MUTUAL LIFE ASSURANCE

# SCOTTISH PROVIDENT INSTITUTION.

ESTABLISHED 1837. INCORPORATED 1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

**ITS DISTINCTIVE SYSTEM** of **whole Life Assurance** offers to Members the advantage of **with profit** rates which differ but little from the non-profit rates usually charged.

Premiums for £100 payable at Death (with right to share in Surplus).

| Age next Birthday | 25 | 30 | 35 | 40 | 45 | 50 | 55 |
|---|---|---|---|---|---|---|---|
| During Life | £1 17 6 | £2 2 4 | £2 8 6 | £2 16 6 | £3 5 2 | £4 3 7 | £5 2 8 |
| 20 Payments. | 2 0 8 | 2 14 11 | 2 19 3 | 3 5 11 | 3 15 11 | 4 8 5 | 5 5 6 |

The **whole Surplus** goes to the Policy-holders on a system at once safe and equitable —no share being given to those by whose early death there is a **loss** to the Common Fund.

## Endowment Assurance.

### SPECIAL CLASS WITH SEPARATE FUND.

Policy-holders in this Class share exclusively in the whole Surplus thereof, and Bonuses are allotted on the compound system

## Annuities.

### RATES MAY BE HAD ON APPLICATION.

### FUNDS amount to £16,000,000.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

LONDON: 8, LOMBARD STREET, E.C., WEST END, 17 PALL MALL, S.W.

113

[illegible] in Woollens, it is incumbent upon the firm to call attention to the increased price of all woollen goods of this class that my name has been identified with for so many years. The reasons are too patent for me to dwell upon. The figures below are to be taken only as approximate. Customers besides must take into consideration the difficulties and delays now incident to commercial dealings, and Foreign clients to the impediments and restrictions imposed by the Authorities. Applications for samples should be curtailed, as only really serious ones have a chance of prompt attention, through the reduction of our staff (*see foot note a*); firm orders necessarily having precedence.

W B.

**IRISH FRIEZES** (strong, rough TWEEDS). These Cloths are recommended for **Country Suits, for Travellers,** for **Sportsmen,** and for **Cold Climates,** being substantial, warm, pliable, hard-wearing, and almost weather-proof made in various mixtures, dark and light, plain and plaids. Make also most useful and comfortable Ulsters. Price 4/6 to 6/6 yard, 28 inches wide.

Very stout **IRISH** and **SCOTCH TWEEDS** for rough country wear at home or abroad. Average 5/- to 6/6 yard. Splendid for Farmers, Gamekeepers, Mechanics, and Settlers in cold climates.

Extra thick **FRIEZES,** plain, plaid, and napped, for heavy travelling, driving, and motoring Ulsters, double width, from 10/ to 16/6 yard, also the warm, soft, and woolly Duffle Friezes.

Useful and substantial **TWEEDS** for ordinary wear, town or country, 4/9 to 7/3 yard, 28 inches. (For youths wear many of these are excellent, being hard twisted and closely woven.)

**"SAXONY"** and **WORSTED TWEEDS** for professional or business wear, made from, or mixed with, fine colonial wools. 56 in., 10/6 to 17/6 yard according to weight and degree of fineness

**Thin Hand Loom** and **Power Loom TWEEDS** make capital suits for warm climates or for home summer wear, being light, woolly, and cool. Single width from 3/6 and double width 7/6 to 10/6 yard. Some of these are also admirably suited for Ladies' Gowns, Cloaks, and Ulsters, others for Cycling, and some for small boys suits.

**CONNEMARA, TIPPERARY, ANTRIM, CORK, KERRY, DONEGAL, ZERRIGAL** and **MAYO HOMESPUNS:** These are hand-spun and hand woven by the peasantry, and are priced according to weight and character, width 27 in. to 30 in., and price varies between 5/9 and 6/9 yard. Many of these webs are extremely rare and distinctive.

A vast stock of the famous **HARRIS, LEWIS, SHETLAND,** and **ST KILDA** HOMESPUNS. **NATURAL WHITE, BROWN,** and **GREY HOMESPUNS,** light, medium, and heavy **DYED HOMESPUNS,** beautiful and artistic colourings, exclusive. For ladies wear **Special TWEEDS** for Mourning and Clerical wear, 4/6 to 7/9 yard, 28 in. wide.

**NAVY SERGES** of superior manufacture and hard wear, comprising the recognised yachting qualities, those for ordinary wear, light, medium, and heavy, and the rough Navy **SERGES;** price according to quality and weight, 3/9 yard upwards, 56 in. Also Black and Grey **SERGES.**

**OVERCOATINGS, BLACK** and **GREY COATINGS, RAIN COATINGS, WHIP-CORDS** for **RIDING TWEEDS** and **TROUSERINGS,** all of sterling value.

**SUPERFINE FLANNELS & TWEEDS,** also **CASHMERES;** for thin coat **TROPICAL SUITS TRAVELLING RUGS (IRISH & SCOTCH),** in great variety, 17/6 to 50/-.

**HAND-KNITTED HOSIERY,** made by the Irish and Scotch peasantry Socks, 2/- to 3/6 pair Stockings, plain ribbed, 4/9 to 6/6 pair, Fancy, 5/6 to 7/9 pair Gloves, 2/6 to 4/6 pair **SHETLAND** knitted suits, mittens, gloves, jerseys and cardigans.

**FLANNEL TWEEDS** for thin tropical suits, made of selected home wools, including natural browns and useful mixtures, well spun and close woven. They wear extremely well and wash without shrinking. Highly recommended also for semi tropical wear Also for travellers and explorers. 3/ to 5/3 yard 28 in. **SHIRTINGS** for Colonial Wear, all wool, 2/6 to 3/6 yard.

---

(a) Patterns of any of above will be sent on approval to bona-fide applicants, who should be explicit in stating their wants as to quality, quantity purpose, and taste. This materially assists a judicious selection In U.K. patterns to be returned within a week. Abroad in two weeks after receipt.

With few exceptions I allow a discount of 10 % off above prices for orders aggregating over 100 yards at a time—21 % ditto over 50 yards; and 5 % over 25 yards—an inducement to circulate the patterns amongst friends, especially when sent to distant countries. Selling Agents appointed abroad private; and trade applications invited.

Parties abroad, not caring to wait for Patterns to be sent to order from may depend upon my exercising diligence and fidelity in selecting for them, if they give a clear indication of their wants and enclose a remittance as I know by experience the kind of cloths best suited to every climate and country). Any surplus will be at their disposal.

Arrangements have been made with tailoring firms of repute to make up these cloths if desired by Customers Although we do not make the extravagant promises of some advertisers, we shall endeavour to maintain our reputation in this department also. To share in this arrangement, send usual measurements, or old suit, or coat.

Average quantities for men's SUIT 7 yds. 28 in. or 3½ yds. 56 in.; ditto for OVERCOAT, 5 to 7 yds. 28 in. or 2½ to 3½ yds. 56 in. Weight varies from about 8 lbs. for a thin Cashmere or Flannel to 5 lbs. for a thick Frieze.

Telephone 2303 Gerrard. (Estd. 70 years.) T A "SELFHELP, LONDON"

BRITISH EMPIRE INDUSTRIES.
The BRITISH EMPIRE INDUSTRIES SECTION consists of a series of special articles expressly written for WHITAKER'S ALMANACK upon products of the British Empire and goods manufactured or distributed by Representative British Firms.
See pages 771 to 841

ESTABLISHED 1868.
AN
Almanack
For the Year of Our Lord
1918
BY
JOSEPH WHITAKER,
CONTAINING AN ACCOUNT OF THE
ASTRONOMICAL AND OTHER PHENOMENA
A vast Amount of INFORMATION respecting the GOVERNMENT, FINANCES, POPULATION, COMMERCE, and GENERAL STATISTICS of the various Nations of
The World
with special reference to
The British Empire
and
The United States

Book.—WHITAKER'S ALMANACK is supplied to the Trade on the distinct understanding that it will not be sold to the Public at less than the published price.

# PREFACE TO THE L^TH ANNUAL VOLUME.

(1918.)

THE FIFTIETH ANNUAL ISSUE of this publication finds the World still engaged in hostilities—started originally in 1914 to further the ambitions of an autocratic prince—bringing untold misery and hideous slaughter to millions, and there is as yet little prospect of their early cessation. It would, perhaps, be tempting to hazard a guess as to the date of the termination of the greatest and most sanguinary war ever waged in the history of mankind, but, for half a century, WHITAKER'S ALMANACK has flourished without making any attempt to delve into the future, and this record must not now be broken.

The Astronomical section has received a more than usually careful revision with a view to making it readily accessible to the less instructed amateur. The Navy and Army Lists have this year been omitted entirely, as nothing at all adequate relating to either Service could be presented. Honours and Decorations are still multiplying and cause an ever increasing pressure on our available space. The new ORDER OF THE BRITISH EMPIRE, and the COMPANIONS OF HONOUR will be found duly recorded. The steady growth of GOVERNMENT DEPARTMENTS will be noted, and a special interest is attached to the new Offices, some of which now appear for the first time in our pages.

Among other subjects receiving special notice may be mentioned "Housing of the Working Classes," the "Redistribution Proposals" and "Proportional Representation," and the Naval Operations of the last twelve months. The growing importance of waterways is emphasised in an article on the Inland Canals of the United Kingdom. "The Cost of the War," the New Empire Honours," and "Liquor Traffic" are dealt with while Aeronautics, Good and Bad Harvests of the last few years, Geographical, Dramatic and Scientific Summaries are included. The "Diary of the War" records the essential features in each field of hostilities to the end of October 1917. Co Partnership and Labour, Finance and the War, also receive attention.

The section, British Empire Industries, which last year attracted considerable attention, has been continued and extended. The ruling conditions at the present time have affected, as they were bound to do, some of the data usually looked for in the ALMANACK, but every effort has been made with respect to their revision and to ensure the general accuracy of its information.

The Editor has once again to express his hearty thanks for the cordial co-operation of numerous correspondents in all parts of the World for many valuable suggestions tending to the improvement of the ALMANACK. It has been impossible in every instance to embody them in the present issue, but each one has been carefully considered and noted for future use. In order that such communications may be dealt with as they merit, it is most desirable that they should reach the ALMANACK Office before the end of October.

## INCREASES IN ARMY AND NAVY PAY

INCREASES in Army and Navy Pay, to take effect from Sept. 29 and Oct. 1 respectively, were announced on NOV 26, 1917

### ARMY

Privates of Infantry will receive a minimum of 2s. 6d. a day Lance-Corporals, 2s. 9d., Corporals, 3s. These rates will cover the 3d. hitherto given after two years' service as Class II proficiency pay Those who qualify for Class I proficiency pay will receive an extra 2d. after six months' service instead of two years. Similar changes, with the same minimum of 2s. 6d., will apply to Cavalry and Artillery

Compulsory allotments within the limits of 3s. 6d. a week for Privates and Corporals, and 5s and 2d. a week for higher ranks, will be paid for all arms, without deduction from normal rates of pay

Cavalry, Artillery, and Infantry Sergeants and higher ranks drawing Class I proficiency pay will continue to draw 6d. as at present, but after six months instead of two years, and in addition will receive an increase of 2d a day to their pay

R.E., A.S.C., A.O.D., R.A.M.C., and A.V.C. will continue to be rated for engineer and corps pay as at present, but in no case will be less than 2s. 6d. a day An additional 2d. a day will be given to all British soldiers on normal rates of pay for each complete year's service since the outbreak of war Hospital stoppages are abolished, except in cases where the man is in hospital through his own fault.

Men who have completed 21 years service for pension may have their pensions then assessed and paid to them in addition to their pay, with effect from the outbreak of war

### NAVY AND MARINES.

Additions to pay —A.B. ratings, 2d. a day Leading ratings, 3d. a day, Petty Officer ratings, 6d. a day, Chief Petty Officer ratings, 9d. a day, with an increase of 3d. a day to A.B. ratings after three years instead of after six years as at present messing allowance at 9d (at present 5½d.), abolition of hospital stoppages, free kit (now free on entry).

The State to take over a portion of the allotment not exceeding 3s. 6d. in the case of allotments amounting to 5s. or more a week, and in the case of smaller allotments to dependents other than wives such lesser sums as will leave the men chargeable with 2s. 6d. a week. In the case of boys whose pay normally does not admit of an allowance in excess of 2s. a week, the State to take over 1s. of the allotment.

Pensions to be paid to men who have completed time for pension and are detained under Proclamation, the same to be retrospective as from the beginning of the war, minus in each case the value of the detained pay already received.

"Injurious pension" for 21 years' service.

The total increased charge is about — 1st year, £65,000,000, and year, £80,000,000.

## DURATION OF LIGHT AND DARKNESS.

THE second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or of Sun or Moonlight. These small figures represent the twelve hours from 6 P.M. to 6 A.M., and have four divisions, each representing three hours. From the 22nd to the 28th of Jan. 1918, there is moonlight from 6 P.M. till 6 A.M., but from the 8th to the 14th it will be seen that there is no moonlight. In the summer months the Sun comes to our aid.

THE DIAGRAMS USED ARE—

# WHITAKER'S ALMANACK, 1918.

BEING THE SECOND AFTER BISSEXTILE OR LEAP YEAR, AND 8 AND 9 OF KING GEORGE V

Mean Longitude of Moon's Ascending Node, January 1, 291° 0′ 17″

## Eclipses, Occultations, and other Celestial Phenomena.

*January* 1. Day breaks at 6h. 22m. *morn.* Civil twilight ends, 5h. 38m. *aft.* *Night* begins, 6h. 5m. *aft.* The length of the Day from Sunset to Sunrise is 7h. 43m.

*Note.*—In these pages the termination of Civil twilight is defined as the moment when the Sun is 6° below the horizon. Night begins and Day breaks when it is 18° below.

*Jan.* 1. 5h. *aft.*, Earth at least *distance from the Sun*—91,340,000 miles. Perihelion.

*Jan.* 3. Occultation of $p^3$ Leonis magnitude 6·1. See p. 80.

*Jan.* 4. Mars in conjunction with ☽, 10h. 12m. *morn.* $\delta$ 8° 46′ N.

*Jan.* 4. Venus at Greatest Brilliancy.

*Jan.* 5. Mean Time of Sun's semidiameter crossing the meridian, 12h. 10·6s.

*Jan.* 6. Jupiter's Satellite III in eclipse. See p. 78.

*Jan.* 13. Jupiter's Satellite III in eclipse. See p. 78.

*Jan.* 15. Venus in conjunction with ☽, 10h. 42m. *morn.* 0° 49′ N.

*Jan.* 18. 9h. *morn.*, Venus at a stationary point.

*Jan.* 21. Occultation of Pleiad III. 16 and 32 Tauri, magnitudes 5·9 and 5·8. See p. 80.

*Jan.* 21. Jupiter's Satellite III in eclipse.

*Jan.* 22. Jupiter in conjunction with ☽, 1h. 49m. *morn.* 3° 19′ S.

*Jan.* 24. Mercury at greatest elongation (24° 42′) West, 4h. *aft.*

*Jan.* 26. Neptune in Opposition, 11h. *morn.* Distance from Earth, 2,698,800,000 miles.

*Jan.* 28. 7h. *aft.*, Jupiter *stationary*.

*Jan.* 26. Occultation of *g* Geminorum magnitude 5·0. See p. 80.

*Jan.* 27. Saturn in conjunction with ☽, 3h. 36m. *aft.* $\lambda$ 4° 28′ N.

*Jan.* 30. Occultation of *e* Leonis, magnitude 5·1. See p. 80.

*Jan.* 31. 6h. *aft.*, Saturn in *Opposition*. Distance from Earth, 736,294,000 miles.

In this month the Mornings in crease 23m., and the Afternoons 46m.

Neptune may be observed in this month. See p. 79.

Constellations near the South meridian at 10 p.m. Taurus, Orion, Auriga, Canis Major, Canis Minor, Gemini, Eridanus.

*The Opposition of Saturn.*—Last year Saturn was in Opposition on Jan. 17, and the planet was in Gemini. This year Opposition is in

### Morning and Evening Stars.

☿ Mercury is a morning star at the end of the month, rising S.E. by E. in the early dawn

♀ Venus is a brilliant object near the W. and W.S.W. horizon for about two hours after sunset. Magnitude at maximum brightness on the 4th, − 4·4.

♂ Mars rises nearly due East in the late evening. Magnitude, + 0·6 to − 0·1

♃ Jupiter, low moving westward between Aldebaran and the Pleiades, is East of the meridian at sunset, and remains visible through a great part of the night. Magnitude, − 2·2.

♄ Saturn rises in the early evening S.E. by E. Magnitude at Opposition (Jan. 31), 0·0.

fortnight later, and Saturn will be in the constellation Cancer and will be somewhat East of last year's position during the first part of the year. This happens because Saturn has moved a short distance in its orbit round the Sun in the interval, and somewhat more than a year must elapse before the Earth is again in line with the Sun and the planet. Because Saturn's orbit is not a circle the planet is not at precisely the same distance from the Sun at all Oppositions, nor is it at equal distances from the Earth, but the variations are not sufficient to make any very appreciable difference in the brightness of the planet at different Oppositions.

* The Meteorological Observations throughout the Almanack are those recorded at the Royal Observatory Greenwich. They include the highest and lowest readings of the Thermometer with the average for the month, the means of Barometer at a height of 99 feet above the mean level of the sea, the daily Rainfall, the daily Sunshine, and the daily general direction and maximum force of the Wind.

| 28 | 16 11 | 5 13 | 10 11 | 3 6 | 18 1 | 8 3 |

Mean Longitude of Moon's Ascending Node, February 1, 269° 22′ ♑.

## Eclipses, Occultations, and other Celestial Phenomena.

*February* 1. Day breaks at 5h. 45m. morn. Civil twilight ends at 5h. 44m. aft. Night begins, 6h. 23m. The length of the Day is 9h. 4m.

*Feb.* 2. Mars in conjunction with ☽, 4h. morn. ☌ 9° 19′ N

*Feb.* 4. Mars at a stationary point, 6h. aft.

*Feb* 5. Mean time of Sun's semi-diameter passing the meridian, 11h. 7·6s.

*Feb.* 8. *Morn.*, Occultation of Lalande 18414, magnitude 6·2. See p. 8a.

*Feb.* 9. Mercury in conjunction with ☽, 11h. 4ſ. ☌ 3° 39′ S.

*Feb* 12. Venus at inferior conjunction, 4h. *morn.*

*Feb* 13. Occultation of 19 Piscium, magnitude 5·4. See p 8o.

*Feb* 13. Uranus in conjunction with the Sun

*Feb.* 18. Jupiter in conjunction with ☽, 8h. 44m. *morn.* ☌ 2° 27′ S.

*Feb.* 28. Occultation of 72 Tauri and of W S (a) IV 396, magnitudes 5·4 and 6·2 respectively See p. 8o.

*Feb* 18. Eclipse of Jupiter's Satellite III See p. 78.

*Feb.* 22. Mean time of Sun's semi-diameter passing the meridian, 11h. 6·2s.

*Feb* 22. Occultation of Piazzi V 232, magnitude 6·2 (*morn.*), and of μ Geminorum, magnitude 3·2 (6ſ.). See p. 8o.

*Feb.* 23. Saturn in conjunction with ☽, 3h. 39m. 6ſ. ♄ 4° 20′ N

*Feb* 25. Eclipse of Jupiter's Satellite III, 9h. 6ſ.

*Feb.* 28. Mars in conjunction with ☽ 3h. *morn.* ☌ 9° 42′ N

Neptune may be observed in this month. See p. 79.

The Zodiacal light may be seen after dusk between the 1st and 24th, in the absence of moon light. See p. 8g.

In this month the Morahigs in ornase 52m., and the Afternoons 49m.

Constellations near the S. meridian at 10 p.m Orion, Auriga, Canis Minor, Canis Major, Hydra, Gemini, Leo, Cancer, Argo.

*Venus at Greatest Brilliancy.*—Venus will be very bright in the early days of January as an evening star, and again in the middle of March in the dawn. Similar epochs of special brilliancy

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames will probably cause a higher rise of the river, and the low-lying riverside districts to be flooded.

### Morning and Evening Stars.

☿ Mercury rises after daybreak, and sets before the Sun.

♀ Venus, in inferior conjunction on the 20th, is an evening star in the early days of the month, but is too near the Sun to be a conspicuous object.

♂ Mars rises in the early evening nearly due E., and is above the horizon throughout the night. Nearly stationary between β and γ Virginis. Magnitude, −0·2 to −0·8.

♃ Jupiter, still in the region about Aldebaran and the Pleiades, is visible from sunset until after midnight. Sets N.W by W. Magnitude, −2·1 to −1·9.

♄ Saturn moves slowly westward in the constellation Cancer during this spring, and is now above the horizon during the entire night. The three planets Mars, Jupiter, and Saturn now lie almost equi distant along the Ecliptic

occurred in May and August, 1918. This periodic maximum brightness happens when the planet is near the Earth (distant 36 or 39 million miles). At inferior conjunction on February 20 she will be nearer by several million miles, but will be invisible, since her unilluminated hemisphere will be presented to us. In January and March, as in the case of the crescent or waning Moon, only a part of the illuminated surface will be seen, but, as the planet is near, the largeness and brightness of the disc compensates for the small fraction of it seen illuminated. Hence the appearance noted.

### Apparent Right Ascension and Declination of the Pole Star.

| 3 | 15 58 | 2 44 | 2 9 | 6 9 | 17 7 | 8 3 |

Mean Longitude of Moon's Ascending Node, March 1, 267° 22′ 5″

## ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

*March* 1. Day breaks at 4h. 36m. *morn.* Civil twilight ends at 6h. 32m. *e.s.t.* Night begins, 7h. 29m. The length of the Day is 10h. 56m.

*Mar* 1 Venus at a stationary point.

*Mar* 2. Occultation of 75 Virginis, magnitude 5½. See p. 80.

*Mar* 2. Occultation of Lalande 26290, magnitude 5·3. See p. 80.

*Mar* 3. Mean time of Sun's semidiameter passing the meridian, 12m. 4·9s.

*Mar* 5. *Morn.*, Occultation of Lalande 29247 and Lalande 29345 magnitudes 5·7 and 5·8 respectively. See p. 80.

*Mar* 10. Venus in conjunction with ☽, 7h. *morn.* ♀ 2° 36′ N

*Mar* 13. 2h. *morn.*, Mercury in superior conjunction.

*Mar* 15. Mars in Opposition, 3h *morn.*, distant 62,540,000 miles.

*Mar* 18. Occultation of 63 Arietis magnitude 5·6. See p. 80.

*Mar* 26. Venus at Greatest Brilliancy (See note, p. 26.)

*Mar* 27 Jupiter in conjunction with ☽, 9h. *e.s.t.* 2° 20′ S.

*Mar* 29. Occultation of γ Geminorum, magnitude 3·0. See p. 80.

*Mar* 30. Occultation of ζ Geminorum, magnitude 3·7 See p. 80.

*Mar* 30. Mean time of Sun's semidiameter passing the meridian, 12m 4·3s.

*Mar* 31. Occultation of β Cancri, magnitude 3·9. See p. 80.

*Mar* 31. Sun enters the sign Aries (Spring Equinox), 10h. 28m. *morn.*

*Mar* 31. Saturn in conjunction with ☽, 8h. 3m. *e.s.t.* h 4′ 29″ N

*Mar* 23. Occultation of A Lacaile magnitude 5·2. See p. 80.

*Mar* 26. *Mars in conjunction with* ☽, 2h. 28m *e.s.t.* ♂ 3° 23′ N

*Mar* 27. Occultation of 1 Piscium XI 267, magnitude 5·9, and of 9 Virginis, magnitude 5·7. See p. 80.

The Zodiacal light may be seen after dark in this month, in the absence of moonlight. In the constellations Aries and Taurus.

In this month the Mornings increase 68m., and the Afternoons 57m.

Constellations near the S. meridian at 10 p.m. Gemini, Canis Minor, Cancer, Hydra, Crater Leo, Virgo.

*Mars in Opposition.*—Mars was last in Opposition on Feb 22, 1916. The average interval between consecutive Oppositions is 780 days, which is longer than the similar interval for the other planets, because the speed of Mars is more nearly equal that of the Earth, and the latter after passing Mars will not overtake it again in orbital revolution until that period has elapsed (compare note on Opposition of Saturn, p. 94). Mars

## Morning and Evening Stars.

☿ Mercury is an evening star in the latter part of the month setting W by N

♀ Venus is a morning star, rising E.S.E. Magnitude at greatest brilliancy (26th), −4·7.

♂ Mars rises soon after sunset in the first part of the month, E. by N. Magnitude at Opposition on the 19th, −1·1.

♃ Jupiter continues to be visible through the first half of the night. Sets N.W. by W.

♄ Saturn is an evening star, east of South at sunset, and remains above the horizon during almost the whole night. Magnitude, +0·3.

It therefore seen as a bright object in the evening sky at intervals of about two years, and between these epochs are long intervals in which the planet is inconspicuous in the twilight or is not seen. The orbit of Mars is considerably elliptic, and its distances from the Sun, and therefore from the Earth, is very different at different Oppositions. Mars is nearest to us when in Opposition in the constellation *Aquarius*, and *this must necessarily happen near the* end of August. At such Oppositions it is very bright. This happened last in the Autumn of 1909, when Opposition fell on Sept. 29. Compared with its appearance then, the planet at this Opposition is a quarter as bright and its magnitude is 1·5 greater

### Apparent Right Ascension and Declination of the Pole Star.

### RAIN FELL IN APRIL, 1917.

[illegible] 26 days, total fall, 1·80 inches, above the [illegible] average, 1841-90, by 0·24 inch.

### MONTHLY NOTES.

*April* 1 Refreshment-House Licences to be renewed. Clerks of the Peace and Town Clerks send registration precepts to Overseers before 15th inst.

5. Dividends on Consols, &c., due. Financial year, 1917–1918, for Imperial purposes ends to-day

7. Fire Insurances must be paid.

8. Quarter Sessions to be held this week unless otherwise fixed.

15. Parish Councils to hold their annual meeting on or within seven days of this date.

19. Edinburgh Spring Holiday

| 21 | 15 46.8 | 1 4 | 11 6 | 5 9 | 17 8 | 8.8 |

Mean Longitude of Moon's Ascending Node, April 1, 20° 19′ ♑

## Eclipses, Occultations, and other Celestial Phenomena.

*April* 1. Day breaks at 5h. 38m. *morn.* Civil twilight ends at 7h. 19m. *eve.* Light begins, 5h. 19m. *morn.* Sun rises, 5h. 57m. *morn.* The length of the Day is 12h. 41m.

*Apr* 5. Mean time of Sun's semidiameter passing the meridian, 12h 4·4s.

*Apr* 7. Mercury at greatest elongation (19° 29′) East, 9h. 0m.

*Apr* 8. Venus in conjunction with ☽, 1h. 12m. *morn.* ♀ 3° 14′ S.

*Apr* 9. 1h. 0m., Saturn at a stationary point.

*Apr* 9. Eclipse of Jupiter's Satellite III. See p. 79.

*Apr* 12. Mercury in conjunction with ☽, 11h. *morn.* ☿ 0° 32′ S.

*Apr* 14. Jupiter in conjunction with ☽, 8h. 0m. ♃ 1° 38′ S

*Apr* 16. 9h. 0m., Mercury stationary

*Apr* 19. Saturn in conjunction with ☽, 8h. 44m. *morn.* ♄ 4° 42′ N

*Apr* 20. Mean time of Sun's semidiameter passing the meridian, 12h. 5·0s.

*Apr* 21 6h *morn.*, Venus at greatest elongation (46° 15′) West.

*Apr* 22. Mars in conjunction with ☽, 7h. 14m. *morn.* ♂ 8° 6′ N

*Apr* 22. Occultation of *e* Leonis, magnitude 5·2 (4½.). See p. 80.

*Apr* 27. 3h. *morn.*, Mars at a stationary point.

*Apr* 29 3h *morn.*, Mercury at inferior conjunction.

*Apr* 29. Occultation of *b* Ophiuchi, magnitude 4·3. See p 80.

The Zodiacal light may be seen after 8½.30m. in the evenings of this month when the Moon is absent.

In this month the Mornings increase 1h. 22m., and the Afternoons 48m.

Constellations near the S. meridian at 10 p.m. Leo, Hydra, Crater, Corvus, Virgo, Libra.

*The Planet Mercury.* — This planet, whose mean distance from the Sun is only about 36 million miles, is never very far from the

### Morning and Evening Stars.

☿ Mercury is as evening star in the first half of the month, far enough from the Sun to be seen by the unaided eye. W N W

♀ Venus is a morning star, rising N. by E. Magnitude, − 4·1 to − 3·9.

♂ Mars is high in the south-east sky at sunset, and remains above the horizon nearly until dawn. It is moving from E. to W. in the constellation Leo, up to the 27th Magnitude, − 0·8 to − 0·1.

♃ Jupiter sets before midnight, N W by W It is east of Aldebaran and Pleiades in the latter part of the month. Magnitude, − 1·6.

♄ Saturn is now nearly stationary among the stars, but moves eastward after the 9th. It continues to be visible throughout the evening, and the three major planets are still conspicuous.

Mars as seen in the sky, and hence is rarely visible by the unaided eye. There are, however, opportunities of seeing it as an evening star at the time of Eastern elongation such as will occur on the 27th of this month. The opportunity this year is not quite so favourable as last, but observers there, by persistent watching, succeeded in seeing this planet on ten or twelve different occasions. It is advisable to search on evenings before elongation rather than after at Spring elongations. The appearance of Mercury is uncertain, but it may be considered to be at least as bright as a first magnitude star, and possibly as bright as Mars at the present time.

### Apparent Right Ascension and Declination of the Pole Star.

Mean Longitude of Moon's Ascending Node, May 1, 264° 39′ 4″.

## Eclipses, Occultations, and other Celestial Phenomena.

*May* 1. Day breaks at 2h. 42m. *morn.* Civil twilight ends at 9h. 24m. 45s. Night begins, 9h. 52m. The length of the Day is 14h 46m.

*May* 3. Mean time of Sun's semidiameter passing the meridian, 12m. 6·1s.

*May* 7. Venus in conjunction with ☽, 11h. 7m. *morn.* ♀ 6° 51′ S.

*May* 9. Mercury in conjunction with ☽, 10h. 28m. *morn.* ☿ 6° 22′ S.

*May* 12. Jupiter in conjunction with ☽, 10h. 13m. *morn.* ♃ 0° 58′ S.

*May* 14. Saturn in conjunction with ☽, 0h. 36m. *aft.* ♄ 4° 59′ N

*May* 19. Mars in conjunction with ☽, 7h. 38m. *aft.* ♂ 7° 7′ N

*May* 20. Mean time of Sun's semidiameter passing the meridian, 12m 7·3s.

*May* 22. Occultation of 73 Virginis, magnitude 5·6. See p. 8a.

*May* 24. 2h. *morn.*, Mercury at greatest elongation (25° 12′) West.

*May* 25. Occultation of Lalande 29345, magnitude 5·6. See p. 8a.

*May* 27 Occultation of 39 Ophiuchi, magnitude 5·1. See p. 8a.

*May* 28. Occultation of τ Sagittarii, magnitude 5·2 (morn.), and of σ Sagittarii, magnitude 3·9 (*aft.*). See p. 8a.

*May* 29. Occultation of ν Sagittarii, magnitude 3·0. See p. 8a.

In this month the Mornings increase 43m., and the Afternoons 43m.

Constellations near the S. meridian at 10 p.m. Leo, Virgo, Corvus, Libra, Bootes, Serpens, Crater, Hydra.

Hercules contains a very splendid cluster of stars situated in

R.A. 16h. 39m. and Decl. 36° 27′ N. This, like most of the star clusters, is condensed in the centre, and may be easily resolved with moderate telescopic aid, and a few days about the 7th to 13th, when the Moon is absent, it may, if the opportunity is taken of a very clear night, be seen with the naked eye plainly between the stars ζ and η Herculis, rather nearer to η. This cluster, discovered by Halley in 1714, is one of the most beautiful examples of these bodies to be seen in the heavens. With the great Refractor of the Lick Observatory the nebulous glow at the centre has been resolved into separate points.

### Morning and Evening Stars

☿ Mercury is a morning star, rising E. by N. It is scarcely likely to be conspicuous.
♀ Venus is a morning star, rising due East. Magnitude, −3·9 to −3·6.
♂ Mars is west of the meridian at nightfall, and sets about 2 hours after midnight, W. by N. Magnitude, −0·1 to +0·4.
♃ Jupiter sets in the early evening, N.W. by W. Magnitude, −1·9.
♄ Saturn is in the western sky during the evening. Sets soon after midnight in the W.N.W. Magnitude, +0·3 to +0·6.

### Apparent Right Ascension and Declination of the Pole Star.

| | R.A. | | | Decl. N. |

Mean Longitude of Moon's Ascending Node, June 1, 259° 0′ 5″

## Eclipses, Occultations, and other Celestial Phenomena.

*June* 1. Civil twilight ends at 9h. 27m. There is no closed night in this month in the latitude of London. The length of the Day on June 1 is 16h. 13m.

*June* 2. Occultation of 28 Piscium, magnitude 5·7. See p. 80.

*June* 5. Mean time of Sun's semi-diameter passing the meridian, 12m. 8·4s.

*June* 5. Venus in conjunction with ☽, 11h. 28m. aft. ♀ 6° 28′ S.

*June* 7. Mercury in conjunction with ☽, 11h. 42m. morn. ☿ 4° 34′ S.

*June* 8. Sun totally eclipsed, invisible at Greenwich. See p. 98.

*June* 9. Jupiter in conjunction with ☽, 6h. 43m. morn. ♃ 0° 28′ S.

*June* 12. Occultation of Planet VII 16m., magnitude 6·0. See p. 80.

*June* 12. Neptune in conjunction with ☽, 12h. 59m. aft. ♆ 3° 20′ N.

*June* 13. Saturn in conjunction with ☽, 8h. 11m. morn. ♄ 5° 11′ N.

*June* 15. 4h. aft., Jupiter in conjunction with Sun.

*June* 16. Mars in conjunction with ☽, 11h. 8m. aft. ♂ 6° 17′ N.

*June* 21. Sun enters the 1st or Cancer, 6h. morn. (Summer Solstice).

*June* 24. ☽ partially eclipsed, 10h. 28m. morn. Eclipse invisible at Greenwich. See p. 98.

*June* 27. 9h. morn., Mercury in superior conjunction.

In this month the Mornings increase 72m. up to the 18th, and then decrease 49m. The Evenings increase 13m. up to the 16th, and then decrease slightly.

Constellations near the S. meridian at midnight: Hercules, Ophiuchus, Scorpius, Lyra, Sagittarius, Aquila, Serpens.

*The Longest Day.* — Though there is but slight difference in the length of the interval between sunrise and sunset about June 21, there is in general one of these days which is a few seconds longer than any other. This is the day on which the Summer Solstice falls, and at the end of a century is June 20 or 21, whilst at the beginning it is a day later, and June 21 or 22 is the longest day. The reason for this difference in date may be briefly stated. Because the Tropical year is not an integral number of days, the solstice falls later in the calendar year by year by six hours, *nearly*. It is not permitted to be very late because the intercalation of the extra day in leap year brings

### Morning and Evening Stars.

☿ Mercury is a morning star but not in a position to be visible.

♀ Venus is also a morning star rising E.N.E. It is now moving somewhat rapidly through the constellations Aries and Taurus. Magnitude −3.5.

♂ Mars continues to be in the western sky until midnight. Near β Virginis on the 24th. Magnitude, +2.4 to +2.8.

♃ Jupiter, in conjunction on the 19th, is too near the Sun to be visible.

♄ Saturn is still an evening star, but sets N.W. by W. before midnight, magnitude, +0.6.

it back one whole day. This whole day is too much, because the yearly acceleration is not quite 6 hours, and hence the time of the solstice on the whole is earlier in the calendar as the century progresses, and the dates of the longest day at the beginning and end are as stated.

This centesimal retardation is corrected by the omission of the intercalary day in the centennial year, which puts the date a little forward in each of three centuries. This, however, does more than is necessary, and a further compensation is made by making the fourth centennial year a leap year.

| 21 | 15 46 | 2·0 | 6·2 | 3 0 | 14 54 | 7 5 |

Mean Longitude of Moon's Ascending Node, July 1: 166° 25′ 3″.

## Eclipses, Occultations, and other Celestial Phenomena.

*July* 1. Civil twilight ends at 9h. 40m. *e/t.* In this month there is no closed night at Greenwich till after the 20th, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is 16h. 30m.

*July* 5. 8h. morn., Aphelion. The Earth at maximum distance from the Sun—94,449,000 miles.

*July* 6. Mean time of Sun's semidiameter crossing the meridian, 17m. 8·4s.

*July* 9. Venus in conjunction with ☽, 2h. 32m. *e/t.* ♀ 5° 6′ S.

*July* 9. Occultation of λ Tauri, magnitude 4·5, and of 29 Tauri, magnitude 6·1. See p. 80.

*July* 7. Jupiter in conjunction with ☽, 2h. 12m. morn. ♃ 0° 19′ N

*July* 9. Mercury in conjunction with ☽, 2h. 19m. *e/t.* ☿ 5° 28′ N

*July* 10. Saturn in conjunction with ☽, 4h. 50m. *e/t.* ♄ 6° 22′ N

*July* 12. Mercury in conjunction with Neptune, 10h. 9m. morn. ☿ 2° 15′ S.

*July* 13. Mars in conjunction with ☽, 10h. 16m. morn. ♂ 5° 22′ N.

*July* 17. Mercury and Saturn in conjunction, 9h. 11m. *e/t.* ☿ 28′ N

*July* 20. Mean time of Sun's semidiameter crossing the meridian, 17m. 7·3s.

*July* 20. Occultation of 39 Ophiuchi, magnitude 5·2, and of δ Ophiuchi, magnitude 4·3. See p. 80.

*July* 25. Uranus in conjunction with ☽, 8h. 23m. *e/t.* ♅ 5′ 32″ S.

*July* 27. Jupiter and Venus in conjunction, 8h. 23m. morn. ♀ 0° 36′ S.

*July* 30. 8h. *e/t.*, Neptune in conjunction with Sun.

Meteors of the Perseid stream may be looked for in July See p. 86.

In this month the Mornings decrease 33m., and the Afternoons 29m.

Constellations near the S. meridian at midnight: Heraclès, Ophiuchus, Serpens, Sagittarius, Lyra, Aquila, Capricornus, Cygnus, Delphinus.

The Annular Nebula in Lyra, situated between β and γ, is the best example of the Ring Nebulæ, and in July can generally be

MORNING AND EVENING STARS.

☿ MERCURY is an evening star setting in the twilight W N W

♀ VENUS, still moving eastward among the stars, passes between Aldebaran and the Pleiades in the early days of the month. Rises N.E. by E. In conjunction with Jupiter on the 25th.

♂ MARS is an evening star, setting before midnight slightly N. of W Magnitude, +0·8.

♃ JUPITER, having passed conjunction, is a morning star North of η and ρ Geminorum at the end of the month. Magnitude, −1·4.

♄ SATURN may be visible for a short time after sunset in the early part of July

moderate telescopes. The heavens contain, as far as is at present known, comparatively few examples of this class, it is in R.A. 23h. 5m.s, and Decl. 30° 29′ N. It has been suggested that the nebulosity is only apparent, and that these bodies are really globes of incandescent gas brighter at the edges because we are there looking through a greater depth of shining matter. The nebula exhibits a spectrum as if composed of an incandescent gas. There is a faint star within the ring and others in the nebula itself to be seen only with large telescopes. There is also a globular cluster in Lyra, as nearly as possible midway between γ Lyræ and β Cygni.

Crimson stars may be observed in this month. See p. 79.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE POLE STAR.

Mean Longitude of Moon's Ascending Node, August 1, 29° 49′ 5″.

## Holidays, Occultations, and other Celestial Phenomena.

*August 1.* Day breaks at 1h. 32m. morn. Civil twilight ends at 8h. 36m. aft. Night begins, 10h. 40m. aft. The length of the Day is 15h. 23m.

*Aug. 3.* Jupiter in conjunction with ☽, 7h. 32m. aft. ☽ 0° 39′ N.

*Aug. 4.* Venus in conjunction with ☽, 11h. morn. ♀ 1° 29′ N.

*Aug. 5.* Mean time of Sun's semidiameter crossing the meridian, 12m. 6·1s.

*Aug. 5.* 8h. aft., Mercury at greatest elongation (27° 22′) East.

*Aug. 7.* Saturn in conjunction with ☽, 7h. 29m. morn. ♄ 3° 39′ N.

*Aug. 9.* Mercury in conjunction with ☽, 3h. 46m. morn. ☿ 3° 2′ N.

*Aug. 13.* Mars in conjunction with ☽, 2h. 20m. morn. ♂ 3° 42′ N.

*Aug. 18.* 4h. aft., Mercury at a stationary point.

*Aug. 19.* 2h. aft., Uranus in Opposition.

*Aug. 29.* Occultation of 37 Sagittarii, magnitude 6·0. See p. 8a.

*Aug. 30.* Mean time of Sun's semidiameter crossing the meridian, 12m. 4·9s.

