NOTE.

A LIST of objects of antiquarian interest in the Lower Provinces of Bengal, compiled from official records and other sources, was printed in 1879. Since that time measures have been taken for the conservation of a few of the most important monuments, and additional information has been collected with respect to others, of which some have not hitherto been described. To embody this information in a convenient form, and to correct, as far as possible, inaccuracies in the original list, this second edition is now printed.

The list has been prepared by the Public Works Department of the Government with the assistance of Mr. J. D. Beglar, who has recently been appointed to be Archæological Surveyor in Bengal. This assistance was, however, for the most part given before Mr. Beglar was appointed to fill this position, and it is hoped that the new arrangements now in force under his supervision will result in a further increase in the information available with respect to archæological remains. The tabular form in which the list is prepared is that prescribed by the Government of India in the Home Department [Resolution No. 3-168-83 of 28th November 1883], and an attempt has been made to classify the various remains with regard to their conservation in the future. It is, however, probable that the classification will have to undergo extensive modification with a view to bringing the proposals for conservation within a compass in which they can be considered with practical results; and this will be done from time to time as more detailed information is obtained with regard to the relative importance of each building. The form adopted, although in other respects convenient, renders the list unnecessarily bulky, and when it is next revised a more compact arrangement will be made.

The materials from which the lists have been made were furnished by district officers, in many cases from information received from subordinate officers, and their value accordingly varies widely. For the present, however, until some examination of the buildings is made by the Archæological Survey Department, the descriptions furnished by the district returns must be retained, only obvious and glaring errors being corrected.

As the progress of archæological research discloses new objects of interest, they will be noted for insertion in a succeeding edition. It is requested that any omissions or inaccuracies which may be observed in the present list may be brought to the notice of the Archæological Surveyor, who will report them to the Government for consideration when a fresh edition is under preparation.

January 1887

W. B. B.

LIST OF OBJECTS OF ANTIQUARIAN INTEREST

IN THE

PROVINCES UNDER THE LIEUTENANT-GOVERNOR OF BENGAL.

BARDWAN DIVISION.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
1	Bankurah ...	Bishanpur ...	Fort and gates, temples.	The Bishanpur temples are the chief existing ancient buildings in this district. They stand among the remains of an ancient fort of considerable extent, the circumscribing ramparts of which are still visible with one handsome gateway. The temples are built of brick, or rather with plaques of bricks or tile work, and are covered with the most curious sculpture. The history of these objects, however, is known only in so far as given in the inscriptions on them.	The owners are the Bishanpur Rajas.	The gateway is in a fair state of preservation. The temples are in fair repair, but are threatened with ruin from the growth of trees on the walls. There is no way of eradicating the trees, except by breaking open the masonry.	iii	No	No
2	Ditto	The Ras Man-cha.	Of the temples, one must be classed in class ia, one in class ib, and one in class iia, viz:— This temple is absolutely unique in style and architecture, not only in Bengal, but in India. Of the minor brick-buildings in the Bardwan Circle, this is most worth preservation.	ia	Yes	No

BARDWAN DIVISION—continued.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
3	Bankurah...	The Malleswar temple.	The finest of the numerous temples here which are typical of a particular age and style. It is the temple of Bishanpur, and has long been regarded as the oldest in Bishanpur. It is said, on the strength of the inscription it bears to date back to near the beginning of the Malla era.	ib	Yes ...	No
4	Ditto	The "Jor Bangla" temple.	This temple is a curious and unique specimen of its kind, and deserves preservation.	ii a	Yes ...	No
5	Ditto ..	Ohhiupur ..	Temple ..	The only laterite temple in nearly perfect order.	ia	Yes ...	No
6	Ditto ...	Bahulārá ...	Temple* ...	This, as the finest brick temple in Lower Bengal, should be conserved. It is of brick plastered; the ornamentation is carefully cut in the brick, and the plaster made to correspond to it. There are, however, ornaments on the plaster alone, but none inconsistent with the brick ornamentation below.	The mouldings of the basement are to a great extent gone, but fragments here and there exist.	ia	Yes ...	No ...	* This and the following are two of the most important and finest temples in the district.
7	Ditto ...	Sonátapan ..	Temple ...	The oldest temple undoubtedly in the Bardwan Division, and both architecturally and artistically well deserving of permanent preservation after thorough repair. It is a tall temple, solidly built of bricks, each measuring 12" x 8½". Thirty-three courses of bricks with the interposed mud cement make up 7 feet of height. The temple is remarkably solid, the dimensions of the sanctum inside being only 12 feet square. The temple was covered with plaster, and richly and profusely ornamented. The plaster has, however, come off in most parts.	The top of the temple has disappeared long ago and is now a shapeless mass of ruin, on which young trees are allowed to take root and flourish undisturbed.	ii a	Yes ...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
8	Bankura...	Ekteswar ..	Temple ...	The temple is remarkable in its way. The mouldings of the basement are very bold and fine, though quite plain. The temple was built of laterite, but has had sandstone and brick additions made to it. There are traces of three different restorations or repairs. The first was a restoration of the upper portion, which had apparently fallen down. In the restoration, the outline of the tower and general appearance of the temple, before its dilapidation, appears to have been entirely ignored, and a new design adopted. After this, repairs on a small scale were carried out, of which traces are to be seen in various patchy portions of brick and mortar; lastly, a series of brick arches were added in front of the temple.	Kept up by the Pujaris.	ib	Preservation is desirable.	No
9	Ditto ...	Dharapat ...	Temples ...	Inscribed, but not of much interest	iii	No ...	No
10	Ditto ...	Natungram ...	Fort and mounds.	Never been examined	iii	No ...	No ...	Exploration needed.
11	Ditto ...	Karásur Garh ...	Fort and mounds.	Never been examined, but ascribed to the Asuras who ruled Bengal before advent of the Aryans.	iii	No ...	No ...	Ditto.
12	Ditto ...	Kishan Garh ..	Fort and temple	Never been examined	iii	No ...	No ...	Ditto.
13	Ditto ...	Asurgarh ...	Ruined fort ...	There are ruins of a fort and of temples	iii	No ...	No ...	Ditto.
14	Ditto ...	Shamsundar Garh	Fort ...	There are ruins of a fort and of temples	iii	No ...	No ...	Ditto.
15	Ditto ...	Chatna ...	Temples ...	The principal remains consist of some temples and ruins within a brick enclosure. The temple is ascribed to Harmira Uttara Raja, and the legend about it is that Vasuli Devi one night appeared in a dream to the Raja, and said—"Behold certain cartmen and mahajans are passing through your territory, and are at this moment under a particular tree; they have with them a stone in which I have taken up my abode; take it and set	The brick enclosure and the brick temples that existed have long become mere mounds, while the laterite temples still stand.	iii	No ...	No ...	Ditto.

BARDWAN DIVISION—continued.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
16	Bankura	Narayanpur	Temples	it up to be worshipped, for I am pleased with you, and will remain with you." The Raja accordingly sent men and stopped the mahajans and cartmen, and seized the stone in payment of ground rent for the ground they had occupied during the night; he then set it up in the temple which we now see. The temples of laterite are not worth special notice, there being nothing remarkable about them.	iii	No	No	Deserve exploration.
17	Hardwan	Bardwan	Tomb of Bahram.	This is one of the most important of the ancient archaeological remains in the District, and its origin is traced by tradition as far back as the reign of the Emperor Akbar, about 300 years ago. It was erected in honor of a Muhammadan poet named Bahram Sakka (water-carrier). Shere Afkan, the Governor of Bardwan, and first husband of Nur Mahal, afterwards called Nur Jahan, is said to be buried here.	Fair state of preservation.	iii	Yes	Photograph exists.	Important.
18	Ditto	Bithurgurh alias Garh Mandaran, in thana Goghat, sub-division Jehanabad.	A tomb	In this place, which is the site of a mud fortress of by-gone times, there is a brick-built tomb, supposed to contain the relics of Shah Ismail Ghani Ghani Lashkar, a Muhammadan Saint held in great veneration by the Muhammadan residents of the place. There is likewise a stone-lined entrance leading into the fortress.	The relics are mere ruins, and have no claims to either architectural beauty or historical importance.	iii	No	No
19	Ditto	Sanbandee, in thana Goghat, sub-division Jehanabad.	A brick-built arch.	Supposed to have formed the entrance of some house, of which there are no remains at present.	The arch has some inscriptions in Persian, which are worn out by age and are becoming nearly illegible.	iii	No	No	The inscription should be copied and sent to the Government Epigraphist.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.	
							Class.	Remarks.			
20	Bardwan ..	Mayapur, thana Jehanabad.	A mosque ...	The site of a mosque, which, according to local tradition, was built of stone.	Nothing remains except a few blocks of common granite.	iii	No	...	No
21	Ditto ...	Masjidpur, near Kiety, in thana Raynch, sub-division Jehanabad.	Ditto ...	A stone-built mosque	In ruins	iii	No	...	No
22	Ditto ...	Rajermardighi, thana Raynch, sub-division Jehanabad.	Idgah ...	The site of a brick-built idgah	Much of the idgah has been demolished by age.	iii	No	...	No
23	Ditto ...	Lokapur, thana Kotulpore, sub-division Jehanabad.	Mosque ..	An old stone-built mosque standing by the side of a tank.	Out of repair	iii	Yes	...	No
24	Ditto ...	Kalna	Majlis Sahab's mosque.	A large mosque, built of stone and supported by stone pillars. There is also a tomb of Majlis Sahab, built of brick.	In ruins	iii	Yes	...	No
25	Ditto ..	Village Bhalki, thana Ausgram, sub-division Bud-Bud.	A tomb ...	A remnant of an ancient tomb, with two round stone pillars, which are still in existence to about four feet above ground level.	iii	No	...	No	This needs careful examination and excavation.
26	Ditto ...	Village Kasba, thana Bud-Bud.	A collection of heaps.	Each heap is about 120 feet in height and 60 feet in breadth. At the top there are some stones and bricks, but it is not known whether there is masonry or brick-work inside. The chief mound is known as Shatali Parbat.	iii	No	...	No	These need excavation.
27	Ditto ...	Barakar	Four temples	These four ancient temples, besides being beautiful objects in themselves, are easily accessible, and have been selected as typical examples of a style of architecture which spreads far to the west and south over the Ranchi Circle and in Katak.	The towers at least of these four temples are in entire preservation.	ia	Yes	...	No

BARDWAN DIVISION—continued.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
				<p>Temples Nos. 1. and 2 are precisely like each other. As they stand at present, they consist of a simple cell each, surmounted by a tower roof, but there are traces of a Mahamandapa in front of which all but the foundations have disappeared. So far as can now be ascertained, each temple consisted of a cell with its doorway; an antarala, formed in the thickness of the back wall of the Mahamandapa; and a Mahamandapa, about 13½ feet square.</p> <p>One of the temples is inscribed. The record is engraved on the right jamb of the entrance or doorway of the sanctum. It is in two distinct pieces—one of 11½ lines, the other of 21 lines, both in a variety of the Bengali character. From the style of the characters, the temples do not appear to date to beyond the Muhammadan conquest, or at the earliest, to just before. The inscriptions are not dated. One of them mentions the erection of the temple by one Harischandra (Raja?) for his beloved; but who Harischandra was, or when he built the temples, is not mentioned. The temples are particularly interesting, as being the finest known examples of their type.</p> <p>Temple No. 3 stands by itself. It, like Nos. 1 and 2, consists at present of a single cell, but, unlike them, it does not appear to have ever had a Mahamandapa in front, as the mouldings are carried round to the very entrance of the sanctum. Unlike them, too, it does not face east, but due west. In other particulars it is similar to them.</p> <p>Close to this temple, and facing it, stands temple No. 4. It is now inclosed, or partially so, within a courtyard; but the walls of the inclosure are evidently later additions, as they cover up the mouldings of the temple outside on the sides. Divested of this wall, the temple consists of a cell and antarala or vestibule. It does not appear to have ever had a Mahamandapa in front. Externally the tower differs considerably from those of the other temples here, and though in bad order, surpasses them in beauty and</p>						

Number.	District.	Locality	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class	Remarks.		
28	Bardwan	Barakar	Temple	richness. The sculptured details are however not so profuse or minute. This temple cannot be classed with the others. In design and execution it is essentially different, though the same in material; and if style alone be taken as a criterion of age, it should be much older than them.		Only the basement and some sculptures now exist, but these are well worthy of preservation.	iii	Yes	No	
29	Ditto	Devasthan, near Barakar, subdivision Rani-ganj.	Temple	These are temples of no great date but curious. Tradition says that a Rohini Deoghar Brahman once saw a jewelled arm rise out of the waters in the adjacent nalla; he went and informed Raja Kalyana Sinha of Kāsipur, Pachet, who came himself to see, and saw the prodigy. At night the goddess herself appeared to him in a dream, and pointing to an irregular stone, somewhat like a rude argha, said—"This is my murti, worship it." The Raja accordingly caused the temple to be erected, and the stone having been duly inscribed, was installed in the temple. As the Rajas of Pachet did not reside at Kāsipur till comparatively very recent times, the temples cannot be old.	iii	No	No	
30	Birbhum	Dubrajpur rocks in the Hetampur estate.	Temples, masjid, forts.	There are no buildings or ruins of any great antiquity in this district. There are, however, some temples among the Dubrajpur rocks in the Hetampur estate, and the following is a traditionary account of their origin:—When Ram Chandra, the hero of the Ramayan, was about to attack Ravana, King of Ceylon, he found it necessary to throw a bridge across the straits for the conveyance of his troops. He accordingly drove in his aerial chariot to the Himalayas, picked up what stones he needed, and drove back. As he was passing Dubrajpur, his horses took fright and tilted up the chariot a little, so that some of the stones fell out.	iii	No	No	Exploration is necessary.

BARDWAN DIVISION—continued.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
				<p>There is another legend in connection with these rocks, to the effect that they were collected by Visva Karmma, the artificer of the gods, to erect in one night a second Kasi, or Benares, at the command of the god Siva. When, after having made the collection, he was about to commence the work, the day dawned, and he was obliged to vanish, not choosing to expose himself to the gaze of the public. On the top of the highest rock, contiguous to the existing temple, Siva was believed to have dwelt, and the people used to worship him at its foot. A natural division existed between the top and the main rock, and, on the occasion of a violent storm, the former tumbled down, crushing a priest to death. The people ascribed the accident to a desire on the part of Siva to have a temple built for him, and so one Sankar Raj, of Dubrajpur, erected the temple over the fallen rock, which is still believed to be the image of Siva, and is regularly worshipped. There is another building in front of the temple, which was erected about 33 years ago by one Kema Ram Datta, of Dubrajpur. It is said that the man's wife having proved barren, he offered to raise a temple for Siva in case he was blessed with a son. His wish was granted, and he fulfilled his vow by erecting a temple in front of the former one.</p> <p>These two legends relate to the rocks as a group: there are also anecdotes connected with some of the separate rocks. There are two temples. The older one, which stands at the back of the other, contains a large stone, which is worshipped as Siva, and which is enclosed by four walls built close up to it. Behind this temple is a boulder, not very wide, but high, with its sides almost perpendicular. The boulder was originally worshipped as Siva, the presiding deity of the rocks. It happened that the priest, who had grown too old and infirm to ascend it for the purpose of daily worship, was one night visited by Siva in a dream, and was told—"You need not trouble yourself any more to</p>						

Number.	District.	Locality.	Name of subject.	Any local history or tradition regarding it.	Custody, or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
				get up the hill to worship me; my head will tumble down on the plain, and you can worship it there." The priest, on awaking from his sleep, went towards the rock and found that the top had actually fallen broken and was lying on the ground. He then built walls round the broken fragment, and there-after worshipped it as Siva. A little to the east of this temple there is a hollow place on the top of one of the boulders. People say that it never gets dry, but contains water all the year round. Siva (wife of Ram Chandra) once washed her head in it, and since then the water has been considered sacred. Close by is a place where she is said to have sat down. One of the wheels of her aerial chariot also left its mark on a boulder. Another boulder has a long line run across its surface, as if a narrow stream of water had passed over it. Tradition says that it was caused by Ravana while answering a call of nature. There are two rocks, called <i>mother</i> and <i>sister</i> . The former is rather flat, and the other, shaped like an inverted cone, is beautifully balanced on it. Besides the remains in the immediate vicinity of Dabrajpur, there are several other temples, masjids, and a fort within a few miles, of which nothing is known.						
31	Birbhum ...	Nagor ...	Temples ...	Numerous hot springs and temples here attract pilgrims from great distances, the chief object of worship being a symbol of Siva said to have been set up by Vakra Muni, and therefore known as Vakeswar or Bakeswar.	iii	No	No
	Hugli	The principal architectural remains in the Hugli district comprise the Panduah tower and the Triveni temples.						
32	Ditto ...	Panduah ...	Minarah at Panduah.	At the close of the 13th century Shah Sufi, a Musulman Saint, whose mother was sister to the Emperor Firoz Shah, II, who died in 1296 A.D., lived at Panduah. At that time the Hindu Panda Raja ruled over the district, and lived at Mahanath (now Mahanad), not far off. Being oppressed by the Raja,	This partly fell in the last earthquake.	ii b	Preservation desirable.	No

BARDWAN DIVISION—continued.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.			
							Class.	Remarks.					
33	Hugli	...	Triveni	...	The Ghazi Dargah and Masjid.	<p>Shah Sufi fled to his uncle at Delhi, obtained assistance, and with a large army and two men of renown, Zafar Khan Ghazi and Babram Sakka, overthrew the Raja. The old temple of Pandua was then destroyed, and one of the present mosques built with its remains. The larger tower was used as a minarah or minaret for call to prayer, and every Hindu was driven out of the town. A vault in Pandua, in which Sufi was buried, still exists.</p> <p>This story does not give the date of the erection of the tower, but of its use as a mazinah. Mr Blochmann, of the Asiatic Society, was of opinion that the tower resembles in structure the well-known Kutab Minar near Delhi.</p> <p>With regard to the Triveni structure, it is universally reported to contain the shrine of Zafar Khan Ghazi, who assisted Shah Sufi against the Pandua Raja; but this fact proves little as regards the actual date of the building.</p> <p>The building at Triveni is oblong, containing two nearly square chambers, each about 30 feet in length and breadth. Its greatest length is from east to west. It is constructed of massive stones, some basalt, brought probably from the Rajmahal Hills. The basalt in the Pandua mosques is said by Dr. Stoliczka to be the same as that in the Rajmahal Hills. Other parts are built of sandstone, and others appear to resemble the indurated chlorite brought from the Balasor Hills for the finer work of the Orissa temples. The design of the building externally is simple and symmetrical. A doorway or window occupies the centre of the side of each square, flanked by a shallow recess with an ogee canopy. The greater part of the wall surface is quite plain.</p> <p>The tombs of Zafar Khan Ghazi and his family appear to be modern, with stones of the age of the first Muhammadan constructions, built into the newer portions, and the construction of the present buildings must date from the time of Zafar Khan Ghazi (about 1300 A.D.).</p>	The masjid is in fair order, and only needs repair to the domes externally, and to the floor internally. One room of the Dargah is roofless and repairs to the floors, &c., are needed.	ii b	Preservation desirable.	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.					
							Class.	Remarks.							
				There is no doubt that many of the materials are of Hindu workmanship, as numerous stones, especially those which form the lintels and posts of the doorways, are covered with unmistakable carvings. Where these had represented living creatures, they have, as a rule, been almost defaced. The snakes, which twine up the door posts, are suggestive of those in the same position on the Black Pagoda, or temple of the sun, at Kanarak in Orissa.											
34	Hugli	...	Tarkeswar	...	Temple	...	This temple is a famous place of pilgrimage	Kept in good order by the Mahant.	ib	Preservation desirable.	No	..	The income of the temple is ample, and the mahant might be induced to keep it in repair in an intelligent manner, so as not to bury or destroy what is of interest with whitewash or incongruous additions.

36	Ditto	...	Bandel	...	Church	...	The Portuguese Church here is believed to be the oldest in India; it is nearly 300 years old.	Kept in good order.	iib	Ditto	..	No
37	Ditto	...	Chinsurah	...	Church	...	The Armenian Church here is 200 years old, and is, next to the Roman Catholic Church, the oldest in Bengal.	Kept in good order by the community.	iib	Ditto	..	No
38	Ditto	...	Bhastara	...	Fort and temples.	...	A small old fort and some temples belonging to the Bhastara zemindars are of some interest.	They are kept up by the owners, but they might be induced to pay some more attention to them, especially in jungle clearing.	iib	Ditto	..	No

BARDWAN DIVISION—continued.

							Class.	Remarks.		
39	Midnapur ...	Kesiari or Koin-sari in Mohar-banj, 300 miles south-west of Midnapur.	The fort and monastery of Karambera.	<p>The outer walls are about 10 feet high, and inside is a complete row of cloisters about 8 feet wide. Inside, at the east end, are the ruins of a temple of Siva, with the Mahadeva, or image of Siva, at the bottom of a well, where it is still worshipped; while at the west end, inside the enclosure, stands a mosque, which is erect, but unused, the fort having again passed into Hindu hands. On the west inner wall is a stone set into the wall with an Uriya inscription, partly obliterated, showing that this celebrated mosque was constructed by Muhammad Taher, in the reign of Aurangzeb, and that it was completed in 1102 Hijri. To the north is a deep and large tank, full of alligators, called Jogeswar Kund. Kesiari, now only known for its large tasar silk manufacture, was at one time a renowned Mughal tahsil or settlement, and the numerous mosques and houses in stone erected by the Mughals still remain in the so-called Mughalpara or Mughal quarter. One of them bears an Arabic inscription, showing it to have been erected in the time of Aurangzeb. It has since been entirely abandoned, but a stone figure of a Muhammadan King or Saint with a Persian inscription on it, of the time of that Prince, lies on the ground in the middle of the ruins.</p> <p>It is evident that when the Muhammadans settled at Kesiari they dispossessed the Hindus of the Karambera, threw down the temple, and erected a mosque. Afterwards, being defeated by the Mahrattas at a place named Mughalmari, which lies a few miles south, they abandoned Kesiari, and the Karambera returned into Hindu hands.</p> <p>The local legend of the Karambera is as follows:—Maharaja Kapileswar, of the Deb Raj family of Orissa, built this temple, wherein he established the image of a Mahadeva, called Gaganeswar. It is said that this place was covered with woods, and that the Suvarnarekha flowed through it towards the west. Here lived a king, named Bagh Raja, from whom is derived the name of the pergunnah Baghbhum. The cattle belonging to the Raja grazed on the</p>	This structure has the outer walls built of laterite still almost intact.	ii a	Preservation desirable.	No

							Class.	Remarks.		
				<p>fields on the western bank of the river. The herdsman, who tended the flock, was one day chastised by the Raja because one of the cows gave less milk than before. The herdsman privately watched the cow, and, following her close, saw her cross the river, and after taking an easterly direction, make towards a Mahadeva in that locality and pour forth her milk upon his head. This circumstance was communicated to the Bagh Raja, who brought it to the notice of Deb Raj Kapileswar, and the latter caused the Karambera to be built and consecrated to Gaganeswar, as the Mahadeva was called. On the north of the temple he also caused a tank to be excavated, and named it Jogeswar Kund. A mahant, named Ganjiya Maharaj, was appointed for the performance of the daily worship of the idol. During the time of the Muhammadans, one Abdul Samat, a reputed fakir, forcibly occupied the temple, killed some cows within it, and thus profaned its sanctity. He afterwards removed the idol of Mahadeva and built three mosques in the enclosure. From this time forward it is said that the Mahadeva forsook the temple and removed himself to Egra. The mahant and his consort, Bengaburi, also quitted the place. It is believed that by his supernatural power they were carried through the air towards the east upon a fan for winnowing corn; but the woman happening to fall down upon a shallow marsh, the mahant also alighted and stopped at a neighbouring village named Kulaseni, where he breathed his last. His statue, cut out of a block of stone, still exists at Kulaseni, and is worshipped by many. The stone statue of his wife, Bengaburi, is also pointed out near the village.</p> <p>In course of time the place was overgrown with thick jungle, which none could enter. One Banamali Panda, of Gaganeswar, in 1231 B.S., with the permission and assistance of Mr. Donelly, Collector of Midnapur, cleared off the jungle, and discovered in a</p>

				well the image of Mahadeva broken in two. The Karambera, which is still standing, is a splendid edifice of stone. It is 200 cubits in length and 150 in breadth. On the western side of the wall an inscription in Uriya character is engraved on a stone, stating when, and by whom the temple was built. But many of the characters are illegible, owing, it is said, to the Muhammadans having scratched them out.	No	A copy of the Inscription should be sent to the Govt. Epigraphist.
40	Midnapur ...	Dantun, about 36 miles south of Midnapur and midway between Midnapur and Balasor.	Temple of Shamaleswar.	At the entrance of the temple there is a statue of a large bull in stone, lying in front of Siva, and having its two fore-legs cut off, it is said by Kalapahar. It is said to have been erected by the Bhojraja, but the date is not given. One account says that about 200 years ago Chaitanya Mahaprabhu, on his way to Jagannath, brushed his teeth here, and from this circumstance the village got the name of Dantun (tooth-brush). Another account asserts it to have been the capital of Bhojraja, the father-in-law of Vikramaditya, King of Ujain. It would, however, appear from the history given of Dantun by the learned Pundit Jadumandan, about 200 years ago, on the occasion of introducing himself in the Muktimandap (temple of salvation) in Jagannath, that it is a village of old standing, and that its origin is not so modern as the legend about Chaitanya would indicate.	This temple, which is dedicated to the idol Shamaleswar, is a fine one, and still in existence.	iii	No
	Ditto	In the district of Midnapur many interesting ruins are bound up with the history of several of the ancient families, the principal of which are, (i) the Bogri Raj, (ii) Nayagram family, (iii) Mayná raj, (iv) Tamluk family, and (v) Narayangarh family. Having been a border land for years between Bengal and Orissa, Hindus and Aborigines, Muhammadans and Mahrattas, the district abounds with archaeological remains, old ruined garhs or forts, temples, and tanks, to which stories of a historical or legendary character are attached.

