (192 miles), along which a motor service has been established by the Amir, and the road from Kandahar to Quetta (224 miles). The Sind-Pishin railway terminates at Chaman, on the frontier, 64 miles from Kandahar, from which a fine road of 328 miles runs to Kabul. The trade of Afghanistan with India in 1917–18 was over £8,254,000. The exports to India are mainly fruits and nuts, raw wool, and *ghi*, while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £500,000, including the subsidy of £1,200,000 a year from the Government of India. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

By agreement with the Amir, the "buffer State" of Afghanistan has no foreign relations with any Power except the Government of India. In all other respects it is independent, and the rule of the Amir despotic. The modern history of Afghanistan dates from 1880, when Abdurrahman, the late Amir, was recognised as ruler. As the result of a British mission to Kabul in 1904–5 the engagements which had existed with the late Amir since 1880 were renewed by the treaty of 21 March, 1905. Under this treaty the British Government engaged to refrain from interference in internal affairs, but promised to preserve the safety and integrity of Afghanistan against any unprovoked attack, provided that the Amir acted as a friend and ally, and followed unreservedly the British Government's advice in all his external relations. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence, and engaged to conduct all her political relations with Afghanistan through Great Britain. Great Britain declared her intention not to change the political status of Afghanistan, to exercise only a pacific influence, and not to take or encourage measures that might threaten Russia. After reciting the treaty with the Amir in 1905 Great Britain engaged not to annex or occupy any part of Afghanistan in contravention of that treaty. It was agreed that specially designated Russian and Afghan frontier officials might establish direct relations for settling local non-political questions, and that Great Britain and Russia should enjoy equality of commercial facilities.

There is a native British Agent (a Muhammadan) at Kabul. The Amir has an agent with the Government of India, an agent at Peshawar, and commercial agents in England and India.

CAPITAL, *Kabul* (about 180,000). The chief commercial centre is Kandahar (80,000). Other provincial capitals are Herat (60,000) and Tashkurgan (17,000). *British Agent*, Khan Bahadur Hafiz Saifulla Khan, Ra. 2,000.

## Foreign Countries Contiguous to India

THE PERSIAN GULF.—For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low lying deserts, the Persian coasts mountainous, at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. On the Arabian side, the Katif coast only is Turkish. In the negotiations connected with the Anglo-Russian Convention of 1907 the policy of Great Britain was declared to be the preservation of the *status quo* and the maintenance of British trade, and Russia did not deny the special interests of Great Britain in the Gulf. British forces are now in occupation of Mesopotamia, extending from Basra at the head of the Gulf to Baghdad and beyond.

*Bahrein* (capital, Manama), governed by Sheikh Isa bin Ali and under the protectorate of the Indian Government, is the largest of a group of islands half way up the Gulf, near the Arab coast (26 Katif). It is the headquarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export; rice, cotton goods, dates, sugar, and spices the chief imports. In 1914–15 the value of the exports was £960,000, and of the imports £758,000. The people (about 120,000) are Muhammadans. The Sheikh has been in treaty relations since 1880 with the Government of India, who have a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court.

The Independent tribes on the *Persian* (Arab) Coast from Ras-el Khetma to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf, stationed at Bushire, is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *viâ* Lingah and Bahrein.

Important caravan routes converge at *Koweit*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

*Pol. Resident, Persian Gulf* (*Bushire*), Maj.-Gen. Sir P. Z. Cox, K.C.S.I., C.I.E. ..... *per annum* Rs. 4,000

*Do., Turkish Arabia* (*Baghdad*) (vacant).

*Pol. Agent, Muscat*, Major L. B. Haworth ..... Rs. 1,750

*Do., Bahrein*, Capt. P. G. Loch ..... ..... Rs. 800

*Do., Koweit*, Lt.-Col. R. E. A. Hamilton ..... Rs. 1,500

PERSIA borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1870 and 1895, was completed in 1905. A railway was opened in 1905 from Quetta to Nushki, and now extends to Dalbandin, whence there is a caravan route (208 miles), with wells, rest-houses, telegraph, &c., to Persian Seistan, but traffic is small. A trans-

Persian railway, linking Russia with India, is under discussion. By the Anglo-Russian Convention of August, 1907, N.W. Persia is recognised as a region in which Russia has special interests, while S.E. Persia, east of a line drawn from the Afghan frontier, viâ Gasik, Birjand, Kerman, and Bunder Abbas, is assigned as a region in which Russia will not seek political or commercial concessions, or oppose similar concessions supported by the British Government. In view of the unsettled state of Southern Persia, British forces occupied Bushire in August, 1915, with the consent of the Persian Government. The occupation terminated in October, 1917, the Persian Government having taken steps to ensure the security of British interests and the maintenance of order

ASIATIC RUSSIA.—A portion of the Russian Empire is contermінous with Persia and Afghanistan. The Russian Trans-Caspian Railway runs, viâ Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 490 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu Darya, or Oxus, which separates Bokhara from Afghanistan for 900 miles, is navigated by Russian steamers. Russian territory stretches into the Pamir Region—the "Roof of the World"—a wind-swept, icy mountain-land, snow bound for half the year. Its southern boundary was fixed in 1895 by the Anglo-Russian Pamir agreement.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

*Chinese Turkestan* is surrounded by the mountains of Transhan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. Russia has *special treaty rights in the dependency*. There is a British consul-general at Kashgar (Sir G. Macartney, K.C.I.E.). Trade with India is chiefly carried over the Karakoram Pass (18,600 feet) viâ Ladakh, in Kashmir

*Tibet*, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1916-17 was about £2,918,000. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung, but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on 3 August, 1904. A new Convention was signed (7 Sept.), providing for the erection of boundary pillars between Sikkim and Tibet, for three trade marts, with British and Tibetan agents, for unrestricted traffic by existing routes, and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions, but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1909, the ruler of Tibet, the Tashi Lama, visited India. The *Dalai* (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have refused to ratify it.

*Yunnan* is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, *and arrangements were made* regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £897,000 in 1913-16. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Têng-yuêh and Sanmao, near the Burma frontier, are treaty "ports." There are British consuls at Têng-yuêh and Yunnan-fu.

FRENCH LAOS.—Through the cession of a portion of Laos by China in 1894, France obtained access to the left bank of the Mekong at a point where this river forms the boundary of the Shan States of Burma. The territory forms part of French Indo-China (*q.v.*).

SIAM (*q.v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. In 1915-16 the value of the total trade was £4,631,000. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Mekong basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

The Indian Population was 127,941 in 1901, 105,611 in 1911, and 122,582 in 1921. The Eskimos numbered 3,149 in 1916.

## PHYSIOGRAPHY.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), *from* 49° North latitude to the Arctic seas, and from the Pacific to the Atlantic Ocean. The boundaries between the Ungava district of the Labrador peninsula (*transferred to Quebec in 1912*) and the Labrador coast region of Newfoundland are expected to be settled shortly by a Judicial Commission.

*Relief.*—From a physical point of view Canada may be divided into an eastern and a western division, the Red River Valley, in long. 97°, *forming the* separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, *from* Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Hooker, 15,700 feet) and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded.

*Climate.*—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

### GOVERNORS-GENERAL OF CANADA SINCE 1867.

| Name. | Date of Appointment. | Date of Assumption of Office. |
|---|---|---|
| Viscount Monck | June 1, 1867 | July 1, 1867 |
| Sir John Young (Lord Lisgar) | Dec. 29, 1868 | Feb. 8, 1869 |
| Earl of Dufferin (Marquess of Dufferin and Ava) | May 22, 1872 | June 25, 1872 |
| Marquess of Lorne | Oct. 5, 1878 | Nov 25, 1878 |
| Marquess of Lansdowne | Aug. 18, 1883 | Oct. 23, 1883 |
| Lord Stanley of Preston (Earl of Derby) | May 1, 1888 | June 11, 1888 |
| Earl of Aberdeen | May 22, 1893 | Sept. 18, 1893 |
| Earl of Minto | July 30, 1898 | Nov. 10, 1898 |
| Earl Grey | Sept. 26, 1904 | Dec. 10, 1904 |
| Field-Marshal H.R.H. the Duke of Connaught and Strathearn | Mar 21, 1911 | Oct. 13, 1911 |
| Duke of Devonshire, P.C., K.C., G.C.M.G., G.C.V.O. | Aug 8, 1916 | Nov 11, 1916 |

## GOVERNMENT

Canada is a self-governing Dominion within the British Empire, its constitution resting on the *British North America Act of 1867*, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

### Governor-General.

*Governor-General and Commander-in-Chief*, The Duke of Devonshire, P.C., K.G., G.C.M.G., G.C.V.O. .. .. .. .. £10,000

*Military Secretary and Secretary*, Lt.-Col. Hon. H. G. Henderson.

*Equerry and Comptroller of the Household*, Lord Richard Nevill, C.V.O., C.M.G.

*Aides-de-Camp*, Capt. R. O. R. Kenyon-Slaney, Grenadier Guards; Capt. F. Balfour-Johnson, Rifle Brigade; Capt. Angus A. Mackintosh, Royal Horse Guards.

*Honorary Aides-de-Camp*, Lt.-Col. H. R. Smith, C.M.G., D.S.O.; Lt.-Col. Sir A. P. Sherwood, K.C.M.G., M.V.O., Maj.-Gen. S. B. Steele, C.B., M.V.O.; Col. J. P. Landry; Maj.-Gen. R. E. W. Turner, V.C., C.B., D.S.O., Brig.-Gen. V. A. S. Williams, Col. Sir Henry M. Pellatt, C.V.O., Maj.-Gen. H. E. Burstall, C.B., Col. S. J. Denison, C.M.G.

*Private Secretary*, A. F. Sladen, C.V.O., C.M.G.

### THE EXECUTIVE.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council.

#### War Cabinet

Rt. Hon. Sir Robert Laird Borden, G.C.M.G., M.P.
Hon. Sir William Thomas White, K.C.M.G., M.P.
Hon. Arthur Meighen, K.C., M.P.
Hon. Sir James Alexander Lougheed, K.C.
Major-General Hon. S. C. Mewburn, C.M.G.
Hon. J. A. Calder, M.P.
Hon. Newton Wesley Rowell, K.C., M.P.

#### Union Government

*Prime Minister and Secretary of State for External Affairs*, Rt. Hon. Sir Robert Laird Borden, G.C.M.G., M.P. .. .. *$12,000

*President of Privy Council*, Hon. Newton Wesley Rowell, K.C., M.P. .. .. 7,000

*Minister of Militia and Defence in Canada*, Major-General Hon. S. C. Mewburn, C.M.G., M.P. .. .. .. .. 7,000

*Minister of Overseas Military Forces in London*, Hon. Sir Albert Edward Kemp, K.C.M.G., M.P. .. .. .. .. .. 7,000

*Minister of Railways and Canals*, Hon. John Dowsley Reid, M.D., M.P. .. 7,000

*Minister of the Interior*, Hon. Arthur Meighen, K.C., M.P. .. .. .. 7,000

*Minister of Customs*, Hon. Arthur L. Sifton, K.C., M.P. .. .. .. .. 7,000

*Minister of Agriculture*, Hon. T. A. Crerar, M.P. .. .. .. .. 7,000

*Minister of Immigration and Colonization*, Hon. J. A. Calder, M.P. .. .. .. 7,000

*Secretary of State*, Hon. Martin Burrell, M.P. .. .. .. .. .. .. 7,000

*Minister of Trade and Commerce*, Rt. Hon. Sir George Eulas Foster, K.C.M.G., M.P. 7,000

*Minister of Finance*, Hon. Sir William Thomas White, K.C.M.G., M.P. .. .. 7,000

*Solicitor-General*, Hon. Hugh Guthrie, M.P. 7,000

*Minister of Justice*, Hon. Charles Joseph Doherty, K.C., LL.B., M.P. .. .. .. 7,000

*Postmaster-General*, Hon. Pierre Edouard Blondin, M.P. .. .. .. .. .. 7,000

*Minister of Inland Revenue*, Hon. Albert Sévigny, M.P. .. .. .. .. .. $7,000

*Minister of Public Works*, Hon. F. B. Carvell, M.P. .. .. .. .. .. 7,000

*Minister of Marine and Fisheries*, Hon. C. C. Ballantyne .. .. .. .. .. 7,000

*Minister of Labour*, Hon. Gideon Decker Robertson .. .. .. .. .. .. 7,000

*Ministers without Portfolio*, Hon. Frank Cochrane, M.P., Hon. Sir James A. Lougheed, K.C., Hon. Alexander K. Maclean, M.P.

* Note.—In every case—including the Prime Minister's—the thousand five hundred dollars is paid in addition to a Minister of the Crown as his sessional indemnity as a member of either the Senate or the House of Commons of Canada.

### GOVERNMENT DEPARTMENTS.

#### Privy Council Office.

*Clerk of the Privy Council*, Rodolphe Boudreau .. .. .. .. .. $5,000

*Assistant do.*, F. K. Bennetts .. .. 3,500

*Secretary, Imperial and Foreign Correspondence*, William Mackenzie .. .. .. .. 3,600

#### Trade and Commerce.

*Minister of Trade and Commerce*, Rt. Hon. Sir George Eulas Foster, P.C., K.C.M.G., D.C.L. .. .. .. .. .. 7,000

*Deputy Minister*, F. C. T. O'Hara, F.S.S. 5,000

*Dominion Statistician and Controller of Census*, R. H. Coats .. .. .. .. 3,700

*Chief Asst. to Dep. and Accountant*, T. J. Code .. .. .. .. .. .. .. 3,200

*Chief Trade Statistician*, W. A. Warne .. 2,800

*Grain Statistician*, J. Byrnes .. .. .. 2,400

*Secretary, Census Branch*, E. H. St. Denis 3,100

*Supt. of Compilation*, E. S. MacPhail .. 2,900

*Editor*, E. H. Godfrey, F.S.S. .. .. .. 2,300

#### Department of State.

*Secretary of State*, Hon. Martin Burrell 7,000

*Private Sec.*, J. L. K. Lafleur .. .. .. 3,000

*Under Secretary*, Thomas Mulvey, B.A., K.C. .. .. .. .. .. .. 5,000

*Asst. do.*, P. Pelletier .. .. .. .. .. 3,850

*Accountant*, F. Coleon .. .. .. .. 3,200

*Asst. Dep. Registrar General*, L. W. Shorr 2,200

*Chief Clerk, Naturalization Branch*, A. Brophy .. .. .. .. .. .. .. 2,800

*Dominion Archivist*, A. G. Doughty, C.M.G., LL.D. .. .. .. .. .. .. 4,000

#### Department of External Affairs.

*Deputy Head (Under Secretary of State for External Affairs)*, Sir Joseph Pope, K.C.M.G., C.V.O., LL.D. .. .. .. .. 5,000

*Asst. Under-Sec.*, W. H. Walker, I.S.O. .. $3,400
*Accountant*, F. M. Baker .. .. .. .. 2,500

*Department of Public Printing and Stationery.*
*King's Printer and Comptroller of Stationery*, J. de L. Taché .. .. .. .. $5,000
*Asst. King's Printer*, Fred Cook .. .. .. 4,000
*Supt. of Printing*, F. R. Boardman .. .. 3,500
*Supt. of Stationery*, J. O. Patenaude .. 3,500
*Accountant*, J. A. Frigon .. .. .. .. 2,200

*Department of Mines.*
*Minister of Mines*, The Secretary of State.
*Deputy Minister*, R. G. McConnell, M.A., F.G.S.A. .. .. .. .. .. .. 5,000
*Director of Mines Branch*, Eugene Haanel, Ph.D. .. .. .. .. .. .. 3,850
*Asst. Director, Geological Survey*, John Macoun, F.L.S., F.R.S.C. .. .. .. 3,500
*Secretary*, Percy H. Selwyn .. .. .. .. 2,100
*Accountant*, John Marshall .. .. .. .. 2,200

JUSTICE.

*Minister of Justice and Attorney-General of Canada*, Hon. Charles Joseph Doherty, D.C.L. .. .. .. .. .. .. 7,000
*Private Sec.*, P. T. Ahern, M.A. .. .. 2,800
*Solicitor-General of Canada*, Hon. Arthur Meighen, K.C., B.A. .. .. .. .. .. 6,000
*Deputy Minister*, E. L. Newcombe, C.M.G., K.C., M.A., LL.B. .. .. .. .. .. 10,000
*Inspectors of Penitentiaries*, Douglas Stewart, $3,500, W. St. P. Hughes .. 3,850
*Chief Commissioner, Dominion Police*, Col. Sir A. P. Sherwood, K.C.M.G., M.V.O. 5,000

MARINE AND FISHERIES.

*Minister of Marine and Fisheries and of Naval Service*, Hon. C. C. Ballantyne .. 7,000
*Deputy Minister*, Alexander Johnston .. 5,000
*Asst. do.*, Cameron Stanton .. .. .. .. 4,000
*Chief Accountant*, A. Boyle .. .. .. 3,250
*Chief, Records Branch*, J. E. McGlenaghan 2,700
*Chief Engineer*, Lt.-Col. W. P. Anderson, C.M.G. .. .. .. .. .. .. .. 4,000
*Asst. do.*, B. H. Fraser .. .. .. .. .. 3,000
*Purchasing Agent*, George H. Flood .. .. 3,300
*Commissioner of Lights*, J. G. Macphail, B.Sc. .. .. .. .. .. .. .. .. 3,300
*Commander of Marine Service*, Comm. H. Thompson, R.N. .. .. .. .. .. .. 3,500
*Gen. Supt., St. Lawrence Pilotage*, H. St. George Lindsay .. .. .. .. .. .. 3,000
*Chief Wreck Commissioner*, Capt. L. A. Demers .. .. .. .. .. .. .. 3,200
*Chairman, Lighthouse Board*, A. Johnston (Deputy Minister) .. .. .. .. .. ..
*Director, Meteorological Service* (Toronto), Sir R. F. Stupart .. .. .. .. .. 4,000
*Chairman, Board of Steamboat Inspection*, T. R. Ferguson .. .. .. .. .. .. 2,000

*Department of Naval Service.*
*Deputy Minister*, G. J. Desbarats, C.M.G., C.B. .. .. .. .. .. .. .. .. 6,000
*Director*, Vice-Admiral C. E. Kingsmill 5,000
*Secy., Actg. Paymaster* H. G. Pinsent, R.N.
*Commander and Chief of Staff*, Comm. R. M. T. Stephens, C.M.G., R.C.N. .. ..
*Consulting Naval Engineer*, Eng.-Comm. A. M. Darley, R.N. .. .. .. .. .. ..
*Commissioner of Fisheries and International Commissioner*, E. E. Prince, LL.D 4,000
*Supt. of Fisheries*, W. A. Found. .. .. 3,500

POST OFFICE.

*Postmaster-General*, Hon. Pierre Edouard Blondin .. .. .. .. .. .. .. .. 7,000
*Deputy P.M.G.*, E. M. Conlier, C.M.G., M.D. 5,000

*Sec.*, Whitehead Kluttz, Washington, D.C. 4,000

CANADA.

*Chairman*, Charles A. Magrath ... ... 7,500
*Commissioners*, Henry A. Powell, K.C. Pierre B. Mignault, K.C. ... ... ...each 7,500
*Secretary*, Lawrence J. Burpee, Hope Chambers, Ottawa ... ... ... ... 4,000

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The *Senate* consists of 87 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for *Ontario*, 24 for Quebec, 10 for *Nova Scotia*, 10 for *New Brunswick*; 4 for *Prince Edward Island*, 6 for *British Columbia*, 4 for *Manitoba*, 4 for *Alberta*, and 4 for *Saskatchewan*, each nominee must be thirty years old, a resident in the province for which he is appointed, a natural born or naturalised subject of the King, and the owner of a property qualification amounting to $4,000. The *House of Commons* is chosen every five years at longest, and the 1921–26 Parliament consists of 245 members, future Houses will contain 234 members, elected as follows: 82 for *Ontario*, 65 for *Quebec*, 16 for *Nova Scotia*, 11 for *New Brunswick*, 15 for *Manitoba*, 13 for *British Columbia*, 3 for *Prince Edward Island*, 12 for *Alberta*, 16 for *Saskatchewan*, and 1 for *Yukon*. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum.

The Houses of Parliament were destroyed by fire in 1916, the new buildings being started the following year.

*Speaker of the Senate*, Hon. Joseph Bolduc $4,000
*Clerk of the Senate*, Austin Blount ... ... 5,000
*Law Clerk*, J. G. A. Creighton, C.M.G., K.C. 4,000
*Gentleman Usher of the Black Rod*, Ernest J. Chambers ... ... ... ... ... ... 1,460

| | |
|---|---|
| *Serjt.-at-Arms*, J. D. Rs, K.C. | Included |
| *Speaker of the Senate of Canada*, | 4,000 |
| *Clerk of the House*, T. B. Flint, D.C.L. | 5,000 |
| *Asst. Do.*, J. B. E. Lapierre | 4,000 |
| *Sergeant-at-Arms*, Col. Henry E. Smith, C.M.G., A.D.C. | 4,000 |
| *Parliamentary Counsel*, Francis H. Gisborne, LL.D., K.C. | 5,000 |
| *Clerk of the Crown*, James G. Foley | 1,500 |

## THE JUDICATURE.

*The Judicature.*—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

| | |
|---|---|
| *Chief Justice of Canada*, Rt. Hon. Sir Charles Fitzpatrick, P.C., G.C.M.G., LL.D. | $10,000 |
| *Puisne Judges*, Hon. Sir Louis Davies, K.C.M.G., Hon. J. Idington, Hon. Lyman Poore Duff, Hon. F. A. Anglin, Hon. Louis Philippe Brodeur | each 9,000 |
| *Judge of the Court of Exchequer for the Dominion*, Hon. Walter Cassels | 8,000 |
| *Assistant Judge of the Exchequer Court*, Hon. Louis A. Audette, LL.D. | 6,000 |
| *Registrar of the Supreme Court*, E. R. Cameron, K.C. | 5,000 |
| *Registrar of the Exchequer Court*, C. Morse, K.C., D.C.L. | 3,500 |

## DEFENCE.

Service in the Militia is universal and compulsory *on all male citizens from 18 to 60*. Service in the *Active Militia* is for 3 years with 8–16 days' annual training. The *Peace Effective* consists of a Permanent Staff of 3,447 officers and men, and 78,300 undergoing service. The *War Effective* consists of four classes: the unmarried men 18 to 30, the unmarried men 30 to 40, the married men 18 to 45, and, finally, the remaining male citizens of all to 60, a total of 2,153,000.

*Expeditionary Force.*—Up to 1 Sept. 1916, there had been sent overseas for active service 210,304 officers and men. Training in camps, 122,376.

### Militia Council.

*President*, The Hon. Albert Edward Kemp, M.P.
*Vice-President*, Surg.-Gen. E. Fiset, C.M.G., D.S.O.
*Chief of the Gen. Staff*, Maj.-Gen. W. G. Gwatkin, C.B.
*Adjutant-Gen.*, Br.-Gen. V. A. S. Williams, A.D.C.
*Quartermaster-General*, Maj. Gen. D. A. Macdonald, C.M.G., I.S.O.
*Master-Gen. of the Ordnance*, B.-Gen. H. M. Elliot.
*Finance Member*, J. W. Borden.
*Secretary*, E. F. Jarvis.

*Inspector-General Eastern Canada*, Maj.-Gen. F. L. Lessard, C.B.
*Inspector-General Western Canada*, Maj.-Gen. S. M. Steele, C.B., M.V.O.

## Royal Canadian Navy.

Steps are being taken to establish a *Royal Canadian Navy*, but opinion is divided as to the method to be adopted. There are Naval stations on the Atlantic and Pacific, and two vessels, H.M.C.S. *Niobe* and H.M.C.S. *Rainbow*, are used as training ships for the Royal Canadian Navy.

## EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are 26,000 elementary and secondary schools (attendance at the former being compulsory), with over 1,281,248 pupils, and 60 universities and university colleges with 40,000 students. The 20 universities had about 10,000 students in 1914.

## PRODUCTION AND INDUSTRY

*Agriculture and Live Stock.*—For the whole of Canada the area estimated to be sown to field crops in 1913 was 37,089,495 acres, as compared with 36,120,175 in 1914—wheat 12,386,400 acres, oats 11,384,000, barley 1,500,300, other grain crops 2,000,300, potatoes and other roots 629,300, hay and clover 7,875,000, fodder corn 343,400, and alfalfa 50,275 acres. The live stock (1913) included 4,996,039 horses, 6,066,091 cattle, 2,078,682 sheep, and 3,111,900 pigs. According to the Census of 1911 there were 3,629 butter and cheese factories and 5 factories for preserved milk and cream, the *total value of all dairy products being* $39,243,089 in 1911.

| Crops. | | Produce. 1913. | 1913. |
|---|---|---|---|
| Wheat | (bushels) | 53,572,368 | 376,393,600 |
| Barley | " | 22,224,366 | 33,331,300 |
| Oats | " | 731,497,407 | 520,103,000 |
| Rye | " | 6,316,793 | 6,895,100 |
| Corn (Maize) | " | 23,873,929 | 14,368,080 |
| Buckwheat | " | 4,547,152 | 7,681,900 |
| Peas | " | 12,208,943 | 3,476,850 |
| Flax | " | 172,222 | 10,026,000 |
| Mixed Grains | " | — | 27,593,120 |
| Beans | " | 861,347 | 723,400 |
| Potatoes | " | 55,362,252 | 60,824,200 |
| Turnips, mangels, &c. | " | 76,073,642 | 64,281,000 |
| Hay and Clover | (tons) | 7,852,731 | 10,953,000 |
| Hops | (lb.) | 1,004,216 | 12,208,200 |
| Tobacco | " | 11,268,732 | †17,604,897 |
| Fodder Corn | (tons) | — | 5,429,870 |
| Sugar Beet | " | — | 141,000 |
| Alfalfa | " | — | 261,985 |

The total value of farm property in Canada was $4,231,840,696 in 1911 the total value of the principal field crops was $797,869,300 in 1913.

*Fisheries.*—The fisheries are an important source of wealth, and include salmon, cod, herrings, mackerel, and lobsters, the total value of the catch in 1913-18 being $35,880,708.

*Forestry.*—The lumber, lath and shingles produced in Canada in 1913 had a total value of $69,730,000. The value of cross ties, and telegraph and telephone poles purchased by Railway and Electric Companies in 1913 was $3,779,877. Wood used in the pulp industry in 1913 was valued at $9,426,217, the forests have a total estimated area of nearly 988,300,000 acres. The area of commercial timber is estimated at 225,000,000 acres.

*Manufactures.*—The industrial establishments of all kinds numbered 29,218 in 1911, with a total capital of $2,247,783,609, the value of the products being $1,165,879,639, 515,209 persons were employed, the salaries and wages amounting to $242,028,476.

*Minerals.*—The metals produced in 1913 were valued as follows:—Gold, $28,936,071, silver, $14,688,227; copper, $19,228,307, nickel, $22,423,348; lead, $2,841,228, and pig iron (from Canadian and foreign ores), $23,392,829; the non-metallic minerals included coal, $23,987,787, Portland cement, $6,977,094; asbestos and asbestic, $3,872,289, petroleum, 3,241,292 gallons, natural gas, $2,392,829, clay products, $3,351,202, and stone, $4,894,999.

* Short tons of 2,000 lb. † Census figures for 1911.

## EXTERNAL TRADE

The total trade of Canada for certain years since 1908 is stated as follows, in dollars ($4.867 = £1 sterling). (Includes imports and exports of coin and bullion.)

| Year | Imports. | Exports. | Total Trade. |
|---|---|---|---|
| | $ | $ | $ |
| 1908-9 | 303,796,608 | 281,512,159 | 585,308,767 |

## COMMUNICATIONS.

*Railways.*—The total length of railways in operation on June 30, 1913, was 35,580 miles, the total capital involved being $2,875,820,882, the earnings being $199,843,072, and the working expenses $147,732,096. In 1914-15, there were also 1,390 miles of electric railways with a capital of $130,585,342, earning $26,922,900 in 1914-15, with working expenses $18,131,842. During the year ended 30 June, 1913, $66,090,127 was added to the capital liability of steam railways, an increase of $2,977,422 in consolidated debenture stock, an increase of $60,322,267 in the funded debt, and a decrease of $4,300,252 in stocks.

| Name. | Miles operated. | Capital. |

| P.E.I. | 273 | 9,496,567 |
| National Transcontinental | 1,994 | *152,802,746 |
| Canada Southern | 380 | 37,630,000 |
| Canadian Northern System | 7,980 | 415,921,374 |
| Canadian Pacific | 12,823 | 536,145,983 |
| Grand Trunk Pacific | 2,229 | 193,341,300 |
| Grand Trunk | 3,562 | 445,248,851 |
| Other Lines | 4,888 | 604,990,495 |
| Total, 1913 | 35,580 | †2,875,820,882 |

*Navigations.*—During the navigation season of 1913 Canadian vessels of 9,398,207 tons, and United States vessels of 7,389,102 tons passed over the canal systems, and 290,836 passengers, and 15,198,803 tons of merchandise chiefly grain, lumber and minerals, were carried in 1913.

*Posts and Telegraphs.*—There were 13,348 post offices in 1914-15, carrying 684,901,000 letters and 65,934,000 post-cards. The total value of money orders issued from 4,409 offices was $89,937,907, and the net postal revenue $13,046,692, expenditure $12,962,191. At the end of the calendar year 1913 there were 3,450 rural mail delivery routes on which were erected 134,183 boxes, the corresponding figures for the calendar year 1914 were 8,727 routes and 126,883 boxes. The length of Government telegraph lines in 1913 was 11,343 miles (including 362 miles of cables), and the number of offices was 870, from which 377,849 messages were sent and received. The chartered telegraph companies have a line mileage of 38,808, carrying 284,602 miles of wire (including 968 miles of cables), and 3,342 offices, from which 12,348,293 messages were sent and received. In 1913 there were 37 radio-telegraph stations operated in the public service of Canada, having a range of 100 to 730 nautical miles, or an average of about 297 nautical miles. There are also long distance stations at Glace Bay, Cape Breton, with a range of 3,000 nautical miles, and one at New castle, N.B., with a range of 2,500 nautical miles. Messages sent and received numbered 174,297. Twenty-three Government steamers are equipped with wireless, having a range of 226 to 400 miles, or an average of 270 miles.

On June 30, 1913, there were 533,090 telephones and 2,452,360 miles of telephone wire in use, of the latter, 1,009,249 miles were urban and 443,213 rural. The earnings amounted to $27,602,673, and the expenses to $22,856,713.

*Shipping.*—The sea-going and lake mercantile marine of Canada on Dec. 31, 1913, consisted of 4,622 sailing vessels and 4,132 steamers (total net tonnage 999,322 tons). The sea-going vessels entered and cleared at Canadian ports in 1913 numbered 37,762 (Canadian 12,386, British 6,847, Foreign 18,529), tonnage 24,827,630. The principal ports are Montreal, Toronto, Vancouver, Quebec, Halifax, St. John, N.B., and Ottawa.

## WEIGHTS, MEASURES AND CURRENCY.

The *System of Weights and Measures* is that of the United Kingdom, except that the cwt. = 100 lb. and the ton 2,000 lb., as in the U.S. The *Unit of Currency* is the dollar of 100 cents. $1 = 19 3/8 pence, English, i.e., $4.867 = £1 sterling. All British coins are legal tender, and there is a branch of the Royal Mint at Ottawa.

*Banking.*—There were 20 incorporate banks of issue in 1913, with liabilities $2,323,629,129 and average assets $2,396,424,643. The liabilities of undrawn deposits in Post Office and Government savings banks on March 31, 1916, amounted to $93,528,426, the depositors numbering 283,889.

* Capital cost of equipment not included.

† Not including capital expenditure on Intercolonial, P.E.I., and National Transcontinental Railways.

# Provinces of the Dominion

## ONTARIO

*Area and Population.*—The Province of Ontario contains a total area of 407,262 sq. miles, with a population (1921) of 2,933,662 (1,459,623 males and 1,474,039 females), an increase since the last census of 440,262 persons. In 1912 the Province was enlarged by about 146,500 sq. miles by the addition of a part of the Northern Territory, which has been named *Patricia*. Access was also granted to Port Nelson, in Hudson's Bay, over a five-mile strip from the new boundary of Manitoba to the Nelson River.

*Government.*—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 106 members elected for four years (no property qualification being necessary), representing 106 electoral districts into which the Province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of nine members, eight of whom act as the Ministry of the Province, and one is without portfolio; the Legislature meets every year at Toronto.

*Lieutenant-Governor*, Hon. Col. Sir J. S. Hendrie, K.C.M.G., C.V.O. (1914) ..... $20,000
*Official Sec.*, Maj. Clyde Caldwell, R.C.E. ..... 1,400

*Executive.*

*Premier and President of the Council*, Hon. W. H. Hearst, K.C. ..... $8,000
*Attorney-Gen.*, Hon. Isaac Benson Lucas ..... 4,000
*Deputy*, J. R. Cartwright, M.A., K.C. ..... 4,000
*Treasurer*, Hon. T. W. McGarry ..... 6,000

*Lands, Forests & Mines*, Hon. G. H. Ferguson ..... 6,000
*Deputy, Lands*, Albert Grigg ..... 4,000
*Deputy, Mines*, T. W. Gibson ..... 3,500
*Provincial Secretary*, Hon. W. J. Hanna ..... 6,000
*Assistant*, S. A. Armstrong ..... 3,500
*Public Works*, Hon. F. G. MacDiarmid ..... 6,000
*Assistant*, R. P. Fairbairn ..... 2,250
*Without Portfolio*, Hon. R. F. Preston.
*Clerk, Executive Council*, J. Lonsdale Capreol, K.C. ..... 2,800

*Speaker, Legislative Assembly*, Hon. D. Jamieson ..... 2,500

*Agent-General for Ontario in the British Isles.* Lieut.-Col. Richard Reid, 164, Strand, London, W.C. 2.

*The Judicature.*

*Chief Justice of Ontario and President of Supreme Court*, Hon. Sir William Meredith, *born* 1840 (1914). ..... $8,000

APPELLATE DIVISION.

*First Divisional Court*, Hons. James Magee, J. J. MacLaren, F. E. Hodgins. each $7,000
*Second Divisional Court, Chief Justice*, Hon. Sir Glenholme Falconbridge, Hons. W. R. Riddell, F. E. Latchford, H. T. Kelly, J. Lailey.

HIGH COURT DIVISION.

*Chancellor and President*, Hon. Sir John Alexander Boyd, K.C.M.G.
*Chief Justice*, Hon. Sir Wm. Mulock, K.C.M.G., Hon. Richard M. Meredith.
*Justices*, Hons. B. M. Britton, R. C. Clute, E. F. Sutherland, W. R. Middleton, H. J. S. Lennox.
*Master in Ordinary*, G. O. Alcorn, K.C. ..... $4,000
*Registrar Supreme Ct., Ct. of Appeal*, E. F. Paterson, K.C. ..... 3,300
*Master in Chambers*, J. A. C. Cameron ..... 3,600

*Agriculture and Live Stock.*—The total area is 241,219,200 acres, and in 1915 the total area of cleared land was 14,600,739 acres, of which 3,760,231 acres were under crops, the total value of the land being $794,323,364. The total area under pasture in 1915 was 3,230,420 acres, with 320,544 acres of orchards, small fruits, and vineyards. Average production in bushels per acre: Fall wheat, 30·5, spring wheat, 21·2, barley, 36·1, oats, 41·9, rye, 18·3, peas, 26·1, corn, 70·2, buckwheat, 22·1, beans, 14·1, potatoes, 76 turnips, 476, hay (tons), 1·32. 996 cheese factories produced 124,492,268 lb. of cheese, valued at $18,864,386, and 326 creameries made 28,088,748 lb. of butter ($9,368,653) in 1915. There were 779,131 horses, 2,674,742 cattle, 908,223 sheep, 1,769,293 pigs, and 14,273,291 poultry in 1915. Fruit is grown on an extensive scale, there are vineyards and peach orchards of 30 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph supplies a general education, together with a technical training in agriculture. The *students meet part of their expenses by labouring* on the experimental farm, the annual balance of cost for board, washing, and tuition being from £15 to £20 for natives and from £30 to £40 for students from other parts. Free grants of land are obtainable in this Province, and improved farms can also be bought at advantageous rates.

*Minerals.*—In 1915, 421,988 ounces of gold, valued at £1,720,276, were produced, as compared with 268,942 ounces in 1914, an increase of 53 per cent. There are seventeen profitable mines.

*Manufactures.*—The total value of manufactured products in 1910 was $570,800,203 (1920, $941,839,560), the principal manufacturing centres being (1921) Toronto ($154,304,948), Hamilton ($93,194,946), Ottawa ($60,921,332), London ($28,877,099), Brantford ($13,824,209), Windsor and Walkerville ($22,113,299), Berlin and Waterloo ($22,078,763), Peterborough ($20,879,121), Sault Ste. Marie and Kiealton ($17,840,384), Guelph ($17,301,178), St. Catharines's ($16,004,217), Galt ($16,291,600), Stratford ($8,171,840), and Chatham ($8,091,960).

*Principal Cities.*—CAPITAL, TORONTO, population (1921) 470,244, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (101,344), Ottawa, the Federal capital (101,789), with a large lumber trade and woodenware manufactories; London (46,300), Brantford (26,582), Kingston (21,261), Peterborough (20,822), Windsor (20,242); Port William (27,276), Berlin (19,256), Guelph (16,799), St. Thomas (16,754), Stratford (17,696), Owen Sound (12,584), St. Catharine's (17,196), Port Arthur (18,322), Sault Ste. Marie (15,252), Chatham (12,312); and Galt (12,262).

## QUEBEC.

*Area and Population.*—The Province of Quebec contains an area estimated at 706,834 square miles, with a population (1915-16) of 2,326,427, an increase since the last Census of 353,874. In 1912 the Province was enlarged by about 394,000 square miles by the addition of the greater part of the Labrador Peninsula, known as *Ungava*.

*Government.*—The Government of the Province is vested in a Lieutenant-Governor and a Legislative Council, consisting of 24 members appointed for life, and a Legislative Assembly of 83 members elected for five years to represent the same number of electoral districts in the Province.

*Lieutenant-Governor*, Hon. Sir Pierre Evariste Le Blanc, K.C.M.G., born 18—
(1916) .. .. .. .. .. .. .. .. $10,000

Dorion, L. A. Panneton, G Globensky, C. Lane .. .. .. .. .. each $6,000 to $7,000

*Representative of Quebec in London*, Lt.-Col. J P Pelletier, 78 Kingsway, W C. 2.

*Production and Industry.*—The total value of manufactured products in 1910 was $392,491,698 (1900, $238,185,991), the principal manufacturing centres being (1910) Montreal ($168,256,970), Maisonneuve ($20,870,714), Quebec ($17,149,282), Hull ($11,092,201), and Lachine ($8,022,716). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organize an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 250,000,000 acres, of which 44,000,000 are under licence to cut timber. The wood pulp industry is assuming great importance, several large factories have recently been built, and the value of the output, which was only $800,000 at the last Census, is now probably ten times that amount. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £8 per acre, including dwelling-house, outbuildings, and fencing, while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1916, was 6,278,239 acres. In 1916 there were 2,392 cheese factories, 697 butter factories, and 736 butter and cheese factories combined

*Education.*—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1914-15, 7,196 schools with 490,689 scholars, including the high and superior schools and 14 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and three Universities—two Protestant, McGill College, Montreal, and Bishop's College, Lennoxville, and Laval University, Roman Catholic.

*Principal Cities.*—CAPITAL, QUEBEC (population, 112,000), with a large export timber trade, and the great seaport town of Canada, and Montreal (population, 640,000, or with suburbs 770,000), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Maisonneuve (24,884), Hull (20,297), Eberbrooks (19,324), Westmount (14,579), Trois Rivières (20,000), Verdun (19,000), St. Hyacinthe (9,727), Sorel (8,729), and Levis (7,894).

## NOVA SCOTIA.

*Area and Population.*—NOVA SCOTIA is a peninsula between 43° 50'-47° N lat. and 60°-66° 28' W long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles (one-fifth of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1911, of 492,338 (251,209 males and 241,129 females), an increase since the last census of 32,964 persons.

*Government.*—The Government is administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 43 members.

*Lieutenant-Governor*, MacCallum Grant $5,000

*Executive.*

*Provincial Secretary*, Hon. G. H. Murray, LL.B., K.C. (*Premier*) .. .. .. .. .. $6,000
*Deputy Sec. and Clerk of the Executive Council*, F. F. Mathers, LL.B., K.C. .. $1,600

*Commissioner, Public Works and Mines*, Hon. E. H. Armstrong, K.C. ..... $5,000
*Deputy Comm. of Mines, &c.*, Hiram Donkin, C.E. ..... 6,000
*Attorney-Gen.*, Hon. C. T. Daniels, K.C. .. 5,000
*Deputy Attorney-General*, Stuart Jenks, LL.B., K.C. ..... 3,000
*Without Office*, Hons. J. M. Mack, G. E. Faulkner, J. W. Comeau, and R. M. MacGregor
*Secretary of Industries and Immigration, and Dep. Registrar Gen.*, Arthur S. Barnstead, LL.B. ..... 3,000

*The Legislature*

*President, Legislative Council*, Hon. M. H. Goudge.

*Speaker, House of Assembly*, Hon. Robert Irwin.

*The Judicature.*

*Chief Justice*, Hon. Sir Wallace Graham ..... $7,000
*Judge in Equity*, Hon. J. J. Ritchie ..... 6,000
*Puisne Judges*, Hons. Benjamin Russell, J. W. Longley, A. Drysdale, E. E. Harris, J. A. Chisholm ..... each 6,000
*Judge, Vice-Admiralty Court*, Hon. Arthur Drysdale ..... 600

*Agent-General for Nova Scotia in London*, John Howard, 57a Pall Mall, S.W. .. 3,000

*Agriculture and Live Stock.*—About 20,000,000 acres are fit for tillage, and the soil is unsurpassed for fertility. The climate is delightful, and the winter is not nearly so cold as in other parts of the Dominion. In 1901 there were 3,264,988 acres of land occupied (2,229,873 improved), of which 738,894 acres were under crop, 1,280,090 acres in pasture, and about 100,000 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding over 1,200,000 tons in 1901. Fruit is extensively cultivated, and Nova Scotia apples are claimed to be the best in the world. The yield has ranged in recent years from 600,000 to 1,500,000 barrels, the principal district being the Annapolis Valley. The total returns from the agricultural industry in 1901 were $22,886,960. Improved farms of 100 to 200 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer unsurveyed Crown lands at $80 per 100 acres, and 80 cents per acre for any additional quantity. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax.

*Minerals.*—The coal deposits are extensive and of good quality. 6,496,472 gross tons were produced in 1902, 314,504 tons limestone, and 270,000 tons of gypsum; iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney, Cape Breton; gold mines are being profitably worked.

*Manufactures.*—In 1901 there were 1,480 industrial establishments with a capital of $75,296,342 paying wages amounting to $10,808,992. The value of the total output in 1901 was $83,460,000 (1900, $69,290,972).

*Fisheries.*—In 1902 the sum of $9,120,000 represented the amount invested in the fisheries, the total value of the fish marketed being $8,190,000, and the number of persons employed being 29,000.

*Principal Cities.*—CAPITAL, HALIFAX (population 46,619), one of the terminals of the Intercolonial Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America. Other towns are Sydney (17,627), Glace Bay (26,569); Amherst (9,200), Sydney Mines (7,470), Truro (6,107), Yarmouth (5,800), New Glasgow (5,583), Spring Hill (5,573), North Sydney (5,428), and Dartmouth (5,098).

CAPE BRETON ISLAND.

*Cape Breton Island*, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,272 square miles, with a population of 100,084 inhabitants. The chief city, Sydney (pop. 17,627), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. It is stated that a graving dock is to be erected at Sydney by the Dominion Government at the estimated cost of $4,500,000. The Intercolonial Railway connects the island with the mainland.

NEW BRUNSWICK.

*Area and Population.*—NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47′—69° W. long., and comprises an area of 27,985 square miles, with a population in 1901 of 331,120 (170,267 males and 170,853 females), an increase since the last census of 20,769 persons. It was first colonised by British subjects in 1762, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

*Government.*—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 46 members elected by the people.

*Lieutenant-Governor* (vacant) ..... $5,000

*Executive.*

*Premier and Minister of Lands and Mines*, Hon. Walter E. Foster ..... $5,000
*Provincial Secretary and Treasurer*, Hon. Robert Murray ..... 2,100
*Public Works*, Hon. Peter J. Venlot ..... 2,100
*Attorney-Gen.*, Hon. James P. Byrne ..... 2,100
*Agriculture*, Hon. J. Fletcher Tweeddale ..... 2,100

*Deputy Provincial Secretary and King's Printer*, R. W. L. Tibbits.
*Deputy Provincial Treasurer*, Wm. Cruikshank.
*Deputy Minister of Lands and Mines*, T. C. Loggie.
*Secretary, Board of Works* (vacant).
*Deputy Minister of Agriculture*, William Rask.
*Clerk, Executive Council* (vacant).

*Speaker, Legislative Assembly*, William Curris.

*Representative in London*, Frederick W. Sumner, 39 Southampton Street, Strand, W.C.

*The Judicature.*

*Court of Appeal and Chancery Division.*
*Chief Justice*, Hon. E. McLeod ..... $7,000
*Judges*, A. R. White, W. C. H. Grimmer ..... each 6,000

*King's Bench Division.*
*Chief Justice*, Harrison A. McKeown ..... 7,000
*Judges* J. H. Barry, G. S. Crockett, William P. Chandler ..... each 6,000

*Court of Vice-Admiralty.*
*Judge*, Hon. E. McLeod ..... 1,000

*Court of Divorce and Matrimonial Causes.*
*Judge* (vacant) ..... 300

*Agriculture and Live Stock.*—In 1918 14,677 acres were under wheat, 294,321 under oats, and 45,211 under buckwheat, with 1,300 acres under barley. The produce in 1918 was 284,984 bushels of wheat, 8,883,965 bushels of oats, and 1,282,183 bushels of buckwheat. 44,583 acres of potatoes produced 8,148,827 bushels, and 9,135 acres of turnips 4,189,229 bushels. The live stock (1918) included 237,211 cattle, 136,233 sheep, 88,338 pigs, and 64,488 horses. The value of agricultural produce in 1921 was $28,959,200. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad. In 1918 there were 29 cheese factories in operation, producing 1,189,884 lb., value $211,692, and from 21 cream eries, 709,932 lb. of butter realised $295,194.

*Manufactures.*—The value of the total output of manufactured goods in 1920 was $731,401,302 (1920, $601,972,272), the principal manufacturing centre being St. John ($20,082,867). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found, also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

*Principal Cities.*—CAPITAL, FREDERICTON population (1921), 7,208. St. John (pop. 52,000) is one of the principal winter ports of Canada, and is connected by C.P. R. and Intercolonial Railways with Montreal. Moncton (12,260) Chatham (4,688).

## MANITOBA.

*Area and Population.*—Manitoba, formerly the Red River Settlement, is situated in about the centre of the continent, between 49°–60° N lat. and 92°—102° W long., with a total area of 251,832 square miles and a population (1916) of 553,860 (291,604 males and 259,256 females), an increase since the last census of 100,209.

*Government.*—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members and a Legislative Assembly of 49 members.

*Lieut.-Governor*, Hon. Sir J. A. Malkins (£ Aug., 1916) ... ... ... ... ... ... $9,000

*Executive.*

*President of Council and Commissioner of Provincial Lands*, Hon. T. C. Norris ... $6,000
*Provincial Secretary and Municipal Commissioner*, Hon. J. W. Armstrong, M.D. ... 3,000
*Provincial Treasurer*, Hon. Edward Brown ... 5,000
*Attorney-Gen.*, Hon. A. B. Hudson ... ... 5,000
*Minister of Education*, Hon. D. S. Thornton, M.D. ... ... ... ... ... 5,000
*Public Works*, Hon. Thomas H. Johnson ... 5,000
*Agriculture*, Hon. Valentine Winkler ... 5,000
*Public Utilities Commissioner*, Hon. P. A. McDonald ... ... ... ... ... ... 6,000

*Speaker, Legislative Assembly*, Hon. J. B. Baird ... ... ... ... ... ... ... 1,500

*The Judicature.*

*Court of Appeal*—
*Chief Justice*, Hon. H. M. Howell ... ... $8,000
*Puisne Judges*, Hons. C. P. Fullerton, W. H. Perdue, J. D. Cameron, Alexr. Haggart ... ... ... ... ... ... each 7,000
*King's Bench*—
*Chief Justice*, Hon. T. G. Mathers ... ... 7,000
*Puisne Judges*, Hons. D. A. Macdonald, T. L. Metcalfe, J. A. P. Prendergast, A. C. Galt, J. P. Curran, E. Meyers ... ... ... ... ... ... each $6,000

*Agriculture.*—The soil is fertile and productive, emigration is invited and encouraged, and liberal grants of land are made to settlers. In 1915 4,731,321 acres were cultivated, of which 3,364,281 acres were under wheat, and the crops were 96,682,921 bushels of wheat, 121,077,991 oats from 2,221,845 acres, 1,029,849 acres under barley produced 35,423,668 bushels, 85,389 acres under flax, rye, and peas yielded 1,289,336 bushels, and potatoes (67,343 acres) produced 7,736,368 bushels. *Dairy Products* 12,316,895 lb. butter, value $2,960,658, cheese, 1,533,192 lb., value $197,176, total value, including milk and cream, $5,845,184. In 1918 there were 329,594 horses, 631,029 cattle, 76,577 sheep, 286,433 pigs, and 1,320,240 turkeys, geese and chickens. The production of honey was 204,695 lb.

*Manufactures.*—The value of the total output in 1920 was $633,673,629 (1920, $322,997,432), the principal manufacturing centres being Winnipeg and St. Boniface ($39,290,608).

*Principal Cities.*—CAPITAL, WINNIPEG, population (1921), 179,432—the third largest city in Canada. Brandon (11,839), St. Boniface (7,282), Portage La Prairie (5,850).

## BRITISH COLUMBIA.

*Area and Population.*—British Columbia has a total area estimated at 372,630 to 395,600 square miles, with an estimated population in 1917 of 496,600, about 45,000 having gone to the Front, the Census of 1921 gave 524,482 (271,629 males and 252,853 females), an increase since the former census of 123,823.

*Government.*—The Government consists of a Lieutenant-Governor and an Executive Council, together with a Legislative Assembly of 47 members.

*Lieut.-Governor*, His Honour Frank S. Barnard ... ... ... ... ... ... $10,000
*Private Sec.*, H. J. S. Muskett ... ... ... 1,120

*Executive.*

*Premier & President of Council*, Hon. H. H. Brewster ... ... ... ... ... $9,000
*Provincial Sec. & Minister of Education*, Hon. J. D. MacLean ... ... ... ... 6,000
*Minister of Finance*, Hon. John Hart ... 6,000
*Minister of Agriculture & Railways*, Hon. John Oliver ... ... ... ... ... 6,000
*Minister of Lands & Labour*, Hon. T. D. Pattullo ... ... ... ... ... ... 6,000
*Attorney-General*, J. W. de B. Farris ... 6,000
*Minister of Public Works*, T. H. King ... 6,000
*Minister of Mines*, Hon. William Sloan ... 6,000

*Speaker, Legislative Assembly*, ...

*The Judicature.*

*Supreme Court—Chief Justice*, Hon. Gordon Hunter ... ... ... ... ... ... $7,000
*Puisne Judges*, Hons. D. Murphy, F. B. Gregory, W. F. P. Clement, Aulay Morrison, W. A. Macdonald ... ...each 6,000
*Court of Appeal—Chief Justice*, Hon. J. A. Macdonald ... ... ... ... ... 6,000
*Puisne Judges*, Hons. A. Martin, W. A. Gallagher, Albert E. McPhillips, D. M. Eberts ... ... ... ... ... ... each 5,000
*Local Judge in Admiralty*, Hon. Archer Martin ... ... ... ... ... ... ... 2,000

*Agent-General in London*, J. H. Turner (1917),

*Production and Industry.*—The total value of the output of manufactures in 1918 (estimated) was $[illegible].000.000 (1920, $[illegible].447.772), the principal manufacturing centres being Vancouver and Victoria. The yield of the other industries in 1918 was minerals, $40,290,480; lumber, $[illegible].918.000; fisheries, $[illegible].438.320; fruit and farm products, $30,259,137. There are extensive coal measures, and a vast and compact area of merchantable timber, the mines have produced over $[illegible].362.723, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are acres of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals, and timber

Revenue, 1918 (Budget), £1,200,000. Expenditure, 1918 (Budget), £2,200,000.

*Principal Cities.*—CAPITAL, VICTORIA. Population 1918 (estimated), 50,000. Other centres are Vancouver (93,000), New Westminster (17,000), Nanaimo (8,000), North Vancouver (8,000), Nelson (7,000), Prince Rupert (8,000), Kamloops (6,000), and Fernie (5,000).

## PRINCE EDWARD ISLAND.

*Area and Population.*—Prince Edward Island lies in the southern part of the Gulf of St Lawrence, between 46°-47° N lat. and 62°-64° 30' W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth, its area is 2,000 square miles (about equal to that of the English county of Norfolk), and its population (Census 1911) 93,728 (47,069 males and 46,659 females), a decrease since the last census of 2,543 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it, they seized it again, however, during the Seven Years' War (1756–1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

*Government.*—The Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

*Lieut.-Governor*, Hon. Augustine Colin Macdonald (1918).. ... ... ... ... ... ... $7,000

*Executive.*

*Premier and Attorney-Gen.*, Hon. John A. Mathieson ... ... ... ... ... ... ... $[illegible],500

*Provincial Sec. and Treas. and Commiss. of Agriculture*, Hon. Murdoch McKinnon ... 2,500

*Commissioner of Public Works*, Hon. J. A. McNeill ... ... ... ... ... ... ... 2,500

*Without Portfolio*, Hons. A. E. Arsenault, Stephen R. Jenkins, Murdock Kennedy, Harvey D. McEwen, Leonard Wood, Charles Dalton.

*Speaker, Legislative Assembly*, Hon. John S. Martin.

*Departmental Officers.*

*Provincial Auditor*, John Anderson ... ...$[illegible],500

*Sup. of Education*, Herbert H. Shaw, B.Sc. (acting) ... ... ... ... ... ... ... 2,500

*Asst. Sec. and Treas. and Clerk of Exec. Council*, Arthur Newbery, B.A.O. ... ... 2,500

*Sec. Public Works*, L. R. McMillan ... ... 2,500

*Registrar of Deeds and Commissioner of Public Lands* (vacant) ... ... ... ... 2,000

*The Judicature.*

*Chief Justice and Judge of Vice-Admiralty Court*, Hon. Sir W. W. Sullivan ... ... $[illegible],000

*Assistant Judge of Supreme Court and Master of the Rolls*, Hon. Francis L. Haszard 2,500

*Asst. Judge and V.-C.*, E. R. Fitzgerald ... 2,500

*Prothonotary and Clerk of the Crown*, W. A. O. Morson ... ... ... ... ... ... 1,250

*Agriculture and Live-Stock.*—There were (1914) [illegible],298 acres of improved land, of which 277,698 acres are under crops, 284,923 acres of pasture land, and 3,632 acres of gardens and orchards.

*Production and Industry.*—The value of the field crops in 1919 was estimated at $20,592,700, including oats (6,800,000 bushels), $9,274,000, wheat (633,600 bushels), $709,800, potatoes (3,498,000 bushels), $2,697,000, roots (3,921,000 bushels), $923,000. The value of the fisheries was estimated at $1,267,682.