*Aug. 22.* Uranus in conjunction with ☽, 3h. 54m. morn. ♅ 3° 47′ S.

*Aug. 22.* Occultation of κ Aquarii, magnitude 5·1. See p. 8a.

*Aug. 23.* Occultation of 26 Piscium, magnitude 5·7. See p. 8a.

*Aug. 24.* Occultation of 29 Piscium, magnitude 5·4. See p. 8a.

*Aug. 24.* Venus and Neptune in *conjunction*, 10h. 36m. aft. ♀ 0° 38′ N.

*Aug. 31.* Jupiter in conjunction with ☽, 11h. morn. ♃ 2° 39′ N.

Meteors of the Perseid streams are expected during this month, the nights of most abundance are from the 10th to the 12th. See p. 8a.

In this month the Mornings decrease 49m., and the Afternoons 36m.

Constellations near the S. meridian at 10 p.m. Hercules, Ophiuchus, Sagittarius, Capricornus, Lyra, Aquila, Delphinus, Vulpecula, Serpens, Cygnus, Sagitta.

In Vulpecula, 3½° due north of γ Sagittæ, is the "Dumb-bell" Nebula, generally considered irresolvable, although under the

MORNING AND EVENING STARS.

☿ MERCURY is an evening star, and sets soon after the Sun.

♀ VENUS continues to be a morning star, in the E.N.E. Near δ Geminorum on the 9th and 8th, with Jupiter not far away westward. Magnitude, −3·5.

♂ MARS is still above the horizon for a short time after sunset. East of Spica after the 3rd.

♃ JUPITER has moved from the constellation Taurus into Gemini during the summer and is coming again under observation as it rises soon after midnight in the N.E. Magnitude, −1·6.

♄ SATURN, in conjunction on the 11th, is not visible, morning or evening.

higher powers of Lord Rosse's telescope there seemed some trace of resolvability shown. It is situated in R.A. 19h. 58m. and Decl. 20° 39′ N., and gives a spectrum of bright lines.

There is a little bright globular cluster 4° due south of α Delphini, consisting of a mass of very small stars. ε Delphini is situated in R.A. 20h. 58m. 29s. and Decl. 11° 2′ N.—a tiny star, 5th magnitude, preceding it. This though a small is yet a bright cluster, and may be observed easily on the evenings immediately before and after the 5th of this month.

Uranus may be observed in this month. See p. 79. In Opposition on the 29th. Distance from Earth, 1,969,000,000 miles.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE POLE STAR.

Mean Longitude of Moon's Ascending Node, September 1, 258° 8′ 5″.

## Eclipses, Occultations, and other Celestial Phenomena.

*September 1.* Day breaks at 3h. 7m. morn. Civil twilight ends at 7h. 44m. e/t. Night begins, 8h. 42m. e/t. The length of the Day is 13h. 35m.

*Sept. 2.* 1h. morn., Mercury at inferior conjunction.

*Sept. 3.* Venus in conjunction with ☽, 6h. eve. e/t. ♀ 5° 36′ N

*Sept. 5.* Saturn in conjunction with ☽, 9h. eve. e/t. ♄ 3° 48′ N

*Sept. 9.* Venus and Saturn in conjunction, 3h. 42m. morn. ♀ ☌ ♄ 8.

*Sept. 9.* Mean time of Sun's semidiameter crossing the meridian, 12m. 4 se.

*Sept. 12.* 3h. e/t., Mercury at a stationary point.

*Sept. 12.* Mars in conjunction with ☽, 8h. 45m. e/t. ♂ 1° 48′ N

*Sept. 13.* Occultation of 31 Ophiuchi, magnitude 4·2. See p. 8a.

*Sept. 15.* Mercury and Venus in conjunction, 9h. 33m. morn. ☿ ☌ ♀ 8′ S.

*Sept. 18.* 3h. morn., Mercury at greatest elongation (27° 32′) West.

*Sept. 20.* 3h. morn., Mercury at perihelion.

*Sept. 22.* Sun enters the sign Libra, 8h. 46m. e/t. (Autumn Equinox).

*Sept. 24.* Morn., Occultation of 8 Arietis, magnitude 4·5. See p. 8a.

*Sept. 25.* 6h. 48m. morn., Mercury and Venus in conjunction. ☿ ☌ ♀ 20′ N

*Sept. 25.* Occultation of 31 Tauri, magnitude 5·6, and of 32 Tauri, magnitude 5·2. See p. 8a.

*Sept. 26.* Occultation of 2 Tauri, magnitude 5·2. See p. 8a.

*Sept. 28.* Jupiter in conjunction with ☽, 0h. 14m. morn. ♃ ☌ ☽ N

In this month the Mornings decrease 46m., and the Afternoons 1h. 7m.

Constellations near the S. meridian at 10 p.m. Lyra, Aquila, Delphinus, Capricornus, Cygnus, Pisces Australis, Pegasus, Aquarius, Andromeda. The variable, star Mira (o) Ceti is nearing its maximum and may be observed.

The orbital motion of the Moon causes her to move among the stars rather rapidly from West to East, and she comes to the meridian of any place, or is due South, about 50 minutes later night by night. For this reason she would rise later night by night by this actual amount, but the time of rising in latitudes distant from the equator is affected by her distance north or south of the celestial equator. There is a certain period in each month or lunation when the Moon is moving northwards rather rapidly, and this quantity

Time of High Water at the undermentioned Places—

## MORNING AND EVENING STARS.

☿ MERCURY is a morning star, above the horizon in the late dawn only

♀ VENUS is a morning star, rising E.N.E., and afterwards E. by N A degree north of Regulus on the 10th Magnitude, −3·7 to −3·4.

♂ MARS remains above the horizon in the evening twilight.

♃ JUPITER rises before midnight N.E. by E. At this coming apparition it will form a conspicuous configuration with the stars Castor and Pollux. Magnitude, −1·7

♄ SATURN is a morning star in the latter half of the month, rising more than an hour before daybreak. Magnitude, +0·7

considerably the 50 minutes' retardation in the time of rising above mentioned, and she will rise nearly at the same time for several nights in succession. This happens in every lunation, and in general passes unnoticed but in the September lunation it happens when the Moon is full, and then the Moon, full or nearly so, rises about sunset on two or three consecutive nights. This phenomenon is known as the Harvest Moon. The precise dates vary in different years according to the position of the Nodes of the Moon's orbit, and the circumstances of two Full Moons may be not unlike, but the term is always applied to the Full Moon nearest to the Autumnal Equinox. See note, p. 89

APPARENT RIGHT ASCENSION AND DECLINATION OF THE POLE STAR.

Mean Longitude of Moon's Ascending Node, October 1, 290° 39′ 4″.

## ECLIPSES, OCCULTATIONS, AND OTHER CELESTIAL PHENOMENA.

*October* 1. Day breaks at 4h. 8m., morn. Civil twilight ends at 6h. 9m. aft. Night begins, 7h. 9m. The length of the Day is 11h. 37m.

*Oct.* 1. Saturn in conjunction with ☽, 9h. 22m. morn. ♄ 8° 9′ N

*Oct.* 4. Venus in conjunction with ☽, 4h. 42m. morn. ♀ 6° 54′ N

*Oct.* 4. Mercury in conjunction with ☽, 8h. 37m. aft. ☿ 3° 7′ N

*Oct.* 5. Mean time of Sun's semidiameter crossing the meridian, 12m 4·3s.

*Oct.* 6. Eclipse of Jupiter's Satellite III. See p. 79.

*Oct.* 9. Mars in conjunction with ☽, 5h. 34m. aft. ♂ 0° 29′ S.

*Oct* 12. Noon, Mercury in superior conjunction.

*Oct.* 13. Occultation of $\sigma^1$ and $\sigma^2$ Capricorni, magnitudes 5·3 and 6·3 respectively See p. 80.

*Oct.* 15. Uranus in conjunction with ☽, 9h. 32m. aft. ♅ 5° 57′ S.

*Oct* 16. Occultation of $\kappa$ Aquarii, magnitude 5·1 See p. 80.

*Oct.* 17 Occultation of 16 Piscium magnitude 5·7 See p. 80.

*Oct.* 18. Occultation of 19 Piscium, magnitude 5·4. See p. 80.

*Oct.* 20. Mean time of Sun's semidiameter crossing the meridian, 12m 5·4s.

*Oct.* 23d. Occultation of 40 Arietis, magnitude 6·0. See p 80.

*Oct.* 25. Jupiter in conjunction with ☽, 11h. 7m. morn. ♃ 2° 40′ N

*Oct* 29. Occultation of *f* Geminorum, magnitude 5·3. See p. 80.

*Oct.* 28. Saturn in conjunction with ☽, 8h. 32m. aft. ♄ 6′ 32″ N

In this month the Mornings decrease 52m., and the Afternoons 1h. 32m.

The Zodiacal light may be seen before dawn in the latter half of this month.

Constellations near the S. meridian at 10 p.m. Pegasus, Aquarius, Cygnus, Pisces Australis, Cetus, Pisces, Andromeda, Aries.

In Andromeda, near to the 4th magnitude star $\nu$, is a large and irresolvable Nebula in the form of an elongated ellipse, which is visible to the naked eye. This is

### MORNING AND EVENING STARS.

☿ Mercury, in conjunction on the 19th, is neither a morning nor an evening star

♀ Venus is now not above the horizon until half an hour after daybreak. Sets with the Sun at the end of the month. Magnitude, −3·4.

♂ Mars still does not set until about two hours after the Sun, 3° north of Antares on the 19th.

♃ Jupiter rises in the late evening. It comes to a stationary point a short distance west of δ Capricorni at the end of the month, and then moves westward. Magnitude, −2·8 to −2·6.

♄ Saturn rises not long after midnight E.N.E.; magnitude, +0·8.

situated in R.A. 2h. 38m. and Decl. 40° 49′ N. In Sept., 1885, a star of the class known as Novæ appeared within its boundary, but was probably unconnected with the Nebula. Very many minuter stars can be seen within the Nebula.

A fine double cluster of stars, situated midway on a line joining ε Persei and γ Cassiopeiæ, may be observed in this month. The nearer cluster is a magnificent collection of stars, 30′ in diameter, ranging in magnitude from the 6th to 14th. The smaller northern cluster, 20′ in diameter, is less rich in stars, and much condensed towards the centre. On fine nights about the 4th these objects will afford one of the most beautiful subjects for observation.

## Apparent Right Ascension of the Principal Planets at Noon

| | ☿ Mercury. | ♀ Venus. | ♂ Mars. | ♃ Jupiter. | ♄ Saturn |
|---|---|---|---|---|---|
| | h. m. s. | h. m. s. | h. m. s. | h. m. s. | h. m. s. |
| 1 | 16 22 12 | 14 8 3 | 12 37 30 28 | 7 8 36 | 9 38 24 |
| 6 | 15 40 37 | 14 32 23 | 12 57 47 0 | 7 8 32 | 9 39 37 |
| 11 | 15 13 14 | 15 0 49 | 13 18 2 24 | 7 8 8 | 9 40 49 |
| 16 | 14 56 41 | 15 31 21 | 13 38 20 24 | 7 7 16 | 9 42 1 |
| 21 | 14 51 47 | 16 3 57 | 13 58 37 | 7 6 6 | 9 43 12 |
| 26 | 15 0 38 | 16 38 33 | 14 18 53 43 | 7 4 37 | 9 44 22 |

## Apparent Declination of the above Planets.

| | ☿ Mercury. | ♀ Venus. | ♂ Mars. | ♃ Jupiter. | ♄ Saturn |
|---|---|---|---|---|---|
| | ° ′ ″ | ° ′ ″ | ° ′ ″ | ° ′ ″ | ° ′ ″ |
| 1 | 18 51 38 | 21 49 17 | 24 18 36 | 22 44 31 | 13 32 41 |
| 6 | 19 52 13 | 20 38 7 | 24 6 22 | 22 37 27 | 13 30 16 |
| 11 | 20 47 32 | 19 22 9 | 23 49 46 | 22 25 45 | 13 25 41 |
| 16 | 21 36 19 | 18 1 43 | 23 28 52 | 22 9 28 | 13 18 59 |
| 21 | 22 17 31 | 16 37 11 | 23 3 45 | 21 48 41 | 13 10 11 |
| 26 | 22 50 20 | 15 8 44 | 22 34 30 | 21 23 29 | 12 59 20 |

## Horizontal Equatorial Parallax of Sun and Planets.

| ☉ | ☿ | ♀ | ♂ | ♃ | ♄ |
|---|---|---|---|---|---|
| ″ | ″ | ″ | ″ | ″ | ″ |
| 8·8 | 6·4 | 8·2 | 4·8 | 0·9 | 0·4 |
| 8·8 | 6·3 | 8·1 | 4·4 | 0·9 | 0·4 |
| 8·8 | 6·2 | 8·1 | 4·4 | 0·9 | 0·4 |

## Semidiameter of Sun and Planets.

| ☉ | ☿ | ♀ | ♂ | ♃ | ♄ |
|---|---|---|---|---|---|
| ″ | ″ | ″ | ″ | ″ | ″ |
| 15 28 | 2 4 | 7 9 | 2 4 | 19 6 | 8 2 |
| 15 28 | 2 3 | 7 9 | 2 3 | 19 2 | 8 2 |
| 15 28 | 2 3 | 7 9 | 2 3 | 19 0 | 8 2 |

Longitude of Moon's Ascending Node, November 1, 109° 28′; 1, Taurus.

## Eclipses, Occultations, and other Celestial Phenomena.

*December* 1. Day breaks at 5h. 20m. morn. Civil twilight ends at 5h. 52m. eve. Night begins, 6h. 24m. eve. The length of the Day is 9h. 32m.

*Nov.* 1 *Morn.*, Occultation of ψ Virginis, magnitude 5·3. See p. 8a.

*Nov.* 3. Venus in conjunction with ☽, 1h. 20m. eve. ☿ 4° 29′ N

*Nov.* 3. 4h. eve., Jupiter stationary

*Nov.* 5. Mean time of Sun's semidiameter passing the meridian, 15m. 7·2s.

*Nov.* 5. Mercury in conjunction with ☽, 0h. 20m. morn. ☿ 0° 24′ N

*Nov.* 6. Occultation of 24 Ophiuchi magnitude 5·3. See p. 8b.

*Nov.* 7. Mars in conjunction with ☽, 3h. 20m. eve. ♂ 1° 29′ S.

*Nov.* 10. Jupiter's Satellite III. in eclipse See p. 9p.

*Nov.* 12. Occultation of 42 Aquarii, magnitude 5·8. See p. 8a.

*Nov.* 17. Occultation of 41 Arietis and 7 Arietis, magnitudes 6·0 and 4·5 respectively See p 8a.

*Nov.* 18. Occultation of 91 Tauri, magnitude 5·6. See p. 8c.

*Nov.* 20. Occultation of 96 Tauri and Plaxi IV. 8a, magnitudes 5·2 and 5·8 respectively (morn.), and of 105 Tauri and 2 Tauri, magnitudes 6·0 and 5·2 respectively See p. 8a.

*Nov.* 20. *Morn.*, Occultation of ο Tauri, magnitude 4·8. See p. 8a.

*Nov.* 22. Mean time of Sun's semidiameter passing the meridian, 15m. 8·9s.

*Nov* 22. Jupiter in conjunction with ☽, 7h. 30m. eve. ♃ 0° 46′ N.

*Nov.* 29. *Midnight*, Venus in superior conjunction.

*Nov* 29. Saturn in conjunction with ☽, 6h. 30m. morn. ♄ 5° 49′ N

*Nov* 29. *Morn.*, Occultation of ε Leonis, magnitude 5·1. See p. 8a.

*Nov.* 30. Mercury at greatest elongation (21° 9′) East.

Two well-known meteor-streams, the Leonids and the Andromedids, may be observed in this month. See p 8b.

In this month the Mornings decrease 42m., and the Afternoons 39m.

Constellations near the ♌ meridian at 10 p.m.; ♌ Leonis, Hydra, Crater, Corvus, Andromeda, Aries, Perseus, Taurus, Auriga, Gemini.

Time of High Water at the undermentioned Places.

MORNING AND EVENING STARS.

☿ MERCURY is an evening star at the end of the month, but sets within an hour of sunset.

♀ VENUS, being in superior conjunction on the 23rd, is neither a morning nor an evening star.

♂ MARS may still be seen near the S.W. horizon in the early evening.

♃ JUPITER rises in the early evening E.N.E. It is now moving slowly from N. to W., and still continues to make a long triangle with the twin stars. Magnitude, −2·0 to −2·1.

♄ SATURN rises before midnight E.N.E. At the coming apparition, this planet will be in the constellation Leo, whereas in January last it was in Cancer. During this winter it will form a conspicuous addition to the group of stars which form the Sickle.

An irresolvable Nebula, 2½′ to the East of γ Andromedæ may be observed in this month. It was discovered by Miss Herschel, with a small reflecting telescope of twenty-seven inches focal length. This is a very elongated Nebula, 2′ long by 1′ broad, which is oval, dark in the middle, and surpasses the idea of a vast ring seen very obliquely. It is in R.A. 0h. 29m. and Decl. 41° 46′. The best evenings for observing it are those about the

APPARENT RIGHT ASCENSION AND DECLINATION OF THE POLE STAR.

Mean Longitude of Moon's Ascending Node, December 1, 252° 29′ 5″.

Conjunctions of Jupiter's Satellites at 12h. mer. A.M.

W. = Western. E. = Eastern.

## Eclipses, Occultations, and other Celestial Phenomena.

*December* 1. Day breaks at 5h. 42m. *morn.* Civil twilight ends at 5h. 18m. *aft.* Night begins, 5h. 37m. *aft.* The length of the Day is 8h. 56m.

*Dec.* 13. The length of the Day from sunrise to sunset is 7h. 48m.

*Dec.* 3. An Annular Eclipse of the Sun, invisible at Greenwich. See p. 78.

*Dec.* 3. Venus in conjunction with ☽, 8h. 49m. *aft.* ♀ 0° 8′ S.

*Dec.* 5. Mean time of Sun's semi diameter passing the meridian, 12m. 10·3s.

*Dec.* 6. Mars in conjunction with ☽, 6h. 28m. *aft.* ♂ 4° 29′ S.

*Dec.* 9. 2h. *morn.*, *Mercury* stationary

*Dec.* 10. 3h. *aft.*, *Saturn* at a stationary point.

*Dec.* 11. Occultation of 29 Piscium, magnitude 5·4. See p. 80.

*Dec.* 12. *Morn.*, Jupiter's Satellite IV in eclipse. See ☽ 79.

*Dec.* 14. *Morn.* Occultation of 40 Arietis, magnitude 6·0. See p. 80.

*Dec.* 16. Mercury and Venus in conjunction, 8h. 48m. *morn.* ☿ 1° 49′ N

*Dec.* 18. 4h. *aft.*, *Mercury* at inferior conjunction.

*Dec.* 19. Jupiter in conjunction with ☽, 1h. 31m. *morn.* ♃ 2° 39′ N

*Dec.* 20. *Morn.*, Occultation of Pleiad VII 28 ; magnitude 6·0.

*Dec.* 20. Mean time of Sun's semi-diameter passing the meridian, 12m. 12·0s

*Dec.* 21 *Morn.*, Occultation of α Ceti, magnitude 2·5.

*Dec.* 22. Saturn in conjunction with ☽, 3h. 30m. *aft.* ♄ 0° 54′ N

*Dec.* 22. 3h. 44m. *aft.*, Sun enters the sign Capricornus (Winter Solstice).

In this month the Mornings decrease 49m., the decrease continuing throughout the month. The Afternoons decrease 4m. up to the 13th, and then increase 9m.

Constellations near the S. meridian at 10 p.m. Andromeda, Aries, Pisces, Cetus, Taurus, Perseus, Eridanus, Orion, Auriga.

*Jupiter's IVth Satellite* (*Callisto*).—The satellites of Jupiter are eclipsed because the planet casts a shadow through which they pass generally at each revolution, since they move in planes which are inclined to that of Jupiter's orbit at a *small* angle. This is not entirely true of the IVth Satellite, because, though its orbit inclination is 0·5 or small, it is so far from its primary that its

MORNING AND EVENING STARS.

☿ Mercury is a morning star at the end of the month, rising early enough to be seen by the naked eye.

♀ Venus may possibly be seen at sunset. Magnitude, − 3·4.

♂ Mars, moving northward in the constellation Sagittarius, sets in the early evening as last month.

♃ Jupiter will be in Opposition early in the New Year, and rises about sunset at the end of the month. Magnitude, − 2·2 to − 2·3.

♄ Saturn will be almost stationary throughout the month, about a degree north of Regulus, rises in mid-evening E.N.E. Magnitude of Saturn, + 0·7 to + 0·6, of Regulus, + 1·3.

occupies eclipse under certain circumstances. If the period of Jupiter's revolution round the Sun (11·8 years) be divided into four nearly equal parts, eclipses of Callisto happen in alternate quarter periods. The eclipse on December 21, noted on p. 79, is the first that can be observed at Greenwich of a new series now beginning, and its observation may be interesting and valuable.

Opposition of Jupiter happens about a month later year by year in any Opposition was on November 29. The planet is brightest when Opposition occurs near the beginning of October. (See Opp. of Saturn, p. 102.)

The factor for the year indicates its Letter, but the preceding Letter applies to January and February of Leap Years.

Find in the Table-of Hundreds the first figure, or figures, of the number of the given year in either the *Julian* or *Gregorian section as required*. Next find in the Table-of Tens-and Units the last figures. Then find the factor for the year in line with its first and under its last figures. The sum of the factors for the year and the month indicates the required Monthly Table. Factors in heavy type indicate Leap-Years.

| DAYS. | FACTORS FOR THE MONTHS. | | |

EXAMPLE 1.—Required the time of high water at Aberdeen on *January 7th*:

| | | |
|---|---|---|
| Time of high water at London Bridge | h. | m. Morn. |
| Subtract tide interval | 0 | 50 |
| Time of high water at Aberdeen | 7 | 11 Morn. |

EXAMPLE 2.—Required the time of high water at Scarborough on *January 9th*:—

| | | |
|---|---|---|
| Time of high water at London Bridge *noon* | 3 | 28 Morn. |
| Add tide interval | 0 | 39 |
| Time of high water at Scarborough | 9 | 49 After |

It may happen that the "tide interval" to be subtracted is greater than the quantity from which it has to be taken, in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes the sum "high water at London Bridge"+"tide interval" will exceed 24 hours; in this case, the excess will be the time of high water after the noon or midnight following, according as the London high water was either morning or afternoon.

EXAMPLE 3.—Required the time of high water at Aberdeen *January 24th 17h*:—

| | | |
|---|---|---|
| Time of high water at London Bridge on *January 24th* + 12 hours | *noon* | 36 m. Morn. |
| Subtract tide interval | 0 | 50 |
| Time of high water at Aberdeen *Jan. 24th* | 11 | 46 After |

# Calendar of Church Lessons, 1918,

## APPOINTED FOR SUNDAYS AND OTHER HOLY DAYS THROUGHOUT THE YEAR.

| The Athanasian Creed to be read on the days marked* | Morning Prayer. First Lesson. | Morning Prayer. Second Lesson. | Evening Prayer. First Lesson. | Evening Prayer. Second Lesson. |
|---|---|---|---|---|

Previous to 1752 the above dates are computed from the Old Style. The tables in modern Prayer-Books are calculated for the New Style only. Dates here printed in heavier type are leap-years. 1752 had M D up to September 2, but A from September 14 to December 31, the intermediate days being dropped for the change of Style. Its Easter was the last in Old Style. The Table of Moveable Feasts in the Prayer Book gives all the others after finding Easter in this.

* Old Style. † New Style

# 74 Table for Finding the Times of Sunrise and Sunset.

This double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N and 60° S.

To use the table. In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found the *local apparent time* of sunset. Subtracting this from 12h. will give the *local apparent time* of sunrise. To obtain from this the local mean time, the quantity in the second column on the second page of each month (which is known as the Equation of Time) appropriate to the day in question must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versâ*.

If the times of sunrise or sunset are required for any declination or latitude falling between the arguments in the table, they may be found by simple proportion.

## THE TIME OF SUNSET

The times of sunrise and sunset given in this Almanack are the times when the centre of the Sun's disc is on the visible horizon at sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34½′. Whatever may be the legal definition of sunrise and sunset, the above has generally been adopted as a correct statement, though there is some reason for the contention that sunset has not happened until the whole of the disc has disappeared. The

legal question, however, has been more concerned with the distinction between local sunset and Greenwich sunset. It has been held by a legal tribunal, as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

## TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign −, that it is earlier

The second Table shows that on June 1 the Sun will set at about the same moment at Aberdeen, *Glasgow, Belfast, and Killarney Reference* to a map will *show* that these *four* places lie *on a line* which is nearly straight. On the same day the Sun sets at Plymouth Bristol, and Birmingham nearly at the same moment, and these three places similarly lie on an approximately straight line which is parallel to the former This particular case is given as example, but examination of the Tables will show that lines of same sunset or same sunrise on any day are approximately straight and parallel, and in general inclined to the meridians, the inclination changing according to the period of the year

| 2 30 | −1 5 41+ | 14 30 | 6 30 | −0 17 36+ | 18 30 | 10 30 | +0 48 8− | 22 30 |
| 2 40 | −1 4 51+ | 14 40 | 6 40 | −0 14 43+ | 18 40 | 10 40 | +0 50 14− | 22 40 |
| 2 50 | −1 3 54+ | 14 50 | 6 50 | −0 11 48+ | 18 50 | 10 50 | +0 52 5− | 22 50 |
| 3 0 | −1 2 50+ | 15 0 | 7 0 | −0 8 50+ | 19 0 | 11 0 | +0 53 57− | 23 0 |
| 3 10 | −1 1 36+ | 15 10 | 7 10 | −0 5 50+ | 19 10 | 11 10 | +0 55 48− | 23 10 |
| 3 20 | −1 0 19+ | 15 20 | 7 20 | −0 2 50+ | 19 20 | 11 20 | +0 57 31− | 23 20 |
| 3 30 | −0 58 53+ | 15 30 | 7 30 | 0 0 0 | 19 30 | 11 30 | +0 58 53− | 23 30 |
| 3 40 | −0 57 11+ | 15 40 | 7 40 | +0 2 50− | 19 40 | 11 40 | +1 0 19− | 23 40 |
| 3 50 | −0 55 42+ | 15 50 | 7 50 | +0 5 50− | 19 50 | 11 50 | +1 1 36− | 23 50 |
| 4 0 | −0 53 57+ | 16 0 | 8 0 | +0 8 32− | 20 0 | 12 0 | +1 2 50− | 24 0 |

The sign on the left-hand side of the correction is to be used when the argument is on the left, and also vice versâ. + means that the correction is to be added to the reduced altitude and − that it is to be subtracted.

| 24 | 1 34 | 1 31 | 1 24 | 1 15 | 1 6 | 1 3 | 1 3 | 1 11 | 1 20 | 1 30 | 1 43 | 1 51 | 1 54 |

The corrections in Tables II. and III. are always to be added, *r* is to be subtracted from the final result because the quantities in Table III above have been increased by that amount in order that they may all be additive.

## Solar and Sidereal Time.

### TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME AND *VICE VERSA*

THE length of a Sidereal day is 23*h.* 56*m.* 4·09*s.* of Mean Time. One hour of Sidereal Time is, therefore, equivalent to 59*m.* 50·170*s.* of Mean Time, and one hour of mean solar time is equivalent to 1*h.* 0*m.* 9·86*s.* of Sidereal Time. This may be expressed otherwise by saying that the Mean Time clock loses or retards 9·83*s.* per hour on the sidereal clock, and that the sidereal clock gains or accelerates 9·86*s.* per hour on the Mean Time clock. These quantities—"acceleration" and "retardation"—are tabulated below for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. On the other hand, if it is considered to be Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

| Acceleration. | Argument. | Retardation. | Acceleration. | Argument. | Retardation. | Acceleration. | Argument. | Retardation. | Argument. | Acceleration or Retardation. | Argument. | Acceleration or Retardation. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| *m.* *s.* | hours | *m.* *s.* | *s.* | mins. | *s.* | *s.* | mins. | *s.* | secs. | *s.* | secs. | *s.* |

# Celestial Phenomena for Observation, 1918

## ECLIPSES IN 1918.

In this year there will be two Eclipses of the Sun and one of the Moon, none of which will be visible at Greenwich.

I. A Total Eclipse of the Sun will happen in the evening of June 8 (G M T). This will be visible as a total eclipse from a path which crosses the North Pacific Ocean and the United States of America. The Borodino Islands, situated south of Japan, are on the line of totality, and the eclipse begins in this region of the Earth. The central line then crosses the Pacific, passing somewhat south of the Aleutian Islands, and strikes the American coast south of Vancouver Island. Portland in Oregon is slightly south of the path of totality. A total eclipse may be seen from Denver in Colorado, Jackson in Mississippi, and the eclipse ends its course in the Bahamas. The longest duration of totality (243 secs.) will happen in the Pacific Ocean in longitude 173½° W., latitude 32° 32′ N. The duration will be approximately two minutes in the Western States of America and 1½ minutes in the Eastern. A partial eclipse will be seen from North East Asia, Canada, North America generally, and Central America. The magnitude of the eclipse at Montreal will be 0·32, and the phenomenon will there take place from June 8d. 20h. 27m. p.m. until 9 minutes after midnight by Greenwich time.

II. A Partial Eclipse of the Moon in the forenoon of June 24 (Greenwich). The beginning will be visible generally in South America, except the eastern portion, in North America, except the northern portion, and throughout the Pacific Ocean and Australia. The ending will be visible generally in south-western North America, western and southern South America, and throughout the Pacific Ocean and Australia. The eclipse is a small one, less than one-seventh of the Moon's diameter being obscured.

III. An Annular Eclipse of the Sun in the afternoon of December 3. This eclipse will be visible only from South America, the South Pacific and South Atlantic Oceans, and part of the West Coast of Africa. The path from which an annular eclipse may be seen crosses the southern part of South America from West to East, Santiago in Chile being within it near its southern limit and Buenos Ayres near its northern.

## ECLIPSES OF JUPITER'S SATELLITES.

The following Table contains details of the Eclipses of the Satellites of Jupiter that will be visible from Greenwich in the year 1918, with a few outside this limit added. The letters D. and R. in the second column signify respectively Disappearance and Reappearance.

From January to June the disappearances and reappearances take place on the Eastern side of the planet. During this period Satellite I. does not disappear by eclipse, but passes behind the western limb of the planet and reappears from the shadow. The same is true in some cases of Satellite II. From June to December the disappearances and reappearances take place on the Western side of the planet, but Satellite I. after disappearing into the shadow of the planet reappears at its Eastern limb, and similarly for Satellites II. and III. in some cases towards the end of the year. A special case where this happens to Satellite IV. on December 29 is indicated by an asterisk, the time so marked being the time of reappearance at the limb. The next Opposition of Jupiter will happen early in the year 1919.

An astronomical telescope generally inverts the image, and consequently, in the Northern hemisphere, the Eastern side will be on the right hand and the Western on the left hand of the field of view. This is shown in the column on the third page of each month in the earlier part of this Almanack, in the column which gives the positions of the satellites relative to the planet at the time specified in the heading. The circle ○ indicates the planet, a black disc ● that the satellite whose number is wanting is in eclipse or is under occultation, and the sign ⨀ that it is in transit across the disc of the planet.

The local Mean Time of the Eclipses for any other place than Greenwich may be found by applying the longitude (in time) to the times given in the Table, adding if the longitude of the place is *East* of Greenwich, and subtracting if it is *West*. If Standard Time be required the zone difference is to be treated in the same way, or, in other words, the phenomena of Jupiter's satellites are seen simultaneously from all places where the planet is above the horizon at the time.

The above list contains the names of all the stars of the 6th magnitude and brighter that will be seen occulted from Greenwich during the year with the times of disappearance and reappearance. The times of the occultations if seen from other places will be different—earlier in general, if the place is West, later if it is East. Disappearances usually happen on the East or left-hand side of the Moon, reappearances on the West but the exact position is shown by the figures in the fourth and sixth columns, which give the angle from the vertex, or highest point of the Moon's disc, counting towards the East from 0° to 360°

*Sidereal and Solar Time* (see p. 77).

To obtain the Mean Time corresponding to a given Sidereal Time, take from the second page of the month the Sidereal Time at the preceding Mean Noon. Subtract this from the given Sidereal Time. From the remainder subtract the retardation for each item as given in the Table

Example To find the Mean Time which corresponds to Sidereal Time 17h. 52m. 28s. on July 12.

| | | | |
|---|---|---|---|
| Sidereal Time at Mean Noon .. | | 7 18 | 17 |
| Retardation for.. | 9h. ... 12m. 28.478 | 9 45 | 59 |
| | 46m. ... 7.542 | 1 36 | 27 |
| | 59s. 12d | | |
| Corresponding Mean Time, July 12 | = | 9 41 | 23 |

To convert Mean Time into Sidereal Time, add the acceleration for each item of the Mean Time and to this sum add the Sidereal Time at preceding Mean Noon.

## Mean Right Ascension and Declination of One Hundred Fundamental Stars, visible at Greenwich, for January 1, 1918.

The shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, or the line joining the North and South Pole, is 7,900 miles, the diameter of the circle, which is the Equator, is 7,926 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5 5 times that of water. The Earth moves round the Sun in a plane which passes through the Earth's centre, or, to write with more precision, the centre of gravity of the Sun and Moon moves in this plane, and superposed on this the Earth's movement undergoes some small deviations. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of 23½°, and it is this tilt which causes the Seasons, for the inclination is always in the same direction, and is such that the Northern hemisphere enjoys the heating and lighting effects of the Sun more in the period of the year we call our Summer than it does in the Winter months. The case is reversed for the Southern hemisphere. Because the Earth moves round the Sun, the Sun appears to change its position *in the sky during the year*, which is shown by the fact that different sets of stars are seen in the sky at midnight in Summer and Winter, and because of the inclination of the Equator to the Ecliptic, it is high *in* the sky in Summer and low in Winter. The dates when the Sun is at the exact mean or intermediate positions—*i.e.*, when it is at the points in the sky formed by the line of intersection of the planes of the Equator and Ecliptic—are called the Equinoxes, and on these dates day and night are of equal duration all over the globe. By comparing the intervals between the two equinoxes it will be seen that the Earth is delayed in traversing the Summer half (northern) of its orbit—*i.e.*, from Spring to Autumn—some eight days longer than the Winter half, from Autumn to Spring. This is the result of the eccentricity of the orbit and the law of areas—a law which requires that the imaginary line joining the Earth and Sun shall sweep over equal areas in equal times. As the orbit of the Earth round the Sun is an ellipse, and is such that the Earth is farthest from the Sun at the beginning of July, the Earth must move more slowly at that period of the year. The average velocity of the Earth in its orbit is 18½ miles a second. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time. Because the Earth moves round the Sun in the same direction as it rotates on its axis, the length of a solar day is more than the length of a rotation by about four minutes (see p. 92). The axis of rotation is not a fixed line in the Earth. Its extremity circles about the pole of figure at a distance of a few feet.

## THE TIDES.

The Tides of the Ocean have always been justly connected with the movements of the Moon, and it is certainly right to attribute them to the attractive influence of our Satellite on the water, modified by a similar influence of the Sun of less amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it might be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of long-continued observation. A series of observed times and heights of the tide is compiled and analysed, to show in a series of periodic terms the effects of the Moon and of the Sun, and when these terms are each carried forward to some future date their recombination gives the predicted tide. The mean level of the sea remains practically constant everywhere, but minute changes have been detected. High water is at its highest above that level (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide with the times of these phases of the Moon, but occur later, the interval being known as the age of the tide—thus, at London Bridge, the highest, or spring tide occurs 2½ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap is the most visible of the periodic effects which make up the whole variation of the tides. There should be a difference between the height of spring tide at New Moon and at Full Moon, and also between the height of neap tide at first quarter and at third quarter. The Moon's position at apogee and perigee also causes a difference in the height of the tide, but the effects from these causes are small, and are so involved that they mask one another and none is specially apparent.

## TERRESTRIAL MAGNETISM.

A phenomenon of the Earth, the origin of which is obscure but which forms the subject of much investigation, is known as Earth magnetism. Its best known manifestation is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle, except in particular cases, is not the north point shown by astronomical observations, in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Along a line from the north of Norfolk through Greenwich to

---

Polaris = α Ursæ Minoris, Aldebaran = α Tauri; Rigel = β Orionis, Capella = α Aurigæ, Betelgeuse = α Orionis, Sirius = α Canis Majoris, Castor = α Geminorum, Procyon = α Canis Minoris, Pollux = β Geminorum, Regulus = α Leonis, Spica = α Virginis, Arcturus = α Bootis, Antares = α Scorpii, Vega = α Lyræ, Fomalhaut = α Piscis Australis, α Aquilæ = Altair, α Pegasi = Markab, Achernar = α Eridani, Canopus = α Argûs.

The variation of light of Betelgeuse is irregular. α Herculis, the limits of magnitude are 3·1 and 3·9. η Argûs, the variation is irregular; the limits of magnitude are 1·2 and 7·4.

Chichester the declination is the same as at Greenwich. Along a parallel line through Dover the West declination is about forty minutes of arc less, from Newcastle to Plymouth it is about 1½° greater, whilst at Dublin the declination West is 8° or 4° greater than at Greenwich. Observations of magnetic declination being charted, supply knowledge of this element of the magnetism of our globe. From such charts it appears that there are two points or regions which may be considered as directive centres, and are known as the Magnetic Poles. At these places a freely suspended magnetised needle would stand vertically. They do not coincide with the terrestrial Poles, nor are they exactly antipodal. The position of the North Magnetic Pole is about latitude 70°, longitude 100° W., the South is in latitude 73°, longitude 150° E. The magnetic declination at any place changes gradually year by year, and its amount observed in or near London at certain epochs since its discovery, which is credited to Columbus at the end of the fifteenth century, is given in the following table —

| Year | ° | ′ | |
|---|---|---|---|
| 1580 | 11 | 15 | East. |
| 1665 | 2 | 30 | West. |
| 1768 | 20 | 0 | West. |
| 1800 | 24 | 0 | West. |

From the year 1841 much attention has been given to the observation of earth-magnetic effects, and the following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only. The figures for 1917 are approximate.

| Year | Mean Magnetic Declination at Greenwich West. | Horizontal Magnetic Force in C. G. S. Units at Greenwich. | Mean Inclination or Dip of Needle at Greenwich. |
|---|---|---|---|
| | ° ′ | | ° ′ |
| 1900 | 16 29·0 | ·1846 | 67 8·3 |
| 1910 | 15 41·8 | ·1855 | 66 52·6 |
| 1911 | 15 33·0 | ·1856 | 66 38·1 |
| 1912 | 15 24·3 | ·1858 | 66 23·8 |
| 1913 | 15 15·8 | ·1863 | 66 10·3 |
| 1914 | 15 6·3 | ·1862 | 65 57·2 |
| 1915 | 14 56·5 | ·1857 | 65 43·8 |
| 1916 | 14 46·9 | ·1849 | 65 30·6 |
| 1917 | 14 37·0 | ·1848 | 65 14·0 |

The dip is the angle that a delicately poised needle constrained to move in a vertical plane under the action of magnetism only will make with the horizontal plane. The declination varies during the hours, the needle making a small excursion in the forenoon from East to West, and returning.

The diurnal variation of the magnetic declination at Greenwich is about 10′ in summer and 7′ in winter, and this daily excursion is greater at times when the Sun-spots are at a maximum. The needle occupies its mean position about 10h a.m., and again about 6h. p.m., throughout the year. It reaches its most westerly position about 1h. p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking, coincident with the passage of great outbursts of Sun-spots across the Sun's central meridian.

### THE GYRO-COMPASS.

In recent years there has been in use on some ships of the British Navy, side by side with the magnetic compass, an instrument which seeks and *continually points to the true astronomical* North and is quite independent of magnetism. The effective principle of this instrument is that of the gyroscope combined with the rotation of the Earth, *and is associated with the names of* Foucault, and Dr Sang, of Edinburgh, who enunciated the principle in the middle of the last century. According to the principle of the gyroscope, a rapidly rotating disc must retain its position in space. Such a rotating disc, if it be delicately suspended or if its supporting frame floats in liquid, will tend to hang out of plumb, as the Earth rotates beneath it, and the Earth's gravity will tend to restore it to verticality. The effect of these two tendencies is for the axis of the rotating disc to range itself due north and south, or parallel to the Earth's axis, for only in *that position of the rotating disc* do the above two tendencies not counteract one another.

The realisation of these principles, and the effective working of the gyro-compass, have been made possible by the progress of electro-mechanism, which has furnished means of making a *disc rotate continuously* at high speed. The instrument has achieved some success, but cannot yet replace the more ancient form of *mariner's compass.*

## The Solar System.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, is not unlike many of the stars we see in magnitude and constitution. It is surrounded by a family of smaller bodies of which our Earth is one, so that the Solar system, though only a minute detail in the structure of the Universe, is *our* abode—it is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The study of accurate astronomy begins with the Solar or Planetary system, since its members are nearest to us. This system consists of the Sun, with eight major planets and more than 600 minor planets, or asteroids, circulating round him at varying distances in oval-shaped orbits not greatly differing from the circular form. Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals, since they move in elongated elliptical orbits of which the Sun is at one focus, are also members of the Solar system, but shine chiefly by their own light.

