P R E F A C E.

IN presenting this Catalogue to the Public, it has been deemed necessary to explain briefly the circumstances connected with its publication, and the causes of the delay that has occurred in its appearance, as well as to furnish a short sketch of the Life of the Compiler.

Mr. J. O. Voigt, the son of Dr. John Henry Voigt, was born March 22nd 1798, at Nordborg in Sleswick, a few miles distant from that portion of Jutland in Denmark, whence the Angles of ancient days passed over to England—still known as the province of Angeln. He received his early education in one of the Royal public schools, where he was as much distinguished for the bold and enterprising spirit with which he entered into every scheme of fun and frolic, as for the energy and perseverance with which he applied to the more sober pursuits of his class.

At the age of sixteen, he passed with much credit from the school to the Royal University of Copenhagen, where he became an inmate in the family of his uncle, Dr. Giesseman, Professor of Anatomy there, and Physician to the Queen; and although he had been educated with a view to his entering the Church, circumstances soon determined him to make Physic his study. Towards the close of his collegiate course, whilst steadily pursuing his studies, and surrounded by every comfort that affluence could secure, he was suddenly reduced to considerable straits by the death of his uncle and his father, within a very short period of each other. His mother and an only sister were left in circumstances, not indeed of affluence, but of perfect comfort—yet such was his sense of honor, that he determined at once to withdraw *his* claim on their resources, and to create at all risks the means of his own support; at the same time he carefully concealed from his bereaved

parent the hardships his resolution entailed upon him. He now had recourse therefore to the only means open to a student, and devoted several hours of each day to imparting to others the knowledge he had himself attained in various branches of study, particularly in medicine; and it may here be mentioned that he so won the hearts of those who at this time enjoyed the benefit of his instructions by the peculiar openness and urbanity of his disposition, apart from the respect which the propriety of his conduct, and the high order of his attainments always commanded from them though scarcely his inferiors in age, that, when brighter days came, they could not allow their connection to close, without presenting him with a most handsome and flattering testimonial of their regard, accompanied by a little ode of no small merit, expressive of their deep respect and gratitude. During the first six weeks of his new occupation the ordeal was such as he found it difficult to stand; for to make both ends meet, to keep up the appearance of a gentleman, and yet to pursue his own course of study with unbroken zeal, he was often constrained to content himself with a hasty meal by the fireside of his own little study at the close of the day, preparatory to kindling the nightly lamp over which he pored to an early hour of each succeeding morning. In after-life he was accustomed facetiously to refer to this period of his life with unaffected satisfaction, as having been equally one of high moral benefit, and of genuine enjoyment.

At the age of twenty-one he quitted the University with high honors,—according to continental phraseology, with “the best character”—and, soon after, obtaining a commission in the King’s service, he was appointed to a post immediately under Professor Withusen, successor to his uncle in Frederick’s Hospital, where his own medical studies had been previously pursued. This he held for some years, but becoming at length weary of the incessant toil, and entire want of leisure, which the heavy duties of his situation entailed upon him, and having from early youth had a great desire to go abroad, he determined on accepting the post of Surgeon to *this* colony of Denmark, which had just become vacant, and arrived in Serampore early in 1827, having left his native land in the previous autumn with the intention of being absent for the term of only *five* years. Before the expiration of this period, however, he had formed connections in India which considerably changed his views. He so

PREFACE.

SL

highly estimated the delights of the domestic circle in which he now found himself, and which his warm and generous heart was formed so fully to appreciate, that he at once relinquished the idea of an early return to his native land. At the same time he so much valued the opportunities and advantages for intellectual and scientific pursuits, which the leisure of his situation afforded him, that although the emoluments it presented fell far below those his talents and skill might have commanded in a larger sphere, he refused to exchange it for the more lucrative prospects that were repeatedly offered him through the medium of the Honorable Company's Service.

Mr. Voigt had made Botany a study before he left Denmark, but was not induced to devote much time to it, until the society and Botanic Garden of the late eminent Dr. Carey, by presenting him with peculiar advantages, led him to turn his thoughts more particularly to that science; and the intercourse with this great man, to which his determination naturally led, became to him a source of abundant delight.

On Dr. Carey's death in 1834, his garden came immediately under Mr. Voigt's superintendence, and he entered on the duties and enjoyments with which it furnished him with energy and spirit peculiarly his own. Whatever his hand found to do, he may truly be said to have done with all his might. His day was portioned out with so much method that every hour had its allotted occupation, and yet time was found for every thing. That which was not employed in the ordinary duties and cares that usually devolve on the medical practitioner in India, was devoted to study, particularly to Botany; or to a renewal of acquaintance with his favourite authors among the classics, with all of whom he was particularly at home; or to exploring the rich field of English literature, which, having to his twenty-eighth year been to him as a sealed book, united to its other charms that of novelty. Yet the claims of the garden were never forgotten. Mr. Voigt was a very early riser, and a great advocate for air and exercise. His father had from his earliest childhood inured him to the most hardy and almost violent use of the latter, and so far agreed with Locke in the rules he lays down for the treatment of children, as to carry them out in the training of his son to the fullest extent—or, as Mr. Voigt used to remark, "to perfect his medical skill, by experiments at home."

