West Bangal **Summary of Government** desion on the Recommendation of the Pay Committee

Summary of Government decisions on the recommendations of the Pay Committee

The Pay Committee in making their recommendations regarding the pay scales of the various services and posts under the Covernment followed certain basic principles. These principles were considered by the Government and their findings were as follows :---

(a) The general principle recommended by the Pay Committee, viz., integration of the Dearness Allowance with the basic pay for all appointments be accepted.

It was noted, however, that if in future the cost of living went up substantially over the existing level and continued at that high level for an appreciable period without any indication of falling, the question of granting an additional Dearness Allowance over and above the pay scales now adopted would be considered at the appropriate time.

(b) The present incumbents of posts who were drawing pay plus Dearness Allowance in excess of Rs.1,100 per month may, if they so desire, continue in the same arrangement, the Dearness Allowance being treated as personal allowance. Where their pay fixed in the new scales was lower than the aggregate of the pay and the Dearness Allowance they were drawing in the old scales, they would be entitled to a personal allowance to cover the difference in the total emoluments. This personal allowance would in both cases be absorbed in future increments.

(c) The scales of pay for posts which now carry total emoluments (basic salary and Dearness Allowance) above Rs.1,100 per month be so revised that the new scales of pay would be broadly comparable to the existing scales *plus* Dearness Allowance. This is indicated in the last column of the statement.

It was felt that any appreciable diminution in the total emoluments now admissible to the officers would not be desirable, if suitable persons were in future to be attracted and retained in Government Service.

(d) With regard to special pays now being given to certain officers, the recommendations of the Pay Committee be reviewed by appropriate authorities unless in any group of cases such special pays have been incorporated in providing for the new scales of pay for these officers.

(e) The recommendations of the Pay Committee regarding the ad hoc compensatory allowances such as House Rent Allowance in lieu of free quarters, etc., be reviewed by the appropriate authorities later on.

(f) The recommendations of the Pay Committee that "the allowances for expensiveness of living in an area should be discontinued" be accepted, but the existing recipients be protected by being allowed to draw the existing allowances until they are transferred to other localities or vacate the posts.

The recommendations of the Pay Committee that "the allowance for unhealthiness of locality should be discontinued in the Duars and Terai areas" be accepted, though the existing recipients in those areas may continue to draw the existing allowance.

(g) Where special qualifications were required for certain posts and there was difficulty in securing suitable recruits on the scales of pay recommended by the Pay Committee for such posts, higher initial pay be granted on the revised scales or higher scales of pay altogether be devised for such posts. Such cases would, however, require Cabinet approval and would be decided in the light of circumstances then prevailing.

(h) The recommendations of the Pay Committee for fixing initial pays in the new time-scales be accepted subject to the modifications that in the case of all Government servants whose present, emoluments do not exceed Rs.400-

- (i) the sum of Rs.5 should in all cases be added to their present emoluments;
- (i) where the aggregate of the present emoluments and the sum of Rs.5 was equal to or higher than the maximum of the proposed scale, the pay in the new scale should be fixed at the maximum and in the latter case, the difference should be treated as personal pay; and
- (iii) in fixing the pay of unmarried officers in the new scales, Dearness Allowance should be calculated at the same rate as for married officers.

2. It would thus be seen that in examining the pay scales suggested by the Pay Committee the Government were guided by the following considerations :--

(a) In the past the Dearness Allowance was allowed as a separate component of remuneration to meet the increased cost of living with the idea that if the cost of living went down the Dearness Allowance would also be correspondingly reduced. On present indications the prices are not likely to fall and a return to a previous norm is not now considered possible. The Pay Committee, therefore, thought that it was not necessary to retain the Dearness Allowance as a separate component of remuneration and the Government accepted the recommendation of merging the Dearness Allowance with the basic pay. This measure would allow the benefit of a higher rate of pension to the Government servants when they retire.

(b) Any member of the staff who was getting his emoluments at a certain level may, if he so preferred, continue to enjoy the same without going into the new scales. This finding was due to the fact that in considering the pay scales of the various classes of officers in Government employ, the Committee were anxious to reduce the different varieties of scales under the Government and as far as possible, to rationalise them. When the Committee first took up its work, they found that there were about 143. different types of scales prescribed for persons serving under the Government and in some cases there were notable discrepancies in the wage rates of persons doing almost the same type of work but getting different rates of salaries. Therefore, the Pay Committee decided to reduce the variety of scales that came into being because of various circumstances involved in the case of appointments made from time to time and as far as possible to rationalise them. It is possible that in some cases in the process of rationalisation, individuals or groups of individuals may have been adversely affected so far as their pay and prospects are concerned. While the Pay Committee and the Government have prescribed salaries for different levels of workers according to the qualifications required for these posts and the initial pays required to be given to these individual holders of posts, it is possible that in some such cases the officers concerned may have been enjoying higher salaries than what are prescribed in the new rationalised scales. For such persons choice is given to remain in the old scale, if they so desire.