The plane of the Ecliptic in which the Earth

moves round the Sun *(see p. 8a)* is used as a fundamental plane of reference. The other planets move in planes inclined but little to the plane of the Ecliptic, at varying distances from the Sun, and describe orbits in periodic times which are connected with these distances by a certain relation. *Following* are given brief notes on each of the bodies which make up the solar system with details of their sizes, distances from their primary and periodic times in tabular form. The time of rotation about the axis or the length of the day of the planet is added where this is known.

### THE SUN

The surface of the Sun presents a mottled appearance, *and on it black spots appear sporadically*. The nature of these is not known with certainty, but it is generally supposed that they are at a lower level than the surrounding surface, the photosphere, though some modern views assert that spots are due to a central uprush. They are signs of storms and whirling disturbances in the solar atmosphere, and it has been recently demonstrated by Prof. Hale of the Solar Observatory at Mount Wilson (California, that they are centres of magnetic disturbance. The spots vary in size and number and their total area reaches a maximum about every eleven years. They seldom appear more than 30° of latitude from the solar equator north or south, and the spotted regions converge towards that equator as the time of minimum approaches. The Sun rotates on its axis in about 25 days 8 hours, and the spots occupy 13½ days in crossing the visible disc, the time being affected by the movement of the Earth in the interval, but, like Jupiter the Sun appears not to rotate as a whole, the period of rotation being different in different latitudes. The Equator makes a complete rotation in less than 25 days, whereas the period for latitude 35° is nearly 27 days. The spots move from east to west: they disappear at the western edge, and if the spot endures it reappears at the eastern edge in 13 or 14 days. Sun-spots are of irregular shape vary greatly in size and consist of a nucleus apparently *black*, *and a penumbra faintly dark*

DATES OF SUN-SPOT MAXIMA AND MINIMA.

| Maxima. | | Minima. | |
|---|---|---|---|
| 1829·2 | 1837·1 | 1833·6 | 1867·2 |
| 1848·1 | 1870·6 | 1878·3 | 1878·9 |
| 1860·9 | 1883·9 | 1889·3 | 1889·6 |
| 1837·2 | 1894·1 | 1843·5 | 1901·7 |
| 1848·1 | 1905·1 | 1856·0 | 1913·1 |

A Sun-spot maximum is now in progress. The year 1917 was marked by the appearances of several groups of unusually large size, and in the middle of August the total spotted area of the Sun was larger than in any period of the Greenwich record, which began in the year 1874.

*When the intense light of the Sun is shut off* by the interposition of the dark body of the Moon, as in a total solar eclipse, certain red prominences are seen projecting from the Sun's limb, which consist of masses of glowing hydrogen gas arising from the chromosphere, sometimes to a height of nine or ten times the diameter of the Earth. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage to the Sun, extending to an immense distance, is called the corona, and can at present *only be seen during total eclipses of the Sun*. The lower portion consists of a pale green light containing hydrogen, the upper a beautiful mass of silvery white light, in form of feather like plumes with dark spaces between. These plumes *have sometimes been traced to twice the Sun's* diameter. The corona does not appear to retain a constancy of form, but has been observed to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. Solar eclipses are only total at certain places on the globe, and an eclipse is partial in localities off the line of totality because the change in the observer's position places the Moon out of the direct line between him and the Sun. Total eclipses of the Sun are very rare in this country, there will be none till the year 1927.

The mean distance from Sun to Earth is about 93,000,000 miles. In comparing distances expressed in such high numbers it is not very easy to get a clear idea of their relation to each other. For distances in the solar system astronomers take this distance as the unit and express all others in terms of it.

### MERCURY

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the former body, *and is sometimes* to the West, *sometimes* to the East of the Sun. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are, technically known as *Elongations, and the times and distances are* given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these elongations to vary considerably and they may be as small as 16° or as large as 29°. The period of revolution round the Sun—in other words, Mercury's year—comprises 88 solar days, and he turns on his axis either in the same time and therefore always presents the same face to the Sun like the Moon with respect to the Earth or in about 24 hours. Also like the Moon, Mercury shows phases to the Earth—like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West.

### VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, is almost exactly the same size as the Earth. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbours, the angles of Elongation exceed those of Mercury, and extend to 47°. The disc of Venus is not telescopically interesting, for owing to her dense cloud-laden atmosphere but very few markings are visible, and this renders a determination of her axial rotation uncertain. By some astronomers her day is believed to be very nearly equal to that of the Earth, whilst others have *concluded that it is equal to the year of Venus*, or in other words, that the planet always presents the same face to the Sun. Venus has epochs of great brilliancy when she appears as a beautiful crescent like the Moon when about 3½ days from *New Such epochs will occur in the current year* *(see page 86)*.

## MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth, and it will be at opposition in the year 1918 (*see* page 30). Mars, like Mercury and Venus, exhibits phases, but in a much less degree than those planets. He is never seen in crescent phase, and is only gibbous to the extent of one-eighth of his disc, the maximum occurring when the planet is in quadrature, or 90° of longitude from the Sun. The other superior planets are too far away to show any very appreciable phase, though traces of it are sometimes to be detected in Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable his rotation period to be well ascertained, and there are besides white spots at the poles of rotation. These are supposed to consist of snow, and when it is summer to the Martians in the northern hemisphere, the white spot about that pole evinces considerably its extent, if it does not disappear entirely. The continents and seas as the markings are called, have been charted and their positions accurately laid down. Many excellent photographs of Mars have also been obtained showing the white polar spots and other markings very plainly. These markings have been seen with varying degrees of distinctness by different observers, who have depicted them with various degrees of precision. Some of the markings have been named "canals," perhaps a little unfortunately, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof.

## MINOR PLANETS.

Between the orbits of Mars and Jupiter a large number of small plan ts have been discovered. Up to the end of 1917 826 had been definitely numbered and their o ptical orbits computed. Every year adds new discoveries to this very abundant class of objects, and there must still be thousands awaiting detection. They revolve in orbits between the orbits of Mars and Jupiter, and must be extremely small. The four largest were found in the early years of the 19th century. The names and dimensions are—Ceres, 485 miles; Pallas, 304 miles; Juno, 128 miles; and Vesta, 243 miles. Vesta is the brightest though not the largest. In recent years the discoveries have been of much smaller objects, and it is probable that some of them are not more than from 10 to 20 miles in diameter, and are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, amounting on an average to about 1,600 days, or 4½ years. Some of the orbits are very oval and the inclination of their planes varies considerably; in the case of Pallas it amounts to 35°, that of Juno being only 13°. One of these small bodies, named Eros, at some oppositions approaches nearer to the Earth than Mars does at any time, and thus affords a good opportunity for determination of the solar parallax.

## JUPITER.

The next planet, Jupiter, whose distance from the Sun is 5·2 times that of the Earth, is the largest planet in the system, and has a diameter eleven times that of the Earth. Though so much larger than the Earth, his density is but ¼th of the latter. On viewing Jupiter through a telescope the first thing that strikes the observer is that his disc is not circular, but oval, the polar diameter being 84,778 miles and the equatorial 90,384 miles.

This form, of an oblate spheroid, is due to his rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree. Jupiter has four principal satellites about the same size as our moon. They were the first celestial objects discovered with the telescope, by Galileo, its improver, in the year 1610. Their orbits are but slightly inclined to that of Jupiter, and in consequence eclipses of the three inner moons occur every Jovian lunation, their distance from Jupiter not being large enough to permit them to escape the shadow, as is the case with the IV satellite (*see* page 66 and pages 98, 99).

### The Great Red Spot on Jupiter.

This may be said to have formed the most remarkable and the best observed planetary feature of modern times. Though it has undergone marked changes it appears to have been visible since the Rev. W. R. Dawes figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857. A curious bay or hollow on this belt has been visible since 1831, and if we accept this as identical with the one now visible (which includes the red spot), then the rotation of this object during the 84 years from 1831 to 1914 was 9h. 55m. 36·5s. from 74,170 rotations. In September, 1918, the red spot will probably follow the zero meridian of Jupiter, System II., by about 80 minutes, while in December it will follow it by an hour. Exact figures cannot be given owing to the variable motion of the spot. The transits of the Z.M. System II. of Jupiter on several dates are as under —

| | h. m. | | h. m. |
|---|---|---|---|
| Sept. 23 | 9 22 p.m. | Dec. 6 | 8 23 p.m. |
| ,, 27 | 10 50 ,, | ,, 8 | 10 12 ,, |
| Oct. 2 | 9 7 ,, | ,, 10 | 11 50 ,, |
| ,, 24 | 8 9 ,, | ,, 22 | 5 54 ,, |
| Nov. 8 | 8 3 | ,, 23 | 7 32 ,, |
| ,, 14 | 10 28 | ,, 25 | 9 10 ,, |
| ,, 26 | 10 19 | ,, 27 | 10 48 ,, |

The times for other dates may be found by adding periods of 9h. 55m. 40s.

*Note.*—Two systems are in use for defining the positions of markings on Jupiter. In System I., which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as 9h. 50m. 30s. System II applies to the Temperate Zones, and in this the time of rotation is 9h. 55m. 40·6s.

## SATURN.

The fifth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of three bright rings and an inner dusky ring through which the body of the planet can be seen. The rings appear to be flat annular discs of extreme thinness, inclined at an angle of 28° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece, either

solid or liquid, as in that case it would be difficult to account for their stability. They probably consist of an immense number of minute bodies revolving like satellites round the body of the planet. Of the three bright rings the middle is the brightest. When the Earth is in the plane of the rings it might be expected that they would be seen edgewise, but owing to their thinness they are invisible to us except in the *field of a good telescope*. *Also, on the rare occasions* when the Sun and Earth are on opposite sides of their plane, the rings will be invisible to us. On page 79 will be found a table showing the dimensions of Saturn's outer ring as seen from the Earth. A rare and remarkable observation of an occultation of a small star by Saturn's ring made last year (1917, Feb. 9) showed that the star could be seen through the outer ring. Belts like those on Jupiter, but *of* not so pronounced a character, may be seen on Saturn. His figure also shows a bulging at his equator, the ratio of the polar to the equatorial diameter being as 14 to 15.

Saturn has ten satellites, situated outside the rings, some of which are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our Moon, whilst Iapetus is about the *same size as our satellite*.

## URANUS.

Discovered by William Herschel at Bath in 1781, this planet is only just visible to the naked eye. In a telescope Uranus may be distinguished from the stars around by his disc, which is obvious though less than 4" in diameter, and by the quality of his light, which is less piercing than that of the stars. Very little is known about his surface markings but a rotation period of 10 hours 49 minutes has been inferred from the observed variability of his light, which has been supposed to be due to some specially reflective spot coming into the Sun's rays. A determination of the rotation period by the spectroscopic method agrees with this. Uranus will be favourably situated for observations in the summer months in 1918.

## NEPTUNE.

This planet, placed on the confines of the Solar system, is a small telescopic object of about the 8th magnitude. He will occupy nearly a stationary position in Cancer, and may be viewed with best effect in January of this year.

## THE SATELLITES.

Neither Mercury nor Venus, so far as is known, has a satellite: the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. When viewed through a telescope, charts of very great accuracy can be made of her surface, as she has no appreciable atmosphere to obscure the more delicate markings. With a powerful telescope the Moon may be brought apparently within about 500 miles, so that any changes which might occur over large tracts of country could be easily distinguished: cities might be distinguished perhaps from cultivated fields. The Moon's surface shows signs of tremendous volcanic action: craters are abundantly found over it, varying greatly in size and crowded closely together. It will be noticed that we only see one side of the Moon, and from this fact we infer that she must turn on her axis in the same time that she turns round the Earth. As there is no sign of water or vapour on her disc, and consequently no atmosphere, the surface must be exposed to the most violent changes of temperature. It must be heated in the lunar day of half a month to a very high temperature indeed, and in the other half subjected to cold equal to that of interstellar space. Her diameter is 2,160 miles, or a trifle more, and her rate of motion through the firmament 13° 10′ 35″ per day and 32′ 58″ per hour. Thus she travels over a space slightly exceeding her own diameter in one hour. The actual time she takes to move around the Earth is 27d. 7h. 43m. 11.5s., but the time from one New Moon to another is 29d. 12h. 44m. 3s. When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. Quite a small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater pits. The phases of the Moon occur because only a half of the lunar sphere is bright at any one time, and we on the Earth may, or may not, be in a position to see the whole of that bright hemisphere.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon, causing a lunar eclipse, which may be either total or partial as in the case of Solar Eclipses, but there is this difference—that a

## ELEMENTS OF THE SOLAR SYSTEM.

lunar eclipse will be visible to all observers where the Moon is above the horizon at the time. The observation of the Moon's disc is hardly ever complete, but owing to the Sun's light being scattered by the clouds in the Earth's atmosphere, the Moon appears usually as a dark copper-coloured disc. From what has been said above, it will be understood that solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon.

In a note on page 54 it is stated that the small daily retardation of moonrise, which is the essential characteristic of the Harvest Moon, occurs each month, though not at the time of Full Moon. As this small retardation happens earlier, lunation by lunation, by 4 or 5 days only, in the lunations which precede and follow the Autumnal Equinox it happens when the Moon is not far from Full, and the three Full Moons at this period partake in some degree of the character of Harvest Moon. Moreover, the position of the node of the Moon's orbit has much effect on the length of this minimum retardation of rising. The retardation depends essentially on the inclination of the lunar orbit to the horizon at time of moonrise, and hence it is a question of latitude, but apart from this point, when the Ascending node of the Moon's orbit is at this inclination, and therefore the daily retardation, is small. In the year 1913 the longitude of the node in September being 354°, the difference between time of rising on consecutive days at Full Moon was 8 or 9 minutes only. The present position of the node does not give such a small minimum retardation as this, but it tends to make it occur at the Full Moon before that in September. Thus there are differences in the details of the phenomenon, but the expression "Harvest Moon" is held to apply in all cases to the Full Moon which happens nearest the Autumn Equinox, whilst that which follows is called the Hunter's Moon.

### A FEW OF THE CHIEF LUNAR FORMATIONS

*Wedge-shaped Valley of the Alps.*—Near the central line of disc, towards the north, a cleft 89 miles long and 3¼-8¾ miles broad.

*Apennines.*—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 460 miles, highest summit (Huygens) reaches 18,000 feet.

*Aristarchus.*—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a bright spot when all the surrounding region is involved in shadow.

*Mare Crisium.*—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 364 miles E. to W. Well seen five days after new or a few days after full.

*Mare Serenitatis.*—Lies S. of the Moon's centre, and extends over 448 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This *mare* is visible to naked eye.

*Clavius.*—One of the finest craters on the Moon, and about 144 miles in diameter. Situated on S. limb.

*Copernicus.*—N. E. of centre. Large crater 56 m. in diameter, surrounded by a mountainous wall and including a central hill with several peaks.

*Gassendi.*—Near N.E. limb. A conspicuous walled plain, 55 miles broad. Its highest point is nearly 10,000 feet above the interior.

*Langrenus.*—Near W. edge. A splendid object when the sun has just risen over it. Has a central hill and a multiple ring around it about 9,600 feet high.

*Tycho.*—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

The various formations may be readily identified by reference to a lunar map and catalogue, many of which have been published, and are fairly comprehensive.

All the planets outside our own in the Solar system possess attendant moons: thus Jupiter has nine, and Saturn ten. Four of Jupiter's moons and one of Saturn's are visible in small telescopes, but the rest are nearly all very faint and require powerful instruments. In all 29

satellites are known within the Solar system, and of these seven have been discovered during the last 45 years. Satellites VIII. and IX. of Jupiter, Phœbe, the four satellites of Uranus, and the satellite of Neptune all have retrograde motion—*i.e.*, they circulate about their primary in the opposite direction to the motion of the other bodies of the Solar system. The satellites of Jupiter are generally known by their numbers, as shown by the Roman figures, which follow the order of discovery.

## COMETS.

In addition to the planets, there are other interesting objects belonging to the Solar system, called comets. Some of these revolve in elliptical orbits, and their periodic times range from 3½ years to more than a million years. Others move in parabolic courses and apparently do not repeat their visits to the Sun.

Comets revolving around the Sun in comparatively limited times are not very numerous, but our knowledge of them is constantly becoming more comprehensive and accurate. These small returning comets revolve in periods from 3½ to 9 years, and deserve special notice, as their orbits are well known and predictions of their reappearances can be accurately made in many cases.

Their paths extend outwards to the position where Jupiter performs his revolution, and from this circumstance they are termed Jovian comets. The following are the approximate months when some of the members of this family may be expected to return to perihelion in 1918 and 1919 :—

| Expected Return. | Period in Years. | Name of Comet and Year of Discovery |
|---|---|---|
| 1918. March | 7 | 414... Faye ... 1843 |
| March | 3 | 299. Encke ... 1786 |
| May | 8 | 530. Tempel ... 1867 |
| 1919. August. | 6 | 640 .. Kopff ... 1906 |
| September | 6 | 897 Holmes ... 1892 |
| October | 6 | 540. Finlay ... 1886 |

The comets of this class move in elliptic orbits not much inclined to the Ecliptic. Without exception they travel in *direct* courses, and in these respects present an analogy to the planets, but of those that move in very long ellipses, or parabolas, about two-thirds have a retrograde (westerly) motion.

There are other families of comets, none so large as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for reasons similar to that given above. Halley's comet belongs to the Neptunian family.

In the life of a comet the tail sometimes appears to undergo very rapid and curious changes. On examination of the light of comets with the spectroscope, it appears to consist of carbon in various forms, and cyanogen has also been detected. These materials exhibit themselves as bright bands. Generally a continuous spectrum is shown as a background to the bright lines, from which we infer that a part of the comet's light is due to reflected sunlight. Comets' tails are generally directed away from the Sun, as if acted upon by some repulsive action—perhaps light.

## METEORS.

Another class of objects which belong to the Solar system are the meteoric streams, giving rise to occasional showers of meteors, falling stars, or fire-balls, as they are differently called, both which represent one and the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form striking phenomena. 1906 will be known as rather a notable year in this branch of astronomy, since it provided a remarkably abundant and previously unknown stream on June 28, proving to have a connection with Pons-Winnecke's periodical comet, the orbits being nearly the same. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. The following is a table of the radiant points of some of the more prominent meteoric streams which will probably be visible during the year 1918 :—

| No. | Epoch. | Radiant Point. R.A. | Dec. | Name of Shower. |
|---|---|---|---|---|
| | | ° | ° | |
| 1 | January 1—4 | 230 | +53 | Quadrantids. |
| 2 | January 25 | 332 | +58 | ζ Cephеids. |
| 3 | February 20 | 263 | +36 | ρ Herculids. |
| 4 | March 1—4 | 168 | + 4 | γ Leonids. |
| 5 | March 13—24 | 162 | +58 | β Ursids. |
| 6 | April 20—22 | 271 | +33 | Lyrids. |
| 7 | May 1—6 | 338 | — 2 | γ Aquarids. |
| 8 | May 28—26 | 246 | +29 | ζ Herculids. |
| 9 | May 30—June 4 | 330 | +26 | η Pegasids. |
| 10 | June 28 | 213 | +53 | β Bootids. |
| 11 | July 15 | 304 | —12 | α Capricornids. |
| 12 | July 25—30 | 339 | —11 | δ Aquarids. |
| 13 | August 10—12 | 45 | +57 | Perseids. |
| 14 | August 15—25 | 231 | +60 | ι Draconids. |
| 15 | August 29. | 106 | +31 | Lyncids. |
| 16 | September 27 | 4 | +28 | α Andromedids. |
| 17 | October 11—24. | 40 | +22 | ε Aristids. |
| 18 | October 17—24. | 92 | +15 | Orionids. |
| 19 | November 5— | 62 | +33 | ε Perseids. |
| 20 | Nov 13—15 | 150 | +23 | Leonids. |
| 21 | Nov 14—25 | 64 | +22 | α Taurids. |
| 22 | Nov 17—23 | 23 | +43 | Andromedids. |
| 23 | Dec. 1—12 | 109 | +31 | β Geminids. |
| 24 | Dec. 1— 14. | 108 | +33 | Geminids. |

## THE PERSEIDS.

This is the most regularly recurrent and long-continued display of the whole year. It visibly commences early in July, and ends in the fourth week of August. The radiant shows a motion to the E.N.E., and its positions on eight nights are :—

| | | | |
|---|---|---|---|
| July 8 | 9°+46° | Aug. 1. | 33°+55° |
| ,, 14 | 14°+48° | ,, 7 .. | 40°+56° |
| ,, 20 | 20°+51° | ,, 13.. .. | 48°+57° |
| ,, 26 .. | 26°+53° | ,, 19. .. | 57°+56° |

## THE AURORA BOREALIS.

This phenomenon is one of the most uncertain as regards its individual appearances, though it manifests itself more abundantly at intervals of about eleven years, and seems to be associated with magnetic disturbances and sun-spots, which have a similar period. There have been several remarkable displays of aurora in the past year (1917). On August 9 a fine auroral display was seen from England, a similar one from Tasmania, there was a magnetic disturbance on the same day, and a large spot was then on the Sun. There were others on August 22 and August 29. The northern sky should be scanned on clear nights to discern any undue luminosity there in the form of streamers, arches, or condensations, and it is important to record the varying phases

and times of the features observed. Though surprises have been plentifully exhibited in past years they have seldom been noted and described in that critical and accurate manner which is so essential to our arriving at a solution of the problem they present.

### THE ZODIACAL LIGHT.

This is another little understood appearance in the skies and as such merits further attentive study from observers. It shows as a band of faint light stretching up slantingly from the Sun chiefly on the mornings of October and evenings of March. Whether it is a widely scattered appendage of the Sun or a vast concourse of slightly reflective meteoric systems is uncertain. It has been asserted that it is a mere atmospheric effect, but this is not consistent with some of the chief features of its appearance. That it has a celestial origin seems certain, but its true nature is not clearly distinguishable on the evidence before us.

## The Stellar System.

FAR beyond the confines of the Solar system are the Stars, apparently scattered about without any particular plan. To us they appear fixed on the interior surface of a hemisphere of which the observer is the centre. Actually they are at great and very various distances from us, and are themselves separated from one another by equally large distances. The nearest star to the Sun is nearly ten thousand times as far from it as is the planet Neptune. It is one of the aims of modern astronomy to investigate the method of distribution of these bodies in space, and their possible movements.

### THE CONSTELLATIONS.

In the earliest ages the stars were formed into groups named from some fanciful resemblance to men, animals, or mythological personages, and these names of the constellations have come down to us and still play a part in astronomical nomenclature. It has been said that the constellations were designed about five thousand years ago by a people living somewhere near the valley of the Euphrates, but the statement is necessarily conjectural. The earliest inscribed record is a Babylonian Boundary Stone in the British Museum, whose date is considered by authorities to be about 1300 B.C., which bears incised traces of what we know as Signs of the Zodiac. To some of the brightest stars names were given—the star Arcturus is mentioned in the Book of Job—and many of these names survive and are in general use. More commonly stars are distinguished by a method designed by Bayer in the early part of the seventeenth century who assigned a Greek letter to the individual stars of each constellation, the brightest star of the configuration being generally, but not invariably, called α, the next brightest β, and so on. Arcturus, according to this scheme, is therefore known also as α Bootis. When the letters of the Greek alphabet were insufficient in number for the stars of a constellation, the Roman alphabet was brought into use in continuation, A being printed as a capital, the remaining letters in the small alphabet. Flamsteed, the first Astronomer Royal, evolved another but no dissimilar plan, according to which the stars of each constellation are numbered in order of Right Ascension. Arcturus is therefore described in catalogues alternatively as 16 Bootis. As telescopic power increased stars were observed which are not included in Flamsteed's enumeration, and each of these is known generally by the ordinal number in the catalogue in which it first appears. The star known as Groombridge 1830 is an example of this nomenclature. There are said to be about 10,000 stars visible to the naked eye in the whole celestial sphere, the number including the cases where two or more faint stars close together combine to form one which is so visible. The number naturally depends on the efficiency of the observing eye and the clearness of the atmosphere, and the estimate will be less generous if stars to magnitude 6·0 and no fainter are included, which is sometimes taken as the limit of naked-eye visibility. The whole number of stars down to this limit of magnitude is 4,300, of which more than 3,000 are visible during the year from latitude 60°. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid. The action of a faint light imperceptible to the eye makes an impression on the photographic plate when continued for a long time, and hence the number of stars recorded increases as the time of exposure is lengthened. One hundred millions is an under-estimate of the number of stars already photographed, and it may be supposed that this number would be much increased with increased exposure. Stars are divided into classes according to their magnitude or brightness, the brightest being of zero magnitude and stars of magnitude 9 being those just visible in a telescope with an object glass of 1 inch diameter. The Yerkes telescope, whose object glass has 40 inches diameter, will just show stars of the 17th magnitude.

### STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them. The spectral types are marked by the letters O, B, A, F, G, K, M, and the order as written is supposed to indicate the order of evolution or growth of stars. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen, and have some *affinity to planetary nebulæ*. Stars whose spectra range between A and F—and it is to be remarked that there is no rigorous line of division between the classes—are white or blue stars, and in their spectra the absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls within this group. The spectra of the remaining classes, K to M, indicate a lowering of temperature, and the stars are red. Antares, Betelgeuse, and α Herculis are notable stars of this type.

### STELLAR MOTION.

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being

called its Proper Motion. Formerly the 6th magnitude star, No. 1830 in Groombridge's catalogue, which moves through 7" a year, was the star of largest known proper motion, and was known as the Runaway Star. In 1897 a star in the Southern Hemisphere of magnitude 8 was found to have an annual motion of nearly 9", but this does not now take the first place in the class. During 1916 Prof. Barnard found a faint star with an annual proper motion of rather more than 10", which for the present is the largest known. Consideration of these proper motions has led to the conclusion that they are in part due to an actual movement in space of the star itself, but in part to the movement of our own Sun, which causes an apparent movement of the star in the opposite direction, this latter being called the star's parallactic motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19·5 kilometres per second towards a point on the celestial sphere within the confines of the constellation Hercules, and not far from the bright star Vega. Investigations of a parallel kind, but from somewhat different data, have shown small variations, but the above is a rough statement of the mean of the determinations. This movement of 19·5 kilometres per second being established, if by any means it is possible to find out the mean parallactic movement of a group of stars, the mean parallax, or distance of this group from us, follows from a simple computation. In other words, the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base line with which to measure the distances of the stars.

## DISTANCES OF THE STARS.

The determination of a star's distance or stellar parallax is a matter of difficulty, and the distances of scarcely more than 300 stars have been found by the direct method. If a sphere be assumed round the Sun as centre with a radius of a hundred billion miles, there are within it, so far as is known, only 60 stars. The nearest of these is the bright star α Centauri. They are not all first magnitude stars, but they are all stars with large proper motion. The ordinary astronomical unit, or distance of the Sun from the Earth, is not sufficiently large to conveniently express the large distances of the stars. It is found more satisfactory to take as unit the distance that light travels in a year, which may be considered roughly represented in miles by 6 followed by 12 noughts. A unit recently proposed, the parsec (parallax of 1"), is 3¼ times this, or 2 followed by 13 zeros. The parallax of α Centauri has been found to be 0·76", which would make its distance from the Earth 275,000 times that of the Sun. At the rate at which light travels through space, it would require four years and four months to reach the Earth from this star.

## VARIABLE STARS.

Although the stars generally shine with an unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is the best known. In general this star is of nearly the second magnitude, but at stated intervals of something less than three days it fades away to nearly the fourth magnitude, *remains so for about* 20 minutes, and then regains its light. On opposite page will be found the times of minima of this star throughout the year. The position of Algol is given by R.A. 3h. 2m. 48s., Declination 40° 36' N.

The star ο Ceti, known also as Mira Ceti, is a variable of another class. This star, whose variability was discovered by Fabricius in 1596, is sometimes as bright as the second magnitude, but fades away for about three months until quite invisible to the naked eye, and then falls to the eighth or ninth magnitude. The period or interval from maximum to maximum is about 331 days, but both the period and the limits of brightness are subject to variation. Maximum will happen in 1918 at the end of September or beginning of October, which is a suitable time of year for observing this star.

The number of known variables has largely increased in recent years, and these may be divided roughly into two classes—short-period variables and long period variables—of which

The last column of each table shows the actual brightness compared with that of our Sun. The Sun is here taken to be a star of magnitude −26·1 on the Stellar scale. α Centauri.—The components of this binary are combined. Quite lately a small star has been discovered near α Centauri which has the same parallax, which must be the least luminous star known.

the two[8] stars above mentioned are typical. There are other kinds of short-period variables besides those of the Algol type. The star β Lyræ, situated at R.A. 18h. 47m., Declination 33° 18′ N., passes from minimum to minimum in about 6½ days, the range of brightness being about a magnitude, but it is peculiar because it is not at the same brightness at all the minima. The alternate minima are equal, whilst the star is at the same brightness at all the maxima. The Cepheid variables form a type which take their name from δ Cephei, a star in R.A. 22h. 26m., Declination 57° 59′ N., whose brightness ranges from the third to the fifth magnitude, the period of variation from minimum to minimum being about 5½ days. The average period of variation of stars of this class is about 7 days, and their peculiarity is that the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. There are stars more capricious in their variation than any of these, of which 88 Cygni is a good example but want of space prevents any further description of the details of this subject, which is now followed by observers and mathematical investigators from various points of view.

## THE VARIABLE STAR ALGOL (BETA PERSEI).

Computed Times of Minima for 1918—max. 2¾, min. 3¼ mag.

## COLOURED STARS.

It will be noticed that among the stars some *differ from others in colour*, and in the case of some of the binary stars the contrast in the colours is very marked. The subject of star colour is associated to some extent with solar spectroscopy, the white and bluish stars having generally a spectrum of Type I in Secchi's classification, yellow stars a spectrum of Type II., red stars being of the third type. Star colour is also investigated by photography, because a blue star will give a larger image on a photographic plate than a red one of the same visual brightness, the exposures being for the same length of time in the two cases. The difference between the magnitude of a star as expressed numerically in the photographic and visual scales is called its Colour Index.

## STAR CLUSTERS AND NEBULÆ.

Among the other apparently solitary stars we may notice groups of stars gathered close together sometimes easily separable into individual stars, others that can only be separated in the most powerful telescopes, and some that appear as unresolvable patches of light. These last are called nebulæ, and appear to consist in some instances, of an incandescent gas, according to the evidence of the spectroscope. A short list of the more interesting of these is given herewith.

| No. in New General Catalogue. | Messier or Herschel's Number | R.A. 1900. | Declination 1900. | Constellation | Appearance |
|---|---|---|---|---|---|
| | | h. m. | ° ′ | | |
| 224 | M 31 | 0 38 | +40 50 | Andromeda | Very brilliant oval nebula, visible to naked eye. |
| 869 & 884 | H VI 33, 34 | 2 15 | +56 45 | Perseus | Fine double cluster, visible to naked eye. |
| 598 | M 33 | 1 29 | +29 38 | Andromeda | A large nebula. |
| 1952 | M 1 | 5 30 | +22 0 | Taurus | The well known "Crab Nebula" of Lord Rosse. |
| 1976 | M 42 | 5 32 | − 5 27 | Orion | Large and splendid nebula visible to naked eye. |
| 1039 | M 37 | 5 47 | +32 30 | Auriga | A fine cluster of stars. |
| 2070 | — | 5 39 | −69 19 | Dorado | Great "Looped" nebula—visible to naked eye. |
| 2168 | M 35 | 6 4 | +24 20 | Gemini | Magnificent cluster of stars. |
| 2632 | M 44 | 8 35 | +20 15 | Cancer | Called 'Præsepe, or the "Bee Hive"—visible to naked eye. |
| 3372 | | 10 42 | −59 16 | Argo | Great nebula surrounding η Argûs. |
| 3594 | M 51 | 13 26 | +47 35 | Canes Venatici | Brilliant spiral nebula. |
| 3672 | M 3 | 13 36 | +28 48 | Canes Venatici | Splendid cluster of stars. |
| 6205 | M 13 | 16 39 | +36 35 | Hercules | Very fine cluster of stars, visible to naked eye. |
| 6494 | M 23 | 17 52 | −19 0 | Ophiuchus | Fine cluster of stars. |
| 6543 | H IV 37 | 17 59 | +66 35 | Draco | Bright planetary nebula. |
| 6720 | M 57 | 18 52 | +32 55 | Lyra | Beautiful ring of bright nebulosity. |
| 6853 | M 27 | 19 56 | +22 30 | Aquila | Large nebula formed like a Dumb-Bell" or "Hour-Glass." |
| 7089 | M 2 | 21 29 | − 1 10 | Aquarius | Splendid globular cluster of stars. |
| 7078 | M 15 | 21 26 | +12 49 | Pegasus | Magnificent cluster of stars. |

### *Greenwich Mean Time.*

Time, in the abstract, is measured by the distance described by a moving body, or machine, when the velocity of the same is sustained with perfect uniformity. Our rotating Earth is the moving body used to measure time, and a solar day is the duration of a complete rotation of the Earth round its axis with respect to the Sun. The speed of the Earth's rotation is itself uniform, but as it is here estimated with reference to the Sun, the length of the solar day is affected, first by the movement of the Earth in its orbit round the Sun, the velocity of which is subject sometimes to a gradual acceleration, sometimes to a retardation, because of the ellipticity of its orbit (see page 82), and secondly by the fact that the axis about which the Earth rotates is not perpendicular to the plane of that orbit. To obviate the non-uniformity clocks are adjusted to an average or mean solar day which is of uniform length, and is divided into 24 equal hours. This is the basis of Mean Solar Time.

Having established a unit and method of measurement, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun in its apparent diurnal journey round the Earth, is on some chosen meridian. If the meridian chosen be that which passes through any particular place, the time is called the Local Mean Time of that place, but usually some standard meridian, such as that of Greenwich, is chosen for a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time (see Zone Standard Time, p. 94).

### *Apparent Solar Time.*

The time shown by a sundial is affected by the two causes mentioned, which make the length of a solar day not uniform. This is called Apparent Solar Time, and differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, and is to be used according to the precept in the heading.

### *Sidereal Time.*

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars. This is of uniform length, and is divided, like the mean solar day, into 24 equal hours, which are shorter than a solar hour by about 9·8 seconds of mean time. In actual observatory practice time is measured, and the standard clock is regulated by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation (see p. 80). The error and rate of the sidereal clock are found by observing the instant recorded by it when certain stars, known as Clock Stars, cross the meridian, or are due south, and comparison of this with the known or calculated time of transit will give the error of the sidereal clock. Comparison of the mean solar clock with the sidereal clock will show the error of the former. The same result might be arrived at directly by observing the instant by the Mean Time clock when the stars cross the meridian. Below will be found the Mean Time of Transit at Greenwich of sixteen clock stars at intervals of 30 days, but it is to be noted that when a morning transit is followed in the line by an afternoon, or, rather before midnight transit, the interval is 23 sidereal days. These figures being computed to minutes are scarcely precise enough for an accurate time determination, but may serve to illustrate the method. It may be added as a fact not universally known that these large stars may be seen in a clear sky in daylight hours with telescopes of moderate dimensions.

### *"Summer" Time.*

About the year 1907 Mr William Willett, the head of a London business firm, conceived the idea that it would be for the good of the community if business and life generally began earlier in the solar day than it did in the summer months of the year, in order to have more daylight in waking hours, and proposed to effect this by a general alteration of the clocks of the country. The proposal did not meet with universal approval, but Bills to make such a scheme compulsory were introduced into Parliament between 1908 and 1914, one of which proceeded as far as the second reading. The original plan was to put forward the clocks in the spring on four occasions by an interval of 20 minutes, and to put them back similarly in the autumn. In the spring of 1916 the Government adopted the principle of the scheme, and an Act was passed, known as the Summer Time Act (1916), the first clause of which runs "During the prescribed period in each year in which this Act is in force the time for general purposes in Great Britain shall be one hour in advance of Greenwich Mean Time." The second clause ordained the period during which the Act should be in force in 1916, and that His Majesty may in any subsequent

GREENWICH MEAN TIME OF SOUTHING OF 16 CLOCK STARS AT GREENWICH.

year during the present war declare by Order in Council any period in which the Act shall be in force. A committee appointed to consider the working of the Act in 1916 reported in its favour, and Summer Time was again used in 1917. The prescribed periods have been :—

1916. March 26th, 2 A.M. to Oct. 1st, 2 A.M.
1917. April 8th, 2 A.M. to Sept. 17th, 2 A.M.

The hour being Greenwich Mean in each case.

### Longitude

Longitude, or the distance of any place East or West of a standard meridian, is cognate to the subject of time, for difference of longitude between two places is actually the difference of their local time at any instant. This difference is found by noting the local time of some event or signal which is perceptible simultaneously at the two places.

## TWELVE O'CLOCK NOON GREENWICH MEAN TIME,

AS COMPARED WITH THE CLOCK IN THE FOLLOWING PLACES.
(In other words, the longitude in time.)

### GREENWICH OBSERVATORY

John Flamsteed (a *protégé* of Sir Jonas Moore, the mathematician, and of Sir Christopher Wren, the architect) was appointed "Astronomical Observator" by Charles II., by royal warrant dated 4 March 1675. A building designed by Wren to serve as an observatory and habitation for the observer, and "a little for pomp," as he said, was erected at a small cost on the site of an old tower or castle on a hill in Greenwich Park, which has since been supplemented by another and more commodious edifice.

ASTRONOMERS ROYAL.

| | |
|---|---|
| Rev. John Flamsteed | 1675 |
| Edmund Halley | 1720 |
| James Bradley | 1742 |
| Nathaniel Bliss | 1762 |
| Nevil Maskelyne | 1765 |
| John Pond | 1811 |
| Sir George Biddell Airy, K.C.B. | 1835 |
| Sir William Henry Mahoney Christie, K.C.B. | 1881 |
| Sir Frank Watson Dyson | 1910 |

In the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian. A law passed in France in the year 1891 made the mean time of the Paris Observatory the legal time for France and Algeria, but this has since been altered, and Greenwich Time is now the Standard for these countries. There are other examples of the adoption by nations of the time of their own capital as the Standard Time of the country, but since the year 1884 the system of Standard Time by Zones has been gradually accepted, and now the majority of the countries of the world use as Standard Time the time of some meridian which differs from that of Greenwich by a multiple of 15°, and the Standard therefore differs from Greenwich Mean Solar Time by an integral number of hours, either fast or slow. In a few cases differences including a half hour have been adopted.

The countries in which Standard Time has been adopted according to this scheme are given in the accompanying table. In the large territories of the United States and Canada it has been found expedient to adopt five different standard times, the territories being divided into five by meridians, 7½° on either side of the five central meridians. This arrangement is not strictly adhered to, but towns and cities near the dividing lines adopt which of the two times is the more suitable to railway or local requirements. The same plan is followed in Brazil, which is divided into three zones, in which the time, 3 hours, 4 hours, or 5 hours slow on Greenwich, is adopted as standard respectively

| Fast or Slow on Greenwich Time. | | | |
|---|---|---|---|
| 12 | hours | fast .. | Fiji Islands. |
| 11½ | ,, | fast .. | New Zealand.* |
| 10 | ,, | fast .. | Victoria, New South Wales, Queensland, Tasmania. |
| 9½ | ,, | fast .. | South Australia. |
| 9 | ,, | fast .. | Japan, Corea. |
| 8 | ,, | fast .. | West Australia, East China, Hong Kong, Philippine Islands, Formosa Islands, North Borneo and Labuan, Macao, Portuguese Timor |
| 7 | ,, | fast .. | Straits Settlements. |
| 6½ | ,, | fast | Burma. |
| 5½ | ,, | fast | India. |
| 5 | ,, | fast .. | Chagos Archipelago, Portuguese India. |
| 4 | ,, | fast | Mauritius, Seychelles. |
| 3 | ,, | fast .. | Italian Somaliland |
| 2 | ,, | fast .. | Turkey, Greece, Bulgaria, Roumania, Russia (time of Pulkovo 2 hours 1 minute fast on Greenwich), Egypt, Orange River Colony, Transvaal, Natal, Cape Colony, Portuguese East Africa. |
| 1 | hour | fast .. | Sweden, Norway, Denmark, Germany, Luxembourg, Austria, Hungary, Switzerland, Italy, Bosnia, Servia, Malta, Portuguese West Africa, South-West Africa. |
| ½ | ,, | fast .. | Nigeria. |
| Greenwich Time .. | | | Great Britain, Ireland, France, Belgium(?), Spain, Portugal, Faroe Islands, Gibraltar, Algeria. |
| 1 | hour | slow .. | Iceland, Madeira, Portuguese Guinea, Sierra Leone. |
| 2 | hours | slow .. | Azores, Cape Verde Islands, Fernando and Trinidad Islands (Brazil). |
| 3 | ,, | slow .. | Eastern Brazil. |
| 4 | ,, | slow .. | Eastern Provinces of Canada, the Leeward Islands, Central Brazil. |
| 5 | ,, | slow | Western Labrador, Quebec, Ontario to 84° 30' W., New Brunswick, Eastern Zone of the United States, Jamaica, Bahama Islands, Peru, Panama, Western Brazil. |
| 6 | ,, | slow | Central Zones of Canada and United States, Honduras. |
| 7 | ,, | slow | Mountain Zones of Canada and the United States. |
| 8 | ,, | slow | British Columbia, and Pacific Coast Zone of United States. |
| 9 | ,, | slow | Yukon, Alaska. |
| 10½ | ,, | slow | Sandwich Islands. |
| 11½ | ,, | slow | Samoa. |

* It is proposed that the time of New Zealand shall be altered to 12 hours fast on Greenwich.