PREFACE.

CSL

After a ride of several miles on horseback, the exercise to which he was most partial, and which from his uncommon strength of body, and buoyancy of spirit, he was well fitted to enjoy, *two* and sometimes *three* hours were devoted to the garden, preparatory to entering on the duties of the day.

Early in 1836, an Hospital was founded in Serampore at the suggestion of the late Dr. Marshman, for the relief of the Native poor, under the auspices of the Queen of Denmark. To this Mr. Voigt immediately offered his gratuitous services, and thus enlarged in no small degree the sphere of his labors ; but the energy of his mind was equal to every emergency, and rendered all things light that came within the sphere of duty ; and in the discharge of *gratuitous* service, he was always peculiarly in his element. To be needy and friendless, was to possess a claim on his attention, and the opportunities his professional skill afforded him of being serviceable to others, and particularly to the widow and the orphan, were regarded as the chief redeeming qualities of a profession to which he was never particularly partial. With a mind of great strength and firmness, united in the discharge of professional duty, with uncommon calmness and self-possession, he combined such genuine kindness and generosity of feeling, and so humble an estimate of his own worth, that in these instances, he always felt *himself* the person obliged. Numerous instances might here be adduced to shew his ready attention to the calls of humanity, his firm integrity of purpose, his unbending independence of mind, the simplicity and sincerity of his character, his disinterested and faithful discharge of duty, his sterling worth as a man and a friend, and the ardour of his affection in the more tender relations of life—but the brief nature of this sketch forbids it.

Dr. Carey's garden had furnished Mr. Voigt with so rich and varied a field of information and delight, that a sense of gratitude united with the deep veneration with which he cherished the memory of its philanthropic founder, led him to feel it his duty to place on record the results of the Botanical labors of this eminent man, embracing as they did, a period of upwards of *thirty* years ; and he was subsequently induced by the advice of friends, to add to this, a sketch of the successful operations of the H. C. Botanic Garden, and to determine on publishing the *whole* Catalogue.

vii

PREFACE.

This was accomplished by the end of 1841, and placed by Mr. Voigt at the disposal of the Agricultural and Horticultural Society, who generously engaged to defray the expenses of the publication. After the first *sixteen* pages had passed through the Press however, obstacles arose to the acceptance of the Society's offer, and the printing of the work was suspended; so that when in 1842 the temporary charge of the H. C. Botanic Garden furnished him with opportunities for making additions to the work, he eagerly improved them to the utmost of his power. These were completed only the week before he was attacked with the distressing and severe illness which rendered recourse to a more salubrious climate immediately necessary.

He accordingly left India early in 1843, in the hope that restored health would enable him to carry the Catalogue through the Press either in England or in Denmark—but his lamented death in London on the 22nd June 1843, only a few weeks after his arrival in England, and when just on the eve of departure for his native land, at once frustrated every plan.

The manuscripts were after this detained by mistake in London, instead of being forwarded to Copenhagen. From thence they were brought back to India, and by the advice of the late Mr. Wm. Griffith, once more put to Press at the commencement of 1844, and it is solely to the kindness of this valued friend, that they owe their appearance, he having generously offered his invaluable services in superintending their progress through the Press.

The printing of the Catalogue was completed a few days before Mr. Griffith's removal to Malacca, but his departure prevented his preparing a Review of the work, which, with the Indexes and other parts necessary to its publication, he had kindly promised to furnish. These he proposed to forward from the Straits, but his melancholy and premature death soon deprived his friends and the interests of science of the invaluable services of this eminent Botanist. A few remarks which he made therefore in writing to a friend on receiving the manuscripts whilst at the H. C. Botanic Garden, are all that can now be given to shew his opinion of their merits.

"The MSS." he says "are very valuable indeed, and the arrangements so clear, the writing so lucid, the whole tendency

so practical, the mass of information so great, that it would be a "mortal sin not to publish them. The work will do Voigt very great credit—it must have cost him great labour, and I can answer for it, that it will perpetuate his name as an Indian Botanist. You know such works are the statistics of Botanical Systematic Science.

"The Catalogue would certainly command an European sale, as it would be essential to all real Botanists. Indeed I know of none, which would contain so much interesting information. The present size perhaps had better be adopted; it is a common one on the Continent, and is not altogether unwieldy. To complete it, you must give a short outline of Voigt's life. * * * * *

"I hope the work will be profitable pecuniarily, for I should like to see a handsome monument erected to Voigt, if possible, in these gardens, where, as his memory would then be associated with that of Roxburgh, Jack, and I hope Buchanan, it would be in good company.*

"The MSS. when printed will be a mass of information available to the Public. They give exact references to the native country, the Bengalee name, the medical or economical properties, date of introduction and flowering season, and whether or no the fruits are ripened, also the description of plant, whether shrub, tree, etc. etc.