							Class.	Remarks.			
41	Midnapur ...	Garhbihta ...	Temple of Sarvva Mangala.	(3) The following architectural remains are associated with the Bogriraj in and about Garhbihta. The pergunnah or raj of Bogri is in a special manner dedicated to Sarvva Mangala, whose worship is said to have been inaugurated by Raja Vikramaditya of Ujain, but his family cannot in any way be identified with the Bogri Rajas. The temple, is an old, spacious, and lofty building, but it is not known when and by whom it was built. It is peculiar in having its door facing the north, and two separate legends are given to account for the fact.	iii	No	...	No
42	Ditto ...	Ditto ...	Temple of Kangseswar Siva.	This temple, which is dedicated to the god Kangseswar Siva, is co-eval with the temple of Sarvva Mangala, and built on the same plan.	Now in good condition, having been recently repaired.	iii	Yes	...	No
43	Ditto ...	Ditto ...	The ruins in Garhbihta.	The remains of the ruinous fort of Garhbihta recall its former state and the local influence which the Rajas once possessed. The places which were filled by the large and massive gates still bear their respective names, (1) Lal Darwaza, (2) Haraman Darwaza, (3) Pesha Darwaza, (4) Rauta Darwaza.	Heaps of rubbish and big stones are all that remain in Rayakot, where once stood the magnificent palace constructed by Raja Tej Chandra. The trees, which adorned the ramparts, have been, with few exceptions, destroyed, and the cannon, which were on the battlements, were taken away.	iii	No	...	No
44	Ditto ...	Jaldya, Garhbihta	Fort	There is a small fort in Nayabasat, which was built in Raja Ganapati Auch's time.	The fort and building, which were consecrated by Raja Jadsab Chandra Sing in Jaldya, are now in a ruinous state.	iii	No	...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
45	Midnapur ...	Garhbhita ...	Seven large tanks.	The tanks are named Jaltungi, Indrapushkarini, Pathurihadua, Mangala, Kabesdighi, Ampushkarini, and Hadua. In each of these there is a stone temple in the centre, and they all lie towards the north gate. From their proximity to the north part of the fortification it is inferred that all of them were excavated in the time of the Chohans (1555 to 1610 A.D.).	These tanks, with one or two exceptions, are in a good state of preservation.	iii	Yes	No
46	Ditto ...	Satdaulla and Mughalmari, Dantun.	Remains in Satdaulla and Mughalmari.	The village Mughalmari is so called from a great number of Mughals having been killed there in a battle fought between the Marhattas and the Mughals, in which the former were victorious. It is about two miles north of Dantun, Satdaulla being five miles from Mughalmari. When excavating earth for the construction of the Rajghat road, several remains of old buildings were discovered in these villages, and numerous bricks and stones were dug out, showing that these places were once the residences of some ancient Rajas.	iii	No	No
47	Ditto ...	Dantun ...	Biddiyadhar and Sarsanka tanks.	There are two large tanks—one in Dantun, called the Biddiyadhar; and the other, about two miles east of it, known by the name of Sarsanka. The first is about 1,000 feet in length and 1,200 feet in breadth. It was excavated under the orders of Vidyadhara, the minister of Raja Telinga Mukund Deva. The other tank was excavated by Raja Sarsanka Deva, of the Pandava family, while on his way to Jaggannath. It is 5,000 feet long and 2,500 feet broad. It is said that there is underground communication between the tanks, by a tunnel made of stone about 7½ feet high and 4½ feet broad. The tank said to have been excavated by Raja Sarsanka Deva is obviously a reference to the great Sasangka, the enemy of the Buddhists, and the most powerful of the later Gupta Kings. Should exploration justify the legend, and any remains of interest be found, they would be of great interest and importance, and would justify their being placed in class <i>ia</i> or <i>iii</i> , according to their state of preservation.	iii	No	No	Examination necessary.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.		
							Class.	Remarks.				
48	Midnapur	Khelar Garh...	(ii) The following remains are connected with the Nayagram family. Balabhadra Singh, the third Raja of Khelar, completed this fortification, of which his father, Pratapa Chandra Sinha, had laid the foundation (1490 A.D.). The building is a regular fortress, with towers and walls of laterite stone and surrounded by a moat. The gate and postern are intact, and the walls are standing. Inside, where there is a good well of drinking water, all the edifices are in ruins; but there are two curious figures in blue stone representing a man of Persian extraction and his wife on horseback. The face of the man, his arrows and quiver, bear some resemblance to the figures found in Nineveh.	This is an interesting ruin in a very good state of preservation.	iii	No	...	No	...	Photographs and examination necessary.
49	Ditto	Chandra Rekha Garh.	This was erected by the fourth Raja, Chandra Sekhar Sinha, in the 16th century, and is a large entrenchment more than a mile square, with one entrance towards the east. The ditch which runs round the Garh must have been excavated at an enormous cost, as in many places the solid laterite rock is cut through 8 or 10 feet in width, and over 6 feet in depth. On the eastern side, where the entrance is, another very deep trench and rampart were constructed, and it was apparently intended to carry this the whole way round, but the design was not carried out, and on the other three sides there is one moat only.	About 200 yards from the entrance there is a building evidently a residence, constructed of laterite stone in ruins; but it is impossible to say if this is the only ruin in the interior of this fortress, which is now over-grown with dense jungle.	iii	No	...	No
50	Ditto	Deul temple ...	This is a remarkable temple of Siva, about a mile east of the Chandra Rekha Garh. It is built of laterite stone, and towers over the jungle to the height of about 75 feet. It is not known who erected the temple, but the expenses of the worship are defrayed by the Nayagram family.	ii b	Yes	...	No
51	Ditto	Stone pillars of Keurchand.	These small pillars, about 1,000 in number, are very curious. They are scattered over a large plain, called Keurchand, about one mile east of the zemindar's residence at Kultika, and vary in height from two to four feet, the lower extremities of the pillars being driven into the ground, and the upper rounded into a	iii	No	.. Number.	Dist. let.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
52	Midnapur	A temple at Uriya Sai.	rough resemblance of human heads. It is said that Jaher Sinha, a Hindu Chief, who ruled at Keareband about the year 1170 B.S., devised this as a means to intimidate his opponents by making the stone pillars appear as so many men in his service, whom he employed constantly to guard the citadel; but they are more probably of the same character as the monumental stones found in Chota Nagpore. It is built of stone, with a marble tablet, bearing an inscription to the effect that Raja Chohan Singh constructed it in 996 B.S., so that the date affords a very satisfactory corroboration of the correctness of the epoch assigned to the Bogri Rajas (1555-1610 A.D.)	ii/b	Yes	... No
53	Ditto	The Mayna Garh	(iii) <i>Mayna family</i> .—The fort is built on an island within an island, and is situated on the western bank of the Kossye, a little above its junction with the Kaliaghye; it was evidently constructed by excavating two great moats, almost lakes. The earth of the first was thrown inwards, so as to form a raised embankment of considerable breadth, which having become overgrown with dense bamboo clumps, is impervious to any projectile that could have been brought against it a hundred years ago. Inside the larger island, the outer edge of which is this embankment, another lake has been excavated and the earth thrown inwards, forming a large and well raised island about 200 yards square, or 8 acres, more or less. On this stands the family residence of the Mayna raj and all its belongings. It appears from the family records that the fort was originally constructed by one of the semi-mythical heroes of this district, Raja Low Sen, at a time when the district was under the dominion of the Gaur Rajas. At the time of the Mahratta ascendancy, the descendant of Low Sen was ousted owing to default of payment of the usual tribute, and the possession of Mayna was made over to Bahubutendra, the founder of the Mayna raj. Six miles to the south of Mayna there is	The inner island, with attached grounds, is overgrown with tangled jungle, except on the spot where the family residence and temples stand. The buildings, however, are in a state of entire disrepair.	iii	No	... No

							Class.	Remarks.		
	Midnapur ...	Tamluk	a depression, about eight or nine miles in extent, which was formerly subject to the overflow of tidal water from the sea; but the Rajas of Mayna erected embankments along it to keep off sea-water, and thus brought a considerable part of it under cultivation. This depression was perhaps a creek of the sea, which must have silted up in course of time. This supposition receives confirmation from the fact that by recent excavations in the villages Tilda, Jalchuck, and others, which stand near the depression, many things have been discovered at a depth of some 16 or 17 feet below the surface, which show that the place must have been a port or sea-side town in days gone by. The configuration of the country also makes this every way probable.						
54	Ditto ...	Ditto	... Temple of Bargbhima.	iv. <i>Tamluk family</i> .—Tamluk figures as a kingdom of great antiquity in the sacred writings of the Hindus, and has been mentioned in the epic poems. The chief objects of archaeological interest in Tamluk are its temples. The most famed are the temples of Bargbhima and of Krishnarjun. It is situated upon elevated ground, and its shape and construction are curious. It is supposed that it was erected during the ascendancy of Buddhism in India.	Although a long time has elapsed since its erection, no portion of it has broken down or decayed, except that in the cyclone of 1864 the pinnacle with the iron circular crest was blown down. The pinnacle was built of a single block of stone; but as no such kind of stone could be easily procured, the devotees of the goddess built a new pinnacle of brick masonry.	iiib	Yes	... No	... Exploration necessary.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class	Remarks.		
55	Midnapur ...	Tamluk ...	Temple of Krishnarjun.	<p>It is ascribed to Raja Tamradhvaj, who is probably the founder of the second dynasty. It contains the statues of the two deified heroes, Krishna and Arjun, both of which are under the same roof and are called Krishnarjun. Tradition says that when Maharaj Yudhisthir, with the object of solemnizing the Aswamedh Jagya for the purpose of absolving himself from the sins incurred by him during the war of Kurukhetra, where his friends and relatives had been slain, had set the consecrated horse at large under the protection of Krishna and Arjun, the animal wandered to Tamralipta, then the capital of a powerful and pious chief, named Tamradhvaj. The sons of Tamradhvaj seized the animal and detained it, whereupon a fight took place between them and Arjun. The contest was long and severe, and Arjun, finding at length that there was no hope of success, asked Krishna, the cause, who replied:—"Arjun, the man with whom you have entered the arena, is a firm believer in Vishnu, you cannot hope for success with him; you should therefore cease to fight and try to accomplish your object by strategy." Whereupon they both transformed themselves into Brahmans in appearance and went to the palace of the Raja. There Krishna pointed out to Arjun abundant proofs of Tamradhvaj's devotion to God, and then they appeared in their original forms. The Raja, finding that Krishna, of whom the gods could scarcely obtain a sight, notwithstanding all the penances they performed for the purpose, favored the palace with his presence, considered that he (the Raja) had achieved the object of his life, and offered many prayers and entreaties to Krishna, who was much pleased with him. The Raja then prayed that he might daily see both Krishna and Arjun in his palace, and on this being granted, stone statues of Krishna and Arjun were made and consecrated.</p> <p>v. <i>Narayangarh family</i>.—The chief objects of archaeological interest connected with the Narayangarh family are the fort itself, with its moats and ramparts.</p>	ii b	Yes

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.	
							Class.	Remarks.

The actual buildings are not very striking, though there are some fine old tanks. The Cuttack high road passes through the western side of the fort, the western rampart running parallel to it for some distance.	In some places the earth-works, which were all that composed the ramparts, have become almost level with the surrounding fields. In other places, especially towards the north, they are still very conspicuous.	iii	No	..	No
57	Ditto	Kablipada in Moharbhunj.	Fort	iii	Yes	..	No	There are some ancient remains here of interest, but the place has not been examined; from its vicinity to Koin-sari, there is it every probability that the remains are of importance.
58	Ditto*	Bamaughati in Moharbhunj.	Buried remains of temples and monasteries.	Some years ago a potful of gold coins of the Roman Emperors, Trajan and Constantine was discovered here: the coins were in excellent order, it is evident therefore that the remains here, whatever they are, date to the early Christian period, and as remains of such antiquity are rare and possess a peculiar interest, full exploration and preservation of what is discovered appears desirable.	iii	Yes	..	No	Exploration and preservation desirable. 							Class.	Remarks.		
36	Maldah	Gaur	The Rajbibi mosque.	1,600 yards in length and over 800 in breadth. The banks are built of brick, and the water remains good to the present day. In the neighbourhood are the two most frequented places of Hindu devotion in the district. This is a small mosque built of brick, but it is not of much interest. Specimens of carved bricks are, however, obtainable from it. The jungle was cleared in 1876.	Unknown.	Decaying	ii b	Yes	No.	
37	Ditto	Do.	The Daras mosque.	It is a handsome brick building, so called from a college which stood near. An inscription now on a new mosque at English Bazar is supposed to have belonged to the former. If so, the Daras mosque was built in 907 Hijri by Sultan Husain Shah. Some of the interior carvings have been carried off. The jungle around this building has been cleared.	Ditto	Ditto	iii	No, but only portions may be preserved.	Yes	The building is too dilapidated to be repaired, only parts of the west wall admit of repair.
38	Ditto	Do.	The Gunmant mosque.	It is a large stone building without inscription. There are no mouldings, nor anything characteristic now remaining. Gold ornaments and coins are said to have been found in a fresh-dug hole inside. There are some ornamental stones within the building. The jungle surrounding this mosque was cleared at Government cost in 1876.	Ditto	Ditto	iii	No	Yes.	
39	Ditto	Do.	The Chamkhana or Chika masjid.	It is called Chika Masjid from the bats which now fill it. It is situated near the palace, and is supposed to have been either a court-house or a prison. It is said to be very ancient, but bears no inscription.	Ditto	Ditto	iii a	Yes	No	One of the finest and largest in Gaur.
40	Ditto	Do.	The Luka Chippi, the Hide-and-seek Lodge.	This is a two-storied and imposing looking city gate situated near the palace. There is nothing characteristic in it, nor in the tombs which adjoin, one of which, Fattah Khan's is well preserved, but shows little skill in workmanship.	Ditto	ia	Yes, as a rest-house and inspection building.	No.	
41	Ditto	Do.	Kadam Rasul	This is a small square mosque of brick, and has been attributed to Husain Shah, but according to the inscription was built by his son Nazrat Shah in 937 Hijri, in honour of the	Khadim	Kept up	ib	Yes	Yes	The building has a small income from attached lands.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
42	Maldah ...	Gaur ...	The Dakhal darwazah.	prophet's foot-print, which is preserved within. The carved brick front is in good repair, and is worthy of being kept entire. The inscription in front of the building is legible and well preserved. An inscription belonging to another building has been placed over the gateway.	Unknown.	Decaying ...	ia	Yes ...	Yes ...	It is a very fine specimen of an old gateway, and is unique.
43	Ditto ...	Do. ...	The golden mosque, Sona masjd, sometimes called Paradiari, near Ramkel.	This was built by Nusrat Shah in 932 Hijri, and is the remains of a fine stone building. A slate which formed part of the base of one of several carved arches is detached. Many of these arches have been entirely spoiled, but it is desirable that no injury should be done to those which remain. The jungle round this building was cleared by Government in 1875.	Ditto ...	Ditto ...	iii	Yes ...	Yes ...	This though not a typical example has portions in such good order as to render preservation desirable.
44	Ditto ...	Do. ...	The remains of the palace wall Bais Gaia.	These are remarkable for strength and height, but have no artistic interest.	Ditto ...	Ditto ...	iii	A small piece may be preserved.	Yes.	
45	Ditto ...	Do. ...	The minaret of Firoz Shah.	This is a high tower, with remains of a room at the top. There are good stone carvings at the entrance to the stairs, some feet above the ground.	Ditto ...	Ditto ...	ia	Yes ...	Yes.	
46	Ditto ...	Do. ...	The "Umer-kazi" mosque.	There are good, well-preserved brick carvings on this mosque.	Ditto ...	Ditto ...	iii	Unknown ...	No.	

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
47	Maldah ...	Gaur ...	The "Natin" mosque.	This was entirely built of coloured bricks, but has no inscription or record of date. The work even in its present state has a pleasing effect as a whole. Government caused the jungle round this building to be cleared in 1875.	Unknown.	Decaying ...	iii	Yes ...	Yes ...	A fine sample of its kind.
48	Ditto ...	Do. ...	Chand Soudagar's building.	The only remains consist of a large number of grey and black polished stone pillars.	Ditto ...	Ditto ...	iii	The pillars should be removed to a place of safety.	No ...	Here are a lot of polished pillars, which deserve careful exploration.
49	Ditto ...	Do. ...	Chamkatti masjid.	There are variously coloured bricks in this old building, but they are likely to fall, from a tree having spread its root among them. The jungle round this place was cleared by Government in 1876.	Ditto ...	Ditto ...	iii	No ...	Yes.	
50	Ditto ...	Do. ...	The kotwali darwazah.	This is a handsome gate of brick in the south wall of the city. An inscribed stone on the roadside, less than half a mile off, belongs to it. The building was constructed by Sultan Muhammad Shah in 800 Hijri.	Ditto ...	Ditto ...	iii	No ...	Yes ...	This should be conserved if possible.
51	Ditto ...	Village Mahudipur, near Gaur.	Two old mouldings.	The district officer in 1875 saw these mouldings built into houses. One of these is very beautiful and excellent as a specimen, though somewhat injured by fire.	Owners	Good order ...	iii	No ...	No ...	Copies of them may be easily taken.
52	Ditto ...	Ditto ...	Dhan Chuck ...	An old front of this mosque with 31 columns is now existing. The inner ornamentation comprises carved and coloured bricks. Large trees are growing out of it. Their tops were cut off at Government expense in 1876.	Unknown.	Decaying ...	ii b	No ...	No.	
53	Ditto ...	Ferozpur ...	Jamma masjid, tomb of Shah Niamut Ullah.	These are great places of pilgrimage and are well looked after.	Khadims	Ditto ...	ii b	Yes ...	Yes ...	Government aid appears necessary to preserve these, as the income is very small.
54	Ditto ...	Dighi, near Sadullapur	Jamma masjid	Ditto ditto ...	Ditto ...	Ditto ...	ii b	Yes ..	Yes.

							Class.	Remarks.		
	Maldah ...	Persahor Panduah.	This city is about 20 miles from Gaur and six from Maldah. It has no apparent advantages of site. It was not accessible by water, and was probably then, as now, surrounded by almost impenetrable jungles. It is in all respects less noteworthy than Gaur, though it contains some remarkable specimens of Muhammadan architecture. On approaching the ruins from the south of the city, the first two objects which attract attention are the monuments of Makhdum Shah Jalâl and his grandson, Kútah Shah, who were the two most distinguished religious personages under the early Muhammadan Kings of Bengal. Numerous pilgrims repair hither at all seasons and from all parts of Bengal.				
56	Ditto ..	Ditto ...	Bari darga, or monument of Makhdum Shah Jalâl.	It has some appearance of antiquity, but is spoiled by whitewashing and tawdry ornaments inside. The monument consists of a small square area entered at the south-east corner. To the right of the door is a little chamber, in which the saint used to perform his devotions. On the west is a plain mosque, and the two remaining sides are occupied by a refectory and a tank. There is a window of carved stone and two handsomely carved stone pillars, and a fragment of a stone rail. Opposite is a brick dome with the tombs of three persons whose names are not known. The tomb of the saint is not here, but at Gaur.	Khadias	Decaying ...	ii b	Yes ...	Yes.	
57	Ditto ...	Ditto ...	A large Hindu carving in stone.	This lies near the last mentioned object. It is a large Hindu carving in stone of a fabulous alligator, broken in two pieces and mutilated. The district officer has removed it, as interesting for its curious workmanship and probable antiquity.	Un-known.	Fair order ...	iii	No ...	No.	
58	Ditto ...	Ditto ...	Kútah Shah's graveyard.	Kútah Shah's graveyard has many tombs of interest with inscriptions. The place is held sacred still. An inscription, now in his "Chillakhana," is said to record his death in 833 Hijri. There are also several carved stone pillars; the one opposite the saint's	Khadias	Ditto ...	ii b	Yes ...	Yes.	

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
				head, and said to have been put up more recently, has a short inscription. The monument occupies a large space. In the centre are the remains of Kútáb's dwelling-house, now in ruins; some of the apartments of the house are lined with tiles which yet retain their enamel of various bright colours. South of the house is an irregular quadrangle, enclosed by a brick wall about 100 yards in diameter. On one side is a square tank edged with cut stone, and on another a mosque in ruins; while at the south-west corner are the tombs of Kútáb and his father, who was also a saint of great repute.						
59	Maldah ...	Peruah ...	The Gharikhana of the choti darga.	This has a door of carved brick, with an arch, and two large and four small pillars,—all of stone—well carved. Near are two large copper drums said to have been presented by Kassim Ali, Nawab of Bengal.	Khadims	Fair order ...	iii	No	...	No.
60	Ditto ...	Ditto ...	The Kútáb Shah's monument.	This is built of brick, with facings of stone, and there is a good deal of stone carving inside, including flowers in stone work. Stone columns lie about.	Ditto...	The place is generally in ruins.	ii b	Yes	...	Yes.
61	Ditto ...	Ditto ...	The bara darwazah.	This is situated near the preceding object, and is built of brick, with stone facing and stone entrance. It bears a long inscription, but has no good carvings.	Ditto..	Decaying ...	ii b	No	...	No.
62	Ditto ...	Ditto ...	Old bridge ...	Under this bridge are Hindu carvings of an elephant and god firmly built into the walls, but of no interest. It is spanned by wooden beams.	Road cess	In good order ...	iii	No	...	No ...
63	Ditto ...	Ditto ...	Adinah Masjid	This is by far the most celebrated building in this part of India. Though partly in ruins, it is yet the most remarkable example which exists of Pathan architecture. It is a quadrangular building, consisting chiefly of cloisters, which surround a central area of the same form. It extends nearly 500 feet from north to south, and 300 feet from east to west. According to	Un-known.	Decaying ...	ia	Yes	...	Yes.

The bridge itself is a rickety structure, which is a serious drawback to traffic, and instead of preserving it, it would be better to pull it down and build a new one, sending the sculptures to the Museum.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
				Mr. Fergusson, the ground plan and the dimensions are exactly similar to those of the great mosque at Damascus. The east side, through which the building is entered by an insignificant door, is 500 feet long and 3 feet wide between the walls. This space is sub-divided by means of transverse brick walls and stone pillars into no less than 127 squares, each of which is covered by a small dome. The northern and southern sides are constructed on the same pattern, but being shorter, contain only 39 domes each. The height of all three is about 20 feet, including a broad ornamented cornice; towards the quadrangle they open inwards with arches, which correspond to the squares. On the outside are many small windows, highly decorated with carved tiles disposed in arches. The western side of the building, that which faces towards Mecca, is composed of a central apartment, the mosque proper, and two wings. The Nave is 64 feet from east to west, 32 feet from north to south, and 62 feet in height from the floor to the centre of the dome by which it is covered. It contains the usual niches on the western wall, towards which the worshippers turned their faces, and a pulpit. These are polished and highly carved. The southern wing is similar in design to the other sides of the building, and contains 90 domes. Its west front, however, is closed by a blank wall, in which are niches corresponding to the 15 rows of arches which here terminate the cloisters. In this wing the common people worshipped. The northern wing only differs in so far as it contains a raised platform for the royal worshippers. This platform, called the Bād-shāh-kā-takht, is supported upon thick columns, and elevated about eight feet from the floor. It is 40 feet wide and 80 feet long, and covered by domes of very little greater height than those over the rest of the building. The adjacent wall contains four

							Class.	Remarks.		
64	Maldah	Peruah	Satasgarh, or 27 towers.	<p>niches and two doors, which are minutely carved and ornamented with passages from the Koran. These doors, through which is the only entrance to the platform, communicate directly with a chamber on the same level with the platform. The chamber is 38 feet square, and has been covered by nine domes of an even height with all the others. The outer front of the west side, though rendered irregular by the projection of the chamber is the best preserved portion of the building, and has been the most highly ornamented. It bears an inscription which fixes the date of the erection of the building by Sikandar Shah at A.H. 707, or 1307 A.D. The stone-work, which is 11 feet high, is quite plain. The brick-work surmounting it, which raises the entire height to 23 feet 5 inches, is sub-divided into minute portions, and is most elaborately carved. The doors and windows on this side, which are of stone, are the parts which have been executed in the best taste. They are of very different styles, having apparently been taken from different Hindu buildings. The carvings of the human figure upon the materials have been carefully obliterated by Muhammadan masons, but yet traces of them can everywhere be detected on a close inspection. There is no calcareous marble anywhere in the building. The rougher parts are of granite, out of a single block of which some of the pillars supporting the domes are hewn. The more polished parts are made of indurated potstone, impregnated with bornblende. It is the great number of small domes which form the peculiar feature of Pathan architecture of this period.</p> <p>This is supposed to have been the royal palace, altogether enveloped in the most dense jungle. There is little to be seen beyond a large tank, on the banks of which are numerous small buildings, connected with each other, which have evidently been used as baths. Near the tank also there is a curious arched passage.</p>	Un-known.	Decaying	iii	Yes	No

							Class.	Remarks.		
65	Maldah ...	Peruah ...	Eklakhi Tomb	It is so called, as it is supposed to have cost a lakh of rupees. Though the materials are chiefly brick, it is the handsomest building in the place. It forms a square, with a frontage of 80 feet, roofed by a dome, with a small turret at each corner. The walls outwardly have been ornamented by carved tiles, and the dome within has been neatly plastered. It is lighted by three small doors, one in each side, and internally forms an octagon. Much of the ornamented brick-work has been carried off. Trees have taken root round the dome, but they have been cut out at Government expense. Over the entrance is a curious stone with a Hindu idol carved on it. It is only slightly injured. About the doorway are other stones, in which might be detected parts of representations of the human figure, the original carvings on which must therefore have been Hindu.	Unknown.	Decaying ...	iii	Yes ...	Yes ...	One of the best preserved and easily conservable remains in Peruah.
66	Ditto ...	Ditto ...	Soua masjid	Ditto...	Ditto ...	iii	No ...	Yes ...	It is not capable of conservation.

109	Santal Pergunnahs.	Rajmahal	Masjid	<p>no typical example, but because it is in such a dilapidated state that it would cost a larger expenditure than would be justifiable when so many other ruins of historical importance and architectural skill lie all over the province uncared for through want of funds. It was once a masjid; but the curious point in it is that there are chambers at the back and sides, evidently intended as residences, and undoubtedly used as such. Mr. Beglar thinks that a set of vaulted chambers exist below, or at least that the walls and the whole building is buried to a considerable depth in accumulation of ruins and in later modifications of floors. The floors of the portion which he considers must have been used as a dwelling have been everywhere extensively dug into by people in search of treasure, but whether successfully or not is not known.</p> <p>The masjid may be roughly described as an oblong building, about 220 feet long by 65 feet wide, standing and completely filling the west end of a court 220 feet wide and about 500 feet long, which was once arcaded or provided with niches along its entire inner face. A gateway at the east end—once noble, now in picturesque ruin gives access to the court, which is overgrown with thorny scrub, and interspersed with tombs and pitfalls.</p> <p>The façade once consisted of five archways in the pointed Saracenic style, of 17 to 18 feet clear span, the central one being larger than the rest, and provided with a projecting demi-portico with octagonal towers at the two corners. The portico was pierced by a noble archway 23 feet wide in space. Over the central archway ran a corridor with small windows terminated at either end by massive square towers, continuations upwards of the abutments of the great arch below. Corresponding features, but without the archway, form the back façade. A battlement cornice</p>	Unknown.	Neglected	ia	Yes	No	<p>The main vault needs only repairs in portions, and removal of about a fourth of its abutting.</p> <p>The domes in the southern half of the masjid and the smaller domes elsewhere are in good order, and need only petty repairs. At the south end the battlements (at a height of 25 feet from the present ground level) and the cornice need removal, not as restorations, but to prevent percolation of rain into the body of the walls. The front tower and corridor need extensive repair, the octagonal towers and the arches, both interior and exterior and the interior floor, need but little repair. Mr. Beglar considers that about Rs. 30 per 100 square feet of roofed surface of the southern half including the great central nave and its noble vault, will be sufficient. But the</p>

				<p>of the curved pattern which is so unmistakable a feature, not only of the grand monumental architecture of Bengal Proper, but of every hut in that province, ran at a height of about 30 feet above the ground along the front and rear façades. It was broken at the great central arch in front and its corresponding projection at the back by the square massive towers and windowed corridor already mentioned as surmounting the central great archway. Four octagonal towers rise at the four extreme corners of the masjid, terminated by short flat-domed tops and spires, and the domes between these on either side at the front and back and the projecting high central piece complete the façade. In the interior it is divided into a great central nave, 50 feet long by 30 feet wide, and two aisles on either side. On the outer sides of the aisles run a series of four small two-storied chambers intended probably for the female congregation, or possibly as residences or oratories for the officiating priests. In the thickness of the wall on the outer sides of these two-storied chambers, which form the outer north and south walls of the masjid, were stairs leading up to the upper row of chambers and on to the roof.</p> <p>The main nave is roofed by a noble vault running from end to end, and screened from the front and back façades by the towers and windowed corridors mentioned before. This vault rises from a higher level than the rest of the roof of the building, and, being of the usual pointed style, rises to a great height (40 feet above the floor) above the domes which roof the aisles, and is a special feature of the constructive arrangements. The lofty towers and windowed corridors which serve as a screen to it in front and back, form commanding features of the exterior style of architecture, and, in the absence of any</p>						<p>northern half is a ruin incapable of being repaired. Mr. Beglar apprehends that the shock of the spontaneous fall of the heavy arches and domes (which are tottering and must very soon give) will perhaps result in the destruction of the great vault itself. He therefore recommends that those portions which cannot be repaired and cannot be trusted to stand without heavy repairs be dismantled, and that the rest be left standing. Care should, however, be taken to weed out trees that root themselves in the walls. The cost will roughly be—</p> <p>125 x 65 = 8,125 Rs. square feet, at Rs. 30 per 100 square feet ... 2,437</p> <p>Demolishing tottering portions and making safe the portions likely to stand, lump sum ... 150</p> <p>Jungle cutting and petty repairs to gate and walls, lump sum ... 150</p> <p>Total ... 2,737</p> <p>Contingencies at 10 per cent. ... 273</p> <p>Total ... 3,010</p> <p>or, say roughly ... 3,000</p>

							Class.	Remarks.			
				<p>inscriptions, its date may, with fair certainty, be fixed at the first half of the 14th century A. D.</p> <p>The aisles are cut up, for convenience of roofing, into squares by cross-shaped pillars, and covered by domes of about 21 feet diameter. They spring at a lower level than the great vault. Lastly, the four two-storied chambers at either end are covered by four corresponding small domes at each end, also rising at a somewhat higher level than the domes of the aisles.</p> <p>It will thus be seen that the lines of the façade are not only broken up with considerable artistic skill in plan, but also, and even more boldly, in elevation—a feature which soon ceased to characterise Muhammadan buildings, as their power and the corresponding art talent in their kingdom decayed.</p>