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast is called Mid-European. The time appropriate to Eastern Canada, 5 hours slow on Greenwich, has been called alternatively Maritime, Inter-Colonial, and Atlantic Time. The standard times in use in the other four zones of the North American continent are called respectively Eastern, Central, Mountain, and Pacific Time.

It will be inferred from the above table that when it is noon at Greenwich on any day of the week, it will be midnight of that day in the Fiji Islands but half-past twelve in the morning of the same day in Samoa. In other words, at half an hour after midnight of Wednesday in Samoa, it is midnight of Thursday in Fiji, though these two places are separated by a comparatively short distance. In an ocean-going ship travelling westward this fact necessitates the omission of a day from the week, and in the case supposed, Thursday would be omitted from the log and the record would pass directly from Wednesday to Friday

## ZONE TIME AT SEA.

A scheme is being considered officially, and will probably be adopted, to extend the Zone Time system to the use of ships at sea. The time kept by the clocks used for ordinary life on board a vessel has hitherto been a time corresponding approximately to the longitude in which she then is, and to effect this the timekeepers have been altered at some arbitrary moment of the day, by some arbitrary amount. It is now proposed that the clocks shall show the time of the hour-zone in which the vessel then is, an adjustment being made at about the time the ship enters that zone. The zones will be numbered for this purpose + 1, + 2, + 3 ... Westward from Greenwich, − 1, − 2, − 3 ... Eastward, and the number of the zone is to be shown prominently on the clock. The purpose of this arrangement is that the number of the zone, as well as the time, shall be given in any record made, and the corresponding Greenwich of this can then be readily inferred by addition or subtraction as shown by the sign.

Scientific Chronology is not yet a hundred years old, and in so far as it deals with the age of the world in which we live, it may be said to have its origin in the researches of geologists and ethnologists in the nineteenth century. These researches led to the discovery of extinct mammals buried under a surface which was calculated by geologists to have required many thousands of years in formation. The geological measure of time is the period occupied in the stratification of rocks, with allowances for intervals between the periods. By this measure the conjectural age of the World varies from 40 to 200 million years.

*Geological Chronology*.—The periods of stratification of the Earth's crust are classified by geologists as shown in the following list, each period having sub-divisions:—

I. Eozoic.
II. Palæozoic or Primary
  i. *Cambrian.*
  ii. *Silurian.*
  iii. *Devonian* or *Old Red Sandstone.*
  iv *Carboniferous.*
  v *Permian.*
III. Mesozoic or Secondary.
  i. *Triassic.*
  ii. *Jurassic.*
  iii. *Lower Cretaceous.*
  iv *Upper Cretaceous.*
IV. Cainozoic or Tertiary
  i. *Eocene.*
  ii. *Oligocene.*
  iii. *Miocene.*
  iv *Pliocene.*
V Quaternary or Post-Tertiary.
  i. *Pleistocene* or *Glacial.*
  ii. *Recent* or *Post-Glacial.*

No dates are assigned to these periods, as they are too indefinite and remote for comprehension. Traces of human life are found in V i. and ii., which correspond with the Eolithic, Palæolithic, Neolithic, Bronze, and Iron Ages of our next paragraph.

*Ethnological Periods*.—The terms employed by ethnologists cover periods which reach to the more recent geological divisions of time and extend to the present day. They are periods, not of time, but of culture, and are of local application only. The terms in use are—

1. Eolithic, or Dawn of the Stone Age.
2. Palæolithic, or Older Stone Age.
3. Neolithic, or Later Stone Age.
4. Bronze Age.
5. Early Iron Age.

Of these periods the last three can be dated for Europe as follows—

*Neolithic* ends about 2000 B.C.
*Bronze Age* ends about 1000 to 500 B.C.
*Early Iron Age* from about 500 B.C.

Various systems of Chronology are dealt with in alphabetical sequence in the following list:—

*Abyssinian*.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, commencing at 1 again upon the completion of each cycle. Their first year began on 29th August, 284 A.D.

*Armenian*.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

*Assyrian or Babylonian*.—In the eighth century B.C. the Babylonians constructed a chronology with the era of the founder of their Empire. Their epoch corresponds to 26th February, 747 B.C.

*Biblical*.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century James Ussher, Archbishop of Armagh, adopted the system, and *Ussher's Notation* was thenceforward printed in marginal notes to the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

*Chinese*.—In 1912 the Chinese Republic adopted the calendar of Western Europe.

*Christian*.—The Christian year was first adopted in Italy in the sixth and was accepted by England in the eighth century. The years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*) and A.D. (*Annus Domini*). The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, and the 4714th year of the Julian Period. The Christian Era commenced originally on 25th March, but in England Christmas Day was adopted as the beginning of the year from the seventh to twelfth centuries, after which time the Annunciation (25th March) prevailed until January 1 was adopted at the reform of the calendar in 1752. The reform of 1752 (*see also* "Roman Chronology" below) omitted 11 days from the year in order to connect the civil and astronomical years, and thenceforward the *New Style* was adopted, the previous period being known as the *Old Style*. Through the omission of the extra day in 1800 and 1900 (which were not leap years) the difference between the Old and New Styles is now 13 days. The Eastern Church employs the Old Style, and a Greek and Russian calendar for 1918 will be found on p. 97.

*Hindu*.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyu-ga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1918 A.D. is, therefore, the year 1975 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D. 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1918 A.D. is 1840 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Buddhists and the Jains. The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.), and the epoch of the Jains was the death of Vardhamana, the founder of their faith, in 527 B.C.

*Jewish*.—In the fifteenth century the Jews adopted as their epoch the Creation of the World, which was placed in a year called in the Christian chronology 3760 B.C. Thus the year 1918 A.D. is *Annus Mundi* 5679 in the Jewish Calendar. A calendar for 5678–5679 will be found on p. 97.

*Julian Period*.—"A period of 7980 Julian years, proposed by Joseph Scaliger in 1582 as a universal standard of comparison of chronology, consisting of the product of the number of years in the solar and lunar cycles and the cycle of the indiction (28 × 19 × 15)."—*New English Dictionary*.

*Macedonian.*—The epoch was the occupation of Babylon by Seleucus Nicator in 312 B.C., and this system of chronology prevailed in all Greek countries until the Middle Ages, and was adopted by the Jews until the fifteenth century. It is extant among certain nomadic Arab tribes.

*Muhammadan.*—The Muhammadan Epoch is the Hejira, or Flight of Mahomet, from Mecca to Medina in 622 A.D. The first day of the first month of the Muhammadan Era corresponds to 16th July, 622 A.D. The year 1928 is therefore 1306–1337 of the Hejira, a calendar for which year will be found on p. 97.

*Olympiads.*—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years: the intervening years being the first, sec. d, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Charcebus, 776 B.C.

*Persian.*—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 16th June 632 A.D. The year 1298 is therefore 1667 of the Parsees. The New Year begins on 21st March.

*Roman.*—Roman historians adopted as an epoch the Foundation of Rome which they signified by the abbreviation A.U.C., *Ab* (anno) *Urbis Conditæ* (From the year of the founded city). This epoch is believed to fall in the year 753 B.C. The Calendar as we know it was a Roman institution. It was revised and reformed in 46 B.C. by Julius Cæsar and remained unchanged in Western Europe until the year 1582 A.D. The Julian year contained 365¼ days, so that of every four years three were *Common Years* of 365 days and the fourth a *Leap Year* of 366 days. But this system made the civil year longer than the astronomical year, the difference being 3 days in 400 years, so that in the year 1582 A.D. there was an error of 10 days. Under the reformed scheme 3 leap years are omitted in each 400 years, and the years 1800 and 1900 each consisted of 365 days only. The year 2000 will be a leap year, the next subsequent omit-century leap year being 2400.

CHRONOLOGICAL TERMS EXPLAINED

*Golden Number*, so called from its importance in calculating the date of Easter, is the number *of any year in a lunar cycle of nineteen years*. It contains (approximately) 235 lunations, in which period the Moon returns to the same apparent position with regard to the Sun, so that new and full Moons occur at the same dates in the corresponding year of each cycle.

*Easter Day* is the first Sunday after the *Paschal full Moon* (i.e. the full moon which happens upon, or next after, March 21: if that full moon occurs on a Sunday Easter Day is the Sunday after).

*Epact.*—The age of the Moon at the commencement of the year thus indicating the difference between the solar and lunar cycles.

*Solar Cycle.*—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

*Roman Indiction.*—A period of fifteen years, instituted by the Emperor Constantine in A.D. 312 for fiscal purposes.

*The Dominical Letter* is one of the first seven letters of the alphabet, A–G, which are used in succession to denote the Sundays (Lord's Day) in a particular year. If the first day of the year is a Sunday the letter is A, if the second, B, the third, C and so on. Leap year requires two letters the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

# The Weather

THE question is often put by friends who may suppose us to be more weather wise than themselves "Is it going to rain?" &c.—a question which cannot always be answered positively, yes or no, yet which any fairly observant person may answer for himself by paying attention to certain premonitory signs which may be observed.

For instance, beasts and birds, being generally more sensitive to climatic changes than are human beings, afford rough indications of coming bad weather. Sea birds, as stormy weather comes on, fly inland in search of food: wild-fowl leave the marshy ground for higher localities; swallows and rooks fly low before and during bad weather: frogs are unusually noisy before rain: sheep huddle together near bushes and trees, and in hill countries come down to the plains at the approach of bad weather.

The indications of the barometer, taken in conjunction with those of the thermometer, help us much in prognosticating changes in the weather. The former is not, as some folks imagine, simply a weather indicator, though it serves this purpose inferentially. From the indications of those instruments we learn generally that —

A *rising barometer* usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer fine weather, and a low one the contrary.

If the barometer has been *about* its ordinary height at the sea level, and is *steady* or rising while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected: and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north west, north, or north-east, and continued rising foretells improving weather.

In northern latitudes the heaviest northerly gales occur after the barometer first rises from a very low point. A *rapid rise* generally indicates unsettled weather: slow rise or steadiness, with little moisture in the atmosphere, fair weather. A *rapid and considerable fall* signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind, though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

The state of the atmosphere also affords pretty accurate indications of the kind of weather that may be expected in the near future.

## JEWISH CALENDAR. (A.M. 5678 and part of A.M. 5679.)

| A.M. 5678. | A.D. 1917 | |
|---|---|---|
| Tishri 1 | Sept. 17 | Rosh Hashanah (New Year). |
| ,, 3 | ,, 19 | Fast of Gedaliah. |
| ,, 10 | ,, 26 | Yom Kippur (Day of Atonement). |
| ,, 15 | Oct. 1 | Feast of Tabernacles. and day |
| ,, 16 | ,, 2 | ,, ,, |

* Peculiar to Russia.

## ROMAN CALENDAR.

In the ancient Roman (Julian) Calendar the days of the month were not counted forward from the beginning, as with us, but three fixed points were taken, and any particular day was said to be so many days before the next coming fixed day. Those three points were (1) the Kalends, by which name the first of each month was known (2) the Nones, which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and the Ides, which always fell eight days after the Nones.

The first day of a month being called its "Kalends," the last day of the preceding month is called *the day before the Kalends* (pridie Kalendas). Thus December 31 would have been written "pridie Kal. Jan." The day before that, December 30, is the third day of the Kalends, both the beginning and ending days of the interval being taken in the reckoning, and so on back to the Ides, and from thence again to the Nones.

## THE COPTIC CALENDAR.

| Year 1634. | A.D. 1918. | Year 1634. | A.D. 1918. |
|---|---|---|---|
| Tuboh .... ...Jan. | 9 | Mesori ... August | 7 |
| Amshir..... .. Feb. | 8 | *Epagomenae* Sept. | 6–10 |
| Barmhat ... .March | 10 | Year 1635. | |
| Barmudah ..April | 9 | Tut .. ... Sept. | 11 |
| Bashones.... .May | 9 | Boboh .. .. Oct. | 11 |
| Bawne .....June | 8 | Hatur .....Nov | 10 |
| Abib .. ...July | 8 | Koyhak .....Dec. | 10 |

In the Coptic Calendar, used by part of the population of Egypt and Ethiopia, the year is composed of 12 months of 30 days each, followed by 5 or 6 days (Epagomenae) according as the year is or is not a Leap-year. The Era of this Calendar is that of Diocletian, August 29, 284 A.D.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926 English miles, and at the Poles 7,899 English miles. The Equatorial *Circumference* is 24,872·4 English miles, divided into 360 Degrees of Longitude, each of 69·09 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

### AREA AND POPULATION.

| Continent. | Area in Square Miles. | Estimated Population. |
|---|---|---|
| Europe | 3,750,000 | 402,200,000 |
| Asia | 17,000,000 | 932,200,000 |
| Africa | 11,500,000 | 180,000,000 |
| North America | 8,000,000 | 120,000,000 |
| South America | 6,800,000 | 36,000,000 |
| Oceania | 3,450,000 | 8,200,000 |
| Polar Regions | 5,000,000 | – |
| | 55,500,000 | 1,648,200,000 |

The British Empire extends over the largest area (13,123,000 sq. miles), Russia is the second largest country (8,400,000 sq. miles), France is third, with 4,330,000 sq. miles, China extends over 4,300,000 sq. miles, the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles, and Brazil 3,200,000 sq. miles.

### THE RACES OF MANKIND †

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows —

| Division. | Area. | Estimated Number. |
|---|---|---|
| Mongolian | Asia | 695,000,000 |
| Caucasian | Europe & Orient | 645,000,000 |
| Negro | Africa | 190,000,000 |
| Semitic | North Africa | 81,000,000 |
| Malayan | Australasia | 32,000,000 |
| Red Indian | America | 23,000,000 |
| | | 1,646,000,000 |

* The Earth is a Sphere, with a Northern and Southern *Hemisphere*; the Ocean surface is called the *Hydrosphere*, and the gaseous envelope the *Atmosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*. The study of the Races of Mankind is *Ethnology*, and of their location *Ethnography*. The study of extinct organic life is *Palæontology* and of existing life *Biology*.

If an aëroplane, with a constant speed of 50 miles an hour started from the Earth on a journey to the Sun on January 1, 1918, it would be nearly 800 years on the journey, as it would not arrive until Nov 23, 2717! The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (1,041·4 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 68,000 miles an hour (580,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2000, at the present rate of increase.

### THE LARGEST CITIES.

The following 48 cities have an ascertained population exceeding half a million, according to the latest census returns —

| | |
|---|---|
| London (Greater), England (1914) | 7,429,704 |
| New York (Greater), U.S.A. (1914) (estimated) | 7,300,000 |
| Paris, France (1911) | 2,888,000 |
| Chicago, U.S.A. (1916) | 2,498,000 |
| Petrograd, Russia (1913) | 2,318,000 |
| Tokyo, Japan (1913) | 2,185,000 |
| Vienna, Austria (1914) | 2,130,000 |
| Berlin, Prussia (1910) | 2,071,000 |
| Moscow, Russia (1913) | 1,918,000 |
| Philadelphia, U.S.A. (1916) | 1,720,000 |
| Buenos Aires, Argentina (1916) | 1,597,000 |
| Osaka, Japan (1916) | 1,460,000 |
| Calcutta, India (1911) | 1,222,000 |
| Rio de Janeiro, Brazil (1910) | 1,130,000 |
| Glasgow, Scotland (1911) | 1,008,487 |
| Bombay, India (1911) | 980,000 |
| Hamburg, Germany (1910) | 931,000 |
| Warsaw, Poland (1913) | 909,000 |
| Budapest, Hungary (1910) | 880,000 |
| Birmingham, England (1911) | 840,000 |
| St. Louis, U.S.A. (1916) | 787,000 |
| Boston, U.S.A. (1916) | 756,000 |
| Liverpool, England (1911) | 748,000 |
| Manchester, England (1911) | 716,000 |
| Naples, Italy (1913) | 658,000 |
| Cleveland, U.S.A. (1916) | 654,000 |
| Milan, Italy (1913) | 663,000 |
| Cairo, Egypt (1907) | 654,000 |
| Shanghai (China) | 630,000 |
| Sydney, New South Wales (1911) | 627,000 |
| Bangkok, Siam (1909) | 630,000 |
| Amsterdam, Netherlands (1915) | 626,000 |
| Copenhagen, Denmark (1916) | 609,000 |
| Madrid, Spain (1910) | 600,000 |
| Munich, Bavaria (1910) | 596,000 |
| Melbourne, Victoria (1911) | 592,000 |
| Rome, Italy (1913) | 591,000 |
| Leipsic, Saxony (1910) | 590,090 |
| Baltimore, U.S.A. (1916) | 590,000 |
| Barcelona, Spain (1910) | 587,000 |
| Pittsburgh, U.S.A. (1916) | 570,000 |
| Marseilles, France (1911) | 551,000 |
| Dresden, Saxony (1910) | 548,000 |
| Lyons, France (1911) | 524,000 |
| Madras, India (1911) | 520,000 |
| Cologne, Prussia (1910) | 517,000 |
| Breslau, Prussia (1910) | 512,000 |
| Hyderabad, India (1911) | 500,000 |

*Estimated Populations.*

| | |
|---|---|
| Canton (China) | 1,250,000 |
| Peking (China) | 1,000,000 |
| Constantinople (Turkey) | 1,000,000 |
| Hankow (China) | 910,000 |
| Tientsin (China) | 830,000 |
| Fuchow (China) | 630,000 |
| Chungking (China) | 600,000 |
| Suchow (China) | 500,000 |

## OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas) but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each :—

| Name. | Area of Basin (sq. miles). | Greatest Depth (feet). |
|---|---|---|
| *Oceans.* | | |
| Pacific | 67,986,000 | Off Mindanao, 32,089 |
| Atlantic | 31,530,000 | Porto Rico Trench, 27,366 |
| Indian | 28,350,000 | Sunda Trench, 22,968 |
| Arctic | 5,541,600 | North Polar, 13,000 |
| *Seas* | | |
| Malay | 3,137,000 | Kei Trench, 22,342 |
| Central American | 1,770,170 | Caribbean, 20,568 |
| Mediterranean | 1,145,000 | *Pola* Deep, 12,276 |
| Behring | 878,000 | Buldir Trough, 13,422 |
| Okhotsk | 582,000 | Kurile Trough 10,554 |
| East China | 480,000 | *about* 10,500 |
| Hudson Bay | 472,000 | *about* 1,500 |
| Japan | 405 000 | *about* 10,000 |
| Andaman | 305,000 | *about* 11,000 |
| North Sea | 222,000 | Skaugerak, 2,998 |
| Red Sea | 178,000 | 20° N., 7,254 |
| Baltic | 158,000 | *about* 12,000 |

## THE HIGHEST MOUNTAINS.

| Name. | Range. | Height in Feet. |
|---|---|---|
| Everest | Himalayas | 29,002 |
| Godwin Austen (K 2) | " | 28,250 |
| Kanchanganga I | " | 28,146 |
| " II. | " | 27,803 |
| Makalu | " | 27,790 |
| Tengri Khan | Thian Shan | 24,000 |
| Dhawalhari | Himalayas | 23,944 |
| Aconcagua | Andes | 22,866 |
| *Sahama | Bolivia | 22,349 |
| Illampu (Sorata) | Andes | 21,490 |
| Illimani | " | 21,031 |
| Chimborazo | " | 20,498 |
| Lullaillaco | " | 20,243 |
| McKinley | Alaska | 20,300 |
| Rawenzori | Uganda | 20,000 |
| *Cotopaxi | Andes | 19,612 |
| Kilima Njaro | German E. Africa | 19,600 |
| Mount Logan | Rockies | 19,539 |
| Huascaran | Andes | 19,521 |
| *Mount Elias | Rockies | 19,500 |
| Elburg | Caucasus | 18,526 |
| Demavend | " | 18,464 |
| Tolima | Cordilleras | 18,300 |
| El Potra | Andes | 18,045 |
| Charles Louis | New Guinea | 18,000 |
| *Popocatepetl | Mexico | 17,540 |
| Malpo | Andes | 17,422 |
| Orizaba (Citlaltepetl) | Mexico | 17,360 |
| *Sangay | Ecuador | 17,124 |
| Kasbian Tau | Caucasus | 17,096 |
| Ararat | Armenia | 16,916 |
| Kazbek | Caucasus | 16,546 |
| Mont Blanc | Alps | 15,781 |

* Volcanoes. In addition to those marked, Vesuvius, Etna and Stromboli in Europe, Erebus and Terror in the Antarctic, Hecla and Skaptar Jokul in Iceland, Mauna Loa, Kea and Hualalai in Hawaii, Pelvoux in Savoie, and La Soufrière and La Pelée in the West Indies.

## THE LARGEST ISLANDS.

| Name of Island. | Ocean. | Area in Sq. Miles. |
|---|---|---|
| Greenland (Danish) | Arctic | 827,300 |
| New Guinea (Br.-Germ. Neth.) | Pacific | 320,000 |
| Borneo (Anglo-Netherlands). | " | 280,000 |
| Baffin Land (British) | Arctic | 236,000 |
| Madagascar (French) | Indian | 228,000 |
| Sumatra (Netherlands) | " | 160,000 |
| Great Britain | Atlantic | 88,603 |
| Honshiu (Japan) | Pacific | 87,500 |
| Celebes (Netherlands) | Indian | 72,000 |
| Prince Albert, &c. (British) | Arctic | 60,000 |
| South Island, N.Z. (British) | Pacific | 58,500 |
| Java (Netherlands) | Indian | 48,400 |
| North Island, N.Z. (British) | Pacific | 44,500 |
| Cuba (Independent) | Atlantic | 44,000 |
| Luzon (U.S.A.) | Pacific | 41,000 |
| Newfoundland (British) | Atlantic | 40,200 |
| Iceland (Danish) | " | 40,000 |
| Ellesmere (British) | Arctic | 40,000 |
| Mindanao (U.S.A.) | Pacific | 37,000 |
| Hokkaido (Japan) | " | 36,500 |
| Ireland (U.K.) | Atlantic | 32,600 |
| Novaya Zemlya (Russian) | Arctic | 32,000 |
| Sakhalin (Russo-Japanese) | Pacific | 29,100 |
| Haiti (Independent) | Atlantic | 28,000 |
| Tasmania (British) | Pacific | 26,215 |
| Ceylon (British) | Indian | 25,400 |
| Banks (British) | Arctic | 25,000 |
| North Devon (British) | " | 24,000 |
| Vancouver (British) | Pacific | 20,000 |
| Melville Land (British) | Arctic | 20,000 |
| Tierra del Fuego (Argentine) | Atlantic | 18,000 |
| Southampton (British) | Arctic | 17,000 |
| West Spitsbergen (No Man's Land) | " | 15,000 |
| Prince of Wales (British) | " | 15,000 |
| Formosa (Japanese) | Pacific | 13,800 |
| North Somerset (British) | Arctic | 12,000 |
| Sicily (Italian) | Medit. | 10,000 |

## THE LONGEST RIVERS.†

| River | Outflow | Length in Miles. |
|---|---|---|
| Amazon | Atlantic | 4,000 |
| Nile | Mediterranean | 3,600 |
| Yangtse | North Pacific | 3,400 |
| Yenisei | Arctic Sea | 3,300 |
| Mississippi | Gulf of Mexico | 3,160 |
| Missouri | Mississippi River | 3,000 |
| Congo | Atlantic | 3,000 |
| Lena | Arctic Sea | 3,000 |
| Niger | Gulf of Guinea | 3,000 |
| Obi | Arctic Sea | 2,720 |
| Hoangho | North Pacific | 2,600 |
| Amur | " " | 2,500 |
| Volga | Caspian Sea | 2,400 |
| Mackenzie | Beaufort Sea | 2,300 |
| La Plata | South Atlantic | 2,300 |
| Yukon | Behring Sea | 2,000 |
| St. Lawrence | Gulf of St. Lawrence | 1,800 |
| Rio del Norte | Gulf of Mexico | 1,800 |
| Sao Francisco | Atlantic | 1,800 |
| Danube | Black Sea | 1,795 |
| Euphrates | Persian Gulf | 1,700 |
| Indus | Arabian Sea | 1,700 |
| Brahmaputra | Bay of Bengal | 1,680 |
| Zambesi | Mozambique | 1,600 |
| Ganges | Bay of Bengal | 1,500 |
| Mekong | China Sea | 1,500 |
| Amu Daria | Aral Sea | 1,500 |
| Ohio | Mississippi River | 1,080 |

† The most famous river falls are Niagara, between the Province of Ontario and New York State, on the Niagara River; the Victoria Falls on the Zambesi River; and the falls of Yosemite on the Merced River in the Yosemite Valley in California.

## RELIGIONS OF THE WORLD.

| Religion. | Continental Distribution | | | | | |
|---|---|---|---|---|---|---|
| | Europe. | Asia. | Africa. | N. America. | S. America. | Oceania. | Total. |
| CHRISTIANS :— | | | | | | | |
| Catholic Churches | | | | | | | |
| Roman Catholics | 189,360,000 | 3,920,000 | 2,800,000 | 36,700,000 | 36,000,000 | 8,000,000 | 276,780,000 |
| Eastern Churches. | 98,000,000 | 13,200,000 | 3,800,000 | 1,200,000 | .. | .. | 116,200,000 |
| Protestant Churches | 93,000,000 | 8,200,000 | 2,750,000 | 68,000,000 | 400,000 | 4,250,000 | 176,600,000 |
| Total Christians | 374,360,000 | 25,320,000 | 9,050,000 | 105,900,000 | 36,600,000 | 12,300,000 | 569,530,000 |
| NON-CHRISTIANS :— | | | | | | | |
| Jews | 3,250,000 | 800,000 | 400,000 | 1,000,000 | 30,000 | 25,000 | 12,505,000 |
| Mohammedans | 1,800,000 | 192,000,000 | 51,000,000 | 12,000 | 10,000 | 25,000 | 221,847,000 |
| Buddhists | .. | 138,000,000 | 12,000 | .. | .. | 20,000 | 138,032,000 |
| Hindus | .. | 210,000,000 | 300,000 | 200,000 | 120,000 | 30,000 | 210,650,000 |
| Confucianists and Taoists | .. | 300,000,000 | 30,000 | 100,000 | .. | 700,000 | 300,830,000 |
| Shintoists | .. | 25,000,000 | .. | .. | .. | .. | 25,000,000 |
| Animists | .. | 42,000,000 | 38,000,000 | 20,000 | 1,250,000 | 17,000,000 | 98,270,000 |
| Unclassified | 1,000,000 | 6,000,000 | 230,000 | 8,000,000 | .. | 150,000 | 15,380,000 |
| Total Non-Christian | 14,050,000 | 863,300,000 | 140,872,000 | 10,332,000 | 1,400,000 | 42,905,000 | 1,081,387,000 |

| Japan | 5,800 | 24,000 | 5 | 5,000 |
| Switzerland | 3,600 | 8,500 | 67 | 4,000 |
| The World | 670,000 | 1,560,000 | — | 314,000 |

## RAILWAY PASSENGER RATES.

The following table of approximate rates per mile may be taken as relatively correct, according to computations from available materials.

| Nation. | Pence per Mile. | | |
|---|---|---|---|
| | 1st Class. d. | 2nd Class. d. | 3rd Class. d. |
| British India (State) | 2·1 | 1·5 | (3 / 1 |
| United States | 1·36 | ·86 | ·67 |
| Germany (State) | 1·37 | ·97 | ·38 |
| Belgium (State) | 1·46 | ·95 | ·58 |
| France (State) | 1·36 | 1·08 | ·77 |
| (Private) | 2·24 | 1·57 | ·77 |
| Netherlands (State) | 1·65 | 1·24 | ·65 |
| (Private) | 2·08 | 1·62 | ·84 |
| Italy (State) | 1·6 | 1·28 | ·72 |
| United Kingdom | | | |
| Switzerland | 0·36 | 1·80 | ·89 |

## THE LONGEST BRIDGES.

| Name. | Country | Length. Miles. | Yds. |
|---|---|---|---|
| Tay | Scotland | 2 | 72 |
| Ohio | United States | 1 | — |
| Victoria | Canada | 1 | 1,320 |
| Forth | Scotland | 1 | 1,240 |
| Missouri | United States | 1 | 764 |
| Queensborough | United States | 1 | 720 |
| Williamsburgh | United States | 1 | 576 |
| Manhattan | United States | 1 | 520 |
| Susquehanna | United States | 1 | 368 |
| Brooklyn | United States | 1 | 228 |

## SHIPPING OF THE WORLD.

In 1913 the various nations of the world possessed 24,348 ocean-going steam vessels of over 45,300,218 gross tons, and 6,224 sailing vessels of 2,230,910 net tons. More than 42 per cent. of this tonnage is under the British flag, the next largest owners being the United States, Germany, Norway, France, Japan, Italy, Netherlands, Sweden, and Russia. From June 30, 1912, to June 30, 1913, the total British mercantile tonnage increased by 249,023, that belonging to Germany had, during the same period, decreased by 752,289 tons.

## THE GREATEST SEAPORTS.

| | Entered Tons. | Cleared Tons. |
|---|---|---|
| New York (1914) | 13,767,847 | 14,490,324 |
| Antwerp (1912) | 13,224,440 | 13,149,244 |
| Hamburg (1913) | 14,241,894 | 14,298,624 |
| Hong Kong (1913) | 11,599,917 | 10,891,797 |
| Rotterdam (1914) | 8,048,800 | 8,184,000 |
| London (1913) | 8,272,888 | 4,844,000 |
| Monte Video (1913) | 5,491,000 | 5,369,000 |
| Marseilles (1913) | 5,877,000 | 5,727,000 |
| Singapore (1912) | 8,877,044 | 7,891,824 |
| Cardiff (1914) | 7,738,778 | 7,777,490 |
| Liverpool (1913) | 5,574,000 | 5,284,000 |
| Colombo (1914) | 7,772,823 | 5,982,877 |
| Rio de Janeiro (1912) | 5,000,000 | 5,000,000 |
| Buenos Aires (1913) | 4,600,000 | 4,600,000 |
| Calcutta (1913) | 4,384,000 | 4,384,000 |

### The World's Production of Wheat
(In millions of quarters of 480 lb.)

| | Season 1916. (Actual.) | Season 1917 (Estimated.) |
|---|---|---|
| U.S.A. | 80 | 82 |
| Russia | 74 | (say) 70 |
| India | 40 | 47 |
| Canada | 37 5 | 29 |
| France | 26 | 18 |
| Italy | 24 | 17 4 |
| Australasia | 22 | 19 |
| Argentina | 11 | 9 |
| Hungary (say) | 20 | (say) 19 |
| Spain | 19 | 17 5 |
| Germany (say) | 15 | (say) 13 |
| Rumania | 10 | (say) 9 |
| Austria (say) | 8 | (say) 8 |
| United Kingdom | 7 3 | 8 |
| Other smaller Producers, abt. | 50 | abt. 50 |
| | 444 | 427 9 |

The figures for the Indian, Argentine and Australasian crops are of those harvested in the early months of each calendar year, the other crops harvest June–September

### The World's Production of Barley
(In millions of quarters of 400 lb.)

| | Season 1916. (Actual.) | Season 1917 (Estimated.) |
|---|---|---|
| Russia | 53 | (say) 50 |
| U.S.A. | 22 | 24 |
| India | 16 | 16 |
| Germany (say) | 15 | (say) 15 |

## Welsh Sovereigns and Princes.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon Castle on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

# The Family of King George III.

GEORGE III., King of the United Kingdom of Great Britain and Ireland, was 2nd eldest son of Frederick, Prince of Wales (eldest son of George II.), and of Princess Augusta (youngest daughter of Frederick, Duke of Saxe-Coburg-Gotha). His Majesty was *born* at Norfolk House, St. James's Square, June 4, 1738; *succeeded* to the Throne Oct. 25, 1760; *married* Princess Charlotte (daughter of Charles, Duke of Mecklenburg-Strelitz); and was *crowned* with her on Sept. 22, 1761. Early in his reign he showed symptoms of insanity, and after recovering from two serious attacks (1788 and 1804) his mind entirely gave way. Many of his latter years were consequently passed in seclusion, and the government was carried on, from Feb. 5, 1811, until his death, by his eldest son George, under the title of *Prince Regent*. His Majesty *died* at Windsor, Jan. 29, 1820. Their Majesties had issue:—

1. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline (daughter of Charles, Duke of Brunswick Wolfenbuttel), succeeded to the Throne as GEORGE IV. Jan 29, 1820, and died without surviving issue at Windsor, June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1763, married Princess Frederica (daughter of King Frederick William II. of Prussia), was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. William, *Duke of Clarence*, born Aug. 21, 1765, was Lord High Admiral of England, married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him, succeeded to the Throne as WILLIAM IV., June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Württemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenburg-Strelitz), succeeded as KING OF HANOVER June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov 18, 1851. Their Majesties had issue:—

(i) George, born May 27, 1819, married Princess Alexandrine Mary Theodora, dau. of the Duke of Saxe-Altenburg, succeeded as KING OF HANOVER Nov 18, 1851. In 1866 the intensely loyal distinguished by the King of Prussia. King George died June 12, 1878, leaving issue:—

5. H.R.H. Princess MAUD Charlotte Mary Victoria (*H.M. Queen of Norway*), *born Nov. 26, 1869*, married July 22, 1896, to HAAKON VII., KING OF NORWAY. Issue —

H.R.H. Olav Crown Prince of Norway born July 2, 1903.

6. H.R.H. Prince ALEXANDER John Charles Albert, born April 6, died April 7 1871.

## ANNUITIES TO THE ROYAL FAMILY

The annuities payable to Their Majesties and to the members of the Royal Family are known as the Civil List, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £105,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made the following recommendations which were adopted by the House of Commons —

| | | | |
|---|---|---|---|
| Their Majesties Privy Purse | £110,000 | Queen Alexandra | £70,000 |
| Salaries of Household | 185,800 | Princess Christian of Schleswig Holstein | 6,000 |
| Expenses of Household | 193,000 | Princess Louise (Duchess of Argyll) | 6,000 |
| Works | 20,000 | Duke of Connaught | 25,000 |
| Royal Bounty | 13,200 | Duchess of Edinburgh | 6,000 |
| Unappropriated | 8,000 | Duchess of Albany | 6,000 |
| | £470,000 | Princess Beatrice (Henry of Battenberg) | 6,000 |
| | | Duchess of Mecklenburg-Strelitz (*aunt*) | 3,000 |
| | | King Edward VII.'s Daughters | 15,000 |

## THE CROWN LANDS.

The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III surrendered them in return for a fixed annual payment or Civil List. At the time of the surrender the gross revenues amounted to about £80,000, and the net return to about £11,000.

In the year ended 31 March, 1918, the total Receipts by the Commissioners were £681,544, of which amount £441,030 was derived from Crown Rents, and £83,696 from the Mines. The Expenditure was £107,544, of which £21,489 represented the expenses of the Woods, Forests and Land Revenue, and £18,096 the Mines. The sum of £450,000 was paid to the Exchequer in 1917–1918, being a net sum from which no deductions have to be made for administration.

## THE DUCHY OF LANCASTER.

Lancaster was erected into a Palatine Duchy by Edward III. for his son John of Gaunt in 1360, but in 1399 it became merged in the Crown through the accession of his son as Henry IV.

The Revenue of the Duchy of Lancaster was £56,000 in 1837, and amounted to £126,268 in the year ended 31 December, 1918. The contributory items are Rents and Profits of Courts, £62,403; Royalties and Dues, £32,790. Expenditure £9,704 Outlay for the benefit of the Estate, £26,453, deducted under various Acts of Parliament, £4,900, Allowances, Donations, and Charities, £2,000, Salary of the Chancellor of the Duchy and £7,1,624 Expenses of Management. The sum of £60,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse

## THE DUCHY OF CORNWALL.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1918, was £208,493 and was derived principally from Rents and Profits of Courts, £119,338, Annuity in lieu of Tin Coinage Duties, £23,227, and Dividends on Stock, £20,221. The Payments include £22,262, Outlay for the benefit of the Estate, £34,841, Deductions under various Acts, £26,515, Allowances, Donations, and Charities, and £12,692, Expenses of Management. The sum of £80,500 was paid on account of His Royal Highness the Prince of Wales.

His Most Excellent Majesty **George the Fifth**, by the Grace of God King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Defender of the Faith, Emperor of India, only surviving son of His late Majesty King Edward VII and of Her Majesty Queen Alexandra, *born at Marlborough House*, June 3, 1865, *married* July 6, 1893, Her Serene Highness Princess Victoria Mary Augusta Louise Olga Pauline Claudine Agnes, *born* May 26, 1867 (QUEEN MARY), only daughter of Her Royal Highness the late Duchess and His Highness the late Duke of Teck; *succeeded* to the Throne May 6, 1910, *crowned* at Westminster Abbey, June 22, 1911. Their Majesties have issue —

1. H.R.H. EDWARD Albert Christian George Andrew Patrick David, PRINCE OF WALES and Earl of Chester, Duke of Cornwall (Duke of Rothesay, Earl of Carrick, Baron of Renfrew, Lord of the Isles and Great Steward of Scotland), K.G., K.C., a Lieutenant, R.N., and Captain, Grenadier Guards, *born* June 23, 1894.
2. H.R.H. ALBERT Frederick Arthur George, an Acting Lieutenant, R.N., *born* Dec. 14, 1895.
3. H.R.H. Victoria Alexandra Alice MARY, *born* April 25, 1897.
4. H.R.H. HENRY William Frederick Albert, *born* March 31, 1900.
5. H.R.H. GEORGE Edward Alexander Edmund, a Naval Cadet, *born* Dec. 20, 1902.
6. H.R.H. JOHN Charles Francis, *born* July 12, 1905.

*Clerks*, T. G. Watson, R. H. Short.

HOUSEHOLD OF H.M. THE QUEEN OF NORWAY.
(Princess Maud of Great Britain and Ireland).
*Comptroller and Private Secretary*, Col. Sir Henry Knollys, K.C.V.O.

...of highest value this heading is constantly taken emblematical with the [illegible] ; but there are those upon [illegible] holders of titles of long-standing nobility who are not members of the Higher ...ouse of Parliament, their peerages being those of Scotland or Ireland only. But, as further explained below, there are about an equal number of Peers of those kingdoms who possess additional titles which constitute them members of the Lords, these titles being in a majority of instances, though very far from all, inferior to those by which they are generally known. The full details as to each are given under his leading title, and a reference is in every case supplied under any other that he may hold, so that the table of equivalent titles formerly given in this work is no longer needed - a double index will be found in "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE."

## THE HOUSE OF LORDS.

The Magnum Concilium of the early chroniclers, consists of the Spiritual Lords of England (the 2 Archbishops and 24 of the Bishops), the Temporal Peers of England, Great Britain, and the United Kingdom, and of Representative Peers of Scotland and Ireland, together with such Scottish and Irish Peers as have also Imperial titles. No Peer can take his seat if he be under age, of unsound mind, or bankrupt. The *full* Assembly would consist of 2 Princes of the Blood Royal, 2 Archbishops, 20 Dukes, 29 Marquesses, 125 Earls, 28 Viscounts, 24 Bishops, 380 Barons, and 28 Scottish and 19 Irish Representative Peers total 680. (Earl Carson of Kedleston, one of the Irish Representative Peers, is included among the Earls.) See WHITAKER'S PEERAGE for complete table, showing numbers of Life Peers, Minors, &c. There are also 24 Ladies who are Peeresses in their own right, whose titles and names, along with those of Scotland, are given below at page 134. Female succession may occur in the Imperial Peerage in any Barony of England which was originally by writ of summons, but it is subject to the rule of *abeyance* whenever there are more than one daughter, sister, &c., eligible to succeed. There are also a few cases in which "special remainders" have been granted to female relatives in the absence of males. We use the term "Imperial" as including the three series of Peers of "England" (up to June 30, 1707), "Great Britain" (thence till close of 1800), and "United Kingdom" (1801 onward).

## SCOTTISH AND IRISH PEERS.

There are in all 86 Scottish Peers and 167 Irish, but of the total 253 there are 133 possessing Imperial titles and 120 without them. Of the 86 Scottish, 31 have Imperial titles and 26 are elected or re-elected every Parliament to sit in the Lords, and similarly of the 167 Irish 83 hold Imperial titles, and 28 are elected for life. Of the Imperial titles of the two kingdoms there are 19 which are inferior to the native ones, 29 are superior, 14 are identical in rank but differing in designation, and 13 are absolutely the same. Of the 5 Scottish Peeresses cited on page 136, that of Sutherland is subject to a degree of doubt, so that the lady does not assume it. There are other lines in the Scottish Peerage which are open to female succession, and this is not subject to abeyance as in England. In the Irish Peerage, on the other hand, the only titles open to female succession are the Mountcashel Viscounty and the La Poer Barony, the latter now held by the Marquess of Waterford. It will be observed that Ireland possesses a great advantage over Scotland in the *right as it does in the Commons, the native Peers who hold Imperial titles numbering, as just stated, 83 as against 31 of Scotland, and its elected Representative Peers 28 as against 16.* An Irish Peer who holds no Imperial title has also the special privilege of being able to seek election to the Commons for any constituency not in Ireland itself.

