INTRODUCTION.

In offering these Exchange Tables at rates progressing by $\frac{1}{16}$ of a penny from 1*s.* 6*d.* to 2*s.* 1*d.* per Rupee, with an Appendix from 1*s.* 5*d.* to 1*s.* $5\frac{31}{32}$*d.* per Rupee, to the Commercial Community and the public in general, the Compiler takes this opportunity to mention that the prompt sale of his "New Exchange Calculator" and the "Companion," recently issued, and the pressing demand for the third edition of his Exchange Tables at lower rates, are in themselves sufficient proofs of the utility and correctness of the work.

The Compiler purposed at first to begin these Tables at 1*s.* 6*d.*, but while the work was in the press the Comptroller General, Calcutta, and others interested, were kind enough to suggest the advisability of beginning still lower. In compliance with this suggestion the Compiler has spared neither time nor labour in preparing and appending hereto a separate Table at a penny lower, and trusts the addition will be appreciated by the public.

The frequent changes in exchange transactions will not, it is hoped, interfere with the aid this book is calculated to render, as the rates of exchange reckoned will be found to extend over a range, that will answer any change that can possibly occur in the money market.

In conclusion, the Compiler begs to express his deep obligations to the *Government of India, H. E. the Right Hon'ble Sir Philip Wodehouse, G. C. S. I.*, and to the several Mercantile and Banking Establishments of Bombay and the Mofussil, for the kind support and encouragement so generously accorded to him.