1	Hazaribagh	Mahaudi Hill ...	Temples ...	There are four rock-cut temples at Mahaudi, three being close to each other, and the fourth on the far side of the hill, about two miles distant from the others. The first three consist of rectangular rooms from 5 to 8 feet long and broad, and from 5 to 6 feet high, cut in large sandstone boulders, with small ogee-doorways about 4½ by 2½ feet cut through square sunk panels. The ceilings and floors are flat solid stone. One temple had a carved sun-flower in the centre of the ceiling of the room and of the overhanging porch; also two small sun-flowers in the spandrels of the doorway, and an elephant on one side,—all cut in relief. Another had no ornament at all; while the third had string and cornice lines of ogee shapes projecting altogether about four inches from the face, a niche on each side sunk in the rock, and a lily over the doorway in relief. The outside of the boulders were quite rough, except in the most ornamental temple, and this was shaped round, with a ridge resembling an inverted boat, the ridge being the keel. Inside they contained some remains of the linga ornament, and one had three niches in its walls. There were no inscriptions on any of them. One is brown outside, the others quite black. On the whole, they are very plain and rough, and have very little claim to be considered architectural remains. They are curious, and that is about all that can be said for them. The fourth temple is in general appearance similar to the rest, being cut out of sandstone rock, but somewhat larger. It has three square rooms—a central one, with a room on either side entered by square-headed doorways.	ia.	Yes	...	No	
2	Ditto ...	Kunda ...	The castle of the old Rajas of Kunda.	This fort is rather imposing from a distance, being a parallelogram, some 280 feet long by 170 feet broad, with an average height of 30 feet. It has a square central entrance	Unknown	Decaying	...	iii	No	...	No

							Class.	Remarks.		
				<p>tower on the west front, and four square corner towers, with straight battlemented walls between them. It was admirably adapted for the warfare of past times, being situated on a tongue of land which projects into a basin surrounded by hills, except on the east side, where it commands a gorge. On three sides it is virtually inaccessible, as the land shelves off abruptly into deep ravines holding nalas in the rainy season. On the west side alone is there anything like a feasible approach, and even here one has to descend into low ground before rising to the level of the gateway. The site appears, therefore, to have been carefully selected for purposes of defence.</p> <p>On approaching nearer from the west, the appearance, architecturally, is rather disappointing, being plain and poor.</p> <p>The central tower is about 30 feet wide by 40 feet high, rising on one side to 50 feet, and projecting about 20 feet from the main walls, the tops of which are about 25 feet from the ground. The entrance gateway, now fallen down, was on the north side of this tower. Passing on a second gateway in the west main wall is traversed and the enclosure is reached.</p> <p>The four walls are flanked by towers 20 feet square, projecting at right angles, like the central tower, about 15 feet, and facing each other. Two of the corner towers are of the same height as the main walls, and two are about five feet higher. The walls are stepped at each tower with the falling ground on which the fortress is built, being highest on the west side, about five feet lower on the north and south, and five feet lower still on the east, in which there is a small postern gateway with masonry steps outside leading down to the valley beneath. The battlements of the walls, where perfect, have two irregular rows of small square loopholes, one just above the string course, the other about two feet higher, and as much from the top of the walls, so that the defenders could fire over the walls from</p>

				<p>the level of their feet and from an intermediate height, <i>i.e.</i>, standing up, sitting, and lying down. The central tower has three distinct tiers of loopholes, two of which are square and one long, beneath the lookout or side donjon tower, which is also square and long, and loop-holed for archery or musketry. The corner towers have two tiers of loop holes, one of which is long, the other square. These towers appear to have had floors and roofs, traces of which now remain, and to have entirely housed the garrison, as no signs of buildings are to be seen elsewhere. They contain small masonry circular staircases, approached from the courtyard, giving access to the several rooms, and to the tops of the walls.</p> <p>Inside the fort the ground is irregular, and appears to have contained no buildings. It is now overgrown with jungle.</p> <p>Perhaps the most curious object in the fortress is the well, which is beneath the north-western tower and is approached by a steep subterranean masonry staircase arched overhead. The mouth of the well is about 30 feet below the ground level, and six feet in diameter, but is now completely filled up with earth and masonry rubbish.</p> <p>Architecturally the fortress is decidedly poor. A pair of small common-place half octagon limestone shafts remain on one side of the main entrance, and this is with the exception of a few stone steps all the cut work about the place.</p> <p>The other doorways are square, having wooden lintel heads. The buildings and walls are composed of small irregular pieces of limestone, with brick string courses and battlements. The whole was once apparently plastered, but this has now for the most part worn off, exposing by no means a good specimen of rubble masonry.</p>

5	Hazaribagh	Madhuban, at foot of Parinath Hill.	Temple and sculpture.	of the caves had still, when Mr. Beglar saw it, traces of painting which cannot be later than the paintings in the Ajunta caves of Bombay, and may be earlier. The natural tunnel under the hill, through which rushes a small rivulet, is noticed in the Ramayana (Griffith, Volume II, page 205, Bk. II, contd. LIV, and Volume II, page 389, Bk. II, contd. XCVII), as well as the cave of Sita (Volume II, page 382, Bk. II, contd. XCVII): it is also noticed by the poet Kali Dasa (Wilson's Translation of the Meghaduta as well as the Raghavansa, yet untranslated). Mr. Beglar does not see what can be done at a small cost to save the caves from being appropriated and blackened by the fires of wandering fakirs, beyond surrounding them with a high iron railing provided with a door which may be locked. The main track from Bishampur, the capital of Sirguja, to Bilaspur, the head-quarters of the Bilaspur Division, Central Provinces, passes within five miles of the hill, and a small branch to the Ramgurb hill would not cost much, and would render the place accessible. On the hill itself and on its slopes lie numerous pieces of sculpture, some unique, all dating to the early Brahminical revival period, about the 3rd century, and a plain temple dating to the later period about the 9th or 10th century.	In ruins	...	ii b	No Lakhanpur. Raja's unfortunate Rants. He has seen many sculptures some of them worthy of close study, and which could only have been carried from Ramgurb built into the walls of his house. He has also heard that inscriptions have been carried off by the Raja. Ra. Railing in and clearing the sites of caves ... 750 Collecting the sculptures, repairing the steps and temple and Chabutras (including drawings and photographs) ... 5,000 Mr. Beglar visited this place many years ago, and his memory does not help him beyond the bare fact that a temple of cut stone in a decaying condition, inscribed sculptures, exists, besides several fragments and ruins round about. That the place dates from an early period cannot be doubted, but he cannot at this distance of time fix the epoch, beyond this, that they belong to a period earlier than the 12th century. The place deserves examination.

45	Manbhum...	Pachet ..	Fort and palace of the Pachet Rajas.	<p>This fort was long ago the main seat of the Raja of Pachet. There are a great many ruins of temples, tanks, fortified gateways, towers, &c. The gateways are all of stone, large solid slabs of a hard, but rather coarse-grained, sandstone, laid without cement, or at most with very little of it. The joints are very fine and no cement can be traced in the blocks which lie scattered about, and which evidently at one time formed portions of the structure. The arches of the gateways are very well built, and iron clamps have been employed in various portions of the walls, but with what definite object is not apparent. The buildings are old.</p> <p>The temples, on the contrary, are all built of small tile-like bricks, thin but very hard, and plastered over. The ornaments are not on the surface of the plaster only, but are on the bricks themselves. The figures in relief appear to have been stamped on the bricks while they were soft, and the bricks burned afterwards. The arches are well built.</p> <p>Remains of tanks, with aqueducts and small temples and residences in the centre of the tanks, also exist. The tanks are now, to a great extent filled up, and the buildings are in ruins.</p> <p>The Raja's residence and court are oblong structures, vaulted over. The vaulting is very well executed; the walls are plastered over, the doors are invariably very small, and there are no windows.</p>	Ditto ..	In ruins ...	ii b	No ...	<p>The buildings here are chiefly temples of brick, a few of stone, and some fine gateways. They are the property of the Raja, who ought to repair some of them. The temples, the fort, and gateways date to Man Singh's period, but there is nothing of sufficient importance for conservation by the State, though they well deserve record and illustration. Mr. Beglar deprecates any expenditure for conservation, but strongly recommends the expenditure of even as much as Rs. 500 for record and illustration. This sum includes the cost of all necessary excavation, jungle cutting and clearance. Excavations, drawings and photographs, Rs. 500.</p>

46	Maubhum	Telkupi, on the Damuda near Chailiama.	Temples	<p>The entire fort is now full of dense low jungle, with the exception of small patches of cultivation in what before were tanks, but are now filled up. There was a deep moat round, outside the external rampart, through which the hill torrents coming down the sides of Pachet Hill were led; parts of it are filled up, others deepened.</p> <p>There are three lines of ramparts and moats, each something in the shape of an irregular pentagon. The second and third or innermost ramparts and moat are now so full of dense thorny jungle, that it is impossible to discover the ruins of structures in the innermost area. There is a fine large temple up the side of the hill, where a large gathering of people takes place annually. It is regarded as a very holy place by the people of the district.</p> <p>The ruins of these temples are the most extensive in the whole district. The river has gradually been encroaching on the high bank on which the ruins stand, and temple after temple has fallen down. Huge blocks of stone, fragments of idols, carved ornaments in stone, all lie heaped up promiscuously in the bed of the Damuda, and their traces are being gradually obliterated by accumulations of sand.</p> <p>These temples are all of stone cut with great care, in immense blocks, and set with very fine joints. There is no mortar whatever. Some of the temples are plastered over. This appears to have been done to obliterate the carving in the stone, with a view to substituting a different design. The original carving appears to have been executed after the stones were in position. The figures are plain and bold. The subsequent carving done in plaster over the ancient carving is different both in figure and style. The temples are now in the hands of Brahmans. The dates of the original temples can not be ascertained from any records there, as no inscriptions exist on them. All the</p>	Unknown.	Partly neglected, only two occasionally repaired by Raja of Pachet.	1a	Yes	No	<p>This is the most numerous, most extensive, and one of the most interesting group of temples in the Division. They are close to the bank of the river and are most picturesque. The remains now consist of a compact group of 13 temples standing in a more or less neglected state, and of the ruins of numerous others in various stages of destruction. Besides these there are in and about the village eight other temples in tolerable preservation, and the ruins of numerous other buildings, monasteries, votive temples, &c. All the temples were substantially built of cut stone, some plain, some sculptured all more or less ornamented with sculpture either on the stone itself or on the coat of chunam covering the stone. Mr. ... most strongly solicits the urgent attention of Government to these</p>

				<p>openings, if small, are slabbed over, the larger ones being covered by corbelling out. The domes are all constructed by corbelling out. There is only one arch in the place, which appears to be a later addition. There are mortar joints both in the arch and in the wall which appears to have been built to separate the temples: those on the north of the wall are now being used as places of worship, and those on the other side have been abandoned.</p>						<p>remains. He has himself seen one temple submerged in the river, and the numerous ruins in the river-bed attest the destruction of several others. To preserve the great and most important group from utter destruction, the construction of spurs in the river is essential; and as stone is ready at hand both from the rocks and from the ruins of temples, the cost will not be great. Three spurs would sufficiently protect the entire site from being submerged. Mr. Beglar proposes that they should be built merely of dry stone thrown in, and the sides roughly formed to a slope of 1 to 1: total length of spurs, 600 feet. Height at extreme end in river, including foundation, 4 feet; at land end, 20 feet; average 12 feet. Breadth average, 5 feet. Total cubic contents, 43,200 cubic feet; at Rs. 4 per 100 cubic feet finished, including setting and carriage, Rs. 1,728, say Rs. 1,750. The conservation of the temples themselves involves, in some cases, merely jungle-cutting; in others it will include excavation and clearing of accumulated rubbish and water-tightening. In no case is it proposed to restore. For water-tightening it is proposed to use a coat of grey cement, after absolutely needful repairs. The repairs to the twenty-one temples at an average of Rs. 200 each, will cost Rs. 4,200; add for excavation and jungle clearing Rs. 1,050 making a total of Rs. 7,000. This is, considering the importance, the extent and the beauty of this, the most repairable group</p>

							Class.	Remarks.			
47	Manbhum	Dalmi, on the Subanrekha river.	Fort and temples.	There are the remains of a fort, the grassgrown mounds of many temples, and one brick temple that is still standing. Being of small size, in fair order, and a type of the smaller brick temples of the district, it well deserves conservation, and would serve to house the numerous exquisitely carved sculptures which lie scattered over a space of about two square miles, exposed to the weather under village trees and on mounds. The choicer ones may be removed with advantage to the Calcutta Museum. There is also a fine tank, within which stand a stone chattri, which also well deserves preservation, though the work can be economically taken in hand only in a season of unusual drought. The fort needs no conservation, but would yield bricks with which to repair the temple.	Unknown.	Decaying	...	Yes	Yes	Yes	of stone temples in the division a small outlay, and it must not be overlooked that nearly a fourth of the outlay will help to protect from the river, not the temples alone, but the land on which the river is slowly encroaching. The temples range in age from probably the 8th century to the 12th; they were evidently repaired once during Mawing's governorship and again at some subsequent period. The temples are almost all Brahmanical, both Vishnavic and Saivic, but it is certain that one of the finest and probably one other, was Jain. Mr. Beglar does not think there were any Buddhist temples among them, but the ruined monastery shows that Buddhist shrines did at one time exist, though now no longer standing. Est. Cost of conservation of temple ... 500 Cost of conservation of sculpture ... 100 Conservation of chattri ... 100 Carriage of the finer sculpture ... 100

51	Ditto ...	Sufaran Deoli.	Suissa Ruined temple and sculpture.	There are numerous sculptures, some of exquisite finish. They probably date as far back as the 7th century A.D. The remains of one stone temple, of which the sanctum is yet intact though the tower has fallen, deserves conservation, and would at the same time serve to house the sculptures. The sculptures are Jain as well as Brahminical, and some are exquisitely finished.	Unknown.	Temple in ruins. Sculpture exposed to weather.	ia	Yes ...	Yes ...	Mr. Beglar most strongly recommends the conservation of what yet exists of the stone temple, which was once a magnificent structure. As there is no want of cut stones lying about, the cost would be small compared with its interest and importance. Ita. Conservation of temple, including exhumation of buried portion ... 800 Carriage of sculpture ... 100
52	Ditto ...	Banda near Chai-lama.	Temple ...	No	Ditto ...	Neglected ..	ia	Yes ...	Yes ...	There is but one temple here in fair order and worthy of preservation. It is in some respects remarkable; but, as regards the great ruined pillared hall in front, Mr. Beglar is now of opinion, in opposition to his previous opinion expressed in Volume VIII, Archaeological Reports, that it was, at least in part, a later addition. Examination with the aid of excavation can alone decide the point definitely. Be this as it may, the temple proper, consisting of three tiers of openings, is abnormally tall, and in this respect differs from others of its class, and approaches the temple of Budha Gaya; but in external form it differs from it. It possibly is a specimen, and a rare one, of a transition style. As the temple proper needs but little to keep

53	Manbhum	Buram	Temples	No tradition	Neglected.	Going to ruin	ia	Yes	No	it is under Mr. Beglar's strong recommendation its conservation. The building is of cut stone. Cost of excavation — 250 Ditto drawing — 500
54	Ditto	Pakbira, 20 miles north east of Bara Bazar.	Temples, sculptures, and slate monuments.	This little known place is one of the richest in Manbhum in objects of interest, a space of 300 x 350 feet being covered completely with temples in all stages of decay. Of these a few are past repair. Some are not of sufficient importance to be repaired. It will be enough to secure details of measurements and photographs; but certainly one, possibly two, as typical examples have strong claims to favourable consideration. The numerous heaps contain a wealth of sculpture to be found perhaps in no other spot in Manbhum, and Mr. Beglar very strongly recommends a thorough examination. The sculptures are Brahminical, Buddhist, and also Jain. They range from probably the 8th or 9th to the very latest period when Buddhism flourished in Bihar before the Muhammadan conquest stamped it out for ever; and in the yield of rare varieties of sculpture of the latest period it is, he believes, richer than any other place in Manbhum, and perhaps in Bengal. For these reasons he assigns a comparatively large sum to examination not only of this, but of the nine other places in its immediate vicinity, viz., Lathondongri, Dhadki tanr, Tuisama, Buddhpur, Bangaon, Poncha, Saguibassa and Kharkingarh. Some of the rarer sculptures, both of those above ground and of those which he expects are yet buried, should be removed to the Calcutta Museum. The others may be placed within the repaired temples for safety. Of the numerous aboriginal monuments of the dead, there can be little doubt that examination and excavation would yield results of great inter-	Unknown. 1	Backerganj	Outpost Niamati	Bibi Chini's mosque.	An old mosque raised on an artificial mound of considerable size and height. It is said to have been built by Bibi Chini, sister of Niamatulla, who founded Niamati, and is evidently a relic of the time when the Muhammadans first settled in the district.	ii a	Conservation desirable.	No ..	Detail drawings and photographs desirable.
2	Ditto	Kostea, near village Ramsiddar.	Sali Khan's mosque.	A mosque, built by the well known Sali Khan. It is considerably superior in architectural merit to Bibi Chini's mosque. Its roof is supported by four stone pillars, which must have been brought from a great distance.	ii a	Ditto.	No ..	Ditto.
3	Dacca	Lal Bagh	Ruined fort and palace.	These were commenced in 1678 by Sultan Muhammad Azam, third son of Aurangzeb, but never entirely finished. The river front (to the west) with walls and battlements is very picturesque. The old gateways also remain.	ii a	Deserves and is capable of partial conservation.	Photographs exist.
4	Do.	Ditto	Pari Begam's tomb.	Erected within the Lal Bagh enclosure towards the end of the 17th century by Nawab Shaista Khan, successor of Sultan Muhammad Azam. It was built in memory of the Nawab's daughter, Bibi Pari, wife of Muhammad Azam.	Fair preservation	ii a	Well worthy of preservation.	No ..	It is unique in Lower Bengal.
5	Do.	Ruins of Nawab's palace	ruinous	iii	Too dilapidated for conservation, but drawings to scale needed.	No
6	Do.	The chawk or market place.	Fair order	iii	No
7	Do.	Idgah	Still used for religious ceremonies during the festival of Id. It was built in 1640 by Mir Abdul Kasim, household dewan of Sultan Sujah	Fair order	iii	Nothing needed.	No
8	Do.	Husaini Dalan	It is said to have been built by Mir Murod, darogah of the Nawara Mahals and Superintendent of public buildings, in the time of Sultan Muhammad Azam. It is still used for religious purposes during the Muharram, and supported by an annual grant from Government.	In use	iii b	No ..	Photographs needed.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.

16	Dacca	Sonargaon	Panch Pir Dargah, in Mahalla Baghalpur.	<p>the 16th centuries, Sonargaon was the capital of an independent monarchy. About the 16th century, the city swarmed with pirs, fakirs, and other religious mendicants to a greater extent than perhaps any other Indian city. Amidst the ruins and forests of modern Sonargaon it is said that at least 150 'gad-dis' of fakirs are distinguishable.</p> <p>The following is a description of the old buildings of Sonargaon.</p> <p>The sepulchres of the five pirs are placed parallel to one another, and are raised about four feet from the ground. The river Brahmaputra must in former days have flowed past them. It was at one time intended to cover the tombs with a roof, but the pillars were never raised more than a few feet. The age of these graves, the names of the holy men, and the country whence they came, are unknown; the belief is that they came from the west. At the south-west corner of the enclosure is a small uninteresting mosque, which, like the tombs, is rapidly falling into ruins.</p> <p>This dargah is considered so sacred that even Hindus <i>salam</i> as they pass, and Muhammadan pilgrims resort to it from great distances. There are only two other shrines to which Muhammadans make pilgrimages in Eastern Bengal,—one is the tomb of Shah Ali at Mirpur, a few miles north of Dacca; the other is the dargah of Pir Badur Auliya, at Chittagong. The latter is the patron saint of all Hindu and Muhammadan boatmen and fishermen in Eastern Bengal.</p>	In a very ruinous state. The wall surrounding the enclosure has fallen down in places, and several large jungle trees grow close to the tombs, and will ultimately destroy them.	No	Exploration needed.
17	Ditto	Ditto	Tomb of Ghyasuddin.	<p>About five hundred yards south-east, on the edge of a filthy trench called 'Magh Dighi,' is the so-called tomb of Ghyasuddin Azam Shah, King of Bengal, and correspondent of the poet Hafiz. This mausoleum formerly consisted of a ponderous stone, which occupied the centre, surrounded by pillars about five feet in height. The stones are all beautifully carved, and the corners of the slabs and the arabesque tracery are as perfect</p>	The tomb has fallen to pieces. The iron clamps that bound the slabs together have rusted, and the roots of trees have undermined the massive stones.	is	Conservation desirable.	Photographs exist.

Number	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
18	Dacca	Sonargaon	Damdama, or fort, and tombs in village Maghrapara.	<p>as on the day they left the workman's hands. The stones are hard, almost black, basalt.</p> <p>At the head is a prostrate sandstone pillar half buried in earth. It was apparently used, when erect, as a <i>chiraghda</i>, or stand for a light.</p> <p>[This tomb might be easily repaired, and the cost of doing so would be inconsiderable. There is no old building in Eastern Bengal which gives a better idea of Muhammadan taste, and there is none which, when properly repaired, would so long defy the ravages of time. The Muhammadans of Sonargaon are too poor to reconstruct it themselves. They take great pride in showing it, although they know nothing about it, but the name of the Sultan, who is supposed to be buried there, and they take every care that none of the stones are carried off.]</p> <p>The village of Maghrapara is considered by the natives of Sonargaon to be the site of the ancient city. It has in its immediate neighbourhood several undoubtedly old buildings, and within a short distance is an eminence, which still bears the name of "Damdama" or fort. This mound, which has a magnificent tamarind-tree growing on its top, is circular, but no traces of fortifications are visible. It has been used for many years by the Muhammadans as their <i>Ashurkhana</i> during the Muharram. On the tenth day all the garlands and ornaments that are made in place of <i>taziyas</i> are here collected and admired by the people.</p> <p>In the small market village of Maghrapara is the tomb of Munna Shah Darvesh. At the foot a light is always burned at night, and every orthodox Muhammadan, as he passes the tomb, stops and mutters a prayer. This saint, about whom nothing is known, is said to have lived at the same time as the more famous <i>pir</i>, whose tomb stands a little to the north.</p>	ii b	No	No	Exploration needed.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
				<p>This latter is called the dargah of Khwand Kar Muhammad Yusuf. It contains the tombs of the saint, of his father, and of his wife. It consists of two elongated dome roofed buildings, each surmounted by two pinnacles or kalas, covered with, or formed of gold.</p> <p>These tombs are destitute of any ornament inside. They are kept scrupulously clean, and are covered with sheets, on which devotees throw a few pith necklaces. When a ryot has reaped an unusually abundant harvest, he presents a few bundles of ripe rice at the tomb in token of gratitude. If any calamity, such as the illness of a member of his family, is threatening, he brings rice or batasa, and prays the saint to avert the affliction. Hindus are as confident of the efficacy of this propitiatory offering, and as frequently employ it, as the Muhammadans.</p> <p>Close to the tombs is a modern masjid, with a khutba, or inscription, dated A. H. 1112. It was probably erected by the pir Muhammad Yusuf. Facing the mosque is a small graveyard enclosed by a brick wall. The graves are numerous, but none are of any importance. Inserted in the wall, at the left hand side of the entrance, is a large black stone, measuring two feet by one and a-half. The natives believe that if a person has lost any property he has only to put a coating of lime on this stone, and he will infallibly get the property back. It was covered with an inch and three quarters of lime when examined in January 1872.</p> <p>On scraping off the plaster a beautiful Tughra inscription* was found, with the name Jalaluddin Fatch Shah, A. H. 889. This is the oldest inscription discovered in the Dacca district, with the exception of the one on Adam Shahid's tomb in Bikrampur, which bears the same king's name and the date A. H. 888.</p> <p>On the roadside, near Maghrapara, are two other inscribed stones. The writing* on both is continuous. It includes the name and title of Alauddin Husain Shah, A. H. 919.</p>						

*Copy of these should be sent to the Government Epigraphist.

							Class.	Remarks.		
19	Dacca	Souargaon	Shah Abdul Ala's tomb.	<p>Close to the tomb, above mentioned, is a ruined gateway, called the naubatkhana where musical instruments were sounded morning and evening to announce to travellers and fakirs that a place of shelter was at hand. At the back of the mosque are the ruins of a house called the tahbill or treasury, where feasts were given by the Superintendent or mutawalli of the mosque. The present holder of this post is too poor to entertain anybody. Still further to the north-west are the ruins of the dwellings of the Khwandars. It is only within late years that this building, which had an upper room at each end, has become uninhabitable. The last residents taught boys to recite the Koran.</p> <p>In the muhalla north of Maghrapara, called Gohatta, is the tomb of a very celebrated pir, known as Shah Abdul Ala, alias Pakai Dewan. It is narrated that he retired to the forest, where he sat for twelve years so absorbed in his devotions that he was unconscious of the lapse of time. When found he had to be dug out of the mound the white ants (<i>puka</i>) had raised around him, and which reached to his neck. The same story is told of the sage Valmiki and of others. This pir must have died near the end of the last century, as persons now living remember his son, Shah Imam Bukhsh alias Chulu Meah. Father and son lie buried close together. At the head of the grave of the former is placed the stone lattice on which he spent his twelve years of meditation. The tombs are otherwise of no interest. They are merely heaps of mud kept carefully clean and covered over with a grass thatch.</p> <p>In this same quarter a very large mosque formerly stood, which fell into ruins, when the proprietor sold the bricks to the Hindus of Narainganj. Muhammadans extenuate this offence by asserting that the proprietor, who was a pensioned Deputy Magistrate,</p>	iii	No	No	Exploration desirable.

Another, that he was a great thief-catcher, who nailed every thief he caught to a wall and then beheaded him. Having strung several heads together, he threw them into an adjoining khul, which has ever since been known as the munda mala, i.e. "necklace of heads." This tomb is so venerated, that parents, Hindu and Muhammadan offer at it the chonti or queue of their children when dangerously ill.	iii	No	...	No
22	Do.	...	Ditto	...	Gharibulla's Mosque.	In a quarter near this, called "Bari Makhlar," is a comparatively modern mosque erected by Sheikh Gharibulla, formerly a jachandar, or examiner of cloth, to the East India Company. It bears the date A. H. 1182, and it is still used by the Muhammadans.	iii	No	...	No

							Class.	Remarks.		
				The interior of the mosque is 16½ feet square. The square walls, as they ascend, become transformed into an octagon. At each corner are quarter domes or arches, and the dome rises from the pendentives. As usual there are three mihrabs. The centre one is formed of dark basaltic stones beautifully carved and ornamented with arabesque work. The two side ones are of brick, boldly cut and gracefully arranged. The bricks in the archways have been ground smooth by manual labour. The pillars at the doorways are sand-stone, evidently the plunder of some Hindu shrine. Until twenty-six years ago this mosque was used for worship. The makhadin or servant having died, no care was taken of the building, and the dome threatened to fall in, so that worshippers migrated to the modern mosque.						Drawings, and photographs desirable.
26	Dacca	Sonargaon	A mound with a stone.	Beneath a gular or wild-fig tree, near Sadipur, is a mound with a large stone inscribed in Tughra characters of unknown origin. In the inscription the name of Sultan Nasiruddin Nusrat, A.H. 929, is written. This monarch is called by Stewart Nusserit Shah or Nasib Shan.			iii			Copy of the inscription should be sent to the Government Epigraphist.
				This stone was carefully removed and deposited in a place of safety at Sadipur.						
27	Do.	Ditto	Temples	These are of importance; if still standing they deserve preservation.			iii	{ Conservation would be very expensive, detailed drawings are all that is needed	No drawings exist, but there are photographs in private hands.