*Explanations.*—*S.* or *I* appended to the date of creation denotes a *Scottish* or *Irish* title, the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it also denotes that such date is that of the Imperial creation. A † appended to *S.* or *I.* implies that the Peer is an elected Representative to the House of Lords. For the mark ° see heading to Baronesses. b. signifies born, s., succeeded, m., married, w., widower or widow, dis., divorced, s.p., sine prole.

## COMPLETE LIST OF THE PEERS.

PRINCES OF THE BLOOD ROYAL (2).—*Style*, His Royal Highness the Duke of ——. *Addressed as*, Sir, or more formally, May it please your Royal Highness.

Edward Albert Christian George Andrew Patrick David, Prince of Wales, *Eldest Son or Heir Duke of Cornwall (1901) (Scot. Peer, Rothesay); K.G., d. 1894; c. 1901. (Home)*

Members 4th Class of the Royal Victorian Order.
Members of the British Empire.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military and other Esquires by Office.

Women take the same rank as their husbands or as their eldest brothers, but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife."

There are three Orders exclusive to Ladies. The Order of Victoria and Albert, the Crown of India, and the Royal Red Cross; but members are entitled to no special precedence. The Order of the British Empire is open to Ladies, the two highest classes being styled Dames Grand Cross and Dames Commanders.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated but naturally in the county the Lord Lieutenant stands first and secondly the Sheriff. In London and other Corporations, the Mayor stands first after him the Aldermen, Sheriffs, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor

* For fuller tables and for *Scottish and Irish Precedence* see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE" a companion volume, price 3s. 6d. net.

## The Order of Merit.—O.M

INSTITUTED 26th June, 1902.

Membership is of two kinds, Military and Civil, the former having crossed swords, and the latter oak leaves, upon the badge. Membership of this Order confers no precedence, and is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and of the remaining Orders of Knighthood.

MILITARY MEMBERS.

*Admiral of the Fleet* Rt. Hon. Sir Edward Hobart Seymour, G.C.B., G.C.V.O.
*Admiral of the Fleet* Rt. Hon. Lord Fisher, G.C.B., G.C.V.O.

## THE MOST HONOURABLE ORDER OF THE BATH (1399).

This heads to one. (Remodelled 1725 and 1815, and enlarged thirteen times since.)

G.C.B. Mil. G.C.B. Civ. K.C.B. Mil. K.C.B. Civ C.B. Mil.

*King Sovereign*; *Grand Master and Principal Knight Grand Cross*, *Field-Marshal* H.R.H. the Duke of Connaught and Strathearn, K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O.; *Dean of the Order*, The Dean of Westminster; *Bath King of Arms*.

*Registrar and Secretary*, The Comptroller of the Lord Chamberlain's Department, St. James's Palace, S.W.—Col. the Hon. Sir Douglas Dawson, C.C.V.O., C.B.E.; *Genealogist*, H. Farnham Burke, C.V.O., C.B.; *Gentleman Usher of the Scarlet Rod*, Col. Sir Charles Wyndham Murray, K.C.S.I.; *Chancery*, The Lord Chancellor's Office.—G.C.B., Knight Grand Cross; K.C.B., Knight Commander; C.B., Companion—each marked (M) for Mil. or (Civ.) for Civil Division.

## ORDER OF MERIT (1902)—O.M.

C.B. Mil.

This Order, consisting of sovereign, civil, and military members, is limited to twenty-four members besides those admitted members of the Order of Merit. It is designed as a special distinction for high eminence in any department whatever—war, science, literature, or art—without in itself conferring a knighthood, though it happens that of the twelve originally appointed, all but one were either a Peer, Knight, or Privy Councillor. The Order is limited in numbers to 24, with the addition of foreign honorary members. *Secretary and Registrar*, Col. Sir Henry Charles Legge, K.C.V.O.

## THE MOST EXALTED ORDER OF THE STAR OF INDIA (1861).

*Heaven's Light our Guide.*

*Sovereign*, The King-Emperor; *Grand Master and First and Principal Knight Grand Commander*, Viceroy and Gov.-Gen. of India; *Secretary* (in India), John B. Wood, C.S.I., C.I.E.; *Registrar*, The Comptroller of the Lord Chamberlain's Department, St. James's Palace, S.W.—for the time being Col. the Hon. Sir Douglas Dawson, C.C.V.O., C.B.E.—G.C.S.I., Knight Grand Commander; K.C.S.I., Knight Commander; C.S.I., Companion.

## THE MOST DISTINGUISHED ORDER OF ST. MICHAEL AND ST. GEORGE (1818).

*Auspicium melioris ævi.*

The Sovereign; *Grand Master*, H.R.H. the Prince of Wales, K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O., A.D.C.; *Prelate*, The Bishop of London; *Chancellor*, Henry Babington Smith, C.B.; *Secretary*, [illegible]; *Registrar and Secretary*, [illegible]; *Genealogist*, [illegible]; *Gentleman Usher*, [illegible]; *Companion*, The Most Hon. Marquess of [illegible], G.C.M.G., [illegible]; *Companion*, [illegible]

## THE MOST EMINENT ORDER OF THE INDIAN EMPIRE (1878).

(Remodelled 1903.) *Motto*—[illegible].

*Sovereign*, The King-Emperor; *Grand Master*, The Viceroy and Governor-General of India; Hon. Seeing; *Secretary* (in India), John B. Wood, C.I.E.; *Registrar*, The Comptroller of the Chancellor's Department.—G.C.I.E., Knight Grand Commander; K.C.I.E., Knight Commander; C.I.E., Companion.

## THE ROYAL VICTORIAN ORDER (1896).

G.C.V.O. K.C.V.O.

The Sovereign; *Chancellor*, The Lord Chamberlain; *Secretary*, The Keeper of His Majesty's Privy Purse; *Registrar*, Francis M. Bryant, B.V.A., L.L.A.—G.C.V.O., Knight Grand Cross; K.C.V.O., Knight Commander; C.V.O., Commander; M.V.O., Member, marked 4th or 5th Class.

## THE MOST EXCELLENT ORDER OF THE BRITISH EMPIRE (1917).

The Sovereign; *Grand Master*, H.R.H. the Prince of Wales. For services rendered to the Empire, whether at home or abroad, open to both men and women. G.B.E., Knights Grand Cross or Dames Grand Cross; K.B.E., Knights Commanders; D.B.E., Dames Commanders; C.B.E., Commanders; O.B.E., Officers, M.B.E., Members.

## ORDER OF THE COMPANIONS OF HONOUR (1917)—C.H.

This Order consists of one Class only and carries with it no title or precedence. The number of awards is limited and is open to both sexes.

## THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Bestowed in recognition of especial services of commissioned officers in the Navy and Army. The members are Companions only and rank immediately after the 4th Class of the Royal Victorian Order. A Bar is awarded for any additional act of service. The sequence of Companions, &c., is:—G.C.B., G.B., G.S.I., G.M.G., G.C.I.E., M.V.O. 4th Class, D.S.O., I.S.O., M.V.O. 5th Class, M.B.E.

## THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Restricted to members of the administrative or clerical [clerk] branches of the Civil Service, and consists of the Sovereign, the Prince of Wales, and Companions (not exceeding 700 in number exclusive of those appointed on the occasion of the Coronation of His Majesty King George V.), of whom one may belong to the Home Services, one to the Indian [see Europeans and non Natives] and one to the services of Dominions, Colonies and Protectorates.

## THE ROYAL ORDER OF VICTORIA AND ALBERT (for Ladies)—V.A.

Instituted in 1862, and enlarged in 1885, 1887, and 1889, but no fresh conferments are now made.

## THE IMPERIAL ORDER OF THE CROWN OF INDIA (for Ladies)—C.I.

Instituted 1878.

## THE ORDER OF ST JOHN OF JERUSALEM

The Order had its origin in Jerusalem and Acre, as an international lay confraternity for the relief of crusaders, and was later sovereign in Rhodes and in Malta, where its Knights kept galleys and galleons, to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1291 till 1798. The work of the British Order is the control of the St. John's Ambulance and Brigade, and of the British Ophthalmic Hospital, Jerusalem. *Sovereign Head and Patron*, H.M. King George V.; *Grand Prior*, H.R.H. Duke of Connaught, and a Chapter of about 400 Knights of two degrees—"Knights of Justice" and "Knights of Grace." There are also "Ladies of Justice," "Ladies of Grace," and Esquires. These distinctions are notified in the *London Gazette*, but do not confer any rank or title.

## THE VICTORIA CROSS (V.C.).

Instituted in 1856, on the close of the Crimean War. It was designed primarily for the rank and file and non-commissioned officers, but is held also by all grades up to Field-Marshals and Admirals of the Fleet, and was extended to civilians who had borne arms against the Indian mutineers. In 1902 the decoration was extended to native officers and men of the Indian Army. Conferred with the decoration is a pension, for non-commissioned officers and men, of £10 a year, with an additional £5 for each bar.

## THE MILITARY CROSS (1915)—M.C.

This decoration is worn immediately after all Orders and before all Decorations and Medals, the Victoria Cross alone excepted, and is awarded to Captains, Lieutenants, and Warrant Officers in the Army and Indian and Colonial Forces. A Bar is added for any additional act of service.

The Distinguished Service Cross—D.S.C.—Instituted in 1914, in substitution for the Conspicuous Service Cross, 1901; is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander.

The Military Medal.—1916; is worn immediately before all war medals, and is awarded to non-commissioned officers and men for individual or associated acts of bravery in the Field. In exceptional circumstances the Medal may be awarded to women, including nursing persons.

The Distinguished Service Medal.—Established 1914; is designated for chief petty officers, petty officers, men, and boys of all branches of the R.N., to non-commissioned officers and men of the R.M.A., and to other persons holding corresponding positions in His Majesty's Service afloat, for distinguished conduct in war.

The Conspicuous Gallantry Medal.—Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal.—D.C.M.—Is bestowed on warrant officers, non-commissioned officers, and men of the Army.

The Meritorious Service Medal.—V.D.—Was instituted for rewarding the meritorious services of [illegible]

[illegible]

(EXCLUSIVE OF THOSE HOLDING HIGHER RANK AS PEERS, BARONETS, OR KNIGHTS OF THE GARTER, THISTLE, AND ST PATRICK, q.v.) *For Knights Bachelor, see pp. 191–254.*

## Knights Bachelor.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representatives of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1926 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1485 and obtaining the uniform registration of every created Knight. An annual Knighthage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—Principal, Sir Henry Pelham, K.B., K.C.V.O.; *Hon. Registrar*, Sir William Bull, K.B., M.P.; *Secretary*, Willoughby Bullock; *Registry and Library*, Clifford's Inn, E.C.

### A List of the Gentlemen who have Received the Honour of Knighthood.

*(Knights of rank as have afterwards received the higher honour of* K.C.B., *etc., q.v.)*

## POLITICAL PARTIES AND ORGANISATIONS.

LIBERAL.—The *Liberal Central Association*, 21, Abingdon Street, Westminster, S.W. 1, is the official organisation and headquarters of the Liberal Party. *Pres.*, Rt. Hon. H. H. Asquith, M.P. *Chairman*, Rt. Hon. J. W. Gulland, M.P. *Liberal Whips' Dept., 21 Abingdon Street, S.W. 1. Whips*, Rt. Hon. J. W. Gulland, M.P., Hon. Geoffrey Howard, M.P., Walter R. Rea, M.P. *Political Sec.*, R. H. Davies, C.B. The *National Liberal Federation*, 42, Parliament Street, Westminster, S.W. 1, is a union of Liberal Associations in England and Wales. The *Liberal Publication Department*, 42, Parliament Street, under the combined auspices of the two above bodies, issues periodical literature and political magazines. *Home Counties Liberal Federation*, 42, Parliament Street, S.W., the *London Liberal Federation*, 42, Parliament Street, S.W., *Devon and Cornwall Liberal Federation*, Clarence Chambers, Tavistock Road, Plymouth; *Eastern Counties Liberal Federation*, Cumbergate, Peterborough; *Lancashire Cheshire, and North Western Liberal Federation*, 32, Cross Street, Manchester; *Midland Liberal Federation*, Newton Chambers, Cannon Street, Birmingham; *Northern Liberal Federation*, Pilgrim House, Pilgrim Street, Newcastle-on-Tyne; *Western Counties Liberal Federation*, 2, Bristol Bridge, Bristol; *Yorkshire Liberal Federation*, 38, Boar Lane, Leeds. Among other organisations, the *National Reform Union*, 90, Haworth's Buildings, Cross Street, Manchester, founded in 1864 for the advocacy of electoral reform and opposition to Protection, aims at inculcating Liberal principles by means of lectures and the distribution of literature; the *Eighty Club*, 3, Hare Court, Temple, E.C. 4, was founded in 1880, and works on similar lines. *League of Young Liberals*, Dacre House, Victoria Street, S.W. 1, *Liberal Social Council*, 92, Victoria Street, S.W. 1, the *Women's Liberal Federation*, 120, Victoria Street, S.W., and the *Women's National Liberal Association*, 41, Parliament Street, Westminster, S.W. 1. The *Scottish Liberal Association* is at 7, West George Street, Glasgow and at 92, Princes Street, Edinburgh; the Scottish *Women's Liberal Association* is at the Glasgow office. The *Welsh National Liberal Council* is at 82, Queen Street, Cardiff.

UNIONIST.—The chief Unionist organisation is the *National Unionist Association of Conservative and Liberal Unionist Organisations*, 1, Sanctuary Buildings, Gt. Smith Street, Westminster, S.W. 1.

The *National Unionist Association of Conservative and Liberal Unionist Organisations* is a federation of Conservative and Liberal Unionist Associations and Clubs in England and Wales. As constituted at present it consists of 34 Provincial Divisions, a Council of about 300 members, which meets quarterly, and a Conference, which meets annually. It also has Committees, which have the duties of strengthening, stimulating and creating electioneering organisation in the constituencies, publishing and distributing the whole of the Party literature for the education of the electorate, and providing and controlling the staff of speakers and lecturers. The *Scottish Unionist Association* is at 2, Frederick Street, Edinburgh. The *Primrose League*, 64, Victoria Street, S.W. 1, founded in 1883, is an educating body, and aims at the Maintenance of Religion, of the Constitution, and of the Unity of the British Empire. *Grand Master*, Earl Curzon of Kedleston, K.G., G.C.S.I., G.C.I.E., *Chancellor*, The Earl of Crawford and Balcarres, *President Ladies' Council*, Miss Balfour, *Registrar*, F. Willis. *Clerk of the Council*, R. Bennett, *Organising Sec.*, H. Crowe. *Junior Imperial League*, 1, Sanctuary Buildings, Gt. Smith Street, S.W. 1, *Sec.*, H. H. Cannell. The *United Club*, Mitre Court Chambers, Temple, E.C., supplies speakers for the Unionist cause. *Union Defence League*, 24, Victoria Street, S.W. 1. *Sec.*, P. G. Cambray.

LABOUR.—The Labour Party in Parliament is composed of 42 members. *Chairman*, W. Adamson. *Secretary*, Charles Duncan, *Whips*, G. H. Roberts, James Parker, and C. W. Bowerman. The organisation outside the House of Commons has offices at 1, Victoria Street, Westminster, S.W. 1. *Secretary*, Arthur Henderson, *National Agent*, Arthur Peters. The Party is financed by contributions of 1d. per member per year from affiliated Trade Unions and Socialist organisations, &c. An Executive Committee conducts questions of elections, &c., endorses candidates selected by affiliated bodies, and contributes 15 per cent. of the Returning Officers' charges in all elections held under Party auspices. The *National Women's Labour League* is an organisation of women of Labour sympathies, and works in co-operation with the Labour Party. *Gen. Sec.*, Dr. Marion Phillips, 1, Victoria Street, S.W. 1.

SOCIALISTS.—*British Socialist Party*, Chandos Hall, 22A, Malden Lane, Charing Cross, W.C. *Secretary*, Albert Inkpin. *Independent Labour Party*, 28 & 29, Johnson's Court, Fleet Street, E.C. 4. *Gen. Sec.*, Francis Johnson. The *Fabian Society*, 25, Tothill Street, Westminster, S.W. 1 (*Gen. Sec.*, W. S. Sanders), promotes an intellectual Socialism

chiefly to the middle classes. *The Anti-Socialist Union of Great Britain*, 98, Victoria Street, S.W 1, is a central organisation to oppose Socialism. *Chairman*, Col. Wilfrid Ashley, M.P *Sec.*, C. H. Dant.

IRISH PARTIES.—The *United Irish League* represents the Nationalist Party, and the Nationalist Whips are Capt. A J C. Donelan and J P Boland. *The All for Ireland League*, founded by W O'Brien, M P, aims at regaining a national parliament for Ireland by bringing about a Conference of all political parties, British and Irish. The Irish Unionist Party is represented by the *Irish Unionist Alliance*, 109, Grafton Street, Dublin, and by the *Ulster Unionist Council*, Old Town Hall, Belfast (*Sec.*, E. Dawson Bates). *Irish Unionist Whip*, Sir J R. Lonsdale, Bt., M P

FREE TRADE.—*The Free Trade Union*, 89, Victoria Street, S.W 1, was founded to resist a reactionary tariff policy and to safeguard the free import of food and raw material.

TARIFF REFORM.—The *Tariff Reform League*, 7, Victoria Street, Westminster, S.W 1, was founded in 1903, in furtherance of Mr Chamberlain's proposals for the reform of the Fiscal System of the United Kingdom. *Sec.* (*acting*), G Graham Anderson.

*WOMEN'S SUFFRAGE.—The principal organisations for putting forward the claims of women to the Parliamentary franchise are the *National Union of Women's Suffrage Societies*, 14, Great Smith Street, Westminster, S.W 1, with over 490 affiliated societies and 53,000 members the *London Society for Women's Suffrage* 58, Victoria Street, S.W 1, is a society in the above Union, and has over 4,000 members the *Women's Party*, 4, William Street, Knightsbridge, S.W 1. (*Pres.*, Mrs. Pankhurst; *Sec.*, Miss A. Kenny), the *Women's Freedom League*, 144, High Holborn, W C 1 (*President*, Mrs. Despard; *Secretary*, Miss F A. Underwood), which aims at securing for women a Parliamentary vote as it is or may be granted to men; the *Lancashire and Cheshire Women's Textile Workers' Representation Committee*, 5, John Dalton Street, Manchester the *Women's Co-operative Guild*, 28, Church Row, Hampstead, N W 3; the *Northern Men's Federation for Women's Suffrage*, 6, Wellington Road, St. John's Wood, N W 8. (*President*, Mrs. Arncliffe-Sennett). The *Conservative and Unionist Women's Franchise Association*, 48, Dover Street, W (*Pres.*, The Countess of Selborne), aims at a qualified suffrage for women, and opposes universal suffrage of either sex. (Political work entirely suspended in favour of relief work during the war) The offices of the *Women's Local Government Society* are 19, Tothill Street, S.W The *National League for Opposing Women Suffrage*, 39, Victoria Street, S.W 1. (*Presidents*, Earl Curzon of Kedleston, Lord Weardale), seeks to prevent the Parliamentary enfranchisement of women.

ELECTORAL REFORM.—*Proportional Representation Society*, *Sec.*, J H. Humphreys, 14, Great Smith Street, Westminster, S.W 1.

NATIONAL PARTY.—Headquarters, 22, King Street, St. James', S.W 1.

---

RESIGNATION OF MEMBERS OF PARLIAMENT.—No member of the Commons can resign his seat, but must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant and a writ issued.

---

## PUBLIC PETITIONS.

EVERY Petition offered to be presented to the House must begin with the words "To the Honourable the Commons of the United Kingdom of Great Britain and Ireland, in Parliament Assembled", or with words equivalent thereto.

Every Member presenting a Petition to the House must affix his name at the beginning thereof.

Every Petition must contain a prayer

Every Petition must be written and not printed or lithographed.

Every Petition must be signed by at least one person on the skin or sheet on which the Petition is written

If signatures are affixed to more than one sheet, the prayer of the Petition must be repeated at the head of each sheet, but on every sheet after the first, the prayer may be reproduced in print or by other mechanical process. Signatures upon sheets not so headed will not be counted. The "Prayer" signifies that part of the Petition which expresses the object of the Petitioners, as distinguished from formal parts.

Every person signing a Petition must write his address after his signature or his signature will not be counted.

Every Petition must be written in the English language, or be accompanied by a translation certified by the Member who shall present it.

Every Petition must be signed by the parties whose names are appended thereto by their names or marks, and by no one else except in case of incapacity by sickness.

No letters, affidavits, or other documents, may be attached to any Petition.

No erasures or interlineations may be made in any Petition.

No reference may be made to any Debate in Parliament.

No application may be made for any grant of public money, except with the consent of the Crown.

No application may be made for a charge upon the revenues of India, except with the consent of the Crown.

All Petitions, after they have been ordered to lie upon the Table, are referred to the Committee on Public Petitions, without any questions being put, but if any such Petition relate to any matter or subject with respect to which the Member presenting it has given notice of a Motion, and the said Petition has not been ordered to be printed by the Committee, such Member may, after notice given, move that such Petition be printed with the Votes.

A Member cannot present a Petition from himself. While it is quite competent to any honourable Member to petition the House, his Petition ought to be presented by another Member But this Rule is not to be understood to extend to cases in which a Member shall present a Petition signed by him in his representative capacity as Chairman of a County Council or of any public incorporated body

---

* All Political propaganda suspended during the War

SESSION 1916

THE CHANGE OF ADMINISTRATION.—The Session, which was resumed on *Oct.* 10, was nearing its end when, in the opening days of December, a serious crisis followed a suggestion for a smaller War Council made by Mr Lloyd George. Finding it impossible to reconstruct the Cabinet, Mr Asquith resigned, and, as Mr Bonar Law was unable to form an Administration after the King had held a conference with the Party leaders, Mr Lloyd George was summoned. He accepted the position of Prime Minister and First Lord of the Treasury on *Dec.* 7, and, with a Ministry of which the chief features were a small War Cabinet, the inclusion of successful business men and recognised experts outside politics, and the establishment of Ministries of Labour, Pensions, Food, and Shipping, addressed a crowded Chamber on the 19th. The new Premier declared that the Government's urgent task was to complete and make more effective the mobilisation of all our national resources. Shipping was to be nationalised and the State was to extend its control over the whole mining industry. The War Cabinet, he said, had accepted the conclusion of the late War Committee that the time had come for the adoption of the principle of universal national service and he announced that Mr Neville Chamberlain would be appointed Director-General of National Service. Industries and civilian services would be scheduled according to their essential character labour set free from non-essential industries being made available to release potential soldiers and to increase the available supply of labour for essential services. Mr Asquith followed with a dignified and patriotic reply, affirming that his one desire was to give to the Government the benefit of whatever experience he had gained. The Session was closed on *Dec.* 22, the King's Speech declaring that "the vigorous prosecution of the war must be our single endeavour until we have vindicated the rights so ruthlessly violated by our enemies, and established the security of Europe on a sure foundation."

THE VOTES OF CREDIT.—In a notable speech, Mr Asquith on *Oct.* 11 moved what proved to be his last Vote of Credit,—one for £300,000,000—declaring, in the course of his speech, that the struggle could not be allowed to end in "some patched up, precarious, dishonouring compromise, masquerading under the name of peace." A further Vote for £400,000,000 was granted after the new Administration had come into office. Mr Bonar Law expressed the belief that it was not a war in which it would ever have been possible to go on indefinitely as in the Napoleonic Wars. The armies now embodied by the Allies could not be kept at the existing figure indefinitely, and all that could be hoped for was that they would be kept at the strong figure long enough to beat our enemies. In the same way, we could not go on indefinitely on the financial scale, but he believed that we could go on long enough to make it sure that we were not beaten for financial reasons.

WAR PENSIONS.—A Bill was introduced by Mr Henderson on *Nov.* 24 to establish a Board to consolidate and simplify the administration of war pensions, but after some progress had been made, an amendment moved by Mr Hogge was accepted, completely changing the measure by setting up a single unified and centralised scheme. A number of Government amendments were consequently adopted on *Nov* 30 remodelling the Bill on these lines. A Ministry of Pensions was substituted for the proposed Board, the powers and duties of the Admiralty and Army Council with respect to pensions being handed over to this body while the Statutory Committee was placed under its control. The measure speedily passed through its remaining stages in both Chambers.

CONTROLLING FOOD.—While still in office Mr Runciman announced, on *Nov* 15, that a Food Controller with wide powers would be appointed, and that the Government would proceed against persons who wasted any article. The manufacture of certain articles of food would be controlled, and pure white flour would no longer be milled, while power would be taken to fix prices in certain cases. When the new Administration was formed, Lord Devonport was appointed Food Controller, and on *Dec.* 14 he declared that it was overwhelmingly essential that our food supplies should be distributed fairly. He found evidence that there were many unpatriotic people who got hold of supplies in excess of their wants. His endeavour would always be to adjust supplies on the basis that every individual should have an equal chance of getting a fair share.

ELECTORAL REFORM.—Mr Bonar Law announced on *Oct* 10 that a conference, presided over by the Speaker, and composed of Peers and M.P.'s representing all parties, would at once examine the reform of the Parliamentary franchise, the redistribution of seats, and the registration of electors. A Bill introduced before the recess to make provision for framing a special register was, at Sir Edward Carson's suggestion, "hung up" on *Nov* 1 after it had started the Committee stage, while a Bill introduced in the Upper Chamber by Lord Salisbury to provide machinery to enable sailors soldiers, and munition workers to record their votes was not dealt with by the other House, Lord Derby stating that the higher military authorities considered the scheme absolutely impracticable. When the Session closed, the Speaker's Conference had made considerable progress, but had not concluded its deliberations.

SESSION 1917

THE KING'S SPEECH.—The new Session was opened in semi-State on *Feb* 7 by the King, who was accompanied by the Queen and escorted by officers of the Overseas Forces, the ceremony being given a war atmosphere and deprived of several of its regular features. His Majesty, in his Speech from the Throne, declared that his people and our Allies remained steadfastly resolved to secure the just demands for reparation and restitution in respect of the past, and the guarantees for the future which were essential to the progress of civilisation. The King expressed his assurance that his people would respond to "every call necessary for the success of our cause" with the same indomitable ardour and devotion that had filled His Majesty with pride and gratitude since the war began. In the Lords, Earl Stanhope moved and Lord Rathcreedan seconded the Address in reply, which was agreed to on the same evening after a debate devoted largely to the submarine menace. In the Commons, Mr McCurdy moved and Sir Hedworth Meux seconded the Address. Mr Asquith denounced the new German submarine threat as a declaration of war upon neutrality and said the challenge had been accepted with dignity by the head of the most powerful neutral State. Mr. Bonar Law, in his reply, stated that an arrangement for bringing shipping under the control of

the Government had been approved. The submarine peril was, he said, being met by new expenditure, some of the best brains in the Navy and in the country being concentrated on the problem. The only amendment brought forward was one by Mr Leslie Scott upon the subject of the increase of food *profiteering*, and after Mr Prothero had outlined the steps taken to deal with the *situation*, the amendment was negatived without a division, and the Address agreed to on *Feb* 8.

ELECTORAL REFORM.—In the Commons, on *May* 28, Mr Asquith introduced a motion for legislation on the lines of the resolutions of the Speaker's Conference on Electoral Reform, and incidentally announced that the war had changed his personal views regarding women's suffrage. The Prime Minister said the Government accepted the recommendations with two reservations proportional representation and women's suffrage would be left to the House. The motion was accepted, but before the new measure was brought forward a Bill to extend the life of Parliament until *Nov* 30 was passed through both Houses. The Representation of the People Bill as the new Reform Bill was styled, was brought forward by Mr Long on *May* 15. The main proposals were that women entitled to the municipal vote would be registered as Parliamentary electors on attaining the age of 30, that no person should exercise more than two votes at a General Election, and that persons on war service would be registered for the constituencies for which they would have had the necessary qualification but for the war. Mr Long said Boundary Commissions had been set up to deal with redistribution. The Bill, which repealed 32 statutes and partly repealed 30 others, was given a first reading without a division. In moving the second reading on *May* 22, Sir George Cave estimated that if the proposals were carried out the electorate would be increased by 2,000,000 men and by 6,000,000 women. On the following day the second reading was carried by 399 to 42. The question of giving the franchise to women came up in Committee on *June* 29, when the principle was adopted by a majority of 330, the voting being 385 to 55. When an amendment to omit the age limit of 30 was introduced on the 30th, Sir George Cave declared that if it were accepted he could not be responsible for the future conduct of the Bill, and the suggestion was rejected by 292 to 65, the clause being eventually agreed to by 324 to 77. On *July* 4 proportional representation was cut out of the Bill by 200 to 189 on a free vote, but it was decided on *July* 9, by a majority of one (193 to 194) in a "free House," that if there were more than two candidates at an election for one member, the election should be according to the principle of the alternative vote. The House also resolved in favour of applying proportional representation to University constituencies, and of holding all polls at a General Election on one day. The remainder of the Bill was held over until after the recess.

THE BUDGET.—Mr Bonar Law on *May* 9 introduced his first Budget, which was notable for the huge sums involved and for the absence of new taxation, various increases alone being proposed. The Chancellor said the actual expenditure for the year was £2,198,112,000—an excess of £372,732,000 over the estimate, owing largely to the increased cost of munitions and additional advances to our Allies and the Dominions. The estimate for revenue was £200,492,000, which had been exceeded by £71,272,000, the receipts being £230,918,000. Thus £1,661,882,000 was left to be raised by loan. The National Debt now stood at £3,894,000,000, from which must be deducted advances to Allies and Dominions. Of the total national expenditure during the war of £5,318,000,000, £1,137,000,000, or fully 20 per cent., was provided out of revenue. The Chancellor said he expected an addition of about £1,300,000 by a graduated increase of the entertainments tax, which would not affect the 2d. and 3d. taxes. Upon tobacco he proposed to put another 1s. 6d. in the pound, which he thought would bring in £6,000,000 in the present year. By making the excess profits duty 60 per cent. instead of 60 per cent. from Jan. 1, 1917, from which date the munitions levy would be merged in the tax, he estimated that he would obtain another £8,000,000. He proposed to suspend in the case of shipowners the provision of the duty by which they could make up to the pre-war standard out of taxes they had previously paid the losses to which they might be subject this year. Adjusting his final balance sheet, the Chancellor said the total estimated expenditure was £4,250,981,000, that per day being £6,274,000, against £6,000,000 in the preceding year, while the total estimated revenue was £878,600,000, leaving a balance to be provided by loan of £3,652,781,000. On the second reading of the Finance Bill, on *May* 24, Mr Bonar Law said if the war lasted a considerable time we might find it impossible to raise the money required except by compulsory means, and he added that if the necessity arose he would not hesitate to conscript money. When the Committee stage opened on *July* 5, the Chancellor announced concessions modifying the entertainments tax and the tobacco duty. The third reading was obtained on *July* 26. Votes of Credit were moved by Mr Bonar Law (and granted in each case) for £300,000,000 and £350,000,000 on *Feb.* 22, for £600,000,000 on *Mar* 29 (making the total for 1916-17 £1,250,000,000), for £300,000,000 on *May* 1, and for £650,000,000 on *July* 24, the total for the war being £5,250,000,000. The discussion on the vote in *May* was taken in secret. Mr Bonar Law on *Feb.* 26 announced the results of the War Loan, and said the yield in new money was over one thousand *millions*. Applications through the Bank of England were £872,988,000, Treasury Bills converted accounted for £130,911,950, and applications through the Post Office amounted to £80,273,000, with £43,300,000 in War Savings Certificates. Including subscribers of smaller amounts than £50 the subscribers totalled 2,000,000. Only about £2,250,000 had been put into the tax-free loan.

THE IRISH CONVENTION.—After a debate on *May* 9 on the Irish question which resulted in the Nationalists resolving to oppose the Government, Mr. Lloyd George, on *May* 22, announced that the Government had decided to summon immediately a Convention of representative Irishmen in Ireland to submit a Constitution for the future government of Ireland. Not only all political parties, but local governing bodies, the churches, trade unions, and commercial and educational interests would be represented. If substantial agreement were reached as to the character and scope of the Constitution, the Government were prepared to accept the responsibility for taking all the necessary steps to enable the Imperial Parliament to give legislative effect to the conclusions of the Convention.

tion. Mr Redmond gave a hearty welcome to the idea, and on *June* 11 the Prime Minister announced that the proposal had been accepted by *all parties, and that invitations were about* to be issued to 101 members. In view of the Convention, Mr. Bonar Law a few days later announced that the Government had decided to release without reservation all prisoners undergoing confinement in connexion with the Sinn Fein rebellion.

THE FOOD PROBLEM.—The Prime Minister on *Feb.* 23 announced that drastic restrictions would be imposed on imports not essential to the prosecution of the war, while production at home would be stimulated to its utmost capacity by State assistance. As stocks of food were lower than they had been within recollection, it was imperative that more food should be grown at home To overcome the farmers' timidity they were to be guaranteed minimum prices for wheat, oats, and potatoes, while agricultural labourers were to be given a minimum wage of 25/ a week, and landlords were not to be allowed to raise rents. The Corn Production Bill was later brought forward to set up minimum prices for corn for six years, and wages boards for labourers with a minimum of 25s. per week, and generally to increase home production. During the Committee stage Mr Prothero inserted words securing for every able-bodied man wages adequate to promote efficiency and to ensure a reasonable standard of comfort for him and his family The Bill was read a third time on *Aug.* 7 by 108 to 14. On *Aug.* 20 the Commons *accepted an amendment made by the Peers* giving the right of appeal to an arbitrator in cases where good husbandry was involved, or where any change was made in the use of land so far as it related to particular parts of it. The Royal Assent was accorded on *Aug.* 21, when Parliament adjourned until *Oct.* 16. On *July* 25, Mr Clynes, the Parliamentary Secretary to the Ministry of Food, explained how the Government proposed to reduce the price of the quartern loaf to 9*d*. They would take over all the flour mills of importance, and flour would be sold from the mills to the bakers at a uniform price, a subsidy from the Exchequer being provided to meet the loss. Lord Rhondda, the new Food Controller, outlined his policy on the following day He intended to fix the prices of those articles of prime necessity over the supply of which he could obtain effective control at all stages, allowing a reasonable pre-war profit for those engaged in production and distribution. Existing agencies would be used for distribution under licences and under the supervision of local food controllers. On the motion for the adjournment, on *Aug.* 28, the Prime Minister said the Government had come to the conclusion that with reasonable economy there was no chance of starving us out. For the first time he gave figures of our losses in tonnage by the submarine campaign. The worst month was April, when we lost about 350,000 tons gross of shipping. *In July we lost* 300,000 *tons gross, and* the figures for the first 26 days in August showed substantial improvement upon July Our net losses were under 250,000 tons a month, and would be 275,000 tons a month if the August figures continued at the same ratio. In six months of this year an addition of 984,000 tons had been built, and in the second six months nearly 1,750,000 tons would be built and 350,000 tons acquired abroad. As to our stocks of food, the situation had considerably improved, and if the harvest were as good as if promised to be, we should be in a better position than for a good many years. *However, the claims of France and Italy* enforced the need for stricter economy than before.

THE ARMY.—In moving the second reading of a *Bill providing for a fresh examination* of discharged and rejected men, Mr Bonar Law, on *May* 29, said that owing to the pressing need for men at home the recruits obtained since the beginning of the year had fallen short of the estimated number by 120,000. By the Bill the military authorities would be enabled to deal with one million men In Committee, the Government agreed to an amendment to secure the final discharge of a man who upon re-examination was not accepted on the ground that he was totally and permanently disabled, and the third reading was carried by 197 to 29 on *April* 3, the Peers passing the Bill through all its stages on the following day

NATIONAL SERVICE.—The scheme for national service was explained in the Commons on *Feb.* 22, when Sir George Cave moved the second reading of the Bill establishing the Ministry He said that the Government proposed that after a certain date no further labour between the ages of 17 and 61 should be engaged in the unessential trades without the consent of the Government. As a result of fears expressed on the point, Sir George agreed to insert words *in the Bill making it clear that it did not involve* industrial compulsion, and the second reading was agreed to. The measure passed through *Committee on Feb* 27, *after an attempt to limit* the ages to 18 to 55 had been defeated. On *May* 16 the Bill was read a third time, being subsequently passed by the Upper Chamber The Ministry came in for considerable criticism, and not long before Parliament adjourned its functions were changed, Mr Chamberlain resigned, and Sir Auckland Geddes became Director General, with the duties of recruiting entrusted to the department.

THE NEW EDUCATION PROPOSALS.—On *Aug.* 10 Mr Fisher introduced an Education Bill of far reaching importance, prompted by deficiencies revealed by the war and framed to repair the wastage caused by the war It imposed upon county and borough councils the duty of providing for a comprehensive organisation of education, the *ad. lib.* limit of the grant to be raised for higher education being removed. Provincial associations would be established to exercise functions delegated to them by local authorities. He proposed to encourage the foundation of nursery schools for children under age, to ensure the law of school attendance so as to abolish all exceptions between the ages of 5 and 14, and to place further restrictions upon the employment of children during the elementary school period. The abolition of the half-time system was also intended. With certain exceptions every young person no longer under any obligation to attend a public elementary school was to attend a continuation school for a period of 320 hours in the year, or the equivalent of eight hours a week for forty weeks. Every young person who had not received a full-time education up to the age of 16 was to receive, out of the employer's time, a part-time education up to 18, either in schools provided by the local education authority or in schools under their direction, such as those established by manufacturers in their works.

(Closed December 2-26, 1900; Mid January 30, 1901.)

* Denotes a Member of the last Parliament, and † a change of constituency.

ADMIRALTY, Whitehall, S.W.

The management of all maritime affairs, the government of the Royal Navy [qualification in maritime questions] and the appointment and commissioning of Naval Officers was in early times the province of the "Lord High Admiral," the chief Great Officer of State. The judicial functions of the office have long been vested in other hands, and the office itself has been "in commission" [from and amongst] for a short time [to stay when the Duke of Clarence was Lord High Admiral, the duties being performed by "Commissioners for executing the Office of Lord High Admiral of the United Kingdom."

These Commissioners, or "Lords of the Admiralty" as they are more generally called, consist of a "First Lord," "First Lord" (who, by virtue of the importance of his office, is Cabinet Minister), a "First Sea Lord," "Second Sea Lord," "Third Sea Lord," "Fourth Sea Lord" [were always selected from Officers of the Sea Service], a "Civil Lord," and an additional "Civil Lord." There is also a "Parliamentary and Financial Secretary" and a non-political Permanent Secretary. The [ ] appointments provided in the Navy Estimates appear, for administration, is not stated.

## Naval Department—Whitehall Hours, 10 to 5.

Lords Commissioners:—*First Lord*, The Rt. Hon. Sir Eric Geddes, K.B.E., K.C.B. (with house allowance) †£5,000

£30c to £45c

## Board of Inventions and Research.

Victory House, Cockspur Street, S.W.

CENTRAL COMMITTEE

Admiral of the Fleet Lord Fisher of Kilverstone, G.C.B., O.M., G.C.V.O.

Professor Sir Joseph J. Thomson, O.M., F.R.S.

Hon. Sir Charles H. Parsons, K.C.B., F.R.S.

Dr. G. T. Beilby, F.R.S.

*Secretary and Naval Assistant*, Vice-Adm. Sir Richard H. Peirse K.C.B., M.V.O.

## AGRICULTURE AND FISHERIES, Board of,

4-7 Whitehall Place 3 & 4a St. James's Square SW and 29 Newburgh (Answap) S.E., 43 and 44 Parliament Street, S.W.; Craven House, North umberland Avenue W.C.; 2, 3, and 4 The Sanctuary, S.W.; and 39 Pall Mall, S.W.1.

The Board of Agriculture was established by the Act of 1889, when there were transferred to it the duties of the Privy Council in connection with Diseases of Animals, and the functions of the Land Commissioners for England. Technically the membership of the Board is analogous to that of the Local Government Board, and "Board" of Education, but in effect the establishment consists of a President, a Parliamentary Secretary, a Permanent Secretary, Assistant Secretaries, &c. and its main functions are to prevent the introduction or spread of certain diseases among animals, to control the transit of animals and the importation of horses, birds, fodder, to deal with insect and fungus pests, to collect and distribute information relating to agriculture, horticulture and forestry, to administer Grants for Agricultural Education and Research (including Forestry), and for the improvement of the breeding of live stock (including horses), to collect and publish particulars, statistics and dis seminate information with regard to food production, to administer the Fertilisers and Feeding Stuffs Act and the Sale of Food and Drugs Acts in England and Wales so far as the latter relate to agricultural produce, to control the redemption and re-apportionment of tithe rent-charge and the regulation of enclosures of common land, to enfranchise copyhold land, to administer the Small Holdings and Allotments Acts including the acquisition of land for colonies for disbanded soldiers and sailors, to administer Acts relating to the improvement of land by private owners, to administer the Acts relating to Sea, Salmon and Freshwater Fisheries. The Board will also administer the provisions of the Corn Production Act, 1917. A new Department has been formed to deal entirely with food production during the war. The Board also publish a monthly "Journal," price 6d. By the Board of Agriculture and Fisheries Act of 1903 certain powers and duties formerly exercised by the Board of Trade with respect to fisheries were transferred to this Department, the designation of which was at the same time altered. The Board also control the Ordnance Survey of the U.K., which is the subject of a separate Note. By an Order in Council of 21st March, 1904, the superintendence of the Royal Botanic Gardens, Kew, was transferred to the Board. The cost of administration in the financial year 1913-14 was estimated at £840,000.