(c) In the case of persons who have now been drawing salary between Rs.1,100 and Rs.2,000 and who, unlike other States or the Centre, have been enjoying Dearness Allowance, it has been found that the scale suggested by the Pay Committee may fall much below the total emoluments which these officers were getting before. In order to make recruitment to these posts satisfactory, it has been decided to increase in some cases the scales that were prescribed by the Pay Committee.

(d) Every person whose present salary does not exceed Rs.400 will have the advantage of adding to his present salary a sum of Rs.5 before he is placed in the new scale. This would be in addition to whatever increment he is entitled to under the rules of "initial pay" fixation in the new scales.

(e) It has also been decided that in fixing initial pay in the new scales, the existing rule of giving less Dearness Allowance to an unmarried person compared to what is allowed to a married person should be done away with; consequently, the Dearness Allowance of unmarried officers should, for the purpose, be calculated at the rate as for "married officers."

3. The Government have also authorised the Finance Department to frame rules within the frame-work of the recommendations of the Pay Committee as accepted by them and to take all steps for effective implementation. The various departments will then have the opportunity of pointing out:

- (i) Omission of any posts or services from the Report of the Pay Committee;
- (*ii*) Any patent anomalies;
- (iii) Cases of individual hardship.

Necessary remedial action should be taken by the Finance Department in due course.

4. As a result of the above decisions, the pay scales suggested by the Pay Committee, have, in some cases, been slightly modified. The annexed statement shows, in brief, the existing emoluments of some of the services and posts under the Government, the pay scales suggested for them by the Pay Committee and the pay scales accepted by the Government.

5. Moreover, the Pay Committee recommended and the Government have decided that the following amenities and facilities be given to the Government servants, viz.,--

(a) House Rent Allowance.—At present House Rent Allowance is paid to Government servants stationed in—

- (i) Calcutta (i.e., the areas within the limits of the jurisdiction of the Calcutta Corporation including the areas which were previously under the now-defunct Tollygunge Municipality);
- (ii) South Suburban Municipal areas;
- (iii) Garden Reach Municipal areas.

The Government have accepted the recommendation that the present House Allowance Rules be extended to the areas within the limits of the jurisdiction of Howrah Municipality and that the House Rent Allowance of Government servants in inferior service be raised from Rs.4 to Rs.5 per mensem

(b) Winter Allowances.—Government servants on pay up to Rs.400 per mensem (with marginal adjustments up to Rs.500 per mensem) employed in the hill sections of the Darjeeling district should be paid a winter allowance on the scales as indicated below:

Pay range.Amount of allowance
per month.Rs.Rs.Up to 10050

Above 400 but below 500	Marginal only
101200 201400	75
Up to 100	50

The allowance should be paid on the 1st October each year to Government servants of the above classes posted in the hill areas of the Darjeeling district and expected to remain posted there during the ensuing winter.

(c) Travel Concessions.—Calcutta is now the dominant centre in the social and economic life of the State. The geographical features of the State are also such that some districts are now difficult of access, with the result that transfer to such districts has become unpopular. In order to allow relief in such cases, the Government have decided that Government servants who are liable to transfer in the normal course of their service and whose places of work are at a distance of 250 miles and above from Calcutta, should, while enjoying leave on average pay at places outside the headquarters, be allowed for journeys out and back from the places of their work, actual railway fare of the class to which they are entitled for self and the family subject to certain specified conditions.

(d) Medical Facilities.—Provision should be made for—

- (i) domiciliary and out-patient treatment of Government servants and their families; and
- (ii) also for hospitalisation, whenever necessary, including maternity cases.

For effective implementation of the scheme in Calcutta, it is proposed that—

- (a) requisite number of clinics with adequate number of medical officers should be set up in the different parts of Calcutta; and
- (b) 500 beds for Government servants and their families in Calcutta (with about 200 extra beds for patients sent from outlying areas for specialist treatment) should be set up in or around Calcutta in one separate hospital or more.

Government servants in other areas should have the same facilities through the existing Government hospitals, health centres or clinics.

(e) Canteen Facilities.—Free accommodation should be provided, where possible, for canteens to be run on co-operative basis by the staff themselves.

(f) Miscellaneous Amenities.---The following welfare measures should be adopted, viz. :--

- (i) Promotion of Co-operative Societies (both credit and consumers), the administration helping the Societies by giving them accommodation, where available, appendix nominal rent.
- (ii) Promotion of cultural and recreational activities such as sports, games, dramatic performances, etc.

6. Only in the Victoria Boys' and the Dow Hill Girls' Schools, men and women teachers are being paid at different rates. This inequality in the pay scales has been removed.

7. The revised pay scales should have effect from 1st April 1961. The extra cost involved is roughly as follows :--

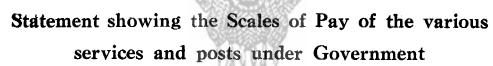

सत्यमंब जयत

Ultimate For the first year only 6 crores.

Rs.

... 3 crores.