							Class.	Remarks.				
1	Balasur ...	Village of Kopari, at foot of the Gazia hill, Nilgiri range.	Mahratta temple.	<p>The only important object of antiquarian interest in this district is the remains of a building supposed to have been a Mahratta temple in the little village of Kopari, situated at the foot of the Gazia hill of the Nilgiri Range.</p> <p>The body of the structure is about 30 feet long by 30 feet broad, and consists of a rectangular basement of blocks of laterite, on which has been erected a range of pillars, four on each side and two at each end. Six of these pillars are still standing; they are about six feet high, and have each been hewn out of one block of stone. At one end there was a portico or entrance of a similar structure, but none of the pillars now remain standing. At the other end of the centre building there was an inner temple, probably the abode of the god or goddess, which is also completely in ruins. On the north side of the ruins there is a small tank of considerable depth, about 25 feet by 25 feet, with a flight of stone steps leading down to it, all hewn out of the solid rock. At some little distance south of these ruins is a mound of considerable extent, now overgrown with jungle. Nothing is visible but two large sentry boxes of large blocks of laterite. To the west of the ruins there is a large tank, on the banks of which there is what the natives call a padmapad. It is a little building about three feet high, covering a stone impression of some goddess's feet, which is very distinct.</p>	iii	No	...	No	..	Exploration desirable.
2	Balasur ...	Nilgiri ...	Temples ...	These are of some antiquity and deserve to be cared for.	iii	Yes	...	No.	
3	Kattak ...	Santamadhah, about a mile from Jajpur.	A colossal image.	This is the image of a male deity, the lower half of which is buried under roots and logs, the upper half, which is nine feet in length, being exposed. The head alone, from the chin to the edge of the head-dress, is about 4½ feet long; the top of the head is	iii	Preservation desirable.	No	...		A worthy and desirable object for the museum.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
4	Kattak	Chandeswar, Jajpur.	A monolith	<p>flat, and the head-dress is of a most peculiar kind, something like what one sees in old Egyptian sculptures. The hair is curly, and the ears are large and pendulous. From the chin to the waist is about 4½ feet. It is 5½ feet across the upper part of the breast, and the whole figure must have been 18 or 20 feet high. The stone is not the magni or chlorite slate, of which the other colossal images near Jajpur are made, but a coarse reddish granite. The nose is broken off.</p> <p>This is about 22 feet high, and stands on a pedestal made of three enormous blocks of stone, each about five feet long, five feet broad, and about two feet thick. The monolith itself is 3½ feet square at the bottom; it is bevelled off for some inches at each corner, and then runs up into a fluted shaft for about 20 feet. The circumference of the column where the fluting begins is over 11 feet, and the height is thus about six diameters. On the top of the monolith is another enormous stone over six feet high wrought into a regular capital. The lower part of the capital is round for about 4 feet up. On this garlands are sculptured; then the stone is cut into the shape of a lotus calyx, on which the upper portion rests. This upper portion forms a square of about 4½ feet, and looks as if intended to support a statue of some sort. About half a mile from this column is found the sacred vulture of Vishnu [garud] which the column is said to have supported till the time of the Mughal invasion, when Kalāpāhar pulled it down with some difficulty. The Muhammadan General attempted to pull the column down by chains and teams of elephants, but failed. The enormous capital of the column appears to have been moved an inch or two from its position, but the monolith remains as firmly fixed as on the day it was set up. At the corners of the square portion of the capital and of the square part at the bottom of the monolith holes have been drilled, as if for</p>			is	Yes	A drawing of it exists in the J. A. S. B.	

Number	District.	Locality	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.

5	Katak	Jajpur	Three images of Kali, Varahini, and Indrani.	<p>ropes or chains to pass through. This column is really well sculptured, and the workmanship shows a considerable advance on that of the statue of Buddha. The garud, which is said to have crowned this column, is in a pekka thakurbari about half a mile from Chandeswar. It stands on a sort of base, corresponding to the capital on the top of the monolith. This base is about three feet high and of one block of mugni stone. At its lowest part it is round, about 9½ feet in circumference, and adorned with sculptured heads of lions. Over this the stone is, like the capital of the monolith, cut into the shape of a lotus calyx. This is 12 feet in circumference. The stone then is left a square platform. On this platform, four feet two inches square stands the garud itself. The figure is in a kneeling position, and is four feet high. It is fastened down to the square platform with lime. There can be no doubt that the base on which this figure stands belongs to the monolith in the four corners of the platform holes are drilled exactly as in the corners of the monolith and its capital.</p> <p>Of these and of the seven figures in the gallery on the river bank, Stirling, in his work on Orissa, pages 37 and 38, gives the following account :—</p> <p>At the back of a high terrace supporting the cenotaph of Syad Bokhari, a Mussulman Saint, three colossal statues of Hindu divinities are shown. They lie with their heels uppermost on a heap of rubbish, in precisely the same position apparently as they assumed when tumbled from their thrones above by the Mussulman conquerors of the province, who destroyed a celebrated temple at the spot, and further desecrated it by erecting on its ruins a shrine and mosque for their own worship. The images are cut in alto-relievo, out of enormous blocks of the indurated</p>	ib			
					Preservation desirable.	No	The figure called that of Varahini is more probably that of Vajra Varahi of later Buddhists. The removal of the figures to the museum appears desirable.

				<p>mugni or chlorite slate rock, and measure about 10 feet in length. They represent Kāli, wife of Siva, Varāhini, the wife of the Boar Avatar (incarnation of Vishnu), and Indrāni, the wife of Indra; and though the subjects are grotesque, the execution is distinguished by a degree of freedom, skill, and propriety, quite unusual in the works of Hindu sculptors.</p> <p>The first is a disgusting, but faithful representation of a colossal naked body of a female with many of the muscles and tendons exposed to view. Her hair is brushed back under a snake fillet, with a death's head over her forehead, and the distended hood of the cobra as a canopy above. Her serpent tresses fall down in twisted horror over her cheek. An endless string of skulls winds round her neck, her breast, and her whole body. She sits upon a kneeling diminutive figure of her husband, Mahadev, and the whole rests upon a lotus-leaved pedestal. The second has a boar's head and a huge pot-belly like that of Ganesa. Magnificent bracelets adorn the wrists and shoulders of her four arms. Heavy necklets almost hide the bosom and waist, which her drapery leaves half bare. Bell-bangles encircle her ankles, crescent-shaped ear-rings depend from her ears, and on her head she wears a jewelled tiara, with the hair done up into a tower of curls, and a heavy tress falling upon each shoulder. She sits on a finely-carved buffalo. The third sits in calm majesty with an admirably-cut elephant as her footstool. A muslin drapery (sari) falls in delicate curves to her feet, and is fastened by a girdle at the waist. Elaborate ornaments cover her breast, and her hair towers up in a cone of curls interwoven with rich gems, with a single massive tress hanging down upon either shoulder.</p> <p>On the banks of the river there is a sort of raised gallery filled with mythological sculptures, amongst which seven large colossal</p>

				figures of the female divinities, called Matrias, are particularly remarkable. They are said to have been recovered lately by a mahajan out of the sand of the river, where they were thrown by the mughals, on the shrines being destroyed. This mahajan built the edifice in which they are now deposited. They differ little in style and dimensions from those described above, but appear to be cut out of blocks of basalt or green stone, instead of chlorite schist. They are styled respectively Káli, Indráni, Kumari, Rudráni, Varáhini, Vaishnavi, and Yama Mátri. The figure of Káli is sculptured in a very spirited manner. She is represented with an axe in one hand and a cup full of blood in the other, dancing in an infuriated attitude, after the destruction of the giant Raktavija, and trampling unconsciously on her husband, Mahádev, who, as the fable runs, had thrown himself at her feet to solicit her to desist from those violent movements which were shaking the whole world. That of Yama Mátri, the "mother of Yama," is also a very striking and remarkable piece of sculpture. Her form is that of a hideous, decrepit old woman, seated on a pedestal, quite naked, with a countenance alike expressive of extreme age, and that sourness of disposition which has rendered her proverbial as a scold. There are likewise fine representations in this mythological gallery of the Narsingha Avatar, and the giant Ravana, with his numerous heads and arms.			ii a	Preservation desirable.	No ...	These figures deserve preservation and should be placed in the museum. Some of them would be unique, as there are now no examples of this description.
				The old Hindu temple opposite the kachari, from which the three figures of Káli, Indráni, and Varáhini, were raised, has been appropriated by the Mussalmans for two of their pirs or saints.	ii a	Ditto ...	No ...	Exploration desirable.
				The enclosure is about 200 by 100 feet broad. About 70 feet back from the entrance there is a raised terrace of massive masonry about 15 feet high. There are two flights of stairs leading up to it on each side. Between the	iii	Ditto ..	No ..	The platform appears to be the remains of the original temple, not a Muhammadan addition.

...	Kattak	two flights of steps the terrace projects 26 feet. On this projection is the tomb of Syad Bokhari. All round the wall on the west side of the terrace are niches about 3½ feet high. They are something in the shape of Gothic arches, and are possibly of Mussalman construction.							
...	Jajpur	The archaeological remains of the Kattak district are for the most part confined to the ruins at Jajpur and the antiquities of the Alti hills.							
				Jajpur is said to have been from the earliest times a place of importance, and, after Puri, by far the oldest town in the province. At a place called Narpada, about two miles south-east of Jajpur, there is a mound covering the ruins of the palace of the founder of the Kesari dynasty. It is possible that excavations here might bring some ancient remains of value to light. Asari Bhim Deo, the second and by far the most eminent of the Ganga dynasty, who is said to have ascended the throne in 1174, is stated to have held his court permanently at Jajpur during the earlier part of his reign. During the period from this time to about the middle of the 14th century, the best of the ancient remains at Jajpur were most probably constructed. In 1558, during the reign of Mukund Deb, Kálápáhár invaded Orissa, and the battle field is still shown near Jajpur, where the Mussulmans obtained the victory. Kálápáhár then threw down the colossal statues of the Hindu gods, which have now lain prostrate for nearly three centuries.							
				The most important of the antiquities of Jajpur, arranged in order of time, are the following:—							
6	Kattak	Ditto	Bridge at Tatalumul.	This is a very peculiar eleven-arched bridge not far from Jajpur. It is similar to the one called the Athára Nala bridge near Puri,	ii(a)	Yes	..	No	Road Cess to keep it up.

				<p>the arches being formed entirely by corbeling or making each successive layer of masonry overlap by five or six inches the layer below, until the two piers come at the top to within a foot of each other. On this space a long narrow block of stone is laid as a sort of key-stone. Over the key-stone, transversely, enormous blocks of stone, some of them 4½ feet long and half that in breadth, are laid apparently with the view of making the upper layer of the piers on each side grip the key-stone. Each of the layers is formed of stone about a foot thick. The lower half of these stones, at the openings or arches, is bevelled off for about six inches, the upper half being perpendicular. In this way each side of the arch resembles an inverted stair with the edges of the steps worn off. The whole bridge is about 240 feet long and 32 feet broad, and each of the piers is about 10 or 12 feet wide. The arches or openings are small near each end of the bridge, and become larger in the middle.</p> <p>The height of the central openings is about 9 feet, and the width about 10 at the bottom. The smallest openings are 5 feet high and 6 feet wide at the bottom. The abutments at each end are of laterite; in the centre the masonry is of coarse red granite. In the highest arch there are about 12 tiers of masonry above ground. There are two points, however, in the bridge which tell somewhat against its antiquity. The first is that in various parts of the piers and under the openings or arches one notices stones which have evidently formed parts of another and older structure. Here and there one notices on the stones bits of chequered carving, and on the centre of the piers on the upper or flood side of the bridge there are a number of stones with bas-reliefs on them. These bas-reliefs are disposed with a certain regularity in the centre of each pier, but it is evident that they have come from an older structure, and been fitted into</p>

							Class.	Remarks.			
				<p>this. One of these is a carving probably intended for a representation of Budiha in a sitting posture. It has got the square broad face and long ears, and heavy head and feet one sees in figures of Buddha. The other point that tells against the antiquity of the bridge is the two kinds of stone used. The laterite of the abutments and of one or two of the smaller side arches, and the coarse granite of the centre arches would indicate that at least the masonry of the centre arches is of more recent construction than that at the side. In any case, however, the bridge must have been constructed before the Mughal conquest of Orissa, and possibly the explanation of the difference in the stone is that the centre arches of laterite having fallen in, the ruins of some Buddhist temple were used to rebuild it.</p>							
7	Kattak	Jajpur	Temple of Barranath.	<p>This is on the north bank of the Vaitarani. On the river face of it there is a stone revetment about 800 feet long, and 12 courses of masonry high near the entrance to the temple. There is a similar, but smaller, revetment exactly opposite, on the south bank at the temple of Jagannath. There is nothing very remarkable about the temples themselves. In front of the door of the temple of Barranath are two figures of lions rampant, resting on their haunches. They are fairly well executed, but they have been daubed over with lime.</p>	ii b	Yes	... 10	Kattak ...	Alti Hills, Jajpur	Temple Vasuli Thakurani.	<p>The other structure, which stands on the pass between the two peaks, was built on the same plan as the first, consisting of a porch and a cella, surmounted by a small pyramidal tower. It has no columns, and is formed of solid walls with niches in the interior for the figures of Buddha.</p> <p>This temple is dedicated to Vāsuli Thakurani, who is represented by a rudely-shaped clay model of a human face covered with red paint, and draped in coarse dhutis. There are five figures of Buddha standing in niches on the outer side of the walls of the cell. The images are all exactly alike, and are fine pieces of sculpture.</p>		This is in a better state of preservation. The roof of the porch has given way, but that of the cella still stands.	ii a	Yes ...	No ..	Exploration and drawings desirable.
11	Ditto ...	Ditto ...	Mosque of Takht-i-Sulaiman.	<p>This mosque stands on the southern face of the Alti Hill, 2,500 feet above the level of the country. It is a plain stone building consisting of a single room, surmounted by a dome. It faces the east. In front there is a platform surrounded by a thick wall, with a gate. Towards the west high and rough peaks overlook the building, but to its north a high terrace has been raised for the reception of darvishes and pilgrims. Its white walls form a conspicuous mark on the hill side, which can be seen for many miles to the south. The ascent is from the east, and consists of a steep road paved with rough stones, which still retain some semblance of steps. On the southern side of the mosque, on the edge of the precipice, is the sacred tank, a small shallow hole about 10 feet by 8 and 3 feet deep cut in the rock. It is now dry, but the legend is that it was formerly a spring of water formed by Sulaiman's striking the rock with his staff. The tank was said to have been full of water till Shuja Uddin's time, when a soldier of his army having outraged a female pilgrim to the shrine, the lymph pudica dried up, and has never flowed since. The soldier and the woman were buried at the foot of the hill, and every passerby throws a stone on the grave, which has thus become a huge mound or cairn by the roadside.</p>	iii	Yes ...	No ..	Exploration desirable, as it probably covers an old Hindu or Buddhist site.

				<p>The roof and sides of the temple are ornamented with various sculptures representing elephants, griffins, and other huge monsters. On the inside of the temple wall are many figures of the grossest kind; indeed all the temples of Orissa, great and small, are distinguished for the obscenity of their sculptures.</p> <p>The face of Jagannath is black; the eye-balls disproportionately large, are represented by patches of white paint; the pupils are round and black; the nose is a pointed snout; the mouth a streak of red paint, curved upwards at the angles; there is no chin, and on the forehead is a tiara of diamonds. From each side of the head, at an angle, projects what is supposed to be an arm, but there is no hand.</p>						
Puri	...	Bhuvaneswar, sub-division Khurda.	Bhuvaneswara (Lord of the Universe), an inland town on the right side of the Puri road, about 20 miles from Kattak, was once the capital of a large and flourishing kingdom, but now stands only as a monument of departed greatness. Its ancient palaces and lordly mansions are roofless and reduced to shapeless ruins, in great part concealed by rank and luxuriant vegetation. It is, nevertheless, a most interesting field for the antiquarian, abounding as it does in architectural remains of the highest value, and connected with historical associations of rare importance. It was the Buddhist capital of Orissa from the beginning of the 6th century B.C. to the middle of the 5th century A.D., when Jajati Kesari came from Behar as the lieutenant of the Gupta Rajas of Magadha, and gradually subverted the supremacy of the Buddhists and re-established the Hindu faith in Orissa. His successors established their capital there and the temple of Bhuvaneswara, dedicated to Siva, commenced before, was completed in the 7th century by Lalitendra Kesari. It lost its	In good order ...	ib.	Yes	..	Drawings and casts exist in Drs. Hunter and Rajendra Lal Mitra's works, and in the museum, but accurate drawings and sections do not exist, and are very desirable, as it is one of the most ancient and important specimens of temple

				<p>proud position in 940 A.D., when Nripati Kesari made Katak his capital. Bhuvaneswar was originally intended to be a rival of Benares, and nothing was omitted in the way of details to make it an exact counterpart of its prototype. Every temple, every sacred pool, every rivulet, every ceremonial, every observance, and every legend of Benares was reproduced at Bhuvaneswara.</p> <p>In the centre of the town is a large sheet of water called Gosagara, or Vindu drops Sagara; so called from a statement in the Ekamra Parana, that drops from all the sacred pools on earth, in heaven, in the lower regions, as also of nectar wine, holy butter, and all that is most delectable, constantly fall into it. The tank now measures 1,400 by 1,100 feet, with an average depth of 16 feet. All its four sides were originally lined with blocks of laterite so arranged as to form magnificent flights of steps. On the south side these steps are still in a good state of preservation. On the east and west, for half the length in continuation of the south side, they are still <i>in situ</i>, but beyond that they have fallen down into the bed of the tank. On the north side also, the whole of the stone has fallen down except about 20 feet in the middle, which forms a ghat on that side, leading from a group of small temples to the water. In the centre of the tank there is a large island protected by a stone revetment. This is a feature common to many of the larger tanks in Orissa, and adds greatly to the beauty of these artificial lakes. The Vindu Sagara island measures 60 by 50 feet, and has a small temple on the north-east corner of it. Before the temple there is a terrace with an artificial fountain in the centre. On the south-east corner, opposite to the terrace, there is a small pavilion supporting the reservoir of the fountain. Other pavilions, but of dissimilar make, stand at the south-west and north-west corners. On the occasion of</p>					architec- ture.

24	Puri	...	Bhuvaneswar, Khurda sub-division.	Courtyard in which stand the great tower and other temples.		the bathing festival, an image of Vishnu is brought to the temple, and by holding the thumb against the jet of the fountain, the water is directed towards the image and a shower-bath is effected, to the wonder of the faithful, who look upon the feat as a miracle. The tank is fed by one or more natural springs at the bottom, but the water is anything but pure.						
				The largest edifice in Bhuvaneswara is the great tower. It stands within a large courtyard surrounded by a high wall, and is about 300 yards distant from, and to the south of, the Vindu Sagara tank. The courtyard is bounded on the east by the road leading to Kapileswara; on the north by a broad highway called Baradand; on the south by a plot of land now overgrown with jungle, but formerly the site of a palace the remains of which are still traceable; and on the west by several small temples and their courtyards, mostly in ruins. The area forming the courtyard of the great tower measures 520 by 465 feet, with a 28-feet projection on the north side. The projecting portion measures 235 feet in length, and the flanks 115 feet each. The wall surrounding this area is built of partially-dressed laterite blocks, and is 7 feet 5 inches thick. It is plain on both sides, but below the coping there is a simple moulding with two rows of lancet heads, one looking downwards and the other upwards. The coping is sloping, and projects about six inches, to throw the rain-water off the surface of the wall; but the top is flat, and terraced with a cover of concrete which forms a good broad road. Access to this courtyard is obtained by three doorways, of which that on the south is small and commonplace—a mere opening with a pair of folding doors. The northern one is larger, and surmounted by a propylon of small size. The eastern one is the largest. It is 31 feet broad, covered by a large propylon, guarded on each side by a	ii b.	Yes	...	No

							Class.	Remarks.		
				<p>large figure of a lion rampant. The style of the propylon is the same as that of the local porches—a quadrangular structure with a pyramidal roof in nine tiers. The edges of roofs are set off with lancet-headed crests, and the top surmounted by a ribbed dome and vase-shaped finial. Altogether the structure is about 50 feet in height. The side walls are broken each by a set of three-fold projections relieved by pilasters and niches, having a series of longitudinal bands, and the plinth is formed of a succession of the latter. There are no carvings in any part of the structure. The lions are of the conventional type, with dog-like faces, and remarkable only for their size.</p> <p>On the top of the north-east corner of the wall there is a small pavilion built of stone, and accessible by a flight of stone steps from the inside. The structure was erected at the same time as the wall, and appears to have been intended for a Naubatkhana or music-room; but it is now used for religious purposes. It is called Bhetmandapa, and an image of Parvati is placed in it to offer welcome to Bhuvaneswara, the Lord of the Universe, on his return after the Car-festival.</p> <p>Along the inner side of the surrounding walls there is a raised berm 20 feet broad and four feet high. It originally served as a means of enabling the people to defend the temple enclosure from outside attack, but latterly, it would seem, that idea has been given up, the inner edge of the terrace having been protected by a revetment, and measures taken to build a range of rooms all round. This plan, however, has never been carried out except on the north-east corner, where a long range of rooms have been erected to serve as a kitchen. Some of the rooms are large, and divided into a nave and two aisles by two ranges of pillars having bracket capitals formed of two blocks placed one over the other, and not cru-</p>

				<p>ciform as is so common in Buddhist buildings. In one of the aisles there is a very wall executed figure of Nrisinha, in black chlorite. The area of the berm is left unpaved, but that of the courtyard below is paved with flags of granite.</p> <p>On the west side, from the middle to about half-way to the corner of the courtyard, there is a large temple of the usual style, and designed for a lingam. Though now entirely neglected, it is still in a fair state of preservation. Close by there are several small temples, and the courtyard generally is studded with a large number of temples, varying in height from 6 to 30 feet, and built in different styles, some with pointed, others with flat roofs, but of no importance either historically or as works of art. One of them, however, is worthy of note, as it is probably the oldest building in the courtyard—considerably older than even the Great Tower. It is a plain, modest-looking structure, about 20 feet high, measuring inside six feet square, and having the stump of a sandstone pillar to do duty for a lingam. The room is five feet six inches below the level of the courtyard, and it shows that the level of the ground round about the Great Tower must have been much lower, and must have been raised to its present height when the tower was erected. Under ordinary circumstances it would have been easy to demolish the little structure when the big one was set up, or to renew it on a higher level; but according to the Shastras a lingam once fixed to the ground should never be removed, for such removal would be tantamount to the destruction of all sanctity in the lingam, and an act of the grossest desecration. It is usual, therefore, in every part of India never to disturb a lingam; and as the one under notice was probably held to be of great sanctity, it was allowed to remain in its place, though the ground outside its fane was raised, and the</p>

25	Puri ...	Bhuvaneswar ...	Bhagavatitemple.	<p>arrangement of the place completely changed. The chamber of the temple is now accessible by a flight of three steps.</p> <p>On the western side, close by the corner temple, there is a magnificent temple dedicated to Durga. It was erected during the reign of Ganga Kesari, i.e., about two centuries after the erection of the Great Tower. It marks the first step towards the spread of that sexual system of the Tantric Vamacharis, which originally did not form a part of the Sivite system at Bhuvaneswara. All the old temples were dedicated to Siva in the form of a plain lingam or more or less cylindrical mass of stone, without any carving or ornamentation or mystic symbol. But in the latter forms the cylinder was fixed on a loop-shaped horizontal stone, rounded at one end and more or less pointed at the other, and having two or three encircling lines on the top. This was called the yoni. This, however, did not satisfy the followers of the Vamachari system, and a distinct female figure to serve as the consort of the lingam was held essential, and the temple under notice was erected to supply a local habitation for the wife of the presiding divinity of the Great Tower.</p> <p>The temple of Bhagavati is a double structure, including a temple proper and a distinct porch, joined to the sanctum by a lobby. Both were built at the same time, and most elaborately sculptured in the richest and most florid style of local art. The statuettes, bas-reliefs, and floral bands on it are in every respect equal to the best of their kind to be seen in Bhuvaneswara. The material being brick-red sandstone, and much warmer in tint than that of the stone used in the erection of the Great Tower, looks particularly rich. The temple, however, is so surrounded on every side by minor temples and dead walls that it cannot be seen to advantage, and in its present position is entirely lost. The presiding divinity of the</p>	In good order ...	iib	Yes	...	No detailed measurements exist, but are very desirable.

							Class.	Remarks.		
				<p>sanctuary is the goddess Durga, mounted on a lion.</p> <p>Entering the enclosure from the propylon on the east, the visitor first comes to a paved courtyard 65 feet long from east to west, and 50 feet broad from north to south. It is paved with stones, and is perfectly clear of incumbrances except the little mounds on the right hand side close by the gateway. Beyond, on the right and left, it is flanked by several other small temples of different dates and of no importance. One of them with a flat roof has a parapet of a peculiar construction, the like of which occurs only on the top of the Nat Mandir. It is formed of a series of crest-tiles not unlike Saracenic battlements, and somewhat similar to the Norman-Tudor flowers. The temple is dedicated to Gopalini, or the goddess Durga, in the form of a female cowherd—the same who destroyed the demons Kirti and Vasa. To the west of it there is a flight of six stone steps, each 48 feet 7 inches long and 3 feet 6 inches broad, the total height of the steps being four feet. This court shows the original level of the ground to have been the same as that of the little temple noticed above; it is just three feet below the level of the road outside. Above the steps, to the base of the foremost building of the Great Tower, the distance is 22 feet. In front of the gateway, but a little to the left of the central entrance of the foremost building, there is a monolithic column 2 feet in diameter and 20 feet high, surmounted by a bull couchant. The plinth of this column is square; it has no base moulding of any kind, and its capital is perfectly plain being formed alternately of two cavettes and two tiles. In style it bears no relation to the building around it, and is evidently of a comparatively modern date, erected long after the Great Tower and its enclosure.</p>

26	Puri	...	Bhuvaneswar ...	Bhoga Man- dapa.	The tower includes a suite of four buildings standing in file. The foremost of these is called bhoga mandapa, or the refectory; next, the nat mandir, or dancing hall; then the mohan, or the porch; and lastly the dewul, or the temple proper. Of these the last two were built at the same time, and in a style quite different from the first two, which were built long after, but at different times and on different plans. The foremost building was erected during the reign of Jagat, between the years 850 to 870 A.D. It was originally designed as an open pillared chantry, for the reading of the scriptures and the delivery of lectures and sermons by learned pandits. It stands on a ground-plot 60 feet square, of which two feet all round form a berm two feet broad and 3 feet high. The top of this berm is paved with stones, and the sides forming the plinth of the whole structure are elaborately sculptured in low relief. The surface is divided into panels by intervening pilasters, and filled up with images of men, women, animals, temples, and bouquets; some of the representations being disgustingly obscene. Above the plinth there is a broad ornamental band set off with the figures of lines of pigeons, geese, ducks, horses, elephants, cattle, and camels, very well carved in good relief; but they have never been completely finished. In several places the outlines are punched, but are not worked out. Some of the panels also are not completed.	In good order ...	ii b	Yes	...	Yes; but more details are needed.	...
					The area of the building above the plinth is 56 feet square. Originally it was colonnaded all round, each side having five openings. The central opening on the east was intended for the main entrance. Three mean looking steps lead to this entrance, and it is flanked by two piers. The width of the opening originally was eight feet eight inches, and was spanned by an arch with

							Class.	Remarks.		
				<p>five cusps crowned by two human figures. This arch, like several other parts of the building, was never finished, as the left half of it is decorated with a scroll work, while the right half is perfectly plain. The piers are elbowshaped. On either side of the entrance there were two openings formed by a line of three pillars spanned by a stone architrave. Thus the side comprised two piers and ten pillars, each 13 feet 5 inches high. This arrangement was repeated on the other three sides, and in the middle of the room there were four compound pillars, each formed of four richly-carved columns, for the support of the roof. The roof is pyramidal; it rises in a slope from the cornice, and at a height of about six feet is edged by four tiers of cornice. Then follows another slope edged with three tiers of cornice. Then another slope, and over it a perpendicular neck with a cornice ornamented with lancet-headed projections surrounding a flat roof. From the centre of the last rises a short neck supporting the pinnacle. In this form the structure had a light, airy, elegant appearance; and altogether the place was well suited for the purpose for which it was designed. But the architect had miscalculated the strength of the architraves and the weight of the roof placed over them, and in a short time some of the architraves cracked and the pillars showed signs of being crushed. It became necessary therefore to close all the openings, except the central one, on each side with solid masonry walls, and to strengthen the central groups of columns by building them up so as to form solid square pillars. The width of the central openings had also to be reduced by side piers, and the arches had to be supported on iron lintels. The new walls have bas-reliefs and carved stones stuck into them, but without any taste, order, or plan; and they serve only to disfigure what was originally a handsome work of art. The original open pavilion was converted in this manner into a closed dark room and being no</p>

27	Puri	...	Bhuvaneswar ...	Nat mandir ...	longer fit for a lecture room. it was appropriated for a refectory. Offerings of cooked food are now placed in it thrice a day, instead of in the sanctuary, in which the space available is too limited for the display of any large number of trays of rice and curry. This arrangement also obviates the necessity of profuse and frequent washings of the sanctuary, which the contact of dressed rice would otherwise have rendered imperative. The objection not applying to offerings of flowers, fruits, and sweetmeats, these are carried to the sanctuary.	In good order ...	ii b	Not needed ...	Yes; but detailed measurements are very much needed.
				Immediately to the west of the refectory, and abutting on it, is the <i>nat mandir</i> or dancing hall, whence the divinity in the tower is entertained with music, singing, and dancing. It is of a somewhat later date than the last, having been erected by the queen of Salini Kesari, who reigned from A.D. 1099 to 1104. Its ground-plot is a square of 52 feet. It has a berm two feet broad and three feet high on its north side, and a corresponding one on the south side, but none on the east or the west. The front of the berm is carved, like that of the berm of the Bhoga Mandapa, but the designs are different. Instead of panels filled with animal and human forms, it is covered with effigies of temples, each having a human figure seated in its middle, very like what is seen in Buddhist votive chaityas, and the broad band on the top is replaced by a series of plain mouldings. The walls from the berm to the cornice of the building are 20 feet high, and pierced by three doorways, except on the east side, where there is only one door leading to the Bhoga Mandapa. The central doorway is 14 feet high and the side ones 10 feet. The outer face of the walls is set off with a series of polygonal pilasters. The doors are modern, and shabbily put together. The central door on the west side is, however, an old one made of sandal-wood panels,