The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from $20 to $60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity, after passing through an experimental stage for over twenty years, has now become an established and profitable industry. There are about 370 fox ranches, conducted by about 300 incorporated companies and also a number of private partnerships or individuals. The assessed value of the young foxes born in the spring of 1918 totals about $[illegible],000,000. Shareholders in fox ranches for the three years 1911–13 received from 20 per cent. to 200 per cent. on their investments. The valuation is at present greatly reduced owing to the war and the closing of the great fur markets.

*Manufactures.*—The total value of the manufactures in 1920 was $3,278,470, against $[illegible],[illegible],708 in 1910.

*Principal Cities.*—CAPITAL, CHARLOTTETOWN, on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Georgetown, Summerside, Souris, Kensington, and Alberton.

## ALBERTA.

*Area and Population.*—The Province of Alberta has an estimated area of about 253,540 square miles, including about 2,500 square miles of water, with a population (1918) of 496,127, compared with 374,663 in 1911.

*Government.*—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 56 members, elected for five years, representing 56 electoral districts into which the Province is divided. The Executive Council consists of eight members.

*Lieutenant-Governor*, Hon. R. G. Brett, LL.D. (1919).. ... ... ... ... $9,000

*Executive.*

*Premier and President of the Council, and Minister of Railways and Telegraphs*, Hon. Arthur L. Sifton ... ... ... ... $[illegible],500

*Attorney-General*, Hon. C. W. Cross ... ... 6,000

*Provincial Secretary*, A. J. McLean ... ... 6,000

*Provincial Treasurer*, Hon. C. R. Mitchell 6,000

*Public Works*, Hon. Charles Stewart ... ... 6,000

*Municipal Affairs*, Hon. W. Carlsty ... ... 6,000

*Education*, Hon. J. R. Boyle ... ... ... ... 6,000

*Agriculture*, Hon. R. L. Marshall ... ... ... 6,000

*Clerk of the Executive Council*, J. D. Hugh 4,000

*Speaker of the Legislative Assembly*, C. W Fisher ..... $2,500

*The Judicature.*

*Chief Justice*, Hon. Horace Harvey ..... $7,000
*Puisné Judges*, Hons. D. L. Scott, C. A. Stuart, N. D. Beck, W. C. Simmons, W. L. Walsh, J. D. Hyndman, W. C. Ives, M. S. McCarthy ..... each 6,000

*Agent-General in London*, John A. Reid, 1 Charing Cross, W. C. 2.

*Agriculture and Live Stock.*—There is a succession of wheatfields, homesteads, villages, and towns, while settlers from the U.S., Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops, 1918, was 3,419,800 acres. Total yield of grain, 122,429,500 bushels. Wheat, 1,479,800 acres, yielding 41,500,000 bushels; oats, 1,500,000 acres, yielding 72,000,000 bushels; barley, 297,000 acres, yielding 8,000,000 bushels; flax, 45,000 acres, yielding 584,000 bushels. The Department of Agriculture in the Provincial Government has established seven Demonstration Farms at different points, and on three of these are free schools of agriculture. Free homesteads are available for thousands of settlers in desirable localities. Animals slaughtered and sold, $33,000,000; dairy products, $12,500,000; wool clip (1,750,000 lb.), $250,000; game and furs, $2,000,000; poultry, $3,000,000. There were, in 1918, 621,000 horses, 440,500 swine, 139,200 sheep, 394,433 cows, 609,613 beef cattle, and 596,176 other cattle.

*Manufactures.*—The total value of the output in 1919 was $12,788,826, against $1,913,375 in 1900, the principal manufacturing centres being Calgary ($7,751,021) and Edmonton ($4,498,304).

*Principal Cities.*—CAPITAL, EDMONTON. Population (Census of 1916, 53,846). Calgary (56,514), Medicine Hat (9,670), Lethbridge (9,436), Wetaskiwin (2,048), and Red Deer (2,203).

## SASKATCHEWAN

*Area and Population.*—The Province of Saskatchewan lies between 101° - 110° West and 49°-60° North, and has an estimated area of 251,700 square miles, the population at the Census of 1916 being 647,835, an increase of 436,396 persons since the Census of 1901. The estimated rural population for 1918 is 471,673.

*Government.*—The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of eight members. The Province is divided into 79 electoral districts, each of which is represented in the Legislative Assembly by one member.

*Lieutenant-Governor*, Hon. Richard S. Lake (1915) ..... $9,000

*Executive.*

*Premier and Minister of Education*, Hon. W. M. Martin ..... $6,000
*Attorney-General and Provincial Secretary*, Hon. Alphonse Turgeon ..... 5,000
*President of Council, Railways and Highways*, Hon. J. A. Calder ..... 5,000
*Agriculture*, Hon. W. R. Motherwell ..... 5,000
*Public Works*, Hon. A. P. McNab ..... 5,000
*Municipal Affairs*, Hon. George Langley 5,000
*Minister of Telephones*, Hon. G. A. Bell
*Provincial Treasurer*, Hon. C. A. Dunning 5,000
*Clerk of the Executive Council*, J. W McLeod ..... 3,000

*Speaker of the Legislative Assembly*, Hon. Dr. E. M. Mitchell (acting).
*Clerk of the Legislative Assembly*, A. S. Page.

*The Judicature.*

*Chief Justice*, Hon. Sir Frederick W. G. Haultain born 1857 (1912) ..... $7,496
*Puisne Judges*, Hons. H. W. Newlands, C. Johnstone, J. H. Lamont, and J. T. Brown ..... each 4,496

*Agriculture and Live Stock.*—Of the total area, 191,340,320 acres are land, and of the total area surveyed, 78,361,297 acres are land, 1,825,496 are water, and 1,455,337 roads. Forest reserves and parks extend to 6,139,200 acres, and the Indian reserves amount to 1,131,949 acres, while 307,730 acres of Indian reserves have been surrendered. The area under homesteads, &c., was 26,320,000 acres in 1916, while 15,277,083 acres had been granted to railway companies, 2,202,800 to Hudson's Bay Company, 3,951,800 acres were school land endowment, and 76,921 had been sold under irrigation system. The area under grain crops in 1917 was 21,695,066 acres, including 7,862,307 acres under wheat.

The principal products are grain and cattle, and Government encouragement is being given to the dairy industry (In 1898 there were but 276,253 acres under wheat, whilst in 1921 there were 5,384,192. In 1898 4,780,440 bushels were produced, in 1916, 221,814,454 bushels.) The estimated crop area for 1921 was wheat, 7,862,307 acres, oats, 3,808,218, barley, 968,329, and flax, 596,112 acres.

*Principal Cities.*—CAPITAL, REGINA. Population (1919), 30,000. Moose Jaw, 24,000, Saskatoon (1919), 25,000, Prince Albert, 12,000, North Battleford, Swift Current, and Weyburn, each, 5,000.

## YUKON TERRITORY

THE YUKON TERRITORY, which occupies the north-western extremity of the Dominion, was constituted in 1898, and contains a total area of 207,076 square miles, with a population in 1921 of 8,512 (5,518 males and 2,024 females). It is bounded on the west by Alaska, on the south by British Columbia, on the north by the Beaufort Sea, and on the east by the N.W. Territories. The Government is administered by a Commissioner, with a Legislative Council of 12 members. The *capital, Dawson, Yukon River, has a population* of 3,013 persons.

*Commissioner*, George N. Williams (1919) $6,000
*Gold Commissioner and Crown Timber and Land Agent*, George P. Mackenzie ..... 4,000
*Assistant do. (White Horse)*, R. C. Miller 4,000
*Comptroller*, G. A. Jeckell ..... 2,700
*Registrar*, A. E. Lamb ..... 2,800
*Judge*, Hon. C. D. Macaulay
*Territorial Secretary and Treasurer*, J. A. M. H. Malthy

## NORTH-WEST TERRITORIES.

THE NORTH WEST TERRITORIES of Canada comprise the present unorganised part of British North America lying to the north of the Provinces of Quebec, Ontario, Manitoba, Saskatchewan, and Alberta, and comprise a total area estimated at 1,242,734 square miles, a reduction of nearly 200,000 square miles since the Census of 1911, owing to the transfer of Ungava to the Province of Quebec in 1912 and by rearrangements of boundaries with Manitoba and Ontario in the same year. The population in 1921 was ascertained to be 23,296 (8,673 males and 8,303 females), a decrease since 1911 of 2,231 persons.

*Commissioner of N.W.T. and Comptroller of the Canadian Royal North-West Mounted Police*, Frederick White, C.M.G. (Ottawa).

## PHYSIOGRAPHY

The Island of Newfoundland is situated between 46° 37′–57° 39′ N latitude and 52° 35′–59° 24′ W longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of pine and birch. The climate is salubrious, and the people are a strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

## GOVERNMENT

Newfoundland is the oldest English colony, for it was discovered by John Cabot on June 24, 1497, the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Corterecal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses. The *Legislative Council* is appointed by the Crown and consists of 24 members, the *House of Assembly* consists of 36 members, elected by the people, every male British subject aged 21 being entitled to the franchise.

### GOVERNOR.

*Governor*, His Excellency Sir Chas. Alexander Harris, K.C.M.G., C.B., C.V.O. ..... £12,500
*Private Sec.*, Hon. R. Watson .. .. .. 500

### THE MINISTRY

*Premier*, *Rt. Hon. Sir Edward P. Morris, P.C., K.C.M.G., LL.D .. .. .. .. .. .. $4,000
*Colonial Secretary*, *Hon. J. R. Bennett.... 2,000
*Minister of Justice*, *Hon. W. F. Lloyd... 2,000
*Minister of Finance and Customs*, *Hon. M. P. Cashin .. .. .. .. .. .. 2,000
*Minister of Agriculture and Mines*, *Hon. E. D. Blandford .. .. .. .. .. 2,000
*Minister of Marine and Fisheries*, A. W. Piccott .. .. .. .. .. .. 2,000
*Auditor-General*, F. C. Berteau, I.S.O. .. 2,000
*Minister of Public Works*, Wm. Woodford 2,000
*Postmaster-General* (vacant) .. .. .. .. 2,000

(The Ministry in July, 1917, was enlarged from 9 to 12 members.)

### LEGISLATURE.

The *Legislative Council* consists of not more than 24 members, appointed for life; the *House of Assembly* of 36 members, elected by the people for 4 years.

*Pres. of the Legislative Council*, Hon. John Harris.
*Speaker of the House of Assembly*, Hon. John R. Goodison. .. .. .. .. .. .. $900

* The Ministers with an asterisk before their names, together with the Hons. C. H. Emerson, K.C., E. E. Bishop, M. P. Gibbs, K.C., and J. C. Crosbie, form the Executive Council.

## JUDICATURE.

*Chief Justice*, Hon. Sir W. H. Horwood .. $6,000
*Assist. Judges*, Hon. G. M. Johnson, Hon. J. M. Kent ... ... .. ... ... ...each 4,000

## DEFENCE.

Expeditionary Force, 3,000; Naval Reserve, 1,600.

## EDUCATION.

Education is denominational, and is assisted by Government. Primary schools were attended in 1913 by 36,307 pupils, and Secondary schools by 1,339 students. The Government grants in 1913 amounted to $366,923.

## RELIGION.

At the Census of 1901 and 1911 the following statistics were obtained —

| Religion. | 1901. | 1911. |
|---|---|---|
| Roman Catholics ... .. | 75,989 | 81,177 |
| Church of England .. .. | 73,658 | 78,610 |
| Methodists .. ... .. | 61,388 | 68,045 |
| Presbyterians .. | 1,457 | 1,876 |
| Salvation Army ... ... | 6,504 | 10,141 |
| Various .. ... .. | 2,305 | 2,767 |

## FINANCE.

The revenue, expenditure and debt of Newfoundland for the six years ended June 30, 1910-1915, are stated as under ($1 = 4*s.* 2*d.* or $4 2 = £1 sterling):—

| Year. | Revenue. | Expenditure. | Public Debt. |
|---|---|---|---|
| | $ | $ | $ |
| 1909-10 | 2,447,089 | 2,737,775 | 22,943,197 |
| 1910-11 | 2,597,126 | 2,384,747 | 27,176,280 |
| 1911-12 | 2,736,496 | 2,994,653 | 27,429,937 |
| 1912-13 | 2,923,240 | 3,803,587 | 29,470,060 |
| 1913-14 | 2,820,178 | 3,090,178 | 30,450,765 |
| 1914-15 | 2,960,790 | 4,008,823 | 31,494,678 |

## EXTERNAL TRADE.

The external trade of the island for the five years ending June 30, 1915, is stated as follows :—

| Year. | Imports. | Exports. | Total. |
|---|---|---|---|
| | $ | $ | $ |
| 1910-11 | 13,583,920 | 11,978,747 | 25,562,667 |
| 1911-12 ... | 14,733,490 | 13,739,284 | 28,472,774 |
| 1912-13 ... | 16,012,363 | 14,672,687 | 30,685,050 |
| 1913-14 ... | 15,191,726 | 13,134,452 | 30,326,178 |
| 1914-15 ... | 12,390,726 | 13,136,880 | 25,527,606 |

The trade was distributed in 1914-15 as under :—

| Country. | Imports from. | Exports to. |
|---|---|---|
| United Kingdom ..... .. | $8,311,946 | $3,196,393 |
| United States ... ..... | 4,043,730 | 1,277,389 |
| Canada ..... ... ... | 4,890,327 | 1,394,869 |
| Portugal ..... ... | 9,966 | 1,023,746 |
| Brazil ..... ... ... ..... | 397 | 2,829,611 |

The principal imports in 1914-15 were flour, textiles, coal, hardware, and provisions; the principal exports were codfish, value $7,192,087; cod, whale, and seal oil, value $826,368; seal-skins, $396,293; tinned lobsters, $90,228; copper, copper ore, iron pyrites, and other minerals, $868,824; total value of the fishery products in 1914-15, $9,630,789.

## PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 20,000 being engaged in fishing—for cod in summer, a large proportion of which is exported to South America, and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. During 1914-15 there was exported from Grand Falls and Bishop Falls 69,296 tons of paper, valued at $2,897,253, and 98,451 tons of pulp, valued at $939,222, most of which was consigned to the United Kingdom. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's, assays running as high as 29½ per cent.

## COMMUNICATIONS.

*Railways.*—There were 899 miles of railway open in 1915. The trans-insular line runs to Port-aux Basques, old Exploits River and Bay of Islands, with branch connexions to Placentia, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Branch lines are under construction.

*Posts and Telegraphs.*—There were 738 post-offices in 1915, dealing with 3,750,000 letters and post-cards, 3,400,000 newspapers and books, and 130,950 parcels. There are 4,995 miles of telegraph line and 899 of telephone wire.

*Shipping.*—On Dec. 31, 1913, the Mercantile Marine of Newfoundland consisted of 2,339 sailing vessels of 133,726 tons, and 98 steam vessels of 20,852 tons. In 1914-15 the tonnage of vessels entered and cleared at Newfoundland ports was 1,962,342 tons, of which 1,446,297 tons were British.

## TOWNS.

The CAPITAL, ST JOHN'S (population 32,292), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (4,979), Carbonear (3,540), Twillingate (3,348), and Bonavista (3,921).

## LABRADOR.

*Labrador*, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chudleigh, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north, the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for settlement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the universe is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 800 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Maggovik, Hopedale, Nain, Okak, Hebron, and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet, to deal with the almost inexhaustible supply of timber.

# Australia.

* Included in New South Wales.

† The Aboriginal inhabitants of Australia are not enumerated in the Census, with the exception of half-castes and those employed at stations, &c. Their numbers are estimated not to exceed 100,000, many of whom live in the unsettled districts.

‡ Exclusive of Papua, or British New Guinea, a dependency of the Commonwealth. Its capital is Port Moresby, and its area 90,540 square miles. White inhabitants numbered 1,250 in 1911, 1,219 in 1913, 1,208 in 1914, and 1,219 in 1915. The United population is estimated at 350,000.

## PHYSIOGRAPHY

The territory of the Commonwealth includes the Continent of Australia, the Island of Tasmania, Norfolk Island, and part of the island of New Guinea (Papua)

Australia (mainland) is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest of the Continents, being surrounded by the following waters —*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean, *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean, and *West*, Indian Ocean The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent as between 10° 41'–39° 8' *South latitude* and 113° 9'–153° 39' *East longitude*; the greatest distance East to West is 2,400 miles, and from North to South 1,971 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular and undulating plateau, sometimes below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity, the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N to S, and the tertiary formation to be found in the N, S, and W develops in the S E. into a gigantic tertiary plain, watered by the *Darling* and the *Murray* Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep The most extensive mountain system takes its rise near the S F point, and includes a number of ranges known by different names in different places, none of them being of any great height. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S E. part of the island, which fall into the sea on the south coast on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane Mary, Burnett, Fitzroy, and Burdekin, on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy, on the north, the Drysdale, Ord, Victoria, and Daly, and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt, the scarcity of the natural water supply has been, however, mitigated by successful borings Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

*Climate* — The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer) The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

## GOVERNMENT

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Executive Council of seven Ministers of State and such honorary Ministers who may be appointed thereto *The Constitution* rests on the fundamental law of March 16, 1898, ratified by the Imperial Parliament on July 9, 1900, and the Commonwealth was inaugurated on Jan 1, 1901 Under the Constitution the Federal Government possesses limited and enumerated powers as surrendered by the federating States, the residuum of legislative power being in the Governments of the various States. Briefly stated, the enumerated powers include authority over commerce and navigation, finance, defence, posts and telegraphs, census and statistics, and conciliation and arbitration in extra-State industrial disputes, with authority to assume the control of railways and lighthouses, marriage and divorce, emigration and immigration, currency and banking, and weights and measures.

*Gov.-Gen.*, **His Excellency** the Rt. Hon. Sir Ronald Crauford *Munro-Ferguson*, P C, G.C M.G. .. .. .. £10,000

*Military Secretary*, Major B. A. T Kerr-Pearse.

*Aides-de-Camp*, Captain E. A. Haskett-Smith, Captain C. P L. Firth.

*Official Secretary*, Maj George Steward, C.M.G

**Executive Council (September, 1917).**

*Prime Minister and Attorney-General*, Rt. Hon. W. M. Hughes, P.C.
*Minister for the Navy*, Rt. Hon. Joseph Cook, P.C.
*Treasurer*, Rt. Hon. Sir John Forrest, P.C., G.C.M.G.
*Minister of Defence*, G. F. Pearce.
*Vice-President, Executive Council and Minister for Repatriation*, E. D. Millen.
*Minister for Works and Railways*, W. A. Watt.
*Minister of State for Home and Territories*, P. McM. Glynn, K.C.
*Minister of State for Trade and Customs*, J. A. Jensen.
*Postmaster-General*, W. Webster.
*Honorary Ministers*, E. J. Russell, L. E. Groom.

The sum of £12,330 is provided in the Constitution for annual salaries of Ministers. The distribution of the same is a matter of Cabinet arrangement.

PUBLIC DEPARTMENTS.

*Prime Minister's Department* —
*Sec.*, M. L. Shephard.
*Public Service Comm.*, W. B. Edwards (*acting*).
*Sec. Public Service Comm.*, H. McTaggart (*acting*).
*Auditor-General*, John William Israel, F.I.A.
*Sec. to Auditor-General*, G. H. Gatehouse.

*Treasury* —
*Secretary and Commissioner of Pensions and Maternity Allowances*, James Richard Collins.
*Asst. Sec.*, C. J. Cerutty.
*Accountant*, J. T. Heathershaw.
*Commissioner of Land Tax*, R. Ewing (*acting*).
*Governor, Commonwealth Bank*, D. R. Miller.

*Attorney-General's Department* —
*Secretary and Solicitor-General*, Sir Robert L. Garran, Kt.
*Chief Clerk*, G. S. Knowles.
*Crown Solicitor*, Gordon Hagwood Castle.
*Comptr. of Patents*, G. Townsend.

*Home and Territories* —
*Sec. to Dept.*, Atlee A. Hunt, C.M.G.
*Chief Clerk*, F. J. Quinlan.
*Commonwealth Statistician*, G. H. Knibbs, C.M.G.
*Chief Electoral Officer*, R. C. Oldham.
*Chief Surveyor and Estates Officer*, T. J. H. Goodwin.
*Administrator, Northern Territory*, Dr. J. A. Gilruth.
*Lieut.-Gov., Papua*, Hon. J. H. Murray, C.M.G.

*Postmaster-General* —
*Sec. to Dept.*, Justinian Oxenham.
*Chief Clerk*, J. C. T. Vardon.
*Chief Electrical Engineer* (vacant).
*Chief Accountant*, G. G. Haldane.
*Commonwealth Meteorologist*, H. A. Hunt.

*Defence* —
*Sec.*, Brig.-Gen. Sir G. A. Pethebridge, K.C.M.G.
*Acting Secretary*, T. Trumble.
*Acting Asst. Secretary*, M. Maguire.
*Chief Accountant*, Col. T. J. Thomas.
*Chemical Adviser*, Marcus Bell.

*Trade and Customs* —
*Comptroller-General*, S. Mills.
*Director of Quarantine*, J. H. L. Cumpston.
*Analyst*, W. P. Wilkinson.
*Director of Fisheries* (vacant).
*Director of Lighthouses*, J. F. Ramsbotham.

*Works and Railways* —
*Acting Secretary*, W. D. Ringle.
*Director-Gen. of Works*, Col. P. T. Owen.
*Engineer-in-Chief for Commonwealth Railways*, E. G. Bell.

THE LEGISLATURE.

The Federal Parliament consists of a *Senate* and a *House of Representatives*. The *Senate* contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The *House of Representatives*, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1917, is made up of 25 for New South Wales, 22 for Victoria, 10 from Queensland, 7 from South Australia, and 5 each from Tasmania and Western Australia, and consists of members of the Labour Party and Liberals.

*President of the Senate* Hon. T. Givens.
*Speaker, House of Representatives*, Hon. W. E. Johnson.

THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 6 Judges, having original and appellate jurisdiction, subordinate to the final Appeal Court of the Empire, the Judicial Committee of the Privy Council.

*Chief Justice*, Rt. Hon. Sir Samuel Griffith, P.C., G.C.M.G.
*Judges*, Rt. Hon. Sir Edmund Barton, P.C., G.C.M.G. Hon. L. A. Isaacs, Hon. H. B. Higgins, Hon. F. G. Duffy, Hon. C. Powers, Hon. G. B. Rich.

INTER-STATE COMMISSION.

The Inter-State Commission was constituted in 1913, its members being A. R. Piddington, K.C., *Hon. O. Swinburne, and N. C. Lockyer*, L.S.O. *Secretary*, A. G. Brown, LL.B.

DEFENCE.

In 1916 there was a total membership of the Defence Forces of 275,867, of whom 564 officers and 8,859 men were serving in the Navy and 258,444 others in the Army. The latter figure includes 104,184 riflemen and 85,099 cadets. The expenditure on Defence (excluding War expenditure) in 1916-17 was £3,072,000.

Navy.

An agreement was entered into (1909) by the Commonwealth and Imperial Governments under which a naval force was to be maintained (for ten years, 1909-13) in Australasian waters by the British Board of Admiralty, in return for annual contributions from Australia (£200,000) and *New Zealand (£40,000), a third party to the* agreement. This agreement provided also for the maintenance of Sydney as a first-class naval station, and for the nomination of naval cadets in the Royal Navy by the Australian and New Zealand Governments. This agreement has merged into the *Australian Defence Scheme*, under which the Commonwealth provides and maintains certain ships of war, which will form an Australian squadron of the Royal Navy, under the command of a Commonwealth officer in time of peace, and an integral part of the Eastern Fleet of the Royal Navy in time of war. Ships of the Royal Australian Navy are known as *H.M.A.S.* (His Majesty's Australian Ship), and did good service in the Pacific in the earlier months of the war. H.M.A.S. *Sydney* destroyed the German cruiser *Emden* at Cocos Island 9th Nov. 9, 1914.

*Board of Naval Administration* :—
*President*, The Minister of State for the Navy
*First Naval Member*, Rear Admiral Sir William R. Creswell, K.C.M.G.
*Second do.*, Capt. H. L. Cochrane, R.N.
*Third do.*, Engr.-Capt. W Clarkson, C.M.G
*Finance and Civil Do* (vacant).
*Secretary*, Hon. Fleet Paymaster G L. Macmillan.

### Army.

By a Federal Law of 1910 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12–18, and *Citizen Soldiers* 20–26, with short periods of training in the field. The *Peace Effective* is about 80,000 of all ranks, the *War Establishment* about 120,000 upwards. The Commonwealth had, up to the end of September, 1915, enlisted no fewer than 308,267 men, fully equipped for service in the war New South Wales, 111,970 Victoria, 83,648 Queensland, 42,955, South Australia, 28,039 West Australia, 26,342, Tasmania, 10,873. The Australian forces, who are unrivalled as mounted infantry, have behaved with the greatest gallantry whenever engaged with the enemy (in Gallipoli, 139 decorations were won by Australians, including 7 V.C., 21 C.B., 13 C.M.G., 10 M.C., and 80 D.C.M.)

*Board of Military Administration* :—
*President*, The Minister of State for Defence.
*1st Mil. Member*, Brig.-Gen. H Foster (*acting*).
*2nd do.* V C M. Sellheim, C.B., C.M.G
*3rd do.* Col. J Stanley C.M.G. (*acting*).
*4th do.* Col. H. W Dangar (*acting*).
*Finance Member*, Col. T J Thomas.
*Secretary* A. J Murphy (*acting*).
*Chief of General Staff*, Brig.-Gen H. Foster, C.B., *p.s.c* (*acting*).
*Inspector-General*, Maj.-Gen. J G Legge, C.B., C.M.G

### FEDERAL FINANCE.

The Revenue and Expenditure of the Commonwealth for the years 1911–12 to 1925–26 are stated as follows :—

| Years. | Revenue. | Expenditure. | Balances repayable to States. |
|---|---|---|---|
| | £ | £ | £ |
| 1911–12 | 20,428,520 | 14,724,497 | 5,804,423 |
| 1912–13 | 21,870,413 | 15,779,483 | 6,119,930 |
| 1913–14 | 21,741,775 | 15,458,776 | 6,282,999 |
| 1914–15 | 22,429,798 | 16,066,823 | 6,363,775 |
| 1915–16 | 30,760,216 | 24,413,221 | 6,346,995 |

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of 25s. per head of the population.

### DEBT

The Commonwealth has now undertaken responsibility for the Northern Territory Debt and the Port Augusta-Coodnadatta Railway Debt, whose combined amounts were £4,674,208 at June 30, 1916. The other State Debts remain at the charge of the State Governments. The total of the Public Debts of the several States on June 30, 1916, was £399,802,772 (N.S.W £132,314,208; Victoria £67,778,492; South Australia £17,222,283, Queensland £58,792,843; Tasmania £13,928,923; and Western Australia £9,829,670).

### PRODUCTION AND INDUSTRY

The estimated value of the products of the Commonwealth in 1914 and 1915 was :—

| | 1914. | 1915. |
|---|---|---|
| Agricultural .. | £36,490,000 | £72,769,000 |
| Pastoral .. .. .. | 60,263,000 | 63,807,000 |
| Dairying, &c. .. .. | 21,360,000 | 21,298,000 |
| Forests and Fisheries | 6,419,000 | 5,777,000 |
| Mining .. .. | 22,265,000 | 22,397,000 |
| Manufacturing .. | 62,921,000 | 62,821,000 |
| | £209,718,000 | £251,869,000 |

*Agriculture and Live Stock.*—The total land area of the Commonwealth is estimated at 1,903,732,840 acres, of which 28,968,934 were under cultivation in 1915–16. The following table shows the areas and crops of 1915–16 :—

| Crop. | Acreage. | Produce. Bushels. |
|---|---|---|
| Wheat.... .. .. .. .. | 12,684,511 | 179,084,703 |
| Oats .. .. .. .. | 721,844 | 16,356,079 |
| Maize .. .. | 327,837 | 6,732,209 |
| Hay .. .. .. | 3,227,771 | Tons. (5,633,368 (1,310,264 |
| Sugar Cane .. .. .. | 264,289 | |

*Live Stock.*

| | 1915. | 1916. |
|---|---|---|
| Sheep .. .. .. | 63,267,189 | 71,849,208 |
| Cattle .. .. .. .. | 9,231,416 | 9,979,126 |
| Horses .. .. .. | 2,377,320 | 2,440,234 |
| Pigs .. .. .. | 753,783 | 879,510 |

In 1916 the Commonwealth produced 590,604,873 lb of wool (as in the grease), against 642,734,399 lb. in 1915, 137,872,313 lb. of butter in 1915, against 293,870,412 lb. in 1914, 25,850,206 lb. of cheese in 1915, against 21,240,411 lb. in 1914, and 43,130,889 lb. of bacon and hams in 1915, against 32,374,205 lb. in 1914.

*Mines and Minerals.*—In 1916 the value of gold produced was £7,274,673, silver and lead, £3,832,078, copper, £4,805,363, tin, £800,806, coal, £4,218,221, the value of all minerals produced in 1916 being £23,367,874.

*Manufactures.*—In 1915 there were in the Commonwealth 18,092 industrial establishments, employing 321,072 hands, wages paid amounted to £23,210,834, the value of plant and machinery £42,277,000, of materials used £102,776,084, value added by manufacture £66,320,828, and total value of final output £169,086,702.

### EXTERNAL TRADE.

The Imports and Exports of the Commonwealth for the seven and a half years 1909–1915–16 are as follows, the value of gold and silver coin and bullion being included in the totals :—

| Year | Imports. | Exports. | Total. |
|---|---|---|---|
| 1909 .. | £41,171,896 | £65,318,836 | £106,490,732 |
| 1910 .. | 60,014,351 | 74,491,150 | 134,505,501 |
| 1911 .. .. | 66,867,488 | 79,482,258 | 146,449,746 |
| 1912 .. | 76,156,600 | 79,096,290 | 155,254,890 |
| 1913 .. .. | 79,740,833 | 78,332,789 | 158,073,622 |
| *1914 .. | 39,777,407 | 37,230,089 | 77,707,584 |
| 1915–16 | 64,431,827 | 60,872,976 | 125,304,803 |
| 1915–16 | 77,420,142 | 74,776,302 | 152,196,659 |

The total trade of 1912 amounted to £23 17s. 2d. per head, of 1913 to £23 19s. 2d. per head, of 1914–15 to £19 6s. 7d., and of 1915–16 to £30 17s. 8d. per head.

* First six months only.

The share of the various States in the external trade of the Commonwealth in 1913–26 was as under :—

| State. | Imports. | Exports.* |
|---|---|---|
| New South Wales..... | £13,370,617 | £10,398,326 |
| Victoria ..... | 28,561,490 | 14,768,732 |
| Queensland* ..... | 7,002,831 | 8,103,370 |
| South Australia ..... | 5,130,220 | 6,136,283 |
| Western Australia ..... | 4,189,109 | 4,136,128 |
| Tasmania* ..... | 980,849 | 622,119 |
| Northern Territory ... | 74,024 | 20,353 |

The exchange of trade was with the principal countries as under in 1924–25 and 1925–26 (in £ sterling, 000 omitted) :—

| Country | Imports from | | Exports to | |
|---|---|---|---|---|
| | 1924–5. | 1925–6. | 1924–5. | 1925–6. |
| United Kingdom ... ... | 37,857 | 35,145 | 36,546 | 33,208 |
| Germany ... ... | 1,227 | 117 | 436 | — |
| United States ... | 9,886 | 15,863 | 4,947 | 17,647 |
| Belgium ... ... | 524 | 81 | 849 | — |
| France ... ... | 938 | 1,792 | 1,280 | 2,469 |
| New Zealand ... | 2,098 | 2,701 | 2,899 | 3,634 |
| India ... ... ... | 2,748 | 3,080 | 1,425 | 1,748 |
| Ceylon ... ... | 977 | 1,245 | 435 | 837 |
| Japan ... ... | 1,320 | 2,310 | 1,907 | 2,433 |
| South Africa ... | 117 | 821 | 2,023 | 1,679 |
| Canada ... ... | — | 1,827 | — | 721 |
| Argentine ... ... | — | 1,138 | — | 5 |
| Java ... ... ... | — | 1,325 | — | 803 |
| Switzerland ... | — | 1,499 | — | 1 |
| Italy ... ... ... | — | 920 | — | 2,361 |

The principal articles of merchandise exchanged in 1924–25 and 1925–26 were as follows (in £ sterling, 000 omitted) :—

| Imports. | 1924–5. | 1925–6. |
|---|---|---|
| Apparel and Textiles. ... | 15,781 | 18,999 |
| Metals and Machinery ... | 13,200 | 14,584 |
| Drugs, Chemicals, and Fertilizers ... ... ... ... | 2,426 | 3,021 |
| Timber ... ... ... ... ... | 2,365 | 2,129 |
| Paper and Stationery ... | 2,546 | 2,961 |
| Bags and Sacks ... ... ... | 1,542 | 1,963 |
| Oils (in bulk). ... ... ... | 2,100 | 2,215 |
| Sugar ... ... ... ... ... | 208 | 1,894 |
| Tea ... ... ... ... ... ... | 1,326 | 1,540 |
| Spirits ... ... ... ... ... | 1,291 | 1,149 |
| Arms, Ammunition, and Explosives ... ... ... ... | 636 | 797 |
| Tobacco ... ... ... ... | 922 | 969 |

| Exports. | 1924–5. | 1925–6. |
|---|---|---|
| Wool ... ... ... ... ... | 22,102 | 26,854 |
| Wheat ... ... ... ... ... | 830 | 7,598 |
| Skins and Hides ... ... ... | 3,901 | 2,429 |
| Butter ... ... ... ... ... | 2,650 | 1,126 |
| Copper Matte, Ingots and Ore | 2,320 | 3,320 |
| Zinc Concentrates ... ... ... | 613 | 1,311 |
| Tallow ... ... ... ... ... | 1,377 | 444 |
| Mutton and Lamb ... ... | 3,424 | 770 |
| Flour ... ... ... ... ... | 309 | 1,729 |
| Timber ... ... ... ... ... | 722 | 388 |
| Coal ... ... ... ... ... ... | 722 | 598 |
| Lead (Pig and Matte) ... ... | 2,209 | 3,194 |
| Beef ... ... ... ... ... ... | 2,990 | 2,176 |
| Tin (Ingots) ... ... ... ... | 226 | 577 |

* Goods transferred from one State to another for manufacturing in an overseas country are counted as an export from the State whence they were finally despatched from the Commonwealth; thus, much of the produce of Queensland and Tasmania are credited to New South Wales and Victoria.

## COMMUNICATIONS.

*Railways.*—The total length of Government (and private) railways open at June 30, 1926, is stated as follows, the private lines being included in the totals and shown in parentheses :—

| State. | Miles open. | |
|---|---|---|
| New South Wales ... ... | 4,497 | (304) |
| Victoria ... ... ... ... | 4,152 | (78) |
| Queensland ..... ... | 6,453 | (2,488) |
| South Australia ... ... | 2,060 | (36) |
| Western Australia ... | 4,707 | (265) |
| Tasmania ... ... ... ... | 736 | (156) |
| Northern Territory ... ... | 196 | — |
| Total... ... | 23,794 | (3,328) |

The gross earnings of all Government lines in 1925–26 were £21,249,176, working expenses £15,249,389, and net earnings £5,979,787, being at the rate of 2·1 per train mile, and representing a *return on the total cost* (£204,267,000) of 2·92 per cent., as against 2·88 per cent. in 1924–25.

The great trans-continental railway from West to East, linking up Kalgoorlie in Western Australia with Port Augusta in Spencer's Gulf, was completed in 1917, and the first mail train made a successful run through on 22 October of that year.

*Shipping.*—The entrances and clearances of vessels engaged in overseas trade at the various Australian ports in the six years 1920–1925–26 were as follows (tonnage in brackets) :—

| Year | Entered. | Cleared. |
|---|---|---|
| 1920 ... ... ... | 2,000 (4,361,194) | 1,910 (4,188,837) |
| 1921. ... ... | 2,388 (4,607,820) | 2,060 (4,708,396) |
| 1922..... ... | 2,081 (4,953,220) | 2,093 (4,991,582) |
| 1923... ... ... | 2,035 (5,163,357) | 2,027 (5,111,287) |
| 1924... ... | 2,014 (5,377,532) | 1,977 (5,230,417) |
| 1924–25 ..... | 1,868 (4,774,668) | 1,843 (4,424,303) |
| 1925–26 ... ... | 1,654 (4,269,484) | 1,670 (4,268,838) |

*Of the vessels entered (1925–26), 1,402 were under the British flag (Australia, 337, of 922,780 tons, U.K., 691, of 2,661,046 tons, N.Z., 167, of 267,389 tons), and 444 under foreign flags (Dutch, 96, of 240,169 tons, French, 87, of 89,160 tons, Norwegian, 32, of 81,945, United States, 27, of 198,600 tons, other foreign, 172, of 250,966 tons).*

*Posts and Telegraphs.*—In year ended June 30, 1926, there were 8,365 posts and receiving offices, dealing with 736,000,000 letters, &c., there were 6,129 telegraph stations, with 139,000 miles of wire, transmitting and receiving 18,000,000 cable and telegrams in 1925–26. *Telephones* are highly organised and generally used.

## TOWNS.

CAPITAL.—CANBERRA, in the Federal District, transferred to the Commonwealth by the State of New South Wales on Jan. 1, 1911, is to be laid out as the capital of the Commonwealth. Meanwhile the seat of Government is MELBOURNE.

There were 26 cities and towns with a population exceeding 20,000 at the Census of 1921, viz. —

| | |
|---|---|
| SYDNEY (N.S.W.) ... ... ... ... | 760,690* |
| MELBOURNE (Vic.) ... ... ... ... | 695,640* |
| ADELAIDE (S.A.) ... ... ... ... | 202,899 |
| BRISBANE (Q.) ... ... ... ... | 188,498* |
| PERTH (W.A.) ... ... ... ... | 112,918* |
| Newcastle (N.S.W.) ... ... ... ... | 62,290 |
| Ballarat (Vic.) ... ... ... ... | 44,000* |
| Bendigo (Vic.) ... ... ... ... | 40,000 |
| HOBART (Tas.) ... ... ... ... | 35,000* |

* Estimated July, 1926.

| | |
|---|---|
| Broken Hill (N.S.W.) | 31,000 |
| Geelong (Vic.) | 28,880 |
| Charters Towers (Q.) | 25,000 |
| Launceston (Tas.) | 24,536 |
| Ipswich (Q.) | 23,000 |
| Rockhampton (Q.) | 21,633 |
| Fremantle (W.A.) | 20,000 |

## WEIGHTS, MEASURES AND CURRENCY

*The Weights and Measures* in general use are the same as those of the United Kingdom. The *Coinage* is of the same denomination as that of the U.K., and the gold coins are identical in appearance, *silver* 4*d*., 2*s*., 6*d*., and 3*d*. pieces and *bronze* 1*d*. and ½*d*., of the same weights and composition as those of the U.K., but of special design. The coinage of the U.K of all denominations is legal tender

*Banking.*—On June 30, 1916, the liabilities of the Banks of Issue throughout the Commonwealth amounted to £178,891,111, and the assets to £229,251,222. At the close of the financial year 1915–16 there were 2,420,477 depositors in the Savings Banks, the amount of the deposits being £96,998,845.

### COMMONWEALTH OFFICES IN LONDON, Australia House, Strand, W.C. 2.

*High Commissioner*, Rt. Hon Andrew Fisher .. .. .. .. .. £3,000

*Director, Publicity Dept.*, Lt. H. C. Smart

# States of the Commonwealth

## I. NEW SOUTH WALES.

The State of New South Wales is situated between the 28th and 37th parallels of S. lat. and 141st and 154th meridians of E. long. and comprises an area of 310,367 square miles—i.e., more than six times the area of England, and nearly three times the size of Great Britain and Ireland.

### POPULATION

| Census. | Males. | Females. | Total. |
|---|---|---|---|
| 1881 | 412,211 | 339,614 | 749,825 |
| 1891 | 628,009 | 515,951 | 1,143,960 |
| 1901 | 720,092 | 634,841 | 1,354,933 |
| 1911 | 897,898 | 789,036 | 1,686,934 |

The estimated population on June 30, 1917, was 1,887,496, viz., 991,916 males and 945,879 females.

### Increase of the People.

| Year | Births. | Deaths. | Marriages. |
|---|---|---|---|
| 1909 | 43,769 | 18,890 | 13,048 |
| 1910 | 45,333 | 18,251 | 14,894 |
| 1911 | 47,077 | 17,179 | 15,267 |
| 1912 | 51,993 | 18,886 | 16,664 |
| 1913 | 52,134 | 19,730 | 16,311 |
| 1914 | 53,615 | 18,777 | 17,233 |
| 1915 | 52,885 | 19,610 | 18,129 |
| 1916 | 52,078 | 19,854 | 16,320 |

### Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1911, numbering 734,000, Roman Catholics numbering 422,013, Presbyterians 282,921, and Methodists 151,874.

Payments to ministers ceased in 1862, and since that year they have been restricted to those then in receipt of the subvention. In 1916–7 the amount paid was only £200 to 1 recipient.

### PHYSIOGRAPHY

*Relief.*—The Eastern or coastal district is traversed by a mountain range known as the Great Dividing Range, which is called locally the *Australian Alps* (or Monlong Range) in the south—the highest point being Mount Townsend or Koschiusko (7,328 feet)—in the centre the *Blue Mountains*, and in the North the *Liverpool Range* and *New England Range*, the last-named continuing across the Queensland border

*Rivers.*—The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western portion of the country is not well watered, but immense reservoirs are being constructed for irrigation purposes, and many artesian bores have been laid down. The Darling and the Murrum bidgee, both tributaries of the Murray, which divides the State from Victoria, are navigable for part of the year only

*Climate.*—The climate is dry and very healthy At the capital the average mean shade temperature is 64°, the mean temperature in the shade for the north coast is 6·9°, Hunter and Manning district 64·8, south coast 59·8°, northern tableland 59·6°, central tableland 58·6°, northern tableland 54·2°, north-western slope 66·5°, central western slope 63·9°, south western slope 61·2°, north western plain 68·9°, central western plain 66·4°, Riverina district 62·2°, and western division 66·2°

### GOVERNMENT

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

### GOVERNOR.

*Governor of New South Wales*, His Excellency Sir Walter Edward Davidson, K.C.M.G., *born* 1849 (1917) .. .. .. £5,000
*Private Secretary*, Brig.-Gen. H. Finn, C.B.
*Aide-D.C.*, Capt. A. W. M. d'Apice.
*Official Secretary*, H. S. C. Budge.
*Lieutenant-Governor*, Hon. Sir William Portus Cullen, K.C.M.G., LL.D., *born* 1859.

*Chief Electrical Engineer*, W. Corin ... 750
*Chief Engineer*, A. E. Cutler ... ... ... 1,000

AGENT-GENERAL IN LONDON.

*Agent-General in London*, Hon. C. G. Wade, K.C., 28 and 29 Cockspur Street, S.W. (and allowance, £500) ... ... £1,850
*Secretary*, Thomas George White ... ... 800
*Consulting and Inspecting Engineer*, W. Shellshear, M.I.C.E. ... ... ... 1,100
*Superintendent of Immigration for New South Wales and Victoria*, (vacant) ... 650

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. The *Legislative Council* consists of not less than 21 members (as in August, 1917), appointed by the Crown for life. The *Legislative Assembly* consists of 90 members, representing 90 electoral districts. Each member of the Legislative Assembly receives £300 per annum, and members of both Houses travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. With few exceptions all natural-born or naturalised persons of 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904. At the last General Election in March, 1917, of 903,680 males on the roll in contested electorates, 728,898, or 80·9 per cent., voted, and, similarly, of 487,585 females on the roll, 293,426, or 60·2 per cent., voted.

*President of the Legislative Council*, Hon. F. Flowers ... ... ... ... £750
*Chairman of Committees*, Hon. R. B. O'Connor, LL.B. ... ... ... ... 450
*Clerk of the Parliaments*, W. L. S. Cooper ... ... ... ... ... ... 740
*Speaker Legislative Assembly*, Hon. John Jacob Cohen ... ... ... ... 1,000
*Chairman of Committees*, D. Levy ... 740
*Clerk of Assembly*, W. S. Mowle (*acting*) 900
*Librarian*, Francis Walsh ... ... ... 800

THE JUDICATURE.

The judicial system includes Magistrates' Courts and Quarter Sessions, Industrial Court, and a Supreme Court with a Chief Justice and 9 Puisne Judges. Trial by jury has been in force since 1824.

*Chief Justice*, Hon. Sir W. P. Cullen, K.C.M.G., LL.D. ... ... ... ... £3,500
*Puisne Judges*, His Honour Mr. Justice A. H. Simpson (*Ch. Judge in Equity*), ...

His Honour Mr Justice P W Street (*in Bankruptcy and Probate*), His Honour Mr Justice Robert D. Pring, His Honour Mr. Justice R. M. Sly, His Honour Mr Justice Alexander Gordon (*Divorce*), His Honour Mr Justice D. G Ferguson, His Honour Mr Justice J M. Harvey, His Honour Mr Justice C. S Heydon, His Honour Mr Justice W Edmunds, each £2,500, His Honour Judge F Rolin, His Honour Judge H B. Curlewis ... ... ... each £2,500
*Crown Solicitor*, J V Tillett ... ... ... 2,850

### Education

*Education.*—Education is non-sectarian, compulsory, and free, school fees in State, primary, and superior schools having been abolished in October, 1906. The total enrolment in 1906 in 3,462 State schools was 497,089, and the average daily attendance 420,695. The State expenditure on Education, Science, and Art was £1,905,380. The University of Sydney, with which 4 colleges are affiliated, including the Women's College, was incorporated in 1850. In addition to the State schools there are 701 private colleges and schools, with 67,704 scholars, exclusive of many business colleges and shorthand schools.

### Finance.

The Revenue and Expenditure and Public Debt of New South Wales for the five years ended June 30 1906, are stated as under:—

| Year. | Revenue, including Advances repaid. | Expenditure, including Transfers and Advances. | Public Debt |
|---|---|---|---|
| | £ | £ | £ |
| 1901 | 15,797,136 | 16,137,279 | 120,050,635 |
| 1903 | 18,260,456 | 17,488,856 | 126,170,747 |
| 1904 | 18,438,209 | 18,065,190 | 126,659,091 |
| 1905 | 18,946,227 | 18,316,179 | 127,735,483 |
| 1906 | 19,703,512 | 19,253,407 | 130,514,202 |

*Banking, &c.*—There were (June 30, 1907) 28 banks within N S W, with total assets £21,264,902, and liabilities £21,775,586. The savings bank deposits on March 31, 1907, amounted to £38,339,482, representing 295,040 depositors.

### Production and Industry

*Agriculture* is one of the principal industries of the State, 3,794,839 acres are under cultivation, producing during the year ended June 30, 1906, 26,364,021 bushels of wheat, 3,772,602 bushels of maize, 1,316,638 bushels of oats, besides other *kinds of grain, with 44,007 tons of potatoes and* 2,389 cwt. of tobacco. Sugar-cane to the extent of 239,743 tons was produced, and 371,200 gallons of wine, and 1,360,898 bushels of oranges, lemons, &c. (all citrus fruit), almost every kind of fruit and vegetable may be grown. The area sown for wheat for the year 1904–05 was 4,186,865 acres, which yielded 67,303,390 bushels. The total extent of land alienated and in process of alienation on June 30, 1906, was 32,467,476 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 117,870,422 acres.

*Live Stock.*—The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, were introduced in 1803. On June 30, 1906, there were 372,542 horses, 1,334,403 dairy cows, 2,370,031 all other cattle, 32,870,299 sheep, and 81,048 pigs. In 1905–06, 282,201,200 lb. (stated as in the grease) of wool were produced, in addition to 274,000 cwt. of tallow, 32,631,443 lb. butter, 5,079,696 lb. cheese, and 13,376,641 lb. bacon and hams.

*Minerals.*—The goldfields were discovered in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, alunite, *wolfram scheelite, molybdenite, cobalt,* and kerosene shale, diamonds, rubies, opals, and other precious stones are also found. The total value of minerals raised during 1906 was £20,513,856, coal accounting for £3,136,429, silver, silver lead and ore £3,284,991 and gold £430,270.

*Manufactories and Works.*—In 1905–06 there were 5,210 manufactories and works 118,402 hands were employed, 87,724 being males and 28,677 females, the amount of £13,413,845 being paid in salaries and wages.

### Towns.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of over 200 miles, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The city extends four miles north and south by three miles east and west, and contains 13½ miles of streets, and a population of 128,200 (Dec., 1906), or, including suburbs, 2,172 miles of streets, and a population (Dec., 1906) of 764,600. In addition to the Government buildings, there are the branch Royal Mint, the University, National Art Gallery, museums, free public libraries, observatory, two cathedrals, and numerous churches. The parks within the metropolitan area are 4,714 acres in extent, in addition to which the National Park measures 22,747 acres and Ku-ring-gai Chase 35,200 acres. Other towns are Newcastle (with incorporated suburbs), 48,750, Broken Hill, 26,200, Bathurst, 8,450, Goulburn, 9,200, Granville, 11,200, Parramatta, 12,200, Lismore, 8,000, Maitland, E. and W., 11,600, Grafton and South Grafton, 6,350, Albury, 6,300, Tamworth, 7,750, Lithgow, 9,600, Wagga Wagga, 6,908, and Orange, 7,000.

Approximate time in transmission of mails, 31 days.

### Dependency

LORD HOWE ISLAND (490 miles north-east of Sydney). Pop. (Census 1901), males 98, females 49, total 107. The affairs of the Island and the control of the Kentia Palm Seed Industry are vested in a Board of Control.

## II.—VICTORIA.

The State of Victoria comprises the south east corner of Australia, at that part where its territory projects farthest into the southern latitudes, it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 290 miles, and its extent of coast-line nearly 600 miles, the entire area being 87,884 square miles.

### Population.

| Year | Males. | Females. | Total. |
|---|---|---|---|
| 1900 | 629,700 | 597,250 | 1,226,950 |
| 1901 | 635,250 | 630,600 | 1,265,850 |
| 1902 | 639,850 | 635,750 | 1,275,600 |
| 1903 | 708,450 | 692,170 | 1,400,620 |
| 1904 | 720,850 | 712,073 | 1,432,923 |
| 1905 | 730,775 | 724,892 | 1,455,667 |
| 1906 | 746,450 | 730,848 | 1,477,298 |

### Increase of the People.

| Year. | Births. | Deaths. | Marriages. |
|---|---|---|---|
| 1911 | 21,044 | 15,257 | 11,488 |
| 1912 | 21,817 | 14,221 | 12,738 |
| 1913 | 21,970 | 14,474 | 12,324 |
| 1914 | 21,224 | 16,913 | 11,830 |
| 1915 | 21,209 | 15,813 | 12,832 |
| 1916 | 21,238 | 16,489 | 12,342 |

### Religion.

There has been no State aid to religion since 1879. Members of the Church of England in 1911 numbered 452,087; "Protestants" 24,126, Presbyterians 294,352, Methodists 197,682, Baptists 32,244, Church of Christ 18,911, Independents 16,484, and Roman Catholics 286,419.

### Physiography.

*Relief.*—The *Australian Alps* and the *Great Dividing Range* pass through the centre of the state, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys.

*Rivers.*—The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

*Climate.*—The mean temperature over a period of 60 years was 57·4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for three nights in the year) below 32° F. The average number of days on which rain fall was 138, and the average yearly rainfall was 25·38 inches.

### Government.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of 12 members.

### Governor.

*Governor of the State of Victoria*, Hon. Sir Arthur Lyulph Stanley K.C.M.G £5,000
*Private Sec.*, Hon. Albert F Hood, C.M.G
*Aide-de-Camp*, Capt. H. C. P Conant
*Lt.-Gov.*, Hon. Sir J Madden, G.C.M.G., LL.D.

### The Ministry (28 November, 1917).

*Premier and Chief Secretary*, John Bevan Mackay and *Minister of Rail ways*, Agar Wynne
*Treasurer*, W. M MePherson
*Mines, Forests, and Public Health*, Alfred Downward
*Agriculture*, D. S. Oman
*Crown Lands and Water Supply*, — Clarke
*Public Works*, John McWhae
*Education*, M. Baird
*Honorary Ministers*, W Kendall, H. F Richardson, H. Angus, J J Carlisle
*Secretary to the Cabinet*, A. A. Worthing

### Heads of Departments.

*Public Service Commissioner*, G C. Morrison £1,200
*Auditor-General*, F. H. Bruford £1,200
*Secretary to the Premier*, M. T. Short £96
*Chief Parliamentary Counsel*, J. W Mahood £96
*Chief Secretary's Department, Under-Secretary*, W. A. Calaway £1,600
*Under Treasurer*, M. A. Minogue £1,200
*Director of Education*, F Tate, LL.D £1,200
*Law Department*, W. E. Anderson £800
*Registrar of the Supreme Court and Registrar of Titles and Master in Equity and Lunacy*, H. A. Templeton £1,000
*Secretary Lands*, J M. Read £900
*Secretary Mines*, W Dickson £900
*Chairman State Rivers and Water Supply Commission*, W Cattanach £1,200
*Director Agriculture*, S. S. Cameron £900
*Secretary Public Works*, E. T Drake £900
*Pub. Health, Chairman*, Dr E. Robertson £800
*Secretary Labour*, H. M. Murphy £800
*Hospitals for Insane—Inspector-General*, Dr W. M. Jones £1,200
*Victorian Railway Commissioners*, R. O Norman (*chairman*), £2,500, and C. E. Jones £1,750
*Chief Engineer for Railway Construction*, M R. Kernot £1,000
*Secretary*, G H Sutton £800
*Govt. Statist*, A. M Laughton £650
*Penal and Gaols Inspector General*, J W K. Freeman £700
*Industrial Schools Secretary & Inspector*, J Molloy £176
*Chief Commr. of Police*, A. G. Salmsbury £900
*Public Librarian*, R. La Touche Armstrong £725
*Astronomer*, J M. Baldwin (*acting*) £400
*Botanist*, Professor A J Ewart, D.Sc. £425
*Curator of Estates of Deceased Persons*, W B. House £750
*Parliamentary Draftsmen*, J T Collins, M.A. 1,100

### Agent-General in London.

*Agent-General in London*, Hon. Sir Peter McBride, Melbourne Place, Strand, W C.
*Secretary*, H G W Neale, J P £1,250

Melbourne, distant 12,267 miles, transit, 30 to 37 days.

### The Legislature.

Parliament consists of two Houses—the *Legislative Council* of 34 members, elected for the 17 Provinces for 6 years, one-half retiring every 3 years, and the *Legislative Assembly* of 65 members, elected for a maximum duration of 3 years, for the 65 electoral districts, by universal adult suffrage. The electors for the Council number 328,339, and those for the Assembly 618,881.

*President of the Legislative Council*, Hon. J M. Davies £750
*Speaker of the Legislative Assembly*, Hon., Sir Frank Madden 1,200

### The Judicature.

There are magistrates' courts, and general sessions and county courts, and a Supreme Court with a Chief Justice and four Puisne Judges.

*Chief Justice*, Hon. Sir John Madden, G.C.M.G., LL.D. £4,000
*Puisne Judges*, Their Honours H. E. A. Hodges, Joseph H. Hood ..... each £3,500
L. F H. Cussen ..... £3,500
*County Court Judges*, W R. Johnston, J G. Eagleson, W H. Moule, J S. Wesley, and H. G. Winneke ..... each £1,200
*Inspector Tax Commissioner*, R. M. Weldon £800

*Deputy Commissioner of Land Tax*, M. Murphy ..... £624
*Crown Prosecutors*, C. J. L. Wolfhardt, £2,000; J. A. Gurner, £700; S. Leon ... 700
*Crown Solicitor*, E. J. B. Guinness. ... ... 1,200

### Education

*Primary Education* is compulsory, secular and free between the ages of 6 and 14, there being 297,726 children on the registers in 1926, the average attendance being about 69 per cent. *Secondary Education* is principally under private control, 57,422 pupils being in attendance at the 498 schools in 1926. There is a State-aided *University* at Melbourne, with three affiliated colleges (Trinity, Ormond, and Queen's) and a School of Mines at Ballarat.