*President*, Rt. Hon. Rowland E. Prothero, M.V.O., P.C. £5,000

*Principal Clerk*, E. W. Mann, C.B. £1,200

*Permanent Sec.*, A. D. Hall, F.R.S. ... £1,800 to £2,000

*Private Secretary*, W. E. Walker (asst.) ... ... £250

*Joint Parliamentary Secretaries*, Sir Richard Winfrey, M.P., £1,200; Duke of Marlborough, K.G. (unpd.)

*Private Sec.*, R. S. Langford (asst.) ... ... £250

*Chief Agricultural Adviser* R. J. Chaney, C.B. £1,200

*Assistant Secretaries*, A. W. Anstruther, C.B.; Sir R. Henry Rew, K.C.B.; T. H. Middleton, C.B.; H. G. Maurice, C.B.; F. L. C. Floud, H. R. Dale (asst.)

£1,200 to £1,200

*Small Holdings Commissioners*, S. Mager; J. Owen; A. Allesbrook, F. E. F. Rogers, R. O. Fordham; J. H. Diggle, F. Horne; D. C. Barnard £800 to £1,200

### ARMS, COLLEGE OF, or HERALDS' COLLEGE,

Queen Victoria Street, E.C.

(*See also* Scottish and Irish Sections.)

The Heralds' College was incorporated and endowed by Richard III. in 1484, as a College of Arms, presided over by the Earl Marshal, the other members being the then Kings of Arms, and the six Heralds, to regulate the granting and the bearing of Coat Armour in addition to the ordinary functions of the Heralds. Their first residence was in Pulteney's Inn until the present site was granted by Queen Mary in 1555, the house being rebuilt as it now stands after destruction in the Great Fire.

*Earl Marshal*, His Grace the Duke of Norfolk.
*Deputy Earl Marshal*, Lord Edmund Bernard Talbot, K.C.V.O., D.S.O., M.P.

KING OF ARMS.

*Garter*, Sir Alfred Scott Scott-Gatty, K.C.V.O., F.S.A.
*Clarenceux*, William Henry Weldon, C.V.O., F.S.A.
*Norroy*, Henry Farnham Burke, C.V.O., C.B., F.S.A.

SIX HERALDS.

*Lancaster*, Edward Bellasis.

*Portcullis*, Keith William Murray, F.S.A.
*Rouge Croix*, Archibald George Stamefield Russell.
*Earl Marshal's Sec.*, Gordon A. de Lisle Lee.
*Registrar*, Charles Harold Athill, M.V.O., F.S.A.

### BLOCKADE, MINISTRY OF

*See* WAR TRADE DEPARTMENT

### CHARITY COMMISSIONERS,

Ryder Street, St. James's, S.W.

The Charity Commission was constituted by Act of Parliament in 1853 "for the better administration of Charitable Trusts in England and Wales." In 1869 the powers previously exercised by the Endowed Schools Commissioners were temporarily transferred to the Charity Commission, and in 1874 the transfer was made permanent. The powers of the Commissioners over all endowments held for purely educational purposes have now been transferred to the Board of Education in pursuance of Orders in Council made under the Board of Education Act, 1899. The salaries, &c., accounted in 1917 to £58,484.

*Chief Commissioner*, Henry W. T. Bompas, C.B. £2,500

* At the Customs Branch.

## CIVIL SERVICE COMMISSION,
### Burlington Gardens, W 1.

The Civil Service Commission was established in 1855 to supply tests of fitness for junior situations in the Service of Civil Service. In 1870 an Order in Council applied the system of competitive examination throughout the Service. Establishment Expenses, 1907-8, £64,248.

*Civil Commissioner*, Stanley M. Leathes, C.B. ..... £1,500
*Commissioner*, Herbert W. Paul ..... £1,200
*Sec. and Registrar*, L. C. H. Weekes ..... £700 to £800
*Assist. Sec.*, G. G. Mansell ..... £700 to £750
*Senior Clerks*, J. H. Brackenbury, T. L. Hedley ..... £500 to £700
*Director of Examinations*, D. S. Muir ..... £700 to £900

## COLONIAL OFFICE, Downing Street, S.W

The business of the Colonies was, until 1801, included in the functions of the Home Secretary, to be transferred in that year to the newly-created "Secretary for War." In 1854 the outbreak of the Russian War led to the appointment of a Secretary of State for the Colonies (to relieve the War Secretary of Colonial business). The Colonial Secretary possesses an advisory power of veto on legislation of the self-governing Colonies, and is responsible for the government of the remaining Dependencies beyond the seas in inverse proportion to the amount of self-government granted to them. The salaries, &c., of the Colonial Office are estimated at £50,000 for 1907-8.

*Principal Secretary of State for the Colonies*, Rt. Hon. Walter H. Long, M.P. ..... £5,000
*Perm. Sec.*, H. F. Batterbee ..... £1,500
*Assist. Sec.*, *A. G. C. Parkinson, £1,000, Earl of Leitrim, esq.; Charles E. Russell ..... esq.
*Parliamentary Sec.*, Sir William Dell, K.C.

UNDER-SECRETARIES.

### Emigrants' Information Office,
#### 31 Broadway, S.W.—(m to g. Sat. m to 1.30.)

*Pres., Committee of Management*, The Secretary of State for the Colonies.
*Chairman*, &c., T. C. Macnaghten.
*Chief Clerk*, Malcolm Jones.
*Editor of Publications* (vacant).

### Imperial Institute,
#### South Kensington, S.W

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (ten years ago), and by the Imperial Institute (Management) Act of 1902 is under the management of the Secretary of State for the Colonies, assisted by an Executive Council composed of twenty-five members. The principal work of the Imperial Institute is the promotion of inter-Imperial trade in raw materials, by investigations with a view to utilisation, by supplying information as to sources, quality and uses, and by exhibitions illustrative of the resources of the Empire.

*Executive Council*, Rt. Hon. Lord Islington, G.C.M.G., K.C.S.I. (*Chairman*) Rt. Hon. Lord Burnham; Rt. Hon. Lord Emmott, G.C.M.G., C.B.E.; Rt. Hon. the Earl of Scarbrough, K.C.B.; Prof. Wyndham R. Dunstan, C.M.G., F.R.S., Sir Algernon Firth, Bt.; G. E. A. Grindle, C.B.E.; Sir Robert Kindersley, K.B.E., T. C. Macnaghten; D. O. Malcolm; Sir Owen Phillipps, K.C.M.G., M.P.; Sir Marshall Reid, C.I.E.; Sir William Taylor, K.C.M.G.; Sir Richard Threlfall, K.B.E., F.R.S.; Sir W. H. Clark, K.C.S.I., C.M.G.; H. Fountain, C.M.G. Sir J. P. Hewett, K.C.S.I., C.I.E.; L. J. Kershaw, C.I.E., A. D. Hall, F.R.S.; Sir R. W. Carlyle, K.C.S.I., C.I.E.; Hon. Sir George H. Perley, K.C.M.G., Rt. Hon. Andrew Fisher, Rt. Hon. W. P. Schreiner, K.C., C.M.G., Hon. Sir Thomas Mackenzie, K.C.M.G.

The following are the principal Committees of the Institute:—

*Committee for Canada.*

Hon. Sir George Perley, K.C.M.G. (*Chairman*); J. G. Colmer, C.M.G., Sir Robert Kindersley, K.B.E.; J. H. Plummer; Sir Keith Price.

*Committee for Australia.*

Rt. Hon. Andrew Fisher (*Chairman*), Capt. R. Muirhead Collins, R.N., C.M.G.; J. Cooke; R. V. Reid; W. Robinson.

*Committee for New Zealand.*

Hon. Sir Thomas Mackenzie, K.C.M.G. (*Chairman*); J. Coates; J. C. N. Grigg, R. D. D. McLean; R. H. Nolan.

*Committee for South Africa (including Rhodesia).*

Rt. Hon. W. P. Schreiner, K.C., C.M.G. (*Chairman*); Dr. H. T. Brown, F.R.S.; C. du P. Chiappini, F. Dyer; D. O. Malcolm, C. W. S. Mande, W. Soper

*Committee for India.*

Sir Charles Mallod (*Chairman*); A. Yusuf Ali; Sir Charles Armstrong; Sir Bruce Gibb; Sir Robert Carlyle, K.C.S.I., C.I.E.; D. T. Chadwick; Sir John Hewett, K.C.S.I., C.I.E.; L. J. Kershaw, C.I.E.; Sir Marshall Reid, C.I.E., Sir James Dunlop Smith, K.C.S.I., K.C.V.O., C.I.E. Sir George Sutherland.

In addition there are numerous Advisory Technical Committees, including Mineral Resources, Timbers, Silk, Rubber, &c., and a Committee on New Materials, with representatives of the Chambers of Commerce.

*Director*, Wyndham R. Dunstan, C.M.G., LL.D., F.R.S.

Private Sec. to Chairman and Vice-Chairman, S. Hall ..... £200
Secretary (ad.), R. T. Warner

## DURHAM, COUNTY PALATINE OF

It is uncertain when "Palatine" privileges were first conferred on the County of Durham, some formal creation of the Palatinate by charter or deed appears to have never been made. From the founding of the See of Lindisfarne, out of which the Bishopric and Palatinate of Durham arose, the Bishops received large grants of lands with extensive privileges; and Godfrey, King of the Hebrides, and Alfred the Great appear to have confirmed the grant to the See of the whole of the lands between the rivers Tyne and Wear. Their privileges were the source of palatine privileges by the Norman prince to the Bishops Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resigned by the Crown in 1836. Parliament exercises no authority to pass laws enacted for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their sovereign. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Chancellor, Edward Tindal Atkinson, K.C.
Attorney-General, Herbert F. Manisty, K.C.
Solicitor-General, Arthur W. Bolcastow, K.C.
Registrar of Chancery Court, A. O. Smith.
Steward & Clerk of Halmote, F. A. Maxley.

## EDUCATION, BOARD OF,

Permanent Office of President, Parliamentary Secretary, and Permanent Secretary—Whitehall, London, S.W 1.

Temporary Main Offices—Victoria and Albert Museum, South Kensington, S.W 7.

Medical Department (temporary premises)—Cleveland Hostel, 29 St. James's Square, S.W 1.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1833. The Act of 1899 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The cost of administration was estimated at £906,500 in 1907-8.

### THE BOARD.

** This list does not include those officers who have been lent to other Departments or who are on active service.

The Right Hon. Herbert A. L. Fisher, M.P., *President.*
The Lord President of the Council, the Principal Secretaries of State; the First Lord of the Treasury, and the Chancellor of the Exchequer.

## EXCHEQUER AND AUDIT DEPARTMENT, Victoria Embankment, E.C. 4.

The Comptroller and Auditor-General was appointed by Letters Patent under 29 & 30 Vict. c. 39 (1866), to place of the Comptroller-General of the Exchequer and the Commissioners for Auditing the Public Accounts, whose duties were transferred over to him. The main functions of the office are: (1) Exchequer:—To authorise issues from the Exchequer, not exceeding the amounts sanctioned by Parliament; to authorise borrowings in case of deficiency; to examine the daily Exchequer accounts of the Banks of England and Ireland, and the accounts of the Consolidated Fund. (2) Audit of Public Accounts:—To ascertain that money expended has been applied to the purpose for which the grant of Parliament was intended to provide, that the expenditure is supported by proof of payment, and generally to verify the correctness of the Accounts and to report to Parliament thereon. The net expenses of the Department were estimated at £64,400 in 1907-8.

## FRIENDLY SOCIETIES REGISTRY, Central Office, Bean Stanley Street, S.W.

A Registry was established in 1846 to satisfy the doubts of Friendly Societies, and to be by certain Acts of Friendly Societies. It did in two years, and the Registrar

† Foreign responsibility undertaken by the Chief Warden of Passports.

‡ Assistant Principal Clerk.

§ Assistant Principal Clerk.

* Senior Staff Officers.

† Foreign Mail Officers.

of Friendly Societies. By the Friendly Societies Act, 1896, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Act, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Solicitors Remission Acts, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, the National Insurance Act, and a great number of local and personal Acts. The Chief Registrar is also a member of the National Health Insurance Commissioners for England, Scotland, Ireland, and Wales, and of the National Health Insurance Joint Committee. Establishment expenses, 1917-18, £42,194.

*Chief Registrar*, G Stuart Roberton, £1,200 to £1,500
*Private Sec.*, G. H. Cooper
*Assist. Registrars*, T. Hall Hall, G. D. Barlow; John Fox ..... £600 to £800

*Supt. of Registers*, T. Jordan ..... £500 to £600
*Supt. of Returns and Statistics*, H. C. Cooper ..... £500 to £600
*Staff Clerks*, E. Bennett; G. H. Cooper, R. E. Martin, F. H. Minett ..... £500 to £600
*Assistant Staff Clerks*, J. P. Cliff ..... £400 to £500, F. F. Dowling ..... £400 to £500
*Office Keeper*, G. H. Taylor ..... £200 to £250

## GENERAL REGISTER OFFICE,
Somerset House, W.C.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1538, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1837, his work being subsequently increased by the above Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office for 1917-18 were estimated at £80,279 (Registry of Business Names, £10,250)

*Registrar-General*, Sir Bernard Mallet, K.C.B. ..£1,500

*Senior Clerks*, A. Bellingham; F. Finch, F. Bendle ..... £600 to £650
*Inspectors of Registration*, F. Page, £400 to £600, J. W. Keeling (and a vacancy) ..... £400 to £500
*Staff Clerks*, W. J. Mallocoull, £500 to £550; C. L. Thompson; C. H. Martin; W. C. D. Jones; E. A. Mind, W. F. Cook, T. A. Saunders, D. Ll. Evans, H. C. Eason ..... £500 to £600

## HOME OFFICE, Whitehall, S.W

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of the United Kingdom, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the *Under-Secretaryship* was made *Permanent*. On the separation of the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community and the exercise of the prerogative of mercy. The administrative expenses of the Home Office were estimated at £40,784, 1917-18.

## INLAND REVENUE, BOARD OF, Somerset House, W.C.

The appointment of Commissioners of Stamps dates from 1694 and of Commissioners of Taxes from 1798. By 4 and 5 WILL. IV. c. 20, a consolidated Board of Stamps and Taxes was established, and by 5 and 6 Vict. c. 1 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII. c. 48 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Receipts" consist of Death Duties, Stamps, Taxes, and Local Value Duties. The Right Hon. the Chancellor of the Exchequer is ex-officio Chairman of the Board constituted in 1849 as follows:

*Chairman*, Sir Edmund Kott-Bowen, K.C.B. ..... £3,000

## METEOROLOGICAL OFFICE,
South Kensington, S.W.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management and the control is now vested in a Director and Committee appointed by the Lords Commissioners of the Treasury. The work of the office includes the collection and discussion of meteorological observations from all parts, the maintenance of a number of stations for daily telegraphic reports upon which forecasts and gale warnings are based, and other work incidental thereto. The Kew Observatory at Richmond and the Observatory at Eskdalemuir are administered by this Office. The administrative expenses are met by Government grants, which amounted to £20,500 in 1917-18.

*Director and Chairman of Committee*, Sir Napier Shaw, LL.D., Sc.D., F.R.S.

*Marine Superintendent*, Capt. M. W. Campbell Hepworth, C.B., R.D., R.N.R.

*Supt. of Forecast Division*, R. G. K. Lempfert, M.A.

*Comdt. of Meteorological Section, R.E.*, Maj. Ernest Gold, R.E.

*Supt. of Statistics*, F. J. W. Whipple, M.A.

*Supt. of Instruments*, R. Corless, M.A.

*Sec. to Director and Clerk of Publications*, R. Corless, M.A. (*acting*).

*Chief Clerk*, T. Duncan Ball.

*1st Class Clerks*, W. Allingham ; F. J. Brodie ; H. Barnes ; R. Sargeant ; J. Shoesmith, H. L. R. Tarrant ; R. F. Wallace.

*Superintendents of Observatories*—Kew, C. Chree, Sc.D., F.R.S. ; Eskdale, A. Crichton Mitchell, B.Sc., F.R.S.E. ; Valencia, L. H. G. Dines, M.A.

*Dir of Experiments in Upper Air*, W. H. Dines, F.R.S.

*In charge of Branch Office at Farnborough*, R. A. W. Watt, B.Sc.

## METROPOLITAN ASYLUMS BOARD,
Office Victoria Embankment, E.C. 4.

Constituted under Orders of the Local Government Board to provide, for the Metropolis, hospital accommodation for infectious disease both acute and convalescent, hospital accommodation for certain classes of sick children, and institutions for mental defectives. Also to provide training ships, an ambulance service, land and river steamers for accommodation (National Insurance Acts) accommodation for sane epileptics, and casual wards. Particulars of fever hospitals are given on p. 928, of imbecile asylums on p. 928-9, and of training ships on p. 918.

The Board consists of 19 members, 16 being elected by the several metropolitan boards of guardians and 3 nominated by the Local Government Board.

*Solicitor*, Walter Moon.

*Director of Water Examination*, A. C. Houston, M.B., D.Sc.

*Sen. Bacteriological Assistant*, D. G. Sutherland, M.A., M.Sc., M.B.

## MINT, THE ROYAL, Tower Hill, E.

The Royal Mint, as now constituted, may be said to date from 1851, and the buildings from 1810, the latter being completed in that year at the cost of over £90,000. In 1870 the Coinage Act abolished the ancient post of "Master or Worker" as an office, and combined it with that of the Chancellor of the Exchequer. The first known Master or Warden of the Mint dates from Henry I. and the last Warden was Lord Maryborough (1851-52), the last Master being Professor Thomas Graham, who died in 1869. The estimated administrative expenses amount to £92,000 for 1917-18. Appropriations in aid, £27,000, leaving a net cost of £65.

*Master and Worker* The Chancellor of the Exchequer

*Deputy Master and Engraver of H.M. Seals*, John Westerman Cawston, C.B. ... ... ... ... £1,500

*Assistant Controllers*, James Martin; T. D. Moss; G. E. Pete; K. MacLennan
*Secretary to Contract Board*, C. W. W. Barrage.
*Section Directors*, J. B. Turnbull; E. Paisy, G. L. Barton; G. R. R. Loch Capt. W. G. Weir; J. R. Derbyshire; H. C. Wynne Edwards; Sir Richard Cooper, Bt., M.P.; P. Dale Bussell, C. E. Knight; Capt. E. C. Blight; F. R. Stapley; W. A. James; W. Grimshaw; J. Kelly, H. G. S. Tyler, L.C.C.
*Sub-Section Directors*, A. F. Crooks Harris; Gamble Wood; P. T. Cotton; A. Gibb; H. J. Masters; C. Cooke; Major G. G. Garrick; T. H. Clarke; E. P. Jones; W. T. L. Tough, S. Lloyd-Jones.
*Administrative Officers*, P. O Ashworth, S. B. Attenborough; Major D. H. Avery; Capt. H. W. Buckle; F. Carvill, H. M. Castle, J. C. Coles, W. J. Cobbing; Major R. B. Crundel; W. J. Cousins; W. Bruce; T. H. Fraser; J. G. Germain; Miss D. M. Griffith; C. E. Green; R. Hall Caine; Mrs. F. M. D. Henderson; J. Hehir; M. H. Jackson; A. T. Larter; R. W. Leverett; H. W. Luker; J. L. MacCarthy, W. G. Morris; W. Paine; F. H. Rogers; S. Rossiter; T. A. O. Sandford; W. G. Scrimgeour; J. Thomson; W. T. Trapper; M. M. Turnbull; R. L. Tyrell; C. A. Vernon, D. A. F. Vesey, A. W. Windsor; F. E. Wormley; Sir Denham Warmington; E. M. L. Younger.

SALVAGE AND STORES DEPARTMENT
*Controller*, Alexander Walker
*Salvage.*
*Assistant Controller*, Capt. A. U. Greer.
*Stores.*
*Assistant Controller*, Major the Hon. L. H. Cubitt.
*Assistants*, F. Gill; A. T. Lawrence; T. Rose; S. Sadler.
*Section Directors*, D. R. Fulton; M. Dobbs; M. R. R. Dunn; G. Wyllie.

*Sub-Section Directors*, D. Cockerell; W. R. Clemens; D. R. Roberts; H. W. Fitzsimons; Maj. Brown-Howell; J. M. Anderson; H. R. Royston; W. Clemence; W. Mahon; T. A. Mackenzie; Dr. J. Halliday; M. Dixon; J. Mace; W. T. Bowman; Capt. S. F. Corby; J. Bradley; P. J. Symmons; R. Warren Milnes; H. Woodroffe; Mrs. M. Dease, R.R.C.; A. Taylor; F. St. C. Farran; G. C. Vernon Lokyer.

MUNITIONS WORKS BOARD.

*Chairman*, J. Carmichael.
*Vice-Chairman*, G. W. Humphreys.
*Seager Berry*; Ernest Moreton; C. J. Madin; and W. J. Larke; Sir H. Frank; F. Baines (*attending when required*).
*Secretary*, R. J. Turner, Maj. E. E. McClintock, J. Eyeroft, R. A. Piercy.

LANDS.

*Director-General of Lands*, Sir Howard Frank, K.B.E.
*Deputy Controllers*, E. H. Coles; Maj. F. C. T. Tudsbery.
*Technical and Administrative Officers*, R. C. Agnew; Seager Berry; C. E. C. Browne; W. W. Buckland; Sir Evelyn Ellis; A. V. Frere; A. E. S. Guinness; W. Piercy; Capt. R. H. Stuinforth; F. G. Thomas, C.B.E.
*Assistants*, W. E. Clode, K.C.; C. R. V. Coutts; A. L. Dickinson; Sir Campbell Finlay, ; R. Fisher; F. W. Keen; W. R. Keen, R. H. Macaulay; L. Maltby; F. Merz; J. W. H. Pease; W. Russell, C.B.

Munitions Council, Group D

*Member of Council*, Maj.-Gen. the Hon. F. R. Bingham, C.B.
*Secretarial Officer* Lieut. G. Head.
*Personal Assistant*, Capt. W. Rhesa.

DRESS.

*Controller*, Brig.-Gen. A. C. Cardo, C.M.G.
*Assistant Controllers*, Col. H. de B. Miller, R.A.S.C., Col. G. H. S. Browne, C.B.
*Section Directors*, Lt.-Col. E. F. Cromwell, D.S.O. Maj. F. Eliot, Lt.-Col. H. W. Tedbetter, Maj. the Hon. R. H. Aitkenson.
*Sub-Section Directors*, Maj. H. H. Ioll, Maj. P. H. Wilson, R.A.S.C., Capt. J. T. Gurnan.
*Technical and Administrative Officers*, J. E. W. Headlam; Brig.-Gen. E. F. Nelson; Col. the Hon. T. F. Fremantle, Lt.-Col. C. J. Newton; Maj. E. T. Dixon; Maj. T. Donnelly, *Maj.* J. Carruthers; Maj. F. H. Cruickshank; Maj. G. Hebert, Maj. F. Howland; Capt. R. L. Baker; Capt. F. De Witt; Capt. C. A. F. Drummond; Capt. R. F. T. Folsambo; Capt. H. C. Gunn; Capt. J. F. Gurnan; Capt. C. H. Lay; Capt. H. C. L. Holden; Capt. C. B. Yule.

INSPECTION.

*Controller*, A. H. Collinson, M.I.C.E., C.M.G.
*Technical Assistant*, Maj.-Gen. A. P. Pearson, C.B., C.M.G., C.V.O.
*Personal Assistant* H. P. Murphy
*Assistant Controllers*, Maj. J. H. M. Greenly, Col. J. B. Shansfield, C.B.; A. R. Hadley; Col. G. H. S. Browne, C.B.
*Section Directors*, Lt.-Col. R. H. R. Beason; Lt.-Col. W. H. Webley Hope.
*Administrative Officers*, Lt.-Col M. B. Bicknell, Capt. W. D. Ross; Capt. W. R. Rifestone; E. W. Wild; A. W. Boston Mrs. M. Dease.

TANKS WARFARE DEPARTMENT.

*Director* (under consideration).
*Deputy Director*, Maj. H. Norton, R.A.S.C.
*Assistant Directors*, Capt. Ivor Ross, Maj. R. C. Dodgson, R.A.S.C. J. C. Wedgwood, D.S.O., M.P.
*Technical Officers*, Capt. R. H. R. Adams; Lt.-Col. O. F. Brotbam; Capt. Livens; Capt. Lister, Capt. Leaming, Lieut. Barter

CHEMICAL WARFARE DEPARTMENT.

*Controller*, Maj.-Gen. H. F. Thuillier, C.B., C.M.G.
*Assistant Controllers*, Lt.-Col. H. E. Winslow, D.S.O.; Lt.-Col. E. F. Harrison, O.B.E.; Maj. F. G. Ogilvie, C.B.
*Secretary to Chemical Warfare Committee*, Dr. C. H. Young.
*Supt. of Experimental Grounds*, Maj. Cargill.
*Commandant (Porton)*, Lt.-Col. Crossley, C.M.G.

INVENTIONS.

*Controller* Col. H. E. F. Goold-Adams, R.E., C.M.G.
*Assistant Controller*, Major W. H. D. Clark.
*Section Directors*, R. T. G. French; Dr. J. A. Harker, F.R.S.; W. G. Hood; Capt. A. V. Hill; E. C. Leary; R. C. Mills, M.B.E.; Lt.-Col. C. A. F. Ommaney, C.B.; A. S. A. Ormsby; Major H. Spencer
*Examiners*, A. F. Bavenshear; J. Bolton; A. Whitwell; *G. Gibbons*, *Dr. W. Martin*, *H. C. Hayward*; W. A. Taylor; D. Robinson; R. T. G. French; J. W. Barker; C. F. Dendy Marshall, G. F. Shuck; C. H. Crombie.
*Secretary to the Advisory Panel*, H. W. Dickinson.
*Military Establishment.*
*Section Director*, Lt.-Col. C. M. Knight, D.S.O.
*Assistant*, A. F. Grant.

Munitions Council, Group B

*Member of Council*, Sir John Hunter, K.B.E.
*Secretarial Officer*, D. A. Massanghton.
*Personal Assistant*, F. Collis.

IRON AND STEEL PRODUCTION

*Controller*, Col. W. Charles Wright.
*Assistant Controllers*, W. T. MacLellan; W. J. Jones.

FACTORY CONSTRUCTION.

*Director*, W. B. Shaw
*Assistant Directors*, W. T. Hannan; J. F. Syms.
*Technical and Administrative Officers*, John Cunningham, Lt.-Col. J. F. H. Carmichael, John Hall, M. G. Astley, W. Hoppe, J. Peech; C. H. Darlington; P. Hedley; F. L. MacLeod; Capt. R. Wallis-Jones; B. Walmsley; J. D. Shitt; S. Sutcliffe; F. W. Harbord, C.B.E.; *P. Merricks*; R. E. Palmer; T. McAlpine, Lieut. R. A. Lewa; P. G. Lewis; G. A. Nelson, Eng.-Capt. J. Richards; A. K. Reese; Ernest Craig, M.P. H. B. Jacks, Dr. Hatch.

Munitions Council, Group M.

*Member of Council*, Sir Ernest Moir
*Secretarial Officer*, H. T. Holmes.
*Personal Assistants*, J. C. Gray, F. Wood.

RAW MATERIALS (NON-FERROUS) DEPARTMENT
*Controller*, Sir L. W. Llewellyn, K.B.E.
*Assistant Controllers*, Sir J. Eaglesome; C. Budd, E. E. Dendy
*Technical Advisers*, F. W. Harbord, C.B.E., W. B. Lyneghh.
*Section Directors*, Capt. W. Broadbridge; Lieut.-Col. A. J. Foster; R. Rinckor; W. A. Tennant; R. E. Wenham; C. J. Hill; Lieut. C. Home McCall; Capt. C. B. Williams; G. Jewell.
*Sub-Section Directors*, S. S. Moore-Ede, H. C. Webster; H. B. Jenkins; T. R. Phillips; W. L. Watson, G. Pritchard, Lieut. A. Hutt, H. B. G. Cobbe; R. H. Calvert; C. M. Buckley

RAILWAY MATERIALS DEPARTMENT.

*Director*, E. J. Allen.
*Assistant Director*, W. H. Palmer
*Section Directors*, R. J. Frewen, R. F. Cook; J. S. Ferguson, Lieut.-Col. M. F. Kitton; T. E. Davies.
*Sub-Section Directors*, G. Macalpine; C. H. Jerms; F. Sumner Smith; C. F. Goodwin, O.B.E.

OPTICAL MUNITIONS, GLASSWARE AND POTASH PRODUCTION DEPARTMENT

*Controller*, A. S. Eaglesmith, C.B.E.
*Scientific Advisers*, Sir H. B. Jackson, K.B.E., F.R.S.; Prof. F. J. Cloutbie; Kenneth Chance, T.D.
*Section Directors*, E. Baily, R. S. Hiram; T. Knowles; H. W. Monroe; S. W. Morrison, B. B. Rensford; F. C. Danzati.
*Sub-Section Directors*, A. E. Blok; F. F. S. Bryson; Lieut. C. Johnson, P. W. Molboisgall, R. Haigh; A. J. Stevens.

OVERSEAS TRANSPORT DEPARTMENT

*Director*, R. Burton Chadwick.
*Assistant Director*, E. W. Sharples.
*Section Directors*, Vice-Adm. C. E. Anson, M.V.O.; C. W. Murray; L. Symonds; G. A. Tyson.
*Sub-Section Directors*, C. Dodson; T. C. Hancock.

FORWARDING DEPARTMENT

*Director*, W. T. Potts.
*Sub-Section Directors*, R. W. Cross; H. R. Spratt.

INLAND TRANSPORT DEPARTMENT.

*Director*, Howard Williams.
*Section Director*, F. C. A. Coventry.

*Sub-Section Directors*, S. R. Coventry; R. L. Ferguson; H. G. Humphreys; J. M. Kirkwood; G. S. Rider, W. H. Sherlock; F. Taylor; H. Woodroffe; F. J. H. Sayer.

MINERAL RESOURCES DEVELOPMENT DEPARTMENT.

*Controller*, Sir Lionel Phillips, Bart.
*Section Directors*, W. T. Anderson; E. H. Clifford; J. W. Stubbs; Hon. Lionel Holland; Capt. L. Cockerell.
*Sub-Section Directors*, M. F. Wells; Lieut. C. F. Skinner, Lieut. V. E. Peel, E. Williams; H. F. Collins; Lieut. Arthur Russell, J. A. Cunningham, J. W. Astley.

GOVERNMENT ROLLING MILLS.

*Director*, P. M. Stewart, A.R.

## Munitions Council, Group X.

*Member of Council*, Sir Keith Price.
*Secretarial Officer*, G. C. Smallwood.

EXPLOSIVES SUPPLY.

*Director-General*, Rt. Hon. Lord Moulton, G.B.E., K.C.B.
*Controller*, Maj. A. Corbett.
*Deputy Controller*, Lt.-Col. H. W. Kempster, C.M.G.
*Chief Adviser, with rank of Controller*, R. E. Quinan.
*Section Directors*, R. A. Alston, H. T. Hutchinson, R. R. Rowland; F. L. Halford, C. F. Rosebotham; Prof. J. G. Lawn, Col. Sir F. L. Nathan, A. S. Parsons; Lt.-Col. U. R. Phipps, C.M.G.; P. C. Pope, R. Unwin, Brig.-Gen. W. Clare Unwin, C.B., R.E.D.
*Sub-Section Directors*, R. K. Brandt; Col. W. A. Churchman, W. Gordon Brown, C. J. Ford, H. R. J. Bunstall; S. Cox, Lt.-Col. Sir Wm. Cross, Capt. C. C. Frye, H. W. Fane, Dr. R. C. Farmer, C. M. Turner; C. J. Peters; J. P. Hake, A. B. Jamieson, H. S. Hingard, Lieut. A. Ryecroft.
*Technical and Administrative Officers*, W. J. Alcock, M. P. Appleby, H. Archbell, H. J. Bidley, A. E. Bulkeley, F. Burrick; W. A. C. Bates, A. Beadle, N. C. Bestlestone, D. Black; W. M. Blair, R. Blake; F. P. R. Blennerhassett; Miss B. Wade Browne, Dr. H. T. Calvert; F. H. Carrie; F. Clemson, J. H. M. Cobbin; E. M. Collins, Dr. H. Colman; C. E. Conke, E. M. Corbett; P. Cowdcroy, E. Cruttwell; D. G. Dell, Dr. E. C. Edgar, and Lieut. A. C. Field, W. E. R. Fry, A. Fyfe, T. Gardner; A. Gavey, W. Dole Gibb; H. M. Gibbs, J. W. Gordon; Maj. M. C. Haines; Capt. Douglas Hall; H. Hall, H. J. Hall; Lt.-Col. J. A. Hall, A. E. C. Hammond; Miss H. M. Harrison; E. P. Hawksley; Maj. J. T. Hewitt, Capt. B. S. Hilton; J. R. Howat; L. P. Hughes; Capt. N. L. Hunter, F. Brook-Jackson; A. Jacques, N. Kitts; F. E. Leighton, A. K. Leitch, S. L. Lovy; Lieut. J. A. Lewis, F. H. Lightwood, Capt. H. H. R. Lund; R. F. McCall, W. Macnab, P. Nasero, G. Moore, H. E. Marlin; H. W. T. Mason; W. H. Mead, H. G. Milsom, R. H. Morris, L. Orange, Lt.-Col. W. J. Paul; C. R. Pinner, H. Porter, S. E. Price; R. A. Punter, A. Rae, W. H. Rattenbury; E. P. Reilly, C. Robertson, G. T. Robertson, A. M. Robson; S. R. Russell, J. Van Ruymbeke; F. H. Smith, Dr. F. K. Spielman, Prof. B. D. Steele, F. C. Swallow; P. Talnah; A. G. Taylor; J. F. H. Templer, F. G. Thomas, Maj. G. M. Thompson, T. Todd, A. E. Wallis; R. Walter, Dr. H. M. Watts; Prof. E. T. M. Wilsmore, Lt.-Col. N. Wilson, Maj. E. J. Worrall, C.B.E.

MINERAL OIL.

*Director*, Lt.-Col. Sir A. C. Churchman, Bart.
*Section Directors*, T. E. Winall, E. Houghton Fry.
*Administrative Officers*, H. J. Cullum, C. Lambourne, W. G. Thomas, W. C. Waugh, J. K. Pickup.

TRENCH WARFARE CHEMICAL SUPPLIES.

*Controller*, E. V. Haigh.
*Section Director*, Capt. H. Moreland.

## Munitions Council, Group P.

*Member of Council*, Sir James Stevenson, Bart.
*Secretarial Officer*, F. G. L. Berkeley.
*Personal Assistant*, T. L. Matthews.

GUN AMMUNITION MANUFACTURE.

*Controller*, C. H. Stewart, C.B.E.
*Deputy Controller*, G. Humphreys.
*Section Directors*, E. B. Maitland; Capt. A. F. Hood; J. Good; O. B. Binns; S. D. Farwell; S. Simons.
*Sub-Section Directors*, C. J. S. Orton; H. L. Critchley; W. A. Stewart; Lieut. J. H. Brown.

GUN AMMUNITION FILLING.

*Controller*, Lt.-Col. L. C. P. Mimaza, C.M.G.
*Deputy Controller*, J. B. Strain.
*Section Directors*, Lt.-Col. J. V. Ramsden, D.S.O.; C. B. Duggan; Lt.-Col. H. Lakin, C.M.G.; Col. Sir H. W. Barlow, Bart., C.B.; Major H. G. F. Hay; Dr. T. Martin Lowry, F.R.S.
*Administrative Officers*, S. G. Anderson, H. E. Clark, C.B.E.; Capt. C. L. Counsher, W. Eve; C. M. Jenkin Jones, A. F. Joseph, Col. C. B. King, Capt. C. H. Lumley, A. Oglethorpe, R. H. Pitts, Major E. R. Pratt, M.C., Capt. C. D. Rowley, Lt.-Col. A. S. Tyndale-Biscoe, Lt. J. Williams, Capt. H. A. Wootton.

TEMPORARY WARFARE SUPPLY.

*Controller*, E. V. Haigh.
*Assistant Controller*, Capt. P. A. Cooper.
*Section Directors*, Capt. H. Moreland; J. Mackintosh; F. B. Sanderson; Capt. J. A. Lonning.
*Sub-Section Directors*, W. A. Tanner, Lieut. L. G. Shadbolt, *M. S. McKay, T. H. Cleeston, F. J. E.* Beaver, H. Stretch; Capt. W. Ellison; Capt. A. P. Stockings; G. Leevers.
*Administrative Officers*, J. S. Austen; E. T. Bailey; H. J. Carlisle, Capt. J. W. Bain; Major G. Elliot; Capt. W. V. Foulis, Lieut. E. Goodwin, M. Ramsey; G. V. Fowler; A. G. Hammard, E. C. Jeffreys, G. W. Leatherwell; R. V. Holmsley; A. Jackson; G. W. Ingleby, W. A. C. Henderson, H. T. Phillips; M. E. Noble, E. W. Park, Capt. Sir J. Ramsden, W. H. E. Roberts; H. A. Shelley, H. W. Standen; S. C. Stone, J. Sutcliffe; H. J. Talbot, G. P. Wallis.

TEMPORARY SUPPLIES.

*Director*, D. Bain.
*Deputy Director* J. M. Llewellyn.
*Section Directors*, A. J. Harding, J. Heaps, L. Massey; A. A. McDougall; G. W. Woodcroft.
*Sub-Section Directors*, R. Humphreys, F. E. Brown.
*Administrative Officers*, T. W. McDonald; R. C. Olver, P. H. Waldeck; P. M. Bradish.

AREA ORGANISATION.

*Director*, Hon. H. D. McLaren, M.P.
*Deputy Director*, E. F. Lyall, I.C.S.
*Section Directors*, A. H. Burnett; T. E. Hart-Smith; H. M. Hutchinson; A. Newlands; Leonard Ward.

SMALL ARMS AMMUNITION.

*Controller*, Alexander Buckham.
*Deputy Controller*, L. Gordon.
*Chemical Adviser*, Prof. Samuel Smiles.
*Section Directors*, Lieut. T. Twist, Major J. E. Dixon.
*Sub-Section Directors*, Lieut. J. F. H. Carter; Capt. J. K. Hurley.
*Administrative Officers*, C. W. Dixon; W. J. Hutchinson.

GARNER.

*Director*, M. F. Ryan.
*Deputy Director*, K. W. Smith.
*Section Directors*, Lieut. F. C. Bown, R. Hudson; W. Jones.

CENTRAL CHEMISTS HOUSE.

*Director*, Capt. R. C. Kelly.
*Deputy Director*, Capt. H. L. Cabuche.
*Section Director*, Lt.-Col. Selby Biggs.
*Sub-section Director*, M. McMahon.
*Administrative Officers*, Lieut. C. H. Drayne; H. S. Land; Lieut. S. Jay; Lieut. W. Cooper.

## Munitions Council, Group G.

*Member of Council*, Sir Glynn West.
*Secretariat Officer*, H. P. Boland.
*Personal Assistants*, Maj. C. S. Pouler, M.V.O.; Capt. M. B. U. Dower; G. F. Davidson.
*Technical Adviser*, Lt.-Col. W. C. Symon, C.M.G.

GUN MANUFACTURE.

*Controller*, J. B. Maclean.
*Assistant Controllers*, Lt.-Col. H. Ramsden; V. B. Stewart.
*Section Directors*, G. D. Drewitt; W. Wilkins; A. Hall Brown, M. S. Moore.

GUN FORGINGS.

*Director*, D. M. Anderson.
*Assistant Director*, Capt. D. K. Grant.
*Sub-Section Directors*, Commander Smithson; T. H. Peacock.

TUBULAR GUNS AND HOWITZERS.

*Controller*, R. V. Haigh.
*Sub-Section Directors*, Capt. W. Hilton; Capt. A. P. Stockings; G. Leevers; T. H. Cleeston.

SMALL ARMS AND MUNITIONS DEPT.
*Controller*, Alexander Tod Ogilvie.
*Deputy Controller*, Lt.-Col. E. C. Hahn.
*Section Directors*, M. T. Dunne; Capt. G. Westover; Admiral Tufnell.
*Administrative Officers*, A. T. Randolph; Lieut. D. Lees; W. H. Partington; F. W. Bennett; R. H. McGill; E. Wake.

GUN STATION.
*Director*, W. R. Frith.
*Section Directors*, Martin Hall; G. W. A. Simpson; R. Jervois.