28	Puri	Dhuvaneswar	Mohan	<p>delicately carved and strengthened, and decorated with brass bosses. The cornice of the building is flat and three feet deep. The roof is sloping and formed of four tiers (each edged with a series of lancet-headed acrotarias), and terminates at the top in a small square flat surrounded by Saracenic battlements. The roof is supported in the middle by four square pillars and several iron beams. In the interior face the room has no ornaments of any kind except a rich framing of chlorite round the central doorway on the west side. The design of this beautiful piece of work is the counterpart of that of the Kanarak gateway. On the left jamb of this door there are two inscriptions—one in Uriya and the other in Sanskrit; but neither of these affords any information regarding the age of the building. In the eastern wall there are two niches, one of which contains an image of the androgynous Haraparvati.</p>	...	In good order	ib	Removal of accretions and alterations desirable.	Yes; but details of elevation and section to scale needed.
				<p>The next building of the group is the Mohan or porch. It is of the same age and style as the tower itself, and was planned and built at the same time. According to the temple records of Puri, the foundation of this building was laid in the reign of Yayati Kesari, who wrested Orissa from the hands of the so-called Yavanas and re-established Hinduism on the ruins of Buddhism. The prince reigned from 474 to 526 A.D.; but the foundation having been laid at about the close of his reign, he did not live long enough to finish the temple. His successor, Surya Kesari, during his long reign seems to have done nothing for the temple, but Ananta, who followed him, proceeded with the work, and it was completed in the reign of Lalitendra Kesari <i>alias</i> Alaba Kesari. From corner to corner the porch measures 65 feet by 45 feet, but the sides are broken by three-fold projections. Unlike the two</p>

							Class.	Remarks.		
				<p>preceding ones, it has been built to appear as if it rose from the ground without the intervention of any separate plinth or surrounding berm.</p> <p>The lowest part of the walls is shaped like a plain tile, a foot thick, and on it are ranged a series of pitchers in high relief, forming the stylobate. From each of these pitchers rises a highly ornamented pilaster so as to divide the surface into niches, which are filled with alto-relievo figures of men, women, and lions. The decorations are of the most sumptuous character, and the ornaments have been put in with lavish profusion. The doorway in the centre was originally closed by six mullion bars, each bearing the figure of a danseuse. On the north side these mullions are still in situ, but on the south three of the bars were some time ago removed to form a doorway for the convenience of the priests, who found the passage through the nat mandir circuitous. Three of the bars are still in position. The spaces between the bars had been originally left open for the admission of light; but the light admitted by the doorway being more than enough, the openings were subsequently closed, and within the north side a thin partition was built, so as to convert the space between the bars and the partition wall (an area equal to the thickness of the wall of the building) into a small chamber.</p> <p>The cornice is flat, and projects four feet. The roof is pyramidal, like that of the Bhoga Mandapa, and formed of receding ledges. It is divided into two tiers by a narrow perpendicular neck. The lower tier has nine ledges, and the upper one six. The edges of these ledges are elaborately carved and crowned at short intervals by lancet-headed finials. The subjects on the edges include processions of horses, elephants, camels, cattle, and troops of infantry and cavalry. The central projection of</p>

				<p>each tier has a pediment flanked by model temples, and crowned with the statue of a lion seated on its hind-quarters. The roof above the upper tier is flat, and from the centre of it rises a cylindrical neck supporting the pinnacle. This is a repetition of what occurs on the Bhoga Mandapa, except in the sloping ribbed form under the Amalasila. On the Bhoga Mandapa this form is single, whereas on the Mohan it is doubled. Though the walls are thick enough to support any amount of weight that might be put on them, the corbelling of the roof is too rapid, or not sufficiently gradual to throw the whole weight of the roof on the walls. A great deal of its middle portion consequently needed additional support, and this has been provided by four massive square pillars, dividing the area of the room into a nave and two side aisles. The pillars are 30 feet high, perfectly plain, and the space between the front wall on the east and the two foremost pillars, has been partitioned by flying walls, leaving a passage from the door to the nave, and forming two side rooms.</p> <p>Close by the southern entrance on the left hand side there is a square chamber with a pyramidal roof. From the outlines of ornaments punched on this roof it would appear that the original design included an elaborate piece of workmanship, which has never been finished. The room contains several small brazen images, which are carried about on ceremonial occasions as substitutes for the presiding divinity of the Great Tower. In front of the last, and on the right hand side of the entrance to the porch, a pillared chantry was commenced, but after the columns had been built to the height of four feet the work was abandoned. Its area is now covered over with a thatch. On the north side, right in front of the mullioned window, and close by it, there is one large and several small temples.</p>

							Class.	Remarks					
29	Puri	...	Bhuvaneswar	...	The Great Tower.	Abutting on the Mohan on the west side stands the Great Tower. Its ground-plan is of the same dimensions as that of the porch, except as regards the central projections, which on the north and the south sides are broader, and on the west narrower, than those of the porch. The plinth is modelled into a series of pichers, and thereupon rises a series of pilasters so arranged as to divide the surface of the body into a number of niches of the same character as on the porch. Each projection has a central large niche, with small ones above and on each side. These niches give the appearance of a three-storied building to the façade. The recesses also have niches, but they are not so elaborate, nor are they flanked with side pilasters. The lowest niche on the central projection of each side is the largest and grandest. The niche is deep, and forms the resting-place for a large statue slightly taller than life-size. On the north side the statue is that of Bhagavati, the spouse of the presiding divinity of the tower; on the west, that of Kartika, his eldest son; and on the south, that of Ganesa, his second-born. For the protection of these figures from the weather an open pavilion has been built in front of each; but these structures are of a much later date, and not at all in keeping with the style of the tower. They are ugly in shape, totally devoid of ornament, and serve only to intercept the view of the majestic edifice in front of which they stand. The niches on the side projections, though not quite so elaborate as the central one, are by no means wanting in ornament. They are, however, not so deep as the central one, and the images carved on them are in bas-relief. The niches on the corner projections are smaller and less sumptuous than the last; they serve as receptacles for the eight guardian divinities of the quarters, commonly called Dikpalas. These are Indra for the east; Agni for the south-east; Yama	In good order	...	ib	Removal of accretions desirable.	Yes; but further details drawn to scale necessary.

				<p>for the south; Nririti for the south-west; Varuna for the west; Marut for the north-west; Kuvera for the north; and Isa for the north-east. In the Puranas two others are named—Brahma for the upper regions and Ananta for the lower; but these could not be provided for on the sides of the temple without offending the rules of the Shāstra.</p> <p>The recesses between the projections have also their niches, but these are of a modest character and of simple form. The figures designed for these are rampant lions, and statues, 5 feet high, of men and women in different positions. Some of the figures are single, and intended to represent dancing-girls; others are in couples standing in various attitudes. Some of the last are so grossly obscene that it is impossible to describe them. The number of these, however, is not large. A few have been mutilated and others removed, leaving the niches empty. They also occur on the horizontal bands which separate the three tiers of niches. Domestic scenes in bas-relief are introduced below the pediments over the niches, and also on small panels on the piers. They are generally of small size, not more than a foot in height, and are now much disfigured. The statues were prepared in the ateliers of the artists, and then put in their respective positions; but the bas-reliefs and panels were all carved <i>in situ</i>.</p> <p>The body of the tower is about 55 feet high, and, omitting the side projections, forms a square on the ground-plan. Over this rises the spire, but without the interposition of a cornice or other feature to mark the transition from the body to the spire. The horizontal mouldings, which ran over the topmost tier of niches are, however, so discontinued as to indicate where the former ends and the latter begins. The projections of the body, though gradually reduced in depth and breadth, are carried along the whole height, and are crossed by horizontal bands as on the upper</p>

				<p>part of the body, but they have no niches. The central band has at its base a large pediment of a coat-of-arms pattern, and its sides are flanked by a string of model temples in bas-relief which rise to the base of the crown. Just above the pediment there is a statue of a lion rampant projecting from the wall, and at the top a small window-like opening, which was probably intended to throw light into the interior and promote its ventilation. The top of the spire is flat, and from the centre of it rises a cylindrical neck supporting a ribbed dome, over which is placed the pinnacle or kalasa. As additional supports to the dome there are under it 12 statues of lions seated on their haunches. The pinnacle is shaped like a Grecian urn. Over the last there is a massive iron trident with one straight and two curved prongs, and not, as is ordinarily the case, having three straight prongs. It has now only two prongs, one of the side ones having been struck by lightning. To the trident is attached a large flagstaff; and the flag on it, a triangular piece of yellow calico, is renewed whenever a pious pilgrim can be induced to defray the cost of a new one.</p> <p>• The height of the temple, from the paved courtyard to the top of the kalasa, is 160 feet; but as the floor of the temple is two feet lower than the courtyard, and it is to be presumed that when the temple was built the courtyard was lower than the floor, the total height originally must have been about 165 feet. It is not unlikely that formerly there was a chain or rope descending from the base of the kalasa to the ground, whereby people could ascend to the top when required, to renew the flag or for casual repairs; but there is nothing of the kind now.</p> <p>The eastern façade abuts on the porch. There is no ornament or decoration on that side except in the walls which face the recesses between the two buildings, and there the</p>						<p>• On this point further information is necessary, as no correct section drawn to scale exists, nor are we informed how the height was ascertained.</p>

30	Puri	...	Bhuvaneswar ...	Minor temples	carvings are counterparts of what are seen on the other sides. The doorway between the two buildings is plain, having no framing nor moulding around it. The sanctum, like the body of the temple, is a square having a canopy on the top, and over it a roof dividing the interior of the tower into two stories. These, though of less importance than the great temple, are nevertheless of great interest, and very well worthy of preservation.	ii b	No
31	Do.	...	Kanarak ...	The Black Pagoda of Kanarak.	The Black Pagoda, or the temple of the Sun, known as the Kanarak temple, was built by one Narsingh Deo in A.D. 1277. It is situated about 19 miles north-west of Puri, and about 2½ miles from the sea coast. The size of the temple inside is 60 feet square, with walls about eight feet in thickness, having four doorways, which are made of immense slabs of indurated chlorite, very minutely carved with figures and other devices. Over the doorway of the west side, there was one solid piece of this stone, which has now fallen down without having received any injury. On it are carved the nine figures of the Navagraha, each one foot six inches broad by two feet in height. These figures have four hands and arms from the elbow, and hold something in each hand. They sit cross-legged, tailor-fashion, and have on their heads steeple crowned hats. The mass of stone on which they are carved measures 19 by 4½ by 3½ feet, or 299·25 cubic feet, and weighs about 24 tons. The whole of the exterior of the pagoda is very elaborately carved, some of the figures being life size. These are placed in niches between carved pilasters, most of them being human figures of the most obscene character. The temple is built of coarse sandstone. The stones have been fastened together with iron dowels, and mortar has been little used. The stones lie very close together and are generally massive. The interior had a double roof, but the inner	Decaying fast ...	is	Yes ...	Yes; but very meagre.

				has fallen in. One of the most interesting features about it is the use of large solid iron beams; those which supported the inner roof are from 11 to 15 inches square, and not less than 60 feet long. They appear to have been constructed of wrought-iron, first in pieces of about three inches square in section. Several of them were then put together and welded, the marks of the hammer being distinctly visible. Some of the beams of a smaller section are still in the building, supporting the stones over the doorways. Arches have not been used, but over the doorways there are relieving openings, corbelled so as to relieve the beams from the weight of the masonry. The interior of the building is also corbelled to a point and not domed. The present temple, according to the tradition of the inhabitants, was intended as an entrance to the Great Temple that was partly constructed and allowed to go to ruin. The huge piles of cut-stone, together with the number of colossal figures of griffins, elephants, and horses about, show that the construction of a very large temple was intended.									
32	Puri	...	Puri	...	Athara Nala bridge.	The Athara Nala bridge, on the Puri road, at the entrance to the town of Puri, is also of some antiquity. It is supposed to have been built by one Kabir Narsingh Deo in A. D. 1300. It consists of 11 openings—16 of eight-feet span, two of 10, and one of 14. It is built of laterite and sand-stone, the openings being closed over by corbelling; its entire length is 320 feet.	In good order ..	ii b	Yes	..	No

1	Champaran	Buddhist mounds and edict pillars.	iii	Probably yes...	No
2	Ditto ...	Simraun on the Nipal frontier.	Simraun is partly situated in British territory, the frontier line passing through the walls. The river Jamuni flows to the west, while the Nipali villages of Kachorwa and Bhawanpur bound it on the east and north. The ruins are in the form of a square, surrounded by an outer and an inner wall. The former, which is made of unburnt bricks, is 14 miles in circumference, the latter only 10. On the east side six or seven ditches can still be traced between the walls, while towards the west three or four are apparent. Inside there are the remains of large buildings. The tank, called Isri, measures 333 yards along one side and 210 along the other. Its sides are composed of the finest burnt bricks, each a cubit square and one <i>maund</i> in weight. The remains of palaces and temples disclose some finely-carved basements, with a superstructure of beautiful bricks. Some of the stones, which are 5 feet long, 1½ broad, and 1½ deep must have been brought from a distance of twenty-five miles. Twenty idols have been extricated; many, however, are much mutilated. The citadel or kotwali chautosa is situated on the north, and the palace or ranibas in the centre; but both only exist as tumuli, from 20 to 25 feet high, covered with trees and jungle. Tradition says that Simraun was founded by Nanyupa Deva, A.D. 1097. Six of his dynasty reigned with much splendour, but the last of the line, Havi Sinha Deo, was driven out in 1322 or 1323 by the Muhammadans.	In ruins ...	ii a	Yes ...	No
3	Champaran	Kesariya ...	Ruins of mounds with stupa.	Two miles south of Kesariya thana on the road to Sattar ghât, there stands a lofty brick mound, capped by a solid brick tower of	In ruins ...	ii a	Yes ..	No

							Class.	Remarks.		
				considerable size. It is a ruined mass of solid brickwork, 62 feet in height and 1,400 feet in circumference at the base of the ruins; on the top there is a solid brick stupa, the whole surface of which is ruined excepting at the base, which is still perfect in many places. In the most perfect part there are 15 courses of surface brickwork still in good order, and in two other places there are 10 and 11 courses perfect. From these three points General Cunningham made out the base of the stupa to be 68 feet 5 inches in diameter. He also estimated the height at 38 feet 7½ inches for the cylindrical portion, and at 12 feet 10½ inches for the dome, or altogether 51½ feet. From the ruined state of the lower mound, compared with the perfect state of the base of the upper stupa, General Cunningham infers that the present stupa dates between A.D. 200 and 700, and that it was built upon the ruined mass of a much older and much larger stupa. The practice of erecting stupas on ancient foundations was not uncommon. This ancient monument is known to the people as Raja Ben-ka Deora. The similar but smaller stupa at Kasiya is also called a Deora. In both cases the name belongs to the upper stupa, and not to the whole mass, as all mounds, whether of earth or brick, in this part of the country are named Bhisā. Of Raja Ben the people have no traditions, except that he was one of the five supreme emperors of India. The piece of water immediately to the south of the stupa is also named after him, Raja Ben-ka Digha, or Raja Ben's Tank. Less than a mile north north-east of this stupa there is a low mound with the walls of a small temple 10 feet square. The head and shoulders of a colossal figure of Buddha, with the usual crisp, curly locks, are also visible. General Cunningham supposes this to have been the site of a monastery, as the remains of cells are still visible.

							Class.	Remarks.		
4	Champaran	Lauriya Araraj...	Pillar ...	Araraj is a village situated about 20 miles to the north-west of Kesariya. About a mile to the south-west there is a lofty stone column, called Laur, which bears in well-cut and well-preserved letters several of the edicts of King Asoka. The edicts, which are most neatly engraved, are divided into two distinct portions, that to the north containing 18 lines and that to the south 23 lines. The pillar consists of a single block of polished sandstone, 36½ feet high, with a diameter at the base of 41·8 inches and 37·6 at the top. There is no capital, and the whole has been disfigured by the names which visitors have cut upon it.	In good order ...	ia	Yes ...	Yes ...	Vide also Archaeological report, Vol. I.
5	Ditto ...	Ditto Ruins at Lauriya Navandgarh or Mathia, including the lion pillar.	About half a mile north-east of Lauriya, and 15 miles north west-west of Bettia, there are some very extensive remains, consisting of three rows of earthen barrows or huge conical mounds of earth, of which two run from north to south, and the third from east to west. General Cunningham, who visited them, considers them to be sepulchral mounds of early kings before Buddhism arose, and that their date is some time between 1500 and 600 B.C. A small punch-marked silver coin was found on the spot, the date of which is anterior to Alexander the Great; and also a seal of black earthenware, with an inscription in the Gupta character, and therefore to be referred to a date some time between the second and third centuries B.C. At the end of the name Atavija is the mystic cross, over it the symbol of Dharmma, and to the left a trident, which shows that these mounds were certainly occupied by the Buddhists in the second or third century before Christ. General Cunningham is unable to determine where the earth forming the barrows came from, as there are no excavations near at hand. A short distance from these barrows stands the lion pillar of Lauriya Navandgarh. This consists of a single block of polished sandstone,	Pillar in good order.	ia* iii†	Yes, the pillar deserves preservation, but the mounds only need exploration.	Yes ...	* Pillar. † Barrows. Vide also Archaeological report, Vol. I.

							Class.	Remarks.			
6	Champaran	Rampurwa	Asoka Lat	<p>32 feet 9½ inches high, with a top diameter of 26½ inches, and a base diameter of 35½. The capital, which is 6 feet 10 inches in height, is bell-shaped, with a circular abacus supporting the statue of a lion facing the north. The abacus is ornamented by a representation of a row of Brahmini geese pecking at their food. The lion is injured in the mouth, and the column bears the mark of a cannon-ball. The people near ascribe this injury to the Mussalmans; on the pillar is the following Muhammadan inscription:—Mahiudin Muhammad Aurangzeb Badshah Alungir Ghazi, Sam 1071.</p> <p>The column is much thinner and lighter than the one at Araraj. The edicts of Asoka have been beautifully inscribed, and there are also some unimportant inscriptions in modern Nagri. The pillar is now worshipped as a phallus, and is commonly known as Bhim Singh's lathi, or club.</p> <p>The Rampurwa pillar is similar to that of Lauriya Navandgarh in dimensions, that is to say, in diameter of the shaft at top, 26½ inches. It is impossible to measure the diameter of the base, as it is buried in the ground much below the water level. However, by the apparent form of the column, it is believed that the base would also correspond in diameter with that of the monument at Lauriya, and it is believed that in height also the Rampurwa pillar would not vary much, if at all, from the pillar with which it is compared. Both the shaft and capital of the Rampurwa monument are composed of very highly polished sandstone. The present position of the pillar is nearly horizontal, and when General Cunningham first visited the site, the upper portion of the capital alone was visible. It is believed there had been some digging done around the pillar a few years back, but of this excavation there only remained a slight trace: the obliteration might possibly have been caused by the earth silting up in course of time, which is the more likely, as the water level was barely five feet six inches below the surface.</p>	Lying neglected	is	Yes	...	Yes, but not complete.	Vide also Archaeological report, Vol. XVI.

	Gayá	...	Gayá city	... Ruins	...	This old town is picturesquely situated on a rocky ridge running along the bank of the Phalgu. There are now no ancient buildings existing, but most of the present temples have been erected on former sites and with old materials. It has been a place of considerable importance for many centuries, but during this time there have been at least two changes of religion, and very few of the older structures are now intact, for, as the buildings of the deserted faith were at hand and readily available, they were used in the construction of buildings belonging to the prevalent religion. On rare occasions only was a new temple built of fresh materials. With the exception of the temple of Vishnu Pad, all the other temples are either converted Buddhist or built with the materials obtained from Buddhist buildings.									
9	Do.	...	Ditto	... Temple of Vishnu Pad.	...	This is the largest and most important temple in Gayá. It fronts the east, and the façade is very striking. It is an ugly octagonal building about 100 feet high, with many very clumsy mouldings. The threshold is guarded by high folding doors plated with silver. In the centre is an octagonal basin plated with silver, which surrounds the impress in stone of the god's foot, about 16 inches in length. The pilgrims surround the basin and throw in their offerings of rice and water. To the south of the temple, and almost touching it, there is a handsome pillared hall or porch, where the bare rock shows itself; in fact, the pillars are let into the solid rock for a foundation.	Gaya-wals.	Fair	...	ib	Yes	...	No	...	Remains of antiquity which are of interest are to be found in most of the temples kept up by the Gayawals. The temples themselves are for the most part modern, or at least modern restorations on ancient foundations. Some of the most interesting

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
				<p>NOTE.—Some of the sculptures are of great interest, but Mr. Beglar strongly deprecates the expenditure of a single rupee from public funds on the repair and conservation of these temples. The Gayawals are amply rich enough to be able to easily afford to keep these temples not only in repair, but also clean, a thing never done. Pressure can, and might, if deemed advisable, be brought to bear on them to compel them to observe in their temples the most needed sanitary rules, instead of being allowed to spread disease and death all over India; and this can only be done by insisting on professional engineering advice being taken and carried out as to drainage, sanitation, the perfusion of wind, and the needful cubic feet of air space for the maximum numbers of pilgrims who gather at any period. Mr. Beglar most earnestly desires to bring this matter prominently to the notice of Government.</p> <p>[The above remark also applies to objects Nos. 10 to 20.]</p>						and valuable inscriptions are let into the walls and floors of the temples, as also some sculpture, some few of the latter probably dating to 250 B.C. It is only necessary that wilful and wanton injury be not inflicted on the inscriptions and sculptures. NOTE.—The above remark also applies to objects Nos. 10 to 20.

							Class.	Remarks.		
				<p>his long and arduous life. They were all places of great sanctity, and for 1,500 years were held in the estimation of his followers as the holiest places of pilgrimage on earth. With the expulsion of Buddhism from India, three of them have fallen into oblivion, and one has been appropriated to Hindu worship.</p> <p>Buddha Gayá is now a large thriving village on the west bank of the river Lalájan, about six miles from Gaya. There are several small mounds and a large one on the east side of the village. They mark the sites of ancient buildings which have long since crumbled to dust. The largest mound covers an area of 1,500 by 1,400 feet, and is divided into two unequal parts by a village road. The southern portion is about one-third the size of the northern one, but it is most important, as in its centre stands the most ancient monument in the village, the great temple, which will be noticed below.</p>						
17	Gayá	Buddha Gayá	The Great Temple of Buddha Gayá.	<p>The most important object of antiquity is the great temple there, which is also remarkable as being the finest brick structure still standing in India. The bricks are of large size, the largest being 18" x 18" x 4" nearly. These however are only found in the very lowest courses the rest vary from 18 x 12 x 2½ to 12 x 8 x 2½. The cement used was clay both for the walls and the arches. Cement of surki and lime, however, was not unknown at the time, for it has been used on roofs, copings, and other exposed places, and also for plastering the walls and for the formation of mouldings and ornamental figures. The temple was built in the first century A D., on the site of a still older one built by the Emperor Asoka 250 years before that date. It was surrounded by a stone railing set up by that monarch, and within this enclosure, it would seem, no</p>	Mahant	In good order ...	id.	Already repaired.	re-	Yes.

							Class.	Remarks.		
				<p>other building originally existed. A part of this railing was found <i>in situ</i> by Captain Mead in 1864, when he carried on, by order of Government, certain excavations round the temple. Thirty-two pillars of this railing were also traced in the verandah of the private residence of the mahant or abbot who owns the place.</p> <p>The only part of the building which remains at all entire is the great shrine. It is a slender quadrangular pyramid of great height. The spire is on three sides surrounded by a terrace about 25 or 30 feet high, the extreme dimensions of which are 78 feet by 98 feet. One end of this terrace, towards the east, formerly covered the porch, which has now fallen and brought down part of the terrace with it. A stair from each side of the porch led up to the terrace, on which there was a fine walk round the temple, leading to the second story of the shrine in front, and to a large area behind, on which is planted the celebrated pipal tree. The interior of the shrine consists of a chamber. At the far end is a throne of stone, on which is placed a mis-shapen daub of clay representing the Deity. Above this chamber are two others, one on the level of the old terrace, and the other still higher; but the falling of the porch has cut off all communication with these chambers.</p> <p>The doorway of this temple is placed on the east side, and measures 6½ feet in breadth, forming, with the depth of the wall, a vestibule 6½ feet by 13½ feet. The door frame is formed of stone bars of a reddish grey colour, and over it there is a cross bar of grey-colored stone, forming a strong hypertherion. Then follows a blocking course of considerable thickness. The space over it was left open,</p>						<p>*The description refers to the temple before repair, the triangular slit referred to having been caused by the falling in of the triangular piece above the doorway below.</p>

							Class.	Remarks.		
18	Guyā	Buddha Guyā	Monastery or math.	<p>the sides first rising upright, but at a greater distance from each other than the width of the doorway, and then approaching each other so as to form a triangular slit of large dimensions. The opening was produced by the gradual corbelling of the walls from the two sides, which gave to the sides the appearance of reversed flights of steps, each step being three bricks deep. The two sides met at the top in a point. This shows the outline of the true Indian horizontal arch to perfection. It is said that this space was left open for the purpose of allowing the light at dawn to fall on the presiding divinity of the temple.</p> <p>Next to the great temple, the largest building in the locality is a monastery or math. It is situated on the left bank of the Lalajan, in the midst of a garden extending over an area of about 20 acres, and surrounded by a high masonry wall. It is four-storied in some parts, but three-storied all round a small quadrangle. The ground floor round the quadrangle is faced by a one-storied verandah built on sculptured monolithic pillars on three sides and on wooden pillars on the fourth side. To the north of this there are three two-storied buildings of moderate size, and long ranges of out-offices and stables on the east front. On the south there is a commodious three-storied building called Baradwari, with a terrace in front of it. There are also four temples, one of which contains only a marble slab, originally designed for a chiffoier, but now bearing an inscription partly in Sanskrit and partly in Burmese; a second contains some Buddhist statues. Outside this monastery, towards the west, on a part of the large mound aforesaid, there is a two-storied building of good make and size. It belongs to the monastery, and around it are four Hindu temples, one of which is dedicated to Jagannatha, one</p>	The roofs are low, and the windows very small and few in number, but the building is very substantial and in excellent repair.	iii.	No	Yes.	The temple, necropolis, ghāt, monasteries and stupas have been repaired and only need keeping up.

				<p>which was built by Gāngā Bai, who died at the beginning of this century, is dedicated to Rāma, and the rest to Sivā.</p> <p>Towards the south-west corner of the outer wall of the monastery there is a cemetery, also attached to the monastery. The dead bodies of the monks, unlike those of other Hindus, are buried, and the cemetery contains the graves of about two hundred persons. The body is buried in a sitting posture, and in the case of mere neophytes a small circular mound of solid brickwork, from three to four feet high, is all that is deemed necessary for a covering for the grave. For men of greater consequence a temple is held essential, and in it, immediately over the corpse, a lingam is invariably consecrated. For Mahants the temple is large and elaborately ornamented. It would seem that even for neophytes a lingam was held essential, but in the majority of cases its place was supplied by a miniature votive stupa picked up from the Buddhist ruins in the neighbourhood. Half-buried on the top of the mound, it passes very well for a lingam. On the way from Gayā to Buddha Gayā there are several monasteries of Hindu Sannyasis; everywhere the graves are alike.</p>							
19	Gayā	...	Buddha Gayā	The stone seat of Buddha.	The Vajrasana, or the adamant seat on which* Buddha was seated during his protracted meditation under the Buddha tree, is a circular slab of blue-coloured stone, five feet in diameter, carved on the upper face in an elaborate and ingenious design. It is now lying in the porch of an unfinished and unroofed temple dedicated to Vāgiswari Devi, and would seem to be the identical stone described by Fa Hian, a Chinese pilgrim who visited the holy places at Buddha Gayā before A.D. 399 and 414.	iii.	Yes	Yes	*The stone was supposed to be the Vajrasan, and is so referred to in works hitherto published. Recent research proves it not to be the Vajrasan.
20	Do.	...	Ditto	Temple of Tara Devi.	To the east of the Great Temple, and close to it, there is a smaller one dedicated to Tara Devi. In style it is a miniature representation	...	In good order	iii.	Already repaired	Yes	Already repaired

							Class.	Remarks.		
21	Gayá	Buddha Gayá	Mounds	<p>of the Great Temple. It has been built with bricks of the same size and make as are found in the Great Temple, and cemented with clay. The portion now visible measures 36 feet 5 inches in height on a base of 15½ feet by 15½ feet. The chamber inside is 5 feet 8 inches by 5 feet 10 inches by 11 feet 2 inches, having a vaulted roof in the form of a pointed Gothic arch. It was probably plastered in the same way as the Great Temple. It was provided with a porch.</p> <p>There are some mounds now existing outside the new boundary wall of the temple, and, if dug into, traces might be brought to light of the sites of some of the numerous stone temples and stone houses in the neighbourhood. Monolithic columns of 6 to 8 feet in height and of rich designs are largely met with, and bases for these, of equally elaborate designs, are also abundant. Fragments of mouldings, friezes, architraves, and other architectural stones are to be met with stuck in the mud walls of almost every hut, over an area of five miles around the sacred spot. These prove the former existence of a considerable number of stone temples or other buildings in the neighbourhood of the Great Temple.</p> <p>The stones used for these works of art are granite, grey sandstone, basalt, and the dark blue potstone for which Gayá is so famous. The works in granite are the oldest, and they are at the same time the roughest. The other stones came into use successively in the order named, and neatness and artistic excellence followed the same order. For boldness and freedom of execution, however, the carvings on the sandstone pillars of Asoka do not yield to the most finished work on the softest potstone. On the contrary, the latter is thoroughly conventional, whereas the former display a considerable amount of natural grace and freedom of action.</p>	ii b.	No.	They have been dug into as far as the Mahant would permit; but further exploration is desirable, as only recently the entire lower part of a monastery was exhumed by Mr. Beglar at the instance of General Cunningham and with the Mahant's consent.