### Finance.

The revenue and expenditure and State Debt for the five years ended June 30, 1922–1926, are given as follows —

| Year. | Revenue. | Expenditure. | Debt. |
|---|---|---|---|
| | £ | £ | £ |
| 1922 | 19,381,840 | 20,171,386 | 69,712,226 |
| 1923 | 20,398,945 | 19,479,741 | 69,776,724 |
| 1924 | 19,958,937 | 19,944,718 | 68,130,726 |
| 1925 | 20,589,017 | 17,906,968 | 70,183,927 |
| 1926 | 17,470,875 | 17,889,361 | 73,304,562 |

*Banking, &c.*—There were (Dec. 31, 1926) 17 banks, with total assets £63,435,125, within the State and liabilities £40,195,672. The savings bank deposits at June 30, 1927, amounted to £28,139,417.

### Production and Industry

*Agriculture.*—Agriculture has of late years much improved, wheat and oats chiefly being cultivated, the dairy industry has also made marked progress. Of the 6,750,894 acres under cultivation in 1926–27, 3,129,692 were wheat crops and 442,998 oats, and 897,286 acres were cut for hay. In 1926–27, 2,300,660 gallons of wine were produced.

*Live Stock.*—There were in 1926, 488,086 milch cows producing 99,129,092 lb. of butter and 5,796,994 lb. of cheese, and 689,201 other cattle, 12,376,387 sheep, 254,436 pigs, and 914,409 horses.

*Minerals.*—Victoria is one of the leading gold producing States in Australia. From the discovery of gold in 1851 to the end of the year 1926, the quantity raised—74,587,075 oz.—accounted in value to £317,734,257, the amount produced in 1926 being 276,188 oz. The value of other minerals raised to the end of 1926, consisting principally of tin, copper, coal, and antimony, is estimated at about £20,271,068 (including building stone, *&c.*, £4,076,988).

*Trade and Industry.*—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State, and the manufactures (5,413 factories, *&c.*, employing 113,634 hands in 1925) are mainly for home consumption. In 1926–27 the chief exports overseas were Wool, £8,129,222, lead, £302,773, butter, £2,189,693, wheat, flour and biscuit, £2,470,292, leather, £439,706, skins and hides, £2,548,736, tallow, £246,091; live stock, £84,761, jams and jellies, £321,723, and milk and cream, £311,213. A trade is also springing up in preserved and frozen meats, the value of the exports (excluding bacon and hams) being £696,209 in 1926–27. The principal overseas imports of the State in 1926–27 were —Iron and steel, £801,245; machines and machinery, £2,190,048; metals and metal manufactures, £956,771; silks, velvets, *&c.*, £1,178,988; apparel and attire £1,222,945; bags and sacks, £736,624; tea, £617,483; cottons and linens, £2,272,070; woollens, £1,232,790; and timber, £360,487

### Towns.

Melbourne, the chief city and seat of federal government, is an episcopal see, and is distinguished for its University, museums, Mint, public gardens, observatory, public library, hospital, its churches and other institutions. With its suburbs it contained on December 31, 1926, a population of 695,620 inhabitants. Other towns are Ballarat, 40,631, Bendigo (Sandhurst), 35,790, Geelong, 34,324, Castlemaine, 7,422, Warrnambool, 7,400, Maryborough, 5,000, Hamilton, 4,700, Mildura, 5,200, and Stawell, 4,420.

Transmission of mails, approximate, 30 days.

## III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

### Population

| Year | Males. | Females. | Total. |
|---|---|---|---|
| 1921 | 180,483 | 177,861 | 358,345 |
| 1921 | 207,360 | 201,200 | 408,560 |
| 1923 | 219,971 | 213,747 | 433,718 |
| 1924 | 219,547 | 218,626 | 438,173 |
| 1925 | 219,454 | 222,209 | 441,663 |

### Increase of the People.

| Year | Births. | Deaths. | Marriages. |
|---|---|---|---|
| 1921 | 11,037 | 4,496 | 4,036 |
| 1922 | 12,070 | 4,336 | 4,096 |
| 1923 | 12,607 | 4,653 | 4,294 |
| 1924 | 12,903 | 4,723 | 4,009 |

### Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows —Church of England, 113,781; Methodists, 100,402, Congregationalists, 13,357; Baptists, 11,863; Lutherans, 26,681; Roman Catholics, 80,964; Presbyterians, 22,567; and Church of Christ, 9,324.

### Physiography

*Relief.*—The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude (the northern boundary since the transfer to the Commonwealth of the Northern Territory), is also unpromising in

comparison with the fertile land that surrounds the hill country of the east.

*Rivers.*—Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

*Climate.*—The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 72.6° During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight.

The average annual rainfall at Adelaide, derived from 76 years' record, is 20·88 inches. This total is practically equal to the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland.

In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

## Government.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor

### Governor.

*Governor of South Australia*, His Excellency Lieut.-Col Sir Henry Lionel Galway, K.C.M.G., D.S.O., *born* 1859 (1914) – £4,000
*Private Sec.*, Legh Winter
*A.D.C.'s*, Capt. H. W Brown, Maj B S. Connor
*Lieutenant-Governor*, Hon. John Robert Murray, LL.M., *born* 18— (1918) ... ...

### Coalition Ministry (28 Aug. 1917).

*Premier, Chief Secretary, and Attorney General*, Hon. — Peake ... ... ... £2,000

*Hydraulic Engineer*, C. A. Bayer ..... 800
*Director of Agriculture*, A. J Perkins.... 1,000
*Princ. Agricultural College*, W J Colebatch, B.Sc. ... ... ... ... ... 600
*Government Astronomer*, C. P Dodwell, B.A., F.R.A.S. ... ... ... ..... 400

### Agent-General in London.

*Agent-General in London*, F W Young, LL.B., 122 Strand, W.C. 2 ... ... ... £1,200
*Sec. and Registrar of Stock*, J B. Whiting 325
*Trade Commissioner*, C F. G McCleer .. 800
Adelaide, 11,200 miles, transit, 29 days.

### The Legislature.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years, and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female, there is a small property qualification for electors to the Legislative Council, who numbered 88,249 (41,625 women) in 1914, those for the Assembly numbering 237,845 (116,863 women).

*President of the Legislative Council*, Hon. Sir J L. Stirling, K.C.M.G. ... ... ... £600
*Speaker of the House of Assembly*, Hon. F W Coneybeer .. ... ..... ... 600

### The Judicature.

*Law and Justice.*—The Supreme Court is presided over by the Chief Justice and two Puisne Judges, there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 30 annually, which is at the rate of 1 in every 8,000 of the population.

*Chief Justice and Judge of Vice-Admiralty*, ... ... £2,600
*Second Judge*, Hon. Sir J Hannah Gordon 1,700
*Third Judge*, Hon. 1,700
*Temporary Judge*, Hon. A. Buchanan.... 1,700

### Education.

*Primary education* is provided by the State, and controlled by a responsible Minister. It is secular, compulsory, and free; there are 839 State schools, with 1,879 teachers and 62,719 scholars, the expenditure in 1914 was £298,330. Private schools number 168 (1913), with 898 teachers and 11,202 scholars. *Secondary education* is under private control. There is an endowed *University* at Adelaide, founded in 1874, with 609 undergraduates, and 603 other students; all classes are open to women. A State School of Mines and Industries has also been estab-

tilled with branches at 4 country centres. The public library, museums, art gallery and local institutes are supported or assisted by the State.

FINANCE.

The Revenue and Expenditure and Public Debt for the five years ended June 30, 1911–1915, are stated below:—

| Year. | Revenue. | Expenditure. | Debt. |
|---|---|---|---|
| | £ | £ | £ |
| 1911 | 4,181,478 | 3,964,411 | 28,364,866 |
| 1912 | 4,430,739 | 4,175,589 | 29,497,413 |
| 1913 | 4,906,658 | 4,330,282 | 30,193,308 |
| 1914 | 4,820,706 | 4,624,129 | 33,964,338 |
| 1915 | 3,873,310 | 4,682,422 | 35,108,123 |

*Banking.*—There are 8 banking institutions in Adelaide, with 284 branches and agencies, having a total liability of £12,033,603 (including £3,237,432 Perpetual Inscribed Stock) and assets £13,377,696 in 1914. The Government Savings Bank on June 30, 1915, had 297 branches and agencies, with 269,296 depositors (£9,091,824, bearing interest at 3½ per cent.).

PRODUCTION AND INDUSTRY.

*Agriculture.*—Of the total area about two-thirds are farmed or grassed, and 4,622,274 acres cultivated—under wheat 2,922,630 acres, hay 444,870, oats 140,367, barley 66,315, and potatoes 7,639 acres, with 1,324,936 acres lying fallow. During the last ten seasons the quantity of wheat produced has averaged 18,798,547 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable. There were 26,854 acres of vines, with an average annual production of about 3,000,000 gallons of wine, 40,000 cwt. of currants, and 35 cwt. of raisins; the export of wine to overseas countries being 357,021 gallons in 1914, of which 320,481 gallons (value £37,236) were sent to the United Kingdom. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

*Live Stock.*—There were 4,208,462 sheep in 1914, and 28,980,429 lb. of wool (valued at £1,109,903) were exported in 1914; cattle number 300,579, horses 267,877, pigs 69,893, and goats 5,962.

*Minerals.*—Copper and gold, silver, lead, manganese, bismuth, iron, and coal are found, the total mineral output being valued at £891,443 in 1914.

*Manufactures.*—In 1914 there were 1,323 factories, employing 26,874 hands, the gross value of the output in 1914 being £13,273,970, and the wages paid £3,946,296. Plant, machinery, land, and buildings were valued at £6,303,370.

TOWNS.

ADELAIDE, the chief city and capital, stands on the east coast of the St. Vincent Gulf; population (1911) 209,436, inclusive of suburbs. Other towns are Mocatta, Kadina, Wallaroo, and Port Pirie (9,829) on the east, and Port Augusta on the west of Spencer Gulf, and Kapunda, Gawler, and Petersburg on the line from Adelaide to the north, Strathalbyn in the south, and Mt. Gambier in the south-east.

Transmission of mails, approximate, 19 days.

## IV.—QUEENSLAND.

This State, situated in lat. 10° 30′—29° S. and long. 138°—153° 30′ E., comprises the whole north-eastern portion of the Australian continent.

Queensland proper possesses an area of 670,500 square miles (*i.e.*, equal to more than 3¼ times the area of the United Kingdom).

POPULATION.

| Census. | Males. | Females. | Total. |
|---|---|---|---|
| 1881 | 125,325 | 88,200 | 213,525 |
| 1891 | 253,779 | 169,939 | 423,718 |
| 1901 | 277,003 | 222,126 | 498,129 |
| 1911 | 359,300 | 276,367 | 635,823 |

The estimated population on Dec. 31, 1916, was 689,467.

Increase of the People.

| Year. | Births. | Deaths. | Marriages. |
|---|---|---|---|
| 1911 | 16,991 | 6,544 | 5,169 |
| 1912 | 18,758 | 6,921 | 5,628 |
| 1913 | 19,747 | 6,983 | 5,661 |
| 1914 | 19,663 | 6,732 | 5,895 |
| 1915 | 20,185 | 7,260 | 6,142 |
| 1916 | 18,240 | 7,324 | 5,208 |

Religion.

Since 1881 no State aid has been afforded to religion. At the Census of 1911 there were 212,720 Church of England, 137,086 Roman Catholics, 75,360 Presbyterians, 39,220 Methodists, 24,236 Lutherans, 13,715 Baptists, and 47,394 other Christians, with 5,512 Mohammedans and Pagans, besides "Indefinite, "No religion," &c.

PHYSIOGRAPHY.

*Relief.*—The *Great Dividing Range* on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Warrego Range* divides the land into a northern and southern watershed.

*Rivers.*—The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

*Climate.*—At Brisbane the average temperature for 1916 was 68·1°, the maximum and minimum shade temperatures being 96·8° and 39·3°, mean barometer, 29·958. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1916 was 32·78 inches, and there were 131 wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 9 members.

GOVERNOR.

*Governor of Queensland*, His Excellency Sir Hamilton John Goold-Adams, G.C.M.G., C.B., born 1858 (1911) ..... £5,000
*Private Sec.*, T. B. A. Thatcher ..... 300
*Aide-de-Camp*, Capt. W. F. U. Cowan ... 300
*Lieutenant-Governor*, Hon. Sir Pope A. Cooper, K.C.M.G., M.A., LL.D., b.n. 1846 (1911).
*President of Legislative Council*, Hon. W. Hamilton ..... 1,200

EXECUTIVE COUNCIL.
(H.E. the Governor presides.)

*Premier, Chief Sec., and Vice-President*, Hon. T. J Ryan ..... £1,500
*Attorney-General*, Hon. T. J Ryan.
*Treasurer and Secretary for Public Works*, Hon. R. G. Theodore ..... 1,000
*Home Secretary*, Hon. John Huxham ... 1,000
*Secretary for Railways*, Hon. J H. Coyne 1,000
*Secretary for Public Instruction*, Hon. H. F. Hardacre ..... 1,000
*Secretary for Public Lands*, Hon. J M Hunter ..... 1,000
*Secretary for Agriculture and Stock*, Hon. William Lennon ..... 1,000
*Secretary for Mines*, Hon. A. J Jones, M.L.C. ..... 1,000
*Asst. Minister for Justice*, Hon. J A Nihill ..... ...
*Clerk of the Council and Chief Clerk, Chief Secretary's Dept.*, E. H. Abell ..... 900

UNDER-SECRETARIES, &c.

*Chief Secretary's Dept.*, P J McDermott, I.S.O. ..... £800
*House Sec.'s Dept.*, W J Gall, F.F.I.A. ... 800
*Public Works*, A. B. Brady, M.Inst.C.E. ... 900
*Dept. of Justice*, G A Carter ..... 800
*Treasury*, G L. Real ..... 800
*Public Lands*, W G Graham ..... 800
*Agriculture*, R. G. B. Scriven ..... 800
*Public Instruction*, J D. Story ..... 800
*Mines*, H. Marshall ..... 800
*Parliamentary Draftsman*, J L. Wool cock, B.A. ..... 650
*Auditor-General*, M. H. Robertson, F.F.I.A. 1,000
*Crown Solicitor*, W F Webb ..... 900
*Commiss. of Police*, J C. Urquhart ... 750
*Commissioner of Income Tax*, J Hughes 800
*Comm. for Railways*, C. Evans, C.M.G. ... 2,250
*Dep. Comm. for Railways, Townsville*, W Pagan ..... 1,500
*Dep. Comm., Rockhampton*, C. F Pemberton ..... 950
*Police Magistrates at Brisbane*, H. J. Archdall, £900, Wm. Harris, £900, A. Dean ..... 900
*Registrar, Supreme Court*, C. S. Norris 850
*Registrar, District Court, and Sheriff*, W H. Carroose ..... 440
*Public Curator*, H. D. Brennan ..... 800
*Government Statistician and Registrar-General*, N J Macleod ..... 900
*Savings Bank Commr.*, W. L. Fowles ... 1,000
*Commissioner of Public Health*, J I. Moore, M.D., F.R.C.S. (Irel.), D.P.H. ... 800
*Portmaster*, W F B. Forrester ..... 850
*General Manager of Central Sugar Mills*, A. J Gibson, Ph.D. ..... 1,000
*Inspector of Asylums*, H. B. Kilerton, M.R.C.S., L.R.C.P. ..... 1,000
*Chief Inspector of Schools*, A. S. Kennedy 975
*Government Printer*, A. J Cumming ... 850
*Chief Censor of Stamps*, F J Bradfield 900
*Registrar of Titles*, J. Mitchell ..... 850
*Immigration Agent*, J O'N Brennan ..... 975
*Director of Museum* (vacant) ..... 900
*Registrar of Industrial Court*, J J McGee 900
*Superintendent of Technical Education*, L. C. Morris, B.A. ..... 800
*Pathologist, Agricultural College*, Cuthbert Pobjie, B.A. ..... 900
*Fisheries Commissioner*, J. Goodwyn, R.I.A. 1,000
*Chief Inspector of Machinery and Scaffolding*, F. Hendemann, M.I.M.E. ..... 900
*Chief Inspector of Factories and Shops, and Director of Labour*, F E. Walsh ..... 1,000
*Engineer for Harbours and Rivers*, E. A. E. Cullen, M.Inst.C.E. ..... 1,000
*Hydraulic Engineer*, John Hargreaves, M.S.M. ..... 800
*Surveyor-General*, A. A. Spowers ..... 750
*Government Geologist*, B. Dunstan ..... 650
*Registrar of Friendly Societies*, E. Rendle 800
*Medical Supt., Benevolent Asylum*, J. H. Macarthur, M.B., M.R. ..... 650
*Director, State Children*, G A. Ferguson. 450
*Chief Protector of Aborigines*, J W Bleakley 350
*Comptroller-General of Prisons*, C. R. de F Pennefather ..... 650
*Govt. Analyst*, J B. Henderson, F.I.C. ... 650
*Government Shorthand Writer*, G G McLennan 500
*Secretary, Public Service Board*, V H. B. Madsen, A.C.I.S., A.S.A.A., &c. ..... 150

AGENT-GENERAL IN LONDON

*Agent-General in London*, Major Sir T B. Robinson, K.C.M.G., Marble Hall, 409, 410 Strand, London, W.C. ..... £1,250
*Secretary*, P J Dillon ..... 500

THE LEGISLATURE.

Parliament consists of two Houses a *Legislative Council* of 35 members, nominated for life by the Crown, and a *Legislative* Assembly of 72 members, elected by universal adult suffrage.

*President of the Legislative Council*, Hon. W Hamilton ..... £1,250
*Speaker of the Legislative Assembly*, Hon. William McCormack ..... 1,000

THE JUDICATURE.

There is a Supreme Court, with a Chief Justice, and four Puisne Judges, District Courts, presided over by District Court Judges, and Inferior Courts at all the principal towns, presided over by Police Magistrates.

*Chief Justice Supreme Court*, The Hon. Sir Pope A. Cooper, M.A., K.C.M.G. ..... £2,500
*Pres., Industrial Court*, T W McCawley 2,000
*Senior Puisne Judge*, Hon. Patrick Real 2,000
*Puisne Judges*, C. H. Chubb, K.C. (Southern), L. O. Lukin (Central), W A. B. Shand, M.A. (Northern) ...each 2,000
*District Court Judges*, Allan W Macnaughton (also £300 as *Industrial Court Judge*), Charles Jameson, Thomas O'Sullivan, K.C. ..... ..... ..... ..... ..... ..... ..... .....each 1,000

EDUCATION

*Primary Education* is compulsory, secular, and free. In 1916 there were 1,512 State schools, and six High Schools in operation, with 4,207 teachers and an average daily attendance of 84,988 children, and 134 private and grammar schools, with an average attendance of 16,629. A State-aided University was established during 1910.

FINANCE.

The revenue, expenditure, and debt of Queensland for the six years ended June 30, 1912-17, are stated as follows:—

| Year | Revenue. | Expenditure. | Debt. |
|---|---|---|---|
| | £ | £ | £ |
| 1912 ... | 5,989,307 | 5,963,632 | 41,823,695 |
| 1913 ..... | 6,358,213 | 6,390,007 | 42,390,728 |
| 1914 ..... | 6,673,239 | 6,560,316 | 42,504,492 |
| 1915 ..... | 7,200,698 | 7,199,399 | 42,504,492 |
| 1916 ..... | 7,726,384 | 7,671,873 | 42,493,892 |
| 1917 ..... | 7,880,892 | 8,136,987 | Not available |

* Including net amount received from Commonwealth on a per capita basis.

*Banking.*—The banking deposits on Dec. 31, 1916, were £27,527,331, apart from the £11,240,730 (equal to an average of £44 18s. 8d. to each depositor) in the hands of the State Government Savings Bank, and Commonwealth Savings Bank £1,892,725.

### Production and Industry

*Agriculture and Live Stock.*—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 28,370,390 acres under a system of deferred payment, 20,966,829 acres more are in process of alienation, and an additional area of 213,950,840 acres leased out for sheep and cattle runs, 64,772,600 acres for grazing farms and homesteads, 44,679,240 acres are held under occupation licence, 238,311 acres under gold-mining and mineral lease, 173,120 for special purposes, and 231,355 acres perpetual lease, and scrub selections 208,235 acres, leaving 75,703,870 practically unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pine-apples, grapes, bananas, cocoa-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1916, 276,972 tons of sugar were produced. The live stock in 1916 included 4,764,637 cattle, 13,824,493 sheep, 697,317 horses, and 129,732 pigs. Wool, meat, and butter are the principal products.

*Forestry.*—There are many varieties of fancy timber which are much utilised by cabinet-makers, &c., among them may be mentioned "silky oak," largely used in furniture and office fittings; maple, a timber with a handsome grain and capable of taking a very high polish; "bean" is also much in demand for furniture; black walnut, penda, beech, crows' ash, quandong, bally gum, as well as many varieties of the eucalypt, pine, cedar, and sandalwood, the latter being mainly exported to China.

*Minerals.*—The total mineral output in 1916 was £4,422,207. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, freestone, and wolfram, while coal is found in several districts. The gold output in 1916 was valued at £2,213,651, in 1913 at £1,128,568, and in 1912 at £2,477,979.

*Commerce.*—The chief articles of export overseas, the produce of the State, in 1913–6 were: Wool, £3,422,230 gold, £31,742; silver, £6,364; tin, £105,229; copper, £368,146 pearl and tortoise-shell, £26,815; meat, including extract, and bacon, hams, and pork, £2,768,394; green and preserved fruit, £6,033; sugar, £1211; hides and skins, £443,982; marsupial skins, £30,133; tallow, £160,862; live stock, £120,292; and bordarwise £995,992 butter, obesse, and milk, £141,118; timber, £11,315.

### Towns.

Capital, Brisbane. Population (1916), 268,323. The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast.—Brisbane, Rockhampton (20,513), Maryborough (12,990), Townsville (17,220), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg (22,139). Other places of importance are Ipswich (28,324), Toowoomba (24,220), Charters Towers (17,258), Gympie (12,419), and Cairns, Mt. Morgan (12,220).

Transmission of mails, approximate, 32 days.

## V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 35′–43° 39′ S. lat. and 144° 39′–148° 23′ E. long., and contains an area of 26,215 square miles.

### Population.

| Year | Males. | Females. | Total. |
|---|---|---|---|
| 1891 .. .. | 77,580 | 69,107 | 146,687 |
| 1901 .. .. .. | 89,604 | 80,891 | 170,475 |
| 1911 .. .. .. | 97,192 | 98,620 | 195,812 |
| 1914 .. .. .. | 103,330 | 97,806 | 201,136 |
| 1915 .. .. .. | 101,761 | 99,284 | 201,045 |

### Increase of the People.

| Year | Births. | Deaths. | Marriages. |
|---|---|---|---|
| 1910 .. .. | 5,386 | 2,126 | 1,494 |
| 1911 .. .. .. | 5,444 | 1,994 | 1,477 |
| 1912 .. .. .. | 5,613 | 2,057 | 1,508 |
| 1913 .. .. .. | 5,888 | 2,132 | 1,600 |
| 1914 .. .. .. | 5,617 | 1,968 | 1,543 |
| 1915 .. .. | 5,845 | 2,025 | 1,600 |

### Religion.

All religions are free. In 1911 there were 88,000 members of the Church of England, 29,000 Roman Catholics, 25,000 Methodists, 16,000 Presbyterians, and 11,000 Independents and Baptists.

### Physiography

The surface of the country is generally undulating forest land, with mountains from 1,500 to 5,000 feet in height, and wide expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions, and the hot winds of Australia do not reach the Island. At Hobart in 1913 the mean annual temperature was 54·2°, the mean summer temperature being 62·7°, and that of winter 46·7°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England;—the average rainfall for Hobart, 1913, was 20·72 inches.

### Government.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. The executive authority is vested in a Governor (appointed by the Crown), aided by a Council of responsible Ministers.

### Governor.

*Governor of Tasmania*, His Excellency Rt. Hon. Sir Francis Alexander Newdigate-Newdegate, *K.C.M.G., born 1860 (1917)* £2,750
*Private Sec.*, Major B. Kett-Pearse ...
*Lieut.-Governor* (vacant).

### Executive Council.

*Premier, Chief Sec., and Education*, Hon. W. H. Lee ..... £800
*Treasurer and Minister of Mines*, Hon. Sir Neil Elliott Lewis, K.C.M.G. ..... 700
*Att.-Gen. & Railways*, Hon. W. B. Propsting 700
*Lands, Works, &c.*, Hon. J. B. Hayes ... 700

UNDER-SECRETARIES, &c.

*Under-Secretary, D'Arcy Addison* ..... £450
*Under-Treasurer*, R. Presbyterian .. .. ..... 500
*Auditor-General*, J. R. Beaumont .. ..... 550
*Registrar-General*, R. M. Johnston, I.S.O. 600
*Commissioner of Taxes*, H. E. Downie 550
*Do., Railways*, G. W. *Smith* ... ... ..... 1,200
*Director of Education*, W. T. McCoy .. .. 600
*Surveyor-General and Secretary for Lands*, E. A. Counsel. .. .. ... .. 550
*Commissioner of Police*, J. E. O. Lord .. 475
*Chief Health Officer*, A. H. Clarke (*acty.*) 600
*Government Printer*, J. Vail ..... .. .. 500
*Director of Agriculture* A. H. Benson. .. 500
*Engineer-in-Chief*, T. W. Fowler, M.I.C.E. 600
*Govt. Statistician*, R. M. Johnston, I.S.O.
*Secretary for Mines*, W. H. Wallace. .... 475

AGENT-GENERAL IN LONDON.

*Agent-General in London*, Hon. Sir John McCall, M.D., 56 Victoria Street, S.W. .. £1,000
*Secretary*, Herbert W. Ely .. ..... ..... 360

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years, and a *House of Assembly* of 30 members, elected for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 12 months, the electorate for the Council is smaller, having a property or educational qualification for both sexes.

*President of the Legislative Council*, Hon. Fetley Gant .. .. .. .. .. £350
*Speaker of House of Assembly*, Hon. J. W. Evans .. .. .. .. .. .. 350

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

*Chief Justice*, Hon. Sir H. Nicholls .. £1,500
*Puisne Judges*, Hons. A. K. Ewing, H. Crisp .. .. .. .. .. .. each 1,200
*Solicitor-General*, L. E. Chambers. .. .. 600
*Registrar Supreme Court*, P. S. Seager .. 550
*Recorder of Titles*, J. W. Whyte. .. .. .. 600

EDUCATION.

*Primary* education is compulsory, secular, and free, there being 496 State schools in 1924, with 23,320 children on the registers. *Secondary* education is also provided by the State and by private efforts. There is a *University* at Hobart, and special schools at Hobart and Launceston.

FINANCE.

The revenue and expenditure and debt of Tasmania for the five years ended June 30, 1921–1925, are stated as follows —

| Year | Revenue. | Expenditure. | Debt. |
|---|---|---|---|
| 1921 .. .. | £970,092 | £1,016,969 | £11,077,790 |
| 1922 .. | 1,084,663 | 1,084,763 | 11,300,411 |
| 1923 .. .. .. | 1,238,085 | 1,168,514 | 12,265,062 |
| 1924 .. .. | 1,181,096 | 1,319,149 | — |
| 1925 .. .. | 1,324,972 | — | 13,133,248 |

*Banking.*—In 1924 the banks of issue had total assets £4,943,289, and total liabilities £4,320,769. The savings bank deposits on 30 June, 1924, were £2,302,398.

PRODUCTION AND INDUSTRY.

*Agriculture and Live Stock.*—Of the total area of 16,378,000 acres, on March 1, 1925, 239,194 acres were under crops and 672,222 under artificially sown grasses, wheat, 48,840 acres, while 1,822,498 acres (exclusive of mineral land) were leased from the Crown principally for pastoral purposes, the terms of purchase being £1 an acre for cash, or £1 6s. 8d. in 24 yearly instalments. The live stock on March 31, 1926, included 269,878 cattle, 1,824,480 sheep, 37,776 pigs, and 42,488 horses. The wool clip in 1923 was estimated at 8,407,232 lb. Fruit of all kinds and of the finest quality is grown in abundance.

*Forestry.*—The forests of Tasmania abound in the most beautiful cabinet woods and the largest size timbers, adapted for every variety of purpose. In 1923 about 47,089,992 super ft., estimated at about £407,566, were cut by the saw mills.

*Minerals.*—There are gold, silver, tin, lead, and copper fields on the west coast, over 44,000 acres have been taken on mineral leases, and mines of both lode and stream tin are being worked in the north. The value of tin produced in 1923 was £290,306, of silver, £91,689 and of copper, £275,664, iron ore exists, and the value of gold produced in 1923 was £78,784. Coal of a good quality, and in easily accessible positions, is very generally distributed over the island.

TOWNS.

CAPITAL, Hobart. Population (1925), 39,998.

Other towns are Launceston (pop. 24,703), Zeehan, Ulverstone, E. Devonport, Latrobe, Waratah, Westbury, Longford, Burnie, and Queenstown.

Transmission of mails, approximate, 31 days.

## VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 9′ E. long., and from 13° 50′ to 35° 8′ S. lat. Its extreme length is, from north-east to south-west, 1,980 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

POPULATION.

| Year. | Males. | Females. | Total. |

Religions.

There is no State aid to religions. At the Census of 1921 there were 109 435 Church of England, 56,626 Roman Catholics, 34,348 Methodists, and 26,687 Presbyterians.

PHYTOGRAPHY.

The coastal regions of the west and of the north are undulating, with an interior slope to the central desert of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison,

Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea.

*Climate.*—The average temperature of Perth (lat. 31° S.) for the past 29 years was 64°, while the mean for the barometer for 30 years was 30·01 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1910 was 39 09, during 1911 29 38, during 1912 27 85, during 1913 36 28, during 1914 20·21, and during 1915 41·81, the average for the past 40 years being 33 28.

### Government

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. The present constitution rests upon an Amending Act of 1890, further amended by the Constitution Acts Amendment Act, 1911, under which the Executive is vested in a Governor appointed by the Crown and aided by a Council of Ministers.

### Governor.

*Governor of Western Australia*, His Excellency Rt. Hon. Sir William Grey Ellison Macartney, P.C., K.C.M.G., *born* 1840 (1917) ... ... ... ... ... £4,000
*Private Sec.*, E. B. Chase.
*Lieut. Governor*, Hon. Sir Edward A. Stone, K.C.M.G., *born* 1844 (1906).

### Executive Council (June, 1917).

*Premier, Lands and Agriculture*, Hon. H. B. Lefroy, C.M.G. ... ... ... ... £1,500
*Railways and Mines*, Hon. J. Hodson ... 1,200
*Col. Secretary & Minister for Education*, Hon. H. P. Colebatch ... ... ... 1,200
*Works & Trading Concerns*, Hon. W. J. George ... ... ... ... ... ... 1,200
*Justice & Forests*, Hon. R. T. Robinson, K.C. 1,200
*Treasurer*, Hon. H. Gardiner ... ... ...
*Without Portfolio*, Hons. Baxter, Hudson, Wilmott, and W. L. Thomas.

### Permanent Staff

*Public Service Commissioner*, M. E. Jull .. £850
*Comm. of Railways*, John T. Short ... .. 2,000
*Engineer-in-Chief*, J. Thompson, M.I.C.E. 1,200
*Under-Secretary*, P. D. North, C.M.G. ... 800
*Under Treas. and Cont.-Gen. of Accounts*, E. A. Black ... ... ... ... ... 708
*Under-Sec. for Lands*, R. C. Clifton, L.S. 700
,, *Works*, C. A. Mant ... ... .. 800
,, *Mines*, H. S. King ... ... .. 850
,, *Law Dept.*, H. G. Hampton 800
,, *Agriculture & Industries*, T. S. McNulty ... ... 800
,, *Water Supply*, H. C. Trethowan ... ... ... ... 850
*Solicitor-General*, W. F. Sayer ... ... ... 850
*Registrar, Supreme Court*, F. A. Moseley 850
*Chief Harbour-Master*, Capt. C. J. Irvine 850
*Governor of Fokis*, R. Connell ... ... 800
*Chief Protector of Aborigines*, A. O. Neville 800
*Auditor-General*, C. S. Toppin. ... ... 800
*Commissioner of Public Health*, E. Atkinson, M.A., M.B., Ch.B., D.P.H. ... ... 1,000
*Govt. Printer*, F. W. Simpson ... ... ... 800
*Registrar-General and Govt. Statistician*, Malcolm A. C. Fraser ... ... ... ... 800
*Director of Education*, C. E. P. Andrews 750
*Chief Mech. Engr.*, R. B. Hosse, M.I.M.E. 1,000
*Deputy Master Royal Mint*, Capt. J. Campbell ... ... ... ... ... 1,000
*Commissioner of Taxation*, R. T. Owen ... 850
*Surveyor-General*, E. S. Brockman ... £800
*State Mining Engineer*, A. Montgomery... 800
*Agricultural Commissioner (& W.)*, J. M. B. Connor ... ... ... ... ... ... 750
*Do. (Wheat Belt)*, G. L. Sutton ... ... 750
*Do. (Fruit Industries)*, J. T. Moody 750
*Govt. Geologist*, A. Gibb Maitland ... ... 800
*Govt. Astronomer*, H.B. Curlewis, B.A., F.R.A.S. 800

### Agent-General in London.

*Agent-General in London*, Hon. J. D. Connolly *Office*, Savoy House, Strand, W.C. ... ... ... ... ... ... £1,500
*Secretary (acting) & Inspecting Engineer*, Ernest E. Salter ... ... ... ... 500

### The Legislature.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage, the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.
*President of the Legislative Council*, Hon. Sir H. Briggs ... ... ... ... ... £700
*Speaker of the Legislative Assembly*, Hon. E. B. Johnston ..... ... ... ... ... 700

### The Judicature.

There are magistrates courts and general and quarter sessions, and a Supreme Court with a Chief Justice and three Puisne Judges.
*Chief Justice*, Hon. Sir E. F. Macmillan £2,000
*Puisne Judges*, Hons. E. E. Burnside, J. Roeth, and J. A. Northmore. .. each 1,500

### Education.

*Education.*—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines at Kalgoorlie, a modern school, and a University. The total amount expended on education during the year ended June 30, 1916, was £260,804 (including the University, £13,500).

### Finance.

The revenue and expenditure and debt of the State for the 5 years ended June 30, 1911–1915, are stated as under —

| Year. | Revenue. | Expenditure. | Debt. |
|---|---|---|---|
| | £ | £ | £ |
| 1911 | 3,966,674 | 4,101,082 | 26,289,503 |
| 1913 | 4,356,699 | 4,767,063 | 30,078,432 |
| 1914 | 5,104,343 | 5,340,734 | 34,420,211 |
| 1915 | 5,140,709 | 4,908,240 | 37,000,600 |
| 1916 | 5,236,976 | 5,705,200 | 39,139,676 |

*Banking.*—There were, including the Commonwealth Bank of Australia, 6 cheque-paying banks, formerly banks of issue, in the State on March 31, 1916, with total assets £12,856,494 and liabilities £8,640,313. The amount due to depositors in the State Savings Bank at June 30, 1916, was £4,327,446, and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1916, was £600,491.

### Production and Industry.

*Agriculture and Live Stock.*—Of the total area (624,488,600 acres) 2,130,091 acres were under crops in 1915–1916, wheat accounting for 1,772,317 acres; large areas of good wheat-growing soil exist in the southern districts. The live stock included 820,048 cattle, 4,809,630 sheep, 38,492 pigs, 18,492 goats, and 284,228 horses. There were about 2,500 acres of vineyards.

*Forestry.*—The jarrah (*Eucalyptus marginata*), sometimes erroneously called mahogany, covers immense tracts of land in the S.W portion of the State, its timber is extraordinarily durable, and as it resists the white ant, it is admirably adapted for railway sleepers, and for piles for bridges. The sandalwood (*Santalum oppositifolium*) has long been an article of export, the tuart (*Eucalyptus gomphocephala*) and karri (*Eucalyptus diversicolor*), eucalypti of enormous size, are valuable timber trees, the bark of the mallet tree is exported for tanning purposes.

*Minerals.*—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 129th meridian), as well as other fields, are being constantly worked, the production of gold being 1,210,112 oz. in 1902, and 709,498 oz. in the first eight months of 1903. To the Coolgardie group belong the following goldfields North Coolgardie, Broad Arrow, North-East Coolgardie, East Coolgardie, and Coolgardie. The total amount produced in the State from 1886 to August 31, 1903, is 30,197,685 fine oz., of this amount the greater portion was received at the Royal Mint, Perth.

Magnetic iron, lead, copper, and tin ores exist in large quantities, as also coal.

*Trade.*—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, mallet bark for tanning, pearls and pearl-shells, kangaroo skins, wheat, flour, fruit, &c. The estimated value of the exports for the year ended June 30, 1902, was:—Wool, £1,273,289; timber, £442,214; sandalwood, £62,382; shell, £138,497 gold, £844,329; gold specie, £2,229,049; hides and skins, £491,082; wheat, £1,089,362; flour, £274,186.

TOWNS.

CAPITAL, Perth. Population (1901) of Metropolitan area, including Fremantle, 126,292.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. Other towns are Fremantle (including suburbs, 22,849), Albany (3,886), Coolgardie (8,000), Kalgoorlie (8,362), Boulder (10,824), Broome, Bunbury (3,065), Claremont (4,000), Geraldton (3,776), Midland Junction (3,484), and Northam (3,362).

Transmission of mails, approximate, 25 days.

## Territories

### NORTHERN TERRITORY

The Northern Territory occupies the centre of the Australian continent between 129° 129° East longitude as far as 26° South latitude, and its administration was taken over by the Commonwealth on Jan. 1, 1911. From 1863 to Dec. 31, 1910, it was part of the State of "South" Australia.

POPULATION

| Census. | Males. | Females. | Total. |
|---|---|---|---|
| 1891 | 4,350 | 398 | 4,748 |
| 1901 | 4,228 | 593 | 4,821 |
| 1911 | 2,734 | 377 | 3,111 |
| 1921 | 3,189 | 998 | 4,187 |

The population of the Northern Territory on January 1, 1924, was as follows:—Europeans, 1,229; Coloured (principally all Asiatics), 1,498; Aboriginals (estimated), 10,000.

The only railway is from Darwin to Katherine (194 miles). A further extension to the Mataranka (Roper River (82 miles) will be proceeded with in the near future, the permanent survey having been completed. The policy of the present Government is to link up the Territory with the other States by means of a trans-continental railway. The Government have recently initiated a policy whereby every consideration and encouragement will be given to those desiring to settle on the land, suitable areas for tropical agriculture being granted rent free during the original settler's lifetime or for a period of 21 years, whichever is longer. The Darwin Botanical Gardens, where experiments in tropical agriculture are carried out, are situate 2½ miles west of the town. Portions of the country are well adapted for tropical and semi-tropical agriculture, and successful results have been obtained from experiments with Indian wheat. Pearl fishing is carried on round the coast, and the shell is of good quality. The country's mineral resources are great, but are as yet undeveloped. Gold, silver, copper, lead, and tin have been found in considerable quantities, pointing to a great future for the mining industry. Horse-breeding stations under Government supervision are to be established at an early date for remount purposes, and the Government have recently started experimental farms with favourable prospects. Extensive meat freezing works have been erected near Darwin which will greatly enhance the value of locally bred cattle, which hitherto have been driven to other states for disposal.

The average rainfall for Darwin and neighbourhood is 63 inches per annum, but further inland it diminishes gradually till, at the southern end of the Territory, it is not more than 8 to 10 inches. Speaking broadly, the country is generally suitable for cattle raising, and recent investigation has shown that much country previously considered desert waste is capable of use. The chief grasses are Mitchell and Flinders. The staple industry of the Territory is undoubtedly pastoral. There are thousands of square miles of first-class pasturage which will one day carry millions of sheep. Immense freezing works have been erected at Darwin. The Territory is blessed in many parts with abundant surface waters, and, where this does not occur, water can be obtained at shallow depths by sinking. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable from 40 to 100 miles from their entrance for boats drawing 4 feet. Wildfowl are plentiful; crocodile are numerous in the rivers. Buffalo and wild cattle abound in parts and kangaroo and other marsupials are very plentiful. The best months to arrive for sport would be May to August. The Territory has hitherto been little known in connexion with sport, but offers greater inducements in this direction than any other part of the continent. For the months of April to September the climate is delightful. From October to December it is hot and humid, from January to March is the wet season, when travelling becomes extremely difficult.

Darwin, the seat of Government, occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin, one of the finest harbours in Australia, and contains the offices of the Administrator and officials of the Territory. The cable owned by the Eastern Extension Company lands at Darwin from Singapore. The town is healthy and free from malaria.

*Administrator*, J. A. Gilruth.
*Private Sec.* (vacant).
*Judge, Supreme Court*, His Honour Mr Justice J D J Bevan.
*Director of Mines*, T G. Oliver
*Director of Lands*, T J Worgan (*acting*).
*Government Secretary*, H B. Carey
*Supt. of Railways*, R. J Evans.
*Supt. of Public Works*, W O. Kellaway.
*Superintendent, State Hotels*, J Callan.

## PAPUA.

The total area of Papua is about 90,600 sq. miles, with an estimated population of 280,000. The territory, formerly known as British New Guinea, comprises the southern and south-eastern shores of the island of New Guinea, the second largest island in the world. It lies across 8 miles to the north of Queensland, between 0° 0′ and 12° 0′ S. lat. and between 130° 30′ and 154° 30′ E. long. Its greatest length is 1,490 miles, with a maximum breadth of 430 miles. The islands lying near Papua, some 100 in number, form part of the Territory Papua was discovered in 1511, and was first claimed by the Dutch. The British portion was annexed by Queensland to the Empire in 1888, but it was not then ratified by the Imperial Government. A Protectorate was, however, proclaimed in 1884, on the Australasian Governments guaranteeing £15,000 annually, to cover the cost of administration. The Territory was annexed by the Crown in 1888. The Imperial Government has contributed some £80,000 towards the founding of the Possession. In 1901 the Commonwealth Government took it over as a Territory of the Commonwealth The two largest rivers are the Fly and the Purari. It is mountainous generally, the highest point reaching 13,120 feet, and a large portion of the country consists of forest. The climate is favourable to the cultivation of all tropical products. An expedition of Imperial Australian troops took possession of the German territory (Kaiser William s Land) in the north on September 24, 1914. The soil is exceedingly fertile, but the cultivated area is small. Oil has been discovered, and the petroleum industry is likely to become important. Gold to the value of £43,249 was exported in 1916, and copper ore to the value of £20,000. The imports were valued at £218,303 in 1912–13, and the exports at £208,008. The ports of entry are PORT MORESBY, Samarai, Daru, and Bomgai.

### EXECUTIVE COUNCIL.

There is an Executive Council of 6 members, who, with 3 non-official members, form also the Legislative Council.

*Lieutenant Governor of Papua*, His Excellency John Hubert Plunkett Murray, C.M.G., *born* 1861 (with allowance £450) £2,250
*Govt. Sec.*, Hon. H. W Champion ... ... 800
*Treasurer for Lands*, Hon. M. S. C. Smith ... 800
*Chief Med. Officer*, D. Buchanan, M.D., F.R. 950
*Treasurer for Native Affairs*, Hon. B. W Brunell 800

### THE JUDICATURE.

*Chief Judicial Officer*, H.E. the Lt.-Governor
*Deputy do.*, Hon. C E. Herbert ... ... ... £1,000

### FINANCE.

The revenue, imports and exports, and shipping of Papua for the six years ended June 30, 1918, are as follows :—

| Year | Revenue. | Imports. | Exports. |
|---|---|---|---|
| | £ | £ | £ |
| 1912–13 | 45,672 | 208,900 | 217,410 |
| 1913–14 | 51,734 | 233,369 | 99,699 |
| 1914–15 | 50,135 | 218,382 | 128,016 |
| 1915–16 | 54,704 | 272,734 | 125,140 |
| 1916–17 | 51,561 | 200,055 | 99,154 |
| 1917–18 | 70,511 | 243,040 | 134,488 |

## NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 22 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in December, 1915, was 899.

*Administrator*, M V Murphy
*President, Executive Council*, C C R. Nobbs.

## COLONIAL APPOINTMENTS.

APPOINTMENTS in the self-governing Dominions—Canada, Australia, New Zealand, the Union of South Africa, and Newfoundland—are entirely under the control of the local Governments, and for information with regard to them application should be made to the *High Commissioners* or *Agents-General* in London, particulars of whom, with their addresses, will be found under the respective Dominions in the ALMANACK. With regard to appointments of a Consular nature, application should be made to the *Foreign Office*. Inquiries as to appointments in Egypt and the Sudan should be addressed to the Secretary, Selection Board, Ministry of Finance, Cairo. Aden and adjacent territories are subject to the Government of Bombay Ascension Island is under the supervision of the Admiralty All civil officers of Rhodesia are either nominated or appointed by the British South Africa Company, 2 London Wall Buildings, E.C. For appointments in North Borneo, application should be made to the British North Borneo Company, 32 Threadneedle Street, E.C. Appointments in Sarawak are in the hands of His Highness the Rajah. The patronage of the Secretary of State for the Colonies is confined to those colonies and countries which are administered under his direction.

The selection of candidates depends on the general educational attainments, the professional or otherwise subsequent training and experience (if any), and on the character and personal fitness of the applicants. These qualifications are judged by the candidate's academic record, by testimonials from properly qualified persons who have a personal knowledge of the candidate and his career, and by personal interviews at the Colonial Office.

*** Attempts to influence the Secretary of State's selection through Members of Parliament or other persons who are not personally well acquainted with the applicant are useless, and will be regarded as indicating that the applicant himself does not consider his qualifications sufficiently good to justify his appointment on his own merits. They can in no case operate to the advantage of a candidate, and may prejudice his chances of success.

## PHYSIOGRAPHY

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, between 33° – 53° South latitude and 166° East longitude – 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

*Relief.*—A mountain chain (*Southern Alps*) traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height, and sloping down on the east to the extensive Canterbury Plain. The North Island is less generally elevated, but has high summits in Mounts Ruapehu (9,700 feet), Tongariro (7,000 feet), and Egmont (8,270 feet)

*Rivers and Lakes.*—The North Island has a large central lake (Taupo) 36 miles long, from which the river *Waikato* flows north-west to the sea. The volcanic region has a chain of hot lakes and springs which deposit silica. The celebrated "pink terraces" of Rotomahana, formed by the deposit of silica tinted with oxide of iron, were destroyed by volcanic action in 1886, but are again in process of formation. The *Wanganui*, which rises in the hills south of Lake Taupo, flows southwards into Cook Strait. The South Island has many Alpine lakes of great depth, but the scarcity of the mountains and the narrowness of the island give the numerous streams a breadth out of all proportion to their length. The principal rivers are the *Waiau* and *Waimakariri* in the north and the *Wanaka, Taieri, Clutha*, and *Waiau* in the south, all five rising in the eastern slopes of the mountains, and the *Buller* and *Grey* in the west.

*Climate.*—The extremes of daily temperature vary throughout the year only by an average of 20°; London is 7° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole Dominion for the different seasons is — Spring, 55°, summer, 63°, autumn, 57°; and winter, 48°

## GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Janson Tasman, the navigator (*voyaging under the direction of the Netherlands' East India Company*), on 13 December, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H M S *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on 3 May, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

GOVERNOR-GENERAL.

*Governor-Gen. and Commander-in-Chief of New Zealand*, His Excellency *The Earl* of Liverpool, P.C., G.C.M.G., M.V.O. ... £7,000
*Private Sec.*, Gavin M. Hamilton
*A.D.C.s*, Capt. J. Gage Williams (19th Hussars), Hon. Lieut. H. G. Helmore, and Col. J. H. Roseveare (extra).
*Hon. A.D.C.'s*, Col. Sir A. H. Russell, K.C.M.G. (temp. *Maj.-Gen.*), Col. R. J. Collins, C.M.G., I.S.O., V.D., Col. G. F. C. Campbell, V.D., Col. R. Logan, C.B., Col. V. S. Smyth, Col. J. C. Nichols, V.D.

* EXECUTIVE COUNCIL, 1907.
(Formed 19th August, 1856).

The Executive Council now consists of :—

His Excellency the GOVERNOR-GENERAL.

*Prime Minister, Minister of Lands, Labour, Industries and Commerce, Commissioner of State Forests, Minister in Charge of Land for Settlements, Valuation, Scenery Preservation, and Electoral Departments*, Rt. Hon. W. F. Massey, P.C. £1,800
*Minister of Finance, Postmaster-General and Minister of Telegraphs, Minister in Charge of Land and Income Tax, State Advances, Public Trust, and Government Life Insurance Departments*, Rt. Hon. Sir J. G. Ward, Bt., P.C., K.C.M.G. £2,000
*Minister of Defence*, Hon. Sir J. Allen, K.C.B. ... ... ... ... ... ... ... 1,800
*Minister of Railways and Native Minister*, Hon. W. H. Herries. ... ... ... ..... 1,300
*Attorney-General, Minister in Charge of Police and Crown Law Departments, and the Discharged Soldiers' Information Department*, Hon. A. L. Hardman. .... 1,800
*Minister of Public Works, and Minister in Charge of Roads Dept.*, Hon. W. Fraser 1,000
*Minister of Internal Affairs, Public Health Marine, Stamp Duties, Minister in Charge of Hospitals and Charitable Aid, Mental Hospitals, Printing and Stationery, High Commissioner's, Audit, Museum, Registrar General's, and Laboratory Departments*, Hon. G. W. Russell ... 1,800
*Minister of Customs, Minister in Charge of Munitions and Supplies, Pensions, Advertising, and National Provident Fund Departments*, Hon. A. M. Myers 1,800
*Minister of Immigration and Leader of the Legislative Council*, Hon. Sir F. H. D. Bell, K.C.M.G., K.C. .....

* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £2 10s. per diem when so employed, but not during attendance at a session of the General Assembly.

*Minister of Agriculture, Mines, Minister in Charge of Legislation, Public Buildings, Inspection of Machinery, State Fire and Accident Insurance, and Tourist and Health Resorts Departments*, Hon. W D S. MacDonald ..... £1,000
*Minister of Justice, Education, and Minister in Charge of Friendly Societies*, Hon. J. A. Hanan ..... ..... .....
*Representing the Native Race, Minister of the Cook Islands, and in Charge of Maori Councils*, Hon. Dr Pomare .. 400
*Clerk of the Executive Council*, James Frank Andrews, I.S.O. ..... 625

PUBLIC OFFICERS.

*Public Service Commissioner*, D. Robertson, I.S.O. ..... £1,300
*Asst. Public Service Commissioners*, R. Triggs and A. D. Thomson ..... each 1,000
*Solicitor-General*, J W Salmond, LL.B. .. 1,250
*Controller & Auditor-Gen.*, Col.R.J Collins, C.M.G., I.S.O. ..... 1,000
*Commissioner Govt. Life Insurance Dept.*, J H. Richardson, F.I.A., F.F.A., F.A.S. 1,000
*Public Trustee*, F Fitchett, C.M.G., LL.D 1,000
*Inspector-General Mental Hospitals*, F Hay, M.B., C.M. ..... 1,000
*Inspector-General of Hospitals and Chief Health Officer*, T. H. A. Valintine, M.R.C.S., L.R.C.P., D.P.H. ..... 950

UNDER-SECRETARIES, &c.

*Internal Affairs*, James Bishop ..... £750
*Treasury*, G F C. Campbell ..... 1,200
*Customs*, W B. Montgomery ..... 900
*Education*, W J Anderson, M.A., LL.D. .. 900
*Justice (Native, and Cook Islands)*, G C. B. Jordan ..... 850
*Commissioner of Police*, J O'Donovan .. 600
*Public Works*, W S. Short ..... 900
*Mines*, P G Morgan, M.A. ..... 700
*Lands*, T N Brodrick ..... 650
*Registrar-General*, W W Cook ..... 500
*Govt. Statistician*, M. Fraser ..... 525
*Govt. Printer*, Marcus F Marks ..... 650
*Tutor*, D. G Clark ..... 650
*Valuer-General*, F W Flanagan ..... 700
*Ethnologist*, E. H Hiley ..... 1,000
*Gen. Post Office*, W R. Morris, I.S.O. .. 1,000
*Stamps, Land & Deeds*, P C. Cortiss. .. 800
*Director Museum*, J A. Thomson, M.A., D.Sc. ..... 600
*Govt. Astronomer*, C. E. Adams, D.Sc., F.R.A.S. ..... .....
*Surveyor-General*, E. H. Wilmot ..... 700
*Agriculture*, F S. Pope ..... 700
*Tourist Dept.*, R. M Wilson ..... 650
*Labour*, F W T. Rowley ..... 600
*Marine*, G Allport ..... 750

HIGH COMMISSIONER IN LONDON

*High Commissioner in London*, Hon. Sir Thomas Mackenzie, K.C.M.G., F.S.S., New Zealand Government Offices, 413 Strand, W.C. 2 2,000
*Secretary*, Capt. T R. Deane ..... 750

THE LEGISLATURE.

Parliament consists of a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 45 members, and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election or for appointment to the Legislative Council. An Act providing for an elective Legislative Council has been passed.

*Speaker of the Legislative Council*, Hon. C. J Johnston
*Speaker of the House of Representatives*, Hon. Sir F W Lang, Kt.Bach.

THE JUDICATURE.

The judicial system is similar to that of England, with magistrates' courts and quarter sessions, and a supreme court with a Chief Justice and 7 puisne judges.
*Chief Justice*, Hon. Sir Robt. Stout, K.C.M.G. £4,000
*Puisne Judges*, Hons. F R. Chapman, J H. Hosking, W R. Edwards (*Wellington*), J M. Denniston, T. W Stringer (*Canterbury*), T. Cooper (*Auckland*) W A. Sim (*Otago*) ..... each 2,800

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road and harbour boards. Electors are adult ratepayers of both sexes.

PASSPORTS.

After Oct. 1, 1916, no person over 15 years will be permitted to land, unless in possession of a passport issued by a competent British authority

DEFENCE.

Army

The New Zealand Defence Forces consist of the N.Z. Staff Corps (Officers), the Permanent Staff (Warrant and N.-C. Officers), and the Royal New Zealand Artillery (Field and Garrison), the Territorial Forces consist of 12 regiments of Mounted Rifles, 3 batteries N.Z. Field Artillery, 3 companies N.Z. Garrison Artillery, 4 companies N.Z. Engineers, 2 battalions N.Z. Railway Corps, 17 battalions Infantry, 2 companies N.Z. Signal Corps, the N.Z. Army Service Corps, 2 battalions N.Z. Post and Telegraph Corps, 2 field ambulances N.Z. Medical Corps; the N.Z. Veterinary Corps, the Rifle Clubs, and the Senior Cadets.

Military training is compulsory on all male citizens between the ages of 12 and 25—in *Cadet Corps* 12–18, *Territorial* 18–25, with short periods of training in the field. The *Peace Effective* is about 30,000 of all ranks. The material from which the Australian and New Zealand Armies are being constructed is the finest in the world. The Dominion has contributed a considerable Expeditionary Force, completely equipped, and its services in the war have been most valuable.

Navy.

The 3rd-class cruiser *Philomel* has been handed over to the Dominion by the Imperial Government as the nucleus of a New Zealand owned navy, to be, however, placed at the disposal of the Home Government in time of war A number of small vessels, formerly belonging to the Australian Squadron, are located in N.Z. waters. In 1909 the Dominion presented the battle-cruiser *New Zealand* (18,200 tons) to the Imperial Government. The Calliope Dock, capable of docking two warships, was submitted by the Imperial Government in 1916.