Munitions Council, Group E.
*Member of Council*, Sir Arthur Duckham, K.C.B.
*Secretarial Officer*, O. C. Allen.
*Personal Assistant*, J. Howard Smith.

AERONAUTICAL SERVICES.
*Controller*, Sir Wm. Weir
*Assistant Controllers*, Lt.-Col. W. Alexander, R.E.C.; Lt.-Col. J. Weir; Lt.-Col. R. Bagnall-Wild (*Dir of Aeronautical Inspection, ranking as Asst. Controller*).
*Deputy Assistant Comptroller*, W. Mc. C. Cameron.
*Section Directors*, Maj. L. B. Dennis, *Lieut.* R. C. Bartley; Capt. R. H. Brand; Commr. C. R. J. Randall; Maj. A. Rubin; Capt. G. W. Williamson, Capt. H. W. O. Outram; Capt. R. H. Verney; Lieut. R. J. Stevenson, R.N.
*Technical and Administrative Officers*, Capt. S. Clark, Capt. D. B. Saunders; Lieut. W. A. C. Sandford Thompson, Maj. A. Gray; H. Glazer; W. J. Grodzicki Lieut. L. J. Kilmoayer, R.N.; Capt. A. H. W. Skitt, Capt. J. S. Nicholson; Capt. M. O. Darby; Capt. T. G. Leith; Lieut. C. L. Hardy; Capt. D. H. Kennedy; L. S. Fraser; W. M. Hutton; J. W. Gibson; H. Fowler; J. H. Jones; C. N. Knight, M. H. Jackson, A. E. Ford, Capt. R. L. Bright; F. E. Stapley; J. M. Radcliffe.

MECHANICAL WARFARE.
*Controller*, V.-Adm. Sir A. G. H. W. Moore, K.C.B., C.V.O.
*Personal Assistant*, Maj. the Duke of Westminster, C.V.O., D.S.O.
*Assistant Controller*, F. W. Duckham.
*Technical Advisers*, Sir E. H. T. D'Eyncourt, K.C.B.; Mon. Sir Charles A. Parsons, K.C.B.
*Section Directors*, Lieut. F. B. Shaw R.N.V.R.; W. H. Simpson; Maj. W. G. Wilson, C.M.G.; G. W. Watson.
*Administrative Officers*, Lieut. F. J. Rackham; F. Sheen; B. G. Thomas; E. C. Whitby; S. G. Robinson; J. A. Boyd, Commr. McGrath; Lieut. G. Greenwell; W. E. Leech; Capt. A. C. Russell; A. P. Griffiths; Lieut. A. E. Goldie; A. M. Pooley; Lieut. R. Brandon.

MECHANICAL WARFARE (OVERSEAS and Allies).
*Commissioners*, Lt.-Col. A. G. Stern, C.M.G.; Lieut. P. Anderson.

AGRICULTURAL MACHINERY
*Director*, H. C. B. Underdown.
*Section Directors*, D. Citroen; P. L. D. Perry, G. F. Monkhouse.
*Sub-Section Directors*, H. H. Crockford T. H. Woollen.
*Administrative Officers*, A. Hall, C. F. Giller.

MACHINE TOOLS.
*Controller*, Sir A. Herbert, K.B.E.
*Assistant Controller*, E. M. Hilts.
*Section Directors*, P. R. Bagnall, T. Evan Davies, J. D. Steven, J. Varley; P. V. Vernon.
*Chief Technical and Administrative Officers*, A. M. Rowland; L. G. Whitehouse; W. A. Ashworth; P. Burdale; H. T. Junker; W. T. Day; T. P. Lake; V. Garlands, Capt. H. G. Fowler
*Sub to Machine Tool Advisory Committee*, L. G. Wykes.

MECHANICAL TRANSPORT.
*Director*, Lt.-Col. C. V. Holbrook.
*Technical Adviser*, Brig.-Gen. Sir H. C. L. Holden, K.C.B., V.D.S.
*Assistant Directors*, Maj. W. L. Wanklyn; Maj. A. C. Benson; Maj. A. H. Haddart.

FUELS, ENGINE.
*Controller* Percy Martin.

MUNITIONS INVENTIONS SECTION.
*Director*, A. Grilling.
*Technical Adviser*, A. M. Hermann.

Munitions Council, Group K.
*Members of Council*, Sir Stephenson Kent, K.B.E.; Maj. [illegible] W. Hills, M.P. (retired).
*Secretarial Officer*, F. C. Mears.

LABOUR REQUIREMENTS DEPARTMENT
*Controller* (ranking as *Asst. Sec.*), U. Wall.
*Private Secretary*, J. H. Phillips.
*Dep. Controller* (ranking as *Dep. Asst. Sec.*), H. St. Gerrod.
*Chief Adviser*, Sir Thomas Munro.
*Dir., Women's Welfare*, Mrs. H. J. Tennant, C.H.
*Vice-Chairman & Special Arbitration Tribunal*, J. C. Smith.
*Chairman, Central Building Board*, A. H. Marshall, M.P.
*Section Directors*, R. H. Kenilyside; C. H. & Campbell; C. S. Hurst, W. Payne; Dr. Dollis.
*Sub-Section Directors*, M. Baird; H. O. Gale; J. Murray; H. M. Macdonald; W. Nance Williams; H. Davies; J. C. Stobart; Mrs. Hamer-White; Dr. W. J. O'Donovan; W. S. Dixon; Miss Hadow; F. H. Shepherd; R. A. Bray, Sir R. W. Carlyle, K.C.B.E., C.I.E.; W. E. Philp; E. Robertson.

LABOUR SUPPLY DEPARTMENT.
*Controller* (under consideration).
*Dep. Controllers*, T. M. Taylor, C.B.E.; J. A. K. Barlow
*Section Directors*, W. J. Lark, C.B.E.; A. F. Burke; J. Curtis, C.B.E., Capt. C. Asquith; Capt. J. W. A. Avery; W. Monnet; B. Newbold; G. P. Langton.
*Sub-Section Directors*, A. Hanbury; Prof. H. C. Meredith; T. Simpson; J. G. Gunning; R. H. Morgan; W. Menzies; W. T. H. Walsh; J. L. Hall; J. L. Mather; F. R. Lovell; Capt. A. R. Barkwick; Capt. C. B. Joyner; C. Bailey, A. R. Boone; R. G. Underwood.
*Directorate of Intelligence and Record Section*, J. Charters.
*Belgian Labour*, Graham P. Spicer
*Secretary to Parliamentary Executive Committee*, W. Allard.

Munitions Council, Group A.
*Members of Council*, Sir Frederick Black, K.C.B.; Sir Charles Ellis, K.C.B. (retired).
*Hon. Member of Council*, Maj.-Gen. Sir Wm. Foss, K.C.B., *Master-General of Ordnance*.
*Adviser*, G. M. Booth.

Imperial Munitions Board, Canada.
*Representative*, Hon. R. H. Brand, C.M.G.
*Administrative Officers*, G. E. Chadwyck-Healey; Sir Cecil Graham; F. L. St. George; Donald Currie.

## MUSEUM, THE BRITISH,
Bloomsbury, W.C.

The British Museum may be said to date from 1753, when Parliament granted the sum of £20,000 to purchase the collection of books, &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1824 and 1852, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Rules, &c., affecting the public, dates and hours of opening, &c., will be found among Places of Interest. The administrative expenses of the British Museum were estimated at £—— and (including Natural History Museum) in 1913-14, and were paid by a vote under "Education, Science, and Art." Chap. IV of the Civil Service Reference.

*Director and Principal Librarian*, Sir Frederic George Kenyon, G.C.B., D.Lit., LL.D. - - - - £—
*Assistant Secretary*, A. B. Dryhurst £— to £—
*Clerk in Charge of Accounts*, C. P. Cooke £— to £—
*Assistant, 1st Class*, R. B. Flobbins, B.A. £— to £—
*Minor Staff Officers*, J. Knowles; J. F. Isaac £— to £—
*Keeper of Printed Books*, George F. Barwick, B.A. £— to £—
*Assistant Keepers*, A. W. Pollard, M.A.; W. Barclay Squire, M.A., F.S.A.; Robert F. Sharp, B.A. £— to £—
*Superintendent of Reading Room*, Robert F. Sharp, B.A.
*Assistants, 1st Class*, J. A. J. de Villiers; L. H. E. Taylor; R. A. Streatfeild, B.A.; F. D. Sladen, B.A.; H. Symons, B.A.; P. Wilson, M.A.; W. A. Meredith, B.A.; L. C. Wharton, B.A.; G. D. R. Tranter, B.A.; H. Thomas, Litt.D.; A. J. K. Bullis, B.A.; J. C. C. Schuckburgh, M.A.; F. D. W. Hoey, M.A. £— to £—
*Assistants, 2nd Class*, A. Trotter; Johnson, B.A.; A. L. Kidd, B.A.; F. F. Simons, B.A.; R. W. Lowndes; B.A.; M. J. Dobie, B.A.; A. C. Bartlett, B.A.; C. C. Eagleton, B.A.; F. C. [illegible]

*Keeper of Manuscripts and Egerton Librarian*, J. P Gilson, M.A. ..... £700 to £800
*Assistant Keeper of MSS.*, J. A. Herbert, M.A. ..... £400 to £450

*Assistants, 1st Class*, A. Hughes-Hughes; D. T. Baird Wood, M.A.; H. Idris Bell, M.A.; R. E. W. Flower, M.A. ..... £300 to £450
*Assistants, and Class*, A. C. Stewart, M.A.; G. T. Hales, M.A., B.Sc.; H. J. M. Milne, M.A.; E. G. Miller, M.A.; R. H. W. Meyerstein, M.A. ..... £200 to £450
*Keeper of Oriental Printed Books and MSS.*, Lionel D. Barnett, LITT.D. ..... £700 to £800
*Assistants, 1st Class*, Lionel Giles, M.A.; Edward Edwards, M.A. ..... £300 to £450
*Assistants, and Class*, A. S. Fulton, M.A.; J. Lerwen ..... £200 to £450
*Keeper of Prints and Drawings*, Campbell Dodgson, M.A. ..... £700 to £800
*Asstt. do.* (in charge of the Sub-Dept. of Oriental Prints, &c.), B. Laurence Binyon, B.A. ..... £400 to £450
*Assistants, 1st Class*, A. M. Hind, M.A.; R. Davidson Ross, C.B., sec.R. ..... £300 to £450
*Assistants, and Class*, A. E. Popham, B.A.; A. D. Waley, M.A.; H. M. Hake, M.A. ..... £200 to £450
*Keeper of Egyptian and Assyrian Antiquities*, Ernest A. Wallis Budge, LITT.D., F.S.A. ..... £700 to £800
*Assistant Keeper*, L. W. King, M.A., LITT.D. ..... £400 to £450
*Assistant, 1st Class*, H. R. H. Hall, M.A., F.S.A. ..... £300 to £450
*Assistant and Class*, A. W. A. Leaper, B.A. ..... £200 to £450
*Keeper of Greek and Roman Antiquities*, Arthur H. Smith, M.A., F.S.A. ..... £700 to £800
*Assistant Keeper*, H. B. Walters, M.A., F.S.A. ..... £400 to £450
*Assistant, 1st Class*, R. J. Forsyth, M.A., ..... £300 to £450; *and Class*, F. N. Pryce, M.A. ..... £200 to £450
*Keeper of British and Mediæval Antiquities and Ethnography*, Sir Hercules Read, LL.D., F.S.A., F.R.S.A. ..... £700 to £800
*Assistant do.*, O. M. Dalton, M.A. F.S.A. ..... £400 to £450
*Assistants, 1st Class*, R. L. Hobson, M.A., R. A. Smith, B.A., F.S.A. T. A. Joyce, M.A. ..... £300 to £450
*Assistants and Class*, H. J. Braunholtz, B.A.; A. B. Tarnocky, M.A. ..... £200 to £450
*Keeper of Coins & Medals*, G. F. Hill, F.S.A. ..... £700 to £800
*Assistant, 1st Class*, John Allan, M.A. ..... £300 to £450
*Assistants, and Class*, G. C. Brooke, B.A. Harold Mattingly M.A.; E. S. G. Robinson, B.A. ..... £200 to £450
*Solicitors*, Messrs. Warren, 5 Bedford Square.

## MUSEUM, THE NATURAL HISTORY, Cromwell Road, S.W

The Natural History Collections in the British Museum were removed to South Kensington and rearranged there in 1880–81, the new museum being opened to the public in 1881. The hours of opening &c., will be found under "Places of Interest." The administrative expenses were estimated at £44,464 in 1917–18.
*Director* Sir Lazarus Fletcher, LL.D., F.R.S. ..... £1,200
*Assistant Secretary*, Charles E. Fagan, LL.D. ..... £700
*Assistant, 1st Class*, Basil H. Soulsby, M.A., L.R.A.M. ..... £300 to £450
*Clerk* W. H. R. Holl; W. J. Anderson ..... £200 to £450
*Assistant, 1st Class (Library)*, B. B. Woodward ..... £300
*Keeper of Zoology*, Dr. Sidney F. Harmer, M.A., F.R.S. ..... £700 to £800
*Assistant Keeper* W. R. Ogilvie-Grant ..... £300 to £450
*Assistants, 1st Class*, George A. Boulenger F.R.S., Oldfield Thomas, F.R.S.; Fras. Jeffrey Bell, M.A.; Randolph Kirkpatrick; Dr. W. T. Calman; C. F. Rogers, M.A., F.R.S. W. P. Pycraft, A. S. Hirst, J. G. Dollman, M.A. ..... £300 to £450
*Assistants, and Class*, G. C. Robson, B.A., C. Court Trouit; H. A. Baylis, B.A.; A. K. Tolson ..... £200 to £450
*Keeper of Entomology*, Dr. C. J. Gahan, M.A. ..... £700 to £800
*Assistants, 1st Class*, Sir George F. Hampson, Bart.; Ernest E. Austen; J. Hartley Durrant; G. J. Arrow ..... £300 to £450
*Assistants, and Class*, F. W. Edwards, M.A.; K. G. Blair, B.Sc.; N. D. Riley; F. Laing, M.A., B.Sc. ..... £200 to £450
*Keeper of Geology*, Dr. A. S. Woodward, F.R.S. ..... £700 to £800
*Assistant do.*, Dr. F. A. Bather, F.R.S. ..... £400 to £450
*Assistants, 1st Class*, R. B. Newton; Dr. C. W. Andrews, F.R.S.; W. D. Lang, B.A. ..... £300 to £450
*Assistant, and Class*, W. N. Edwards, B.A. ..... £200 to £450
*Keeper of Mineralogy*, Dr. George T. Prior, M.A., F.R.S. ..... £700 to £800
*Assistants, 1st Class*, L. J. Spencer, M.A.; Dr. G. F. H. Smith, B.A. ..... £300 to £450
*Assistant, and Class*, W. Campbell Smith, B.A. ..... £200 to £450
*Keeper of Botany*, Dr. A. B. Rendle, F.R.S. ..... £700 to £800
*Assistants, 1st Class*, A. Gepp, M.A.; M. G. Baker ..... £300 to £450
*Assistants, and Class*, H. F. Wernham, B.A., B.SC.; J. Ramsbottom, B.A., A. J. Wilmott, B.A. ..... £200 to £450

## MUSEUM, THE VICTORIA AND ALBERT, South Kensington, S.W

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1851 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,000, together with other specimens purchased for the various Schools of Design since they dispersed among the various Schools. Additions have since been made by gift and bequest. The older parts of the building were erected between 1856 and 1865, the new buildings were completed in 1909. The administrative expenses were estimated at £30,284 in 1917–18, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally. The administrative expenses were estimated at £5,099 in 1917–18.
*Director and Secretary*, Sir Cecil H. Smith, C.V.O., LL.D. ..... £1,200 to £1,500

Subordinate
*Secretary to the Advisory Council*, H.A. Kennedy ..... £500 to £600
*Museum Superintendent* R. Hart (with allowance £150) ..... £400 to £450
*Minor Staff Clerks*, A. V. Fullarton; *J. French ..... £300 to £450

Department of Architecture and Sculpture.
*Assistant Keeper*, *H.R. D. Maclagan, B.A. ..... £400 to £450
*Assistant, and Class*, A. P. Bedford ..... £300 to £450

Department of Ceramics.
*Assistant Keepers*, *C. H. Wylde, B.A.; B. Rackham, M.A. ..... £400 to £450
*Technical Assistant*, F. G. M. Beaumont ..... £300
Department of Engraving, Illustration, and Design, and of Painting.
*Assistant Keeper*, *W. Hardie, M.A. ..... £400 to £450
*Assistants, and Class*, *B. S. Long, B.A.; F. W. Sholto, B.A.; A. K. Sabin ..... £300 to £450
*Technical Assistant*, E. A. Reid ..... £300 to £450

Library
*Keeper*, *G. H. Palmer, B.A. ..... £400 to £450
*Assistant Keepers*, T. O. Grove, A. Van de Put ..... £300 to £450
*Assistant, 1st Class*, H. C. Andrews, M.A. ..... £300 to £450

Department of Metalwork.
*Keeper*, W. W. Watts, F.S.A. ..... £400 to £450
*Assistant Keeper* H. P. Mitchell ..... £300 to £450
*Assistants, 1st Class*, A. J. Koop, B.A.; *C. T. P. Bailey ..... £300 to £450

Department of Textiles.
*Keeper* A. F. Kendrick, B.A. ..... £400 to £450
*Assistant Keeper*, P. G. Trendell ..... £300 to £450
*Technical Assistant*, A. D. H. Smith, B.A. ..... £200 to £300

Department of Woodwork
*Keeper* *E. F. Strange ..... £400 to £450
*Assistants, 1st Class*, O. Brackett, H. Clifford-Smith, B.A., F.S.A. ..... £300 to £450

Indian Section
*Assistant Keeper*, C. H. Clarke ..... £400 to £450
*Assistant, 1st Class*, A. J. D. Campbell ..... £300 to £450

Department of Circulation
*Secretary* J. Bailey ..... £400
*Assistant Keeper*, R. F. Martin ..... £300 to £450
*Assistant, 1st Class*, K. W. Dennys ..... £300 to £450
*Assistant, and Class*, A. E. J. Torrens ..... £200 to £450

Bethnal Green Museum
*Assistant Keeper*, T. A. Lehfeldt ..... £300 to £450

## MUSEUM, THE LONDON, Lancaster House, St. James's, S.W

The London Museum was instituted on the lines of the Carnavalet at Paris, for the conservation of the antiquities, &c., of London. The Collection was

* These Officers have either been lent to other Departments or are on Active Service.

ordinarily housed in Lansdowne House, and was re-opened in 1900 at Lancaster House. The cost of administration in 1901-2 was estimated at £9,500.

*Keeper and Secretary*, Sir C F Laking, Bart., C.B., M.V.O., F.S.A.
*Asst. Secretary*, F A. Hannah Oates, F.S.A.
*Inspector of Examinations*, G P Lawrence.

### NATIONAL LIBRARY OF WALES,
Aberystwyth.

Founded by Royal Charter 1907, and maintained by annual grant from the Treasury. Contains MSS. and printed books in Welsh and other Celtic languages. One of the six libraries entitled to certain privileges under Copyright Act. Open daily as to 9 a.m. as to 2.
*Librarian*, John Ballinger, M.A.

### NATIONAL MUSEUM OF WALES, Cardiff.

*President*, Rt. Hon. Lord Treowen.
*Director*, W Evans Hoyle, M.Sc.

### NATIONAL DEBT OFFICE,
29 Old Jewry, E.C.

The National Debt Commissioners were appointed under 26 Geo. III., c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the extinction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote (38-39 Vic. c. 96), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker the Chancellor of the Exchequer the Master of the Rolls, the Lord Chief Justice the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £72,327 in 1901-2.

*Comptroller-General*, Sir W G Turpin, K.C.B. £2,500
*Private Secretary*, D. McKibbin ..... £300
*Assistant Comptroller*, G F Ansell ..£800 to £1,000
*Actuary*, H. Weatherall, F.I.A. ..... £1,000
*Chief Clerk*, C. von Bern ..... £800
*Principal Clerks*, H. Manwaring; T Gowland, £800 to £900; H. Weatherall, F.I.A. ....£900 to £950
*Assistant do.*, R. R. Kennedy, J. J. Broe; A. L. Jocelin; E. S. Jones, F.I.A. (*daily*); C. B. Hobbins (*temp.*); G Rackham (*daily*). ..... £300 to £450
*Bankers*, Messrs. Mullens, Marshall & Co. ..... £1,500

### NATIONAL GALLERY,
Trafalgar Square, S.W.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1869, 1876, 1884 and 1901. The cost of administration in 1901-2 was estimated at £22,400.

*Director*, Charles John Holmes ..... £1,000
*Keeper and Secretary*, C. H. Collins Baker £600 to £750
*Chief Clerk and Asst. Sec.*, G E. Ambrose.

### NATIONAL GALLERY, BRITISH ART
(The Tate Gallery), Millbank, S.W

The National Gallery of British Art, usually known as "The Tate Gallery" was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the pictures and sculpture collected. The Turner Wing, built at the expense of the late Sir Joseph Duveen, was opened to the public in 1910.

*Director*, Charles Aitkin ..... £700 to £800
*Acting Asst. Keeper and Clerk*, James B. Manson ..... £150 to £300

### NATIONAL HEALTH INSURANCE.

The administration of National Health Insurance is entrusted to a Joint Committee and four Commissioners one each for England, Wales, Scotland, and Ireland. The amount required to pay the Salaries and Expenses of the Commission and for sundry Charges, Pensions and Gratuities in 1910-11 was £4,687,230, the Salaries in 1907-8 totalling £282,371.

#### THE JOINT COMMITTEE.

*Offices*—Buckingham Gate, S.W. 1.
*Chairman*, Sir Edgar Cornwall, M.P.
*Vice-Chairman*, Sir R. L. Morant, K.C.B.
*Members*, J. Smith Whitaker, M.P., C.C. Sir J. Barnshaw, K.C.B.; The Chief Registrar of Friendly Societies; The Chairman of the several Commissioners.

*Financial Assistant*, H. F Bunbury, C.B. ..... £1,000
*Secretary*, R. Hazlerigg.
*Chief Actuary*, Sir A. W Watson ..... £1,000
*Actuaries*, S. J. H. W. Allin; J. Buchanan; G Gillet; W R. Jaquan; J G Kyd; J W Thompson.
*Asst. Actuaries*, P A. Barrick; G. S. W Hyde; P N Harvey; A. Henry; C. W S. Jamieson. £250 to £500

#### THE ENGLISH COMMISSION,
Buckingham Gate, S.W 1

*Chairman*, Sir R. L. Morant, K.C.B. ..... £2,000
*Private Sec.*, J S. Eagles
*Deputy Chairman*, J Smith Whitaker, M.P., C.C. £1,500
*Commissioners*, Sir David Shackleton, K.C.B., and Miss Mona Wilson, each £1,000) The Chief Registrar of Friendly Societies (*ex o.*).
*Financial Member*, H. W Bunbury, C.B.
*Secretary*, J Anderson ..... £2,000 to £2,500

*Secretarial.*

*Asst. Secs.* L. G Brock; J A. Salter; S. P Vivian ..... £700 to £1,000
*Senior Clerks*, J R. Brooks; E. Hazlerigg; H. W Harris; A. Woodgate ..... £600 to £650
*Junior Clerks*, J S Beckett; J S. Eagles; A. Gray; R. E. Harwood, M. Hemsltine; L. Infield; F A. Knappel, T Lindsay; H. A. de Montmorency; J Rae, H. L. Shoteswell ..... £400 to £500
*Principal Clerks*, J G Bell, W H. Dawson R. C. Richards ..... £500 to £600
*1st Class Clerks*, H. W Anderson, M W Haynes; C. E. Coward, J W Dark; C. G Evans; G G Fiddes, H. Greer, H. S. Hunter; J A. Pearce-Edgcumbe; J Poyser; P N Russell; W Sutherland H. W V Williams; E. F Wise ..... £300 to £450

*Staff Clerks*, E. W H. Harbord £400 to £500, C. C. W Berridge; W T Fitzgerald; R. A. Nurse; A. Sharp; T. W Simons ..... £300 to £400

*Accountant and Comptroller-General's Department.*

*Deputy Comptroller*, E J Strohmenger
*Accountants*, A. C. Hayward J MaK. Hendrie; S. H. G Hughes; W G. Hunter; G. W Jeffery; J T Watt ..... £300 to £500
*Asst. Accountants*, S. C. Alford; P F Allin; A. H. Carter; J Cheyne; R. K. Comperthwaite; L. F. Crowther; J C. Dixon; R T Evans; R. F James; H. B. Liddiatan; G S. Mackay; F Noble; P W Phillips; E. J Smith, H. J Tyack; L. W Ure ..... £300 to £500
*Staff Clerk*, A. T Moore ..... £300 to £400
*Superintendent of Female Staff*, Miss A. H. Pope ..... £400 to £450

*Professional Staff.*

*Solicitor*, M. L. Gwyer ..... £1,000 to £1,200
*Legal Assistant*, E. MacGowan ..... £800 to £900
*Law Clerks*, E. J Maude; H. C. Talbot £400 to £500
*Principal Medical Officer* G F McCleary, M.D. £1,000

*Outdoor Staff*

*Chief Inspector*, H. A. Gowers, C.B. ..... £1,000
*Chief Women Inspector*, M. M. A. Ward £600 to £650
*Divisional Inspectors*, F R T Ashton, E G Beech, G. W Brake, F R Corrie-Bennett, R. A. Gusch, W T Ivimey, A. Macfarlane, F J Mackenzie, J J Moynihan, W F Shinn ..... £500 to £700
*Inspectors Male*, F B. Alcock, J C. Attrill, F E. Bittenbury, C. R. Bonnebury, F. C. Brook, T. A. Brook, H W Brownjr, F Bryan, L. A. Bulstrode, J G Christopher, W H. C. Clarke, A. H. Daly, J W Evans, T M. Evans, E. J Fell, R G Francis, T A. Galley, C. H J Garland, T. Gibson, C. E. Gladstone, H. T Griffith, E. Holmes, O. W Holstine, A. J. Langridge, C. B. Jenkinson, G. H. Jessop, S. S. Lanphier, F C. Mackenzie, J. F P Martin, J Mason, W Milledge, F Mor-ton, A. W Morris, C. Ormsby, G M. Rackham, G. Smith, J. H. Stimpson, H. L F Tomkins, C. Wheeler, W. Wimbleworth ..... £300 to £450
*Female*, J. E. Boyce, E. W. Daniell, E. M. Dawson,

E. A. McDermitt, M.S. Mosley, A. R. Orme, R. E. Page, H. G. Rice, R. Todd, E. H. Woodgate ... £300 to £400

THE WELSH COMMISSION,
City Hall, Cardiff.

*Chairman*, Sir Thomas Hughes ... £1,500
*Private Secretary*, T. Ll. Roberts.
*Deputy Chairman*, H. Meredith Richards, K.B. ... £1,000
*Commissioners*, J. Rowland, M.V.O., Hon. Violet Douglas-Pennant, each £1,000; the Chief Registrar of Friendly Societies (*ex officio*).
*Secretary*, Thomas Jones ... £900 to £1,000
*Asst. Secs.*, Arthur M. Lewsey, Percy E. Watkins ... £400 to £500
*Accountant*, John C. Morgan ... £900 to £500
*Legal Adviser*, Arthur M. Bulloch ... £900 to £500
*Medical Officer*, D. Ll. Williams, F.R.C.S. (Ed.), D.P.H. ... £400 to £600
*Chief Clerk*, H. E. James; J. H. Jones; T. Davies, J. J. Scott; D. E. Jones, T. E. Morcelle; W. G. Hayward ... £400 to £500

*Outdoor Staff*

*Chief Inspector*, James Evans ... £900 to £500
*Inspectors*, J. C. Evans; R. T. Williams ... £900 to £500

## NATIONAL PHYSICAL LABORATORY,
Teddington, Middlesex.

The National Physical Laboratory founded in 1899 for standardizing and verifying instruments, for testing materials, for the determination of physical constants, and for research into matters of technical and industrial importance, is controlled by a Board representing the Royal Society and the great Technical Institutions. In addition to capital grants, an annual grant of £4,000 is contributed by H.M. Treasury and during the year 1908-09 grants received for special researches, mainly through the Department of Scientific and Industrial Research, amounted to £3,000. A Government grant is also made to cover the expenses of Aeronautics work. The Laboratory comprises four main departments: (1) Physics; (2) Engineering; (3) Metallurgy and Metallurgical Chemistry, (4) The William Froude National Tank. The Physics Department of the Laboratory includes divisions for Thermometry, General Electrical Measurements, Electrical Standards, Electrotechnics and Photometry Optics, Metrology (measurements of length, area, volume and mass), Radium and X Ray work, and Tide-Prediction. The Engineering Department, in addition to research, undertakes tests on engineering apparatus and machines. An Aeronautics division has also been formed, to carry out investigations required by the Advisory Committee for Aeronautics, and arrangements have been made for tests on real materials, at the request of the Road Board. The Department of Metallurgy undertakes chemical, metallographic and other investigations into the nature and characteristics of metals and alloys, including examinations into the causes of failure of engineering structures carried out jointly with the Engineering Department. New buildings for the Metallurgical work were provided by Sir Julius Wernher in 1910. The William Froude National Tank, the gift of Sir A. F. Yarrow for the service of the nation, has been constructed for carrying out tests with resistances on ship and propeller models for the information of designers and naval architects. Additional buildings for offices, and for administration purposes, were, in 1913, opened by Mr. Balfour.

*Chairman*, The President of the Royal Society
*Ex officio Executive Committee*, Lord Rayleigh, K.P., F.R.S.
*Director*, R. T. Glazebrook, C.B., D.SC., F.R.S.
*Asst. Engineering Dept.*, T. E. Stanton, B.SC., F.R.S.
*Asst. Metallurgical Dept.*, W. Rosenhain, B.SC., F.R.S.
*Senior Asst., Physics Dept.*, C. A. Hunter, B.SC., F.R.S.
*Supt., William Froude National Tank*, G. S. Baker, M.INST.C.E.

## NATIONAL PORTRAIT GALLERY,
St. Martin's Place, Charing Cross, W.C. 2.

The first grant to the institution was made in 1856 for collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, the site being contributed to the cost by Mr. W. H. [illegible]

*Secretary, Keeper, and Secretary*, James D. Milner ... £400 to £500

## NATIONAL SERVICE, MINISTRY OF,
Victoria Street, S.W. 1.

*Minister of National Service*, Sir Auckland Geddes, K.C.B., K.B.E.
*Private Secretaries*, P. Cunliffe, Capt. W. Bligh, M.C. (*Parly. Priv. Sec.*), F. J. Carter (*Asst. Priv. Sec.*).
*Parliamentary Secretary*, A. C. T. Beck, M.P.
*Private Sec.*, E. Goodall.
*Secretary*, E. A. Sandford Fawcett.
*Private Sec.*, Miss E. H. Taylor.
*Chief Assist. Secretary*, F. Lloyd-Greame, M.C.
*Dep. Chief Assist. Sec.*, G. Chrystal.
*Assist. Secretaries*, Hon. J. M. Balfour, J. Reid Hyde, F. L. Joseph, R. A. Ledgard.
*Deputy Assistant Secretaries*, H. H. Joy; H. R. Boyd.
*Labour Advisory Committee*, J. T. Brownlie, A. Conley, W. J. Davis, D. Gilmour, J. O'Grady, M.P., J. Parconage, J. Robson, J. H. Thomas, M.P., R. Tillett, M.P., J. Turner, J. W. Wilson.
*Secretary to Councillor, J. H. Williams.*
*Controller of Supplies*, E. Stenton Cooke.

Finance Department.

*Controller*, A. C. T. Beck, M.P.
*Private Sec.*, Norman Goodall.

Statistical Department.

*Controller*, T. D. Rhind.
*Deputy Controller*, T. Fraser

Trade Exemptions Department.

*Commissioner*, F. H. McLeod.
*Private Sec.*, Miss R. Elliott.
*Deputy Commissioner*, R. E. Graves.

Labour Supply Department.

*Director-General of National Labour Supply*, C. F. Roy
*Personal Assistant*, W. Nash.
*Private Secretaries*, E. Smith, Miss G. Vane.
*Dep. Director-Generals*, Sir Herbert Morgan, K.B.E.; Hon. E. Wood, M.P.

Medical Department.

*Chief Commissioner for Medical Services*, J. Galloway, C.B., M.D.
*Personal Assistant*, F. C. Rutherford, B.A.O., M.B.

Recruiting Department.

*Director-General*, J. H. Seymour Lloyd, C.M.G.
*Personal Assistant*, Miss M. Cruikfrey
*Deputy Director-General*, J. E. Maclean.

Registration Department.

*Controller*, W. A. F. L. H. Sinclair
*Personal Assistant*, S. G. Davis, LL.B.

## H.M. NAUTICAL ALMANAC OFFICE,
36 Lee Road, S.E. 3.

The "Nautical Almanac" was first published in 1767, by H.M Admiralty under whose control the office now remains. The expenses of preparation were estimated, at £3,846 in 1908-9.

*Superintendent*, P. H. Cowell, D.SC., F.R.S. ... £800
*Chief Assistant*, R. F. Bawtree ... £400 to £500
*Assistants*, J. A. Spriggs; W. F. Donkin, M.A., D.SC., F.R.S.; T. C. Hudson, B.A., F.R.A.S. ... £300 to £400

## OBSERVATORIES.
Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Wren and Wren, being opened in 1676. The administrative expenses of the Observatory are estimated at about £4,250 annually

*Astronomer Royal*, Sir F. W. Dyson, LL.D., F.R.S. £1,000

## POST OFFICE.

*Chief Office*, 54, Martin's-le-Grand, E.C. 1.

A House of Commons report in the states "It is acceptable at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and, while admirably discharging its multifarious duties, shows an annual profit of about £5,000,000. It also [illegible] large sums for [illegible] on behalf of the Inland Revenue Department, for certain Licences for the Customs and Excise Department, and the County Councils, and for National Insurance and Audit of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1680, the Book Post in 1848, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1792, the Parcel Post in 1883, and the Telephone Service in 1880. The establishments expended on the Post Office were estimated at £14,681,300 in 1907-8.

Beard; R. H. James; A. E. Bond; G. Muir; A. J. McCutcheon; W. R. Roberts; W. Ferguson; H. Townshend; E. R. Davies; D. Spottiswoode; P. W. McIntyre; G. F. Hall; A. E. Hooker ..... £6 to £6 10s

**PRIVY COUNCIL OFFICE**, Whitehall, S.W.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, but it discharged the functions of State now confided to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on p. 132. Members of the Cabinet must be Privy Councillors, and they principally form the acting Privy Council. The Council is summoned as much to act with others upon the deaths of the Queen, and many matters are referred by the Sovereign to Committees of the Council some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth great Officer of State, and as such is always a prominent member of the Cabinet.

*Lord President of the Council*, Rt. Hon. Earl Cairns of Radleston, K.C. G.C.B., G.C.L.E. ..... £5,000
*Private Sec.*, G. Cunningham, C.B. ..... £500

*Cashier*, C. L. Nicholson ..... £600 to £700
*Chief Clerk to do.*, H. F. Hambley ..... £400 to £500

**QUEEN ANNE'S GATE**, Dean's Yard, S.W.

Buildings so named, when bought 4 years, with the consent of Parliament, transferred to the Government the present meaning of the "Queen Anne's Bounty" and "tenths" derived from the state, dignitaries and parishioners, which is given to the augmentation of benefices poorly endowed. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenues by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed.

"First fruits" represent one year's income of a benefice in the time of Henry VIII., the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £4,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants to meet benefactions awarded to benefices not exceeding £300 in net annual value. The total amount distributed in 1918 was about £40,000. The Governors act as trustees for endowments and many exhibitions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

*Secretary & Treasurer*, William R. Le Fanu.
*Chief Clerk*, George Simpson.
*1st Class Clerks (Senior Division)*, John F. Stapleford; V. Goreille Broomhead; R. G. Rowland; E. Jones.
*2nd Senior Division*, H. Rogers; W. Russell; D. Simpson; W. Holford; W. J. P. Smith.
*Junior Clerks (Upper Division)*, A. G. Spencer; S. D. Knight.
*Solicitor*, F. G. Hughes.
*Asst. Solicitor*, W. G. Hannah.
*Architect*, William Alfred Hughes.
*Auditor*, H. C. Gerlant, 32 Nicholas Lane, E.C.

**RECONSTRUCTION, MINISTRY OF,**
2 Queen Anne's Gate Buildings,
Westminster, S.W. 1.

The Ministry of Reconstruction was established by Act of Parliament in August, 1917, to consider and advise upon the problems which may arise out of the present war and may have to be dealt with upon the termination.

*Minister of Reconstruction*, Rt. Hon. C. Addison, M.D., M.P.
*Private Secretary*, W. A. Colegate.
*Joint Secretaries*, Vaughan Nash, C.V.O., C.B.; G. M. Young, C.B.

**RECORD OFFICE, THE PUBLIC,**
Chancery Lane, W.C.

The Public Record Office as it now stands was completed in 1900 for the safe custody of the Public Records, which were first ordered to be kept by Edward I. at the beginning of the twelfth century. The estimated expenses were estimated at £92,000 in 1917-18. (For hours see p. 92.)

**Land Revenue Records and Enrolments.**
*Keeper of the Records*, Sir H. C. Maxwell-Lyte, K.C.B.

**RESEARCH, SCIENTIFIC AND INDUSTRIAL, DEPARTMENT OF,**
25 Great George Street, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council, dated July 16, 1915, to advise, initiate and assist, as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organisation and development of scientific and industrial research. [illegible] Committee [illegible] Treasury [illegible] Secretary [illegible] Department [illegible]

official Members of the Committee of the Privy Council were created a Body Corporate, under the name of "The Imperial Trust for the encouragement of Scientific and Industrial Research," to hold and dispose of money and other property for the purposes of the Committee. On December 23, 1916, a separate Department having its own Parliamentary Vote was created for the service of the Committee.

## THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C. 2.

The Conservation of the River Thames was granted to the Lord Mayor of London in 1857 and delegated to the Conservators in 1894, the powers being reconstituted in 1894. The Port of London Act 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.

*Chairman*, Rt. Hon. Lord Desborough, K.B.E.

*Vice-Chairman*, Sir Robert Buckall.

*Secretary*, F. W. Geary

‡ Receives additional allowance of £80.

† Receives additional annual allowance of £50.

## TRADE, BOARD OF;
### Whitehall Gardens and Cwydyr House, Whitehall, S.W. 1.

A Board of Trade and Plantations was established by Charles II. in 1668, and in place of this body a Committee of the Council on Trade was established in 1786. The duties of this Committee (which, unlike the other Council Committees, has a president at the head) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the registry of Bankruptcy, the Registration of Joint Stock Companies, Railway, Tramway Water and Gas Companies, Electric Lighting, Harbours and Lighthouses, and Merchant Shipping, acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. The administrative expenses were £218,293 in 1911-12.

*President*, Rt. Hon. Sir Albert H. Stanley, M.P. £5,000

## TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1714. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner is, ex officio, leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the technical duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient revenue to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor expounds to the House, these plans being accepted, modified or rejected by the House. The amount estimated to pay the salaries and other expenses was £20,898 in 1910-11.

FIRST LORD OF THE TREASURY—
The Rt. Hon. David Lloyd George, M.P. (*Prime Minister*) ... ... ... ... ... ... ... *£5,000*
*Private Sec.*, H. P. Hamilton; J. C. G. Davidson; R. F. M. Gower (*total allowance £800*).

*Assistant*, F. C. Baddiel ... ... £600 to £800
*Clerk*, W. T. Chard ... ... ... £200 to £400

## TRINITY HOUSE, Tower Hill, E.C.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining Lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to this Corporation. Until 1854 all light dues were collected by Trinity House; and until 1898 Masters of the Navy were appointed by the Elder Brethren. The present duties of the Elder Brethren have reference to Lighthouses, Buoys, Beacons, Pilotage, &c. and attendance at the Admiralty Court to act as Assessors, also to advise the Board of Trade in nautical matters. There are ten Acting Elder Brethren, of whom one is a retired officer of the Royal Navy and nine retired Commanders of the Mercantile Marine; there is also one Elder Brother who has retired from the Active List and there are eleven Honorary Elder Brethren. The income of the Corporation derived from light dues levied on shipping entering and leaving British ports amounts to £500,000 per annum, which is expended in the maintenance of the Lighthouse and coast-marking system of England and Wales, under the financial control of the Board of Trade. The Corporation also administers certain charitable trusts specifically dedicated to the relief of decayed master mariners and their widows, the accounts in respect of which are rendered to the Charity Commissioners.

### Elder Brethren.

H.M. The King; *Master*, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.; *Deputy Master*, Capt. Sir H. Acton Blake, K.C.V.O., Rt. Hon. Lord George Hamilton, G.C.S.I.; Rear Admi. H. B. Stewart (*retired*) The Earl of Rosebery, K.G., K.T., Capt. A. E. Bell, Capt. A. C. Thomson, C.B.; Capt. A. W. Clarke, Capt. R. Hoare; Capt. L. H. Crawford, C.B.; Rt. Hon. A. J. Balfour, O.M., M.P.; The Earl of Balfour, K.G., G.C.M.G. Admi. the Marquess of Milford Haven, G.C.B. Capt. C. P. Marshall Capt. T. Golding Rt. Hon. H. H. Asquith, K.C., M.P.; Maj. H.R.H. *Assistant to Keeper*, S. J. Camp ..... £200 to £300
*Inspector of Armouries*, Sir Guy F. Laking, Bart., C.B., M.V.O., F.S.A. ..... Hon.