22	Gayá	...	Barabar hills in Jahanabad sub-division.	Temple and caves.	The highest peak of these hills is crowned by a temple of great antiquity, sacred to Siddheswara, which contains a linga, said to have been placed there by Bara Rajah, the Asur King of Dinajpur, whose bloody wars with Krishna still live in the traditions of the people.	In good order ...	ii b	Yes ...	No.		
					To the south, and near the foot of this hill, the path up which is freely adorned by images of all kinds, lies a small valley enclosed on two sides by the mountain, on the third by an artificial barrier of stone, and on the fourth by a long low ridge of granite. Here in the solid rock have been cut the remarkable caves, which have given the name of Sātghar to the glen. Four out of these seven extraordinary caves average 32 feet by 14, and three out of the four, named the Karna Chopar cave, the Sudama cave, and the Lomés Rishi cave, are chiselled to a wonderful polish. The fourth, the Viswa Mitra cave, is still unfinished. Inscriptions in the Pali character fix with certainty the date of the excavation of these caves. The oldest was dug in 252 B.C. and the latest in 214 B.C., so that they have been in existence for more than 2,000 years. Not far off is the sacred spring called the Patalgangá, and in another spur of the hill, known as Nagarjuni, are the three other caves which complete the Sātghar or 'seven caves.' The largest, Gopi cave, contains a small sunken tablet containing a short inscription in the ancient Pali character of Asoka's edicts. The other two caves are called Vapiya or well cave, and Vadathi cave. These three caves were excavated by Dasaratha, the beloved of the Devas, on his accession to the throne, about 121 B.C.	Ditto ...	ia	Yes ...	Yes.		
23	Do.	...	Ditto	...	Kawa Dol	The most westerly hill is an isolated peak called Kawa Dol. This hill is quite inaccessible, as it is formed entirely of huge masses of granite piled precipitously above one another, and crowned with a single lofty block that frowns grandly over the plains	...	Neglected ...	iii a	Yes ...	Yes ...	There are the ruins of a large temple at the foot of the hill, and perhaps the largest statue of Buddha, in

							Class.	Remarks.					
				below. It is said that this pinnacle was formerly topped by another block, which was so nicely balanced that it used to rock even when a crow alighted upon it. Hence it is called "Kawa Dol," or the "crow's swing." There are many, but no very interesting rock sculptures, and there is a fine temple at foot of which ruins exist and deserve preservation.						excellent order is yet seated in the ruins of the temple, wherein it was originally enshrined. The rocks round the foot of the hill are also in many places covered with sculpture. A few rupees would clear out the temple and pay for the renewal of the walls of the sanctum, which might be rebuilt to the height of a few feet with rough boulders and mud, and roofed to save the statue from the weather. Cost of clearing and conservation, Rs. 75.			
24	Gayá	...	Barabar Hills in Jahanabad sub-division.	A cave of the group called Karna Chopar.	This is on the northern side of the above granite rock, and is 33 feet 6½ inches long by 14 feet wide. The sides of the cave are 6 feet 1½ inches high, and the vaulted roof has a rise of 4 feet 8 inches, making the total height 10 feet 9 inches. On the outside of the doorway there is an inscription in the ancient Pali, recording the excavation of the cave in the nineteenth year of the reign of Rajah Piyadasi, that is, of Asoka himself. The cave therefore dates as far back as 245 B.C. To the east of the doorway the rock has been cut away, and several rude sculptures have been executed on the scarped face, representing a linga and two rude Brahmanical figures.	Rock cut and inscribed caves.	Good	...	Yes	...	Yes	...	Nothing need be done; but unexplored mounds also exist which, if Government desire, may be explored at a little cost. NOTE.—The above remark also applies to objects Nos. 25 to 29.

25	Gayá ...	Barabar Hills ...	Sudāma cave	The Sudāma and Lomās Rishi caves are cut in the western face of the rock, the Sudāma to the north and the Lomās Rishi to the south. The Sudāma cave, which has a plain doorway, has an inscription in the ancient character of Asoka's pillars cut in the side of the doorway. It records the excavation of the cave in the twelfth year of the reign of Raja Piyadasi, that is, of Asoka himself; the cave therefore dates as far back as 252 B.C. It consists of two rooms, a circular one of 19 feet 11 inches in diameter, and an outer one 32 feet 9 inches in length by 19 feet 6 inches in breadth; the walls are 6 feet 9 inches in height from the vaulted roof, which has a rise of 5 feet 6 inches, making the total height of the chamber 12 feet 3 inches.	Good ...	ia	Yes	Yes.	
26	Do. ...	Ditto ...	Lomās Rishi cave.	This is similar to the Sudāma cave both in size and arrangements, but the roof is unfinished, while the walls and roof of the Sudāma cave are highly polished. The doorways of both caves are of the Egyptian form, but the porch of the Lomās Rishi cave has been enlarged and ornamented, and represents the gable end of a thatched house with a frieze of elephants surrounding the doorway. It is executed in a most artistic manner; indeed the drawing of the elephants contrasts favourably with the popular modern representations of this animal. General Cunningham is of opinion that this porch was executed at a later period than the cave itself. There is an inscription in the porch over the doorway of the third or fourth century of the Christian era. It is curious to remark that in the representations found on the bosses of the pillars of the Buddhist railing at Buddha Gayá there is a similar representation of the gable end of a thatched house forming the doorway of a cave.	Do. ...	ia	Yes ...	Yes.	
27	Do. ...	Ditto ...	Gopi's cave on the Nagarjuni group.	This is situated in the group of hills called Nagarjuni, near the Pinalgu river, and is about half a mile to the east of the Barabar	Un-known.	Fair ...	ia	Yes ...	Yes ...	All that is necessary here is to prevent the

							Class.	Remarks.			
31	Gayá	Ner	A pillared temple.	Ner is on the Patna and Gayá road, west from Dharawat, and about twenty miles from Gayá. There is a pillared temple close to the road very much in the same style as the temple at Punawa. It consists of three rows of monolithic pillars, ten in each row. Fronting the temple there is a further row of four pillars. The temple or shrine behind consists of brick and mud cement, but very little of it is now standing; the superstructure is entirely gone, and none of the temples of this form are sufficiently complete to allow of a conjecture as to their original form. The roof of the portico and of the shrine is composed of large granite slabs; a linga occupies the shrine, and there is a mutilated figure of Ganesa lying outside. Judging by the size of the mound and the part of the shrine remaining, the temple must have been a lofty one. The bricks are large and well made, although inferior in this respect to those used in the construction of the Buddha Gayá temple. It is probable that the temple dates to about 700 A.D.	Unknown.	In ruins	...	ii/z	Yes	No	the conveyance and safe custody of the sculpture are strongly recommended, but it is absolutely essential that the excavations be made under competent guidance if they are not to be barbarously destructive as those for road metal and bricks have been. The sanctum still exists though the tower fell in long ago, and most of the pillars and portion of roof are standing. The temple is used as a cattle-pen and for storing and drying cow-cakes by the poor of the village. It is proposed to clear it out and to prevent the plastering of its pillars, floor, and walls with cow-cakes and its use as a cattle-pen in future. Cost Rs. 30.

37	Gayá	...	Shamshernagar...	Remains	...	subject to robbery on the road along the banks of the Son going to Patna. Daud Khan died about 200 years ago.	In the possession of the descendants of Shumsher Khan.	Rapidly falling to pieces.	iiib	Yes	...	No, but desirable.		
38	Do.	...	Konch	...	Dirto	...	On the road between Daudnagar and Gayá, about 16 miles from the latter, is the village of Konch. It consists of two parts, the bazar on the road side, and the village proper about 100 yards to the north. Between the two villages there are extensive mounds of brick rubbish, and a great many figures and statues are scattered about. The principal one is life-sized and beautifully carved, but the head is wanting. It probably represents Surya. Higher up on the mound there are two purely Buddhist figures with the creed in inscriptions round the head, and two others, probably Surya, of a later type. Passing through the village proper one comes to the large temple mentioned by Buchanan, a drawing of which is given in the 1st volume of "Martin's India." This building somewhat resembles in style that of the great temple at Buddha Gayá, and the construction is much the same; the materials are the same, beautifully moulded bricks set in mud cement. The lower chamber is 10 feet square, and has an arched roof, as in the Buddha Gayá temple. In the upper chamber the walls are gradually contracted, so that the four sides meet at the top. The opening into the upper chamber is also on the <i>ichra</i> principle. In the construction of this building the Hindus showed that they understood both kinds of arch, and used them as suited their requirements. The west side of the temple has been much damaged by the heavy rains, and large masses keep falling year by year. Unless	Un-known.	Partly dilapidated	iiic	Yes	...	The place has been visited by both General Cunningham and Mr. Beglar, and photographs were taken by the latter and Mr. Peppe, but these photographs are not sufficient to illustrate the architecture in detail; they give merely a general view. As the building is undoubtedly of ancient date, detail sections and photographs are needed; and as it isn't too far gone for preservation, it is proposed that it be conserved. There is little to excavate. Cost of conservation Rs. 3,000. Photographs and drawings Rs. 100.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
39	Gayá	... Pali, on the road from Gaya to Daudnagar.	Remains	... something is done, this fine temple will soon be a mass of rubbish. A porch had been added to the original building, or, more likely, the original porch had become ruinous and had subsequently been repaired. It is 9 feet by 22. In front of it a small courtyard has been added, also 9 feet by 22; a flight of steps led up from the level of the ground. In this courtyard and porch a great many figures have been inserted or ranged along the walls, many of which are figured in "Martin's India." To the north of the temple there are two cenotaphs over the remains of former mahants, but there is no monastic community settled here now, and the temple itself is not considered orthodox. Notwithstanding that there is a linga now occupying the shrine, the building itself is said to be the work of Kol Rajas.	Unknown.	In ruins, but sculpture in fair order.	iii	No	... * Removed to Gayá. This place contains the ruins of numerous temples scattered between it and Utrain, the associated village; nothing can be done to preserve the ruins of the temples, but some of the sculpture is in excellent order and well worthy of preservation. To extricate them, and to search for others in the mounds of such temples as are likely to contain them, Rs. 150 is not considered too much.
40	Do.	... Sihari	... A stone temple	About eight miles west of Konch, near the village of Sihari, there is a small stone temple on the roadside. It is constructed entirely of Chunar stone, and was completed at Chunar and sent down fit for erection.	iii	No	No	..

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.			
							Yes.	Remarks.					
41	Gayá	Umga	Remains	Umga is situated within a few miles off the dak bungalow of Madanpur, on the Grand Trunk Road, and 14 miles west of Shaharghati. There is a temple here on a rocky spur of one of the highest hills overlooking the Grand Trunk Road, built entirely of square granite blocks without cement. The height of the temple from the rock to the crest is about 60 feet, the extreme length from east to west is 68 feet, and the breadth 53 feet. To the north and south there are balconies which give the temple a distinctive character, and mark a transition from the open pillared portico which had previously been the rule, as at Punawa, Ner, and Pali. The large porch in front was entirely enclosed, and was lighted by these side balconies. The interior has a very imposing appearance, and the monolithic pillars with bracket capitals mark a decided advance from the plain columns with cross brackets. Inside there is a large slab of black chlorite with a long inscription recording the building of the temple by Bhairab Indra in Samvat 1496, <i>i.e.</i> A.D. 1439, on Thursday, the light half of the moon Vaisakh, and was dedicated to Jagannath, Balbhadra, and Subhadra. The shrine is, however, occupied by a linga. To the south of the temple there is a fine large tank with a flight of stone steps on the east side nearest the fort, part of which is still standing north and south of the tank. Several mounds indicate the position of the town. Higher up the same hill on which the temple is built, and on the summit of a higher ridge, there is a curious little altar with a huge boulder alongside it. Under the boulder sacrifices of kids and other animals are still made. Every available ledge and spur on this hill seems to have been occupied by similar structures, and there are also a great number of figures and lingas both on this and the adjoining hills. Still higher up, and also facing the east, are the ruins of another temple, nearly as large as the one lower down, and in the same style,	Probably the Maharaja of Deo.	Fair	is	Yes	..	Yes, but not enough.	Little is needed in the temples beyond detailed drawings of the architectural features, and plans and photographs in detail of the ornamentation; these would be very interesting, as few temples are now standing intact in the Patna Circle, and none that Mr. Beglar can call to mind of the transition period to which these belong. Cost of drawings and photographs Rs. 100. NOTE—The above remark applies also to objects Nos. 42 and 43.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
42	Gayá	Deo	Remains	but nearly the whole of the superstructure has fallen down. On the path between the two temples there are several inscriptions cut on the face of the rock, but from the texture of the granite they are nearly illegible. On the hill opposite the dāk bungalow there is a small temple and tank, which are of a much earlier date, the bricks and style resembling those at Buddha Gayá. In this case also the chamber has an arched roof.	Probably the Maharaja of Deo.	Fair	ib	Yes	Yes; but not nearly enough.	
43	Do.	Cheon	Ditto	Cheon is situated about eight miles to the north-east of Umga. A large number of isolated little hills are dotted over the country for some distance north of the Grand Trunk Road. Nearly every one of these hills had small structures of some kind on their summits. To the east of the village of Cheon there are the ruins of a temple of considerable size built of square granite blocks without cement. It is now in ruins, only part of the shrine and doorway remaining. The interior of the shrine is occupied by a linga, and there are no inscriptions; but from its general resemblance to the temples at Umga, it may be considered as of the same date. To the south of this temple, and to the east of a little hill, there is a fine life-sized, four-armed statue, with many fragments of others, also several mounds and masses of brick rubbish on every side. About 300 yards to the west, on another little hill, called Pachar, there is a cave about half way up the hill. It is a natural hollow, which has been built up, enclosing a chamber some 10 feet by 12, with a doorway supported on bracket pillars. Inside there is a figure of Buddha surrounded by a seven-headed snake called Langabir. There is	Ditto...	Do.	ib	Yes	No.	

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.

46	Gaya	Kurkihar	Remains	10 inches at the top and 2 feet 2 inches at the bottom. The passage leads into the cave at an oblique angle, and is 3 feet 5 inches long. The chamber itself is 15 feet 8 inches along the floor, 15 feet along the roof, 6 feet 4½ inches high in the centre, and 11 feet 1½ inches in width. The roof is vaulted, and springs from the floor. The whole of the inside is highly polished, and the rock is as compact as those in which the caves at Barabar are executed. Curiously enough there is no trace of an inscription inside or out. Inside, from the high polish every where, no inscription could escape notice. Outside, without a recess being cut for its reception, no inscription could be cut, and there is no sign of any such recess. Its construction at any time must have been an achievement of no ordinary kind, and it is remarkable that an inscription should have been omitted. The date of this cave must be about the same as the date of the caves at Barabar, which it so closely resembles.	Un-known.	In ruins	iii	No	Yes	considered not to date later than the second century (B.C.). Wanton destruction or defacement should be prevented. The boulder is close to Wazirganj on the Gaya-Nawadah road.
47	Do.	Giriyek	Ditto	Kurkihar is situated about three miles north-east of Punawa. There are large and extensive ruins at this place, and a great number of statues scattered over a large area. The principal one is a figure of Sakya Sinha sitting under the tree at Buddha Gaya, with representations of events of his life on either side and a small inscription on the pedestal. From the neighbourhood of Gaya two parallel ranges of hills stretch towards the north-east for about 36 miles to the bank of the Panchana river, just opposite the village of Giriyek. The eastern end of the southern range is much depressed, but the northern range maintains its height, and ends abruptly in two lofty peaks overhanging the Panchana river. The lower peak on the east is crowned with a solid tower of brickwork, well known as <i>Jarasandhu-ka-baithak</i> , or "Jarasandhu's throne," while the higher peak on the west to which the name of Giriyek peculiarly belongs, bears an oblong terrace covered with the ruins of several buildings.	Do.	ii	Yes	Yes	Exploration needed.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.			
							Class.	Remarks.					
				<p>The stupa called <i>Jarasandhu-ka-baithak</i> is a solid cylindrical brick tower, 28 feet in diameter and 21 feet in height, resting on a square basement 14 feet high. The cylinder was once surmounted by a solid dome or hemisphere of brick, of which only 6 feet now remain, and this dome must have been crowned with the usual umbrella rising out of a square base. The total height of the building could not therefore have been less than 55 feet or thereabouts. The surface has once been thickly plastered, and the style of ornamentation is similar to that of the great temple of Buddha Gayá. General Cunningham fixes the date of its erection at about A.D. 500.</p> <p>On the west side of Jarasandhu's Tower, and almost touching its basement, is a small chamber, seven feet square, filled with rubbish. It was found that at five and half feet in depth the rubbish gave place to brickwork, below which was a stratum of stone, evidently the rough foundation of the building. Externally this building was square, with projections in the centre of each face, and similar in its ornamentations to the basement of Jarasandhu's Tower.</p>									
48	Gayá	..	Giriyek	...	A mound of ruins.	On the eastern side of the Panchána river there is an extensive mound of ruins, being half a mile long from north to south and 300 yards broad in its widest part. In the middle of the mound there is a small mud fort, and at the northern end there are several pieces of sculpture collected together from different places; one of these is inscribed and dated in the year 42 of some unknown era, somewhere about the 11th century, or perhaps even somewhat later.	No.			
							iii						
							The pillar is classed as <i>ia</i> , and the mounds and sculpture, &c., as <i>ia</i> .						
49	Do.	...	Dapthu village, in Jahanabad sub-division.	A monolith	...	This extraordinary monolith in the open fields consists of a granite column 53½ feet in length averaging three feet in diameter. 				for bricks. One of the most ancient stupas, once existed here it is mentioned in Buddhist books it is also noticed by Hwen Thsang in his travels.						palace, in which I made some excavations 19 years ago, was an old Buddhist establishment, with a temple 10 feet square inside, enshrining a colossal figure of Buddha. This statue was removed only two years ago by the Bengali Bâbu of the Râmgarh Indigo Factory. All the bricks have been dug out, and there is now only an earthen mound, 200 feet square, covered with fragments of bricks. In 1862 I was able to trace some portions of cells on the eastern side. I conclude therefore that the Raniwâs was the site of a large Buddhist monastery with a vibâr or temple inside. According to some people the mound was also called Gorai, but the common name which every body knows is Raniwâs, or the

91	Muzaffarpur	Sonkarer	Temples	ii	Yes	No	'palace of the Rāni' of Raja Ben Chakravarti." There are several temples here, but they have not been seen by Mr. Beglar.
92	Ditto	Subbogarh	Fort and tombs.	Subahigarh or Subhegarh is the name of a ruined fort situated in a bend of the Joga river, an old branch of the Bāgmati, which surrounds it on all sides. The fort is 1,300 feet long from north to south by 400 feet broad. The highest point of the ramparts is not more than 10 feet above the fields to the north and east, and the general level of the interior is 2 or 3 feet lower. The walls were of brick, but they must have fallen down long ago, as there are very few bricks now remaining except on the river faces to the west and south. The bricks are 13 by 8½ by 2½ inches. Near the middle of the fort there is a high mound about 150 feet square with remains of walls, which is said to have been the residence of Raja Suhel Deo. At a short distance to the south there are two Muhammadan domed tombs of Ghulām Mahiuddin and Muhammad Jubar, which are only 50 years old; and still further to the south there is a third tomb with a small Idgāh.	iii	Yes	No	See also Archaeological Reports by General Cunningham. Volume XVI.

93	Muzaffarpur	Jauri Dih	...	Sculpture, temple.	The legend of the Jauri Dih is that there was a fort and town of the Chero Raj at this spot long anterior to the Muhammadan conquest, and that the country around belonged to the Dusād people before even the Rajputs appeared; that it was still held by them under their own caste kings, after the Brahmans had lived amongst and taught them; that finally, an enemy appeared from the west, and the Chero Raja, or at any rate the chief of the fort, sallied forth to battle, leaving word that if they saw his standard remain erect, they would know he was victorious, but that if they saw it fall they would know him to be beaten and were then to set fire to the castle to escape falling into the hands of the enemy. The standard-bearer, however, let fall his flag when the battle was over, and the garrison of the fort and women, thinking the chief dead and the battle lost, shut themselves into the castle, which was three-storied, and set fire to it. On the chief's return he found his castle a pile of flames and his family perished, so in despair he threw himself into the flames and died. The above is the most authentic account procurable, though there are some few variations given as to the chief throwing himself into the well after his family and treasure had been thrown in; but as there are several evidences of the place having been fired, and none of a well, the former seems the most probable. Everything found points to a purely Hindu origin, and not a single small brick, so typical of the Muhammadan, is to be found. The remains of the votive figures of men and horses and charaghs and toys are also of Hindu origin. One would think it must have been a temple previously, and the <i>débris</i> on the hillsides and at the village site should be examined for remains; this would not be difficult, as the country being low no great depth of excavation would be necessary. It is stated that after the destruction of the tower the place relapsed into a thick jungle for a long time, but that after	iih	No.

				the surrounding country had been cleared by the forefathers of the present occupants, a Brahman built a small temple at the site of the pipal tree now standing at the north-east corner of the mound, but no vestige of this temple is now to be seen. Even 80 years ago wild pig used to inhabit the mound, which is now quite bare of jungle. No one has excavated the place within the knowledge of any, nor have they heard of such a thing, but it is said that when on one occasion some men proceeded to the spot to dig for treasure, they were so alarmed at a noise, and by seeing a dragon, that they ran off and no one has since dared to dig there.— <i>Vide</i> also Archaeological Reports, Vol. XVI.								
94	Muzaffarpur	Sitamarihi	... Temple	... The most holy sites in the district are Sitā-marhi and Sitā-kund. At the former place Sita, the bride of Rama, is fabled to have been born or produced from the earth, while at the latter she is said to have bathed when on her way to be married to Rama. Sitā-marhi, or Sita's temple, lies on the west side of Mahila, 48 miles to the north-west of Darbhanga, and 35 miles nearly due north from Muzaffarpur.	Unknown	...	ii a	Probably yes... 				<p>in which it stands. The people attribute its building to the satjug, and say that it is the oldest temple in this part of the country; but unfortunately it is completely white-washed so that it is difficult to ascertain its age. There are several carved stones inside, and outside there is a large lingam, about 3 feet high and 2 feet in diameter, which looks like a piece of monolith pillar.</p> <p>An annual mela is held here on the Sivarātri, or last day of the waning moon of Phālgun.</p> <p>Some people call the Deokali mound Draupad-gurh, and affirm that it was the fort of Raja Drupada. We may accept the name while we repudiate its connection with the father of Draupadi of the Mahābhārata.</p>						
	Patna ...	Baragaon in Bihar sub-division.	Nalanda monasteries.	<p>Baragaon has been identified with that Vihāragram, on the outskirts of which more than a thousand years ago, flourished the Nalanda monastery, the most magnificent and the most celebrated seat of Buddhist learning in the world. When the caves and temples of Rajgir were abandoned, the monastery at Nalanda arose in all its splendour on the banks of the lake of Baragaon. Six successive kings vied in its embellishment. Lofty pagodas were raised in all directions; halls of disputation and schools of instruction were built between them; shrines, temples, and topes were constructed on the side of every tank and encircled the base of every tower; and around the whole mass of religious edifices were grouped the four-storied dwellings of the preachers and teachers of Buddhism. The monastery, or, more strictly and correctly speaking, the University of Nalanda, was, as it were, a circle from which Buddhist philosophy and teaching diffused itself over Southern Asia. It was here that Aryadeva of Ceylon attached himself to the person of the great teacher Nagarjuna and adopted his religious opinions,</p>	<p>A very few indifferent photographs exist, but no reliable plans or sketches, and no sections or vertical details whatever. These are all much needed and most important for a study of ancient Indian architecture.</p>	<p>Vide pamphlet published in 1872 by Mr. Broadley, then Assistant Magistrate and Collector of Patna.</p>

				<p>ten feet in length. The first court was of very considerable proportions—50 feet by 26 and was covered by a stone roof supported by a series of 12 large pillars. These columns rested on a rough pedestal of unhewn stone, which has disappeared beneath the floor.</p> <p>The shaft itself is seven feet eight inches high, of which one foot nine inches are taken up in the capital. The upper half of this consists of a simple square, and the latter of an oval band of a rich lace-like pattern. The rest of the pillar, down to one foot ten inches of the lower end, where it again has a base of oblong shape, is oval, having a circumference of three feet eight inches, and ornamented at regular distances by two bands of carving about twelve inches wide. Each band consists of two parts, the first exhibiting a row of flowers strongly resembling heraldic roses, and the second a series of conventional Lions' heads. On each side of this covered terrace, but several feet behind it, is an elaborate brick moulding fourteen feet long and six and-a-half feet high, surmounted by a narrow terrace of the same material, approached on either side by three steps from the pillared court. This moulding has 16 turns, and is of the most graceful appearance. On each side of the entrance court, and above the narrow terrace, the main wall is still standing ten feet high. On the west side of the court was the great entrance door, which has fallen down. This doorway was of extraordinary beauty, and measured 20 feet across and more than twelve feet high. It was composed of a series of 18 slabs, nine on each side, gradually lessening in height towards the centre, where they terminated in a narrow portal hardly three feet wide, and surmounted by a heavy slab decorated with elaborate carving. The whole of this enormous mass of sculpture rested on three great stones, 2½ feet square and 22 feet in length. Each slab was joined to the next one by strong iron</p>

							Class.	Remarks.		
				<p>clamps, and the upper portion of each was joined to the lower in the same manner. The first two stones on either side were devoid of all ornament, and were placed nearly a foot behind the other slabs. The next pillar of the series (or rather what remained of it intact) was eight feet in height, twelve inches broad, and of enormous thickness. The first stone was of light brown colour and of a soft and friable nature, whereas this one resembled the hardest granite, and presented a curious variety of appearance and colour. The base of it was plain, and above it is a grotesque kneeling figure with a long beard and uplifted hands, supporting a canopy, above which rises a long line of geometrical pattern. Slab No. 3 is of black basalt, and is scarcely four inches wide. It is taken up entirely by the representation of two enormous snakes, one twining round the other. The next stone (No. 4) is of the same material, and is of unusually elaborate workmanship. A winding stem of flowery pattern work covers its face, and from each side of it springs a lotus-like flower, which alternately forms the resting place of a mystic bird or an elephant rampant. The fifth slab is plain. The sixth pillar is ornamented at the base with a female figure eight inches high, from whose hands spring a winding branch of foliage and flowers, which stretches to the top of the lintel. On the base of this slab, on the south side, there is an inscription, of which an annotated translation and reading in modern Deva-Nagri by Dr. Rajendra Lala Mitra is given below:—</p> <p style="text-align: center;"><i>Deva-Nagri transcript.</i></p> <p style="text-align: center;">श्रीमन्महोपासक देव राजे सन्तु सगुनी । राष्ट्रधारतनेदेवधर्माय प्रवरनामोदा देव या श्रीः परमोदायक श्रीमन्महोपासक देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः देव या श्रीः</p>

							Class.	Remarks.		
				<p>(Translation.)</p> <p>In the reign of Srimat Mahipala Deva, Samvat 913 (A. D. 856). This is a religious gift of Baladitya, the son of Gurudatta and grandson of Haradatta, a follower of the noble Mahāyāna school, &c., a devout worshipper, who came from the city of Kausāmbi (wherein he was the chief among the wise men of the auspicious Tailādhaka). Whatever merit may accrue from this, may the same be to the advancement of the highest knowledge among the mass of mankind. The end.</p> <p>The seventh slab is a repetition of the third, and the eighth is of the same stone as the second, containing three large female figures, one above the other, each about 1½ feet high, and in the hands of each is seen a musical instrument similar in shape and size to the modern sitar. The ninth stone has a simple beading, and is surmounted by a heavy slab covered with carving. The two last slabs of the series, together with the one which covers them, formed the doorway which leads to the inner part of the temple. This magnificent gate, now in the Bihar museum, led to the second hall 12 feet wide and 18 feet long, and on each side of this chamber were smaller octagon rooms, from the western end of which a staircase led to the terraces above, and which were approached by narrow doors right and left of the great gateway. These rooms were evidently of great height, and were decorated by elaborately carved panels of sand-stone set into the brickwork. One of these consists of a slab of Mirzapur stone covered with the most elaborate design, the chief feature being two figures with arms and legs entwined. The colour of the stone is peculiarly beautiful. Another is of blackbasalt, and represents a large elephant, richly caparisoned, with a lotus flower in its mouth. Beyond this</p>

							Class.	Remarks.		
				<p>another door opens into an inner chamber 22 feet square, the walls of which are, in their ruined state, 14 feet high. This was doubtless the most sacred portion of the building, and there is at its western end a headless Buddha four feet high, placed on a handsome throne of black basalt, divided into five compartments. The first on each side contains single figures; the next, lions couchant; and in the centre are two devotees in the act of making an offering. The wall is 18 feet thick on either side.</p> <p>The higher terraces and roofs have fallen over on the northern side; and from an examination of their ruins, it is conjectured that the building consisted of at least five stories, surmounted by a spire or minaret, not by a cupola. The total height was probably at least 200 feet.</p> <p>The excavation on the western side is the most perfect of all. The upper terrace is about 63 feet long, and is 12 feet above the lower one, which is 11 feet wide. The wall of the higher terrace is quite plain, decorated by a simple moulding about three feet above the base. The terraces consist of solid brickwork, a fact which has been ascertained by making a perforation six feet deep in the centre. Not quite in the centre of the building is an irregular protuberance 22 feet wide and 27 feet long. Possibly it was a mere support, built up to sustain the weight of the upper stories when they showed symptoms of decay; for, on removing the greater portion of it, the pilasters, mouldings, and statues which decorate the wall of the lower terrace were found entire behind it. The ornamentation of each of these sides consisted of a series of mouldings and niches filled with stucco figures of Buddha in various positions. After the removal of the protuberance, the west side presented at the base a moulding of brick-work five feet three inches high, having 13 distinct turns. The moulding</p>

							Class.	Remarks.		
				runs along the whole facade. After the first 6 feet, it recedes a foot and continues in the same line for 18 feet, when it again advances a foot and continues in that line for 8 feet. This arrangement is continuous. Above the moulding is a series of niches, two feet ten inches wide and three feet three inches high. They are separated by pilasters about four feet six inches high. These pilasters have plain square bases and a three sided shaft, each shaft being somewhat semicircular in form. Above this is a square moulded capital. Above the niches are lotus-shaped bosses of brick, protruding from the wall, and above these is another moulding similar to that below. The niches are surmounted by arches of overlapping brick, and each contained a figure in plaster. The original bricks are moulded with exquisite exactness and present a great variety of patterns; some of the pilaster bases, for instance, containing figures, &c., fitted together in different portions. The temple has evidently been covered at least twice by a coating of plaster moulded into different forms, but as a rule greatly inferior to the workmanship of the brick underneath. The southern side is precisely similar to the western. On the top of the terrace, which doubtless ran round the three sides of the temple, was probably a verandah, as holes which may be the sockets of the beams are visible in the upper wall. The southern side still stands more than 30 feet high.