## FINANCE.

The revenue and expenditure (Consolidated Fund) and debt of New Zealand for the 5 years ended March 31, 1923-1927, are stated as follows :—

| Year. | Revenue. | Expenditure. | Debt |
|---|---|---|---|
| 1923 | £11,734,271 | £11,482,798 | £90,262,763 |
| 1924 | 12,289,682 | 11,893,824 | 99,730,427 |
| 1925 | 12,451,945 | 12,279,803 | 100,689,920 |
| 1926 | 14,307,130 | 13,433,107 | 109,637,357 |
| 1927 | 15,385,194 | 14,456,770 | 120,834,104 |

## EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1923) 2,398 public primary schools, with 5,404 teachers and 283,214 scholars; there are also 300 private schools, with 22,339 scholars, and, in addition, 129 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 33 endowed colleges and grammar schools. The University of New Zealand (to which are affiliated Auckland University College, Victoria University College, Canterbury College, and the University of Otago, the four colleges having 2,039 students in 1923) has power to confer degrees.

## PRODUCTION AND INDUSTRY.

*Agriculture and Forestry.*—The total area of the two main islands is 64,440,829 acres, and 42,282,139 acres of this were in occupation in 1926, this acreage representing 77,229 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. Preliminary figures show that the area under wheat in 1926-27 was 229,122 acres, giving a yield of 5,093,457 bushels. An area of 278,327 acres of oats was threshed, the yield total ling 8,430,409 bushels, while 932,628 acres were converted to chaff, hay, or ensilage. Other acreages were barley, 29,870; rye-grass, 79,422; and potatoes, 24,922. An area of 532,496 acres was sown in turnips. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

*Live Stock.*—The cattle in 1927 (preliminary figures) numbered 2,302,700, sheep, 25,270,398, pigs, 278,186, and horses, 387,167. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

*Minerals.*—Coal-mining is one of the largest industries, the output in 1926 being 2,257,139 tons, the approximate total output to the end of 1926 being 44,092,171 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, has been found in Taranaki, and in the form of brown hæmatite at Parapara, near Nelson.

## EXTERNAL TRADE.

The total imports and exports of the Dominion are valued as follows, for the 5 years 1922-26 :—

| Year. | Imports. | Exports. | Total. |
|---|---|---|---|
| 1922 | £20,978,874 | £21,370,581 | £42,349,455 |
| 1923 | 22,868,300 | 22,988,020 | 45,856,320 |
| 1924 | 21,898,098 | 26,282,447 | 48,180,545 |
| 1925 | 21,708,634 | 31,508,972 | 53,217,606 |
| 1926 | 26,332,489 | 32,568,520 | 58,901,009 |

The principal articles of import and export in 1925 and 1926 were :—

| | Imports. 1925. | Imports. 1926. |
|---|---|---|
| Spirits and Alcoholic Liquors | £842,490 | £872,468 |
| Beverages (non-alcoholic) | 388,894 | 347,422 |
| Tobacco and preparations thereof | 833,856 | 727,820 |
| Foodstuffs (excluding Sugar) | 1,456,304 | 1,478,968 |
| Sugar | 1,089,096 | 982,968 |
| Apparel, Textiles, and Manufactured Fibres | 5,139,273 | 7,316,573 |
| Oils, Fats, and Waxes | 851,484 | 1,088,629 |
| Metal Manufactures (other than Machry & Machines) | 2,403,442 | 2,589,784 |
| Machinery and Machines | 1,690,109 | 2,186,503 |
| Paper and Stationery | 892,908 | 1,118,040 |
| Drugs, Chemicals, and Drug'gists' Wares | 680,482 | 850,980 |

| | Exports. 1925. | Exports. 1926. |
|---|---|---|
| Wool | £10,387,875 | £12,388,074 |
| Frozen Meat | 7,794,305 | 7,271,318 |
| Butter and Cheese | 5,430,476 | 6,146,603 |
| Skins, Hides and Pelts | 1,450,276 | 1,647,679 |
| Gold | 1,594,853 | 1,199,422 |

The external trade of 1926 was shared by the principal countries as under :—

| Country | Imports from. | Exports to. |
|---|---|---|
| United Kingdom | £13,869,455 | £16,849,988 |
| Australia | 4,202,171 | 2,732,543 |
| United States | 3,669,925 | 2,668,087 |
| Fiji | 1,052,754 | 136,496 |
| India and Ceylon | 930,022 | 82,123 |
| Canada | 737,285 | 602,988 |
| Japan | 580,574 | 110,044 |
| France | 124,198 | 303,288 |

## COMMUNICATIONS.

*Railways.*—In March, 1927, there were 4,960 miles of Government railway lines in working order, and more under construction, and 89 miles of private lines, together with an excellent coaching system.

*Shipping.*—During 1926 the vessels entered inwards numbered 974 (tonnage, 1,448,527), and those entered outwards 990 (tonnage, 1,467,823), exclusive of coasting vessels.

*Posts and Telegraphs.*—The annual postal circulation was (1926) 230,235,098 letters and postcards, 42,807,990 newspapers, 28,868,537 books and packets, and 6,085,109 parcels, and the work is effected by 2,313 post-offices. There are 13,896 miles of telegraph line, with 30,300 miles of wire. The telephone service is highly efficient and universal in all centres.

## TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The population of the chief cities and towns at the Census of 29 October, 1926, was as follows :—Wellington,* 98,226; Auckland,* 133,722; Dunedin,* 68,318; Christchurch,* 90,733; Invercargill,† 17,882; Napier,† 13,131; Gisborne,† 12,862; Palmerston North,† 14,026; Nelson,† 9,962; Timaru, 13,726; Wanganui,† 19,517; Greymouth,† 8,373; and New Plymouth,† 8,798.

For Dependencies of New Zealand, see p. 574.

* Metropolitan area. † Suburban area.

# Union of South Africa.

## AREA AND POPULATION

| Provinces and Capitals. | Area (English Sq. Miles). | Population. | |
|---|---|---|---|
| | | 1904. | Census of 1911. |
| Cape of Good Hope (Cape Town) | 276,966 | 2,409,804 | 2,564,965 |
| Natal (Pietermaritzburg) | 35,290 | 1,108,754 | 1,194,043 |
| Transvaal (Pretoria) | 110,430 | 1,269,951 | 1,686,212 |
| Orange Free State (Bloemfontein) | 50,389 | 387,315 | 528,174 |
| Total | 473,075 | 5,175,824 | 5,973,394 |

Of the total 3,973,394 persons (1911), 3,069,392 were males, and 2,904,002 females. The increase for the Union (1904–11) was 15·41 per cent. For the Provinces it was as follows:—Cape, 6 44 per cent.; Natal, 7 69 per cent., Transvaal, 32 78 per cent.; Orange Free State, 36 37 per cent

The *population* comprised (1911) 1,276,242 Europeans or Whites (491,078 females), 4,019,006 natives (1,996,057 females), and 678,146 other coloured races (316,867 females). In 1904 the figures were:—Europeans, 1,116,806 (increase, 1904–11, of 14 28 per cent.), natives, 3,491,056 (increase, 1904–11, of 15 12 per cent.), and other coloured races 567,062 (increase, 1904–11, of 19 40 per cent.) The total non-European increase (1904–11) was 15 72 per cent. The proportion of Europeans in the total population in 1904 was 21·58 per cent., in 1911, 21 37 per cent.

## PHYSIOGRAPHY

*Boundaries.*—The provinces of the Union extend from the southernmost point of the African Continent to the watershed of the Limpopo River, i.e., from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

*Relief.*—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Bergen* and *Lange Bergen* run in parallel lines from west to east of the southern province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeuwbergen*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet), between Natal and the Orange Free State.

*The Orange Free State presents a succession of undulating grassy plains with good* pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

*Rivers.*—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between German South-West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

## HISTORICAL SKETCH

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover new ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal;

but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

*Natal* derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

## GOVERNMENT

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The seat of the Government is Pretoria, the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

*Agriculture*, F. B. Smith ..... 1,500
*The Interior*, H. H. L. Gorges, M.V.O. ..... 1,500
*Mines*, H. W. Smythe ..... 1,500
*Finance*, J. R. Leisk, C.M.G. ..... 1,500
*Commissioner for Customs and Excise*, H. R. R. Eaton ..... 1,500
*Lands*, G. R. Hughes ..... 1,500
*Justice*, J. de V. Roos ..... 1,800
*Native Affairs*, E. E. Dower ..... 1,350
*Education*, G. Hofmeyr, C.M.G. ..... 940
*Postmaster-General*, Jeremiah Wilson ..... 1,400
*Mining Engineer*, R. N. Kotze ..... 1,000
*Defence*, H. R. M. Bourne ..... 1,200
*Public Works*, C. Murray ..... 1,500

HIGH COMMISSIONER IN LONDON

Rt. Hon. William Philip Schreiner, P.C., G.M.G., K.C. *High Commissioner's Office*, 92 Victoria Street, S.W.

*Secretary*, T. S. Nightingale, C.M.G.
*Asst. do.*, R. A. Blankenberg.
*Trades Commissioner*, C. de P. Chiappini, 92 Cannon Street, E.C.

THE LEGISLATURE.

The *Senate* consists of 40 members. For ten years after the establishment of Union eight are nominated by the Governor-General in Council and 32 are elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy will be filled by the choice of the Provincial Council in respect of whose Province a vacancy occurs.

The *House of Assembly* consists of 130 elected members, 51 of whom represent the Cape of Good Hope, 17 Natal, 44 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

*President of the Senate*, Hon. F. W. Reitz £1,200
*Speaker of the House of Assembly*, Hon. Sir J. T. Molteno, K.C. ..... £1,200

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply

THE JUDICATURE.

SUPREME COURT OF SOUTH AFRICA.

APPELLATE DIVISION (Bloemfontein).

*Chief Justice of South Africa*, The Rt. Hon. Sir J. Rose-Innes, P.C., K.C.M.G. £4,000
*Judges of Appeal*, Hon. Sir W. H. Solomon, K.C.M.G., K.C. £1,000, Hon. J. de Villiers ..... £3,250
*Additional Judges of Appeal*, Hon. J. de Villiers and Hon. Sir Henry Juta.
*Registrar, Taxing Officer and Librarian*, J. Emer ..... 800

*Cape of Good Hope Provincial Division.*

*Judge President and Additional Judge of Appeal*, Sir Henry H. Juta ..... £2,500
*Puisne Judges*, Hon. Sir R. J. Buchanan, Hon. J. G. Kotze, Hon. M. W. Searle, and Hon. F. G. Gardiner ..... each 2,250
*Registrar, Taxing Officer and High Sheriff*, H. R. Dale ..... 800

*Eastern Districts Local Division.*

*Judge President*, Hon. T. L. Graham ..... £2,500
*Puisne Judges*, Hon. F. A. Hutton and Hon. V. Sampson ..... each 2,250
*Registrar*, R. G. Ramsbow ..... 900

*Griqualand West Local Division.*

*Puisne Judge*, Hon. J. H. Lange ..... £2,250
*Assistant Registrar*, C. E. Horne ..... 300

*Transvaal Provincial Division.*

*Judge President and Additional Judge of Appeal*, Hon. J. de Villiers ..... £3,250
*Puisne Judges*, Hon. Sir J. W. Wessels, Hon. A. W. Mason, Hon. L. S. Bristowe, Hon. J. S. Curlewis, and Hon. C. G. Ward, each £2,500, Hon. E. Gregorowski ..... 2,250
*Registrar, Taxing Master and Sheriff of the Transvaal*, Hon. F. L. C. B. Juta ..... 725

*Natal Provincial Division.*

*Judge President*, Hon. J. C. Dove Wilson, K.C. ..... £3,500
*Puisne Judges*, Hon. W. Broome, Hon. T. F. Carter, K.C., and Hon. K. H. Hathorn, K.C. ..... each 2,250
*Registrar*, K. W. McAlister ..... 900

*Native High Court, Natal.*

*Judge President*, Hon. H. G. Bosboff ..... £1,200
*Judges*, Hon. J. C. O. Chadwick, Hon. C. G. Jackson ..... each 1,000
*Registrar*, W. H. Acutt ..... 600

*Orange Free State Provincial Division.*

*Chief Justice*, Hon. Sir A. F. S. Maasdorp £2,250
*Puisne Judges*, Hon. D. Ward, Hon. A. J. McGregor ..... 2,250

DEPARTMENT OF JUSTICE.

*Minister of Justice*, The Hon. E. J. de Wet, K.C. ..... £2,500
*Secretary for Justice and Director of Prisons*, J. de V. Roos, B.A., LL.B. ..... £1,800
*Under-Secretary for Justice*, C. D. Rudolf ..... £1,000
*Chief Clerk*, R. J. Gill, *Esqr.*, D. D. Kelly ..... 600

*Law Advisers*, E. L. Matthews, C.M.G., £1,500; L. C. Nightingale, £1,100; Dr W. E. Bok ... £1,000
*Attorney-General (Transvaal)*, C. W de Villiers ... 1,800
*Professional Assistant*, Dr A. A. Schoch 700
*Attorney-General (Cape)*, E. W. Douglas 1,500
*Professional Assistant*, C. W. H. Lansdown 800
*Attorney-General (Natal)*, J. Barclay Lloyd 1,000
*Attorney-Gen. (O. F State)*, S. J. de Jager 1,000
*Inspecting Magistrate and Inspector of Prisons (Transvaal, Griqualand, and Bechuanaland)*, O. W. Stalen ... 800
*Inspecting Magistrate and Inspectors of Prisons (Cape Western)*, W. B. Magennis 800
*Inspecting Magistrate and Inspector of Prisons (Cape Eastern and O. F State)*, R. C. Lloyd ... 700
*Inspecting Magistrate (Natal) & Inspector of Prisons (Natal and Native Territories, Cape)*, J. S. Ente ... 800

POLICE

*Chief Commissioner of Police for the Union and Commissioner of Police for Transvaal Province*, T. C. Truter ... £1,500
*Secretary (Deputy Commissioner)*, H. C. Dredell ... 1,000

COMMISSIONER OF PATENTS (TRANSVAAL).

*Commissioner and Registrar of Companies and Trade Marks*, C. W. T. B. Juta ... £800
*Chief Clerk and Examiner* H. D. Wadlake 250

## DEFENCE.

At the commencement of the war, the S.A. Government undertook the defence of the Union, thus freeing the Imperial troops for service elsewhere.

### UNION OF SOUTH AFRICA TROOPS.

The South Africa Defence Act, 1912, became law on June 24, 1912. This Act provides for the establishment of Defence Forces comprising (1) a Permanent Force, (2) a Coast Garrison Force, (3) a Citizen Force, (4) a Royal Naval Volunteer Reserve, and (5) Special Reserves.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 21 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 30 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number. Citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a rifle association. Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The Permanent Force—South African Mounted Riflemen—was established on the 1st April, 1913.

The Union has been divided into 25 Military Districts. To each Military District has been allotted various Units of different Arms, to which the citizens entered for Peace Training in their 20th and 21st years are posted. The first Training Camps began in September, 1915.

A Cadet organisation is also in existence, and Rifle Associations have been formed.

In October, 1914, a rebellion broke out, and the rebels attempted to join forces with the Germans of the neighbouring Colony. The Union forces, under the command of General Botha, met the outbreak successfully. An expedition to German South West Africa, which followed, resulted in the unconditional surrender of the German forces on the 9th July, 1915, and the taking over of the administration of that territory by the Government of the Union.

## EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils." For practical purposes it has been provisionally determined that all post-matriculation instruction shall be deemed to constitute higher education. The Department of Education, under the Minister, is therefore concerned with —

(a) The University of the Cape of Good Hope, Capetown, established 1873. It is empowered to grant degrees, but has no teaching institution. (b) The South African College, Capetown (1829). (c) Victoria College, Stellenbosch (1887). (d) Rhodes University College, Grahamstown (1904). (e) Huguenot College, Wellington (1907). (f) Grey University College, Bloemfontein (1920). (g) Transvaal University College, Pretoria (1920). (h) South African School of Mines and Technology, Johannesburg (1920). (i) Natal University College, Pietermaritzburg (1909). The Department is further charged with the Teachers First Class Certificate examinations.

In the Session of 1916 three Acts were passed providing for the conversion of the South African College into the University of Cape Town, of the Victoria College into the University of Stellenbosch, and of the University of the Cape of Good Hope into a federal University, with the remainder of the University Colleges as constituent colleges. The last-named University to be styled the University of South Africa.

Provision is made on the Vote of the Department of a grant-in-aid to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in February, 1916, and has at present 23 students.

The total number of students at these Colleges in 1915 was 1,134. The State expenditure on higher education during 1914-15 was £28,300.

## UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of Railways and Harbour Administration) for the four years ended March 31, 1918, are stated as under —

| Year | Revenue. | Expenditure. |
|---|---|---|
| | £ | £ |
| 1911–1912 ... ... | 17,028,418 | 16,547,382 |
| 1912–1913 ... ... | 17,290,900 | 17,064,367 |
| 1913–1914 ... ... | 18,879,076 | 18,490,822 |
| 1914–1915 ... ... | 14,265,077 | 16,253,140 |

### Debt

The Public Debt of the Union at March 31, 1913, was £138,220,778, composed as follows:—

| Rate | Funded Debt. | Floating Debt. |
|---|---|---|
| | £ | £ |
| 3% | 54,105,113 | ... |
| 3½% | 68,692,761 | 11,678,947 |
| 3¾% | 3,000,000 | ... |
| 4% | 31,020,639 | 4,160,000 |
| 4½% | 1,132,665 | 4,432,126 |
| 5% | 429,307 | ... |
| | £158,322,705 | £20,891,073 |

### PROVINCIAL FINANCE.

Prior to the passing of the Provincial Relations Act the four Provincial Administrations (Cape of Good Hope, Natal, Transvaal, and Orange Free State) received no revenues beyond the amount voted by Parliament by way of subsidies for the performance of the services and duties assigned to them. On the passing of the Act (April 1, 1913) certain revenues were transferred and assigned to the various provinces, and, in addition, subsidies were voted by Parliament equal to half the normal or recurrent expenditure. The Cape Province receives an additional amount equal to one-half the expenditure by local bodies, whilst the Natal and Orange Free State Provinces receive additional grants of £100,000 each.

The ordinary Revenue and Expenditure for the two years ended March 31, 1914, were as follows:—

| Financial Year. | Revenue (transferred or assigned | Subsidies. | Total Ordinary Revenue. | Total Ordinary Expenditure. |
|---|---|---|---|---|
| | £ | £ | £ | £ |
| 1913–14 | 1,189,589 | 2,153,000 | 3,462,589 | 3,324,136 |
| 1914–15 | 1,058,088 | 2,283,431 | 3,341,519 | 3,338,567 |

### PRODUCTION AND INDUSTRY

*Agriculture.*—The exports in 1914 of the principal articles of agricultural production were:—

| Article. | Quantity | Value. |
|---|---|---|
| Wool | 170,009,173 lb. | £8,380,091 |
| Mohair | 18,304,328 lb. | 897,659 |
| Hides | 25,304,911 lb. | 875,945 |
| Skins | 45,847,890 lb. | 1,099,629 |
| Ostrich Feathers | 968,993 lb. | 743,770 |
| Maslies | 1,403,826 muids | 631,846 |
| Fruit, fresh | 240,269 pkgs. | 63,967 |
| Wattle Bark | 89,881,464 lb. | 196,804 |

*Production of Crops, 1911.*

Provincial Statistics (in 1,000 muids (muid of wheat, maize, peas or beans = 200 lb., of oats and potatoes, 180 lb., of barley, 160 lb., of onions, 120 lb.).

| Crops. | Cape. | Natal. | Trans. | O.F.S. |
|---|---|---|---|---|
| Wheat | 1,325 | 7 | 235 | 322 |
| Oats | 1,229 | 44 | 263 | 432 |
| Barley | 371 | 3 | 12 | 34 |
| Maize | 1,708 | 2,846 | 3,322 | 1,708 |
| Kafir Corn | 290 | 324 | 463 | 191 |

| Tea 1,000 lb. | ... | 5,007 | ... | ... |
| Sugar ... tons | ... | 72,633 | ... | ... |

*Agricultural Statistics, 1911.*
Morgen (a 2·1654 acres).

| Provinces. | Cultivated. | Fallow | Grazing. |
|---|---|---|---|
| Cape | 974,266 | 376,873 | 56,098,867 |
| Natal | 481,807 | 106,470 | 4,893,498 |
| Transvaal | 964,803 | 223,094 | 24,927,851 |
| O.F.S. | 872,073 | 185,990 | 23,028,422 |

*Live Stock, 1911.*

| Stock. | Cape. | Natal. | Trans. | O.F.S. |
|---|---|---|---|---|
| Cattle | 2,715,330 | 456,087 | 1,339,278 | 1,186,894 |
| Horses | 313,962 | 72,857 | 83,220 | 220,705 |
| Sheep | 18,499,226 | 2,344,147 | 4,276,992 | 8,552,803 |
| Goats | 5,964,268 | 1,288,482 | 1,258,736 | 429,984 |
| Pigs | 295,732 | 110,332 | 302,882 | 262,896 |
| Mules | 47,099 | 15,602 | 23,273 | 3,695 |
| Asses | 132,286 | 28,028 | 206,098 | 17,498 |
| Ostriches | 728,087 | 5,111 | 5,441 | 9,097 |

*Manufactures.*—The conditions brought about by the war have given a decided impetus to local manufactures. During the last two years the production of leather, for which this country is most suitable, has been more than doubled. The value of the output is estimated at half a million pounds sterling. A commencement has also been made with the manufacture of tanning extract from wattle bark. Two companies have started operations in Natal, and will shortly be handling a maximum of 100 tons of green bark per diem. In dairy products increasing activity is everywhere being shown. The two cement works in the Union are rapidly overtaking the demands of the country, and a new factory, capable of producing half a million casks per annum, is being erected near Mafeking, on the site of a remarkably fine loose deposit of lime. The Union already produces its own requirements in the matter of beer and molasses. The output of sugar from Natal in 1913–14 amounted to 120,000 tons, which is a record, whilst that to the amount of £2,800,000 was produced in the same province. The manufacture of jobbed satisfactorily maintains its position as one of the most important industries in this country, whilst considerable advances have been made in the production of dried fruits, jam, &c., for which the Western Provinces of the Cape

is more particularly adapted. Amongst other commodities which the Union is producing are dynamite, soap, rope, wine, spirits, furniture, vehicles, brooms and brushes, biscuits, earthenware pipes, fire bricks, &c.

*Mines and Minerals.*—Gold mining still continues the chief source of the country's wealth. At the outbreak of war the diamond mines closed down. For the seven months ended July 31, 1914, gold represented upwards of 60 per cent. of the total exports of the Union, and diamonds about 4 per cent. The total value of the mineral output of the Union in 1916 was £40,792,739, the main items being —

| | £ | | £ |
|---|---|---|---|
| Gold | 39,490,990 | Lime | 110,360 |
| Diamonds | 1,726,302 | Silver | 106,145 |
| Coal | 2,739,669 | Salt | 82,289 |
| Copper | 1,159,360 | Asbestos | 35,859 |
| Tin | 330,572 | Soda | 20,949 |

The mineral production for the Union of South Africa for 1916 was as follows —

*Gold.*

1916 ... ... 9,256,563 fine oz. £39,490,990

The labour employed in the gold industry in January, 1916, was 22,921 whites and 221,861 coloured (21,839 whites and 181,988 coloured in January, 1915). Of these, 22,993 whites and 222,774 coloured were working in the Transvaal in January, 1916.

*Diamonds.*

| | |
|---|---|
| 1911 | £3,746,724 |
| 1912 | 12,081,489 |
| 1913 | 11,360,807 |
| 1914 | 5,487,194 |
| 1915 | 299,810 |
| 1916 | 1,726,302 |

During the war period mines have been partially shut down. The U.S.A. purchases about 80 per cent. of the diamonds produced.

*Coal.*

(Tons of 2,000 lb.)

1915.

| | | |
|---|---|---|
| Transvaal | 5,202,809 tons | £2,145,060 |
| Cape | 46,830 ,, | 26,992 |
| O.F.S. | 727,253 ,, | 188,364 |
| Natal | 2,302,128 ,, | 380,464 |
| Totals | 8,281,324 ,, | £2,740,479 |

24 tons of coke, valued at £21, were produced in the Transvaal, and 7,296 tons, valued at £22,849, in Natal for 1915. 26,630 gallons of tar were also produced by Transvaal coal companies, valued at £882. The labour employed in coal mining in January, 1916, was Transvaal, 5,764 whites, 11,462 coloured. Cape, 60 whites, 280 coloured, O.F.S., 149 whites, 2,272 coloured, Natal, 486 whites, 10,389 coloured, a total of 7,463 whites and 24,899 coloured (7,226 whites and 23,881 coloured, January, 1915).

*Silver.*

There are no silver mines in the Union. The output of 988,277 fine ozs., valued at £106,245, represents silver contained in gold bullion and base metal ores.

*Copper.*

(Tons of 2,000 lb.)

44,297 tons of concentrates, valued at £1,159,360, were shipped from the Transvaal, and 23,229 tons of matte and ore, valued at £429,208, from the Cape. The figures for 1914 are 24,027 tons (£1,200,350) and 14,369 tons (£372,208) respectively.

*Tin.*

(Tons of 2,000 lb.)

3,250 tons of tin ore, valued at £327,288, were shipped from the Transvaal, and 40 tons, valued at £4,284, from the Cape. The figures for 1914 are 3,368 tons, valued at £307,284, including 43 tons for the Cape Province, valued at £4,109.

*Salt.*

(Tons of 2,000 lb.)

1915.

| | | |
|---|---|---|
| Transvaal | 4,369 tons | £6,190 |
| Cape | 16,931 ,, | 36,369 |
| O.F.S. | 21,704 ,, | 38,630 |
| Totals | 43,204 ,, | £81,089 |

*Other Minerals.*

The value of the Union's production for 1915 of other base minerals, such as asbestos, lime, graphite, magnesite, lead, flint, &c., was £277,224, and of miscellaneous products, such as bricks, cement, coke, tar, &c., £388,631, compared with £170,988 and £671,281 respectively for 1914.

## EXTERNAL TRADE.

The total value of the Imports and Exports in the five years 1911–1915 (exclusive of specie) was as follows —

| Year | Imports. | Exports. | Total Trade. |
|---|---|---|---|
| | £ | £ | £ |
| 1911 | 36,302,364 | 37,004,020 | 73,306,384 |
| 1912 | 38,836,060 | 62,274,219 | 101,110,279 |
| 1913 | 41,822,841 | 66,969,364 | 108,792,205 |
| 1914 | 36,364,472 | 39,993,622 | 76,358,094 |
| 1915 | 31,820,737 | 56,654,992 | 88,475,728 |

The principal articles imported and exported in 1914 and 1915 were —

IMPORTS.

| | 1914. | 1915. |
|---|---|---|
| | £ | £ |

* Enrichment of the exports of gold will not be available until the conclusion of hostilities.

CITIES AND TOWNS.

SEAT OF GOVERNMENT, PRETORIA.
SEAT OF THE LEGISLATURE, CAPE TOWN.

The following cities had a white population exceeding 10,000 at the Census of 1921 —

| City | Pop. 1904. | Pop. 1921. |
|---|---|---|
| Johannesburg (*T*) | 94,362 | 158,253 |
| Durban (*N*) | 31,300 | 31,787 |
| Cape Town (*C*) | 44,203 | 99,179 |
| Pretoria (*T*) | 22,224 | 29,611 |
| Port Elizabeth (*C*) | 21,567 | 28,190 |
| Woodstock (*C*) | 21,330 | 27,087 |
| Germiston (*T*) | 9,223 | 15,879 |
| Maritzburg (*N*) | 13,808 | 14,727 |
| Bloemfontein (*O F S*) | 13,502 | 14,760 |
| Kimberley (*C*) | 13,256 | 13,398 |
| Krugersdorp (*T*) | 6,946 | 13,730 |
| East London (*C*) | 14,886 | 12,679 |
| Boksburg (*T*) | 4,778 | 11,963 |

COMMUNICATIONS.

*Railways.*—The total open mileage at the end of 1925 was 8,924 *miles* (comprising Cape 3,262, Orange Free State 1,262, Transvaal 2,492, and Natal 1,202), of which 8,504 miles are 3 ft. 6 in. gauge and 320 miles 2 ft. gauge. The capital expenditure on Government railways up to 31 December, 1925, amounted to £71,940,398, plus £13,240,641 in respect of rolling stock, or a total of £86,990,040, while £1,082,886 was spent in new construction. The gross earnings for 1925 were £22,197,870, and the net profit, after payment of interest, £1,320,386. Working expenditure (excluding renewals) amounted to £7,489,306, or 61·3 per cent, of the gross revenue, as compared with £7,445,358, or 64 3 per cent., of the gross revenue for the previous year.

*Posts and Telegraphs.*—At the end of 1925 there were in the Union 2,456 post and telegraph offices open. 113,231,600 inland letters and cards, 66,692,997 newspapers, books, and circulars, and 3,169,588 telegrams were received and despatched in 1925. The number of money orders issued during the year was 394,683, and the value £9,420,267, while 230,608 orders of the value of £1,994,884 were paid. 3,467,200 postal orders amounting to £1,249,800 were issued, and 2,870,276, valued at £1,072,362, paid. The revenue of the post and telegraph department was £1,499,068, and the expenditure £1,623,498; the revenue of the telegraph and telephone services being £991,129, and the expenditure £687,220. 26,983 miles of telegraph line, carrying 91,295 miles of wire, were open. 1,682 wireless messages were dealt with. The number of depositors in the Government Savings Bank at the end of 1925 was 294,362, the amount to their credit being £6,298,879.

*Shipping.*—In 1925 the shipping entered and cleared at the ports of the Union of South Africa was :—

Entered—2,322 vessels of 7,937,322 tons net.
Cleared—2,132 " " 7,768,872 "

RAILWAYS AND HARBOURS BOARD.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways

and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board. The constitution of the Board at date is as follows:—

*Chairman*, Hon. Henry Burton, K.C., Minister of Railways and Harbours.

*Members*, Lt.-Col. Sir Thomas Hyslop,

*Secretary*, G. W. Pilkington.

*Chief Officers*

*General Manager, Johannesburg*, Sir W. W. Hoy, Kt.

*Assistant do., Johannesburg*, G. C. S. Clark, C.M.G.

*Assistant do., Bloemfontein*, W. H. Parrett.

*Assistant do., Cape Town*, B. Salmon.

*Engineer-in-Chief, Johannesburg*, A. M. Tippett, M.I.C.E.

*Chief Mech. Engineer, Pretoria*, D. A. Hendrie.

*Chief Accountant, Johannesburg*, G. A. Reid.

*Acting Chief Railway Storekeeper, Germiston*, R. B. Goldfinch.

*Catering Manager, Johannesburg*, A. H. Simmons.

**South West Africa.**

SOUTH-WEST AFRICA has approximately between 17° 18'–29° 10' S. lat. and 11° 42'–21° E. long., having an estimated area of 322,450 square miles, and a population of about 120,000. The inhabitants are principally Aninists. The northern district is known as *Ovamboland*, the central part as *Damaraland* (or *Hereroland*), and the southern portion as *Great Namaqualand*. The white population in 1913 was 14,830. Agriculture and stock raising are the principal industries. The exports (valued at £4,485,840 in 1913) include live stock, guano, horns, hides, wool, meat, ostrich feathers, copper, ore, lead, marble, and diamonds; the imports (£3,232,330 in 1913) include foodstuffs, textiles, metal, and hardware. The railways, prior to occupation by the Union Forces, were divided as follows:—(1) The Otavi line, extending from Swakopmund to Tsumeb, with branches from Usakos to Karibib and Otavi to Grootfontein (422 miles). (2) The State (Northern) railways, extending from Swakopmund and Jakalswater to Karibib and Windhuk (240 miles). (3) The North and South Railway, extending from Windhuk to Keetmanshoop (327 miles). (4) The Southern Railway, extending from Lüderitzbuch to Keetmanshoop, with a branch from Seeheim to Kalkfontein (300¾ miles). These railways, together with the line from Prieska to Kalkfontein (324½ miles), connecting the S.W. African railways with the Union system, are now controlled and worked by the South African Railways Administration. The line from Prieska to Kalkfontein was constructed in connexion with the recent military operations.

## Provinces of the Union of South Africa

### CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 50', and in E. long. from 16° 49' to 30°. Its extreme length from E. to W. is nearly 750 miles, and its breadth 290 miles, with a coast-line of nearly 1,200 miles.

*Area and Population.*

| | Sq. miles. | Pop., 1911. |
|---|---|---|
| The Colony | 206,879 | 1,582,630 |
| East Griqualand | 7,994 | 249,088 |
| Tembuland | 4,289 | 256,088 |
| Transkei | 2,384 | 182,894 |
| Walfisch Bay, &c. | 430 | 2,076 |
| Pondoland | 2,926 | 236,629 |
| Bechuanaland | 51,524 | 99,853 |
| Cape Province | 276,926 | 2,564,258 |

Of the coloured population (1,582,988 in 1911), 29,763 were Malays, and 419,284 a mixture of various races, the rest are Hottentots, Fingoes, Kaffirs, and Bechuanas. Of the white population (580,377 in 1911), 302,268 were males and 280,109 females. Of the coloured, 934,403 were males and 1,028,585 females. Of the European population in 1911, 64,245 were professional, 242,935 domestic, 37,756 commercial, 67,735 agricultural, 30,031 industrial, 230,730 were dependants, and 3,869 indefinite and unspecified. Of the coloured population, the great majority are engaged in agricultural or domestic employments.

| Year. | Births. | Deaths. | Marriages. |
|---|---|---|---|
| 1910 | 62,898 | 35,086 | 12,350 |
| 1911 | 58,767 | 39,330 | 12,133 |
| 1912 | 60,071 | 39,886 | 11,609 |
| 1913 | 59,364 | 37,962 | 11,069 |
| 1914 | 57,898 | 40,509 | 11,344 |

*Religion.*—In 1911 there were 2,437,688 Christians—278,629 Dutch Churches, 288,629 Anglican Communion (including Church of England, Church of Province of South Africa, Church of Ireland, Episcopal Church of Scotland and Episcopalian), 94,029 Presbyterians, 147,378 Independents or Congregationalists, 289,289 Wesleyans, 29,162 other Methodists, 21,906 Lutherans, 21,267 Moravians, 88,983 Rhenish Mission, 12,294 other Lutherans, 13,702 Baptists, 35,934 Roman Catholics, 21,209 other Christians, Muhammadans 24,289, Jews 26,944, "of no religion" 1,077,998, of whom 1,047,233 were natives.

*Education.*—The Province is divided into 122 school districts, each under the control of a School Board, two-thirds of the members being locally elected, and one-third nominated partly by Government and partly by Municipal or Divisional Councils. Education is compulsory for children of European extraction. The necessary grants are provided from the general revenue to supplement local contributions, which, in the case of Public Schools controlled by School Boards, amount to about one-third of the total expenditure, and are derived from school fees and a local education rate of ½d. in the £ on the capital value of property.

Aided Schools, June 30, 1915, 1,892; enrolment 298,430, attendance 249,997. There are 113,629 European pupils and 140,808 non European pupils. There are 10,215 teachers. Government expenditure on education, exclusive of Higher Education (for which see Union of S.A.), for 1912–13, £784,714; 1913–14, £823,448; 1914–15, £929,485; 1915–16, £927,856; 1916–17, £976,894.

*Charitable Institutions, Hospitals, Penitentiaries.*—In the hospitals 16,497 in- and 89,128 out-patients were treated in 1916. There is no recognised system of poor law relief, but 1,957 persons received indoor relief during the year.

*Harbours and Works.*—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are

electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

CAPITAL, CAPE TOWN Total population (1911), white and coloured, 69,170 (with suburbs, 149,461).

*Administration.*—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 31 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

*Local Government.*—There are 126 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 79 Village Management Boards.

*Administrator*, Hon. Sir H Frederic de Waal, K.C.M.G. ..... £5,200

*Executive Committee*, C. R. Arnold, Daniel Retief, Hon. W. Ross, C. J Langenhoven

*Prov. Sec.*, L. W Mansergh, I.S.O. £1,100

Capetown is 5,979 miles from Southampton, transit, 16 days.

## NATAL.

The Province of Natal comprises an area of 20,250 square miles, (including Zululand, 10,424 square miles), with a seaboard of 360 miles.

| Population. | Census, 1904. | Census, 1911. |
|---|---|---|
| Europeans .. .... | 97,109 | 98,124 |
| Indians and Asiatics .. | 100,918 | 133,430 |
| Natives .. .. .. .. | 910,727 | 962,490 |
| Total .. | 1,108,754 | 1,194,043 |

The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour The measures taken to control the movements and settlement of the Asiatic population led to serious disturbances in November, 1913.

In 1912 the European births registered numbered 2,775, the deaths 1,129, and the marriages 900. In 1911 there were 564,648 males and 629,395 females.

*Education.*—A University College has been founded at Pietermaritzburg, and there are 3 Government high schools, 2 preparatory schools, 73 primary schools, 2 art schools, 1 agricultural and trades school, 3 Indian schools, and 4 Government schools for coloured children, 108 Government-aided schools, and 267 Government-aided farmhouse schools for European children. There are also 2 Technical Institutes, 39 Indian schools, 329 native schools, and 18 coloured schools, which receive Government aid, and a large number of private schools.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (white and coloured), 29,347.

In Durban (population, May 7, 1911, 69,187), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time, the average low-water depth at the entrance, the bar being no longer existent, for 1908 being 22 ft. 7 in.

*Administration.*—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

*Administrator*, Hon. C. J Smythe,

*Executive Committee*, F. O. Hollander, J Dyson, J. McAnstin, J F Wilyts.

*Provincial Secretary*, G T. Plowman, C.M.G.

Natal, 6,800 miles, transit, 20 days.

## ZULULAND.

*Zululand*, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River, on the south-east by the Indian Ocean, on the north by the Portuguese possessions, and on the west by the new territory (formerly Utrecht and Vryheid districts of the Transvaal) and Swaziland. The *Amapondaland Protectorate*, created by proclamation of Nov 20, 1897, was annexed to Zululand on Dec 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vryheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

## THE TRANSVAAL.

The Province of the Transvaal has a total area of 110,426 square miles, about 20,000 square miles lying within the tropics. The Census of 1911 showed a population of 1,686,252, of whom 971,295 were males and 714,957 females the population comprised 420,562 Europeans or whites, 1,102,849 natives, and 52,801 other coloured races. In 1912 there were 19,891 births (16,000 Europeans), 14,099 deaths (5,313 Europeans), and 6,844 marriages (4,447 Europeans).

*Religion.*—The religious statistics for 1911 are:—

| Churches. | Whites. | Others. |
|---|---|---|
| Dutch Churches .. ..... | 224,058 | 22,634 |
| Anglican .. .. .. | 89,805 | 51,388 |
| Presbyterian .. .. .. .. | 24,739 | 6,870 |
| Methodists .. .. .... | 27,930 | 32,569 |
| Roman Catholics .. .. | 22,322 | 6,439 |
| Lutherans .. .. .. .. | 6,618 | 101,871 |
| Other Christians .. .. | 13,801 | 24,263 |
| Jews .. .. .. .. .. | 25,850 | .. |
| Hindus, &c. .. .. .. .. | 89 | 13,671 |
| No Religion .. .. .. | 2,450 | 343,618 |

*Education.*—There were 892 schools (15 for coloured children) in 1912, with a total enrolment of 86,877 and an average attendance of 72,946, and 3 normal colleges. There were also 298 native schools, with 19,883 pupils.

The Capital is PRETORIA, pop. 1911, 48,822 (white 29,660, coloured 18,949), the principal town being JOHANNESBURG (the centre of the Witwatersrand goldfields), population in 1911, 237,220 (white 120,421, coloured 116,809).

*Administration.*—The government is administered by an Administrator, aided by a Provincial Council of 36 members (elected for 3 years). There is an Executive Committee of 4 members.

*Administrator*, Hon. A. G Robertson.

*Executive Committee*, B. D. G Pienaar, C. T. E. van Veysten, G Hartog, D. Dingwall.

*Provincial Secretary*, A. B. Roberts.

Pretoria is distant from London 7,200 miles, transit, *viâ* Capetown, 19 days.

## ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 50,389 square miles, and is divided into 24 districts. The population at the last three censuses was:—

| Year | White. | Coloured. | Total. |
|---|---|---|---|
| 1890 .. .. | 77,776 | 125,767 | 207,543 |
| 1904 .. .. | 140,679 | 224,636 | 365,315 |
| 1911 .. .. | 175,189 | 352,685 | 528,874 |

In 1911, of the whites, 94,488 were males and 80,701 females, and of the coloured races, 168,430 were males and 184,255 females.

*Religion.*—In 1911 the adherents of the Dutch Reformed Church numbered 175,311; Wesleyans, 88,839; Anglicans, 91,491; Presbyterians, 7,549; Congregationalists, 5,268; Lutherans, 8,197; Roman Catholics, 3,898; Jews, 2,828; and "No Religion," 273,198 (272,190 natives).

*Education.*—Higher education is under the control of the Union Ministry. In 1918 there were 805 public and aided private schools, with an enrolment of over 35,600 pupils, and, except where the parents object, both official languages are taught.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 26,929 (14,760 whites, 12,169 coloured) in 1911. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

*Administration.*—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

*Administrator*, Hon. C. H. Wessels.

*Executive Committee*, D. J. de Villiers, General F J W J Hattingh, A. A. Cilliers, D. J. Malan.

*Provincial Secretary*, A. M. N de Villiers.

Bloemfontein is distant from London 6,700 miles; transit, 9d Capetown, 19 days.

Some of the principal urban centres in the Union with over 10,000 inhabitants in 1911, had a white population as follows —

| | CENSUS, 1911. | | |
|---|---|---|---|
| Johannesberg | 129,993 | Maritzburg | 14,737 |
| Durban | 31,783 | Bloemfontein | 14,760 |
| Cape Town | 29,865 | Kimberley | 13,898 |
| Pretoria | 24,628 | Krugersdorp | 13,130 |
| Port Elizabeth | 18,190 | East London | 12,679 |
| Woodstock | 17,257 | Boksburg | 11,929 |
| Germiston | 15,172 | | |

## DEPENDENCIES OF NEW ZEALAND.

*Antipodes Group* (49° 41′ 15″ S. lat., and 178° 43′ E. long.) are uninhabited.

*Auckland Islands* lie about 290 miles south of Bluff Harbour, in 50° 30 S. lat., and 166° 15′ E. long. The islands contain several good harbours, but are uninhabited.

*Bounty Islands* (47° 42′ S lat., 179° 0′ 30″ E. long.) are uninhabited.

*Campbell Island* is uninhabited.

*Chatham Islands*, between 43° 30′ S. lat. and 175° 40′-177° 15′ W. long., have a population of 267 Europeans and 229 Maoris and half-castes. They support large flocks of sheep and some cattle.

*Cook Islands Administration.*—The Cook and other islands, annexed to the British Empire in October, 1900, and included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, The Herveys (Mauke and Atiu), and Takaroa. Outside the Cook group are Savage (or Niue), Palmerston, Penrhyn (or Tongareva), Humphrey (or Manahiki), Reirson (or Rakaanga), Danger (or Pukapuka), and Sawarrow Island, which are situated in the South Pacific, between 8° to 19° S. lat. and 158° to 176° W long. The population at the Census of 1906 numbered 12,799, all except 265 being natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The exports (1918) were valued at £67,235, and the imports at £67,290. Rarotonga is the chief island, with a native population of 2,839, and a European population of 212. The government is administered locally under the direction of New Zealand. The Federal Council of the Cook Islands, under the direction of the Resident Commissioner at Rarotonga, legislates for all the islands except Niue, which has a Resident Commissioner and an Island Council of its own. The six Arikis of Rarotonga are of equal rank and are all members of the Federal Council. Rarotonga is a place of call for the mail steamers between Sydney, N S.W., and Wellington, N. Z., and San Francisco, U.S.A.

*Resident Commissioner, Rarotonga*, F W Platts ..... £500

*Resident Comm., Niue*, H. G Cornwall..... 365

*The Kermadec Group*, between 29° 20′ to 30° 30′ S. lat., and 177° 45′ to 179° W long., includes Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. The group is uninhabited.

*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 9′ S. lat. and 172° 8′ 8″ E. long., are uninhabited.

## BRITISH LOANS (TO OCT., 1918).

# Imperial British Dominions.

NOTE.—See also *The Indian Empire, Canada, Newfoundland, Australia, New Zealand,* and the *Union of South Africa.* The following list includes the British Dominions and Protectorates which have not yet received "Responsible Government."

## ASCENSION,

an isolated island in the South Atlantic (3,427 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,800 feet, situated 7° 56′ 22″ S. lat., and 14° 25′ 5″ W long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonso d'Albuquerque, who gave the island its present name. Its extreme length is 7¼ miles, and extreme breadth 6 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it. The island is under the Board of Admiralty, by whom an officer is appointed as commandant. The inhabitants consist of officers and their families, seamen, marines, and Kroomen, a limited number of men also have their families with them, the full complement of the island being about 200 (exclusive of 40 members and servants of the Eastern Telegraph Co.), with about 35 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is fortified, and is connected by the Eastern Telegraph Co. with St. Vincent, St. Helena, Sierra Leone, and Buenos Aires. It now possesses a steam factory, while there is also an excellent hospital and sanatorium. Partridges are being preserved for sporting purposes, and steps are being taken to exterminate the rabbits, which were formerly preserved and now prove a pest. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand, 120 being "turned" during 1914, their weight being from 200 to 800 lb. The sooty tern, or "wide-awake," use the island as a nesting place about every eighth month, their eggs being much appreciated by the inhabitants. In 1915 there were about 12 acres of ground under cultivation, producing vegetables and a small quantity of fruit, and there is also a small amount of pasturage for sheep and cattle.

*Commandant,* Major H. C. Bassett, R.M., L.L.

## BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 44′—27° 26′ N. lat. and 72° 40′—79° 6′ W. long., and extending from the coast of Florida on the north west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1901 of 53,484, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Exuma Islands, Ragged Islands, Turks Islands, Inagua, Andros Islands, Watling Island, Rum Cay, Long Cay, Ragged Island, and Biminis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1912 being valued at £136,632. The fruit trade is principally with the United States, bananas, cocoa-nuts, fruit and vegetables being exported. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being about 20,000 acres, and the value of Bahamas hemp fibre exported in 1912, £124,262. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members, and an elective Representative Assembly of 29 members.

## BARBADOS,

the most windward of the West India Islands, is situated in 13° 4′ N., and longitude 59° 37′ W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 166,222 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of April 2, 1911) was 171,893 (1,035 per square mile). The principal exports are sugar, molasses, rum, and cotton, and the imports flour, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring Islands, Barbados has always remained in the possession of Great Britain, the

which it was settled in 1629. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop. 1911, 20,648), on the shores of an open roadstead (Carlisle Bay).

## BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 13′ N. lat. and 64° 52′ W. long., comprising an area of about 19 square miles, and containing (Census 1901) a population of 18,994, of whom 6,692 are whites, exclusive of army and navy. The estimated population on Jan. 1, 1908, was 20,213 (9,280 whites, and 12,913 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1522, but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly fortified dockyard.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 4 members, appointed by the Crown. There is also a Legislative Council, comprised of 9 members appointed by the Crown, and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,302 electors, whose individual qualifications are the possession of freehold property of £10 less value than £60.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

## BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S., and from long. 108° 30′ to 119° 20′ E. It is about 800 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papuas or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celebes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is now included within the Dutch possessions in the East Indies. The remainder of the island is under British protection.

### BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of over 900 miles. The population is 208,183, consisting mainly of Mohammedan settlers on the

coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 7 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, remodelled and adapted by local ordinances. There is an Imam's Court for Muhammadan law

| | 1914. | 1915. | 1916. |
|---|---|---|---|
| *Revenue | $2,782,377 | $2,992,067 | $3,730,203 |
| Expenditure | 2,222,132 | 2,235,974 | 2,685,332 |
| Exports | 6,260,482 | 7,413,094 | 8,691,644 |
| Imports | 4,782,283 | 4,479,847 | 4,992,722 |

The imports from the U.K. in 1915 amounted to £28,753, and the exports to the U.K. to £364,479.

The chief products are timber, tobacco, rubber, sago, rice, gums, *gutta-percha*, *coco-nuts*, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Gold has been found.

| | 1915. | 1916. |
|---|---|---|
| Exports of Leaf Tobacco | $2,342,736 | $1,579,155 |
| " Rubber | 2,348,734 | 4,377,198 |
| " Timber | 832,465 | 774,944 |

*Coal.*—Coal of good quality is now being produced at the rate of 7,000 tons per month at Sebattik, in the south-eastern corner of the territory. Large sums have been expended in equipping the colliery with modern machinery, and it is anticipated that the industry will become a most important factor in the progress of North Borneo.

*Railway.*—A railway has been constructed from Jesselton, the chief port on the west coast, to Melalap in the interior, a distance of about 100 miles. From Jesselton it runs down the coast to Beaufort, the centre of the rubber industry, whence it turns inland. There is a branch from Beaufort to Weston on the coast, a distance of 20 miles additional.

There are four wireless stations in the country. These are situated at Sandakan, Jesselton, Kudat, and Tawau.

There is a native military force of 800 men under European officers, with one machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton. There are numerous Chinese settlements.

## BRUNEI.

*Sultan*, H.H. Mohamed Jamal-ul-alam, G.M.G., *succ.* May 11, 1906.

A native State on the north west coast of the island of Borneo. The total area is about 4,000 square miles, the estimated population being 30,000 (1911). The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 10,000, and is built entirely on the water, communication being possible only by boat.

*High Commissioner*, The Governor of the Straits Settlements.
*British Resident, Brunei*, G. E. Cator.

Brunei is 9 hours by steamer from Labuan, and communication is now regularly maintained.

## BRITISH GUIANA,

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 90,277 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1916, was estimated at 312,890, of whom 127,830 were East Indian immigrants. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate is hot, but not unhealthy. The cultivated portion of the country, amounting to about 171,547 acres (of which acres 74,134 are in sugar-cane), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like Holland, being below the level of the sea, and intersected with canals constructed by the former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 9,500 feet above sea level, and on the Potaro River is the Kaieteur Falls, with a clear drop of

7oft feet and a total fall of 8oo feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The temperature ranges between 55° and 90° F. The birth-rate in 1906 was 26·7, and the death-rate 27·1 per 1,000. The chief product is sugar, which forms 66 per cent. of the export trade. The leading exports for the year 1906 were as follow:—Sugar, value £1,096,022, rum, £626,490, gold, 36,449 oz., valued at £135,254, diamonds, 18,280 carats, valued at £4,802, timber, £13,656, balata, £262,896, and rice, £133,852. There are about 12,000 aboriginal Indians, they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected, and a Combined Court including the members of the Court of Policy together with six elected Financial Representatives with an Executive Council, consisting of the Governor, 3 official and 3 unofficial members nominated by the Crown. There are 1,780 miles of post-office telephone wire and 396 of telegraph lines, with 72 post-offices. There are 95 miles of railway.

Georgetown, 3,264 miles; transit, 14½ days by Royal Mail steamer on alternate Thursdays from Southampton.

## BRITISH HONDURAS.

British Honduras, in Central America, lies between 15° 53′ 5″ to 18° 29′ 30″ N. latitude and 87° 9′ 20″ to 89° 10′ W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively. It abuts on the Atlantic, and is bounded on the north by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is 8,598 square miles, with a population (Census 1901) of 40,426—20,574 males and 20,084 females. The climate is generally is damp and hot, but not unhealthy. The temperatures ranges from 55° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland, after which hills from 300 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood, export of mahogany, 1906, 6,586,496 ft. Sugar is grown, and rubber and cacao plantations have been started. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes, grow well, while inland there are extensive regions of good pasturage, and there are indications that gold and other minerals exist. About 60,000 acres are under cultivation. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at 5s. per acre, plus cost of survey, which averages about 5s. 7d. per acre, or leased at an annual rental of 25c. to 50c. per acre. There are 36 primary schools in the colony, and 5 schools with secondary departments in Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 3 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

## BRITISH EAST AND CENTRAL AFRICA.

The history of the European occupation of East Africa may be briefly stated thus:—The Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognised their Protectorate over Usagara, and in the same year they

| Dominions and Capitals. | Area (Sq. Miles). | Estimated Population. |
|---|---|---|
| Somaliland (Berbera) .. | 68,000 | 300,000 |
| East Africa Protectorate (Nairobi) .. | 400,000 | 4,000,000 |
| Uganda (Kampala) .. .. | | 2,500,000 |
| Zanzibar (Zanzibar) .. .. | 1,000 | 200,000 |
| Nyasaland (Zomba) .. | 40,000 | 1,000,000 |
| Total | 509,000 | 8,000,000 |

declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*; from Cape Delgado to the river Umba is *German East Africa*: the islands of Zanzibar and Pemba, part of the Somali Coast, and the territory from the Umba to the river Juba, form *British* Protectorates, the boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast.

The Imperial Government, through the Colonial Office, took over the administration of the E. Africa, Uganda, and Somaliland Protectorates on April 1, 1905. British Central Africa, now styled Nyasaland, was similarly transferred on April 1, 1904.

## BRITISH WEST AFRICA.

| Dominions and Capitals. | Area (Sq. Miles). | Estimated Population. |
|---|---|---|
| Gambia (Bathurst) .. | 4,000 | 146,000 |
| Gold Coast (Accra) | | 860,000 |
| Ashanti .. | 120,000 | 200,000 |
| Northern Territories. | | 360,000 |
| Sierra Leone (Freetown) | 4,000 | 80,000 |
| Protectorate .. .. .. | 30,000 | 1 000,000 |
| Southern Nigeria (Lagos) | 77,880 | 8,000,000 |
| Northern Nigeria (Zungeru) | 256,000 | 9,000,000 |
| Total | 491,880 | 19,736,000 |

The West Coast of Africa has been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they supplied slaves to their plantations in the West Indies and on the mainland of America. The British territories therein consist of the Colonies and Protectorates of the Gambia, Sierra Leone, the Gold Coast (including Ashanti and the Northern territories), and Southern Nigeria, which are all situated upon the coast of North-Western Africa, between the mouth of the river Senegal and the Cameroons, and of the Protectorate of Northern Nigeria. These territories were not originally colonies in the strict sense of the word, but merely trading settlements, in which the products of the neighbouring countries were collected and exchanged for European goods with as little outlay as possible; but of late years a great part of the revenue has been expended on the development of the territories, the advancement of the education of the natives, and on the encouragement of the cultivation

of natural produce. The climate is such that Europeans cannot live there permanently, and even the native inhabitants suffer from malarial fever, but a very great improvement in this respect has been effected of recent years as the result of the closer study of tropical ailments and greater regard to personal and public hygiene. British authority has been extended by the gradual addition of Protectorates as dependencies to the Colonies above mentioned, and through the action of the Royal Niger Company, which entrusted all the functions of government until the territories under its control were incorporated with Southern and Northern Nigeria in 1900. Germany, at the outbreak of the war, possessed the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions.