## WAR OFFICE,

### Whitehall, S.W. Hours, 10 to 6.

A Secretary of State for War was first appointed in 1794, the control of the Land Forces of the Crown having been previously exercised by a Secretary at War, who was responsible to Parliament through the Home Secretary. In 1801 the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1854 by the appointment of a Secretary of State for that purpose. In 1870 an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army Annual Act of 1909 (9 Edw. VII. c. 9).

### ARMY COUNCIL.

*Secretary of State for War*, The Right Hon. R. G. V. Earl of Derby, K.G., G.C.V.O., C.B. (P.C.) (*President of the Army Council*).

## MEMBERS OF CONVOCATION.

In theory the Church of England is governed by means of its Convocations of Bishops and Clergy there is a House of Convocation for each province, Canterbury and York. Each Convocation consists of two Houses, the upper confined to the archbishops and bishops, the lower composed of the dean of every cathedral, the archdeacons, with proctors elected from every cathedral chapter, and two more elected by the clergy of every diocese in the province of Canterbury, and by every archdeaconry in the province of York. A fresh election is made with every new Parliament.

### PROVINCE OF CANTERBURY

#### Upper House.

*President.*—The Most Rev the Lord Archbishop.
The Right Rev the Lords Bishops of London, Winchester, Bangor, Bath and Wells, Birmingham, Chichester, Ely, Exeter, Gloucester; Bristol, Hereford, Lichfield, Lincoln, Llandaff, Norwich, Oxford; Peterborough; Rochester, Salisbury, Southwark, Southwell, St. Albans, St. Asaph; St. Davids, Truro; Worcester; Chelmsford; St. Edmundsbury & Ipswich.
*Legal Secretary* (vacant).

#### Lower House.

*Prolocutor*, Ven. J. E. Stocks, D.D.
The Very Rev the Deans, the Venerable the Archdeacons, and the Elected Proctors.
*Registrar*, F. H. Lee.
*Assessor*, K. J. Muir Mackenzie.

### PROVINCE OF YORK.—Upper House.

*President.*—The Most Rev the Lord Archbishop.
The Right Rev the Lords Bishops of Durham, Ripon, Chester, Newcastle; Wakefield, Liverpool, Manchester, Carlisle; Sodor and Man, Sheffield.

#### Lower House.

*Prolocutor*, Rt. Rev the Bishop of Beverley, D.D.
The Very Reverend the Deans of the Province, the Venerable the Archdeacons, and the Elected Proctors.
*Registrar*, A. V. Hodson.

## THE HOUSES OF LAYMEN.

The House of Laymen for the Province of Canterbury, as also for that of York, consists of members elected by the various Diocesan Conferences, who are themselves elected by the Laity of their respective Parishes or Rural Deaneries. The members are elected with every fresh Parliament.

ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN

*Dean and Ordinary*, Very Rev Charles Thomas Gwynn, D.D.

GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

*Honorary Secretaries*, Ven. L. A. Poole, D.D., Ven. I. K. Latham, D.D., Capt. R. Wade Thompson, J. A. Macconchy

*Secretary to the* REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, enabling being left but the right to the life services of the Assistant Bishops and Clergy (which were commuted for a capital sum) the right to claim churches in use for divine service, the right to buy the Bee and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually

Subject to the GENERAL SYNOD are 23 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz.:—The Bishop, 2 diocesan nominators (1 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish

The financial trustee of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,582,079, representing *the life annuities* of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on 31 Dec., 1926, was only £171,376, charged with annuities to 32 annuitants. The funds, however, in the *custody* of the Representative Body amounted in all to £8,350,275, made up of *Commutation* £171,376, *Parochial Sustentation* £5,258,360, *Episcopal Sustentation* £365,882, *General Synod Funds* £367,492, and *Miscellaneous purposes* £1,208,265.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £8,137,339. The interest of the Parochial Sustentation Fund is approximately £251,208. The total amount of *assurance* for stipend paid by parishes, 1926, was £98,491, and the total amount paid for *stipends* under Diocesan Schemes was £229,844.

The number of members of the Church of Ireland, by the Census of 1911, was 354,373, or 11·6 per cent. of the entire population.

## THE EPISCOPAL CHURCH IN SCOTLAND

| Seat. | The Rt. Rev. Bishops. | Cons. | Clergy. | Stipd. |
|---|---|---|---|---|

| *Moray.* | A. J. Maclean, D.D. | 1904 | 23 | *1823 |
| *St. Andrews.* | C. E. Plumb, D.D. | 1908 | 48 | *1,200 |

* With residence.

*Registrar of the Episcopal Synod*, George J. Wood, W.S., 24 Young Street, Edinburgh.

Chaplains, Mission Stations, &c., 42. Parishioners, 8,631. Clergy, 331. Communicants, 38,676.

## The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the universities and royal burghs. *It is presided over by a Moderator* (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £4,200 towards his expenses. The country, for Church purposes, is divided into 28 Synods and 84 Presbyteries, and there are over 1,800 ministers and Boanerges engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland, the number of communicants at the close of 1918 was 721,136. The sum of £492,182 was raised in 1918 for church and missionary purposes. Within the last 90 years 489 chapels, at a cost of £1,800,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,077. There are in addition 232 churches and mission stations, in all of which worship is regularly conducted. *The Presbyterian form of Church government as first set up in Scotland was superseded in 1661 by the Episcopal Church under the Stuarts, but at the Revolution in 1688 Presbyterianism regained the legal establishment, which it still preserves.*

*LORD HIGH COMMISSIONER*, Duke of Montrose, K.T.

*MODERATOR, 1918*, Right Rev James Cooper, D.D., *University of Glasgow*

*Principal Clerk*, Rev David Paul, D.D., Edinburgh.

*Depute Clerk*, Rev J A. McClymont, B.D., Edinburgh.

*Procurators*, Lord Sands, Sir C. K. Johnston.

*Agent*, A. L. Menzies, W.S., 54 Castle St., Edinburgh.

*Parliamentary Solicitor*, A. H. Speas, London.

## OTHER PRESBYTERIAN CHURCHES

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 11 Synods and 84 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1918, there were 1,326 congregations and 351 preaching stations. The total membership was 528,949, and there were 2,196 Sunday Schools, with 221,031 scholars and 22,467 teachers. Its 15 Foreign Mission Fields there are 92 European Mission Agents and 4,807 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,021,752.—*Moderator*, Rev. Principal D. MacLehose, D.D., Bombay.—*Offices*, 121 George Street, Edinburgh, and 232 St. Vincent Street, Glasgow

(2) *The Presbyterian Church in Ireland.*—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 443,856. The largest of these, under the superintendence of the General Assembly, consists of 56 presbyteries, 640 ministers, 560 congregations, with 103,960 communicants, 86,886 families, 1,480 Sabbath-school teachers, and 122,363 scholars. During the year 1916-1917 this branch contributed by congregational effort £229,867 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £308,833. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 13 professors and 2 lecturers, and has 34 ministerial with 4 medical missionaries in foreign parts.—*Moderator*, Rt. Rev John Town, D.D., Belfast. *General Secretary*, Rev W J Lowe, B.A., Church House, Belfast.

(3) *The Presbyterian Church of England* has 12 presbyteries, 315 congregations, 8 preaching stations, and 86,404 members. It has a Theological College (Westminster College, Cambridge), and supports 30 missionaries abroad, including 20 women. In 1918 the amount raised for all purposes was £270,651.—*Church Offices*, 7 E. India Avenue, E.C. 2. *Financial Sec.*, John Legget. *Publications Office*, 22 Warwick Lane, Paternoster Row, E.C. 4.

(4) The less numerous divisions are The *Free Church of Scotland*, consisting of those members who did not unite with the U P Church, the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

## The Welsh Calvinistic Church.

THE WELSH CALVINISTIC METHODIST CONNEXION is the only Church of purely Welsh origin, and embraces a very large section of the Welsh speaking population. The form of Church government is Presbyterian, and the Church is in federation with the United Free Church of Scotland and with the Presbyterian Church of England, q.v. In 1913 the body numbered—churches, 1,480; chapels and places of worship, 2,136; ministers and preachers, 1,250; deacons, 6,660; communicants, 183,258, on probation, 1,300; Sunday-school teachers, 22,269; scholars [illegible]; number belonging to the [illegible]; communicants, 320,000.

A sum amounting to £295,079 10s. 6d was collected for various religious purposes in 1913. One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children, the vernacular is the language generally used in these schools. There are 8 English chapels and preaching stations, with 30,800 communicants, *all the rest are Welsh.*—*Moderator of General Assembly*, Rev [illegible] Davies, B.A., Bala. Revs. R. P. Jones, M.A., Cardiff, and John Thickens, London. *Secretaries*, Rev. John Morgan, Aberdare; Rev. [illegible] Jones, Bryncrodyn.

In *England* and *Wales* there are 4 Archiepiscopal and 23 Episcopal Sees, in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees, in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 38 Archiepiscopal and 122 Episcopal Sees, with 52 Vicariates and 20 Prefectures Apostolic, as follows:—

# The Independents and the Baptists.

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. They maintain that each church is its own ruler, and thus dispense with both episcopacy and presbyteries. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1901. There are 52 county and other Associations in England and Wales, with 4,721 churches and preaching stations containing 1,727,444 sittings, the number of ministers in the British Isles is 3,062. Of these 804 are temporarily without pastoral charge, 220 are engaged in collegiate and tutorial duties, 98 are occupied in secretarial work, and 320 by reason of age or ill health have retired from pastoral duty. *Chairman of the Congregational Union of England and Wales,* 1915-16, Rev. Reginald J. Small, M.A., 1916-17, Rev. R. Griffith Jones, M.D. *Secretary,* Rev. Richard J. Wells, Offices, 78, Memorial Hall, Farringdon Street, E.C. The Countess of Warwick's Donation, with 40 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Sec.,* R. Dolby Sheldon. *Offices,* 42, Holborn Hall, Gray's Inn Road, W.C.

The BAPTISTS are, in all respects but one, similar to the Independents, they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1908, 4,227 chapels and 2,252 preaching. The members numbered 448,229, Sunday-school teachers 58,629, and Sunday scholars 391,232. In the U.S. the "members" alone numbered 5,200,000. *President of the Baptist Union,* 1915-16, Rev. W. Y. Fullerton. *Sec.,* Rev. W. Y. Fullerton. *Offices,* Baptist Church House, Southampton Row, London, W.C.

# The Methodist Churches.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. Membership of the Society is through connexion with a "class meeting," in which religious experience is narrated, suitable advice or instruction being given by the "class-leader" The question of some modification of the present terms of membership was discussed by the Conference of 1877, and a scheme was remitted to the various Synods for consideration and report in 1878, but no change was made. When Wesley died the number of members was 76,968, and since then the increase has been so great that about 18,000,000 people are now receiving Methodist instruction in various parts of the world.—*Pres.*, Rev Simpson Johnson, Sec., Rev John E. Wakeley

THE PRIMITIVE METHODISTS

2. *The Primitive Methodists* who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev J Tolefree Parr

THE UNITED METHODIST CHURCHES.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists, which hitherto had been separate from and independent of each other These were :—

*The Methodist New Connexion*, which owed its origin in 1797 to the Rev Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism, and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community

*The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

*The United Methodist Free Churches*, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828, the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry, and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev James Wright, *Secretary*, R. W Carr

INDEPENDENT METHODISTS.

4. *Independent Methodists*—This body is Congregational in its organisation, with an unpaid Ministry Its first Conference was held in 1805. —*President*, H. Ralphs.

WESLEYAN REFORM UNION

This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry The adherents are mainly in the Midland counties.—*Secretary*, Rev K. Bromage.

FINANCES.

*Finances.*—The *Wesleyans* raised in 1912–13 £774,577 to sustain their very extensive missionary operations. At the same time their Home missionary income was £37,478. The *Primitive Methodists* raised £4,939 for new chapels, and the *United Methodist Church* £16,398 for their missions.

## Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 365 chapels and other places of worship. The *Society of Friends*, which consists of 20,089 members and about 9,000 other adherents in Great Britain and Australasia, and 2,339 in Ireland, has 235 recorded ministers, including over 130 women, their places of worship, in 1917, numbered 442. *Central Offices for Great Britain*, 136 Bishopsgate, E.C. Ireland has a separate organisation, with *Offices*, 6 Eustace Street, Dublin. The *Churches of Christ* have *14,277 members and 186 churches* in the British Isles, with 139 Sunday Schools, 1,719 teachers, and 16,812 scholars. The Moravian Church (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 43 congregations and preaching stations, with 3,680 communicants. The Catholic Apostolic Church has above 80 churches, the New Church (*Swedenborgian*), 73 societies, with about 6,000 registered members, the Latter-Day Saints (*Mormons*) have 80 churches. The Brethren, or Plymouth Brethren, have 23 places of worship in London and the suburbs. The Reformed Episcopal Church: *Presiding Bp.*, Rt. Rev B. Eldridge, D.D., 7 Buckingham Rd., Brighton. Among the inhabitants of the United Kingdom are about 298,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev Dr J. H. Hertz. Chief Rabbi's Office (pro tem.), Mulberry Street, Commercial Road, E. The Jews support their own poor. Their number throughout the world is computed at thirteen millions. The Greeks have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have churches in London and Manchester, the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury, and there is a mosque for Moslems.

## The Salvation Army.

THE SALVATION ARMY was founded by General William Booth (*b.* 1829, *d.* 1912), and is one of the most recent religious denominations, and one of the most successful. In Dec., 1916, the number of *Officers*, *Cadets* and *Employés* was 23,665, of *Corps* and *Outposts*, 9,830. *Local Officers*, 63,484. The number of countries occupied was 63, and of languages used 40. Connected with the Salvation Army are numerous philanthropic institutions, including 117 Industrial Homes for Fallen Women, 31 Maternity Homes and 53 Children's Homes, 189 Slum Posts, 20 *Prison-Gate* Homes, 280 Shelters and Cheap Food Depôts for the Homeless, 193 Workshops and Factories, 109 Labour Bureaux, 35 Farms, &c. 34,964 open-air meetings are held weekly, and a still larger number in the various halls of the organisation. At a large number of police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. The total raised during "Self Denial Week" in 1915 amounted to £58,274. *Balance-sheets and statements of account relating to the General Funds* or to the Social Funds can be obtained, post free, from 101 Queen Victoria Street, E.C.—GENERAL, Bramwell Booth (1912), Queen Victoria Street, London, E.C. 4.

## Moral Training for the Young.

(See also Societies and Institutions, pp. 296-305.)

THE BOYS' BRIGADE. (Incorporated.)

THE senior boys organisation founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every Company is connected with a Church or other Christian body. The total strength throughout the world is 2,300 Companies with 120,000 officers and boys. Over 290,000 ex-members enlisted voluntarily and are serving in the Naval or Military forces. *Sec.* (*acting*), Chas. B. Ranken, 34 Paternoster Row, E.C.

CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish Church, was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 300,000 lads have had the advantage of the Brigade's training, and to-day there are 1,200 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C. 2. *Secretary*, Rev Edgar Rogers, M.A.

BOY SCOUTS.

A Movement, now Incorporated by Royal Charter, initiated and organised by Lt.-General Sir Robert Baden Powell, K.C.B., K.C.V.O., Chief Scout. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance, inculcating loyalty and thoughtfulness for others, teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene. During the War the utility of the Movement has been demonstrated by the employment of 30,000 of the Boy Scouts on war work; many thousands have joined the Colours, and from 1,300 to 1,800 have been continuously employed on coastguard work under the Admiralty. The Movement has taken root in all parts of the British Empire, while 28 other Allies, together with Spain, Holland, and the United States, have adopted it.—*Headquarters*, 25 Buckingham Palace Road, S.W. 1.

Green, (*Music*), Prof. Sir Frederick Bridge, (*Medicine*), Prof. F. W. Andrewes, Sir Lauper Perry, H. J. Waring, (*Science*), Prof. G. A. Buckmaster, J. L. S. Hatton, Prof. Sir Herbert Jackson, Prof. W. W. Watts, (*Engineering*), Prof. W. E. Dalby, (*Economics*), Prof. Graham Wallas.

### *ORGANISATION OF TEACHING*

On January 1, 1907, University College was transferred to the University, of which it now forms an integral part in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On January 1, 1910, King's College was, in respect of all its Departments except that of Theology, transferred to the University, of which it now forms an integral part, but is divided into two separate institutions, viz. (*a*) "King's College" (in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics) and (*b*) "King's College for Women" (in the Faculties of Arts and Science). The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other Institutions maintained by the University are the Brown Animal Sanatory Institution in Wandsworth Road, the Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, and the Francis Galton Laboratory for National Eugenics at University College.

RECOGNISED TEACHERS.

The number of "Recognised Teachers" in the several Faculties is as follows —

*Theology*, 24; *Arts*, 161; *Laws*, 14; *Music*, 22; *Medicine*, 314; *Science*, 229; *Engineering*, 71; *Economics*, 12.

DEANS OF THE FACULTIES, 1910–12.

*Theology*, Rev. P. T. Forsyth, D.D.
*Arts*, Prof. W. P. Ker, LL.D., Litt.D., F.B.A.
*Laws*, Prof. A. F. Murison, LL.D.
*Music*, Prof. Sir Walter Parratt, C.V.O., Mus.Doc.
*Medicine*, Sir Bertrand E. Dawson, K.C.V.O., C.B., M.D.
*Science*, Prof. Sir Herbert Jackson, K.B.E., F.R.S.
*Engineering* H. C. H. Le Chatelier, Ph.D., M.I.E.E.
*Economics*, Hon. W. Pember Reeves, Ph.D.

UNIVERSITY COLLEGE, Gower Street, W.C. 1.

*Chairman of Committee*, Lord Reay, K.T., G.C.S.I.
*Provost*, Sir Gregory Foster, Kt., D.
*Principal*, R. M. Burrows, D.D.

KING'S COLLEGE, Strand, W.C. 2.

*Chairman of Delegacy*, Viscount Hambleden.
*Principal*, R. M. Burrows, D.D.

KING'S COLLEGE FOR WOMEN

*Warden* (vacant).

Household and Social Department, Campden Hill Road, W. 8.

*Dean*, Miss Lane-Clapon, M.D., B.Sc.

GOLDSMITHS' COLLEGE, New Cross, S.E., 14.
*Warden* (vacant).

*Headmaster*, Lt. R. Reid.

MISCELLANEOUS.

COLLEGE OF PRECEPTORS, Bloomsbury Square, W C.

All persons engaged in education who have passed an examination satisfactory to the Council are admissible as members. Diplomas granted are F.C.P., L.C.P., and A.C.P.

*President*, Sir Philip Magnus, M.P.
*Dean*, W G Rushbrooke, LL.M.
*Treasurer*, G Armitage Smith, D.Lit.
*Secretary*, G Chalmers.

GILCHRIST EDUCATIONAL TRUST,
2 Plowden Buildings, Temple, E.C.

Founded by the late Dr Gilchrist (died 1842), for "the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the maintenance of Scholarships, to the carrying on of lectures on scientific and other subjects for artisans, and to the assistance of approved educational objects.

*Trustees*, Rt. Hon. Lord Shuttleworth, LL.D., *Chairman*, Walter Leaf, Litt.D., Michael E. Sadler, C.B. Mrs. Sophie Bryant, D.Sc., Rt. Hon. Lord Richard Cavendish, G.M.G.
*Secretary*, A. H. Fison, D.Sc.

LONDON PAROCHIAL CHARITIES
(Trustees of the), 2 Temple Gardens, E.C.

[The income (£10,218) is applied mainly in support of Polytechnics, in furtherance of Technical Education, in grants of pensions, and for the maintenance of City Churches.]

*Chairman of Governors*, Sir J Savory, Bart.
*Vice-Chairman*, L. B Sebastian.
*Clerk*, Ernald E. Warre.

MUSIC.

ROYAL ACADEMY OF MUSIC (1822),
York Gate, Marylebone Road, N.W

[The R.A.M. was founded in 1822 by Lord Burghersh (afterwards Earl of Westmorland) for the cultivation of the science of music. The average number of students attending in 1911 was 445. There are 98 Fellows (F.R.A.M.), 542 Associates (A.R.A.M.), and 7,243 Licentiates (L.R.A.M.), of whom 6 Associates and 389 Licentiates were elected in 1911.]

*President*, H.R.H. the Duke of Connaught, K.G.
*Chairman of Committee*, Sir Edward E. Cooper
*Principal*, Sir A. C. Mackenzie, Mus.D., F.R.A.M.
*Lady Superintendent*, Mrs. Russell, A.R.A.M.
*Secretary*, J A. Creighton.
*Actg Sec*, P Goatly

ROYAL COLLEGE OF MUSIC (1883),
Prince Consort Road South Kensington, S.W.
*Patron*, H.M. The King.
*President*, H.R.H. Prince Christian, K.G.
*Director*, Sir Hubert Parry, Bt., G.C.V.O., D.C.L., D.C.L., M.A., Mus.Doc.
*Hon. Secretary*, Charles Morley
*Registrar*, Claude Aveling, B.A.

ROYAL IRISH ACADEMY OF MUSIC,
Westland Row, Dublin.
*Secretary*, C. E. Grahame-Harvey

GUILDHALL SCHOOL OF MUSIC.

[The School grants a diploma of Licentiateship (L.G.S.M.) and of Associateship (A.G.S.M.), open to students of eight terms' standing and over.]

*Principal*, Landon Ronald.
*Secretary*, H. Saxe-Wyndham.
*Lady Superintendent*, Mrs. Hemming.
*Professors*, 130 in number.

LONDON COLLEGE OF MUSIC,
Gt. Marlborough Street, W. 1.
*Principal*, Frederick J. Kern, Mus.B.
*Director of Examns.*, G. Augustus Holmes.
*Secretary*, A. Gambier Holmes.

TONIC SOL-FA COLLEGE, 26 Bloomsbury Square, W.C. (1853).
*President*, Sir Walter Parratt, G.V.O., Mus.D.
*Secretary*, Walter Harrison, Mus.Bac.

TRINITY COLLEGE OF MUSIC (1872), Mandeville Place, Manchester Square, W.
*Chairman of Board*, Sir Fredk. Bridge, C.V.O., Mus.D.
*Secretary*, C. N. H. Rodwell.

ROYAL COLLEGE OF ORGANISTS, Kensington Gore, S.W.
*President*, Sir C. Hubert H. Parry, Bart., G.V.O., Mus.D.
*Hon. Sec.* Dr H. A. Harding.

*Musical Director*, Major C. Franklin, R.M.L.I.
*Quarter Master*, Lieut. A. E. Whiting, R.M.L.I.
*Superintending Clerk*, T. F. Hanlon, R.M.A.

VICTORIA COLLEGE OF MUSIC, 26 Berners Street, W.
*Principal*, J. H. Lewis, Mus.D.
*Chairman*, J. M. Bentley, Mus.D.
*Director of Music*, Churchill Sibley, Mus.B.
*Secretary*, H. Portman Lewis.

## NAVAL.

ROYAL NAVAL COLLEGE, Greenwich.
*President*, Adm. Sir Henry B. Jackson, G.C.B., K.C.V.O.
*Rear-Adm.* Edmund P. B. Jervoise (ret.).
*Commander*, Sandford G. E. Neville, R.N.
*Medical Officers*, Fleet-Surg. Henry W. Finlayson, D.S.O., M.B. C. H. Fernie, M.R.C.S.
*Store Officer, Cashier, &c.*, Staff Paymaster George Whitcroft, R.N. (ret.).
*Secretary*, Henry F. V. Negus.
*Clerk*, A. Wotton.
*Civil Engineer*, A. L. Perfect.
*Curator of Museum*, Lieut J. T. Berry, R.N. (ret.).

ROYAL NAVAL COLLEGE, Dartmouth.
*Capt. Commg.*, W. Rusk Keene, M.V.O., A.D.C., R.N.
*Commander*, Bernard Long, R.N.
*Headmaster*, C. E. Ashford, M.V.O., M.A.

ROYAL NAVAL COLLEGE, Osborne.
*Captain*, Hon. H. B. Holmes à Court, R.N. (ret.).
*Commander*, Capt. Hon. H. B. H. Boyle, R.N. (ret.).
*Headmaster*, C. Godfrey, M.V.O., M.A.

ROYAL HOSPITAL SCHOOL, Greenwich.
*Supt.*, Captain R. M. C. Cooper Key, M.V.O., R.N.
*Headmaster*, J. H. Evans, B.A.

Mechanical Training Establishment, R.N., Chatham.
*Engineer Capt.*, F. T. George, R.N.
*Commander*, R. R. Harrison, R.N.R.
*Naval Schoolmaster*, Ernest Medder.

### Training Ships for Royal Navy.

FOR MEN.—*H.M.S. Alhemarle* (gunnery), *Duncan* (gunnery), *Argonaut*, *Vestal*, *Pembroke*, *Niger*, *Dryad* (Navigation School Ship), and *Harrier* (tender to *Dryad*).

FOR BOYS.—*H.M.S. Fisgard* (4 ships, for boy artificers), *Ganges*, *Impregnable* (2 ships), *Fadus* (2 ships, for supernumerary artificers), and Marine Society's Ship *Warspite* and National Refuges Ship *Arethusa* (see Societies).

*Exmouth*, moored off Grays, Essex (and seagoing tender *Exmouth II*.). Boys trained for Navy and Mercantile Marine, and for employment in naval and military bands.—*Capt. Supt.*, Capt. R. B. Colmore, R.N.

### Training Ships for Mercantile Marine.

THAMES NAUTICAL TRAINING COLLEGE (INCORPORATED).—H.M.S. *Worcester*, off Greenhithe. *Capt. Supt.*, D. Wilson Barker, R.N.R., F.R.G.S.

CADET SCHOOL SHIP *Conway*, *Rock Ferry*, Birkenhead. *Capt.*, H. W. Broadbent, R.D., R.N.R.

TRAINING SHIP *Cornwall*, off Portlast (Reformatory Ship). *Supt.* (Capt. Charles H. W. Fyddoke, R.N., *Sec.*, W. Millachip, 66 Colemore Street, E.C.

TRAINING SHIP *Clio*, Bangor (North Wales, Chester, and Border Counties Training Ship Society). *Capt. Supt.*, Capt. F. G. Langdon, R.N.

TRAINING SHIP *Indefatigable*, New Ferry, Birkenhead. For boys of good character only. *Capt. Supt.*, Commander H. Butterworth, R.N.

TRAINING SHIP *Mercury*, Hamble, Southampton, Hants. For boys of good character only. *Hon. Director*, C. B. Fry, Commr R.N.R.

OCEAN TRAINING SHIPS.—This scheme for training officers for the Merchant Service and R.N.R. has now been developed by the acquisition of the Nautical College, Pangbourne, where Cadets R.N.R. are received between the ages of 13½ and 15 for a two years' course on shore, followed by two years' training at sea, in sailing vessels and with the Fleet. Particulars may be obtained from the Managers, 12 Fenchurch Buildings, E.C. 3.

SCHOOL OF ORIENTAL STUDIES (Incorporated),
London Institution, Finsbury Circus, E.C.
*Chairman of Governing Body*, Sir John P. Hewett, G.C.S.I., C.I.E.
*Director*, Prof. E. Denison Ross, C.I.E., Ph.D.

## TECHNICAL EDUCATION.

In addition to the Institutions enumerated below there are Faculties of Engineering at the Universities of *Birmingham*, *Bristol*, *Cambridge*, *Durham*, *Leeds*, *Liverpool*, *London*, *Manchester*, and *Sheffield*, *Wales*, *St. Andrews*, *Glasgow*, and *Edinburgh*, *Dublin*, *National University of Ireland*, and the *Queen's University of Belfast*.

I.—UNDER LONDON COUNTY COUNCIL.

The principal technical institutes maintained or aided by the London County Council are the following:—

*Institutes entirely maintained by the L.C.C.*

BRANCH INSTITUTES, Prince's Road, Vauxhall, S.E.—*Principal* (acting), A. B. Rampay.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Road, S.E.—*Principal*, W. B. Dalton.

CAMDEN SCHOOL OF ART, Delancey Avenue, N.W.—*Principal (acting)*, W. G. Thomas, A.R.C.A. (*Lon.*).

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, Fred V. Burridge.

CLAPHAM SCHOOL OF ART, Edgely Road, High St., Clapham, S.W.—*Principal*, T. McKeggie, A.R.C.A. (*Lon.*).

HACKNEY INSTITUTE.—*Principal*, Percy R. Kirk, M.A., A.M.I.C.E.

(a) *Hackney Institute*, Dalston Lane, N.E.

(b) *Hackney Institute, Sir John Cass's branch*, Cazenove Road, N.E.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W. 12.—*Principal*, John Williams.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Hunting ton, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Principal*, J. Bowyer.

SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W.—*Principal*, H. W. Richards.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, M.I.N.A.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C.—*Principal*, A. J. Bull.

SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N.—*Principal*, Shadrach Hicks.

TRADE SCHOOL FOR GIRLS (L.C.C. Hammersmith), Lime Grove, Shepherd's Bush, W.—*Lady Superintendent*, Miss M. A. J. Bonn.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C.—*Headmistress*, Miss F. E. L. Smythe.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, S.W., with which is incorporated the WESTMINSTER SCHOOL OF ART.—*Principal*, J. Stuart Ker, B.Sc. *Headmaster*, School of Art, A. H. Christie (*acting*).

*Polytechnics aided by the L.C.C.*

BATTERSEA POLYTECHNIC, Battersea Park Road, S.W.—*Principal*, F. H. Newman, Ph.D.

BIRKBECK COLLEGE, Breams Buildings, Chancery Lane.—*Principal*, G. Armitage-Smith, D.Lit.

BOROUGH POLYTECHNIC, Borough Road, S.E.—*Principal*, C. T. Millis, M.I.Mech.E.

CITY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, Sidney Humphries, B.A., LL.B.

NORTHAMPTON POLYTECHNIC, Clerkenwell, E.C.—*Principal*, R. M. Walmsley, D.Sc.

NORTHERN POLYTECHNIC, Holloway Rd., N. 7.—*Principal*, R. S. Clay, D.Sc.

REGENT STREET POLYTECHNIC, 309 Regent Street, W. 1.—*Director of Education*, Major Robert Mitchell.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate.—*Principal*, C. A. Keane, D.Sc.

SOUTH WESTERN POLYTECHNIC, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A.

WOOLWICH POLYTECHNIC, William Street, Woolwich.—*Principal*, A. J. Hope, M.A.

*Technical Institutes, &c., aided by the L.C.C.*

ALBANY INSTITUTE, Deptford.—*Head Mistress*, Miss E. Mason.

ALDERMAN INSTITUTE, Goldington Crescent, N.W.—*Hon. Sec.*, H. S. Minyard.

BERMONDSEY SPECIAL SCHOOL, Parkcombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett, D.D.

CHUDSON INSTITUTE, Wimbledon Rd., Upper Tooting.—*Hon. Secretary*, C. H. Baker.

COLLEGE FOR WORKING WOMEN, Fitzroy Street, W.—*Hon. Secretary*, Miss F. Martin.

DEVAS INSTITUTE, New Road, Battersea, S.W.—*Secretary*, W. F. Holmes.

GOLDSMITHS' COLLEGE, New Cross, S.E.—*Warden (acting)*, T. Raymont, M.A.

HEROLD'S INSTITUTE, Drummond Road, Bermondsey (*Branch of the Borough Polytechnic*).—*Principal*, C. T. Millis, M.I.Mech.E.

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 276 Tower Bridge Road, S.E.—*Principal*, Dr. J. Gordon Parker, F.I.C.

MORLEY COLLEGE, Waterloo Road, S.E.—*Vice-Principal*, Miss C. L. Brennand.

NEWCOMER'S FOUNDATION TRADE SCHOOL FOR DOMESTIC SERVICE, Newcomen Street, Borough, S.E.—*Lady Principal*, Miss R. A. Roberts.

ROYAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Principal*, Miss E. Bradshaw.

SAILORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, A. E. Lodar, R.N.R.

ST. BRIDE FOUNDATION INSTITUTE, Bride Lane, Fleet Street, E.C. (for Printing Trades).—*Principal*, J. B. Biddell.

SCHOOL OF ART WOOD-CARVING, 39 Thurloe Place, S.W.—*Secretary*, J. Bailey.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W.—*Hon. Principal*, A. E. Gridley, M.A.

WORKING MEN'S COLLEGE, Crowndale Road, N.W. 1.—*Superintendent*, E. C. Ducheme.

*Schools of Art aided by the L.C.C.*

BLACKHEATH, LEE, LEWISHAM AND GREENWICH Lee Road, Blackheath.—*Principal*, J. H. Hale.

ST. MARTIN'S, 109 Charing Cross Road, W.C.—*Headmaster*, J. E. Allen.

In addition to the above schools there are Art Schools or Classes attached to all the Polytechnics except the Northern Polytechnic. Schools of Art are also conducted by the City and Guilds of London Institute at Finsbury Technical College and at the South Londen Technical Art School, 122–124 Kennington Park Road (see below).

## II.—OTHER LONDON INSTITUTIONS.

### Imperial College of Science and Technology, South Kensington, S.W.

*Visitor* H.M. THE KING.

*Chairman of Governing Body*, The Marquess of Crewe, K.G.

*Chairman of Executive Committee*, Right Hon. Arthur H. D. Acland.

*Chairman of Delegacy*, Sir John Wolfe Barry, K.C.B., F.R.S.

An Institution for the most advanced training and research in Science, especially in its application to Industry. The Departments and Professors are:—

*Royal College of Science.*

*Mathematics*, A. R. Forsyth, F.R.S., A. W. Whitehead, F.R.S. (*Applied*), Pilgrim, H. L. Callendar, F.R.S., R. J. Strutt, F.R.S., W. Watson, F.R.S., A. Fowler, F.R.S. (*Mathematical Physics*), *Technical Optics*, F. J. Cheshire.

A. E. Conrady; *Chemistry* H. B. Baker, F.R.S., J. F. Thorpe, F.R.S. (*Organic*), J. C. Philip (*Physical*), *Chemical Technology—Fuel and Refractory Materials* W. A. Bone, F.R.S., *Biology* J. B. Farmer, F.R.S. (*Botany*), E. W. MacBride, F.R.S. (*Zoology*), V. H. Blackman, F.R.S. (*Plant Physiology*), H. G. Plimmer, F.R.S. (*Comparative Pathology*), Groom (*Woods and Fibres Technology*), H. M. Lefroy (*Entomology*) *Geology* W. W. Watts, F.R.S., G. G. Cullis (*Economic Mineralogy*).

*Royal School of Mines.*

*Mining* W. Frecheville, *Metallurgy* H. C. H. Carpenter, *Oil Technology* W. W. Watts, F.R.S.

*City and Guilds (Engineering) College*

*Mechanical Engineering and Motive Power* W. E. Dalby, F.R.S., *Civil Engineering* S. M. Dixon, *Electrical Engineering* T. Mather, F.R.S.

*Rector*, Sir Alfred Keogh, K.C.B.

*Secretary*, A. Crew, M.A.

City and Guilds of London Institute, Gresham College, E.C.

(1). *City Guilds Engineering College* (see Imperial College of Science and Technology).

(2). *Technical College*, Leonard Street, Finsbury, E.C.—*Professors* A. J. Margetson, M.Sc., M.I.M.E., *Civil and Mech. Engineering* G. T. Morgan, D.Sc., F.R.S., *Chemistry* W. H. Hocken, D.Sc., *Applied Physics and Electr. Engineering* *Registrar*, L. G. Lines.

(3). *Technical Art School*, 124 and 124 Kennington Park Road, S.E.—*Supt. of Studies*.

(4). *Department of Technology*, Exhibition Road, S.W.—*Sec.*, L. G. Killby.

---

Cordwainers' Technical College, 4a, Bethnal Green Road, E.—*Principal*, F. Y. Golding.

Crystal Palace (School of Practical Engineering).—*Principal*, J. W. Wilson, M.Inst.C.E.

East London College (see University of London).

Faraday House Electrical Engineering College (Southampton Row, W.C.).—*Prins.*, A. Russell, D.Sc.

Institute of Certificated Grocers (Incorporated), 4 Cullum St., E.C.3.—*Sec.*, C. L. T. Beeching.

Polytechnic School of Engineering (Electrical, Civil, Motor, Aero, and Mechanical), 309–311 Regent Street, W.—Henry J. Spooner, M.I.Mech.E.

School of Motor Body and Carriage Building (Balderton St., W.).—*Headmaster*, Ernest Talley.

School of Chemistry and Pharmacy (Brixton, S.W.).—*Principal*, A. B. Griffiths, F.C.S.

Trades' Training Schools, 153 Great Titchfield Street, W. 1.—*Director*, Balmister Fletcher, F.R.I.B.A.

Willesden Polytechnic, Priory Park Road, N.W. 6.—*Principal*, A. J. Bird.

PROVINCIAL TECHNICAL COLLEGES.

Diplomas granted, M.R.C.V.S and F.R.C.V.S.

ROYAL VETERINARY COLLEGE, Camden Town

*Principal and Dean*, Sir J McFadyean, M.B.

*Secretary*, Thomas G. Wight.

ROYAL (DICK) VETERINARY COLLEGE, Edinburgh.

*Principal*, O. Charnock.

VETERINARY COLLEGE, Broomloch St., Glasgow

ROYAL VETERINARY COLLEGE OF IRELAND, Pembroke and Shelbourne Roads, Dublin.

## Secondary Education.

THE HEAD MASTERS' CONFERENCE (*Secy*, W A. Bulkeley Evans, M.A., 12 King's Bench Walk, Temple, E.C.).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, *alternately* (a) at some school represented on the Conference, (b) at London or some University town. In considering applications for admission to the Conference, the committee has regard to the scheme or other instrument under which the school is administered and the numbers in the school. As a general rule, there should be 200 boys at least in any school represented at the Conference, and about ten resident undergraduates at the Universities who have gone direct from the school, but regard is also paid to the *proportion* of undergraduates to the total number of boys in the school.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS (*Asst. Secy*, H. Bendall, M.A., 29 Norfolk Street, Strand, W C. 2).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control (*e.g.*, Board of Education Scheme) by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

ASSOCIATION OF ASSISTANT MASTERS.—Founded 1891. Incorporated 1901. To further the interests of Assistant Masters in Secondary Schools. Annual meetings are held in London, in January. The Association has 35 branches in England and Ireland. *Secretary*, J G Lamb, M.A., 35 John Street, Bedford Row, W C. 1.

*The * denotes membership of the Head Masters' Conference, the §, of the Incorporated Association of Head Masters.*

## AVERAGE HEIGHTS AND WEIGHTS.

The average heights and weights of men in the United Kingdom have been tabulated as follows. The weights include *clothing*, which is generally calculated at one-twenty-fourth of the whole.

| | Average Height. | Average Weight. |
|---|---|---|
| Scotsmen ..... | 5 ft. 8½ in. | 10 st. 10 lb. |
| Irishmen ..... | 5 ft. 8 in. | 10 st. 7½ lb. |
| Englishmen ..... | 5 ft. 7½ in. | 11 st. 2 lb. |
| Welshmen ..... | 5 ft. 6½ in. | 11 st. 4 lb. |

## DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have *three days of grace* allowed, thus, a bill dated 2 Jan. at two months date is not due until March 4. There is, however, no such extension in the case of bills drawn at sight, or on demand, and these must be paid on presentation. In the United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day Bills falling due on Bank Holidays are payable the day after

*A List of the principal Banks in the British Empire, with their Head Offices and Offices in London. Banks with an asterisk* are Clearing Bankers, and those with † are Army Agents; the figures in parentheses denote the London Agents of Banks with no Office in London.*

* Amounts in lire. † Amounts in roubles.

The Bankers' Clearing House, in Post Office Court, Lombard Street, is the medium through which Bankers obtain the amount of Cheques and Bills in their hands for collection from other Bankers. The amount passing through this channel is enormous. The total for the year ending December 31st, 1916, was £15,275,046,000, an increase of £1,867,321,000 as compared with the year 1914. The Town Clearing in 1916 amounted to £12,328,568,000, an increase as compared with 1915 of £1,417,478,000; the Metropolitan Clearing to £1,074,037,000, an increase of £144,963,000; and the Country Cheque Clearing to £1,872,451,000, an increase of £304,880,000. The establishment is managed by a Committee of Bankers—*Chairman*, W. H. N. Goschen; *Deputy Chairman*, Walter Leaf; *Hon. Sec.*, R. Martin Holland, C.B.E.; *Actng Managers*, P. W. Matthews (*Chief Inspector*); A. E. Bath (*Deputy Inspector*).

*The Numbers represent the Names of Banks in the Alphabetical List on pages 321 to 327 (H O.) signifies the Head Office, an asterisk denotes Fair and Market Days.*