127	Saran	Sitakund	Temple	Sitâ-kund, or "Sitâ's tank," is a circular pond, 140 feet in diameter, situated near the middle of an old fort without name, 10 miles to the south south-east of Motihâri, and half a mile to the north of Madhuban on the Bâr Gandak, or old Gandak, river. The site is evidently an old one, but nothing whatever of its history, and not even its name, is known to the ignorant Jogis who now live there. The ramparts of the fort are formed of two separate brick walls, with 8½ feet of earth filled in between them. The outer brick wall is 10 feet thick, but the inner one is only 3 feet, so that the rampart is exactly 21½ feet thick. The fort is an irregular square of 450 feet each side. The north and east sides are quite straight, but the other two sides are irregular, that to the west being only 350 feet long, with a projection in the southern half, which makes the south side with its salient angle about			iii	Probably capable and deserving of preservation. 				<p>560 feet long. There are large round bastions at the corners and in the middle of each face. The brick walls are still from 10 to 12 feet in height, but they must have been much higher originally, as the earthen rampart is generally about 20 feet in height, with a base of from 50 to 60 feet. The whole height of the rampart with its parapet could not therefore have been less than 30 or even 35 feet. In some places, on the west and north, there are traces of a ditch. Altogether the Sita-kund fort must have been a place of some strength in Hindu times, when guns were unknown and thick lofty walls could only be attacked by escalade.</p> <p>On the east, the west, and the south sides, there was a single entrance, and on the north there were apparently two gates, but the rampart on this face is so nearly obliterated that a guess could only be made at the position of the gates by the depressions on the edge of the mound.</p> <p>The holy tank is a deep circular pond, with stone and brick stair-cases on three sides, leading down to the water's edge for the convenience of bathing. A great mela is held here annually on the Ram Navami of Chait, or 9th day of the waxing moon, when several thousands of people assemble to do honour to Rama and Sita. Near the north flight of steps there is a broken stone bull and a lingam with the remains of a floor of an old temple of Siva. To the south-east of the tank there is a brick temple of Mahadeva as Girija Nath, or the husband of the mountain-born goddess Girija or Parvati.</p> <p>On the southern rampart, close to the middle bastion, there are two small places of worship under trees.—one dedicated to Garh-debi, and the other to Baran Bir. The former is the tutelary goddess of the fort, but the latter is the shrine of a deified ghost, or spirit of a man who had met a violent death. Nothing, however, is known about him. On the top</p>

							Class.	Remarks.								
129	Saran	...	Sârangarh	...	Fort	...	Sârangarh, or Sarvangarh, is an old fort situated on the north bank of the Bûr Gandak, five miles to the north-east of Motihâri. It is also called Nonachâur-garh, or the "fort of Nonachâur," a Dusâd, who is said to have reigned. The mound is high and covered with old bricks and jungle. Some portions of the brick-walls also remain. Nonachâur, the Dusâd, is the hero of the Subahi-garh legend, and if he is the same person as the owner of Sârangarh, the lover of the Princess Subahi, must have been at least a petty chief, although of low caste. General Cunningham did not visit Sârangarh, as he was informed that there were no remains except some ruinous brick walls. It is worthy of notice that all the oldest places in this country are situated on the banks of the Bûr Gandak or old Gandak River.	Neglected	...	iii	Yes	... 				<p>north-east of Kesariya. It stands on an elevated piece of ground 500 feet long by 300 feet broad, on the eastern bank of an oblong sheet of water called Gaya-Pokhar. Nine hundred feet to the south-east, there is a fine large tank, 1,000 feet square, which is called simply Pokhar or "the tank," and sometimes Bauddha Pokhar, which seems to point to the Buddhistic stupa close by.</p> <p>On the eastern embankment of the Bauddha Pokhar, there is a small shrine in the shape of a round brick platform 3 feet high, with a single knot on the top. This is the usual form of the Grām Deota, or deified ghost, which is so extensively worshipped by all the lower classes. It is chiefly attended on Sundays and Mondays, when a young goat or sheep is sacrificed and flowers are offered.</p> <p>At the south-west foot of the mound there is a small brick tomb of Ghulam Husen Shah, who is more commonly known by the name of Mallang, or "the madman." It is a small brick building, only 13½ feet square, but it has 15 bigahs of land attached to it. The present occupant is the fourth in descent from Mallang, so that the shrine may be about 100 years old.</p> <p>The mound is 37 feet high, with a circular base nearly 200 feet in diameter. Due east, a few hundred feet, there are two bridges on the high road, one of them with six piers and two abutments, which, from their dimensions, must contain about 4,500 cubic feet of solid brick-work, all of which was taken from the old stupa on the mound by one Bishanath Bābu 25 years ago, when he was making the road.</p> <p>General Cunningham dug a trench all round the building outside as well as a shaft down the centre, by which he ascertained that the stupa stood on a paved terrace raised 20 feet above the ground. He sank both excavations below the foundations of the stupa. The shaft was 12 feet in diameter at the top and about 9 feet below. At a depth of 12 feet the size of the bricks suddenly changed from 15 by 8½ by 2½</p>

				<p>inches to $17\frac{1}{2} \times 9\frac{1}{2} \times 3\frac{1}{2}$ inches. This was the level of the plinth on which the building was erected. At first he thought that the large bricks might have been made specially for the plinth of the stupa and the pavement of the terrace. But it afterwards struck him that they might have been the remains of a former stupa which had become ruinous, and this, he thinks, must actually have been the case, as he found, amongst the large bricks at the bottom of the shaft inside the roots of a decayed palm-tree standing quite upright. From this he concludes that, when the present stupa was begun, the ruins of the previous building must have been overgrown with jungle, which was all cleared away and the top levelled, leaving the roots of this single palm embedded in the bricks of the older stupa. There were 13 courses of large bricks forming the plinth of the existing building, which was 4 feet deep. If this plinth was the remains of a previous stupa, as he supposes, then the old building must have been larger by twice the breadth of the plinth, or twice 5 feet 2 inches.</p> <p>In plan the present stupa is a circle of 22 feet diameter at base, which decreases to $19\frac{1}{2}$ feet at the top of the ruin. In section, the lower part for $4\frac{1}{2}$ feet consists of a few bold mouldings, above which the wall is quite plain at a height of 3 feet 2 inches. Then comes a band of moulding, 8 inches deep, supported on 6-inch dentils or brackets. The wall is then divided into 14 faces by plain pilasters, 8 inches broad, without bases. They must have had capitals, however, as General Cunningham found a single piece of brick carved with a volute at one end similar to the volutes which he has seen in other brick capitals. The whole of the upper part of the stupa above the middle of the pilasters has been removed; but amongst the bricks lying about, he found a single specimen with a semicircular end and sloping sides, which must have formed part of some circular ornament of the pinnacle. He found also that the bricks of the hemi-</p>

							Class.	Remarks.		
				<p>sphere had been made of two kinds, one with the long face carved, and the other with the short face carved, so that they must have been built as headers and stretchers. That they formed part of the hemisphere was proved by their being slightly bevelled on the outer or curved edge. One stretcher was 14 inches long outside by 12½ inches inside, and 8½ inches broad.</p> <p>Two large cowries in good preservation were found inside the shaft, but nothing was discovered from which the age of the building might be inferred. From the general appearance, however, as well as from the relative proportions of height and diameter, General Cunningham concludes that it must be a mediæval building, probably of the 8th or 10th century. That it cannot be older is, he thinks, proved by the discovery of the roots of a palm tree embedded in the brickwork of a previous stupa. What may have been the age of this older stupa can only be guessed. It must, however, have been several centuries older than the present stupa, as we must allow a long time for it to have become so ruinous that only its foundation was left to be overgrown with palm trees.</p> <p>The great paved platform, 20 feet high and 175 feet in diameter, on which the stupa was erected, must of course be as old as the original stupa. It was faced with a wall of brick all round, as General Cunningham found this outer wall at four different places selected at random wherever the jungle was less dense. As the bricks of this wall were all of the smaller size found in the later stupa, he concludes that the wall itself is most probably of the same age. Apparently the wall sloped inwards, as he found in one place that only the three lower courses were perpendicular, above which four courses were stepped inwards, about 3 inches in each course, followed by another course 6 inches still further back. Above this the face of</p>

131	Saran	Unchidih	Stupa	<p>the wall was broken; but as continuous courses of bricks could be traced upwards on the face of the mound, he thinks it probable that the wall gradually receded until it reached the paved court on a level with the base of the stupa.</p> <p>There is no tradition connected with the Sagar Dih, except the common story which is told at so many other places, and which probably belongs to the old Buddhist times when travellers received hospitality in the monasteries. Formerly, the people say that travellers used to find cooking-pots lying ready for their use; but an avaricious Baniya having carried off some on his pony, the cooking vessels have never been seen since.</p> <p>General Cunningham reports as follows:—</p> <p>"Of the places called Unchadih or Unchidih, there are two, one situated at a distance of $4\frac{1}{2}$ miles east by south from the village of Singasuni, and the other eight miles due north of the first Dih, close to a village called Jakiari.</p> <p>"I however heard, from the people of whom I made enquiries, about a garh situated half a mile west of Singasuni, and on visiting the spot found it to be a mound covered in parts with broken brick. These remains measured about 130 feet long by 100 feet broad, and have a general eminence of a few feet from the surrounding country; but the four corners are considerably higher, the highest of these (the south-west corner) being about 8 feet above the field level, and there is a winding road about 14 feet broad, traces of which can be followed for upwards of a quarter of a mile. This road leads up to the northern face, which I make out to have been the entrance to the fort.</p> <p>"As the greater part of the day was spent in enquiries about Unchidih, and I wished to march next day on my road to Bettiah, we had not much time. However, I excavated one of the corners thoroughly, and at about three feet below the surface came upon solid</p>			iii	Yes	No	Vide also Archaeological Report, Vol. XVI.

				brickwork which only lasted for five courses, and was of an irregular rounded form; this gave place to earth, showing that these corners must have been commenced with earth, and after being carried up for about four feet with this material, brickwork was resorted to in carrying on the building of these curious mounds at the four corners of this garh. They may have been bastions to the fort, or more likely, are the foundations of four towers which once embellished the general design of this edifice. Besides laying bare one of the corners, I made some desultory excavations through the sides of the mound, in the hope of finding some traces of ramparts or walls; but although three trenches were cut through the north-east side, which was in the most regular and straight line with the exception of a stray piece of brick here and there, which may have fallen in by accident from the other parts of the ruins during its demolition, I did not find anything which would lead to even a supposition of walls having existed; at least they could not have been commenced at so low a level; but as the lowermost course of brickwork in the corner towers begins much above the ground level, the foundation of these walls might have rested on an eminence of earth. In the well, five feet in diameter, which I sunk, as near the centre of the mound as I could, I was more successful; for at a depth of four feet below the surface we found portions of four large bricks and nine pieces of bone, one large; also a few beads similar to those found at Besārh in the excavations made in the great ruined fort there. I failed to connect the fragments of bone into any form, but from their appearance should think they were human; possibly the beads may have been interred together with the bones; but these being only mere fragments, it would be difficult, if not impossible, to arrive at any conclusion regarding this discovery. The most remarkable part of the remains is the curiously winding road above men

132	Saran	Kasturia	Mound	<p>tioned, which leads up to the north face of the mound. I traced this road for nearly half a mile; it takes a south-westerly direction, and, were it not covered with some scattered huts at a distance of little more than a quarter of a mile from the <i>garh</i>, in all probability the track may have extended a great deal further. It is occasionally used by bullock cart-drivers travelling from one village to another with their wares; these carts pass right through the ruined mound; and in consequence of this practice, it is much cut up with their ruts, but the road itself, though very ruinous on the sides by age, does not seem to suffer much from this traffic.</p> <p>"The natives are more than usually ignorant concerning these remains, and further than their forming a ruined fort (<i>garh</i>), they seem to know nothing; nor is the zemindar of the village more enlightened on the subject."</p> <p>On the west side of Sareya, near the little Bakeya Nala, and 16 miles nearly due east from Motihari, there is a large mound of brick ruins called Kasturia, 160 feet long by 100 feet in breadth, and 4 or 5 feet in height, which is said to be the remains of an ancient town. To the west of the mound there is a gigantic <i>Pakar</i> tree (<i>Ficus glomerata</i>), about 15 feet in diameter, under which is a seated female figure, which the people know as Durgavati Rani, but which appears to be the goddess Durga, as she holds the usual bow and arrow. The stone is much injured below, but the figure of a lion, on which the goddess is seated, is faintly traceable. There is also a broken figure of Vishnu, and a carved stone, 2 feet 11 inches long, 9 inches broad, and 6 inches thick, which looks like a piece of a door-jamb, or architrave, as there is a figure on it with bands of flowers.</p> <p>The mound is said to be the remains of a Chero Raja's place. It has been dug up in all directions for bricks, which measure 13 by 10 by 2½ inches. The fields for half</p>	iii	No	No	Vide also Archaeological reports, Vol. XVI.

133	Shahabad ..	Sasseram *	Tomb of Sher Shah.	<p>a mile round are strewn with broken bricks. Durgavati Rani is said to have been the wife of one of the Chero Rajas. One day when she was seated under the Pakar tree, a Banjara came up to her, and tried to take off her bracelets and other ornaments. She prayed for assistance, and was at once turned into stone, with all her ornaments.</p> <p>This tomb, which is still almost entire, stands in a large court-yard, enclosed by a high wall of cut stone, in the eastern face of which is a large gate, a mosque facing the west. The tomb consists of a large octagonal hall surrounded by an arcade of three Gothic arches, from which springs a second storey, also octagonal, and 25 feet high. It is situated within an artificial tank.</p> <p>The roof of each of the octagonal sides of the verandah surrounding the dome proper consists of three alcoves, each supported by four Gothic arches, above which is a level terrace forming the first storey about 35½ feet high: 6½ feet of this height is occupied by a very heavy balustrade and parapet. The terrace is 15 feet wide, and has a small cupola supported by six rude columns at each corner. The second stage consists of a plain wall with a cornice, surmounted by a low parapet. On the top is a small terrace 9 feet 10 inches wide, having at each corner a cupola similar to those below. Above the second stage the outside of the building rises perpendicularly, with a third stage of 16 sides, 11 feet high. There is a kind of false balustrade, from which a nearly hemispherical dome arises. On its summit, again, is a small cupola supported by four pillars.</p> <p>The interior of the building forms an octagon, the sides of which are 54 feet at the base. Each inner side of the gallery is divided into three others by an equal number of arches. In the central arch of each of the seven sides there is a door. The most westerly side is inscribed with sacred sentences, and in the centre with</p>	Government.	Repaired	...	is	Already repaired.	re.	Yes; and details in course of collection.	The greater portion of work here has been already done, and drawings and photographs now are all that is needed, with the exception of repairs to the approach. To improve this a bridge should be constructed across the tank.

139	Shahabad ...	Bazar	Fort	<p>temple of Rohitaswa, called <i>Chauri</i>, where his image was worshipped until destroyed by Aurengzeb. It is situated on a steep peak, commanding a magnificent view of the country beyond the Son. A stair leads to the summit, the steps of which being entire cannot be much older than the time of Man Sing. Behind it is a small mosque ascribed to Aurengzeb. At the foot of the stair is a small but handsome temple, attributed to Man Sing. Within the gate at Raj ghat it is believed there must have been a very large building, which formed the private residence of the commander. In it are two temples; one of them is exceedingly handsome, the other is small and dedicated to some Tirthankara of the Jains. There are also under-ground chambers, one of which, a large octagon, has been explored, the others yet need exploration. It is believed that they communicate by means of fissures with a secret path leading down to the foot of the hill.</p> <p>The palace, or mahalsarai, extends from north to south, and has its principal front to the west. It is irregularly built, without any architectural pretensions. The most elegant part in the whole is the door—a large gothic arch with the figure of an elephant on each side. Inside is another arch of equal dimensions, leading to the King's Palace, one of the best proportioned parts of the whole building. Its roof is plastered in the alcove form, with many small compartments, similar to the stone roof in English cathedrals. The building where business was transacted is perhaps the most tastefully designed of all. It is called <i>bara dwari</i>, or 12 gates, and gives its name to the square in front. In front is an open hall supported by four double columns. The hall within the colonnade was occupied by clerks.</p>	Government.	In ruins	1a	Yes	No	Kept in good order. 				<p>a face of massive brickwork, ending at both sides with circular towers. In the centre is a large doorway, and at each side of this doorway, arranged at equal distances, are five smaller ones: in all eleven doorways, all being of the pointed arch form. Above the doorways, the face of the wall is a little deeper than it is in the intervals, and the wall is dotted with circles by way of ornament. The doorways lead to a large hall, 144 by 96 feet. The pillars, of which there are 10 rows of six each, divide the space into 11 aisles lengthwise and 7 aisles crosswise. The 11 doorways are opposite the aisles. The central aisle, that which is entered by the large doorway mentioned above, is however closed at the western end by a wall of stone. This was the place of prayer, the people, of course, worshipping facing the west. On the north side of the central aisle are the remains of two small platforms of brick; one near the stone prayer niche, which was for the worshippers, and one near the doorway, the place where it is said Khanja Ali sat to transact his business; for this large hall was both a place of business and a place of worship; and even the altar served worldly purposes, for two holes are shown in it where Khanja Ali kept his boxes of money.</p> <p>The roof is composed of 77 cupolas or domes (11 rows of seven), supported by arches on the pillars beneath. It is all very massive, but the pillars are nevertheless very thin, not more than $1\frac{1}{2}$ or $1\frac{1}{4}$ feet square. The pillars were apparently originally built of grey stone. Each pillar shows two or three of these grey stones placed one above the other, and cut quite smooth; and about eight feet from the ground, where the arch springs which supports the cupola above, there is a sort of capital.</p>		of the masonry is in good order, and with mere surface repair would make a fine public building. The roof, however, is covered with a forest of jungle, which completely hides its form.				exploration needed.

2	Jessore	Bagerhat	Tomb of Khanja Ali.	<p>At the four corners of the building, four small towers rise a little above the roof. The two which are on the front are ascended by winding staircases from the inside of the building, one of them being called the <i>andhar kotha</i> (dark building), and one, the <i>reshan kotha</i> (light building).</p> <p>The inside is kept clean by an old man, who gets a few pice from the pilgrims who travel to the place. During the <i>mela</i>, or fair, held every year in honor of Khanja Ali, it is used as a dwelling-place by many hundreds of the visitors, who can find abundant accommodation within.</p> <p>There are traces of a large wall which once surrounded the whole building, and the enclosure within which it stands is even now entered by the ancient archway which formed part of this wall.</p> <p>This tomb is situated within the quadrangle which contains the whole of Khanja Ali's buildings. The structure appears square on the outside, but octagonal inside, and the roof of it is one large hemispherical dome with an ornamental pinnacle standing out at the top. The dimensions of the building are 45 feet square (this being therefore the diameter of the dome), and it is 47 feet to the top of the dome.</p> <p>Khanja Ali's tomb occupies the centre of the building, and it is marked by a tomb-stone, five or six feet long, having a rounded top, laid upon three steps. The stone is covered with Arabic inscriptions in relief, and the horizontal face of the two highest steps (which are also of stone) bear similar inscriptions. The lowest steps and the floor of the hall are laid with hexagonal encaustic tiles, but the floor is very much broken up.</p>	ii b	Yes	No	Drawings and details desirable.

							Class.	Remarks.		
3	Jessore	Bagerhat	Fir Ali's tomb	<p>* The stone used in the construction of the tomb is the same grey stone which is used in the pillars of the "Sath Gumbaz." There is no such stone to be found in all the Gangetic delta, and the tradition is that Khanja Ali had it brought from Clatt-gong. But it is not clear whence the masons came who fashioned and engraved it.</p> <p>Immediately on the west side of the above mosque, and outside it, there is another tomb, lying, like Khanja Ali's, north and south, fashioned exactly similarly but bearing no inscriptions. It is a cenotaph, and can be entered by a door leading beneath the tomb-stone; it is said that there were inscriptions inside. This tomb is that of Muhammad Tahir, the dewan of Khanja Ali. He is known in Bengal by the name of Pir Ali, and was a Brahman who had adopted the Mussulman religion. His zeal for religion is celebrated to the present day, and he gives his name to a certain sect of Hindus.</p>	ii b	Yes	No	* Exploration needed. Inscriptions should be sent to the Government Epigraphist: drawings needed.
4	Ditto	Ditto	Cook-house	<p>The mosque and these two tombs are all that is within the quadrangle, but just west of it, and within the outer enclosure, is another building similar in structure to the mosque, but smaller in dimensions. It is said to have been used by Khanja Ali, when he dwelt here, as his cook-house.</p> <p>The two fakirs, who are in charge of all these buildings, claim descent from Khanja Ali, though they cannot trace it. They have, however, rights in the place, as they hold about 368 bighas of lakhiraj land, appropriated to the service of the place, under a grant of very ancient date. The tomb is also a favourite place of pilgrimage for devout Muhammadans, and people come from a long distance to make their vows at Khanja Ali's shrine.</p>	All these buildings are in good repair except the surface. They are in charge of two fakirs, who keep up the worship at the mosques.	iii	No	No	Ditto.

							Class.	Remarks.		
6	Jessore	Masjidkar	A mosque	<p>The buildings described, though the most complete, are by no means the only remains of Khanja Ali to be found in this place. For two or three miles round about the country is full of ruins of old mosques, some of them similar in structure to the mosque of the tomb, some simpler. The people who reside near them say that there are in all 360 mosques and 360 tanks, and that they were called by the names of Khanja Ali's leading men—Bakhtiyar Khan, Ikhtiyar Khan, Alam Khan, Seadut Khan, Ahmad Khan, Daria Khan, and so forth.</p> <p>When, in the extension of cultivation into the Sundarban forest, some people were clearing the jungle along the banks of the Kabadak river, at a point about six miles south of Chaudkhali, they came upon an ancient mosque, close by the river-bank, and they called the village by the name of 'Masjidkar,' the digging out a mosque.</p> <p>The building thus found proclaims at the first glance that it owes its origin to the same hand which built the 'Sath Gumbaz.' The principle of structure is the same, only instead of a breadth of eleven domes and a depth of seven, we have here a breadth and depth of three domes only, or nine in all.</p> <p>There are the same massive walls, for they are about six feet thick; a large central doorway is beneath the middle dome on each side, and two smaller doorways on each face, one on each side of the central one. But the building itself appears to the eye so massive a structure that the doorways seem dwarfed out of all proportion to the size of the face. As in the 'Sath Gumbaz,' so here also, there are four towers at the four corners of the building, but none of them appear to have stairs and the walls show in several places the</p>	The building is clean in the inside, and is all in very good order. The tops of the corner towers have fallen away, but the rest of the masonry looks as if it would stand for ages. The roof, too, is kept clean, no jungle being allowed to grow, except a little grass, and thus we see not only the forms of the nine domes, but the tracery work along the upper edge of the four faces.	ii/4	Yes	... No ...	Detail drawings and photographs very desirable.

	Jessore	Muhammadpur	came up it was not ready, and he therefore left them behind; they remaining back, erected shrines, and as they were, like Khanja Ali, men of great piety and divine power, people resorted to them, and even now resort to their shrines, to make their vows and make known their wishes. The following objects relate to the ruins at Muhammadpur, where Raja Sitaram Ray, zemindar of Bhusna, established his capital in A.D. 1700. The place was so named after Muhammad Khan, an old fakir, who had established himself there, and who was persuaded to leave the place on condition of its being named after him.								
9	Ditto	Ditto	Quadrangular fort.	There is a large quadrangle, which encloses most of his (the Raja's) buildings, within which he kept his soldiers, and within which was his own house. It measures more than half a mile in each direction, and is surrounded on each side by an excavated ditch, the earth of which thrown inwards is used to raise the level of the quadrangle, and specially of the edges of it, leaving as it were a ramp round it. The ditch on the eastern and northern sides has gradually filled in, principally through the influence of the river, but that on the western side is still full of water. On the southern side, the ditch is of much more ample dimensions than on any other side. It forms a fine sheet of water, a mile long, looking almost like a river. By the earth obtained from these excavations, and by that obtained from tanks, within its area, the level of almost the whole quadrangle has been considerably raised, a work which in itself represents an enormous amount of labour. The chief entrance to within the quadrangle is at the south-east corner. From here is seen towards the north the high and broad ramp upon which stood the bazar, and at the southern end of which is the more mesgre bazar of the present day. On the west is the river-like sheet of water above referred to. On the south, just outside the boundary of	iii	No	...	No	...	Survey and exploration desirable.