## BRITISH WEST INDIES.

THE WEST INDIES, so named in 1492 by Columbus, who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30′ to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divisible into three main groups.—I GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq miles) and *Hispaniola* (28,000 sq. miles), being Independent, Jamaica and its dependencies, British, and Puerto Rico, a dependency of the United States. II BAHAMAS, which are entirely British. III LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, Denmark, Venezuela, and the United States. The total area of the Archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 *British*, 3,750 *United States*, 1,350 *French*, 430 *Netherlands*, 140 *Danish*, and 90 *Venezuelan*. The

| Islands and Capitals. | Area (Sq. Miles). | Estimated Population. |

| Cottons | 360,772 | Linen | 120,803 |
| Machinery | 208,396 | Woollens | 78,044 |

Total Exports to the United Kingdom, 1913 (*Board of Trade*). Total, £2,027,771.

| | | | |
|---|---|---|---|
| Bananas | £80,804 | Dye Stuffs | £322,294 |
| Cocoa, Raw | 288,400 | Oranges | 31,280 |
| Coffee | 34,232 | Rum | 120,908 |
| Cotton, Raw | 103,400 | Sugar | 1,268,892 |

## CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, are situated between the meridians 79° 44 and 81° 26' W., parallels of 19° 15' and 19° 48' N., and consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 269 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas."

The islands were originally a rendezvous for pirates, as is evidenced by the finding every now and again of "treasure" buried in the earth close to the sea coast.

There is very little sickness attributable to the climate and no malarial fever or other tropical or sub-tropical disease. The birth rate in 1913-16 was 34, the death rate 10 per 1,000. The population in June, 1911 was 5,964 (2,392 whites, 2,211 coloured, and 1,231 black). The inhabitants lead a seafaring life, the principal industries are coco-nut planting, turtle fishing, and cattle raising. A turtle canning factory has recently been established in Georgetown.

*The government* is administered by a Commissioner, assisted by the "Justices and Vestry," in the same manner as the government of the Turks Islands. The principal town is George town, in Grand Cayman, population (1911) 1,449.

*Commissioner & Judge of the Grand Court*, A. C. Robinson, B.A. (and *fees* and allowances) £300

| Reserve Fund | 5,008 | 4,878 | 4,211 |

## CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 53½'—9° 52' N. lat. and 79° 48'—82° 52' E. long. Its area is (with outlying islands) 25,481 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles, and its greatest width 140 miles.

The climate varies with the altitude of the district, but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January, the hottest are April and May.

The population (Census of 1911) was 4,110,367, the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast, but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but five years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished, and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and dry grain. The principal exports are tea, coffee, and products of the coco-nut palm, cinchona, rubber, cocoa, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fourth of the island is under cultivation, and the leading areas in 1916, in acres, were:—Rice, 691,075; other grain, 139,849; tea, 398,064; coffee, 890; coco-nuts, 988,830; rubber, 222,892; cinnamon, 41,733; cocoa, 45,765; and tobacco, 13,254. The live stock in 1916 included 1,328,009 horned cattle, 84,269 sheep, 285,749 goats, 62,211 pigs, and 4,261 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially rubies, rubies, &c. and the pearl fishery in the Gulf of Mannar, off the N.W. of the island, yielded a revenue of Rs.2,405,645 in 1914. The manufacture of salt is a Government monopoly.

There are 906 miles of railway open, 605 being 5 ft. 6 in gauge and 201 miles 2 ft. 6 in., and in 1916 the post and telegraph offices numbered 926, there being 6,823 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 7 members, and a Legislative Council of 27 members, including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island. Four of the ten unofficial members are elected, the rest nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities or local boards, and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

*Area and Population.*—Egypt is a British Protectorate, by proclamation of December 18, 1914, and lies in the north-eastern corner of the African continent, between 22° 0′–32° 52′ N. lat. and 25° 0′–37° E. long. The total area is 363,210 square miles, with a population at the census of 1917 of 12,976,000, of whom 12,566,046 are Egyptians, 638,000 Bedouins, 69,169 Nubians, and 222,139 foreigners (69,324 Turks, 61,273 Greeks, 34,096 Italians, 10,653 British, 14,492 French and Tunisians, 7,504 Austro-Hungarians, 2,470 Russians, 1,849 Germans, 2,126 other Europeans, and 1,385 Persians). At the same date, Muhammadans numbered 12,466,286, Christians 680,850, Jews 36,639, and other religions 208.

*Government.*—By *firman* of 13 Feb., 1841, the office of *Vali*, or governor, was made hereditary in the person of Muhammed Ali (1805–1848) under the title of Khedive, subsequent rulers being Ibrahim (1848), Abbas I. (1848–1854), Said (1854–1863), Ismail (1863–1879), Tewfik (1879–1892), Abbas II. (1892–1914), Hussein Kamil, the first Sultan of Egypt (1914–1917), and the present ruler, Sultan Fuad I. There is a Council of Ministers appointed by the Sultan, with a President who acts as Prime Minister. The various Ministers prepare drafts of administrative decrees, which are submitted to the Council. When approved and signed by the Sultan these decrees become law. The British Financial Adviser attends the meetings of the Council, but has no vote. There is a Legislative Council consisting of (a) the Ministers, (b) 20 elected members, and (c) 23 nominated members. This body is mainly consultative, the legislative power resting with the Sultan and his Ministers.

*Local Government.*—For the purposes of Local Government, the chief towns (Alexandria, Cairo, Ismailia and Port Said, and Suez) constitute governorates (*muhâfzas*), and the remainder of the occupied country is divided into provinces (*mudîrias*), subdivided into districts (*markaz*). There are provincial councils, with restricted powers of local government.

*Justice.*—Justice is administered under four distinct systems, all except the Consular Courts being supervised by the Ministry of Justice, to which a British Judicial Adviser is attached. The systems are (1) *Makhemehs*, or Courts of the Cadis, administering Muhammadan Law following the Hanafite Rite, (2) *Native Tribunals*, containing native and foreign judges, and dealing with criminal charges against natives and with civil charges in which both plaintiff and defendant are local subjects, (3) *Mixed Tribunals*, founded in 1876, and dealing principally with civil actions between foreigners of different nationalities and between foreigners and natives, and (4) *Consular Courts* (of the 23 Powers possessing rights to them by treaty), with criminal jurisdiction over foreigners, and judging civil actions between foreigners of the same nationality.

*Defence.*—The *Egyptian Army* is recruited by compulsory service, from which exemption is granted to professors, students, &c., and may be purchased for £60. The Commander-in-Chief is appointed by the Sultan with the consent of the British Government. The *British Force in Egypt*, since the outbreak of war in Europe, has undergone many changes, and it is impossible to give any definite information as to the number and nature of the troops stationed there. The Commander-in-Chief at present is Gen. Sir E. H. H. Allenby, K.C.B.

*Education.*—Primary education is conducted in *maktabs*, or elementary vernacular schools, some of which are under native management and some under the control of the Ministry of Education. Native education is completed at the Azhar University at Cairo, the principal university of the Moslem world. There are also Government Secondary, Special and Technical Schools, and Professional Colleges of Law, Medicine, Education, and Engineering. A National University, under entirely Egyptian management, has been founded at Cairo.

*Production and Industry.*—The total area of Egypt is estimated at 230,400,000 statute acres, of which about 7,000,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Such portions of the alluvial tracts as can be irrigated by the Nile (about 5½ million acres in 1914) are cultivable, irrigation being employed for this purpose on (a) the basin system, the land being divided into rectangular areas of varying size and surrounded by banks, between which the waters of the Nile are admitted during the flood season (August), and there retained for about 40 days, when it is run off and seed is sown broadcast on the land, and (b) the perennial system, consisting of ships

annals containing water all the year round and enabling two or more crops to be grown. For irrigation purposes barrages have been built at Esna and Assiût, and others in the Nile delta have been restored and improved, while a storage dam has been constructed at Aswan, and a barrage built at Zifta. The increase in the value of the land owing to these labours is enormous, and some 2,000,000 acres have been added to the cultivable area.

The corn crops include wheat, barley, maize (autumn and summer), rice (autumn and summer), and beans, while cotton of excellent quality is grown, the crop in 1914 being 6,452,392 *kantars* (99 lb.). The live stock in 1914 included 2,231,652 cattle, 838,209 buffaloes, 35,023 horses, 21,611 mules, and 246,727 donkeys.

*Minerals.*—Building stone, clays, gypsum, gold, lead and zinc ores, manganese ores, natron, nitrate of soda, petroleum, phosphate of lime, peridote, salt, and turquoise are produced on a commercial scale, and alum, copper ores, emeralds, granite, iron ores, nickel, ochres, ornamental stones, and sulphur are known to exist in more or less important quantities.

*Manufactures.*—There are some cotton mills in the Delta for the manufacture of rough calico, and in Upper Egypt are sugar, rice, and flour mills, and a certain amount of pottery is made. Cigarette factories centre at Cairo and Alexandria, from imported tobacco.

*Communications.*—The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway), on 31 March, 1918, was 1,677 miles. 25,507,832 passengers and 4,144,000 tons of merchandise were carried during 1913–14, the net receipts being £E1,308,344. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are 826 miles of light railways exploited by public companies. The principal port is Alexandria, where 958 vessels (1,877,000 tons) entered and 989 vessels (1,889,000 tons) cleared in 1913. The traffic through Port Said amounted in 1913 to vessels entered 2883, cleared 2911. There were, in 1913, 1,098 post offices and stations, dealing with inland correspondence, 48,437,130, foreign, despatched, 12,953,797, received, 16,442,497, and on March 31, 1913, 4,863 miles of telegraphs, with 11,980 miles of wire, over which 3,140,143 messages were transmitted.

## (B)—THE SUDAN

### Central Administration.

*Acting Governor-General*, His Excellency Major-General L. O. F. Stack, C.M.G.
*Private Sec.*, Maj. M. J. Wheatley
*Mil. Sec.*, Maj. C. A. Barker
*Asst. Priv. Sec.*, A. B. B. Howell.
*A.D.C.*, Maj. J. H. Pattison.
*Sudan Agent* (Cairo) *and Director of Intelligence*, Brig.-Gen. G. F. Clayton, C.B., C.M.G.
*Legal Secretary*, W. Sterry
*Advocate-General*, F. G. Davidson.
*Chief Justice*, R. H. Dunn.
*Financial Secretary*, Col. R. E. Bernard, C.M.G.
*Director of Customs*, Capt. C. McKay
*Director of Education*, J. W. Crowfoot.
*Director of Medical Dept.*, E. S. Crispin, M.D. (*acting*).
*Gen. Manager of Railways*, Capt. E. C. Midwinter, C.B., C.M.G., D.S.O.
*Director of Steamers* (vacant).
*Director of Surveys*, Lt.-Col. H. D. Pearson
*Director of Public Works*, Lt.-Col. M. E. Kennedy, C.M.G., D.S.O.
*Director of Posts and Telegraphs*, Maj. J. P. Moir, D.S.O.
*Director Veterinary Dept.* (vacant).

### Governors of Provinces.

*Berber* (*Dongola*), C. P. Browne.
*Dongola* (*Merowe*), Col. H. W. Jackson, C.B.
*Halfa* (*Halfa*), S. A. Tippetts.
*Red Sea* (*Port Sudan*), Lt.-Col. C. E. Wilson, D.S.O.
*Blue Nile* (*Wad Medani*), G. E. Ilos.
*Khartoum* (*Khartoum*), R. H. More.
*White Nile* (*Duem*), K. C. P. Struvé.
*Kassala* (*Kassala*), K. C. Lyall.
*Sennar* (*Singa*), Maj. A. Cameron.
*Darfur* (*Fasher*), Lt.-Col. R. V. Savile.
*Kordofan* (*Obeid*), J. W. Sagar
*Bahr-el-Ghazal* (*Wau*), Maj. Viscount Hawarden.
*Mongalla* (*Mongalla*), Capt. R. C. E. Owen, C.M.G.
*Nuba Mountains* (*Talodi*), Capt. E. S. Wilson.
*Upper Nile* (*Malakal*), Maj. C. H. Stigand.

*Area and Population.*—The Sudan extends from the southern boundary of Egypt at 22° N. lat. to the northern shore of the Albert Nyanza at 2° 25′ N. lat. and reaches from the French Sahara (about 22° 15′ E. long.) to the north-west boundary of Eritrea (36° 30′ E. long.), being about 1,494 miles from north to south and 1,200 miles from east to west at its extreme limits, with a total area of 984,520 square miles. The estimated population is close on 3,000,000, composed of Arabs, Negroes, and Nubians (of mixed Arab-Negro blood), with a small foreign element, including some 3,000 Europeans.

*Government.*—The Anglo-Egyptian Sudan is administered by a Governor-General, aided (since 1910) by a Council, nominated from amongst the officials of the Government. All ordinances and laws are made by the Governor-General in Council. The Sudan does not fall under the jurisdiction of the Mixed Tribunals of Egypt, and has its own civil and criminal codes based on those of India and Egypt.

*Local Government.*—The Anglo-Egyptian Sudan is divided into 14 Provinces (*mudirias*) under governors, and is sub-divided into districts (*markazias*). The governors are all British, and are principally British officers of the Egyptian Army.

*Defence.*—Several regiments of the Egyptian Army are stationed in the Sudan, which forms

an excellent recruiting ground, and the Sirdar of the Egyptian Army is Governor-General of the Sudan. A detached body of the British Army is quartered at Khartoum, under the command of the Governor-General. The police and the locally recruited irregulars (*Jehadia*) are under provincial administration.

*Education.*—In addition to native Koran schools there are over fifty elementary vernacular schools under the control of the Education Department, seven primary schools at Khartoum, Omdurman, Berber, Wad Medani, Halfa, Suakin and Atbara, where instruction is given in English as well as Arabic, a secondary school at Khartoum (Gordon College), a training college (also at Gordon College), and technical and trade schools at Khartoum, Omdurman and Kassala.

*Production and Industry.*—About 2,500,000 acres were under cultivation in 1913, and this area is being extended by irrigation canals, from which the Nile water is distributed over the land by means of water canals, and by the basin system (see Egypt) in the Dongola province. The chief crop is durra (African millet), which forms the staple food of the Sudanese. Wheat, barley, dates, lentils, beans, onions, and melons are also grown, and ground nuts and sesame are produced for oil, while an excellent quality of cotton is also grown. The exports of cotton in 1913-14 amounted to about 6,500,000 lb. The forests of the south-west and south contain valuable timber, and gum and rubber are derived from the forests of Kordofan and the valley of the Blue Nile. The live stock includes camels, horses, cattle, sheep, goats, and asses, while ostrich farms are established in the central region. Gold was once worked in large quantities, and the mines of Um Rabardit and Gebait have been reopened. Lignite, iron, and copper are known to exist, and the last two are worked by natives in the Bahr-el-Ghazal *wadiyas*.

*Communications.*—In 1913 about 1,200 miles of railway were open for traffic. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal, and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telephone lines being 5,000 miles in 1913. There are 78 post and telegraph offices.

| | 1912. | 1913. |
|---|---|---|
| Revenue ... ... ... ... | £E1,543,300 | £E1,495,000 |
| Expenditure ... ... ... | 1,533,300 | 1,495,300 |
| Imports ... ... ... ... | 1,892,300 | 1,701,300 |
| Exports ... ... ... ... | 1,020,300 | 1,378,000 |

CAPITAL, Khartoum, at the junction of the White and Blue Niles. Population about 32,000. Opposite Khartoum, on the Blue Nile, is Khartoum North (22,000), and on the White Nile is Omdurman (62,000), the former Mahdist capital. The journey from Cairo to Khartoum by Egyptian State Railways takes 4¼ days. The mails leave Cairo twice weekly.

## (*C*)—THE SUEZ CANAL.

The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive, in 1875, a total of 176,602 shares, the purchase price being £4,000,000, and their value on 31 March, 1914, £20,992,000.

The Suez Canal was opened in 1869. The total length of the canal is 99 miles, with a width of 72 metres (192 ft. 9 in.), having cost £20,000,000 to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9·754 metres (30 feet). By a convention, signed on 29 Oct., 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government, and seven the shipowning interest).

The transit receipts in 1869 were £4,176, in 1911, £5,332,779, in 1912, £5,397,732, in 1913, £5,112,091, in 1914, £4,830,340, in 1915, £3,671,259, and in 1916, £3,244,794.

The present rate of transit dues is 15f. 50c. per ton, and 8f. 50c. for vessels in ballast.

The net dividends for the year 1913 amounted to 120 fr. on the ordinary 500 fr. shares, and 97·915 fr. on the Actions de Jouissance. In 1916 these were respectively 92 fr. and 67·378 fr.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1870, with the percentage of British vessels:—

| Year | No. of Vessels. | Net Tons. | British Tonnage. |
|---|---|---|---|
| | | | % |
| 1911 | 4,969 | 16,324,820 | 63 0 |
| 1912 | 5,373 | 20,275,120 | 62 4 |
| 1913 | 5,085 | 20,032,864 | 60 2 |
| 1914 | 4,800 | 19,420,000 | 66 5 |
| 1915 | 3,708 | 15,188,000 | 76 3 |
| 1916 | 3,120 | 12,324,247 | 73 6 |

## FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 19'—52° S. lat. and 57° 40'—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1911 of 2,491. Mount Adam, the loftiest peak in the colony, rises 2,313 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Argentine Republic established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonised, and from that time to the present have so continued, being, as a whole, the most southerly organised colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep, Kitchen-garden occupy the only cultivated part, with the exception of one station situated in a sheltered position on the West Falkland, where a considerable crop of hay is grown. The population is mainly British, and is principally engaged

in sheep-farming and sealskin industries. The chief exports in 1913 were wool, whale-oil and guano, tallow, hides and sheepskins. The total tonnage of vessels entered and cleared in 1913 was 330,475. There are three places of worship (one Church of England, one Roman Catholic, and one Nonconformist). The only important settlement is Port Stanley, at the head of Port William, on the east of East Falkland.

On Dec. 8, 1914, a brilliant naval action was fought off the Falklands between a British squadron under Adm. Sir Doveton Sturdee, and a German squadron under Adm. von Spee, resulting in the sinking of four of the five German vessels engaged, without any loss on the part of the British.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is a dependency of the Falkland Islands. Among other dependencies are the South Shetlands, the South Orkneys (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station), the Sandwich Group, and a part of the mainland of the Antarctic, known as Graham's Land.

Port Stanley is distant about 8,250 miles; transit, 25 days, monthly from Liverpool. Telegraphs by cable and wireless telegraphy *vid* Monte Video.

## FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,200 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 30′—20° 30′ S. lat. and 176° E.—178° W long. The gross area of the group is about 7,068 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans, the average temperature in the shade in the cool season is 70°, rising to 84° in the hot season, extremes lying between 60° and 90°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, bananas, plantains, pine-apple, pepper, dalo (taro), cocoa-nut, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trepang shell, molasses, rubber, maize, hides and pelts, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 6 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 22 nominated members (one specially representing Indian interests), 7 elected members, and a native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (Dec. 31, 1911) was estimated at 253,253 (94,249 native Fijians, 39,565 East Indian immigrants, 4,704 Europeans, and 2,044 Polynesians and others).

Suva is 11,000 miles from London; transit from London, *vid* Vancouver, about 30 days, and *vid* Sydney, about 50 days.

## GAMBIA.

The West African river Gambia, which is navigable for some 200 miles from its mouth, was discovered by the Portuguese in 1447, and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1588 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James, but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the Treaty of Versailles, as British. The Colony had no regular political institutions until 1843, when it

† £60,224 Debts to Imperial Government; but £57,000 to be repaid.
‡ Not including expenditure on loan account.

was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Combo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, as the Census of April 2, 1921, was 7,702, and that of the Protectorate 178,402. The climate is unhealthy during the rainy season, viz., from June to October, but during the rest of the year it is healthy. The chief export is ground nuts, which form seventy per cent. of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Beeswax, palm kernels, hides, and calabashes are also exported, and rice, cotton, maize, and a kind of millet called *kous kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 122 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 92 men), which performs both civil and military duties. The government, which is that of a Crown Colony, is now vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

## GIBRALTAR,

a rocky promontory, 2¾ miles in length and ¾ of a mile in breadth, and 1,439 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779–83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1918 4,876 vessels entered, with a total tonnage of 7,805,083. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. There is an enclosed harbour with an area of about 400 acres, three graving docks, and dock-ing accommodation for the largest battleships in the British Navy. The civilian population (Census of April, 1911) was 20,120.

The Governor is in command of the garrison, and exercises all the functions both of govern-ment and legislation, there being no executive or legislative council.

## GOLD COAST.

The Gold Coast Colony comprises the coast of the Gulf of Guinea from about 3° 7′ W to 1° 14′ E of Greenwich, with a protectorate extending inland to an average distance of 440 miles, or to the 11th of N latitude, bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by the German colony of Togoland. The total area of the colony and its dependencies is estimated at 80,295 sq. miles. The population (Census of April 2, 1921) was *Gold Coast Colony*, 1,437,228; *Ashanti*, 281,824; *Northern Territories*, 287,252; total, 1,903,305, of whom about 1,000 are Europeans. The natives are almost all Pagans, but the number of Mohammedans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Kormantyne, and subsequently many forts and factories were established by the English and other nations. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the coast, and also built forts at Dixcove, Sekondi, Komenda, Anamabo, Winnebah, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 30° N and 32° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1867, when an exchange was effected which gave all those on the west of the Sweet River to Holland and those on the east to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the Ashanti war of 1873–4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. In this war, as in those of 1806 and 1900–1, the British arms were completely victorious, and the Kingdom of Ashanti has now been added to the dominions of the British Crown.

The trade is principally with the United Kingdom. Gold is found in considerable quantities. The principal exports in 1919 were Cocoa, £3,692,342; gold, £1,760,512; lumber, £90,661; rubber, £85,267; palm kernels, £80,312; and kola nuts, £139,169. The chief imports are textiles, alcohol, and hardware. The climate, generally, is hot and moist and very malarious, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters, and has established schools of its own. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1914 was 2,872,778 (British 1,865,227), in 1915, 1,628,698 (British 1,324,227). 2,673 miles of telegraphs have been established in the colony, of which 292 miles are in Ashanti and 89 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi (268 miles). Another line runs from Accra to Mangoase (39 miles), and further developments are being surveyed.

The seat of government is Accra* (population 19,868). The other principal towns are Cape Coast (11,269), Ada (1,372), Elmina (5,079), Sekondi (9,120), Tarkwa (2,426), Kwitta (3,692), Axim (2,264), Kumasi (18,823), Saltpond (3,540), and Winnebah (5,840). The government is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 6 official and 4 unofficial members.

## HONG KONG

The Crown Colony of Hong Kong consists of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10′—22° 34′ N lat. and 113° 52′—114° 30′ E. long., and of a portion of the mainland.

*Hong Kong* is an island about 12 miles long and from 2 to 6¼ miles broad, with a total area of 32 square miles, it lies close to the mainland, being separated at one point by a narrow strait (Lyeemoon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842. *British Kowloon* was subsequently acquired by the Peking Convention of 1860, and the *New Territories*, being the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with an estimated population (1911) of 502,160 of whom 445,840 were Chinese. The white residents, including naval and military, numbered about 5,000.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland, and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 22 square miles. The port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry Shipping entered, (1911) 18,490,262 tons, (1912) 18,190,129 tons. A railway, of which 23 miles belong to the Government, runs from Kowloon to Canton, the length north of the Sham Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tau-kok, a distance of 7 miles. Good roads connect the principal districts with the railway

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,800 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The hot season lasts from May to October During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 62° in February, and the average daily minimum temperature from 76° in July to 49° in February The average annual rainfall is 85 in., of which 70 less than 72 per cent. falls between May and September, when the S.W monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly sugar, opium, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

Much encouragement is given by the Government to education in the colony In 1911 there were 48 schools subject to Government supervision, attended by 11,119 pupils. The University (opened in 1911) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its administration is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

## JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43′—18° 32′ North lat. and 76° 12′—78° 22′ W long. It is the largest and most valuable of the British West Indian islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,440 square miles, and a population, in April, 1911, of 831,383; the whites numbered 15,615, coloured, 189,201, blacks, 630,181, East Indians, 17,380, and Chinese, 2,111.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains six

* The Government publishes annually a Handbook of Jamaica, full of information respecting the history and progress of the island.

lands up mountain descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 298 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the savings banks was 29,682 (1907). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported, the latter is still counted the best in the world, and fine coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members, the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 20, as the King or the Governor may appoint, called Nominated Members, and 15 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1911) 87,299; the next in importance are Spanish Town, pop. 7,129; Montego Bay, 4,826; and Port Antonio, 7,274. Chief exports (1906): Fruit, £1,594,340; coffee, £268,140; sugar, £736,943; dye-woods, £129,284; pimento, £44,234; rum, £122,063; cocoa, £122,022. Minor products, £498,122.

## LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda, (2) St. Christopher and Nevis, with Anguilla, (3) Dominica, under Administrators, (4) Montserrat, and (5) the Virgin Islands, with Sombrero, under Commissioners, all, except the latter, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The population of the federal colony at the Census of 1911 was 127,283. The General Legislative Council consists of 8 *ex-officio* and 8 elective members, with the Governor as President.

### (1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 7′ N. lat. and 61° 49′ W. long., and is about 70 miles in dir.

* Seconded for duty in India at Asst. Emigration Agent.

circumference. Its area is nearly 108 square miles, equal to 68,480 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1911 was 34,914, including 13,989 males and 18,976 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is being planted, and the island also exports molasses, tamarinds, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

*Magistrate*, W. H. Whytham, L.R.C. ... 500
*Supt. of Public Works*, C. K. Stretch ... 400
*Postmaster*, A. C. K. Tibbits ... 250

*Barbuda* is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 38' N., long. 61° 45' W. Area, 72 square miles. Population, 775. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

*Magistrate*, O. Nugent ... £80
*Manager*, G. Sutherland ... £136 to £60
*Redonda*, a small island with a phosphate industry, has a population of about 20.

### (2) ST. KITTS-NEVIS (WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population at the Census of 1911 of 43,135, and a total area of about 130 square miles. The climate is decidedly healthy for the tropics, the temperature being from 76° to 85°.

*St. Kitts*, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 18 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, pop. (1911) 8,139, is a port of registry, and had 67 vessels of 2,213 tons in 1918.

*Nevis* (separated from St. Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1911 of 12,492. Sugar cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1911), 2,124.

*Anguilla* is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 2 to 3 miles, containing an area of 35 square miles. Population (1911), 4,079. Cotton is the principal product, and small stock are raised.

### (3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20'—15° 42' N. lat. and 61° 17'—61° 30' W. long., 28 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 58° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coffee and fruit. The population numbered 33,681 at the Census of 1911, included in this total are 420 Caribs, of whom 170 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population about 5,500, and Portsmouth, population about 1,000.

### (4) MONTSERRAT

is situated in 16° 45' N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of

38¼ square miles, with a population (Census 1911) of 22,256. Discovered by Columbus in 1493, it was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered the most healthy and beautiful of the Antilles; it contains three active sulphur and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The chief exports during the year 1911 were cotton, £32,080; limes and its products £28,391; sugar, £7,807; papaine, £1,980; animals of all kinds, £1,808. The chief town is Plymouth, with a population (1911) of 1,534.

### (2) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666, the principal are—Tortola (the largest), situate in 18° 29' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1911 was 5,262. There is good pasturage for cows, sheep, and goats. Sugar and cotton are grown in increasing quantity, fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola, population (1911), 410.

*Medical Officer*, T. L. E. Clarke 250

## MALAYA.

### (1) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,566 square miles, with a population in 1911 of 1,226,292. The principal towns are Kuala Lumpur (Sel.), pop. 46,172, Ipoh (Pk.), 19,998, Taiping (Pk.), 19,856, Kampar (Pk.), 12,824, Seremban (N.S.), 8,687, Klang (Sel.), 7,699, and Telok Anson (Pk.), 6,907.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 878 miles of railway all constructed from revenue, including the Johore State Railway (22½ miles), which is leased from the Johore Government. There is through communication between Penang and Singapore. Lines on the West Coast through Kelantan are being constructed, to connect with the Southern Siamese Railways and afford free communication with Bangkok. The journey between Bangkok and Penang will then be saved 36 hours instead of, as at present, 5 days by sea. There are 2,468 miles of road, and 1,888 miles of bridle-paths, while the principal rivers are navigable for small boats. The chief export and source of revenue is tin, of which about one half of the world's supply is produced. Rubber, coco-nuts, and rice are extensively cultivated. The climate is very uniform, and may be described as hot and moist. There is no well marked dry season, and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 90°, and the minimum 70°.

The States maintain a regiment of Northern Indian troops (the Malay States Guides), and are policed by a mixed force of Indians and Malays, officered by Europeans.

Kuala Lumpur is distant 8,900 miles from London; transit, 22 days (*viâ* Penang).

## (2.) THE MALAY STATES NOT INCLUDED IN THE FEDERATION

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11., 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Mahammadism.

JOHORE, with an area of 9,000 square miles and a population (Census, 1911) of 280,422, occupies the southern extremity of the Malay Peninsula. Capital, Johore Bahru, population, 9,189. The rubber estates are important.

| | 1916. |
|---|---|
| Revenue | $7,271,862 |
| Expenditure | 4,802,433 |
| Public Debt | 4,000,000 |
| Imports | 22,985,727 |
| Exports | 41,823,980 |

*Sultan*, H. H. Ibrahim, G.C.M.G., *born*, 1873; succeeded his father, 1895.
*General Adviser*, D. G. Campbell, C.M.G.
*Legal Adviser*, M. H. Whitley

KEDAH, between 5° 21′ – 6° 35′ N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1911 was 441,986, and the approximate area 9,860 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 10,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 38 British officials, employed in the Public Works, Survey, Police, and Medical departments.

| | 1916. |
|---|---|
| Revenue | $3,676,132 |
| Expenditure (including special services) | 3,221,877 |
| Public Debt | 1,718,918 |

* Exclusive of allowances.

*Sultan*, H.H. Abdulhamid, K.C.S.I.
*Regent*, H.H. Tunkalim.
*British Adviser*, G. A. Hall.

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 300 sq. miles, and the population in 1911 was 51,840. The capital is Kangar, a few miles up the Perlis River. Rice is the principal crop.

| | 1916. |
|---|---|
| Revenue | $344,771 |
| Expenditure | 176,888 |
| Public Debt | 256,800 |

*Raja*, H.M. Syed Alwi.
*British Adviser*, H. C. Eckhardt (*acting*).

KELANTAN lies between 4° 38′ – 6° 12′ N. and 101° 28′ – 102° 45′ E. on the east coast of the peninsula, with a total length of about 120 miles and a breadth of 90 miles. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut, and affording pasturage for large quantities of live stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and barren. The capital, Kota Bharu, 8 miles from the mouth of the Kelantan River, has a population of 12,000.

| | 1916. |
|---|---|
| Revenue | $800,867 |
| Expenditure | 722,122 |
| Public Debt | 2,432,278 |

*Sultan*, H.H. Muhammed, K.C.M.G.
*British Adviser*, R. J. Farrer (*acting*).

TRENGGANU, between 4° 32′ – 5° 45′ N. and 102° 12′ – 103° 30′ E., lies south of Kelantan on the east coast of the peninsula. Area, about 6,000 square miles. Population (1911), 154,000. Industries of agriculture (mainly rice), silk weaving, shipbuilding, and tin mining. The principal exports in 1915 were dried fish ($621,670), tin ore ($478,200), wolfram ($396,276), and copra ($223,776). The capital, Trengganu, on the river of that name, contains 13,500 inhabitants.

| | 1916. |
|---|---|
| Revenue | $438,708 |
| Expenditure | 234,887 |
| Public Debt | 153,128 |

*Sultan*, H.H. Sir Zainal Abdin, K.C.M.G.
*British Agent*, T. L. Humphreys.

## MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 95½ square miles. The colony includes also the adjoining island of GOZO, with an area of 24¾ square miles; COMINO—the site of the *Sultana* disaster in 1829 and now a sanitary station—and several islets. The estimated civil population of the whole group, on April 1, 1917, was 223,911.

In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility, consisting of 25 families. The islands are highly cultivated. The chief products are corn, cotton, melons, grapes, fungi, vegetable seed, cheese, and

potatoes, figs and honey are plentiful. It was estimated that in 1916-17 the area under cultivation in Malta and Gozo was about 40,687 acres. It is estimated that 6,000 females are employed in making lace. The principal occupation of the people is in connexion with shipping. On Census day 1911 there were 21,181 persons living in Valletta, but the total population of the Colony was 1,820 to the square mile. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet, and an additional graving dock was opened on Feb. 12, 1892. There is also a hydraulic dock, originally constructed by private enterprise, which has been taken over by the Admiralty. Two new dry docks and both arms of the breakwater at the mouth of the principal harbour have now been completed. The military expenditure for 1916-17 amounted to £783,000. The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1916 (June, July, August and September) was 76·7°. In winter the range is from 49·6° to 56·6°. In 1916-17 the highest temperature in the shade was 98·4°, and the lowest 43·7°. Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 900, but its suburb, Rabato, had about 8,850 inhabitants in 1915-16. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. Malta possesses a University and Lyceum, 130 elementary and infant schools, a secondary schools, and 29 night schools, maintained at a total cost to the Government of £58,819 in 1916-17, in addition there are garrison schools, a Dockyard school, and 21 private schools which receive no grants-in-aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council, consisting of an official and a non-official members, and by a Legislative Council, called the Council of Government—9 official and 6 elected members. The Governor is President in both.

In 1916-17 the Port of Valletta was entered by 2,172 vessels (tonnage, 1,919,224).

## MAURITIUS.

Mauritius is an island lying in the Indian Ocean 500 miles east of Madagascar, between 19° 58′ and 20° 32′ N. long. and S. lat. 19° 50′—20° 32′, and

comprising an area of 720 square miles. The permanent population at the Census of 1911 was 370,202, of whom 259,887 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent.

Mauritius was discovered between the years 1507 and 1518 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 220,768 acres, 170,425 are under sugar, 20,862 under fibre, and 19,491 under other crops, the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate but, except in Port Louis and some of the low lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1913, amounted to 769,272 tons, of which 564,540 were British. In 1913 there were 109½ miles of railway (119¼ of 4 ft. 8½ in. gauge and 10 of 2 ft. 6 in.), 63 post offices, 56 telegraph and 42 Government telephone offices in the island, with 632 miles of telegraph and 1210 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of 4 official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, 3 being *ex-officio*, 9 nominated by the Governor, and 15 elected by a moderate franchise. Port Louis has 8 members, *and each of the country districts 2.*

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1913 amounted to Rs. 988,287. Of the pupils in the Government and aided schools, 59 per cent. are Roman Catholics, 2 per cent. Church of England, 1 per cent. other Christian denominations, 11 per cent. Mahammadans, and 27 per cent. Hindus and others.

### Dependencies of Mauritius.

(1) RODRIGUEZ, 350 miles almost due east of Mauritius. Population (Census 1911), 4,899. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

*Magistrate*, S. Fouqueresux .... ..... Rs. 3,000

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is cocoa-nut oil. The most important is Diego Garcia (pop. 1911, 517), one of the Chagos Archipelago, which has on the direct route from the Red Sea to Australia, and, as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1911) is 1,344.

Transit from London to Mauritius, 28 to 32 days.

## NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Right of Benin, between Dahomey on the west and the Kamerons on the east. The Protectorate is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The headquarters of Government is at Lagos, but it is proposed to establish a new capital at Kaduna, in the heart of the country

The area of the whole territory is 336,000 sq. miles, and the population roughly 18,500,000.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides and skins, and the export of ground-nuts is steadily increasing. During the last few years a considerable industry has arisen in connexion with tin-mining in the Northern Provinces. The Udi coalfields are of great extent and the coal promises to be of excellent quality. A railway is in operation between Lagos and Ibadan, a distance of 130 miles, crossing the Niger at Jebba, and a junction between this railway and the railway from Baro to Kano, in the Northern Provinces, is effected by means of an extension to Minna, 38 miles east of Zungeru. There is thus direct rail communication between Lagos and Kano, over a total distance of 712 miles. Further railway extensions are in progress, the first train left Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (192 miles) in June, 1916. It will eventually be extended to Kaduna, to form a junction with the main line from Lagos to Kano. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Oshtaba, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

*Secretary*, G. B. Mathews £700 to £00

*1st Class Residents*, Capt. U. F. H. Burton, W. F. Gowers, F. H. Gall, E. J. Arnett £800 to £,200

*Inspector-General of Police and Sheriff*, Capt. A. E. Johnson, D.S.O. £600 to £00

*Director of Agriculture*, P. H. Lamb £800 to £00

*Principal Medical Officer*, T. A. Pickels £1,100

*Govt. Inspector of Mines*, B. A. Langslow Cook £800 to £00

*Director of Education*, H. Vischer £800 to £00

*Director of Public Works*, A. C. Ridsdale £800 to £,000

*Southern Provinces (Lagos).*

*Lieut.-Governor*, A. G. Boyle, C.M.G. £2,000

*Secretary*, Major H. C. Moorhouse, C.M.G., D.S.O. £800 to £,000

*1st Class Commissioners*, H. Bedwell, C.M.G., R. A. Roberts, J. O. Maxwell, C.M.G. £800 to £,000

*Inspector-General of Police*, C. E. Johnstone £700 to £00

*Chief Conservator of Forests*, H. N. Thompson £1,000 to £,200

*Director of Prisons*, Maj. W. H. Beverley £800 to £00

*Director of Agriculture*, W. H. Johnson £800 to £00

*Principal Medical Officer*, Maj. W. H. G. H. Host £,000

*Director of Education*, H. J. Hyde-Johnson £800 to £00

*Director of Public Works*, H. F. Post £900 to £,000

Transit to Lagos from Liverpool, 18 days. Cable communication to Lagos and Bonny. Inland telegraphs, Lagos, Zungaru, and majority of important places.

## NYASALAND PROTECTORATE.

(*British Central Africa.*)

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern portion of British Central Africa, and the control of the administration was transferred from the Foreign Office to the Colonial Office on the 1st of April, 1904. The remainder of the territory is administered by the British South Africa Company.

The population of the Protectorate is estimated at 1,178,936, including 789 Europeans and 279 Asiatics, and it has a total area of 39,073 square miles.

The principal exports are cotton, tobacco, chillies, coffee, ground nuts, maize, wheat, fibre, and tea. The cultivation and export of cotton and tobacco are considerable, and there are prospects of a steady development of these industries. Ivory and rubber are also exported. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. There are also twenty five steamers on the Zambesi and Shiré rivers. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a place of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

Chief towns.—Blantyre (population about 4,000 Europeans and 7,000 natives) and Zomba, the headquarters of the Government. Communication is maintained between Port Herald and

Chinde by the African Lakes Company's steamers and the British Central Africa Co.

Between Chinde and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's line *viâ* Natal, and the British India Steam Navigation Co.

A railway, 223 miles in length, connecting Port Herald (the nearest port to the coast) with Blantyre, is open for traffic, and will probably be extended to Lake Nyasa *viâ* Zomba. A railway, 62 miles in length, connects the north bank of the Zambesi River with the existing line at Port Herald. Communication between the south bank of the Zambesi and Beira is also being undertaken, and when this line is completed Nyassaland will be linked to the South African railway system. The Protectorate is connected by telegraph overland with the Cape *viâ* Fort Salisbury, and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

## PACIFIC ISLANDS.

*High Commissioner*, Sir Ernest Bickham Sweet-Escott, K.C.M.G. ..... £1,000 (In addition to £3,000 as Governor of Fiji and allowance of £1,250 as Consul-General for Western Pacific.)
*Assistant to High Commissioner* (vacant) £800
*Chief Judicial Commissioner*, Sir C. S. Dawson, K.C. ..... 900 (In addition to £1,000 as C.J. of Fiji.)

(1) *The British Solomon Islands*, protected since 1893, and consisting of Guadalcanar, Malaita, San Cristoval, New Georgia, and other islands situated in about 8° S. and 156° E., with a total area of about 11,000 nautical square miles. The Santa Cruz Group and several other islands were incorporated in the Protectorate in 1898 and 1899, and in 1900 Choiseul Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1905-06 was £26,405, and the expenditure £20,000, exports, 1904-05, £87,630. Imports, £72,282. White pop., 180; native pop., 150,000. The seat of government is Tulagi.
*Resident Commissioner* (vacant), £800 to £1,000 (and £300 allowances).

* Mr. Hewitt-Fletcher.

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179 30° W longitude, consists of nine islands. Ocean Island (or Pleasant) in lat. 0° 50' S. and long. 169° 30' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1911), 30,293 natives, 321 Asiatics, and 259 Europeans. Revenue (1909-10), £23,117; expenditure, £32,867; imports (1908), £60,000; exports (1911), £133,992.

The Union or Tokelau Group, Fakaofo, Nukunone and Atafu, were included in the Protectorate in 1909, and annexed to H.M. Dominions in Feb. 1916 as part of the Gilbert and Ellice Islands colony.

*Fanning Island*, in lat. 3° 52' S. N., long. 159° 21' W., and Washington Island, 68 miles N.W. by W. of Fanning Island. Pop., 22 Europeans in connexion with Pacific cable station, and about 200 Gilbert Islanders in copra industry. The Islands were included in the Gilbert and Ellice Colony by an Order in Council of 27 Jan. 1916.

*Resident Commissioner*, R. C. Eliot £700 to £800 (and £300 allowance).

(3) *The Tonga or Friendly Islands.*—A protectorate over the Tonga Islands was proclaimed 19 May, 1900. These islands are situated in the Southern Pacific to the S.S.E. of Fiji, and 300 miles therefrom, with an area of 385 square miles, and a population on Dec. 31, 1911, of 21,121 natives of Tonga. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Tongatabu is the seat of government, the king being Siositi Tubou II. Soil generally is fertile, the principal exports are copra, fungus, green fruit, kava, and candle-nuts. Revenue, 1913-16, £21,129; expenditure, £27,837; imports (1916), £87,700; exports, £72,998. The total shipping cleared in 1914 was 54,699 tons, all of which was British.

*Agent and Consul*, Islay McOwan ..... £350

(4) *The Phœnix Islands* (Wilkes, Gardner, Birnie, Hull, Enderbury, Phœnix, and Sidney) between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (April, 1911), 144, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.
*Deputy Commissioner*, H. A. Richards (*H.M Consul for the Society Islands*).
*Chief Magistrate*, Gerard E. R. Christian.

(6) *The New Hebrides Group* lies between the 14th and 20th degrees of South latitude and the 166th and 171th of East longitude. In 1906 a Convention was signed under which the administration of the group was assumed by Great Britain and France. British and French Resident Commissioners were appointed in 1906. Nat. pop. about 69,000, European 800. Principal exports, maize, copra, and coffee. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia.
*French High Commissioner*, J. Repiquet (Governor of New Caledonia).
*British Resident Commissioner*, M. Ring ..... £800

*French Resident Commissioner*, M. Lippmann.
*President of Joint Court*, Count de Roma Riperosa ..... £500

(3) There are also a large number of scattered groups and isolated islands.

## ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 995 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, and 1,800 from the coast of S. America, in 15° 55′ S. lat. and 5° 42′ W long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1901) of 3,520. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 84° in the town at the sea-level, but in the country, 1,800 feet above the sea, the maximum is about 70°, and the mean temperature ranges from 59° in September to 66° in March, there being very little difference between night and day, the lowest temperature in winter is 52°, and the total rainfall (1901) 44·24 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it circ. 1633. The English East India Company seized it in 1651, but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there May 5, 1821), when it was ceded by them to the Crown. In 1900 the island was used as a place of internment for prisoners of war from South Africa. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the West Indies. The tonnage dues on sailing ships were abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port, the number which called in 1903 was 60. The phormium industry and lace-making, both under Government control, were established during 1903. It is of strategical importance as a coaling station, and has recently been fortified by the Imperial Government. St. James's Bay, on the north-west of the island, possesses a good anchorage. The garrison was withdrawn in October, 1906.

The government is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

*Secretary*, J. F. Bowlatt.

---

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of 450 miles, an area of about 50,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kalingkang, and Batang Lupar mountains, the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 200 miles), the Batang Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary Sovereign, and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates) with a Committee of Administration, and a general council of 30, composed of Europeans and Malay officials and native chiefs, and meeting every 3 years. The civil service is composed of English officials to the number of 50, appointed by the Sovereign. The

government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, 1890, and 1900, when the Limbang River was obtained. The Lawas River was purchased from the British North Borneo Company in 1901. The country produces sago, gutta-percha, india-rubber, beeswax, birds' nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. A large petroleum field has been discovered in the Baram district, and is now a valuable asset. Gold exports, (1909) $1,130,440; (1910) $921,119; (1911) $992,915; (1912) $1,070,200; (1913) $1,077,400; (1914) $1,298,500.

CHIEF TOWN, Kuching. Population (1911), 24,000. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams *sent by wireless* from Singapore. There are three other wireless stations in the country: Sadong, Sibu, and Miri. Steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday, arriving on Thursdays.

## SEYCHELLES.

The Seychelles Islands, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 148½ square miles, of which Mahé occupies nearly 56 square miles. The population of all the islands (Census 1911) was 24,631 (Mahé 17,721, Praslin 2,018, La Digue 1,364, other islands 2,528), an increase since the Census of 1901 of 2,454. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, it is an Admiralty coaling station, and depôt for patent fuel. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1916 being 16·59 per 1,000. There are 22 Roman Catholic and Church of England primary schools, and a grant-in-aid of Rs.12,000 was voted for 1918; there is a Government college (King's College) and a school (Victoria School), maintained at an annual cost of nearly Rs.30,000, for higher education.

The principal exports are copra, vanilla, cocoa-nuts, cocoa-nut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double cocoa-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. Mahé is in telegraphic communication with all important parts of the world *viâ* Mauritius and Zanzibar. The Governor is assisted by an Executive Council of 3 members (2 *ex-officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

## SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 200 miles, with an estimated area of 4,000 square miles. In 1911 its population was 73,872, of whom 850 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 200 miles, lying between 7° and 10° N. lat., and the extreme breadth, from west to east, 12 miles, between 10° 40′ and 13° 21′ of W. long. Its estimated area is 27,000 sq. miles, and its population about 1,227,360. For administrative purposes it is divided into 5 districts, under District Commissioners, the principal peoples being the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, and palm oil; but ginger, plantains, hides, and rice are also exported. The value of the palm kernels exported in 1913 reached £1,344,272. Before the outbreak of the war, the trade in this commodity was chiefly with Hamburg. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 24 miles in length extends in a north-easterly direction from Bois to Kamabai. By the extension of the railway and the development of a system of roads in the Protectorate, it is estimated that the output of Sierra Leone products into the European market is capable of being more than doubled. There are 893 miles of combined telegraph and telephone service.

With regard to its constitution, Sierra Leone is a Crown Colony, possessing a Legislative Council nominated by the Crown, and having full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

## SOMALILAND.

(*The Somaliland Protectorate.*)

In 1884 a Protectorate was declared over part of Somaliland, a country now subject (except where reserved by Great Britain and Italy) to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Muhammadan tribe, is estimated at 300,000. The boundaries are defined by treaty with Abyssinia and Italy, the northern coast as far as 49° E. and the 11th parallel of N. latitude are the limits on the north and south. In March, 1920, all troops were withdrawn from the interior, the 6th Battalion King's African Rifles was disbanded, and a policy of strict coastal concentration was then adopted. This policy having disappointed expectations, a Camel Constabulary, 250 strong, under the command of the late Mr. R. C. Corfield, was raised at the end of 1920 to check inter-tribal fighting, which by this time had assumed serious proportions. A measure of peace among the friendly tribes was quickly restored, but in August, 1923, the corps, 518 strength of 209 rank and file, encountered an Dulinadoba a raiding party of dervishes estimated at 2,000 rifles, and in the action which ensued, though heavy losses were inflicted on the enemy, the Constabulary sustained casualties amounting to 50 per cent., including the commandant killed. The force thereupon fell back on Shaikh, and reinforcements of Indian infantry were moved up from the coast. His Majesty's Government later decided to increase the forces of the Protectorate, in order to preserve the necessary grazing grounds of the friendlies from dervish attack, and to main tain peace among the tribes living in the west. The strength of the Indian contingent has accordingly been raised to 400 rank and file, and the Camel Corps reconstructed with an establishment of 18 officers and 300 men.

The Protectorate was transferred in 1898 from the administration of the India Office to that of the Foreign Office, and on April 1, 1905, to that of the Colonial Office.

## SOUTH AFRICAN HIGH COMMISSION.

*High Commissioner for South Africa*, His Excellency the Right Honourable Viscount Buxton, P.C., G.C.M.G. (also receives £10,000 as Governor-General of the Union of South Africa) £3,500
*Imperial Secretary and Accountant*, C. H. Rodwell, C.M.G. ..... 1,500
*Chief Clerk*, C. L. O'B. Dutton ..... 750
*Resident Commissioner, Southern and Northern Rhodesia*, H. J. Stanley, C.M.G. .. .. .. .. .. .. .. 1,800
*Secretary*, C. D. Douglas-Jones ..... 500

* Exclusive of allowances. † Members of Council.

* Exclusive of allowances.

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner, by a similar Commission issued in 1903 to Lord Selborne, by a similar Commission, dated March 30, 1910, to Lord Gladstone, and by another, dated May 24, 1914, to Lord Buxton, who is also Governor-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern and Northern Rhodesia. The Southern Rhodesia Order in Council, 1898, and the Northern Rhodesia Order in Council, 1911, provide respectively for a control by the High Commissioner over legislation, important appointments, and Native Affairs in Southern and Northern Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government.

## BASUTOLAND.

### (*The Territory of Basutoland.*)

Basutoland is an inland Native Territory of South Africa, lying between 28° 45′ and 30° 40′ South latitude and 27° and 29° 30′ East longitude, with an area of 11,716 square miles. The Census of 1911 showed 403,111 natives and 1,336 whites.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear numerous herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, Post-office, and licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mohale's Hoek, and Quthing. There are 288 schools, with 22,472 scholars, a large proportion being in the schools of the French Protestant Mission. The amount spent on education in 1916–17 was £18,343. The chief articles of export are grain, wood, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

Maseru is distant from London 7,668 miles; transit, through the Cape, about 20 days.

## BECHUANALAND.

### (*The Bechuanaland Protectorate.*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north by Rhodesia and the Zambesi, and on the west by South-West Africa. It is about 400 miles long and 490 miles broad, with a total area of about 275,000 square miles. The population at the Census of May 7, 1911, was 125,320, of whom 1,691 were whites.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kaffir corn and maize are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 323,921 at the Census of 1911. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakuthlu), of Sechele (Bakwena), of Kgosientsie (Bangwaketse), of Sebolai Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *viâ* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Gaberones, Francistown, and Serowe, whither the Chief (Khama) and all his people moved a few years ago from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

| | 1914-15. | 1915-16. | 1916-17. |
|---|---|---|---|
| Revenue ..... | £56,414 | £70,223 | £69,340 |
| Expenditure ..... | 71,238 | 88,630 | 84,277 |

The annual deficiency was formerly made good by an Imperial grant-in-aid. The grant for 1911-12 amounted to £20,000. It has since been met from an accrued balance.

## RHODESIA.

### British South Africa Company.

*Board of Directors*:—
(*President*), Rochfort Maguire, P Lyttelton Gell, Hon. Sir Lewis Michell, C.V.O., Sir Henry Birchenough, K.C.M.G., Major The Marquess of Winchester, Otto Beit, H. Wilson Fox, M.P., Baron H. R. d'Erlanger, D. O. Malcolm, Brig.-Gen. Hon. E. Baring, C.V.O., The Duke of Abercorn.

*Secretary*, , *Assistant Secretary*, A. P Miller, *Registrar*, R. C. Bolton.
*Chief Accountant*, F J Baird, A.C.A.
*Head Office*, 2 London Wall Buildings, E.C. 2.
*Emigration and Information Office*, 166 Strand, W.C. 2.
*Capetown Agency*, F R. Philip, Rhodes Buildings, Cape Town.
*Commercial Representative in South Africa* (*Bulawayo*), W Olive (*acting*).
*Resident Mining Engineer in Rhodesia*, A. H. Ackermann, Bulawayo.
*Director of Land Settlement*, F W Inskipp, Salisbury (*acting*).
*Administrators*, *Southern Rhodesia* (Salisbury), Sir Drummond Chaplin, K.C.M.G., *Northern Rhodesia* (Livingstone), L. A. Wallace, C.M.G.

### Area and Population

| | Sq. m. | Pop. |
|---|---|---|
| Southern Rhodesia (Salisbury) | 149,000 | 796,300 |
| Northern Rhodesia (Livingstone) | 291,000 | 877,100 |

The total area of Rhodesia is about 440,000 square miles, the total population being estimated at 1,673,400 in 1926. The territory is named after *Cecil Rhodes*, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south.

### Communications.

*Railways*.—The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, *viâ* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (300 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 394 miles. The section from Bulawayo *viâ* the Wankie coal fields to the Victoria Falls (280 miles) was completed in June, 1904. The line crosses the Zambezi at the Victoria Falls, traverses Northern Rhodesia, and, crossing the border (307 miles), extends a further 326 miles *viâ* Kambove towards Bukama, in the Belgian Congo State. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (98 miles), and has been extended to Sinoia (35 miles). A standard-gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (72 miles). A line connects Gwelo with Selukwe (34 miles), another runs from Bulawayo *viâ* Gwanda to West Nicholson (202 miles), opening up the mining district to the south-east; another connects Bulawayo with the Matopo Hill, where the founder of Rhodesia is buried, and a branch line from Gwelo to Enkeldoorn has been established to Victoria (103 miles).

*Telegraphs*.—The *African Transcontinental Telegraph Line* ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 2,240 miles from the Cape.

### Southern Rhodesia.

*Area and Population*.—The total area is 149,000 square miles, and the estimated population (1926), 776,300, of whom 31,500 are Europeans. The native population is estimated at 740,000, with 4,000 Asiatics and other coloured persons, including those of mixed race.

*Constitution*.—Southern Rhodesia is administered by the Company under the Charter of 1889, amplified from time to time by Orders in Council. The Administrator is advised by an Executive Council consisting of the Resident Commissioner and not less than three members, appointed by the Company with the approval of the Secretary of State for the Colonies. There is a Legislative Council consisting of the Administrator, the Resident Commissioner (*ex officio*), and 28 members, of whom six are nominated by the Company with approval of Secretary of State, and 22 are elected by the registered voters. A Supplemental Charter was issued on March 23, 1923, giving effect to the arrangement to which the Directors of the Company had agreed to render possible the establishment of Responsible Government in Southern Rhodesia, should the Legislative Council desire it, and should H.M. Government concur at some date other than that the Charter permits.

The laws in force in the Cape Colony up to June 20, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner and by ordinances passed by the Legislative Council. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

*Industrial Progress*.—Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold workers. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and for the cultivation of European fruit-trees, cereals, and vegetables, in addition to tobacco and the indigenous products of the country. The best breeds of cattle are constantly restocked by importation of pedigree stock.

The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1926, was of the value of £36,380,630. The output for the year ended December 31, 1926, was valued at £3,894,311. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, and other minerals have also been produced in considerable quantities.

Administrative revenue, 1926-27 ..... £944,600
Administrative expenditure, 1926-27 ..... £881,496

Salisbury, the seat of government, is situated on the Mashonaland plateau, 4,880 ft. above sea-level (white population, census, 1921, 3,678). Bulawayo, the largest town in Matabeleland, 4,460 ft. above the sea-level, had a white population of about 4,800 in 1926.

### Northern Rhodesia.

This territory, a large portion of which was first opened to British influence by David Livingstone, is partly occupied by the native tribes living under their own chiefs, but large tracts are being opened up for European settlement. Nearly 2,000,000 acres of land are [illegible]

settlement by white farmers, whose operations are chiefly stock-raising, over 30,000 head of cattle are being grazed by them. Extensive mineral deposits, copper in particular, have been discovered. Indigenous rubber is found in large areas. The country is well timbered, and well watered by the Rambesi and Kafue rivers and their affluents. There are large herds of native cattle. Game is also abundant.

The total area is about 291,000 sq. miles, and the population was estimated in 1926 at 877,100, of whom 2,100 are Europeans.

## SWAZILAND

(*The Swaziland Protectorate.*)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). By the Convention of 1894, Swaziland was placed under the administration of, but not incorporated with, the South African Republic, the British Government now controls the Territory. The total area is 6,678 square miles, and the population (1921) 99,930, of whom 1,089 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet, the Middle Veld, about 2,000 feet lower, and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

On June 29, 1903, an Order in Council was issued conferring on the Governor of the Transvaal authority over Swaziland, and by Order in Council of December 1, 1906, this authority was transferred to the High Commissioner for South Africa. A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The Paramount Chief, Sobhuza, son of the late Paramount Chief Bunu, is a minor about 19 years of age, and the regency is in the hands of his grandmother, Labotsibeni, widow of Mbandeni.

The numerous mineral and land concessions and monopolies granted by Mbandeni, of which many of the latter carried exemption from Customs dues or invested private individuals with powers properly exercisable by the Crown, rendered satisfactory government difficult. A Commission was therefore appointed under Proclamation to inquire into these concessions and monopolies. Under this Proclamation the High Commissioner has exercised the power to expropriate monopolies conferring exclusive rights, compensation for which has been made out of loans raised for the purpose. The Commission also determined the validity and extent of all concessions. In order to avoid the exercise of conflicting interest by Europeans and natives over the same area, a Special Commissioner was appointed by Proclamation to demarcate certain areas for the sole and exclusive use of natives. Under this Proclamation the agricultural and grazing rights of the natives have been fully safeguarded. A general survey of the country took place in connexion with the work of the Concessions Commission and the Special Commissioner. The sum of £177,932 has been spent on the expropriation of monopolies and in connexion with the Swaziland Concessions Commission and the demarcation of native areas.

The soil is generally fertile, particularly so in the Low and Middle Veld, but pastoral pursuits are followed more than agricultural, though there are indications that more attention will be paid to the latter now that the certainty of land tenure has been determined. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were 238,000 head of cattle in the Territory at the end of March, 1927.

In the winter season between 150,000 and 200,000 sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the sub-tropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended March 31, 1927, 4,633 ozs. fine gold, valued at £19,681, and 659 tons of cassiterite tin, valued at £46,732, were exported. In addition to any rentals payable on the concessions, gold is subject to a tax of 10 per cent. on profits, and base metals to a royalty of 2½ per cent. on output.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. This is the only town in the Territory. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are nine schools for Europeans at various centres, and the Government has established a school for natives at Zombodze, the kraal of the Regent, at which, until recently, the young Paramount Chief attended. Sobhuza is now continuing his studies at the Lovedale Institute, in Cape Colony. There is also a school for coloured children. The total amount spent on education for the year ended March 31, 1927, which includes grants to native missions, was £2,179.

There is a bi-weekly communication by coach and motor-car between Mbabane and Breyten, on the Springs-Ermelo railway, a distance of 89 miles. Elsewhere the communication is by runners. There are ten post offices, and a telegraph office at Mbabane, Pigg's Peak, Bremersdorp, and Ezulwini.

## STRAITS SETTLEMENTS.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements* (Singapore, Penang, Malacca, Labuan, Cocos Islands, and Christmas Island), the *Federated Malay States* (Perak, Selangor, Negri Sembilan, and Pahang), the *Feudatory Malay States* (Kelantan, Trengganu, Kedah, Perlis or Palit, and Brunei), and the Protected *State of Johore*.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan. These Settlements have an entire area of about 1,800 square miles, with a population (1911) of 714,060.

The Government consists of a Governor, assisted by an Executive Council of 7 members, and a Legislative Council of 20 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang respectively. The Resident Councillor of Penang has a seat in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1912 amounted in Singapore to 85·84 inches, in Penang to 89·34 inches, and in Malacca to 84·27 inches.

The exports comprise—gutta-percha, gambier, pepper, India-rubber, horns, hides, canes, para rubber, shells, sago, tapioca, spices, dye-stuffs, copra, rattans, coffee, gums, tin, preserved pineapples, &c.

The chief imports are rice, cotton piece goods, opium, petroleum, and coal.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width, its length is about 27 miles, and its breadth 14 miles, it comprises, with the adjoining islets, an area of 217 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 18′ N. and long. 103° 52′ E., with 303,321 inhabitants in 1911. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year.

The number of merchant vessels entered and cleared in 1913, exclusive of native craft, was 21,892, with a tonnage of 23,214,298. The total for the whole colony was 28,324, with a tonnage of 29,528,632. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 32,328 (tonnage, 2,321,862). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and the Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $20,000,000. The King's Dock (opened in 1913) is the largest cast of Suez, being 950 feet long, 100 feet wide, and 34 feet deep; its cost was $3,500,000.

Singapore is a free port, no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The aggregate trade returns for 1912 (including inter-settlement trade) amounted to $880,283,000, the value of exported tin being $92,407,684.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 20′ N. lat. and 115° 20′ E. long., and forms part of the Settlement of Singapore. Its area is about 28 square miles; and its population in 6,345. It was ceded to Great

* Exclusive of coasting traffic.
† 4½ per cent. S.S. Unsettled Stock.
‡ 6 per cent. S.S. War Loan Bonds.

Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloths, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal place, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1906), $1,427,497; exports, $1,982,321.
Resident, F W Douglas.

*The Cocos-Keeling Islands* are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The population is about 700, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

CHRISTMAS ISLAND, in the Indian Ocean, about 1200 miles south-west of Java, and 700 miles east of the Cocos-Keeling Islands, has an area of about 96 square miles and a population of about 1,500. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1906 was 44,000 tons.

PENANG is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (population, 1911, 247,333), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (population 1911, 128,976), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 26' N., long. 100° 20' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India, now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. The aggregate trade for 1906 (including inter settlement trade) amounted to $260,288,547, the export of tin from the port being $46,303,407 in 1906.

*Province Wellesley* is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1798, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices, tapioca, and rubber plantations.

*The Dindings Territory* (area 185 square miles, population in 1911, 7,488) is at present little developed, but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 20 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 100 miles to the N.W of Singapore, comprises an area of about 700 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The population in 1901 was 124,082.

Aggregate trade, 1906..... ... ..... $56,623,077
(Including para rubber, $22,732,139, exported in 1906.)
Singapore, distant 8,700 miles, transit, 22 days.
Penang, 20 days, and Malacca, 23 days.

## TRINIDAD and TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 2' — 10° 50' N. lat. and 60° 56' — 61° 56' W long., and is about 63 miles in length by 54 in breadth, with an area of 1,861 square miles (470,887 acres cultivated), and a population at the Census of 1911 of 333,429 (including Tobago). The estimated population on Dec. 31, 1918, was 372,876. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 66,000), is one of the finest towns in the West Indies, with sewerage, electric lighting, trams and telephone services. Other towns of importance are San Fernando (pop. 9,988), about 30 miles south of the capital; Princestown (pop. 4,499), and Arima (pop. 4,000). A remarkable phenomenon is the asphalt lake near the village of La Brea, 115 acres in extent, containing an apparently inexhaustible supply, in 1913, 113,644 tons (£178,972) were exported. The soil is rich and productive, the most important products being sugar, cocoa, molasses, rum, and cocoa-nuts, and various kinds of timber and fruits. The chief exports (1906) were sugar 37,784 tons, value £1,257,389, rum 554,080 gallons, value £90,842, molasses 926,800 gallons, value £27,180, bitters 82,712 gallons, value £22,712, cocoa 52,892,092 lb., value £1,637,208, *cocoanuts* 17,829,207, value £96,824, and copra 2,139,648 lb., value £42,792. Coal is found in Manzanilla, and is indicated in other parts of the island. The petroleum industry has made considerable advances, boring operations being carried on by 11 different companies. There are 124 miles of railway open, and waterworks and sewerage operations have been established. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

OIL INDUSTRY.—The development of the oilfields is progressing satisfactorily. Six large and wealthy companies, besides smaller ones, are busily engaged in prospecting and boring for oil. 14,172,889 gallons of crude oil and 170,760 gallons of petrol spirit (gasoline) were exported in 1918. Six refineries are being operated, two of which are producing oil fuel to Admiralty specifications. Considerable quantities of petrol and kerosene are also manufactured both for the local market and for export. An oil bunkering trade is also being carried on.

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9′ N. lat. and 60° 49′ W long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 220 miles S.S.W. of Barbados; is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population (Census 1911) of 20,749. It is one of the most healthy of the West Indies; the temperature varies from 80° to 86°.

There are two towns in the island, viz., Scarborough (pop. 729) and Plymouth (pop. 532).

CAPITAL, Port of Spain (pop. 66,000); transit, 24 days.

## TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2′ W. discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The population numbers about 100, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length, the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ½ m. wide, and rises in two peaks, 960 and 1,040 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ S. and 9° 44′ W., lies about 250 miles S.S.W. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

## TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-west of which they are distant about 600 miles. They have an area of about 170 square miles. The population in 1911 was 5,613, of which the principal island, Grand Turk, contains 1,681. Salt is the principal industry of the islands, and Sisal hemp and sponges are exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and to also a Court of Appeal.

## UGANDA.

(*The Uganda Protectorate.*)

A British Protectorate over the territory of Uganda was proclaimed in the *London Gazette* of June 19, 1894, and included only the country subject to King Mwanga, known as Buganda, bounded by the territories known as Bunyoro, Banyoro, Ankole, and Toro. This Protectorate has since been extended, and now includes Ankole, Toro, and Kigezi, which form the Western Province, Bunyoro the territories east of the latter to the south boundary of the Sudan and the land on the west bank of the river between this Nile, the Belgian Congo Frontier and the Sudan (south-

† For the time months, April-Dec., 1916. The financial year was changed to coincide with Calendar Year as from Jan. 1, 1916.

ing the *Northern Province*, the districts of Busoga, Bukedi, Teso, Lango, and Karamojo forming the *Eastern Province*, and the territory between Lake Rudolf and the south boundary of the Sudan and the eastern boundary of the Northern Province, which is known as the *Rudolf Province*. The Buganda Province lies on the north-west shore of Lake Victoria, about 600 miles by railway and steamer from Mombasa, the coast port. It is situated on and to the north of the Equator. Bunyoro lies further to the north between the Victoria Nile and Lake Albert. The Eastern Province extends from the Victoria Nile to Mount Elgon and the N.W. boundaries of the East Africa Protectorate. Toro lies to the W. of Buganda, and Ankole to the S.W. The population in March, 1921, was estimated at a total of 2,954,861—809 Europeans, 3,548 Asiatics, and 2,950,504 natives. The total area is 109,119 miles (93,742 land and 15,377 water).

The principal town of Buganda is Kampala, but the headquarters of the Protectorate Administration is at Entebbe, 25 miles distant, on the shores of Lake Victoria. The port on Lake Victoria for Kampala is Port Bell, which is connected with Kampala, 7¼ miles away, by a railway. The export trade, which is increasing, is mainly in cotton, £748,914; coffee, £172,830; shillies, £27,308; ghee, £18,320. The trade in ivory has decreased owing to the war. The principal imports in 1916–17 were:—yarns and textiles, £238,286; provisions, £140,873; cotton blankets, £30,984; bicycles, £17,022; apparel, £12,859; bags and sacks, £24,389; soap, £24,282; petroleum, £15,068; agricultural implements, £13,930; stationery, £11,332. Uganda is connected by telegraph with Mombasa (E. Africa Protectorate), and there are six Government steamers on Lake Victoria, including two of 600 and two of about 1,200 tons displacement. There are three stern-wheel steamers on Lake Kioga, and one paddle-steamer, a launch and several sailing craft on Lake Albert.

A railway 64 miles in length has been constructed between Jinja, in Busoga, and Namasagali, at the entrance of the Nile on Lake Kioga. Motor transport is increasing with the development of the country, and regular services are established in the Buganda Province, the Eastern Province and in the Northern Province on the system of roads constructed for the purpose.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son, Daudi Chwa, was declared King of Uganda, with a native council of regency. King Mwanga died in May, 1903. In Sept., 1897, a mutiny broke out among the Sudanese troops in the Protectorate, which was only suppressed after several months' fighting, in circumstances of great difficulty and danger, in which several British officers lost their lives (Parly Paper, Africa, No. 10, 1898). The military forces have since been completely reorganised.

*The Uganda Railway.*—A survey of the route to be followed by a railway to connect Uganda with the coast at Mombasa was made in 1892. In 1896 construction was commenced, and the last rails were laid at the terminus on Victoria Nyanza (582 miles) on December 20, 1901, on which date the first locomotive completed the journey from the sea to the lake. The administration of the railway (with the Busoga railway and railway marine, and the Kampala Port Bell railway) is under the management of the Uganda railway in the East Africa Protectorate. A three-wire telegraph line has been erected along the railway, and this is linked to the Uganda system which connects all principal administrative posts by telegraph with the Government head quarters at Entebbe. A volunteer reserve has been organised which was called out for local defence purposes after the outbreak of war.

## WEIHAIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37° 30 N., longitude 122° 20 E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1911 of 147,177, to which are included 1,200 resident on the islands of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 122° 40—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the port of Shanghai.

*Commissioner*, Sir J. H. Stewart Lockhart, K.C.M.G.

*Judge of the High Court*, Hiram Parker Wilkin son.
*Crown Attorney*, Allan G. Mossup.
*Senior District Officer and Magistrate*, R. F Johnston.

*Financial Assistant*, P. D. Crawley
*Inspectors of Police*, A. Whittaker, F Forrey, G H. Jennings.
*Medical Officers*, W. M. Musi, M.B., H. W Bell, M.B.

### WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian Islands includes Barbados, St. Lucia, St. Vincent, the Grenadines, Grenada, and Tobago. Of these, Barbados is a separate colony with its own governor, and Tobago is attached to Trinidad. The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 908 square miles, with a population (Census 1911) of 157,264. There is one Governor for the three islands but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury There is a Court of Appeal, consisting of the judges of the three colonies and of Barbados, a common Audit, and a common Lunatic Asylum, but, with this exception, each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

*Governor and Commander-in-Chief*, Sir G. R. Haddon-Smith, K.C.M.G. .. .. £2,500

### GRENADA
(AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30–12° 36' N lat. and 61° 20'–61° 36' W long., and is about 21 miles in length and 12 miles in breadth., it is about 95 miles north of Trinidad, 68 miles S.S.W of St. Vincent, and 100 miles S.W of Barbados. Area, about 85,120 acres, population (including some of the Grenadines), 64,730 (1911). The country is mountainous and very picturesque, and the climate is healthy Grenada was discovered by Columbus in 1498, and named Concepción. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,484 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1911), 6,886.

### ST LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N lat. and 60° 58' W long., at a distance of about 90 miles W N W of of Barbados, 21 miles N of St. Vincent, and 22 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (1916-17) of 53,013. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1916) are sugar (89,304 cwt.), rum (18,136 gals.), cocoa (14,875 cwt.) —which is now extensively cultivated—fuel, and sticks. Limes are being planted, and the industry promises to become important. In 1916, 18,123 gallons of lime juice were exported. The chief places are Castries, the capital (pop. 1911 6,268), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1916, 446 steamers (tonnage 1,181,294) entered Port Castries.

### ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10' N lat. and 61° 19' W long., is 18 miles in length and 11 in breadth, comprising an area with its dependencies, of 150 sq. miles, and a population (March 31, 1916) of 48,232. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1763 it was secured to Great Britain

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, copra, cloves, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

## ZANZIBAR.

*(The Zanzibar Protectorate.)*

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tungbi Bay and north as Warsheikh, but since the cession of the coast-line from Ravuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1894, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 10 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the *administration of H.M. Government* through the Governor and Commander-in-Chief in the East Africa Protectorate (q.v.). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1867) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

The principal imports are piece-goods, ivory, copra, groceries, rice, and coal; the exports are ivory, cloves, copra, hides, gum-copal, and many minor articles.

The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. There is direct communication with the United Kingdom by the Union Castle and Elderman-Harrison Lines, and also a monthly cargo service by the British India Steam Navigation Company. There are through steamers to and from Europe of the Messageries Maritimes, and a three-weekly service to and from Bombay.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1912) was 278,814, the area of the former 640 square miles, and of the latter 380 square miles.

Trade of the *Port of Zanzibar* in 1916 —

| Country | Imports from. | Exports to. |
|---|---|---|
| | £ | £ |
| British India | 908,804 | 221,473 |
| U.K. | 299,449 | 180,882 |
| France | 5,880 | 107,878 |
| South Africa | 20,402 | 40,758 |
| Netherlands | 49,907 | — |
| U.S.A. | 47,000 | 41,868 |
| E. Africa Protectorate | 68,714 | 67,208 |

The number of ocean-going steamers which entered the port in 1916 was—British 75, French 24, Norwegian 4, Italian 2, others 4, the total tonnage being 434,738, and 3,859 dhows (49,302 tons) entered the port in 1916.

Imports, 1916, £1,499,800; exports, £1,038,267.

Imports from U.K., 1916 — ... ... ... £299,907
Exports to U.K., 1916 — ... ... ... £22,429

*Sultan*, H.H. Seyyid Khalifa bin Harub, K.C.M.G., succeeded his brother-in-law, Dec. 9, 1911.
*High Commissioner*, H.E. Sir H Conway Belfield, K.C.M.G., *Governor East Africa Protectorate* ... ... ... ... ...

*Judge of H.B.M. Court*, J W Marison ... 1,000

Zanzibar is distant 6,890 miles; transit, 20 days.

## STATE CONTROL OF COAL.

THE Government has now full control of the coal mines of the United Kingdom. Following upon a threatened strike in the South Wales coalfield on a question of wages, an Order in Council was made operative as from 29 Nov., 1915, giving the Board of Trade possession of the coal mines in the affected area. From one coalfield to the control of all was only a step, and after some agitation amongst the miners a further Order in Council was made on 22 Feb., 1917, to apply to all coalfields in the country. Mr. Guy Gaisford was appointed Controller.

The terms of settlement, notwithstanding long negotiations between the Government and the Mining Association and Coal Owners, have not been arrived at satisfactorily. Conditions vary in the various coalfields so much that a flat rate is not considered fair. Parliament has (Oct., 1917) the arrangements under consideration, and basis of the compensation to the mine owners is to be put in the direction of the continuance of ordinary profits as before the war. In the case of excess, about 80 per cent. of the increased profit will be paid over to the State. It should be understood that the nation is not buying the coal mines—it is simply controlling them for the purpose of the war in the same manner as the railways.

| 1900 | 66,809,196 | 9,185,279 | 75,994,575 | 13,422,885 | 21.47 |
| 1910 | 81,731,957 | 10,040,309 | 91,972,266 | 15,977,691 | 21.02 |

### IMMIGRATION

Statistics concerning the arrival of aliens are available for nearly a century, but the Government exhibits little interest in those who leave its shores. Since 1900 over 22,000,000 alien passengers have arrived in the U.S. The following figures (from the *Statistical Abstract*) show the number of arrivals at certain periods from 1820–1913 —

| Year. | Immigrants. | Year. | Immigrants. |
|---|---|---|---|
| 1820 | 8,385 | 1906 | 1,100,735 |
| 1840 | 84,066 | 1907 | 1,285,349 |
| 1850 | 369,980 | 1908 | 782,870 |
| 1860 | 153,640 | 1909 | 751,786 |
| 1870 | 387,203 | 1910 | 1,041,570 |
| 1880 | 457,257 | 1911 | 878,587 |
| 1890 | 455,302 | 1912 | 838,172 |
| 1900 | 448,572 | 1913 | 1,197,892 |
| 1905 | 1,026,499 | | |

### MARRIAGE AND DIVORCE

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are grounding offences.

| Year. | Marriages. Total. | Divorces Granted. To Wife. | To Husband. | Total. |
|---|---|---|---|---|
| 1887 | 483,069 | 18,250 | 9,720 | 27,970 |
| 1892 | 577,870 | 24,000 | 12,377 | 36,377 |
| 1897 | 602,350 | 29,934 | 14,765 | 44,699 |
| 1902 | 745,733 | 41,424 | 20,458 | 61,882 |
| 1903 | 786,130 | 43,604 | 21,302 | 64,906 |
| 1904 | 781,145 | 44,000 | 20,589 | 64,589 |
| 1905 | 801,567 | 45,736 | 20,000 | 65,736 |
| 1906 | 823,290 | 48,807 | 23,468 | 72,260 |

### BIRTHS AND DEATHS.

There are no complete statistics of Births or Deaths. The former are practically ignored, while the latter are reported only in the "Registration Area," which covers little more than half the United States. The following table shows the Deaths recorded in the Registration Area for the decade 1903–1912 —

| Year. | Deaths (Reg. Area). | Year. | Deaths (Reg. Area). |
|---|---|---|---|
| 1903 | 504,413 | 1908 | 600,000 |
| 1904 | 550,320 | 1909 | 596,256 |
| 1905 | 556,883 | 1910 | 614,000 |
| 1906 | 578,000 | 1911 | 620,000 |
| 1907 | 587,094 | 1912 | 638,492 |

## PHYSIOGRAPHY

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30′ West, its northern boundary being Canada and the southern boundary Mexico

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers The rivers flowing into the Atlantic and Pacific Oceans are comparatively small, among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows —Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877, and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads, west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut, and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminum, the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver), while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

## HISTORY

EARLY COLONISATION —A natural factor, the great expanse of ocean which divides the American continent from Asia, has saved America from Asiatic domination; and it required many centuries of progress before the European adventurer dared to attempt the passage of the narrower Atlantic. The aboriginal inhabitants were comparatively few in number, and being generally backward in development, except in Mexico, have left few permanent traces of their presence.

American history may therefore be said to commence with the colonising expeditions from Europe in the sixteenth and seventeenth centuries, for, although *Columbus* discovered America in the fifteenth century (Oct. 12, 1492), no definite European settlement was attempted until the last quarter of the sixteenth century, when England, Holland, Sweden, France, and Spain made determined efforts to bring into account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount

influence, through their natural aptitude for colonisation, which continues to distinguish that race (and in a greater degree the Scotch) amongst the nations of Europe. In the seventeenth century a chartered company founded *Jamestown* (1607), and many Royalist settlements were established in the district which had been named *Virginia*, after Queen Elizabeth, in the previous century. But step by step with the Church and Royalist foundations in the south a similar series of Puritan and Separatist centres was established in the north. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire, and other east coast English towns, and *New England* became rapidly prosperous. Between these two settlements the Dutch had established themselves in *New Netherlands* (1621), and the Swedes in *New Sweden* (1638). Other English foundations were *Maryland* (1632), *Carolina* (1663), *New York* (1664), *New Jersey* (1665), and *Pennsylvania* (1681). From that date Continental enterprise may be said to have ceased for half a century, and *Georgia* (1732) was the last of the English settlements.

Eighteenth Century.—A continuous struggle was waged between the English and French settlements in America, but until the *War of 1754–1763* little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. It secured the possession of the Pacific coast for the inhabitants of the Atlantic slope, and roused the interests of the British Government in the possibilities of its American colonies. The Home Government endeavoured to recover from the colonies part of the cost of the war by which their existence had been secured, but "taxation without representation" was bitterly resented. In December, 1773, some English ships laden with tea arrived in the harbour of Boston, where a non-importation agreement was strictly enforced. A mob of colonists, disguised as Indians, boarded the vessels and threw their contents into the sea. This *Boston Tea Party* of December 16, 1773, remains as an outstanding incident in the quarrel between America and Great Britain. In spite of the counsels of Chatham the King persisted in repressive measures, generally with inadequate forces and at inopportune moments. The colonists resisted in arms, and bloodshed ensued at the first engagement at *Lexington*, April 19, 1775, and continued until the *Capitulation of Yorktown*, October 19, 1781, when *Lord Cornwallis* surrendered with the whole of his forces to *General Washington*. When peace was concluded, Sept. 3, 1783, between America and Great Britain, no vestige of territory over which the dispute had raged remained under British rule.

*The Declaration of Independence.*—On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence.* "*We, the representatives of the United States of America, in Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, solemnly publish and declare that these United Colonies are, and of right ought to be, Free and Independent States.*" This Declaration was at length acknowledged by Great Britain, and the United States of America from this beginning has become one of the greatest Powers of the world. The Declaration of Independence was followed by the framing of a *Constitution*, which was ratified in 1787 to 1790 by the 13 *Original States* (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). This Constitution established a legislature of two houses, and vested the executive power in an elective President; and on April 30, 1789, *George Washington* entered office as the first of a line of Presidents of the United States of America.

Nineteenth Century.—The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connexion with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost invariably victorious on the sea. A land engagement at *Chateauguay* on October 26, 1813, gained lasting glory for the troops of Canada, and earlier in the same year—June 1, 1813—a duel at sea between the *Chesapeake* and the *Shannon* did much to restore the prestige of the British Navy. Peace was concluded by the *Treaty of Ghent* on December 24, 1814, after a purposeless war, which Canada alone has reason to remember with satisfaction.

* On April 30, 1819, the Raleigh (N.C.) Register published the following document, said to have been adopted by the Committee of Mecklenburg County, North Carolina, on May 20, 1775, the day after the receipt of the news of the battle of Lexington. "In the third session of the Second Continental Congress, Richard Henry Lee proposed, and John Adams, of Massachusetts, seconded, a resolution declaring the United Colonies free and independent States, and Thomas Jefferson, John Adams, Roger Sherman, and Robert Livingston were appointed a committee to draw up a Declaration of Independence. This famous document, composed almost entirely by Jefferson, was adopted unanimously on July 4, 1776."

*The Gold Rush.*—In 1846 a dispute arose between the United States and Mexico in connexion with the boundaries of *Texas*, recently (1845) admitted as a State of the Union, and after hostilities of several months the war ended in the *Treaty of Guadalupe Hidalgo* (1847). Under this treaty Mexico surrendered the disputed portions of Texas and New Mexico, part of Arizona, and *California*. In 1848 immense excitement prevailed through the discovery of gold in Upper California, and a great rush of goldseekers entered the newly acquired territory, which remains the principal gold-producing State of the Union.

*The Civil War.*—Among the industrial classes of America in 1860 nearly 4,000,000 were negro slaves, descendants of those planted in the Colonies by Britain. The question of their emancipation led to a bitter dispute between the Northern and Southern States of America, the latter seceding from the Union in 1861. Two years earlier *John Brown*, an advocate of emancipation, had embittered the relations between the North and South by a raid upon the *Government arsenal at Harper's Ferry*, which he captured and held until forced to surrender; and although he was hanged by the Government his object was eventually achieved by President Lincoln's *Emancipation Proclamation* of January 1, 1863. The *Secession of the Southern States* was followed by hostilities, which included many pitched battles, fought with astounding tenacity and prolific slaughter on both sides. The *Battle of Gettysburg*, July 1-3, 1863, and of *Antietam*, Sept. 17, 1862, have never been surpassed for proportional losses of those engaged. Hostilities ceased soon after the surrender of *General Lee* at *Appomattox* on April 9, 1865, and the bitterness engendered by the war was buried in a lasting peace. By a careless observance of the Foreign Enlistment Act Britain permitted the departure from Liverpool of the *Alabama*, which committed depredations upon the Federal shipping, and was also guilty of other acts of negligence. Thus Britain became involved in a dispute which was settled by arbitration under the Treaty of Washington, May 8, 1871, by which she was called upon to pay £3,250,000 damages to the United States. In the four years' war the Confederate (Southern) States lost over 300,000 men by death and disease, while the victorious Federal (Northern) States lost close on 350,000 from the same causes.

*War with Spain.*—The continuous misgovernment of the neighbouring island of *Cuba* brought America into conflict with Spain in 1898. A succession of revolts, which the Spanish forces were unable to suppress, left Cuba the prey to anarchy, and induced the United States to despatch to Havana the warship *Maine*. By accident or design that vessel was destroyed by an explosion (Feb. 15), and the United States declared war against Spain on April 25, 1898. The outcome of the hostilities was the freedom of Cuba and the acquisition by the United States of the Spanish possessions in the *Philippine Islands*, in addition to *Guam* (Pacific) and *Porto Rico* in the West Indies.

Twentieth Century.—On June 28, 1902, Congress appropriated the sum of $40,000,000 for the purchase of all outstanding rights in the work inaugurated on the *Panama Canal*, and on April 28, 1904, a further sum was granted for the purchase of a strip of territory on each side of the proposed waterway from the Republic of Panama. Operations were immediately undertaken, and the Canal was completed in 1913, and was opened to traffic with no inaugural ceremony on August 1, 1914.

*Reciprocity with Canada.*—Conferences between United States and Canadian representatives took place in November, 1910, at Ottawa, and in January, 1911, at Washington, and concurrent legislation in Washington and Ottawa was contemplated with a view to establishing permanent reciprocal trading relations. In view, however, of the change of Government after the Canadian General Election of October, 1911, further progress in the direction of Reciprocity is improbable.

*Anglo-American Arbitration.*—A Treaty of Arbitration between the United Kingdom and the United States was signed at Washington, August 3, 1911, but it was mutilated by Congressional amendments until it became unrecognisable. The original Treaty contained seven Articles, which were stated in the 1912 Edition of *Whitaker's Almanack*. An Anglo-American Peace Commission Treaty was signed by Mr Bryan and the British Ambassador on Sept. 15, 1914.

*War with Germany.*—On April 6, 1917, war was declared against Germany.

## GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 26 were admitted after such organisation), and of 1 organised Territory.

The Constitution.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to fifteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, and March 30, 1870), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

## THE EXECUTIVE.

The *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress, but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the second Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of $75,000, with a travelling allowance of $25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the *consent* of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

### THE PRESIDENT

*President of the United States*, Woodrow Wilson, of New Jersey (*born* at Staunton, Va., 28 Dec., 1856; *educated* at Princeton Univ. 1875–1879; President of Princeton Univ. 1902–1910; Governor of New Jersey 1911–1913), elected 5 Nov., 1912, and came into office 4 March, 1913, until 4 March, 1917, when he was re-elected for a further term. *Democrat.*

1 *Vice-President of the United States* (*and ex-officio President of the Senate*), Thomas Riley Marshall, *of* Indiana (*born* 1854, *admitted* to the Bar 1875, *Gov. of Indiana 1909–1913*)

### THE CABINET

(In order of succession to the Presidency.)

2. *Secretary of State*, Robert Lansing, of New York (*born* 1864, admitted to the Bar 1889), *Secretary of State, ad interim*, 9 to 23 June, 1915, *appointed* 23 June, 1915.
3. *Secretary of the Treasury*, William Gibbs McAdoo, of New York (*born* 1863, admitted to the Bar 1884), *appointed* 5 March, 1913.
4. *Secretary of War*, Newton D. Baker, of Ohio (*born* 1871, admitted to the Bar 1897), *appointed* 7 March, 1916.
5. *Attorney-General*, Thomas Watt Gregory, of Texas (*born* 1861, admitted to the Bar 1885, Special Assistant Attorney-General 1913–1914), *appointed* 19 August, 1914.
6. *Postmaster-General*, Albert Sidney Burleson, of Texas (*born* 1863, admitted to the Bar 1884, member of Congress 1899–1913), *appointed* 5 March, 1913.
7. *Secretary of the Navy*, Josephus Daniels, of North Carolina (*born* 1862, Chief Clerk Dept. of the Interior 1893–95), *appointed* 5 March, 1913.
8. *Secretary of the Interior*, Franklin Knight Lane, of California (*born* 1864, Interstate Commerce Commissioner 1905–1913), *appointed* 5 March, 1913.

*Secretary of Agriculture*, David Franklin Houston, of Missouri (*born* 1866, Chancellor of the Washington University, St. Louis, 1908–1913), *appointed* 5 March, 1913.

*Secretary of Commerce*, William C. Redfield, of New York (*born* 1858, Member of Congress 1911–1912), *appointed* 5 March, 1913.

*Secretary of Labour*, William Bauchop Wilson, of Pennsylvania (*born* 1862, Member of Congress 1907–1913), *appointed* 5 March, 1913.

## DEPARTMENT OF STATE.

(New York and Pennsylvania Aves., Washington, D.C.)

The *Department of State* has cognisance of all matters appertaining to Foreign Affairs, including correspondence with Representatives of the U.S., both diplomatic and consular, and with accredited Representatives of Foreign States in the U.S. The *Secretary of State* is the custodian of the Seal of the U.S., which is affixed by him to all proclamations, to various commissions, and to warrants of extradition; he is also the Custodian of the Laws of the U.S and of Treaties made with Foreign Powers. He grants and issues Passports, and communicates to Congress reports made by Diplomatic and Consular officers of the U.S. He is the medium of correspondence between the President and the chief executives of the States of the Union.

*Secretary of State*, Robert Lansing, *N.Y.* $12,000
*Private Sec.*, Richard Crane, *Ill.* .... 2,500
*Counsellor* Frank L. Polk *N.Y.* .... 7,500
*Assistant Secretary*, William Phillips, *Mass.* .... 5,000
*Second do.*, A. A. Adee, *D.C.* .... 4,500
*Third do.*, Breckinridge Long, *Missouri* .... 4,500
*Director of Consular Service*, W. J. Carr, *N.Y.* .... 4,500
*Chief Clerk*, Ben G. Davis, *Neb.* .... 3,000
*Solicitor*, Lester H. Woolsey, *N.Y.* .... 5,000
*Foreign Trade Adviser*, William B. Fleming, *Ky.* .... 4,500
*Chief, Division of Latin American Affairs*, Herbert Stabler, *Maryland* .... 4,500
*Chief, Division of Mexican Affairs*, Leon J. Canova, *Flor.* .... 4,500
*Chief, Division of Far Eastern Affairs*, Edward T. Williams, *Ohio* .... 4,500
*Chief, Division of Near Eastern Affairs*, Albert H. Putney, *Ill.* .... 3,000
*Chief, Diplomatic Bureau*, S. Y. Smith, *D.C.* .... 2,250
*Chief, Consular Bureau*, Herbert C. Hengstler, *Ohio* .... 2,250

*Chief, Bureau of Indexes and Archives*, David A. Salmon, *Conn.* .... 2,100
*Chief, Bureau of Accounts*, William MacNeir, *Mich.* .... 2,250
*Chief, Bureau of Rolls and Library*, John A. Tanner, *Ohio* .... 2,100

## DEPARTMENT OF THE TREASURY.

(15th Street, Washington, D.C.)

The *Secretary of the Treasury* is charged by law with the management of the national finances. He prepares plans for the improvement of the revenue and for the support of the public credit, superintends the collection of the revenue, and directs the forms of keeping and rendering public accounts and of making returns, grants warrants for all moneys drawn from the Treasury in pursuance of appropriations made by law, and for the payment of moneys into the Treasury, and annually submits to Congress estimates of the probable revenues and disbursements of the Government. He controls the construction and maintenance of public buildings, the coinage and printing of money, the administration of the Coast Guard and the Public Health branches of the public service, and furnishes generally such information as may be required by either branch of Congress on all matters pertaining to the foregoing. He is *ex-officio* chairman of the Federal Reserve Board, created by Act approved December 23, 1913, known as the Federal Reserve Act, *ex-officio* chairman of the Federal Farm Loan Board, created by Act approved July 17, 1916, known as the Federal Farm Loan Act, and president of the central executive council of the International High Commission, and chairman of the United States section of that Commission.

*Secretary of the Treasury*, William Gibbs McAdoo, *N.Y.* .... $12,000
*Assistants*, Oscar T. Crosby, *Va.*; Jr. S. Rowe, *Pa.*; James B. Moyle, *Utah* each 5,000
*Assistant to the Secretary*, George B. Cookman, *D.C.* .... 5,000
*Chief Clerk*, James L. Wilmeth, *Ark.* .... 4,000
*Supervising Architect* (vacant) .... 6,000
*Director of the Mint*, Ray T. Baker, *Ass.* 5,000
*Director, Bureau of Engraving and Printing* (vacant) .... 6,000
*Chief, Appointments Division*, James E. Harper, *S.C.* .... 3,000
*Chief, Book-keeping and Warrants Division*, Charles H. Miller, *Mass.* .... 4,000
*Chief, Customs Division*, Frank M. Halstead, *Wash.* .... 4,500
*Chief, Loans and Currency*, William S. Broughton, *Ill.* .... 3,500
*Register*, Houston B. Teehee, *Okla.* .... 4,000
*Comptroller of the Treasury*, Walter W. Warwick, *Ohio* .... 6,000
*Assistant do.*, Charles M. Force, *Ken.* .... 4,500
*Treasurer of the U.S.*, John Burke, *N. Dak.* .... 6,000
*Comptroller of the Currency*, John Skelton Williams, *Va.* .... 5,000
*Commissioner of Internal Revenue*, Daniel C. Roper, *S.C.* .... 6,000
*Deputy do.* David A. Gates, *Ark.* $4,000, G. E. Fletcher, *La.*, $3,600, Luther F. Speer, *Pa.* .... 4,000
*Solicitor of Internal Revenue*, Ellis C. Johnson, *Wash.* .... 4,500
*Auditor of Treasury*, Samuel Patterson, *Neb.* .... 4,000
*Auditor of War Dept.*, James L. Baity, *Mo.* 3,000
*Auditor of Interior*, Oscar A. Price, *W.Va.* .... 4,000
*Auditor of Navy*, Edward Lucken, *Wis.* .. 4,000
*Auditor of State*, Edward D. Hearne, *Del.* 4,000
*Auditor of Post Office*, Charles A. Kram, *Pa.* 3,500
*Captain Commandant, Coast Guard of the U.S.*, Ellsworth P. Bertholf, *N.J.* 5,000
*Chief of the Secret Service*, Wm. F. Flynn, *N.Y.* .... 4,000
*Supervising Surgeon General Public Health and Marine Hospital*, Rupert Blue, *S.C.* .... 6,000

### *General Customs Appraisers.*

*Appraisers of Merchandise*, Byron S. Waite, *Mich.*; Israel F. Fischer, *N.Y.*; Sam B. Cooper, *Tex.*; Eugene G. Hay, *Minn.*; Charles P. McClelland, *N.Y.*; George Stewart Brown, *Md.*; Jerry B. Sullivan, *Iowa*; and William B. Howell, *N.J.* .... each $8,000

### Federal Reserve Board.

*Governor*, William P. G Harding, *Ala.*, term expires 1922; *Vice-Governor*, Paul M. Warburg, *N Y.*, term expires 1918; Frederick A. Delano, *Ill.*, term expires 1920; A. C. Miller *Col.*, term expires 1924; Charles S. Hamlin, *Mass.*, term expires 1916 ..... each $12,000

The Secretary of the Treasury and the Comptroller of the Currency, *ex officio*.

### DEPARTMENT OF WAR.

(17th Street and Pennsylvania Ave., Washington, D.C.)

The *Secretary of War* prepares estimates of *the expenses of the Department of War*, and supervises the expenditure of all appropriations made by Congress for that Department. He also supervises the Military Academy at West Point, the National Cemeteries, the Board of Ordnance and Fortification, the improvement of rivers and harbours, and matters appertaining to navigation. He approves the planning and construction of bridges over navigable waters as authorized by Congress, and is responsible for the construction of the Panama Canal.

*Secretary of War*, Newton D. Baker, *Ohio* ..... $12,000
*Private Sec.*, Ralph A. Hayes, *Ohio* ..... 2,500
*Assistant Secretary*, William M. Ingraham, *Va.* ..... 5,000
*Assistant and Chief Clerk*, J. C. Scofield, *Ga.* ..... 4,000
*Chief of Staff*, Gen. Tasker H. Bliss ..... 10,000
*Adjutant-General*, Maj.-Gen. Henry P McCain ..... 8,000
*Inspector-General*, Maj.-Gen. John L. Chamberlain ..... 8,000
*Judge-Advocate-General*, Maj.-Gen. E. H Crowder ..... 8,000
*Quartermaster-General*, Maj.-Gen. Henry G Sharp ..... 8,000
*Surgeon-General*, Maj.-Gen. William C. Gorgas ..... 8,000
*Chief of Engineers*, Maj.-Gen William M. Black ..... 8,000
*Chief of Ordnance*, Maj.-Gen. William Crozier ..... 8,000
*Chief Signal Officer*, Maj.-Gen. George O. Squier ..... 8,000
*Chief of the Bureau of Insular Affairs*, Brig.-Gen. Frank McIntyre ..... 8,000

### DEPARTMENT OF JUSTICE.

(K Street and Vt. Ave., N W., Washington, D.C.)

The *Attorney-General* is the chief law officer of the Government and head of the Department of Justice. He advises the President and the chief executive officers on legal questions arising out of their administration, and generally supervises the U.S. attorneys and marshals in judicial districts. He provides special counsel when required to do so by a department of the Government of the U.S.

*Attorney-General*, Thomas Watt Gregory, *Tex.* ..... $12,000
*Private Sec.*, John T. Suter, *D C* ..... 2,000
*Solicitor-General*, John W Davis, *W Va.* ..... 10,000
*Assistant to Attorney-General*, George Carroll Todd, *N Y* ..... 5,000
*Assistant Attorneys-General*, Samuel Huston Thompson, jr., *Col.*, Samuel J Graham, *Pa.*; Charles Warren, *Mass.*, Francis J Kearful, *D.C.*, Wm. C. Fitts, *Ala.*; Wm. L. Frierson, *Tenn.* ..... each 7,500
*Solicitor, State Department*, Lester H. Woolsey, *N Y* ..... $6,000
*Solicitor, Post Office Dept.*, William H. Lamar, *Md.* ..... 5,000
*Solicitor, Interior Dept.*, Charles D. Mahaffie, *Oregon* ..... 5,000
*Assistant A G, Court of Customs Appeals*, Bert Hanson, *N Y* ..... 5,000
*Solicitor of the Treasury*, Lawrence Becker, *Ind.* ..... 5,000
*Solicitor, Internal Revenue*, Ellis C. Johnson, *Wash.* ..... 5,000
*Solicitor, Dept. of Commerce*, Albert Lee Thurman, *Ohio* ..... 5,000
*Solicitor, Dept. of Labour*, John B. Densmore, *Mont.* ..... 5,000
*Chief Clerk*, Charles E. Stewart, *Ala.* ..... 3,500
*Attorney in charge of Titles*, Chas. S. Lawrence, *Tenn.* ..... 5,000
*Chief, Division of Accounts*, Calvin Sattertield, *Penn.* ..... 2,500
*Disbursing Clerk*, James H. Mackey, *Col* ..... 2,750
*Attorney in charge of Pardons*, James A. Finch, *N Y* ..... 3,000
*Supt. of Prisons and Prisoners*, Francis H. Dunlay, *D C* ..... 4,000
*Appointment Clerk*, C B. Bornborger, *Va.* ..... 2,000

### POST OFFICE DEPARTMENT

#### Office of the Postmaster-General.

*Postmaster-General*, Albert S. Burleson, *Texas* ..... $12,000

### THE ARMY OF THE U.S.

The total enlisted strength of the Army of the United States was, before the declaration of war, prohibited by law from exceeding 100,000 at any one time, and it was recruited by voluntary enlistment. The establishment consisted of 15 regiments of cavalry, 6 of field artillery, 170 companies of coast artillery, 3 battalions of engineers, 30 regiments of infantry, the Porto Rico Regiment, and various staff corps and detachments. The actual strength, June 30, 1915, was—(1) Regular Army and Porto Rico Regiment, 5,001 officers, 92,873 enlisted men; (2) Philippine Scouts, 282 officers, 5,733 others. There were also the Hospital Corps, 4,412, and the Quartermaster Corps, 6,000 enlisted men.

There were also State Militias, with an establishment of 9,109 officers and 129,109 enlisted men, and an effective strength in 1915 of 132,208.

The cost of the Army of the United States in 1915 was $101,673,000, which is exclusive of the States' expenditure on their militias and of the disbursements on account of pensions.

On the declaration of war the regular army was increased to 287,000 men and the Militia to 625,000.

Under the President of the United States the controlling authority is the Secretary of War, who has the aid of an Assistant Secretary and a Chief of the Staff

On April 6, 1917, the United States declared war against Germany; since which date enormous preparations have been made for entering on hostilities. Conscription has been adopted (in the Senate by 81 votes to 8 against, and by the House of Representatives by 397 to 24 against), and 2,000,000 men have already joined the colours, to be increased to 10,000,000 if required. The Navy has been very largely increased and a war expenditure of £2,800,000,000 had been sanctioned up to Oct. 6. Loans to the Allies up to Oct. 13, 1917, amounted to £340,080,000.

## U.S. WAR PENSIONS, 1880–1915.

| Year. | Number of Pensioners on Roll. | | | Total Payments. |
|---|---|---|---|---|
| | Invalids. | Widows, &c. | Total. | |
| | | | | $ |
| 1880 | 144,430 | 108,391 | 250,800 | 56,089,229 |
| 1890 | 415,644 | 320,290 | 737,944 | 106,082,890 |
| 1900 | 792,811 | 441,029 | 993,329 | 138,462,179 |
| 1905 | 777,761 | 480,680 | 998,441 | 141,141,881 |
| 1910 | 672,597 | 513,637 | 996,234 | 161,678,703 |
| 1911 | 670,196 | 520,298 | 990,494 | 159,974,098 |
| 1912 | 677,196 | 530,298 | 1,007,494 | 157,378,180 |
| 1913 | 678,511 | 547,992 | 1,026,503 | 159,568,434 |
| 1914 | 672,611 | 556,367 | 1,028,978 | 154,171,811 |
| 1915 | 670,332 | 574,918 | 1,045,250 | 170,417,396 |
| 1916 | 657,448 | 590,699 | 1,048,147 | 165,598,988 |

The total disbursement in pensions since the War of Independence is $4,892,472,637, of which $4,624,643,267 has been paid on account of the Civil War. The cost of maintenance and ex penses of administration in 1915 amounted to $2,779,880.

## THE NEW UNITED STATES PROGRAMME.

(The execution of the following programme may have been modified in consequence of the labour, space, and material required for carrying out the emergency destroyer and merchant ship programmes, estimated to cost respectively 30 and 300 millions sterling.)

After discussion extending over several months, the United States Government, in September, 1916, received the necessary authorisation to proceed with the largest and most costly naval programme ever sanctioned for any country. The Act as finally adopted covers the shipbuilding for the financial years (ending June 30) 1917, 1918, and 1919, and makes provision for laying down the following vessels:—

| | In 1917. | In 1918 and 1919. | Total. |
|---|---|---|---|
| Battleships ... ..... | 4 | 6 | 10 |
| Battle-Cruisers ..... | 4 | 2 | 6 |
| Scout Cruisers ..... .. | 4 | 6 | 10 |
| Destroyers ... ..... | 20 | 30 | 50 |
| Fleet Submarines ... | 9 | — | 9 |
| Coast Submarines ..... | 25 | 30 | 55 |

In addition, there were to be begun in 1917 2 fast ships, 2 destroyer tenders, 2 ammunition ships, 2 gunboats, 1 repair ship, 1 hospital ship, and 1 transport. The authorised expenditure for the year 1917 is £65,625,000, as compared with a British vote of £47,250,000 in 1914–15, and, provided the whole of the ships are put in hand, there will necessarily be an increase in succeeding years. Of the vessels to be laid down in 1917, the battleships will be named *Colorado*, *Washington*, *Maryland*, and *West Virginia*, and they will be principally noteworthy for carrying a main armament of eight 16-in. guns, mounted on the same plan as the 14-in. of the *Queen Elizabeth*. It is interesting to note the development of the main battery in American Dreadnoughts:—

| Fleet of Type. | Date L'hed'd. | Tons. | Main Guns. | Broadside. |
|---|---|---|---|---|
| *N. Carolina* ... | 1908 | 16,000 | 8 12-in. | 6,800 lb. |
| *N. Dakota* ... | 1908 | 20,000 | 10 12-in. | 8,500 lb. |
| *Wyoming* ..... | 1911 | 26,000 | 12 12-in. | 10,200 lb. |
| *Pennsylvania* | 1915 | 32,000 | 12 14-in. | 14,400 lb. |
| *New Mexico* ... | — | 32,600 | 8 16-in. | 16,800 lb. |

The new ships will be some 3,000 tons heavier than our Queen Elizabeths, but will be 4 knots below their designed rate of 24, and as the difference in displacement can hardly be accounted for by the increased calibre of the guns, while both groups are of the "all oil" type, it is to be assumed that the American vessels will have superior protection. On that subject, however, nothing has been made public. Converting the dollar at 4s. 2d., the estimated cost of the new battleships complete is £3,250,000. The *Queen Elizabeth*, without her guns, was estimated to cost £2,324,760, while the *Iron Duke* was built outright for £2,080,948, which is equivalent to £83·24 per ton compared with an estimated £120·14 per ton for the Colorados. In the first bids tendered by contractors, the time required for construction varied from 30 to 48 months. The battleships following these will be of 42,600 tons, armed with twelve 16-in. guns.

The battle-cruisers will be very remarkable vessels, their design providing for a length of 890 feet (the *Lion* is only 660 feet), a tonnage of 35,000, and a speed of from 30 to 35 knots with turbine-cum-electric-drive machinery of 200,000 horse-power, working through four shafts. The main armour belt will be 8 in. thick, and the heavy armament will consist of ten 14-in. guns in centre-line turrets. The completed cost of these vessels is estimated at £4,256,384, of which the machinery alone will account for £1,266,666, which is more than the entire cost of the British battle-cruiser *Indefatigable*, or of the battleships *Lord Nelson* and *Agamemnon*. The reason for putting smaller guns into the battle-cruisers than in the battleships is that the former would not, save under very exceptional conditions, be called upon to fight vessels so heavily armoured as battleships, and therefore need not embody such a high degree of smashing power. The scout-cruisers, though displacing only 7,000 tons, will have a length of 600 feet (compare with the 555 feet of our 28,750-ton *Indefatigable*), and are intended for a speed of 35 knots, carrying eight 6-in. and a number of smaller guns. One of their unique features is that each will be equipped to house, launch, and recover four seaplanes—a detail that should add very considerably to their value as scouts. For the destroyers also a speed of 35 knots is intended, and, displacing 1,285 tons, they will be armed with four 4-in. guns and four triple torpedo-tubes. The programme is a very ambitious one, even if the first year's shipbuilding be viewed alone. It must be regarded as in some degree an attempt to make good the leeway of recent years, particularly as regards battle-cruisers and scouts, none of the former having been built at all, and none of the latter since 1908. During the year 1916 the principal additions to the fleet have been the *Pennsylvania* and *Arizona*, the first battleships to carry twelve 14-in. guns, while the degree of completion per cent. on Oct. 1, 1916, of other battleships under construction was as follows: *Idaho*, 64·8; *Mississippi*, 39·9; *New Mexico*, 48·6; *California*, 3·2; and *Tennessee*, 0·8. The number of American Dreadnoughts built, building, and to be laid down in 1917 was 29—one fewer than the corresponding German total at the outbreak of war.

## EDUCATION.

The system of public instruction extends from the kindergarten to the university. Control is vested in the State and local authorities, the only central organization being the Bureau of Education charged with statistical and advisory functions only. The number of illiterates is swollen by immigrants, and by the fact that some 44 per cent. of the coloured population receive no instruction. It is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at public expense. (i.) *Primary.* Ages 8–14 years, *free and* comp. In majority of States, though in all the machinery is fully maintained. Eight grades of public primary schools, numerous kindergartens, and evening continuation classes in towns. Very many and well-equipped private institutions. Public schools are maintained by local taxation, Federal subsidies taking the form of income derived from grants of land. (ii.) *Secondary.* Numerous high schools, both public and private, including many so-called "colleges" and "universities," whose curriculum corresponds rather to that of a German gymnasium or an English public school. A salient feature of the American system is *co-education* of the sexes throughout, there being comparatively few institutions where the tuition is not dual. Powerful aid is afforded by private and philanthropic initiative. (iii.) *Special Schools and Professional Establishments* are too numerous to mention, well-equipped and well-attended. (iv.) *Universities.* Those corresponding most closely to the British definition are California, the Catholic University of America, Chicago, Clark, Columbia, Cornell, Harvard, the Johns Hopkins, Michigan, Pennsylvania, Princeton, Stanford, Virginia, Wisconsin, and Yale.

### EDUCATIONAL STATISTICS.

| Year. | Public Schools (Average Attendance). | Colleges, Universities, and Schools of Technology. | | |
|---|---|---|---|---|
| | | Men. | Women. | Total. |
| 1901 | 12,714,613 | 75,470 | 58,900 | 134,370 |
| 1902 | 12,964,164 | 78,728 | 49,569 | 128,300 |
| 1903 | 13,253,138 | 80,305 | 49,277 | 129,582 |
| 1904 | 13,515,256 | 86,202 | 49,037 | 135,239 |
| 1905 | 13,681,830 | 90,162 | 45,360 | 137,522 |
| 1906 | 13,884,837 | 119,856 | 64,005 | 183,861 |
| 1907 | 14,892,307 | 139,202 | 64,301 | 203,503 |
| 1908 | 15,456,000 | 137,848 | 68,776 | 206,624 |
| 1909 | 15,964,187 | 200,181 | 69,482 | 269,663 |
| 1910 | 15,810,643 | 190,307 | 72,197 | 262,504 |
| 1911 | 14,218,220 | 183,746 | 207,230 | 290,980 |

## FINANCE.

The ordinary revenue and expenditure of the U.S. for the five years ended June 30, 1911, are stated below in dollars ($4·86 = £1 sterling).

| Year | Revenue. | Expenditure. |
|---|---|---|
| 1907 | $1,561,276,464 | $1,504,653,563 |
| 1908 | 1,524,111,230 | 1,663,770,708 |
| 1909 | 1,312,343,720 | 1,100,339,016 |
| 1910 | 1,333,889,180 | 1,241,477,577 |
| 1911 | 1,314,044,430 | 1,192,604,190 |

## RECEIPTS AND EXPENDITURE.

Details of the revenue and expenditure are as follows:—

| — | 1910. | 1911. |
|---|---|---|
| | $ | $ |
| *Revenue*:— | | |
| Customs | 333,488,107 | 311,164,849 |
| Internal Revenue | 443,627,492 | 320,726,029 |
| Miscellaneous | 70,773,230 | 83,776,352 |
| Total | 847,889,130 | 715,667,230 |
| *Expenditure*:— | | |
| Legislative | 13,488,808 | 13,848,007 |
| Executive:— | | |
| Executive Office | 361,134 | 365,940 |
| Dept. of State | 5,253,210 | 6,444,894 |
| Treasury Dept. | 83,003,813 | 73,737,047 |
| War Dept. | 178,732,874 | 166,852,181 |
| Navy Dept. | 140,843,079 | 135,989,293 |
| Interior Dept. | 216,312,438 | 204,365,144 |
| Post Office Dept. | 1,236,200 | 7,270,700 |
| Dept. of Agriculture | 22,208,141 | 22,272,540 |
| Dept. of Commerce | 10,598,882 | 11,403,702 |
| Dept. of Labour | 2,768,904 | 2,537,244 |
| Dept. of Justice | 10,288,152 | 10,682,463 |
| Independent Bureaus | 3,232,280 | 7,221,803 |
| District of Columbia | 12,796,971 | 13,622,898 |
| Total Ordinary | 720,254,492 | 703,456,886 |
| Panama Canal | 34,824,941 | 17,373,708 |
| Public Debt | 28,361,397 | 24,868,973 |
| Postal | 283,338,107 | 306,208,460 |
| Total Disbursements | 1,048,600,861 | 1,051,894,023 |

## PUBLIC DEBT.

The Debt of the U.S. for the five years ended July 1, 1912, is as follows:—

| Year. | Capital (Net). | Interest Charge. |
|---|---|---|
| 1908 | $963,776,770 | $22,767,284 |
| 1909 | 963,706,620 | 22,672,132 |
| 1910 | 967,263,320 | 22,687,497 |
| 1911 | 965,780,090 | 22,502,895 |
| 1912 | 963,279,620 | — |

The Public Debt on July 1, 1913, was as follows:—

| Description. | 1912. |
|---|---|
| | $ |
| 2% bonds | 730,580,130 |
| 2½% bonds | 6,547,600 |
| 3% bonds | 118,996,660 |
| 4% bonds | 118,480,900 |
| Total interest bearing | 963,279,090 |
| On which interest has ceased since maturity | 1,907,260 |
| Bearing no interest (Paper Money) | 2,681,370,229 |
| Total | 3,647,556,579 |
| Cash in Treasury | 1,967,788,267 |
| Total Debt less Cash in Treasury | 1,679,768,312 |

## PRODUCTION AND INDUSTRY

*Agriculture.*—The total land surface, excluding Hawaii and Alaska, is 1,903,289,600 acres, of which in 1910 873,159,000 were farms (478,451,730 acres improved). The total number of farms is 6,340,387, of which about 2,300,000 are between 100 and 500 acres, about 1,500,000 between 50 and 100 acres, and about 1,300,000 between 10 and 50 acres. The total value of the farm produce of the United States in 1910 was estimated at $8,926,000,000—the greatest value ever yet reached, and an increase over 1909 of $304,000,000.