10	Jessore	Muhammadpur	Kanungo Kachari.	the quadrangle, is Sitaram's great tank, the Ramsagar, and a quarter of a mile to the west of this is another tank called the Suk Sagar, or the lake of pleasure. At the corner of the road which leads off from near the middle of the eastern ramp into the middle of the quadrangle where Sitaram's buildings are almost all aggregated, are the ruins of a brick-built house, which is said to have been the old Kanungo kachari attached to the zemindari.	iii	No	...	No
11	Ditto	Ditto	Temple of Ramchandra.	It was erected about the year 1800 by the Nator Raja, whose family obtained the zemindari after it had passed out of Sitaram's hands. It is a two-storied building, the upper storey being smaller in extent than the lower, and each storey having an arched verandah in front. The building contains nothing remarkable. It was endowed with certain rent-free lands, which included the jalkar of the Ramsagar, but its endowments were resumed by Government. The service is still carried on from the profits of these lands, and is managed by the same person who looks after the services in Sitaram's old temple.	The building is still in good order.	iii	No	...	No
12	Ditto	Ditto	Dol Mandir	The building just described is on the south of the road, and on the north side, in front of it, is an open space, in which is the "Dol Mandir," where the swinging festival at the full moon of Phalgun (the Dol Jatra) is held. This is a building of Sitaram's time. The form of the building is that of a magnified sentry-box, a pointed arched roof, supported upon four columns placed square; these again elevated upon a pedestal of three tiers.	The building is still in good order. The plaster work being occasionally repaired.	iii	No	...	No	Mr. Westland calls it the Dhol Mandir, i.e., the place where dhols or drums, are beat during the festival. This is evidently a mistake.
13	Ditto	Ditto	Zemindari buildings.	Next are two buildings, the 'Punya Ghar' on the north and the kachari of pergunnah Naldi on the south. These do not date from Sitaram's time, being buildings which belonged to the zemindari of pergunnah Naldi, when its collections were made here, as they were up till 30 years since.	In ruins	iii	No	...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
14	Jessore ...	Muhammadpur...	Sitaram's kachari and jail.	The next building is one which extends some little distance to the north of the road referred to. The part of it nearest the road was the kachari, where Sitaram made his collections and kept his zemindari accounts. The long extension northward was his jail, the place where he used to confine, "daring pleasure," those ryots who did not, or could not, pay up the demands on them.	Of the kachari (the <i>chakla</i> , as it is called, signifying a kachari for a circle of pergunuabs) the walls are still standing, but of the jail it is possible only to trace the line.	iii	No ...	No
15	Ditto ...	Ditto ...	The treasure tank.	Along the western side of this kachari and jail extends a tank, at the further side of which are the ruins of Sitaram's own house. The tank runs up close to the house, and a wall, the foundations of which are still easily traceable, ran round the tank on the east and north sides, enclosing it so as to be within Sitaram's private enclosure. This tank was used as a treasure-room. The wealth that Sitaram accumulated was thrown in here until it was wanted. It is said that great wealth even now remains buried at the bottom of the tank beneath the grassy jungle which now fills it.	iii	No ...	No
16	Ditto ...	Ditto ...	Sitaram's house	Sitaram's own house is unapproachable for the density of the jungle, which has been allowed to spread over almost the whole quadrangle.	iii	No ...	No
17	Ditto ...	Ditto ...	The Lion Gate	The road immediately after passing in front of the <i>chakla</i> kachari passes under the 'Lion Gate' (Singh Darwaza), which admitted to Sitaram's private buildings.	This gate was once a large structure, but now only the arch of it remains. The top of the arch is in the shape of one half of a dome, the hollow side facing outwards.	iii	No ...	No
18	Ditto ...	Ditto ...	Punnya Ghar	Adjoining the gate on the north, and therefore close to the Kachari house, in the 'Punnya Ghar,' that is, the place where the first collections of the year were made, a half religious ceremony is performed about Ashadha (June-July) in each year at the principal collecting places of the zemindari.	This 'Punnya Ghar' is now nothing but a mass of jungle and bricks.	iii	No ...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.		
							Class.	Remarks.				
19	Jessore ...	Muhammadpur	Treasure-room	The 'Lion Gate' leads to a little court-yard, with three buildings, one on each side, not much larger than ordinary native huts, but built of bricks. That facing the gate is the malkhana, or treasure-room of Sitaram, and that on the left side is the guard-house. These two buildings were used for these purposes by the Rajas of Nattor, when after Sitaram's time they obtained the zemindari. When, however, their zemindari of Naldi was sold up (about 1800) the purchasers forcibly expelled the Nattor people from these houses, and they, obliged to erect a treasure-room for themselves, built the little one on the right-hand side.	All three rooms are now in ruins.	iii	No	...	No
20	Ditto ...	Ditto ...	Siva Mandir ...	Just south of the treasure-house there is a small gateway coming down from Sitaram's time, which leads to a small court-yard at the back of the treasure-house. The building facing the gateway on the west is a common Siva Mandir (place of worship of Siva) erected by the Nattor Rajas. It is much in the shape of a native hut with its bent roof and verandah in front, opening outward by three arches.	The plaster over the brick-work is sculptured, but much of it has fallen off.	iii	No	...	No
21	Ditto ...	Ditto ...	Temple of Kali	On the north, on the bank of the treasure-tank, there is the Temple of Kali, the smallest and the oldest of Sitaram's three temples. In shape it resembles the newer structure just described—a masonry erection in the shape and size of a native hut, with a verandah in front. The deity worshipped here is a small idol, and is called Dasabhuja, 'the ten-armed,' an epithet of the goddess Kali. The temple once bore an inscription, which has either been stolen, or, more likely, lies among the debris of the broken arches. The inscription, which was in Sanskrit, ran thus:— Mahabhuja, rasa, kshanni, Sake Dasabhoj alayam. Akāra Sri Sitārāma rāyena Mandiram. "In the year of the era called Sak, earth-arms—tastes-earth, this temple, the abode of Dasabhuja, was built by Sitarama Raya."	The arches opening out of the verandah have fallen down, and an attempt has been made to repair it by masonry of the most clumsy and unstable style.	iii	No	...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
22	Jessore ...	Muhammadpur...	Toshakhana ...	<p>The date here requires some explanation. The Sak era commenced in 78 A. D. The date is given in a sort of enigmatical manner, by the words earth-arms, tastes-earth, and the plan of their enigma is thus explained:—</p> <p>"Earth" stands for <i>one</i>, for there is only <i>one</i> earth.</p> <p>"Arms" means <i>two</i>, for every one has two arms.</p> <p>"Tastes.—"Hindus enumerate <i>six</i> tastes: they are pungent, sour, saline, bitter, acid and sweet.</p> <p>"Earth," as above, represents one.</p> <p>The date is therefore 1 and 2 and 6 and 1; or as we write it, with the largest denomination first, 1621. This year began in April 1699.</p>	In ruins ...	iii	No ...	No

It is an octagonal structure with two storeys, having a flat roof, and has no pretensions to architectural form or beauty. In the upper storey, the god reposes at night, and for the day he is brought down to the lower storey, where he remains upon a couch. In front of him, and upon the same couch, are two little idols, three or four inches high, Govind and Lakshmi, who are probably his attendants.</p> <p>It is agreed by everybody that Lakshmi Narayan (which is very like an ordinary round shaped stone) was found by Sitaram under ground.</p> <p>There was a dedicatory stone upon this temple, which has been either stolen or lost. The inscription on it as furnished by the Superintendent of the Temples, ran thus:</p>	iii	No ...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Co-tody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans or drawings of the building exist.	REMARKS.

				<p>quarter of the height of the front. Beneath these the face is divided into five equally broad portions. The two outer parts contain each three perpendicular bands of ornamental tracery with two lines of little sculptured squares between them. The other three parts contain doorways, of which the centre one is higher than the other two. In outline they are of the pointed-arch form, but instead of having their sides simple lines, they are waved, so as to be a succession of semi-circles. Above each of the doorways is a large square of equal breadth with the doorway, containing a device which at first sight looks remarkably like the "lion and unicorn fighting for the crown." It is, however, intended to represent two lions supporting a chalice. The spaces between the sides of the arches and the squares above the doorways are also ornamented.</p> <p>The whole face of the building, therefore, and partly also of the towers, is one mass of tracery and figured ornament. The sculptured squares, above referred to, of which there must be about fifty on this front face, represent each an episode in Krishna's life. The figures in them, as well as all the rest of the ornament, are done in relief on the brickwork of the building, the bricks being sculptured either before or after burning. The figures are very well done, and the tracery is all perfectly regular, having none of the slipshod style which too often characterizes native art in these districts.</p> <p>The sides of the building present much the same appearance as the front; but, instead of three doorways and two spaces, they have five doorways: within the doorways, both in front and at the sides, is a verandah, and the entrance to the temple is from this verandah, the image of Krishna being inside.</p> <p>On the top of the lowest arch of the tower a small round stone, twelve or eighteen inches in diameter, is let into the face of the brickwork. It bears a dedicatory inscription written in the Sanskrit language with Bengali</p>						

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
				<p>letters, which, though fairly formed, are somewhat buddled together and are not very easily read. The inscription, which is written in four lines of Prakriti metre, is as follows:— Bana, dwandre, anga chandre pariganita sake Krishna, tosh. abhilashi—Srimad, viswasa, blash, ullhaba, Kula, kamale, bhasaka Bhauntulyah—Ajasram Sauda, yukte ruchira, ruchi, Hare Krishna, geham vichitram-Sri. Sitarama Rayo jadupati nagare bhakitman, utsasarjja.</p> <p>"In the year of Sak, counted by arrow-pair-limb-moon, desirous of gratifying Krishna, Sitarama Raya, who is like a resplendent sun on the lotus of the family, to which attaches the great name of Biswas (that is, who casts a lustre on the great Biswas family, to which Sitaram belonged, as the sun casts a lustre on the lotus), erected in his devotion this splendid house of Krishna, within Jadupati-nagar, a city filled with innumerable mansions, and so beautiful (that it) deprives of beauty that which is beautiful."</p> <p>Jadupati and Kanhaya are both synonyms for Krishna. <i>Jadupatinagar</i> is accordingly made, for metrical reasons, to do service for Kanhayanagar, the name of the village within which this temple is situated. Sitaram apparently considered that the many buildings which he had erected within his quadrangle were within the limits of the village Kanhayanagar, and therefore refers to the village as "filled with innumerable mansions."</p> <p>The date remains to be explained:—</p> <p>"Arrow" refers to the <i>five</i> arrows of Cupid.</p> <p>"Pair" of course stands for <i>two</i>.</p> <p>"Limb."—The Hindu enumerates <i>six</i> limbs.</p> <p>"Moon."—Of course there is only one moon.</p> <p>The year therefore is 1625 Sak, which began in April 1703.</p>

							Class.	Remarks.		
25	Jessore ...	Muhammadpur...	Temple of Balaram.	The building which looks into the same square, facing southward, is a temple of Balaram. 26	Ditto ..	Ditto ...	Third temple...	The building on the east side of the square, and facing west, is a much finer one than the last, though not nearly so good as the temple of Krishna. Its frontage shows three doors, the centre one being higher than the other two, and all being of the pointed arch shape. They are each surmounted by a square containing, in relief, the same device which is seen in the finest structure, namely, two lions and a cup. The top of this building is in three domes, all of the pointed form and finished off with pinnacles, and the central dome is higher than the two-side ones, it is both higher in position (as the frontage of the building rises towards the centre), and it is larger in form. Between the doors and across the top of the face there is a good deal of tracery work executed in relief in the brickwork.	iii	No ...	No
27	Ditto ...	Ditto ...	Fourth building.	An octagonal building closes the square on the south. It was the place for keeping the vessels which belonged to the service of the idols. It is said there were very fine vessels once upon a time, but some one of the zemindars, who had control over them, considered he could make them more useful in his own service, and stole them away.	The three-domed temple is almost torn asunder by the luxuriant pipal-trees that have taken root in it, but the rest of the buildings built by Sitaram, though they suffer a little from this cause, are still in fair order. Their fall, however, is a mere matter of two or three decades. Disintegration is going on, however slowly.	iii	No ...	No

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.

28	Jessore ...	Mirzanagar ...	The Nawabbari	<p>The following relate to the ruins at Mirzanagar (Trimohini), A. D. 1700:—</p> <p>The remains of this old building lie half a mile from Trimohini, along the road which now connects that place with Kesabpur.</p> <p>The building is composed of two square court-yards separated by a high wall, and on the north of the northern one and on the south of the southern one there are similar high walls. On the eastern side of both the squares is a double row of little arched dwellings, which seem rather to be built in the inside of a massive wall than to be constructed with reference to convenience of dwelling. These were apparently the retainers' houses, and the only entrance to the court-yards is through them.</p> <p>On the northern side of the northern square is a three-domed structure, which was the residence proper. The masonry is dilapidated, but the domed-roof still remains. In front of this, and within the court-yard, is a large masonry reservoir which is said to have been a bath. The water was brought in by being pumped over the top of what have been termed the retainers' houses, and could be discharged by a subterranean channel. The source of the water was the river Bhadra, which, though now closed, was, at the time when these buildings were occupied, a flowing river, and flowed close beside.</p> <p>The southern court-yard shows only a few Mussulman tombs, and there are some tombs outside the building also.</p>	Still in a sufficiently good state of preservation.	iii	No ...	No
29	Ditto ...	Ditto ...	The fort ...	About a mile due south of this is what is called the Killabari or "fort." It is a large area raised some eight or ten feet by earth exca-	iii.	No ...	No

38	24-Per gun-nahs.	Sagar Island, Diamond Harbour.	A temple ...	A large Hindu temple on the west bank of the Hughly, about midway between the north and south limits of the island. No local tradition survives, however, and no information can be obtained regarding this building.	In a tolerable state of preservation.	ii b	No ...	No
39	Ditto ...	Ditto ...	Temple of Kapila Muni.	The ruins of a temple dedicated to the famous sage Kapila. They are situated on the south-east corner of one of the minor islands into which Sagar island is divided by creeks and rivers, and on which stands also the Government light-house. There is no satisfactory account of the age of the temple, but its founder must have taken great pains to secure its preservation. The outer works were either of stone or bricks faced with large slabs of stone about two feet long, from 12 to 14 inches broad, and about the same depth.	Of the temple nothing now remains, but a debris of bricks and stone, washed by the waves of the sea.	iii	No ...	No ...	Exploration and plans desirable.
40	Ditto ...	Diamond Harbour	Jartar Deul ...	A Hindu temple four miles almost due east of the tanks called Raidighi and Kankandighi, which are four to five miles south of the present limits of pergunnah Khari. This is one of the most interesting of the ruins yet discovered in the Sundarbans. It is known by the name of "Jartar Deul," and was probably dedicated to Mahadev or Siva, who also goes by the name of Jatadhari. The temple is built on a patch of high ground about two-thirds of an acre in area, but the edifice itself occupies much less space. On a rectangular building a single column rises to a height at present of about 60 feet; but as the top is broken, it is impossible to say what the original height was. The bricks are carved and well put together. They are of the same size and mould as those found near Kankandighi, and probably the ruins near this tank and Jartar Deul were contemporary buildings. On the north of the temple there is a building under ground, and the local tradition is that this is the Bhogmandir, where the food dedicated to Hindu divinity was cooked.	The walls of the building which support the column are about nine feet in thickness; the masonry work inside and the arch over the entrance are well preserved.	ia	Yes ...	No ...	Photographs and drawings desirable.

6	Dinajpur	The Buddal pillar.	This pillar is mentioned in Asiatic Researches, volume I. West of it, in Bogra, north of Goburehappa, is a high brick structure crowned with the shrine of a Muhammadan hermit. This is believed to be the only Buddhist temple still to be traced in these parts. The remains of the Pal Kings are also to be found in the north-east of Panchbibi.	This pillar is still standing.	ia	Conservation desirable.	Rough drawings exist.	Exploration very desirable.
7	Ditto	The Giants' tombs.	Traces of the Buddhist Kings are left in the Giants' tombs, as well as in the tank of Mahipal Dighi. The tombs are 50 or 60 feet long, and represent Buddha entering into the state of <i>Nirāna</i> ; but they have been appropriated by the Muhammadans, and are worshipped as belonging to Muhammadan pirs. One of them, 57 feet long, at Gopalganj, four miles north of Dinajpur, is called 'Pir-i-ehel Ghazi,' and there is another a mile south of Dinajpur, on the banks of the Purnabhaba.	ii.	No	No	Ditto.
8	Ditto	Gangarampur	The ruins of a fort or town called Ban Garh.	The antiquities in Gangarampur are very numerous. The Ban Garh was the residence of the celebrated Ban Rajah, the founder of the Ban or Charack pajah. Being a Hindu city, the pools of Amrit and Jivan still exist there, and the stone bull, Vrisha, taken by Dr. Buchanan to Dinajpur, points to the worship of Siva. It is hence that the numerous carved stones, found in all parts of Dinajpur, Bogra, and Maldah, are said to have come. Some of the finest specimens (a carved pillar and two doorways besides several pillars and doorways) are in the Dinajpur Rajbari. There is a beautiful specimen of a lintel in a <i>bari</i> close to Tambuli thana, and few Muhammadan shrines or mosques are without some of them. They may be divided into two classes, a kind of	The chief ruins are at the present day buried in almost impenetrable jungle.	iii.	Very desirable	No	Exploration needed.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
9	Dinajpur ...	Gangarampur ...	Ruins of a mosque and of a monument of a saint called Mulla Atta.	consolidated clay stone carved in detail and not damaged by the weather, and a granite carved only into mouldings, &c., on a large scale, much weather-worn. There are numerous inscriptions on the mosque and on the tomb, and they are said to date from the end of the 14th or the 15th century. There is a fair held annually here, and the tomb (at which a lamp is still kept burning) is much frequented as a place of worship.	These buildings are in a very ruinous state.	ii b.	No	...	Copies of inscriptions should go to the Government Epigraphist. Detail drawings desirable.
10	Ditto ...	Ditto ...	Monument of Shah Sultan.	This monument is situated among the ruins of the town of Ban Garh.	Very little either of the monument or of the town remains standing at the present day.	iii.	No	...	Examination desirable.
11	Ditto ...	Devikot ...	Two shrines ...	There are three tanks and the shrines of two saints at Devikot, the first Muhammadan capital of Bengal. At one of these shrines there are four inscriptions, one of Kalikusa Shah, the earliest in Bengal. These deserve to be preserved.	ia.	Very desirable	No	Exploration very desirable. Copies of inscriptions should be sent to the Government Epigraphist.
12	Ditto ...	Ekdala ...	The fort of Ekdala.	This was a Muhammadan fort, where Ghyas-uddin Shah and Sikandar Shah successively defied the power of Feroz Shah, the Delhi Emperor, and which Hussain Shah afterwards turned into his royal residence. It is situated on the east bank of the Chiramotoi, west of Tambuli. The place is covered with jungle; but, as there is a shrine, it is believed there may be inscriptions somewhere about. The royal residence, probably that of Hussain Shah, the Kasaba and the Baherbata, or outer enclosure, have been traced here. A tank running north and south, much older than the Muhammadan ones, shows that it occupies an old Hindu site, Dhanjor, whence the pergunnah takes its name.	Some fine tanks, the remains of a brick fort, and traces of many brick buildings still exist.	iii.	Too expensive to conserve.	No	Exploration needed.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.		
							Class.	Remarks.				
13	Dinajpur	Hemtabad	The tomb of a Pir, or saint, called Bazar-ruddin, and other ruins.	The mosque, situated close to the tomb, is a fine one with two inscriptions still standing, and there are a number of Hindu carved pillars and stones about. The neighbourhood is full of brickwork, and it has been ascertained that these remains are those of the ancient Hindu city of Mahasu, whence the Pergunnah takes its name. There is a mound near, called Takht-i-Husain Shah, which appears to be the remains of a Buddhist stupa. There are several other mounds which have not yet been explored. The Muhammadans certainly used portions of Hindu buildings to build their own mosques, and excavation might throw light on the legends of Mahes Rajah, preserved by Dr. Buchanan.	The tomb of the Pir is very much neglected. The mosque is in a state of very good preservation.	ii b.	Yes	Rough drawings exist.	Exploration needed.	
14	Ditto	Goraghat	Remains of a post and tomb.	The remains of a very large frontier post and the tomb of Ismail Ghazi, a leader of the time of Barbak Shah.	iii.	No	No	Ditto.
15	Ditto	Atrai	Shrines	There are several tombs and shrines on the Atrai. The most noteworthy is that called Mahi Santosh, with two inscriptions of Barbak Shah.	iii.	No	No	Ditto, and inscriptions should be sent to the Government Epigraphist.
16	Ditto	Gopalganj	A mosque	This is very ancient, and has on it an inscription of Barbak Shah, A.D. 1365. It is well worthy of preservation.	ii a.	Yes	No	Ditto.
17	Ditto	Ditto	Temple of Gopal.	The brickwork is curious, each brick being moulded or ornamented with some device. This fact has induced visitors to loosen and remove such part of the brickwork as they found to be accessible, and the decay of the building has thus been considerably hastened. It was built by Raja Ramnath, of Dinajpur, about the year 1742 A.D.	This temple is now surrounded by jungle, and is fast falling into decay. The earthquakes of 1885 have nearly destroyed the upper portion.	iii.	No	Rough drawings exist.	Some of the bricks might be removed to the museum to save them from destruction, and patterns of the more important ones ought to be secured.
18	Ditto	Hindu temple of Kantana-gar.	This temple is situated among the ruins of a fort. It was built about the year 1710 A.D., and contains an image of Kanta or Vishnu, a Hindu deity, brought, it is said, from Delhi.	It is said that the temple was last put into thorough repair between the	ii b.	No	Yes, in Ferguson's work, vol. III.

RAJSHAHYE DIVISION—continued.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
19	Dinajpur ...	Govindanagar or Thakurgrama.	Temple of Govind (Vishnu).	years 1830 and 1835 A.D., and it is still kept in repair by the family of the Maharaja of Dinajpur. This building is almost a ruin. It is now surrounded by dense jungle, but is kept in repair by the family of the Maharaja of Dinajpur.	ii/b.	No	... No	and elsewhere.
20	Ditto ...	Tajpur ...	Fort ..	No inscriptions have been discovered at this place, though there are brick and stone remains.	Three-fourths of the old fort, which was standing in Akbar's time, have been cut away by the river Nagar.	iii.	No	... No
21	Ditto ...	Near Birampur...	The remains of an old town.	These remains were excavated to get bricks for the Northern Bengal State Railway. A fort, with a brick rampart, called Garh Pigulai, must have been a place of some strength. Perhaps this, and the earthen forts near the Jamuna, may have had something to do with the Kakshai revolt in Akbar's time.	iii.	No	.. No
22	Ditto	Virat Pat and Kichak Garh.	Bricks have been excavated for the railway at these places on the Karatoya. Both were evidently extensive towns.	iii.	No	... No	Exploration needed
23	Jalpaiguri...	Jalpesh in Maynagari, Western Duars.	The temple of Siva.	This is the most conspicuous ruin in the district. It is a remarkably large building constructed of very durable bricks. The temple is on a mound surrounded by a moat, and is near the bank of the river Jhardan. The floor of the basement is sunk some depth in the mound, and a flight of steps leads down to it, while above rises a large square building surmounted by a dome, round the base and top of which	The red brick apparently was covered over with cement lightly, and well decorated. This has almost entirely worn off, leaving the building a mas-	ii/b.	Yes	... Rough drawings exist.	Drawings very desirable.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	Remarks.
							Class.	Remarks.		
				<p>run galleries. The height from basement floor to top of dome is about 92 feet; the lower story is 78 feet square, and the upper stories are 38 and 36 feet square respectively. The dome is 34 feet outer and 26 feet inner diameter, and 17 feet in height.</p> <p>The object of worship in this temple is a "Siva Linga," which is fixed in a hole in the floor of the underground basement, and has no "Gauripat." The depth of the floor below the surface causes it to be at all times more or less covered with water, and it is customary to bale this out before the idol is worshipped.</p> <p>The earliest tradition of this Siva is that it was placed where it now stands, or somewhere in the vicinity by a King of Assam, named Jalpeswar. After a lapse of time it appears to have been overlooked, or its existence forgotten, and the following is the legend connected with its re-discovery and the erection of the Jalpesh temple.</p> <p>Some 280 years ago, Pran Narayan, Raja of Kuch Bihar, dreamt that Siva appeared to him and said that he was at Gortali, and would be found if effective search were made. Inspired by this dream, Pran Narayan left his usual place of residence and, accompanied by an army and many attendants, went and commenced the search, starting at Gortali. After a long search, and with the aid of a cow which, it was found, used every day to go to the neighbouring jungle and drop its milk, the Raja succeeded in tracing the Siva Linga, on which he ordered the erection of a temple over the spot. The present temple was then commenced. The Raja and his son having died, the temple was finally completed by his grandson, Mohendra Narayan.</p>		sive, plain-looking, red brick temple. Large stones have been used for door copings, &c.				
24	Jalpaiguri...	Purbadeber, about one and a half miles east of Jalpesh.	Temple of Siva	This is a smaller red brick temple about a mile and a half east of Jalpesh, and ascribed to the Raja who built Jalpesh. The main entrance to this building is of massive stone	iii.	No	... R o a g h drawing exist.	Full details desirable.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	Whether restoration is desirable and possible.		Whether photographs, plans, or drawings of the building exist.	REMARKS.				
							Class.	Remarks.						
25	Jalpaiguri...	Mynagari	...	The ruins of an old stone temple of Siva.	These are situated about a mile south of Mynagari, and about two miles from Jalpesh, but nothing further is known about them.	iii.	No	..	No	...	Details desirable	
26	Ditto	...	Ditto	..	The ruins of a stone temple said to be of Sadockhoy Siva.	These are to the north of Mynagari. To the west of the river is a large stone water-vessel, also a large bathing stone, and the traces of a number of dry tanks, said to be 18 in number. There is no known tradition as to when or by whom the temple was built.	iii.	No	..	No	...	Ditto.
27	Ditto	...	Ditto	...	The ruins of a stone and brick temple of Petkati Devi.	This is situated a little north of Mynagari. The idol, which stands there still, had ten hands; of these, three hands, also the stomach and nose, have been cut off, hence the idol is known as the Petkati Thakurani. Tradition says that this idol was originally called Bhadreswari, but that, being mutilated by Kalapahar, it got the name of Petkati Devi. It is not known who erected the temple.	iii.	No	...	Ditto.	
28	Ditto	...	Bhitargarh, pergunnah Baikantapur.	The remains of three Old Garhs. Garh No. 1.	The largest one is that of Bhitargarh in the Baikantapur pergunnah. This must have been a very large and strong fortification in old days, being no less than $4\frac{1}{2}$ miles in length by 2 or $2\frac{1}{4}$ in breadth. The fort is surrounded by several moats, there being on one side no less than six, and there is in it a large tank with the remains of ten ghâts, at each of which traces of red bricks are seen. Little is known of the origin of this garh, but it is generally believed to have been built by one Prithi Raja, of a dynasty long prior to the Kuch Bihar one. The tank is called 'Prithi-sul Dighi,' and it is said that the Raja of that name jumped into it and was drowned to avoid being touched by the Kichaks, who had then invaded his country. The water of this tank is wonderfully pure and clear, and free from weeds; it is but little used, in consequence of a local superstition against drinking it. The city is supposed to have consisted of four separate enclosures, the innermost being the Raja's palace. It must have been a place of	There are no visible ruins, but the mounds near which old bricks are to be found are probably the remains of the old buildings.	iii.	No	...	No	...	Exploration necessary.	

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
							Class.	Remarks.		
29	Jalpaiguri...	Boda	Garh No. 2	great strength, in spite of its large size. The Talma Nadi, on the west, was utilised to fill one of the moats. The next garh in size is that in Boda, called the Thakurani Bhitargarh. This is an enclosure about a mile square, surrounded by very wide triple moats. It is supposed to be co-eval with the larger Bhitargarh.	iii.	No	No	Exploration necessary.
30	Ditto ..	Jalpaiguri	Garh No. 3	The smallest garh is that of Baikanthapur, at Jalpaiguri, on the river Kalla known as the Rajbari. This has for some time been the residence of the Raikuts of Baikanthapur. It is surrounded on three sides by double moats, and on the fourth the Kalla river flows by. It is not supposed to date much further back than 170 years. There are the ruins of a fine brick building here, but as it is said to have been built by the grandfather of the present Raikut, it can be of no great age.	iii.	No	No	Ditto.
31	Rajshahiye ..	Baga	Mosque	Built about the year 1583 A.D., but by whom is doubtful.	The mosque is kept in repair by the Khondkars of the mosque, from the proceeds of lands given by the King of Delhi.	iii.	Yes, from its funds.	No	Exploration and drawings desirable.
32	Ditto ...	Kusumla, near Nuralabad.	An old masjid	It is said to be 300 years old, built by Sabar Khan, by birth a Brahmin, who became a Muhammadan. The tradition is that he was a zemindar, and when kept a prisoner at Murshidabad for some reason, he attracted the notice of the Begam by his singing. She interceded for him with the Nawab, who released the man and sent the Begam away with him, first allowing them to take away as much as they could help themselves to, from the Toshakhana in the space of one <i>prahar</i> , and with this the masjid was built.	The place is in a very ruinous state.	iii.	No	No	Ditto.

Number.	District.	Locality.	Name of object.	Any local history or tradition regarding it.	Custody or present use.	Present state of preservation.	WHETHER RESTORATION IS DESIRABLE AND POSSIBLE.		Whether photographs, plans, or drawings of the building exist.	REMARKS.