In 1914, 208,172,000 acres were under cereal crops (corn, 103,435,000; wheat, 53,541,000; oats, 38,448,000; rye, 2,542,000 barley, 7,356,000; flax, 1,889,000 buckwheat, 792,000; rice, 703,000), the produce being 2,446,588,000 bushels of corn (23·1 per acre), 763,380,000 bushels of wheat (14·3 per acre), 1,121,768,000 bushels of oats (29·3 per acre), 42,382,000 bushels of rye (16·2 per acre), 178,189,000 bushels of barley (23·8 per acre), 13,898,000 bushels of flax seed (8·3 per acre), 13,633,000 bushels of buckwheat (17·2 per acre), and 24,300,000 bushels of rice (33·9 per acre). There were also 3,798,000 acres under potatoes, the yield being 332,595,000 bushels (90·4 per acre). Nearly 90,000,000 acres were under hay in 1914, the crop being 64,116,000 tons, valued at $977,077,000. There were in 1914 6,000 in 1914 1,203,300 acres, the crop being 2,094,679,000 pounds, valued at $121,411,000.

*Cotton.*—In 1913 there were 31,535,000 acres under cotton, the product being 12,281,000 running bales of cotton. In 1914, 7,186,000 short tons of cotton seed were produced, valued at $128,250,000, and 26,134,000 running bales of cotton were produced. The total value of the cotton crop in 1914 was $720,060,000.

*Wool.*—The total number of fleeces in 1913 was 36,908,000, producing 418,777,000 lb., pulled wool, 40,000,000 lb., total, 458,777,000 lb.

The total value of metallic minerals produced in 1914 was $652,000,343 (pig iron, $208,777,429; copper $132,968,236; gold, $94,532,800), and of non-metallic minerals the total value was $1,493,305,681 (bituminous coal, $493,209,844; Pennsylvania anthracite, $228,281,399; petroleum, $224,125,215; clay products, $124,986,583; stone, $77,412,292; natural gas, $94,115,574; and cement, $80,832,891).

*Manufactures.*—The manufacturing establishments enumerated at the five-year Census of 1909 numbered 268,491, the value of their products being $20,672,052,000, as compared with a value in 1904 of $14,793,903,000. The leading manufacturing States are New York, Pennsylvania, Illinois, and Massachusetts. The principal industrial centres are New York (clothing, printing and publishing, sugar-refining, textiles), Chicago (meat, clothing, iron and steel), Philadelphia (textiles, foundry products and machinery, sugar, printing and publishing), Boston (boots and shoes, rubber, meat, printing and publishing), Pittsburg (iron and steel), St. Louis (meat, tobacco) Baltimore (clothing, copper), Cincinnati (liquors, foundry products and machinery), Cleveland (iron and steel), Buffalo (iron and steel), Minneapolis (flour mills, lumber), San Francisco (meat), Providence (textiles and jewellery).

## UNEMPLOYMENT

The subject of unemployment has received but a limited amount of attention in the States, and as in the United Kingdom, the statistics available do not enable any accurate estimate to be made of the total number of unemployed persons at any time. The Bureau of the Census has made attempts to collect information in the census years, but the reliability of the returns secured by them so far is still undetermined. The details for the 1910 census are not yet available, but according to the census of 1900, 22·3 per cent. of all persons having "gainful occupations" were reported as not working at their regular occupations or any other occupation at some time during the census year.

The Department of Labour for the State of New York has, however, published statistics showing the amount of unemployment among organised workers in that State for a continuous period since March, 1897, and these figures may be taken as fairly reliable. The statistics are of two kinds, viz., those furnished by selected unions, and those returned by all unions in the State. The former are received every month, and the latter at the end of the first and third quarters of the year. The returns from the selected unions are considered the more accurate, and the statistics relating to these are therefore dealt with below.

These selected unions number nearly 200, and have a membership of about 220,000, or about one-fourth of the total organised workers in New York. The aim in their selection is to maintain as nearly as possible the same proportionate representation of different industries as appears in the total of all unions. The secretary of each of these unions reports monthly the membership of his union, the number at work and the number idle on the last working day of the month, and the causes of idleness.

The following table shows the percentages of members reported idle on the last day of each month, from January, 1906, exclusive of those returned as idle owing to sickness, accident, or old age, or on account of labour disputes, in other words, the statistics represent approximately idleness due to business or trade conditions —

| Year. | Jan. | Feb. | Mar. | April. | May | June. | July | Aug. | Sept. | Oct. | Nov | Dec. | Yearly Means |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1906 | 11·8 | 12·4 | 8·9 | 4·0 | 4·1 | 3·2 | 4·7 | 4·0 | 4·3 | 4·5 | 5·3 | 13·3 | 6·8 |
| 1907 | 29·0 | 27·4 | 23·5 | 8·5 | 7·7 | 8·2 | 5·4 | 7·7 | 9·6 | 20·1 | 22·0 | 30·5 | 15·6 |
| 1908 | 35·1 | 32·9 | 28·9 | 30·1 | 30·6 | 28·6 | 25·2 | 22·2 | 23·0 | 22·3 | 22·0 | 25·9 | 30·5 |
| 1909 | 28·4 | 25·6 | 22·2 | 23·1 | 22·7 | 23·1 | 20·0 | 8·2 | 11·0 | 9·6 | 9·5 | 17·7 | 14·9 |
| 1910 | 18·5 | 16·5 | 17·4 | 12·6 | 11·8 | 11·7 | 8·1 | 7·5 | 6·4 | 13·4 | 15·0 | 25·6 | 13·6 |
| 1911 | 24·3 | 22·9 | 24·1 | 19·6 | 24·0 | 17·7 | 23·1 | 9·5 | 8·9 | 7·8 | 27·6 | 21·9 | 18·7 |
| 1912 | 23·4 | 22·1 | 17·4 | 15·9 | 20·3 | 22·0 | 29·0 | 8·3 | 4·9 | 8·0 | 14·1 | 29·2 | 15·6 |
| 1913 | 29·5 | 23·2 | 22·7 | 22·4 | 21·7 | 22·3 | 29·7 | 28·6 | 25·0 | 22·1 | 28·2 | 37·8 | 24·9 |
| 1914 | 32·0 | 29·3 | 26·5 | 22·4 | 22·4 | 24·3 | 32·4 | 29·1 | 23·2 | 23·7 | 34·1 | 35·7 | 27·6 |
| 1915 | 36·4 | 30·8 | 26·2 | 25·2 | 30·3 | 24·0 | — | — | — | — | — | — | — |

It will be noticed that the percentages in the foregoing table are much higher than those relating to the United Kingdom, but in considering the two sets of figures it must be borne in mind that the proportion of workers in the trades which they cover are not similar. The high percentages of unemployed in New York State are to some extent explained by the importance which the returns from seasonal trades assume in the reported figures. The building trades include slightly more than one-fourth of all union men, and the clothing trades account for almost as many members. But, allowing for these facts, the statistics clearly establish that the amount of unemployment is by no means constant, but that it fluctuates violently from month to month, from season to season, and from year to year.

## FEDERAL EMPLOYMENT BUREAUS.

Something like two years ago the Federal Government launched a comprehensive scheme for the purpose of bringing the jobless man and the manless job together. Authority for this undertaking was found in the Immigration Act of 1907, which created, as an adjunct to the Federal Bureau of Immigration, a Division of Information, the duty of which was to furnish information concerning opportunities for employment to aliens and other persons within the United States. With this as a nucleus, the Federal Department of Labour has established a nation-wide system of employment offices, which is achieving noteworthy success in its efforts towards effecting a solution of the problem of unemployment, as is attested by the following figures showing the activities of this service for the periods specified —

| Statistics for the six months ended | Number of applications for help. | Number of persons applied for. | Number of applications for places. | Number referred to employment. | Number actually employed. |
|---|---|---|---|---|---|
| 31 Oct., 1915 | 6,631 | 33,997 | 82,098 | 33,898 | 27,344 |
| 30 Apr., 1916 | 11,149 | 42,027 | 86,064 | 32,372 | 28,623 |

| Albany, N.Y. | 100,253 | 94,151 |

## WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are the same as those of the United Kingdom, except that the *old wine gallon* (231 British gallon) and the Winchester bushel (·969 British bushel) are retained. There is also a short ton of 2,000 lb., in addition to the long ton of 2,240 lb. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 *cents*

£1 = d. 49 32 | 25 francs = £1
$1 = £0·207 | 20 marks = £1

## Trade of U.S. with United Kingdom

## Dependencies of the U.S.A.

*Position and Extent*.—The Philippine Islands are situated between 4° 40′-21° 30′ N. lat. and 116° 40-126° 34′ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 120,000 square miles, of which total 106,800 square miles are constituted in the eleven largest islands, the 2,132 other islands having a combined area of 13,200 square miles.

*Population*.—At the Census of 1903 the population was ascertained to be 7,635,426, almost all of Malayan stock, of whom nearly 7,000,000 were Christians (Roman Catholics), about 500,000 were Mohammedans, about 200,000 are pagans. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the U.S.A. (Census in 1903). The population in 1903 was estimated at 8,000,000.

*Government*.—The islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion was at its height under Aguinaldo, a native leader, whose assistance was secured by Admiral Dewey, the commander of the U.S. fleet in

Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the Treaty of Paris of Dec. 10, 1898. Co-operation with Aguinaldo and his undisciplined troops proved to be impossible, and the U.S. forces were eventually increased to 60,000 men engaged in a war of pacification which ended with the capture of Aguinaldo on March 23, 1901. The garrison has again been reduced to 12,000 American and 5,000 native troops. The first civil governor of the Philippines was William H. Taft (afterwards President of the U.S.), appointed July 1, 1901, and he was succeeded by General L. E. Wright (1904–5), H. C. Ide (1906), General J. F. Smith (1906), and W. C. Forbes (1909). The present Governor was appointed in 1913.

*Governor General* (*Manila*), Francis Burton Harrison.

*Vice-Governor-General*, N. W. Gilbert.

TOWNS.—Capital, Manila, in the island of Luzon, estimated population, 250,000. The next largest towns are Cebú (about 60,000) and Iloilo (about 50,000), there are several others with populations from 25,000 to 40,000.

GUAM

*Guam*, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26′ N. lat. and 144° 39′ E. long., at a distance of about 1,500 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 209 square miles, with a population on July 1, 1918, of 14,142, of whom 899 are foreigners (including 692 U.S. naval force), the natives being of Chamorro stock, mingled with *Filipino* and *Spanish* blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

*Governor*, Capt. Roy C. Smith, U.S.N.

PUERTO RICO.

*Puerto Rico* (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 56′-18° 30′ N. lat. and 65° 30′-67° 22′ W. long., with a total area of 3,600 square miles and a population of 1,118,012 at the census of 1910. Almost all the inhabitants are Roman Catholics. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,060 miles distant from New York, and 980 miles from Key West. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills, fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 900 miles of railway were in operation in 1918, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 48,716 inhabitants in 1918, other towns being Ponce (34,500), Mayagüez (21,000), and Arecibo (10,000). An Executive Council of eleven members, appointed by the President of the United States, constitutes the upper house of the Legislature, the lower house being the House of Delegates of 35 members, elected for two years.

*Governor*, Arthur Yager, ..... $9,000

TUTUILA.

Under an agreement between Great Britain, Germany, and the U.S., of Nov. 14, 1899, the first-named Power abandoned all claims to the Islands of the Samoan Archipelago, which were divided by the remaining parties to the agreement, the Islands east of 171° W. long. being reserved to the U.S. The territory thus acquired consists of the island of Tutuila and Aunuu, Ofu, Olosenga, Tau, and Rose Islands, with a total area of about 96 square miles and a population estimated at 7,250 in 1912.

*Tutuila*, the largest of the U.S. group, has an area of about 40 square miles and a population of 5,250, and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 56 square miles and a population of about 2,000, Rose Island being uninhabited. Copra and cocoa beans are exported.

WAKE AND JOHNSTON ISLANDS.

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Midway).

ALEUTIAN ISLANDS.

The *Aleutian Islands*, or Catherine Archipelago (*also known as the Santa Barbara group*), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°–55° N. lat. and 172° E.–163° W. long. They have a population estimated at 2,000. The principal settlement is at Unalaska, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West *Indies, formerly the possessions of Denmark*, were purchased by the Government of the United States for the sum of £3,500,000, and the American flag hoisted on 1 April, 1917. The total area of the islands is 138 sq. miles, with a population in 1911 of 27,086. *St. Thomas* (32 sq. m.) has a population of 10,858, mostly negroes; *St. Croix*, or Santa Cruz (84 sq. m.), has a population of 16,188, the capital being Christiansted (or Bassin); *St. John* (20 sq. m.) has a population of 872, the capital being Cruxbay. St. Croix exports sugar, rum, and cotton. St. John is practically undeveloped.

CAPITAL, Charlotte Amalie (St. Thomas) contains one of the finest harbours in the West Indies.

*Governor*, Rear-Adm. Oliver, U.S.N.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1529, and surveys were actively engaged upon by various private companies between the years 1819 and 1829. In 1826 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was president. After much waste of proprietary work, the first operations were

made on January 1st, 1880. The amount of work to be accomplished proved to be greater than was estimated; and the conditions under which it was carried on more embarrassing. Sickness, interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

The interest of the United States in a canal across the Isthmus dates from 1826, and surveys under the auspices of that Government, or of companies organised in the United States, have been made at every available point between the Isthmus of Tehuantepec and the Atrato River. Actual construction, by an American company, of a canal across Nicaragua was begun in 1850, and abandoned in 1893, when the company failed for lack of funds. The failure of this company influenced the United States Government to take an active interest, and a commission was appointed to step to make further studies and investigations. As a result of these investigations, the Congress of the United States authorised the President in 1902 to purchase the effects of the French company in Panama for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force, after which operations on a large scale were begun on all parts of the canal. The labour force varied from 700 on May 4, 1904, 17,000 in 1906, 29,000 in 1907, to 50,000 in 1913. At its maximum, the force was composed approximately of 6,000 Americans, 5,000 European labourers, and 39,000 negro labourers from the West Indies and the mainland bordering the Caribbean Sea. The total cost is estimated at $375,000,000, including, in addition to the canal construction, the $40,000,000 paid to the French canal company, $10,000,000 paid to the Republic of Panama, and the cost of terminal facilities.

The canal is fifty miles long, and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface is at 85 feet above sea-level varies from 85 feet in some parts of Gatun Lake to 45 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

There are three essential parts: a lake formed by damming the Chagres River, and two channels leading from the Atlantic and Pacific Oceans to this lake. The surface of the lake is normally 85 feet above sea-level, and the channels connecting it with the sea are at sea-level. Ships are lifted from the sea-level channels to the lake; to be lowered from the lake to sea-level in locks. These locks have a usable length of 1,000 feet, width of 110 feet, least depth of water over the sills when lake is at normal level, 41½ feet. These dimensions limit the size of ships using the canal. The dam which forms the lake is situated at Gatun, about seven miles inland from the Atlantic. It is built of earth, with an impermeable core of fine sand and clay, and is 1½ miles long, half a mile wide at bottom, and 100 feet at the top, which is 105 feet above sea level. The lake is known as Gatun Lake, and is 164 square miles in area. At its southern end is Culebra Cut, the channel through the continental divide. This is the most extensive excavation ever made. The French canal builders dug about 12,000,000 cubic yards out of this section of the canal, and the Americans have completed an excavation that amounts to over 100,000,000 yards. The total excavation for the whole canal is about 200,000,000 cubic yards, about 130,000,000 yards of which have been excavated in the dry and the balance by dredges. *The amount of concrete used in the locks is* 4,500,000 cubic yards.

The administration and construction of the canal were under Maj.-Gen. George W. Goethals, U.S. Army. The canal was opened for traffic on August 15, 1914, when the first steamer passed from deep water in the Atlantic to deep water in the Pacific, returning the following day. The journey was made in about 10 hours each way. Since that date several landslides have occurred, necessitating a temporary suspension of traffic. From the opening, to the end of March, 1917, 3,098 ships with a total tonnage of 12,882,967, had passed through the canal.

The following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies and Legations in London.

In statistics of trade the term "Domestic" Exports signifies the produce and manufactures of the Country whence they come, and does not include articles re-exported after having been already received there from abroad.

## ABYSSINIA or ETHIOPIA.

*Negusa*, Waizero Zanditu, *elected* 1916, *crowned* 1917 (daughter of late Emperor Menelek).
*Heir*, Ras Taffari Makonnen.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with a total population of 7,000,000, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan the Italian colony of Massowah (Eritrea), the French colony of Djibuti, the British Somaliland, East Africa and Uganda Protectorates.

Abyssinia is volcanic and mountainous. It contains some mineral wealth, iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot, the higher plateaux are well watered with a genial climate. In the hotter regions, sugar-cane, cotton coffee, rubber, &c., flourish in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated, and above 9,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake, the Atbara and many other tributaries of the Nile also have their rise in the *Abyssinian highlands*. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

The Abyssinians are Christian, and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. There is no popular literature, and no education. In 1916 the Emperor Lij Iyasu was deposed and the present Empress elected to the throne. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture, cattle breeding and hunting. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £4,000,000 for imports and exports, and is increasing. The import duty on all goods at Gambela is 12 per cent. *ad valorem*, and at Dire-Dawa and Harrar 8 per cent. *ad valorem*, in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway has been built under French auspices from Jibuti to the capital, viâ Dire Dawa. The posts and telegraphs are under French management, and Abyssinia has been admitted to the Postal Union. Telegraphs and telephones have been constructed, and admission to the International Telegraph Convention has been sought. The principal towns of Abyssinia, besides Adis Ababa, are Adwa, the capital of Tigré, Gondar, Debra-Markos, Selya, Aksum, Antalo, Ankober, Goré, Dembeshe, Iyabé, Jimma, and Harrar. There are ancient architectural remains at Aksum, Gondar, and Ankober, modern architecture is very poor.

| | 1913. | 1916. |
|---|---|---|
| Imports from U. K. | £4,750 | £3,677 |
| Exports to U. K. | 12,880 | 1,136 |

CAPITAL, Adis Ababa (population fluctuates, but is ordinarily about 50,000).

### BRITISH LEGATION.

*Envoy Extraordinary, Minister Plenipotentiary and Consul-General*, Capt. Hon. Wilfred G Thesiger, D.S.O. (1919) ... £2,500
*Consul*, Gerald Campbell ... £600 to 700
*Vice-Consul*, P C Zaphiro, O.M.G
*Harrar—Consul*, Maj J H. H. Dodds £700
*N W Ethiopia (Gondar)—Consul* (vacant).
*Western Ethiopia—Consul*, C. H. Walker
*Southern* ,, *—Consul*, Arnold W Hodson.

Adis Ababa is 300 miles from Zeila, *viâ* Harrar, letters from London are from 22 to 25 days in transit if the mail connects with steamer service from Aden, caravans take from 35 to 45 days.

## ALBANIA.

Albania lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Strait of Otranto. The independence of Albania was declared at the Conference of London, 30 May 1913, at the close of the first Balkan War, when the Kingdoms of Bulgaria, Servia, Greece, and Montenegro wrested the western portion of the peninsula from Turkey. The *political neighbours* are, on the north Montenegro and Servia, on the east Servia, and on the south-east and south Greece. The boundaries are subject to delimitation by International Commissions, the estimated area being 12,000 square miles, with a population of about 2,000,000. The principal towns are Durazzo and Scutari of which the first named is expected to become the capital.

## ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 6,000, it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

## ARGENTINE REPUBLIC.

*President* (1916-1922), Hypolite Irigoyen $36,000
*Vice President*, Pelagio Luna ... 36,000

*Minister of the Interior*, Señor Ramon Gomez.
*Foreign Affairs*, Dr H Pueyrredon (*acting*).
*Finance*, Domingo Salaberry
*Justice and Public Instruc.* Jose Salinas.
*Agriculture*, Honorio Pueyrredon.
*War*, Elpidio Gonzales.
*Marine*, Federico Alvarez de Toledo.
*Public Works*, E. Torello.

*Minister in London*, Señor Don Vicente Dominguez, 9 Palace Gate, W

13,700,000 were employed in 1900, trade and manufactures accounting for about 9,600,000, while mining occupied 598,829. The chief products are grain, cereals, wine (6,492,491 hectolitres in 1903), and minerals (coal, iron, lead, zinc, silver, quicksilver and copper), the manufactures being woollens, cottons, and glass.

| | 1914-15. |
|---|---|
| Estimated revenue | £144,207,830 |
| Estimated expenditure | 144,196,965 |
| *Special Debt* | 1912. |
| War | Kr 24,520,902,438 |
| Other | 11,475,332,247 |
| Total | Kr 36,007,834,685 |

The War Debt at the end of June, 1917 amounted to £1,728,000,000. The annual interest on this amounts to £70,500,000, and on the total Public Debt to £94,000,000, or 42 per cent. of the total ordinary expenditure. The Minister of Finance has estimated the national expenditure for the year ending June, 1918, at £323,000,000, and the total revenue at £174,600,000, leaving £148,000,000 to be covered by credit operations. It would appear from this that Austria is practically bankrupt.

## III.—HUNGARY

(June 15, 1917)

*Premier*, Count Esterhazy
*Finance*, Dr Wekerle.
*Education* Count Albert Apponyi.
*Commerce*, Count Serenyi.
*Interior*, Gabriel Ugron.
*Justice*, M. Vanovi.
*National Defence*, Feldmarschalleutnant Alexander von Szurmay
*Minister for Croatia and Slavonia*, Count Aladar Zichy

Hungary, with its dependent states, has an area of 324,852 sq. kilometres, about 125,430 sq miles, with a population of 20,886,487 at the census of 1910 to this Croatia and Slavonia contribute 2,621,564. The country is divided into 71 counties with 474 districts for those of Hungary Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. *Croatia and Slavonia* form an annexe of the Crown of Hungary, with autonomy in home affairs, justice, and public instruction. At the head of the Croatian Government is the *Ban* (Lord Lieutenant), Edward Cuvaj, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister The Croatian Diet sends 43 members to the Hungarian Parliament, and the Hungarian Ministry contains a Croatian member Parliament consists of a Lower House of 453 members, elected for five years of these Croatia sends 40, but they have no vote on matters connected with justice, education, and home affairs. There is also an Upper House, consisting of the male members of the dynasty, the *Barones regni*, prelates, such members of the magnate families who contribute more than 8,000 crowns to the land-tax, the *Banus*, with three members of Croatia sent by the Diet, and fifty members nominated by the Crown.

Of the inhabitants in 1910, 10,050,575 were Hungarians, 2,948,032 Rumanians, 2,027,435 Germans, 1,687,270 Slovaks, 1,833,060 Croatians, and 1,208,271 Serbians. By religion (1910) there were 10,888,398 Roman Catholics, 2,020,020 Greek Catholics, 2,086,874 Orthodox Greeks, 1,840,259 Lutherans, 2,600,900 Calvinists, and 992,406 Jews. In addition to Budapest, which had, in 1910, 880,600 inhabitants, there are ten cities with over 50,000 inhabitants.

All the great plains produce grain of excellent quality The live stock in 1911 included 7,300,000 cattle, 2,300,000 horses, 8,900,000 sheep, and 7,580,000 pigs. The chief mineral products are gold, silver, copper, lead, quicksilver, antimony, iron, coal, and sulphur. The mines, however are not well worked, and might be made a much greater source of income. Salt is a Government monopoly

* Austria and Hungary have no common debt, but to the expenditure of the Kingdom of Hungary the sum of 60,621,564 crowns is set aside annually as a contribution to the service of the General Debt of Austria contracted before 1867.

A Kingdom of Central Europe, with a total area of 11,373 square miles and a population (at the census of 1910) of 7,206,730.

There are nine provinces: Antwerp, Brabant, Flanders (E. and W.), Hainaut, Liège, Limburg, Luxemburg, and Namur. BRUSSELS, pop. 1910, 595,630 (with suburbs, 720,327 inhabitants) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (390,630 exclusive of suburbs), Ghent (185,149), the centre of the iron industry, which has also large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous, and Liège (174,368). Its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Scheldt. The other harbours are Ghent, Bruges, Ostend, Nieuport, Blankenberg, and Zeebrugge. French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

In 1830 Belgium separated from Holland, and her neutrality was guaranteed by a Conference of the European Powers, and by a further treaty, in 1839, signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 110 senators (with the exception of 21 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

Belgium has a frontier of 832 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (362 miles), on the east by Germany (60 miles) and the Grand Duchy of Luxemburg (82 miles), with a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 256 feet. The principal rivers are the Scheldt (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 49° F (summer 65°, winter 32°).

DEFENCE.—There is universal liability to service, but in practice the Army on a peace footing consists of about 30,000 men. The war strength amounts to somewhere about 350,000. Belgium has no navy.

Antwerp as the principal fortress, and Liège and Namur are also fortified, forming "Têtes-de-pont" on the line of the Meuse against a violation of neutrality by either France or Germany. (On the 2nd Aug., 1914, this neutrality was violated by an entirely unprovoked invasion of the German army at Visé. They met with the most stubborn resistance from the valiant though numerically inferior Belgians at Liège and Namur. The Germans celebrated their occupation of a large part of the country by debauching and subsequently destroying Louvain, Tarmonde, and other places and setting up a reign of terror generally. They are at present in occupation of practically the whole country, where they are exercising Civil Government.)

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The State Universities are at Ghent and Liège; others at Louvain and Brussels.

COMMERCE.—Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant); glass, textiles (Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

Exports to the U.K., 1926, £21,290,912.
Imports from U.K., 1926, £26,265,775.

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1922) of 105 vessels (281,637 tons), in addition to which there were 453 fishing boats. In 1922, 9,268 foreign vessels entered at Belgian ports (tonnage 14,467,102). In 1922 there were 4,729 kilometres of railway (including branch lines and 350 kilometres of private lines rented by the State), the telegraphs had a length of 7,076 kilometres (1921), and the post-office carried 218,000,000 letters, 129,000,000 post-cards, while 88,000,000 telegrams were sent in 1921. The navigable rivers and canals have a length of 2,179 kilometres (1921), and there are 9,757 kilometres of roads.

## *THE BELGIAN CONGO.*

The Independent State of the Congo became a Belgian Colony by a law of Oct. 28, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated at not more than 15,000,000. The total European population (Jan. 1922) was 5,484, of whom 293 were British, 48 Americans, 196 Italians, 303 Portuguese, 297 Swedes, 190 Germans, and 3,917 Belgians. The river is navigable for large vessels from its mouth

* The temporary Seat of Government is at Le Havre.

of Bukama to Matadi (1,442 miles), where the European steamers discharge and exchange their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Lukula to Boma, cocoa planting district of Mayumbe. The Congo River above Leopoldville and its numerous affluents are navigable by steamer on about 5,000 miles. To avoid the falls on the Upper Congo River the Great Lakes Railway Company built a metre-gauge line from Stanleyville to Fourhier-ville (194 kilometres), and another from Kindu to Kongolo (344 kilometres). The line from Kabalo to Albertville on Lake Tanganyka (272 kilometres) was completed in 1908, connecting the West Coast of Africa with German East Africa and the East Coast. The Katanga Railway will reach Bukama in 1918, and link up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway. A telegraph line is laid from Bukama to Coquilhatville (855 kilometres). There is telegraphic communication with Europe. Fourteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. Powerful wireless stations were being erected at the outbreak of the war at Brussels and Boma, to connect Belgium with the Lower Congo. The West Coast District has a rather scanty rainfall (60 inches), but on the Mafumbo Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Extensive forests cover the central districts, oil-palms are plentiful every where, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common, coffee, cocoa, Para and Ceara rubber and cotton are successfully planted. Mines are very extensive. The copper district of Katanga has enormous deposits of copper ore, and the smelters at the Lubumbashi produced about 30,000 tons of copper last year. A rich tin-belt extends from Bukama towards Lake Tanganyka. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south.

Imports during the year 1908, 120,877 tons, value 58,130,000 frs.; exports, 62,800 tons, value 109,000,000 frs., mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold and diamonds. Sleeping sickness, once very prevalent and destructive, is now decreasing.

Revenue (1908), 32,250,282 frs.; expenditure, 31,721,921 frs. Capital, Boma (pop. 500 whites, 6000 natives). Principal towns, Elisabethville (Katanga) (pop. 1,000 whites, 6,000 natives), Stanleyville (600 whites, 8,000 natives), Coquilhatville, Khamon (Stanley Pool), and Leopoldville.

## BOLIVIA, Republic of.

(Area, 1,050,000 sq. miles.)

*President*, José Gutierrez Guerra (1917-1921)
*Foreign Affairs*, Señor Julio Zamora.
*War*, Dr Andres Muñoz.
*Justice & Industry*, Julio Gutierrez.
*Interior*, Ricardo Mujia.
*Finance*, Alfredo Ballivian.
*Education*, Dr Claudio Sanjines.
*Instruction*, Dr Salinas Vega.

*Envoy Extraordinary, Minister Plenipotentiary and Consul-General*, Ur Ismail Montes.
*Officers of Legation*, 74 Campayne Gardens, N.W.
*Consulate-General*, 81 Cannon Street, E.C.

The Republic of Bolivia extends between lat. 9° and 23° S. and long. 57° 26′ and 73° W., and its area is about 567,298 square miles, with a population in Jan. 1919 estimated at 2,800,000. The peace army amounts to about 2,000 men, the war effective being about 10,000. The mineral productions are very valuable, the silver mines of Potosí are believed to be almost inexhaustible, while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; tin, copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, India-rubber, quano, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with tin, gold, silver, and copper are its principal exports, its chief imports being iron, cotton and woollen goods, hardware, and silks. There are about 900 miles of trunk lines of railway and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication with La Paz from Antofagasta (Chile), and from Rio Mulato (near Uyuni) to Potosí, branch lines run from Oruro to Cochabamba. Railway from Arica to La Paz has long been completed and open to traffic. Proposed railway from Guaqui to Puno temporarily abandoned, the connexion between these towns being still maintained by steamers across Lake Titicaca. Construction on the railway between La Quiaca and Tupiza, in Bolivia, continues this year by a French firm. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (569 miles), and a line from La Paz to the province of Yungas may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. Its constructions has recently been begun by means of a loan made in New York. A line from Potosí to Sucre, the legal capital, is under construction. A line from Buenos Aires to Bolivia is complete to La Quiaca, passing La Paz within 4-5 days of Buenos Aires. The gap between Tupiza and La Quiaca is crossed by an automobile service taking one day.

Diplomatic relations with Germany were broken off on April 14, 1917.

*Consul-Gen. in Liverpool*, Lully José de Souza.

The Republic of the U.S. of Brazil was founded on Nov 15, 1889, by a bloodless revolution which drove Dom Pedro from the throne. (In 1891 a constitution was granted by Portugal, but afterwards repudiated, in consequence of which the independence of the country was proclaimed under the sovereignty of Brazil.)

Brazil, the most extensive State of South America, extends between lat. 4° 20′ N. and 33° 45′ S. and long. 34° 40′ and 73° 25′ W and comprises an area of 3,218,870 square miles, with a population estimated at 21,980,000, of which about 1,000,000 are "wild" Indians. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 3,000 feet above the level of the sea.

Diplomatic relations with Germany were broken off on April 10, 1917.

The Navy (1913) consisted of 3 Dreadnoughts, 2 old battleships, 3 protected cruisers, and other smaller craft, including 10 T.B.D.'s, 3 submarines, and some seaplanes. There are 42 ports along the coast, of which the principal are Rio and Santos, with a shore line of 2,113 miles. Brazil is accessible for the greater part of the year. The Amazon, with its immediate tributaries, and the Tocantins, San Francisco, and others.

The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monazite sand. Low-grade coal deposits are in the south. Its forests are immense. Its agricultural produce is abundant. Cattle-raising is an important industry, the number being computed at 28,000,000. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The chief products of the country are coffee and rubber the rubber coming from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos, coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. The exports include also meat, hides, maize, beans, and "herva matte" (tea). The imports consist principally of every description of manufactured articles, but these were in 1908 no fewer than 1,492 industrial establishments, including 180 cotton-mills, giving employment to 42,942 hands, and representing an invested capital of £70,000,000. The enormous protective duties were again increased in 1897, 1899, 1900, 1903, and 1905.

In December, 1908, there were 15,336 kilometres of railway open, and 2,096 under construction. Length of telegraph wires in 1908, 62,772 kilometres.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Servia and Greece, on the east by the Black Sea, and on the south by the Turkish province of Adrianople and the Ægean Sea. The kingdom is governed by a King and a Council of Ministers, with a single chamber, popular legislature (Sobranjé, or National Assembly) and constitutional government.

Bulgaria was created by the Treaty of Berlin, 13 July, 1878, and in 1885 Eastern Roumelia was added to the newly created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,000 square miles, with a population of 4,337,500. In 1912–13 a successful war of the *Balkan Leagues* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. In Oct. 1915 Bulgaria decided to participate in the European conflict, and, siding with Germany, Austro-Hungary, and Turkey, attacked Serbia. The present area of Bulgaria is about 42,000 square miles, with a population of about 5,300,000. The prevailing religion of the Bulgarians is the Orthodox Greek Church.

In 1916, the Gregorian was substituted for the Eastern Calendar, used hitherto.

DEFENCE.—The strength of the Army in 1914 was given as 216 battalions of infantry, 38 machine gun companies, 128 field batteries, and 37 squadrons of horse, besides technical troops and fortress artillery. The fighting strength was approximately, 250,000 rifles, 6,000 sabres, and 720 guns. By adding the last reserves an additional 200,000 men would be available.

EDUCATION is free and compulsory. There are few technical schools. Sofia has a University.

TRADE, &c.—The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco, the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. The principal towns, with their populations at the census of 1910, are Sofia (102,812), Philippopolis (47,982), Varna (41,492), Rustchuk (36,993), Shiven (25,129), Plevna (23,023), and Shumla (22,223). The principal ports are Varna and Bourgas. In 1910, 6,800 vessels (1,988,490 tons) entered and cleared at ports on the Black Sea. There were 1,384 miles of railway open in 1913 and about 250 miles under construction; 4,122 miles of telegraph and 1,294 of telephone wires. In 1912 there were 2,342 post offices, handling 79,856,000 letters; 324 telegraph offices, the number of dispatches being 2,409,600.

## CHILE, Republic of

*President* (1915–1920), J. Luis Sanfuentes $36,000

### Ministry (13 Oct., 1915).

*Prime Minister and Minister of the Interior*, Señor Eleodoro Ibáñez.
*Foreign Affairs, Religion and Colonization*, Señor Eduardo Suarez.
*Justice and Public Instruction*, Señor Arturo Alemparte.
*Finance*, Señor Ricardo S. Edwards.
*War and Marine*, Señor Oscar Viel.
*Industry and Public Works*, Señor Malaquias Concha.

*Envoy Extraordinary and Minister Plenipotentiary*, Agustin Edwards.
*Legation*, 22 Grosvenor Square, W
*1st Secretary*, Manuel Saltzas, 22 Grosvenor Square, W
*2nd Secretaries*, Ricardo Pepper, José Nixon.
*Naval Attaché*, Luis Barrie.
*Consul*, Vicente Echeverria Larrain, 94 Gracechurch Street, E.C.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 20′ and 56° 30′ S., and long. 66° 30′ and 75° 40′ W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 200 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea, but numerous summits attain the height of 20,000 feet—the highest are the Guallatiri, 22,882 feet; the Bayo, 19,993 feet; Coconpuri, 22,180 feet; El Muerto, 21,257 feet and others nearly as lofty. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,278 square miles, with a population (1916) of about 3,789,824. In 1916, the births numbered 144,143, marriages, 20,121 and deaths, 99,856. The principal towns, with their estimated populations (1916), are—Santiago (307,230), Valparaiso (202,397), Concepcion (68,000), Talca (41,868), Iquique (45,000), Chillan (36,543), and Antofagasta (36,295). The National Congress consists of a Senate of 37 members and a Chamber of Deputies of 118 members, elected by direct vote every three years. There is universal adult male suffrage for those who can read and write. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively, the vine and all European fruit-trees flourish. The live stock includes about 2,300,000 cattle, 5,500,000 sheep, 500,000 horses, 1,200,000 goats, and 1,000,000 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore, and some rich gold mines have been discovered. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver and the south, iron and coal. The nitrate exports in 1918 were valued at £24,000,000. There are smelting works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. There are (1918) about 8,109 miles of railway open and 290 miles under construction, over 19,000 miles of telegraph, 900 post-offices, and 28,126 miles of telephone, some worked by English companies. The commercial marine numbers (1918) 200 steamers (91,201 tons) and 28 sailing vessels (24,764 tons). In 1919, 17,123 vessels of a total tonnage of 13,190,830 entered at Chilian ports. The staple articles of export are nitrates of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 14,500. The navy consists of 1 battleship, 2 armoured cruisers, and 3 protected cruisers, 3 torpedo gunboats, 13 destroyers, and 2 submarines; 6 Dreadnoughts under construction in England one of which was acquired by the British Navy on the outbreak of war.

EDUCATION is free but not compulsory and 50 per cent. of the population are still illiterate. There is a State University at Santiago. The National Library contains 160,000 volumes.

AREA AND POPULATION.

| Territory | Square miles. | Population. |
|---|---|---|
| China Proper | 1,502,000 | 406,000,000 |
| Manchuria | 360,000 | 11,000,000 |
| Mongolia | 1,076,000 | 2,000,000 |
| Tibet | 730,000 | 3,000,000 |
| Eastern Turkestan | 800,000 | 2,000,000 |
| Total | 4,467,000 | 424,000,000 |

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,500 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000. The government of the 18 provinces is entrusted to civil and military governors, and under them each province is subdivided into circuits superintended by taotâis or lieutenants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Kiakhta, 1915, between China, Russia, and Outer Mongolia recognises the Hutuichta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the provinces of China proper. The exact status of Tibet is still unsettled.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-traveller Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kubilai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The British and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1834, the position of British merchants in Canton became a national question, and contributed towards the first Chinese War of 1840. A treaty was signed at Nanking, as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence, but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Corea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners, and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of $333,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties—(1) between the U. K. and China (5 Sept., 1902), (2) U. S. and China (8 Oct., 1903), and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatungkow, Chang-cha, and Antung in Manchuria, were made Treaty ports.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria, and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade:—Feng-huang-ch'ang, Liao-yang, Hsin-mintun, Tung-chiang-tsu (on the Liao River), and Fu-ku-men in Fengtien Province; Ch'ang-ch'un, Kirin, Harbin, Ninguta, Hunchun, and Sansing in the Kirin Province; and Taitsihar, Hailar, Aihun, and Manchuli in the Heilungchiang Province.

In October, 1911, a revolution broke out in Hankow, which resulted finally in February, 1912, in the abdication of the Manchu Dynasty in

former of a Republican form of Government. In 1913, a second revolution, engineered by the Southern Party, was successfully put down by President Yuan Shih-kai. Since that date the Central Government has been gradually consolidating its position, and bringing about a centralisation of power in Peking. In May, 1915, a new treaty with Japan was concluded by which additional privileges are granted to Japanese in Manchuria and Mongolia. Towards the end of 1915 President Yuan Shih-kai engineered a campaign to revert to a Monarchical form of government, and, as the result of elections held all over the country, was invited to ascend the throne as Emperor. The Southern Provinces, however, immediately rose in revolt, and the attempt failed and finally ended with the death of Yuan Shih-kai in May, 1916. The Vice-President, Li Yuan-hung, succeeded to the Presidency, and all traces of the Yuan Shih-kai régime were rapidly abolished. The first Republican Parliament reassembled, and the government reverted to the Republican form adopted after the overthrow of the Manchu Dynasty in 1912. Both Houses of Parliament are elected by a system of limited franchise, and the government of the country is vested in them. The President, who is elected by Parliament, is assisted by a Premier and a Cabinet of Ministers, whose appointments have to be approved by Parliament, and to whom they are responsible for their actions. The Provisional Constitution of Nanking is at present in force. An abortive attempt to restore the Monarchy was suppressed in June, 1917. On 14 Aug., 1917, China declared war on Germany and Austria.

The estimated foreign population of China during the year 1914 is as follows: British, 8,914; Japanese, 84,998; Russian, 26,319; American, 4,365; Portuguese, 2,187; German, 3,013; French, 1,864; other nationalities, 2,197; the total being 185,857. Out of a total of 3,421 foreign firms in China, 834 are British, 1,239 Russian, 995 Japanese, 273 German, 136 American and 113 French.

DEFENCE.—The army is undergoing reorganisation. The total strength of all forces in August 1913, just after the Rebellion of that year was estimated at 900,000, but no authenticated statistics are obtainable. China now possesses a protected cruisers built in 1911 (2,750 tons), 4 older protected cruisers (4,300–3,000 tons), 2 torpedo gunboats (850 tons), 12 gunboats (950–200 tons), 4 destroyers (420 tons), and 8 small torpedo boats (120 tons). No figures are available as to the complement of the Navy.

EDUCATION.—Many changes in administration and development are under discussion including a proposal to establish universal compulsory primary education. There is a University in Peking and a number of colleges all over China under foreign management. In 1911, there were 504 foreigners employed in educational work.

COMMERCE.—The net trade of the open ports for the years 1909–1914 is stated as follows, in *taels* (7/3 = £1):

| Year | Imports. | Exports. | Total. |
|---|---|---|---|
| 1909 | 238,178,267 | 178,690,804 | 416,869,071 |
| 1910 | 262,984,894 | 180,633,308 | 443,618,202 |
| 1911 | 277,289,453 | 177,438,286 | 454,727,739 |
| 1912 | 263,299,767 | 270,300,609 | 533,600,376 |
| 1913 | 291,881,887 | 263,324,638 | 555,206,525 |
| 1914 | 291,009,908 | 322,680,804 | 613,690,712 |

The import of Indian opium is now prohibited.

The foreign trade of China was shared by the nations of the world as under in 1914:—

| British. | % | Foreign. | % |
|---|---|---|---|
| Great Britain | 22 | Japan | 23 |
| Hong Kong | 22 | U.S.A. | 4 |
| India | 4 | Europe (exc. Russia) | 4 |
| Other British Dominions | 1 | Russia | 9 |
| | | Other countries | 1 |
| % British | 46 | Foreign | 54 |

TRADE WITH UNITED KINGDOM.

Imports of British produce and manufacture, 1916, £14,693,641:—

| | £ | | £ |
|---|---|---|---|
| Chemicals | 1,188,479 | Machinery | 1,421,488 |
| Cottons | 7,491,968 | Tobacco | 1,771,488 |
| Iron Manufactures | 1,365,134 | Woollens | 718,389 |

Imports to U.K., 1916, £9,373,142:—

| | £ | | £ |
|---|---|---|---|
| Bristles | 1,171,641 | Skins and Furs | 1,684,989 |
| Hair | 777,883 | Soya Beans | 2,991 |
| Oil | 499,886 | Straw Plaitings | 288,758 |
| Peas and Beans | 149,794 | Tallow | 190,299 |
| Raw Silk | 1,324,189 | Tea | 1,391,189 |
| Silk Manufactures | 363,187 | Wool | 1,351,180 |

COMMUNICATIONS.—*Railways.*—About 6,000 miles were open in Jan. 1918, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

*Shipping.*—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtze. In 1914 the total tonnage of vessels entered and cleared at the treaty ports was 96,326,276, an increase of 2,992,446 on that of the previous year. Of these 40 per cent. were British, 25 per cent. Chinese, 5 per cent. German, 20 per cent. Japanese, 2 per cent. French, and 3 per cent. Russian.

*Telegraphs* are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1913 there were 97,000 miles of land lines and 32,000 miles of aerial wires.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service, this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two *Chinese Administrators-General* were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a *Postmaster-General* (foreign) was appointed. Already letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices is 8,304, 378,980,000 postal packets and 3,382,260 parcels were handled in 1914.

| | | |
|---|---|---|

CAPITAL OF THE CHINESE REPUBLIC, Peking. Population, 1,000,000.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000. Outer Mongolia is now, by the Treaty of Kiakhta of 1915, an autonomous state under Chinese suzerainty. Its ruler, the Hutukhta Khan of Urga, receives his title from the Chinese Government. China appoints a Resident at Urga, with three Assistant Residents in other towns. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, q.v.

CHINESE TURKESTAN has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Urumchi and Kulja.

COLOMBIA, Republic of

*President* (1924-1928), Dr José Vicente Concha.
*Interior*, Miguel Abadia Mendez.
*Foreign Affairs*, Marco Fidel Suarez.
*Envoy Extraordinary and Minister Plenipotentiary in England*, Dr Ignacio Gutierrez Ponce, 42 Holland Road, Kensington, W
*Secretary*, Eduardo Perez Triana.
*Consul-General*, Lorenzo Marroquin, 9 Sicilian Avenue, Southampton Row, W.C.
*Consul in Liverpool*, Luis E. Bonilla.
*Consul at Southampton*, Joaquin Orrantia.

The Republic of Columbia lies in the extreme north-west of South America, having a coast line on both the Atlantic and Pacific Oceans. It is situated between 4° 40′ S. to 12° 29′ N lat. and 66° to 79° W long., with an estimated area of 462,826 square miles, and a population estimated at 5,473,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras, the second containing the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants.

Its mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, India-rubber, and bananas. All religions are tolerated.

The standing army consists of about 6,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 600 miles being open in 1924, with 8,680 (1909) miles of telegraph. The rate of exchange is about $5 gold = £1 (approximately).

*Envoy Extraordinary and Minister Plenipotentiary*, Wenceslao de la Guardia (Legation closed).
*Consul-General*, W. J. Le Lacheur, 98 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and a population (1926) of 442,304. The chief exports (1926) are coffee (£877,043), bananas (£562,859), gold and silver bullion (£207,283), cacao, hardwoods, rubber, skins, and hides. The imports are dry goods, hardware, provisions, railway material, machinery, paints, and general merchandise (in 1926, 70·25 per cent. from United States, 12·21 from United Kingdom, 4·98 from France, and 14·74 from other countries).

Diplomatic relations with Germany were broken off on 26 Sept., 1917.

The chief ports are Limon, on the Atlantic coast, through which the whole of the important banana trade with the United States and England is done, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast. In 1926, 433 foreign vessels (899,293 tons) entered 22 Costa Rican ports. About 405 miles of railroad were open in 1926. In 1926 there were 177 post offices, dealing with 8,963,300 packets, and 130 telegraph offices (one wireless), transmitting 373,272 dispatches over 1,918 miles of line. Telephones, 913 miles. A considerable amount of English capital is embarked in the Republic.

## CRETE (or CANDIA).

Crete (or Candia) is an island in the Mediterranean, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,990 square miles; the population is 353,842, of whom 269,839 are Christians, 83,496 Musulmans, and 508 Jews. The island formed part of the early and later Roman Empires, and in 1669 was captured by the Turks, who retained it until 1898, when Great Britain, Russia, France and Italy set up a semi-independent government in the island under a High Commissioner, subject to the suzerainty of the Sultan of Turkey. At the outbreak of war between Greece and Turkey in Oct. 1912 Crete was declared to be part of the Hellenic kingdom. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are olive oil, wine, raisins, carobs, oilcrons, soap, valloneas, and oranges. The chief towns are Candia (pop. 32,000), Canea, the capital (pop. 28,000), and Retimo (pop. 14,000).

Imports from U.K. (1926) .. .. £7,207

*1st Secretary*, Miguel A. Campa (*absent*).
*2d Secretary*, Arturo Padro.
*Diplomatic Attaché*, Dr. Luis Mason.

The island of Cuba lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,278 sq. miles and a population of 2,190,112 (1919). Cuba suffered many years of internal discord, from its discovery by Columbus until its liberation in 1898, having been a Spanish possession until the Spanish-American War, of which it was the main bone of contention. A

Cuban constitutional convention met 26 days and of 1900 and agreed upon a Constitution (1901), which was ratified on certain conditions by the U.S.A. in 1902. In 1906 disturbances broke out and resulted in the renewed occupation by American troops and the establishment of a provisional administration, which ceased when President Gomez took over the administration in 1909.

Cuba declared war against Germany on April 7, 1917.

The chief products of the island are tobacco and sugar (estimated crop in 1918, 2,300,000 tons). 2,926 miles of railroad were open in November, 1911, and 5,065 miles of telegraph line (1908).

CAPITAL, Havana (pop. about 297,000), other towns are Santiago (45,000), Matanzas (37,000), Cienfuegos (30,000), Cardenas (24,000), and Caraguay (19,000). In 1913 there were 30,795 immigrants.

| | 1915-16. | Estimated 1916-17 |
|---|---|---|
| Revenue | $41,808,580 | $46,679,942 |
| Expenditure | 40,262,905 | 44,723,201 |
| External Debt | 44,722,000 | 88,284,000 |
| Internal Debt | 32,371,000 | |
| | 1913. | 1916. |
| Imports | $133,448,000 | $171,869,096 |
| Exports | 254,290,000 | 321,564,341 |
| Imports from U. K. | £2,682,946 | £2,898,279 |
| Exports to U. K. | 8,090,109 | 13,491,977 |

*Note*.—Both U.S. and Cuban currency are legal tender, Cuban currency being of the same fineness and value as that of the U.S. There is no Cuban paper currency—only gold, silver, and nickel.

Consulates at Hull, Liverpool, Manchester, Belfast, Falmouth, Guernsey, and Newcastle-on-Tyne.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long., with an area of 15,042 square miles, and a population in 1911 of 2,757,076, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, raisins, and colonial produce. In 1908, 2,887,980 acres were under corn crops and 3,193,629 permanent pasture. In 1909 the live stock numbered 578,018 horses, 2,462,128 cattle, 971,000 sheep, and 1,980,800 swine. The crops in 1908 included 3,124,400 qrs. of oats, 2,709,300 of barley, 1,280,780 rye, 2,130,800 mixed corn and 738,000 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn meal and oil-cake, horses, and cattle. There is a sea-going mercantile marine of 813 steamers, with a tonnage of 671,808. There are (1913) 2,473 miles of railway and 24,294 miles of telegraph wire (1913).

DEFENCE.—The Army consists of about 14,000 trained men, the vote for 1917-18 amounting to Kr 18,730,357. The Navy consists of 4 coast-defence ironclads and 2 projected, 2 small cruisers, 26 torpedo-boats (built and building), 12 submarines (built or building). Vote, 1916-17, including supplementary estimates, Kr 23,356,208.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

*Consul-General in London*, Eduardo Casanas, 29 St. Dunstan's Hill, E.C. 3.
*Consul*, Octavio Ventura.
*Vice-Consul*, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartholomew Columbus, who named it Hispaniola. It comprises an area of about 18,000 square miles, with an estimated population of nearly 700,000. Sugar and cocoa are the most important crops, and coffee, and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, wax, honey, logwood, rosin, tortoise-shell, hides, bananas, and divi-divi. There are about 230 miles of public railroad, and telegraphic (3 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curaçao, and Porto Rico. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since 1907 not less than 45 per cent. of the Customs Collections has been deposited in a New York Bank to pay the interest and sinking fund charges of the Foreign Loan.

On 29 Nov., 1916, a military Government by U.S. officers was proclaimed. All the Government departments are being administered by these officers, while the entire control of finance and police is in their hands. A native constabulary under American officers is being formed.

British trade is hampered by the absence of direct maritime communication.

CAPITAL, Santo Domingo. Population, 93,000.

Consuls at *Liverpool, Southampton, Glasgow*, and *Cardiff*

A State of South America, extending from lat. 1° 30' N. to 5° 0' S. (according to the Equatorial geography but there are boundary disputes with Peru and Colombia), and between 75° and

80° W. long., comprising an area of 118,250 English sq. miles. It has a population of about 1,300,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The giant chain of the Andes here presents the Chimborazo, 21,424 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Ecuador is divided into 13 provinces and one territory.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india rubber, orchella weed, straw hats and hammocks, bark, yarns, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. A railroad connecting Guayaquil and Quito was opened in 1908. Guayaquil is the chief port (population, 1908, about 80,000), other chief towns being Quito, 55,000; Cuenca, 25,000; and Riobamba, 12,000. The *Galapagos Islands* (2,400 square miles) belong to Ecuador, only about 200 miles are susceptible of cultivation.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N lat, and from 7° 45′ E. to 4° 45′ W long. bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 2,200 miles, and its area at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory lost in 1871 amounted to 5,600 square miles. The population at the census of 1911 was 39,601,509, and in 1913 there were 941,339 births, 298,762 marriages, and 799,638 deaths. France has always been attractive to foreigners, of whom (1906) 1,038,503 were resident there, or 2·51 per cent. of the legal population, this number included 377,638 Italians, 320,423 Belgians, 87,836 Germans, 35,990 English, 14,863 of the latter residing in the Department of the Seine. 20 per cent. of the foreign population was born in France. About 26,000 Frenchmen are stated to be resident in England. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône, the principal forests Ardennes, Compiègne, Fontainebleau, and Orleans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnuts, walnuts, almonds, apples, pears, cherries, fig, plum, &c. The vine is cultivated to a very great extent (971,776,672 gallons of wine were produced in 1913), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider making is also an important industry, and the production in 1913 amounted to 682,868,720 gallons. The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot, for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1913, 44,494,277 metric tons), pig iron (4,835,194 metric tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. The culture of oysters is an important industrial feature,

and in the year 1911 994,998,130 oysters were produced, representing a value of £3,318,332.

DEFENCE.—*Army.*—Universal service strictly enforced, exemption for physical unfitness only. Three distinct organisations (a) *Home* (*Métropolitan Army*) incl. estab. of Algeria and Tunis, (b) *Colonial Army* (in France), (c) *Colonial Forces* in colonies. The first is recruited by compulsion, the second mainly by voluntary enlistment, or voluntary transfer from the first, the third mainly by voluntary enlistment, with reserve power of compulsion. Law of 1913 provides for incorporation in active army at age 20 (instead of 21, as formerly), and periods of service as follows —*Active army*, 3 yrs., *active reserve*, 11 yrs., (territorial army, 7 yrs. territorial army reserve, 7 yrs.) *Peace establishment* (1913) (a) *Métropolitan Army*, (i.) In France, 527,963 (ii.) In Algeria, 56,700 in Tunis, 18,200 (of the forces in Algeria-Tunis about two-fifths are natives), (iii.) *Gendarmerie, &c.*, abt. 25,000. (b) *Colonial Army in France*, 28,000. (c) *Colonial Forces*, abt. 130,000 (half natives). *Budgets* (1913), for (a) £32,513,000, for (b) £4,042,000, for (c) £3,483,000. In addition, considerable extraordinary expenditure was undertaken, or is contemplated. *War, Field Army (excl. forces in Africa)* *First Line*, 730,000, *Second Line*, 500,000, *total*, 1,230,000. *Reserves*, in depôts, 850,000, unorganised, 500,000, *total*, 1,350,000. (*Territorial*) *army, organised*, abt. 500,000, *un organised*, 750,000). *Navy.*—22 battleships (10 building), 24 cruisers, 8 light cruisers, 3 torpedo vessels, 80 destroyers (9 building), 123 torpedo-boats, 90 submarines (26 building).

EDUCATION.—Educational system highly developed. *Central Administration* comprises (a) Ministry of Public Instruction (b) Superior Education Council, charged with the actual administration, (c) Consultative Committee (advisory), (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary, Secular, écoles* and *frs.* Age 6–13. Schools include (a) infants, (b) lower primary (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical (b) purely modern (c) Latin and sciences, or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5–8 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education) Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

COMMUNICATIONS.—The system of *railroads* in France is very extensive, they are almost entirely *consolidés*, and become State property after the expiration of the concessions. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1913, was 25,399 miles, the total receipts from passenger and goods traffic, &c., being £49,406,000. The length of telegraph wires in 1911,700 miles, and of telephone lines 207,180 miles. At the end of January, 1913, the mercantile marine, comprising boats of 5 tons and upwards, amounted to 17,870, vessels of 1,918,918 net tons (of which 18,813 were sailing ships, representing 674,004 net tons). The sums voted by Parliament for construction and navigation Bounties to Shipping and to Deep Sea Fisheries in 1911 amounted to £1,530,000, and £1,226,730 for Postal and Cable Service Subventions.

COMMERCE.—The principal imports are wool, cotton coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

*Shipping.*—During the year 1913 the total number of French and foreign vessels entering French ports amounted to 27,422, representing a tonnage of 32,322,827 tons, of which 7,982,372 tons were French, while the total clearings amounted to 28,440 ships of a tonnage of 21,272,988 tons, of which 7,763,872 tons were French.

*Algeria.*—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 38′ W to 8° 28′ E. longitude, 37° 6′ N to an undetermined S. limit, about 30° N, covering an area estimated in 1908 at

about 2,170,000 square miles, with a population (1901) of 4,962,828, of whom 592,022 were Europeans and 4,370,806 natives. The revenue in 1902 was estimated at £6,208,000, and the expenditure at £5,103,400. The bulk of the trade is with France, the exports to France amounting in 1902 to £3,230,000, and the imports from France to £2,850,000; the exports to the U.K. in 1902 were valued at £1,300,000, and the imports from the U.K. at £2,139,000. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and halfa grass, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1903 there were 2,732 miles of railroad open for traffic, and in 1902 the number of ships engaged in foreign trade entering and clearing Algerian ports was 8,236, of a net tonnage of 10,633,271 tons, of which the percentage of British vessels was fully 21 per cent. The principal town is Algiers, the capital (population, 1901, 178,327), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemçen. *Governor-Gen.* M. Lutaud

## FRENCH COLONIES.

The Colonial possessions of the French Republic have a total area of 4,084,420 square miles, including Algeria and Morocco. The population of this vast area is estimated (1911) at 54,270,038.

In ASIA.—*French India* includes Pondicherry on the Coromandel coast, Chandernagore on the Hooghly, Karikal, in the Cauvery delta, Yanaon, in the Godavery delta, and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of 277,700. *French Indo China* comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898-9 the port of Kwang-Chow Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,370 square miles, with a population (1911) estimated at 16,600,000.

In AFRICA.—*Algeria* (*see* above) is an integral part of France. *Morocco* (*see* p. 665), is now predominantly French. *Tunis* has been a French protectorate since 1881. *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,809,732 square miles, and a population of 11,344,078. It consists of *Senegal* (94,000 sq. ms., pop. 1,250,300), capital, St. Louis; *Upper Senegal Niger* (304,000 sq. ms.), and the *Niger Military Territory* (133,000 sq. ms.), which have a total population of about 6,096,000; *French Guinea* (92,800 sq. ms., pop. 1,737,330); *Ivory Coast* (126,100 sq. ms., pop. 1,216,300); and *Dahomey* (38,000 sq. ms., pop. 876,900), while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,000 square miles and a population of about 250,000. *French Equatorial Africa* consists of the *French Congo* (532,000 sq. ms., pop. 2,000,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. ms., pop. 208,000) and of the large *Island of Madagascar* (228,500 sq. ms., pop. 2,930,300) with its dependencies (Réunion, and the Mayotte-Comoro Islands). Off the south west coast are the uninhabited islands of St. Paul, Kerguelen, and Amsterdam. The total area of French Africa is thus 3,800,000 square miles, with an estimated population of 29,908,300.

There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean. The establishment of regular communication between Egypt, the Red Sea, Cameroon and Nigeria is in contemplation.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadeloupe (with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Barthelemey, and St. Martin), and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 26,300 square miles, with a population of 448,800.

In AUSTRALASIA.—New Caledonia (7,000 sq. ms., pop. 50,300) is a large island with many dependencies, and the Society Islands (Tahiti, &c.) and other islands have a total area in the Pacific Ocean of 3,276 square miles, with a population estimated at 82,200. The New Hebrides are under joint Franco British administration.

## THE GERMAN EMPIRE.

**Emperor* William II. (King of Prussia), son of the Emperor Frederick III. and the Empress Victoria, Princess Royal of Great Britain. *Born* 27 Jan., 1859; *succeeded* his father 15 June, 1888; *married* 27 Feb. 1881, Princess Augusta Victoria of Schleswig Holstein, born 22 Oct., 1858.

*Heir Apparent*, H.I. and R.H. Crown Prince William, *born* 6 May 1882, married (1905) H.R.H. Cecilie of Mecklenburg-Schwerin, and has issue.

(August, 1911.)

*Imperial Chancellor and Prussian Premier*, Graf von Hertling
*Interior*, Herr Helfferich.
*Foreign Affairs*, Herr von Kühlmann.
*Colonies*, Dr. Solf.
*War*, Gen. von Stein
*Navy*, Admiral von Capelle.
*Justice*, Herr von Krause.
*Imperial Treasury*, Count Roedern.
*Posts and Telegraphs*, Herr Rüdlin.
*Food Control*, Herr von Waldow
*War Savings*, Herr Schwander

The Empire, according to the Constitution of 16 April, 1871, is a Confederate League, bearing the name German Empire, under the hereditary presidentship of the King of Prussia, who holds the title of German Emperor, and represents the Empire in all matters affecting international law; in the name of the Empire he declares war and makes peace, concludes alliances and treaties with foreign States, and accredits and receives Ambassadors. Except to repel an attack on the territory or the coasts of the League, the Emperor cannot declare war in the name of the Empire without the consent of the Federal

* *See also* p. 652.

Council, *Bundesrat*, which represents the sovereignty of the Federated States of the Empire. The consent of the Federal Council and Reichstag is necessary in regard to certain specified treaties (cf. Art. 4 of the Constitution). The Emperor has the right to summon, open, adjourn, and close the Reichstag. The Federal Council and Reichstag must be summoned to meet every year; the Reichstag cannot be summoned without the adherence of the Federal Council. All Bills are brought before the Reichstag in the name of the Emperor after acceptance by the Federal Council. Laws are promulgated by the Emperor in the name of the German Empire after acceptance by the Federal Council and the Reichstag. All edicts and orders of the Emperor made in the name of the Empire must be countersigned by the Chancellor, who is thereby responsible for them. The Emperor is the *Bundesfeldherr*, or Federal Commander-in-Chief of the whole German Army. In time of war he holds supreme command. In time of peace the Kings of Bavaria, Saxony, and Württemberg retain their sovereign rights as heads of their respective armies. In time of peace the Bavarian army administration is wholly independent of that of the rest of the German army and only falls under the direct command of the Emperor when the army is mobilised for war. The rights of the Kings of Saxony and Württemberg in time of peace are not quite so extended as those of the King of Bavaria, but their armies remain distinct and form separate army corps. The contingents of all the other Federal States are under the direct command of the King of Prussia, and under Prussian administration. The troops of all the Federal States swear loyalty to their respective sovereigns and obedience to the orders of the Emperor—in the case of Bavaria this obedience is limited to war-time. On the other hand, the German Navy is Imperial (*Kaiserlich*), and the Emperor as such is the supreme Admiral in Command of the Imperial German Navy in peace as well as war. The Reichstag, or Imperial Diet, consists of 397 Deputies, the original idea was that there should be one deputy to every 100,000 inhabitants of the Empire. The Reichstag sits for a period of five years, unless previously dissolved by the Emperor. Amongst the matters belonging to the jurisdiction of the Empire are all those that refer to the army and navy, the common, civil and penal law of the Empire, posts and telegraphs (excluding Bavaria), inland navigation, the Customs of the Empire, weights and measures, coinage, banking, patents, copyright, foreign trade, the German mercantile marine, the Press, everything relating to the right of forming corporations, police, sanitation, colonisation. The railways, as a result of the defeat of Bismarck's plan to imperialise them, remain subject to State legislation, but the Constitution (Art. 42) requires that they shall be administered as a homogeneous network, and this aim, as regards, rates, regulations, rolling-stock, etc., has to a large extent been achieved. The movement to imperialise the railways still exists, but makes little progress. A majority of the Federal Council and Reichstag is necessary, and also sufficient, for the validity of a law. The laws of the Empire take precedence of the laws of the Federated States within the scope of the Constitution of the Empire, they are compulsory on all Governments of the Empire.

The German Empire has a total area of 208,780 square miles, and consists of the following 26 States:—Prussia (including Lauenburg and—since 1890—Heligoland), Bavaria; Saxony; Württemberg, Baden, Hesse, Mecklenburg-Schwerin, Saxe-Weimar, Mecklenburg-Strelitz, Oldenburg, Brunswick, Saxe Meiningen; Saxe-Altenburg, Saxe-Coburg-Gotha, Anhalt, Schwarzburg Sondershausen, Schwarzburg-Rudolstadt, Waldeck, Reuss (elder line), Reuss (younger line), Schaumburg-Lippe, Lippe-Detmold, Reichsland (Alsace-Lorraine), Lübeck, Bremen, Hamburg.

The census of 1910 shows a total population of 64,926,999, of whom 32,031,967 are males and 32,895,432 females.

The population of Germany is to that of England as 5 to 3. As to crime, the proportion of bigamy is 1 to 2 nearly; in incest, about 13 to 1; in procuring it is 254 to 1; in procuring abortions it is 29 to 1; in unnatural offences it is 7 to 1; in rape and other sexual crimes it is about 5 to 1; in murder, manslaughter, and other death-causing crimes it is 3 to 1; in arson it is about 4 to 1. With regard to divorces it is as 1 to 2. As to illegitimate births it is 5 to 1. The number of suicides is four times as great as in England.

The religious confessions were divided in 1910 as follows: 39,991,401 Protestants, 23,821,453 Roman Catholics, 283,946 Christians of other categories, 615,021 Jews, and 214,178 adherents of other religions, or unknown. The number of registered Socialists has decreased from 1,085,905 in 1914, to 343,062 in 1919.

There were in 1900 4,491,129 persons residing within the limits of the Empire who spoke a non-German language, viz.:—2,985,362 Dutch, 20,677 Frisians, 141,062 Danish (and Norwegians), 8,998 Swedish, 20,217 English, 211,679 French, 11,841 Walloons, 65,961 Italians, 2,039 Spanish, 479 Portuguese, 3,086,489 Poles, 142,049 Masurians, 100,213 Kassubians, 93,139 Wends, 64,380 Moravians, 43,016 Czechs, 9,627 Russians, 106,905 Lithuanians, 8,198 Hungarians, 14,835 not above specified.

There are 48 large towns with over 100,000 inhabitants, and of these 33 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 in Baden, and 1 each in Württemberg, Hesse, Reichsland, and Brunswick, while two of the three Hanse Towns also exceed 100,000.

The educational system is remarkable for the ease with which it meets the requirements of every social class. Its efficiency is best exemplified by the annual military recruiting statistics, which in 1910 disclosed a proportion of only 0.8 p.c. of illiterate recruits. It is, moreover, practically homogeneous in all branches throughout the empire. The Prussian administration may be cited as typical, comprising (I.) a general control by the Minister of Public Instruction over all educational establishments, public or private, save those special schools dependent on other ministries, (II.) a provincial organisation charged with management of public elementary schools, and (III.) Special Provincial Boards charged with the management of Secondary and Normal Schools, their curricula, appointment of teachers, and leaving examinations. (I.) *Primary: Comp. and free, ages 6–14.* Average attendance, 95 p.c. Maintained by local taxation, with State grants. (II.) *Secondary.* Evening continuation schools for children of working classes; city intermediate schools in two grades; gymnasia

(some State-maintained) preparing for university and learned professions with a 9-yrs. course. The standard to qualify for military service as a 1 yr volunteer is that for advancement from the lower to the upper second class of a State gymnasium, progymnasium, similar, but lacking the highest class of the gymnasia. Real gymnasia confining classical instruction to Latin; Real progymnasia similar, but lacking higher classes of the foregoing. Oberrealschulen and Realschulen making a special feature of modern languages. Lehrer-Seminarien and Fachschulen supplying specialised instruction. Private institutions are comparatively few. For girls, special Töchterschulen (high schools). Here private establishments predominate. (iii.) *Special Schools* are very numerous throughout the empire, special attention being devoted to agriculture, commerce, mining, forestry and music. *Polytechnics* grant degrees in engineering, &c. *Secondary Education* generally is neither free nor compulsory, but abatement or remission of charges is discretionary. (iv.) *Universities*, State-maintained and administered, are Berlin, Bonn Breslau, Erlangen, Freiburg, Giessen, Göttingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Königsberg, Leipzig, Marburg, München, Münster, Rostock, Strassburg, Tübingen, and Würtzburg.

EMIGRATION.—At the commencement of the nineteenth century few Germans emigrated, but about fifty years afterwards there was a strong desire to leave the Mother Country. Out of thirty millions of emigrants from Europe in the nineteenth century Germany contributed about five millions, or one-sixth of the whole number. The highest figure attained in one year was that of 1881 (220,902), but the numbers of overseas emigrants are now seldom above 30,000, the figure for 1913 being 25,843, and for 1914, 11,803.

PRODUCTION AND INDUSTRY.—Germany is becoming more and more a manufacturing country. In 1907, 32·6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11·5 per cent. by trade and traffic. Of the total area in 1907, 78,630,140 acres were under cultivation, and 34,272,141 acres were woods and forests. Germany supports about nine-tenths of her population by her own produce. The mineral produce was valued in 1912 at £302,230,000, and included 290,289,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore, rock salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Mühlhausen, Chemnitz, and the provinces of Westphalia and Silesia are the great centres of the textile industries.

MERCANTILE MARINE.—On January 1st, 1913, the Mercantile Marine consisted of 2,298 sea going steamers of 1,784 register tons and upwards (4,380,348 tons gross register), and of 2,220 sailing vessels (447,870 tons gross register). The number of seamen in the German Mercantile Marine on January 1st, 1913, was 77,726 (January 1st, 1912, 78,130). Germany now ranks second in the list of maritime countries. There were completed in 1912 at German yards for German firms, 659 sea-going ships of 383,230 tons gross, and at German yards for foreign firms, 124 sea-going ships of 31,238 tons gross.

COMMUNICATIONS.—The total length of the *Railroads* in the Empire in 1913 was 39,803 miles, of which about 92 per cent. belong to the different States. There are 1,200 miles of inland canals and 1,600 miles of ship canals. The number of registered automobiles and motor cycles (January 1, 1914) was 77,389.

IMPERIAL POST (including Bavaria and Würtemberg, 1911).—Length of telegraph lines, 208,600 kilometres (length of wires, 1,307,200 kilometres); telegrams handled in, 49,532,000; post offices, 41,423; telegraph offices, 30,031; wireless stations, 14; telephone call-stations, 87,400; letters delivered, 5,994,300,000; cash on delivery orders, £650,100,000; money orders, £4,626,900,000; telegrams despatched, 49,233,000; telegrams received, 49,643,000. The number of employés in the service of posts, telegraphs, and telephones was 320,363.

DEFENCE.—*The Army*.—The remarkable military activity of the German Empire in recent years culminated in the Law of 1913, of which the main principles were (1) to increase substantially the annual recruit quota, (2) to anticipate, complete, and enhance the operations of the Laws of 1911 and 1912, and thereby to increase largely the Peace Establishment of units, to diminish the reliance placed upon Reserve elements, to add some necessary formations, and to lower the average age of the mobilised Field Army. *By these processes the period necessary for mobilisation will be curtailed very materially, and the readiness of the Field Army for action will be perfected—results of deeper significance than the mere numerical increase.* *The War Chest* (cash immediately available for emergencies of mobilisation) is increased from £5,000,000 in gold to £12,000,000 in gold and £6,000,000 in silver. Recruits join either (1) Active Army, 2 or 3 yrs., *then* Active Reserve, 5 or 4 yrs., 2 trgs., each 8 weeks *then* Landwehr, 1st Ban, 5 or 3 yrs., 2 trgs., each 14 days (for disintd. branches only), *then* Landwehr, 2nd Ban, to age 40, 10 trg. *Then* [Landsturm, 2nd Ban, to age 45]. *Or* (2), Ersatz Res., 12½ yrs., 3 trgs. of 20, 6, and 4 wks. *then* [Landsturm, 1st Ban, to age 39, and, 2nd Ban, to age 45]. New Law provides for progressive increase of *Peace Establishment*, which, by the end of 1913, will be (*for Active Army only*) 36,000 offrs., 12,000 officials, 28,000 (or more) one-year volunteers, 771,000 others. *War Strength of Field Army, First Line*, may be 1,300,000, organised *Landwehr*, 750,000. In all, some 5,400,000 *fully-trained* men were available in 1913, and little or no reliance was placed upon partly-trained *personnel*. Ersatz Reserve training has probably been discontinued. About £60,000,000 was estimated for 1914.

*The Navy*.—6 battleships, 7 battle cruisers, 9 cruisers, 43 light cruisers (6 building), 121 destroyers (22 building), 80 torpedo boats, 24 submarines (14, or more, building), in February, 1914.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in the Empire a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 1, 1892. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices,

domestic servants, laundresses, dressmakers, seamstresses, housekeepers, charwomen), overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmistresses, tutors and governesses—in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codifies previous legislation, establishes new Insurance Authorities, reduces working-class influence in the Accident Insurance organizations, provides pensions for widows and orphans, and makes other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911.

The following statement relative to the finances of Germany, made by Herr Dernburg, was published in the *Times* of 28 *Nov* 1917 —

"The financing of the war has really not been effective. We have voted between £24,000,000 and £27,500,000 of new taxes, but at the same time we have lost customs duties to the amount of at least £22,500,000. We are able to balance the Budget only by leaving the whole of our military expenditure out of the ordinary estimates and entering it as extraordinary war expenditure. We have now debt to the amount of £5,000,000,000, and for the service of this debt we need from £250,000,000 to £300,000,000. But in this direction practically nothing has been done. The result is that the credit of the German Empire has been terribly reduced abroad."

## GERMAN COLONIES.

The German Colonies, at the commencement of the war, had a total area of 1,134,239 sq. miles, with a population of about 14,800,000, of whom 24,250 (including garrison and police) were whites. Of these whites about 18,500 were settled Germans. Practically the whole area has since been captured and occupied by the Allies.

AFRICA.—*Togoland:* Area, 32,629 sq. miles, population about 1,000,000. Capital, Lome. Budget, 1912: Receipts, £300,000; expenditure, £256,000; trade (1912), Imports, £1,000,000; exports, £1,000,000.—*Cameroons:* Area, 191,000 sq. miles; population, 2,500,000. Capital, Buea. Budget for 1912: Receipts, £480,500; expenditure, £1,000,000; trade (1912): Imports, £2,500,000; exports, £2,000,000.—*German South West Africa:* Area, 322,398 sq. miles; population, 220,000. Capital, Windhoek. Budget, 1912: Receipts, £680,480; expenditure, £2,250,000; trade (1912), Imports, £2,250,000; exports, £1,500,000. On July 9, 1915, Gen. Botha accepted the unconditional surrender of all the German forces in South-West Africa.—*German East Africa:* Area, 384,070 sq. miles; population, 7,645,000. Capital, Dar-es-Salaam. Budget, 1912: Receipts, £600,000, of which State aid, £1,251,135; expenditure, £1,800,500; trade (1912), Imports, £2,250,000; exports, £1,250,000.

PACIFIC.—*German New Guinea* (now in occupation): Total area, 90,000 sq. miles; population, Capital, Rabaul. Trade (1912), Imports, £83,300; exports, £181,250.—*Solomons, Caroline, £194,500 Marianne, and Marshall Islands* Area, 2,160 sq. miles, population, 120,000. Capitals, Ponape and Yap. Budget, 1912: Receipts (with New Guinea), £78,000; expenditure (with New Guinea), £138,000; trade (1910), Imports, £117,750; exports, £300,120.—*Samoa:* Consists of two main islands, Savaii and Upolu. It was taken possession of by a force of N.Z. troops on 29 Aug., 1914, and is still held by a New Zealand garrison. It possesses a powerful Telefunken wireless station, only completed in July, 1914, by which communication is maintained with Honolulu (2,000 miles), Awanui, N.Z. (1,600 miles), and Fiji (900 miles). Area, 1,050 sq. miles; population, 1907, native, 36,000 white, 1,650, exclusive of Government officials. Estimated Revenue (1917-18), £80,000; Expenditure, £75,000. CAPITAL, Apia. The chief articles of export are copra, cacao, and rubber

ASIA.—*Kiao-Chau* (capitulated to an Anglo-Japanese force in November, 1914, and is now in occupation by Japan): Leased for a period of 99 years from China in 1898. Area, 193 sq. miles, leased territory and sphere of interest, 1,750 sq. miles, population, 84,000. Chief seat of government, Tsingtau. Budget, 1912: Receipts, £322,000 expenditure, £750,000, trade (1910), Imports, £1,500,000, exports, £1,500,000; the ocean shipping entered in 1913 being 936 vessels of 1,329,204 tons. The German garrison in Kiao-Chau consisted of 92 officers, 2,250 German non-commissioned officers and men, and one battalion of the East Asiatic Garrison brigade. It was further agreed that within a 50-kil zone (31 English miles) from all points of the leased territory the Chinese Government should no longer, for the space of 99 years, be entitled to take any steps without previous authorisation from the German Government. Germany also received mining and railway concessions in the province of Shan Tung, which is called "the sphere of influence," area about 2,250 English sq. miles, population 84,000. The leased territory, as it is called, comprises the bay up to high-water mark, its islands, and the north and south tongues of land at the mouth of the harbour

Germany's share in the trade with her colonies in 1912 was about 3½ per cent.

# States of the German Empire

## KINGDOM OF PRUSSIA.

*King*, William II., German Emperor (q.v.).
*President of the Ministry, Chief von Bethmann Hollweg.*
*Minister of State, Minister Bethmann Hollweg.*
*Foreign Affairs*, see the Ministries.

*Interior*, Herr Drews.
*Finance*, Herr Hergt.
*War*, Gen. von Stein.
*Public Works*, Herr von Breitenbach.
*Agriculture, Woods and Forests*, Herr von Blankart-Rotha.
*Trade and Commerce*, Herr Sydow
*Instruction and Worship*, Herr Schmidt.
*Minister of Justice*, Herr Spahn.

Prussia comprises the larger portion of Germany, and consists of 13 provinces, with a total area of 134,638 English square miles and a population in 1910 of 40,184,409.

Of the total population 19,849,775 are males and 20,327,494 females. There are 33 towns with over 200,000 inhabitants. The number of births in 1914 was 1,202,968, against 1,259,500 in 1913, while in the year ending April 30, 1916, they were 19,700 fewer than in 1914, a decrease of 28 per cent. The number of deaths in 1914 was 844,776, against 696,490 in 1913. Marriages were 286,127, against 313,709. Between 1904 and 1914 the excess of births over deaths fell from 960,968 to 359,192.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,295 feet. The forests are extensive, occupying an area of nearly 20,426,492 acres, chiefly consisting of fir. Minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

CAPITAL, Berlin. Population (1910), 2,070,695.

## KINGDOM OF BAVARIA.

*King*, Ludwig III., *born* 7 Jan., 1845, *proclaimed* King, 5 Nov., 1913, *married*, 1868, the Archduchess Maria Theresa, of Austria Este.
*Heir Apparent*, Crown Prince Rupprecht, *born* 18 May, 1869, *married*, 1900, Marie Gabrielle, Duchess in Bavaria, and has issue, two sons.
*Ministers of State—President and Minister of Foreign Affairs*, Dr Freiherr von Hertling; *Justice*, Dr. von Thelemann; *Interior*, Dr Freiherr von Soden-Fraunhofen; *Instruction*, Dr. von Knilling; *Finance*, Dr. von Breunig; *Communications*, von Seidlein; *War*, Gen. Freiherr Kress von Kressenstein.

The second Kingdom in size and population of the German Empire. It is divided into two principal parts. The eastern portion, comprising great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c.

## KINGDOM OF SAXONY.

*King*, Frederic Augustus III., *born* 25 May, 1865, *succ.* 15 Oct., 1904.
*Heir Apparent*, his son, Crown Prince George, *b.* 15 Jan., 1893.
*Ministers of State*, Freiherr von Hausen, Dr. Beck, Graf Vitzthum von Eckstädt, R. von Seydewitz, Dr Nagel.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,896 English square miles, with a *population (1910)* of 4,806,661. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various ores); special manufactures of Saxony are Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden (pop. 517,657), Leipzig (pop. 587,892), the great book-marketing, with, next to those of Berlin and Munich, the most frequented University of Germany (having 4,095 matriculated students in 1912–13), Zwickau (pop. 72,600), and Chemnitz (pop. 287,807), in the mining district, Plauen (pop. 122,978), Zwickau (pop. 73,600), and Chemnitz (pop. 287,807), the Manchester of Saxony.

## KINGDOM OF WÜRTTEMBERG

*King*, William II., *born* 25 Feb., 1848, *succeeded* 6 Oct., 1891; *marr.* (1) Princess Marie of Waldeck (*died* 30 April, 1882); (2) Princess Charlotte of Schaumburg-Lippe.
*Heir Presumptive*, Duke Albrecht.
*President of Ministry*, Dr von Weizsäcker

A Kingdom of South Germany, with an area of 7,534 English square miles, and a population (in 1900) of 2,437,574, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 24,522 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines the forest, grain, and pasture-land being nearly equally distributed through out. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, freestone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen woollen and cotton fabrics, carpets, paper, leather gun powder, firearms, tobacco, iron and steel goods pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather woollen, hosiery, cotton and linen fabrics, straw beer wine &c.

## Reichsland

ALSACE-LORRAINE.

*Statthalter*, Count Carl von Dallwitz (1914).
*Secretary of State*, Baron von Tschammer und Osarits.

The "Reichsland" of Alsace-Lorraine (Elsass-Lothringen), formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and surrendered to Germany by the Treaty of Frankfort, after the sanguinary Franco-Prussian War, much against the wishes of the inhabitants, in 1871, embraces the fertile plain between the Rhine and the Vosges, and stretches beyond those mountains as far as Luxemburg. Wine, tobacco, hops, iron, and coal are among its leading productions, and the cotton industry is most flourishing. There is a Landtag of two chambers, of which the first consists of representatives of the churches, university towns and professional classes, and the second of 60 members elected by secret ballot. The area is 5,604 square miles, divided for administrative purposes into three districts, Ober- and Unter-Elsass and Lothringen. The population in Dec., 1910, was 1,874,014, of whom 965,629 were males and 908,385 females, while 1,406,313 were Catholics, 446,274 Protestants, and 20,389 Jews. French was spoken by about 200,000 persons. Principal towns, Strassburg (pop. 178,892), Mülhausen, and Metz.

Revenue and Expenditure (1910-11). £12,968,600
Debt (1910) ... ... (Receipts £8,585,980) ... 6,186,320

## GREECE.

*King of the Hellenes*, Alexander, *born* 1 Aug., 1893, *succeeded to the throne* 13 June, 1917
*Heir Presumptive*, his brother Paul, *born* 1901.

(The ex-king Constantine, who had married the Princess Sophia, sister of the German Emperor, and was secretly favouring the interests of the Central Powers, was deposed by the guaranteeing Powers, England, France, and Russia, on 13 June, 1917, and his second son, Alexander, appointed in his stead.)

THE MINISTRY, 27 June, 1917

*Prime Minister and War*, M. Venezelos.
*Interior*, M. Repoulis.
*Justice*, M. Tsirintanokos.
*Foreign*, M. Politis.
*Marine*, Admiral Condouriotis.
*Finance*, M. Negropontis.
*National Economy*, M Papanastasiou.
*Education*, M. Dingas
*Food Supplies*, M. Embirikos.
*Communications*, M. Sjuridis.

*Envoy Extraordinary and Minister Plenipotentiary in London*, J Grenadikis, 24 De Vere Gardens, Kensington Palace, W
*Secretary* L. Malas.
*Counsellor of Legation and Cons.-Gen.*, T Stavridis, 40 Old Broad St., E.C.

A maritime Kingdom in the south east of Europe, situate in lat. 39° 30′—41° N and long. 19° 20′—26° 37′ E., comprising an area (in 1912) of 24,800 square miles, with a population (in 1907) of 2,631,952, and enlarged by the addition of portions of Macedonia, Albania, and Thrace, and by the capture of many of the Turkish islands (in the war of 1912–13), to an estimated area of 43,500 square miles, with a population of close on 5,000,000. The country is composed of a continental portion (the southern part of the *Balkan Peninsula*), and of *islands in the Ægean*, Mediterranean, and Ionian Seas. The surface is nearly all mountainous, the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, iron ore, magnesium, emery, marble, and sponges.

*Defence.*—Service in the Army is universal and compulsory between the ages of 21 and 39. Both the land and sea forces are now in process of reorganisation. The Navy, consisted (July, 1914) of 4 ironclads, 1 modern cruiser, 14 destroyers, 4 corvettes, 13 torpedo-boats, and 2 submarines. In 1912–13 Greece, with the other members of the *Balkan League* (Bulgaria, Montenegro, and Servia), waged a successful war against Turkey, and during the progress of hostilities the island of Crete (q.v.) was annexed. Certain islands in the Ægean were occupied by Greek troops, and Salonica and other centres were captured. In 1913 a second war of Bulgaria against the remaining members of the League (and the threat of an invasion by Rumania) ended in a division of the conquered territories that proved to be very favourable to Greece, whose boundaries now extend northwards to those of Albania and Servia.

*Education* is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

*Communications.*—There are 929 miles of rail road open for traffic, and a line of about 70 miles in length is under construction in order to link up with the European system. There is a ship canal cutting through the Isthmus of Corinth, but it is rarely used by foreign vessels. The post offices number 1,150, dealing with 38,200,000 postal packets, telegraphs, 4,982 miles. The mercantile marine consists of 120 sailing vessels above 100 tons capacity, and 298 steamers (449,284 tons).

## GUATEMALA, Republic of.

*President* (1920–1927), Manuel Estrada Cabrera, born 1857
*Min. of Foreign Affairs*, Dr Luis Toledo Herrarte.
*Consul*, D. Bowman, 11 Queen Victoria Street, E.C.

Guatemala, the most northerly of the Republican States of Central America, is situated in N lat. from 13° 40′ to 17° 40′, and in W long. from 88° 13′ to 92° 30′, and comprises an area of 47,424 square miles, and a population in 1920 of 2,000,000. The Republic is divided into 23 departments, and is traversed from W to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea. Earthquakes are frequent. The country is well watered by numerous rivers. The climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. About 430 miles of railway were open for traffic in 1921. There were 3,934 kilometres of telegraph and 629 of telephones working in 1926. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being sugar, rubber, hides, bananas, and timber.

Diplomatic relations with Germany were broken off on 27 April, 1917

## HAITI, Republic of.

*President* (1923–1927), Gen. Darthiguenave £4,800
*Foreign Affairs*, Edmond Dupuy

*Chargé d'Affaires*, Abel Thiaurl, 76 Victoria Street, S.W.
*Consul*, Maurice Brès-eaz, 72 Fenchurch Street.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. The area of the republic is 10,200 square miles, with a population estimated at 2,000,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities for foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U.S.A., establishing a virtual protectorate over the Republic. It came into effect in May, 1916. The Constitution is undergoing revision. An armed Constabulary, rural and urban, under American officers, has recently been constituted. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany.

## HONDURAS, Republic of.

*President* (1926–1930), Dr. Francisco Bertrand.
*Vice-President*, Dr Alberto Membreño.
*Foreign Affairs*, Dr. Mariano Vasquez.

*Con.-Gen. in London*, 3 de Tord, 8 Idol Lane, E.C.

The Middle State of Central America, stretching in N lat. between 13° 20′ and 16°, and W long. between 83° 12′ and 89° 40′, containing 44,275 English square miles, with a population estimated as 650,000 (1925). It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Trujillo, Puerto Cortes, Omoa, Roatan, and La Ceiba, but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being mahogany, fustic, cattle, cotton, sugar, rubber, zinc, tobacco, coffee, indigo, sarsaparilla, balsa and skins, india-rubber, cedar, fustic, rose, and Tiliaceæ. There is an ignorous amount of uncultivated

* In Charge of Affairs in the absence of the Minister.

land. The number of cattle in 1914 was reported roughly 400,000. The forests are practically inaccessible, but there is a lack of communications and transport. The mineral wealth is great. In 1917 there were 580 kilometers of railway open, all on the North Coast.

Diplomatic relations with Germany were broken off on 27 May, 1917.

## HUNGARY (*See* p. 636.)

## ICELAND (*Danish Dependency*).

*Minister for Iceland (Resident)*, Einar Arnórsson.

*Presidents of Al-thing*, Olafur Briem, Stefan Stefansson.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23′ to 66° 32′ N. lat., and from 13° 20′ to 24° 32′ W. long., with an estimated area of 40,437 square miles, or greater than that of Ireland. The population was estimated in 1914 at 85,220.

The present constitution was granted in 1915, and the assembly (Al-thing) is more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1913) estimated, £1,500,000; exports, £1,000,000. Iceland is now in direct telegraphic communication with the United Kingdom.

### Foreign Ambassadors.

*Ambassador to France*, Signor Salvago Raggi; *Vienna*, Marchese Carlotti; *U.S.A.*, Conte Macchi-Cellere *Spalletta*, Conte Bosdari.

*Ambassador to London*, Marquis Imperiali, G.C.V.O., 20 Grosvenor Square, W.

*Councillor*, Prince Livio Borghese.

*1st Secretary*, Count Ercole Durini di Monza.

*2nd Secretary*, Signor Gabriele Preziosi.

*3rd Secretaries*, Signors Giovanni Balsamo, Giuseppe Lanza, Achille Trombetti, Tommaso Bertele.

*Attachés*, Signor Raffaele Quarigliа, Lieut. Remo Brunetti, Lieut. Marchese V. Doria Lamba.

*Military Attaché*, Col. A. Mola.

*Naval Attaché*, Capt. Count Rey di Villarey, C.B.

*Archivist*, Cavaliere Catani.

*Consul*, Marchese Faa di Bruno.

*Vice-Consul*, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands.* It is situate between lat. 36° 38′ 30″—46° 40′ 32″ N. and long. 6° 30′—18° 30′ E., and comprises a total area of 119,629 square miles (91,277 mainland, 19,346 islands), with a population (1911 census) of 34,686,989. The peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. The principal towns are Rome (539,489), Naples (723,008), Milan (599,800), Turin (427,732), Palermo (341,696), Genoa (272,077), Florence (232,880), Bologna (172,639), Venice (186,727), Catania (211,899), Leghorn (105,320), and Bari (105,320). Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari, while fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, asphaltus, alum, and boracic acid. Silver is

* The estimated debt remains the same. No interest has been paid since 1914, and interest at balance amounted to £200,000,000 sterling.

* Italy is also in temporary occupation of a group of Turkish islands lying between Crete and Asia Minor (Rhodes, Carpathos, Cos, Astropalia, &c.).

found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. In 1924 there were 22,169 miles of railway open for traffic, and 33,451 miles of telegraph line. The sea-going commercial marine (1923) consisted of 839 steamers (760,274 tons) and 4,693 sailing vessels (334,835 tons). The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthen ware, &c. The principal exports are olive-oil, wine, candied citron, sienna earths, pastes, coral rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c.

In 1924 the produce of the vines amounted to 947,622,000 gallons, and that of the olive crop to 236,324,000 gallons.

The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers straw and felt hats, furniture, chemical products, paper agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption. There is a large settled and floating population of Americans and English, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others.

*Defence.*—The *Army* is organised in 12 corps, each of 2 divisions, the first line consisting of 320,000 men; there is in addition, a considerable active reserve, and a mobile militia of 250,000. In consequence of the outbreak of the war, the effective strength of the Army has been greatly increased. The *Navy* in 1924 included 9 battleships (5 building), 9 armoured cruisers, 12 light cruisers (3 building), 3 scouts 24 destroyers (10 building), 76 torpedo-boats (24 building), and 22 submarines (8 building). Spezia, the chief naval and military port of the kingdom, is securely fortified.

On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916 a state of war was declared to exist with Germany.

*Education* is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

In 1924, 262,233 Italian and 12,430 foreign vessels (total tonnage 35,280,200) entered and 262,880 Italian and 10,300 foreign vessels (35,083,460 tons) cleared at Italian ports.

COLONIES.—The total area of Italian Colonies and possessions is 1,113,000 square miles, with an estimated population of 1,600,000, made up as follows *Eritrea*, 60,000 square miles (pop. 280,000), *Somaliland*, 191,000 square miles (pop. 300,000), *Tientsin Concession*, 20 square miles (pop. 27,000) *Libya, Tripoli and Cyrenaica*, 900,000 square miles (pop. 1,000,000). In *Africa* Italy obtained in 1900 the territories of Tripoli and Cyrenaica by conquest and cession from the Ottoman Empire, and possesses the colony of Eritrea, and a protectorate over part of the Somali coast, extending from Cape Guardafui to the Juba river, in which they have a station, an annual rent is paid to the Sultan of Zanzibar for the Benadir ports leased by him to Italy The Colony of Eritrea includes also the Dahlac Archipelago. The protectorate includes Aussa and the Danakil country, the Somali countries of the Sultans of Migiurtinal and of Obbia, as well as the Benadir, which is now a colony By new conventions signed with the Emperor Menelek in May, 1908, Italy obtains a slight extension of frontiers, and obtains the country between Dolo and Bardera. The commencement of Italian influence was made in 1882, when the district of Assab was transferred from a trading company to the Government. The tract of land now known as Eritrea ('Red Sea") consists of a triangular portion of barren and sandy lowland between 12° and 18° N containing in all a coast-line along the Red Sea of about 700 miles, with a total area of 60,000 square miles, and a population of about 280,000, of whom about 3,000 are Europeans. The capital is Asmara. Massowa being the chief port, where there is a good harbour and the principal product, salt, of great value as being the monetary currency of Southern Abyssinia.

For TRIPOLI, *see* p. 664.

In *China* Italy obtained in 1901 a concession of land fronting the Peiho river, with a total area of 10 square miles and a population of about 17,000 natives.

## JAPAN

*Emperor*, Yoshihito, *born* 31 Aug., 1879 *succeeded* 30 *July*, 1912 *accession ceremony* 10 Nov., 1915; *married* Princess Sadako, 10 May, 1900, and has issue 4 sons.
*Heir Apparent*, Prince Hirohito, *born* 29 April, 1901.
*Prime Minister*, Field-Marshal Count Terauchi.

" *at Middlesbrough* Waynman Dixon

*This ancient and extensive Empire consists of* four large and many small islands, said to comprise in all above 4,eee, the principal of which are Hondô (the name of the Empire being Nippon), Shikoku, Kiû-shû Hokkaidô or Yeso, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and *Formosa*, called *by the Japanese*, Taiwan. The Ainu, as uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yeso. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 235,220 square miles, with a population (1915) of 75,434,084. The islands are eminently volcanic, and 18 of the summits are *still* active, the chief of these, Fuji-san, or Fuji yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707 Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than *one-sixth of its* area is *available* for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, antimony, and zinc abound, whilst agate, cornelian, and rock crystal are also found. Gold is found in the island of Sado, and silver *mining is prosecuted on a small scale*, while there is a good supply of middling coal. Petroleum is also being produced in large quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry vegetable wax tree, and a lacquer-tree, which furnishes the *celebrated* "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa Keaki, the Paulownia imperialis is largely used for fancy boxes and works of art the maple is merely for ornament, Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all

cultivated, agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit, for the most part of inferior quality, is abundant. English fruits, such as apples, strawberries, pears, grapes, figs, and peaches are being produced.

*Commerce and Industry.*—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain, and bronze, and shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China, flour from the U.S., and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from the Dutch East Indies and Formosa; indigo from Germany and British India; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton yarns, rice, tea, fish, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, lacquer ware, and marine products.

*Communications.*—There were 6,593 miles of railroad open in 1913, in addition to 1,008 miles open in Korea and 322 miles in Formosa, while the South Manchurian Railway (China) is under Japanese control. The mercantile marine consisted in 1913 of 2,133 steamers above 20 tons (424 of them over 1,000 tons), and 1,490 sailing vessels over 100 tons. The total tonnage entered and cleared at open ports in 1913 was 29,487,469 (28,050 vessels), of which Japanese shipping accounted for 26,970,439 tons, British 1,376,364, and French 447,889. In 1914 there were 7,288 post offices dealing with 1,842,000,000 postal packets and 21,993 miles of telegraph line carrying 32,703,887 messages.

*Defence.*—Service in the *Army* is universal and compulsory between the ages of 20 and 40. The peace effective is 259,000 of all ranks. The war strength is First line, field army, about 490,000, second line, fully trained, about 500,000. The *Navy* includes 12 battleships, 8 battle cruisers, 12 cruisers, 13 coast defence ships, 8 gunboats, 60 destroyers, 26 torpedo boats and 18 submarines.

Japan declared war against Germany on 23 Aug., 1914, and has since that date done excellent service with her fleet.

*Education* is in the lower grades free and compulsory. Secondary schools are State-aided, and prepare for a 3 years' course at the Universities, which is largely devoted to the study of European languages. There are high schools for girls, and the technical and special schools are well attended. There are three State Universities, at Tokio, Kyoto, and Tohoku.

*Estimated Revenue* —

| | 1913-14. | 1914-15 |
|---|---|---|
| Ordinary | Yen 554,348,820 | £35,407,707 |
| Extraordinary | 63,020,850 | 7,230,243 |
| *Estimated Expenditure* — | | |
| Ordinary | Yen 520,491,470 | £41,430,377 |
| Extraordinary | 272,657,480 | 21,300,849 |
| Total Debt (31 March, 1914) | Yen 2,477,280,240 | |

| | 1913. | 1914. |
|---|---|---|
| Imports | £60,800,000 | £68,250,000 |
| Exports | 60,312,600 | 47,850,000 |

* The local exchange value of the yen is about 1s. 5½d.

The imports of British produce and manufacture in 1913 were valued at £7,482,819 —

| | | | |
|---|---|---|---|
| Arms & Ammuni- | | Machinery | £792,161 |
| tion | £49,181 | Matches | 118,227 |
| Chemicals | 230,688 | Electrical Apparatus | 58,318 |
| Cotton | 1,611,730 | Wool Tops | 46,829 |
| Cycles, Motor etc. | 58,177 | Woollens | 110,618 |
| Iron and Steel | 2,224,342 | | |

The exports to the United Kingdom in 1913 were valued at £12,488,667 —

| | | | |
|---|---|---|---|
| Copper ware | £21,671 | Brooms & Brushes | £201,872 |
| Oil, Fish and Meal | 1,682,647 | Rice, Corn & Grain | 1,194,687 |
| Soya Beans | 22,318 | Silk & Manuf. | 2,177,022 |
| Buttons & Studs | 218,272 | Straw plaits | 382,380 |

*Formosa.*—The island of Formosa (Taiwan) was ceded by China to Japan (2 June, 1895) in accordance with the Treaty of Peace. Its total area is 13,800 square miles, with about 3,682,000 inhabitants (1915). Imports, £4,880,499; exports, £5,877,424, in 1913. The colony has been self-supporting since 1906. Estimated revenue and expenditure (1916-17), £4,180,000.

CAPITAL, Taihoku. Population, 203,400.

*Yoshaku* (Karafuto).—The southern half of this island was ceded by Russia at the close of the war. The ceded territory has a total area of 9,844 sq. miles with a population (1913) of 63,000. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1916-17), £132,000.

The *Kwantung Peninsula* (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,200 sq. miles; population, 990,489. Dairen provides Japan with a mainland port, ice free all the year round, and the peninsula is fertile. Imports (1913), £4,652,817; exports, £6,130,445. Estimated revenue and expenditure (1916-17), £467,000.

CAPITAL, Dairen. Population, 69,468.

The *Pescadores* (Hokoto) consists of about 14 islands, with a total area of 85 square miles, and a population of 55,000.

*Korea* (Cho-sen).—By a treaty of 23 Aug., 1910, Korea was annexed to Japan and became part of the Japanese Empire.

*Governor-General*, Marshal Count Y. Hasegawa (1916).

Estimated revenue and expenditure (1916-17), £6,223,000.

Korea is situated between 124° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 178 miles from east to west, with an area of some 91,000 square miles. Population estimated at about 17,412,649 (Dec. 1915), there are about 292,227 (Dec. 1914) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. About 4,500,000 acres are under cultivation, the staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other mineral products are chiefly

gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the provinces of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass wares, and an excellent quality of paper resembling the Japanese article, but stouter. About 80 per cent. of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is 1,026 miles.

## LIBERIA.

*President* (1916–1920), Daniel Edward Howard

*Vice-President*, R. G Harmon.

*Secretary of State*, C. D. B. King.

*Treasurer*, T P Cooper

*Attorney-General*, Edwin J Barclay

*Postmaster-General*, John L. Morris.

*War*, Isaac Mckay

*Interior*, Benjamin W Payne.

*Education*, Walter F. Walker.

*Envoy Extraordinary and Minister Plenipotentiary in London*, J P Crommelin, 13 Eaton Place, S.W

*Consul General in London* (vacant)

*Consul*, J T Grein, 27 Mincing Lane, E.C.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 40,000 square miles, and extending to the interior to latitude 8° 30′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European powers since 1862 as an independent State. The population is estimated at 2,030,000, including about 12,000 Americo-Liberians. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, plantains, rubber and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass and earthenware, rum, gin, timber, and beads. The executive power is vested in a President elected for four years, assisted by a ministry, there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fourteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The organisation of the customs is being carried out by officers lent by the British, American and French Governments, with successful results. There are 13 ports of entry along the 350 miles of coast, viz. Robertsport, Monrovia, Marshall, Grand Bassa, River Cess, Greenville, Sinoe, Kroo, Harper Half Cavalla, Jenne, Webo, Grand Cess, Garraway, Nifoo and Betoo. In 1913, 350 vessels (1,230,098 net tons) entered and cleared at Monrovia.

On April 9, 1917, Liberia broke off diplomatic relations, and on Aug. 7 declared war with Germany.

Monrovia, 3,650 miles distant transit, by fortnightly English steamer from Liverpool, 22 days.

## LIECHTENSTEIN.

*Prince*, Johann II., b. 5 Oct., 1840, succ. 12 Nov. 1858.

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland, area 69 6 square miles, pop. (1910) 9,854. The main industries are agriculture (chief products being corn, wine and turf), textiles and embroidery. Revenue (1914), 1,238,300 *kronen*; expenditure 1 137,880 *kronen* (24 *kronen* = £1); no debt. CAPITAL, Vaduz. Pop. 1,306.

## LUXEMBURG.

*Grand Duchess*, H.R.H. Marie Adelaide, b. 14 June, 1894, succ. 28 Feb., 1912.

*Minister of State*, M. Eyschen.

* 4s 2d = £1.

Occupied, 1914, in defiance of treaty guarantee, by Germany

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation 1815–66, and is still included in the German "Zollverein." In 1839 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, or whose decease, 23 Nov., 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914 and is still in their occupation. The area is 999 square miles; the population (1910) 259,891, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1912 was estimated at 28,636,137 francs, expenditure 20,629,720 francs, debt (Jan. 1, 1913) 12,000,000 francs. There are 308 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 20,848), is a dismantled fortress.

*British Envoy*, Sir W. B. Townley K.C.M.G. (The Hague).

*Consul*, N. le Gallais.

## MECCA.

Hedjaz, formerly a province of the Turkish Empire in Arabia, in 1916 revolted and formed itself into an independent State under Great British protection, with Mecca as the capital. There is a permanent population of about 60,000, but this is largely augmented by the numbers of pilgrims to the tomb of Mohammed, and with these practically the whole of the trade of the place is conducted. The port of Jiddah, on the Red Sea, is about 65 miles distant from the capital.

*King of the Hedjaz and Grand Sherif*, H.H. El Hussein Ibn Ali.

## MEXICO, Federal Republic of.

The Government of which General Venustiano Carranza is at the head, with the title of *First Chief of the Constitutional Army, in charge of the Executive Power of the Nation*, was recognised in the autumn of 1915 by Great Britain, the U.S.A., and other principal countries of the world, as being the *de facto* Government of Mexico.

CABINET (*June 1917*).

*Foreign Affairs*, Señor Cerna Perez.
*Interior*, Señor Aguirre Berlanga.
*Industry and Commerce*, Señor Alberto Pala.
*Public Works*, Señor Nestor Ruiz.
*Finance*, Señor Rieto.
*War*, Señor Agustin Castro.
*Communications*, Señor Rodriguez Gutierrez.

*Minister to London* (vacant).
*Consul in London*, Don Alonso Acosta, Finsbury Pavement House, E.C.
*Liverpool—Consul-Gen.*, Luis A. Peredo 19 South John Street.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 25° to 32° 30′ N. lat. and 87 to 117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 767,005 square miles, with a population of (1910) 15,063,207. The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 17,784 feet above the sea. Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific, and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,824 miles of railroad open on 28 Sept., 1912, and 40,687 miles of telegraph. The railroads have in a large measure been built by American and English companies. The principal crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal hemp (henequen). The forests abound in mahogany, rosewood, ebony and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 43 per cent. consist of silver and gold, sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

The finances are at present in a chaotic condition owing to the prolonged civil hostilities which have occupied the various factions for the past seven years. In September, 1915, the value of the peso had fluctuated between 1/- and 2d. in Mexico City. Government "fiat" paper is alone in circulation. The extent of the public debt is unknown, and no reliable figures can be given for trade and revenue.

Imports from U.K. (1916) .. .. £374,051
Exports to U.K. (1916) .. .. .. £1,373,191

CAPITAL, Mexico City. Pop. (1910), 471,066.

## MONACO

*Sovereign Prince*, Albert, *born* 13 Nov. 1848, *succ.* 20 Sept., 1889; *marr.*, 1869, (1) Lady Mary Douglas-Hamilton, daughter of 12th Duke of Hamilton (a) Oct. 1889, the Duchesse de Richelieu, *born* 20 February, 1848.
*Heir*, Prince Louis, *born* 12 July, 1870.
*Minister of State*, Emile Flach.

*Consul-General in London* Theodore Lumley, 37 Conduit Street, Bond Street, W.
*Vice-Consul*, Paul Crémieu-Javal 39 Emlyn-more Gardens, W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east. It is about 3 miles long and 1½ miles broad, with (1911) 22,929 inhabitants, and a yearly average of over 1,500,000 visitors. The whole available ground is built over, so that there is no cultivation. There is a local police force of 200 men.
*British Consul* J. W. Keogh (Nice).
*British Vice-Consul*, C. J. Sim.

## MONTENEGRO.

*King* Nicholas, *born* 25 Sept. (8 Oct.), 1841, *succ.* his uncle, Prince Danilo, 24 Aug. 1860, *proclaimed King* 24 Aug., 1910; *m.*, 1860, Milena, daughter of Voyevod Peter Vukotich, b. 4 May, 1847; issue 3 sons, 6 daughters.
*Heir Apparent*, Danilo Alexander, born 29 June 1871; *m.* 1899, Princess Militza of Mecklenburg-Strelitz.
*Premier and Minister of Foreign Affairs and Finance*, M. Popovitsch.

*Consul-General*, Col. Sir J. Esper Parkington, J.P., D.L., 22 Mincing Lane, E.C.

A Principality until 1910, in which year it was proclaimed a Kingdom by virtue of a resolution of the National Skupshtina, on the 50th anniversary of the accession of Prince Nicholas. It was formerly a province of the old Serbian Empire which came to an end after the battle of Kossovo in 1389, since which date it has always claimed to be independent, and recognised to be so by the Treaty of Berlin (1878). It has an area of 5,603 square miles (including the territory acquired from Turkey in 1912) and a population estimated at 500,000. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, cattle, cestracina (smoked mutton), hides, and tobacco, which has been created a monopoly, and conceded for 25 years to an Italian company. The only manufactures are coarse woollens. Agriculture is the principal occupation. The ports are Antivari and Dulcigno. There is a railway from Antivari to Lake Scutari. A representative parliament was granted in 1905. In 1912 Montenegro joined with Bulgaria, Servia and Greece in a war against Turkey, the successful outcome of which resulted in an extension of Montenegrin territory at the expense of Turkey. At the outbreak of the present war she joined forces with Serbia against the Central European Powers, who are in military occupation of the entire country at the present time. The temporary seat of Government is at *Neuilly-sur-Seine, France*.

Distant about 2,200 miles.

## MOROCCO (French Protectorate).

*Sultan*, Moulai Yusef, K.C.M.G., *acceded* 1912.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°—36° N. lat. and 1°—11° 40' W. long., with a total area of about 220,000 square miles, and an estimated population of 4 to 5 millions. In 1912 a Franco-Spanish agreement fixed the boundaries between the French and Spanish zones, and the principal part of Morocco now forms a French protectorate, while Tangier is to be internationalised. Among the chief products of the country are wheat, barley maize, beans, peas, oil, esparto and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures; antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. There are no railways, except the narrow gauge strategic lines of the military service. All the principal towns are now connected by wire and wireless telegraph systems, and from Tangier there are submarine cables to Europe and Algeria. The trade is principally with France (and Algeria), U.K. (and Malta), Germany, and Spain.

*Consul-Gen.*, H. S. J. Maas, 28 Langham Street, W.
*Agricultural Commissioner*, Dr. J. J. L. van Rijn, 30 Mount Park Road, Ealing, W.

The Netherlands, Kingdom of, Europe, situate on the North Sea, in lat. 50° 46′—53° 34′ N. and long. 3° 22′—7° 14′ E., consisting of 11 provinces, and containing a total area of 12,762 square miles, with a population in Nov., 1906, of 5,954,053. The majority about three-fifths, belong to the several Reformed Churches, and the remainder are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Scheldt. The chief native products are heritage and other fish, cattle, horses, swine, sheep, poultry, eggs, seeds, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, silk damasks, cottons, woollens, sugars and other manufactured foods, tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

*Communications.*—The total extent of canals is about 2,000 miles. There were 2,324 miles of railroad open in 1913, and 5,110 miles of telegraph line. The mercantile marine, on the 31st Dec., 1913, consisted of 397 steamers, tonnage 791,330, and 390 sailing vessels of 44,671 tons. The tonnage amounted in 1913 to—entered, 6,622,000, and cleared, 6,631,000.

*Defences.*—The Home Forces consist of a modified *militia*, purely defensive, recruited by voluntary enlistment supplemented by conscription. Military service is unpopular. The numbers on a peace footing of the army are 21,000. The first and second lines can be raised to a war strength of 200,000. The Royal Navy consisted, on 1 July, 1913, of 117 vessels (9 of them ironclads, 4 protected cruisers, 13 coast and harbour defence vessels, 3 river gunboats, 8 torpedo-boat destroyers, 38 torpedo-boats, 6 mine-layers, 7 submarines, 22 special service vessels and 10 for special service in the colonies, while 2 cruisers were under construction.

*Education.*—Private State aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 93 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden, Utrecht.

*Trade and Commerce.*—The Netherlands figure largely in the trade returns of the United Kingdom. The following are the figures for imports of British produce and manufacture in the year 1908. Total, £20,098,974 —

| | £ | | £ |
|---|---|---|---|
| Apparel | 1,121,266 | Leather | 1,718,648 |