"It will be on the ground of its being a Genera of Plants of Lower Bengal, and its great practical utility, that I shall be delighted to recommend it as the systematic hand-book of the Botanical class, as such it will constitute era the second in Bengal Botany."†

The Indexes and other parts necessary to the publication of the Catalogue were still untouched when Mr. Griffith's death frustrated

* Dr. Griffith was so bent on seeing the wish here mentioned accomplished, that he selected a monument himself some time before his departure for Malacca, and on the day of his embarkation desired that "it might still be reserved as he had originally directed for erection in the Garden on some future day in memory of Dr. Voigt." It is a melancholy fact, that the same monument has since been purchased by his friends for erection on his own remains at Malacca.

† The number of Genera described is 1737, distributed under 278 orders, which with the number of species is enumerated in a subsequent page, as showing at a glance the contents of the work.

the hopes of any further help from his valuable pen. In these circumstances, the late Rev. Mr. Mack, with his accustomed generosity, kindly offered to aid in their preparation, but he had not proceeded far, when his sudden death deprived society in India of one of its brightest ornaments.

These circumstances will, it is hoped, in some measure, excuse the delay that has occurred in the appearance of the Catalogue. It is now presented to the public under all these disadvantages, with the hope that some apology for the defects that may be apparent in its *final* completion, will be admitted from the consideration that this task has devolved on one who feels herself wholly unequal to the performance, and has yet been impelled by the strongest feelings of conjugal affection to undertake it.*

RACHEL S. VOIGT.

Serampore, 30th July, 1845.

* Since the above was written, an unfinished letter has been found among Mr. Griffith's papers addressed to Mr. Marshman, containing some directions regarding the completion of this Volume, and expressing his opinion of the merits of the work, of which the following is an extract. "As regards the merits of the work," he says :

"It is the most comprehensive and scientific Catalogue of the kind that has appeared, 'Roxburgh's Hortus Bengalensis' the only other one being, at this advanced period of Botany, incomplete, and arranged according to an Artificial not a Natural System. In this Catalogue, with the name of the plant you have access to all known information regarding it, either directly in the book itself, at least as regards valuable properties, or indirectly, through the copious list of Synonyms. Therefore characters only require to be supplied to make this a complete Flora of Calcutta.

"It gives the general Geographical distribution of each of the Families, two hundred and seventy-eight in number, and a good deal of information regarding the specific distribution of the Indian species. And as each habitat is given to each species,—not a vague one of India Orientalis, but very generally specific ones,—from it a complete Catalogue, as far as yet known of the distribution of Indian forms, may be compiled.

"It gives a sufficiently copious and select Synonymy and reference to plates, so that as I have said, the possession of the name of the plant puts you in the way of possessing all known information regarding it, by merely turning to the books which are quoted.

"It gives, wherever the properties are tolerably uniform, the characteristic ones under each family, and in all cases the properties (the knowledge of which constitutes that very economic branch of Botany, Economic Botany,

CSL

PREFACE.

well worthy the attention of Government) under each plant, with the authorities for the same.

"It gives the habit of the Plant, with some information regarding the flower, the native country, and time of flowering and seeding, from consultation of the last parts of which much instruction may be derived as to the selection of species for introduction, the necessity of changing the mode of cultivation, etc.

"It gives in all definable cases the vernacular names, and these appear to have been obtained by no common care, and consequently to lose in a great measure the usual inapplicability.

"Lastly. It gives a list of desiderata for introduction, generally founded on those principles without which introductions of plants become of no avail. To this the attention of all Indian Horticulturalists should be chiefly guided."

Ach.—Acharius. A Swedish professor and writer on Lichens.

Adans.—Adanson. A French systematic botanist.

Afzel.—Afzelius. A Swedish professor.

Ait.—Aiton. Superintendent of the King's Garden at Kew.

Ait. Hort. Kew.—Aiton, Hortus Kewensis.

All. (pedem.)—Allioni, (Carolus) Flora Pedemontana, 3 vols. 1785.

Amm. ruth.—Amman, (Johan.) Stirpium rariorum in Imperio Rutheno sponte provenientium Icones et Descriptiones, 1739.

~~+~~ *Andr. B. Repos.*—The Botanist's Repository, by Henry Andrews, 10 vols. 4to. London, 1797, et seq.

~~+~~ *Ann. mus.*—Annales du Museum d'Histoire Naturelle, 24 vols. 4to. Paris, 1802, et seq.

Arn.—Arnott, (G. A. Walker.)

Arth. Hamilt. Mon.—A Monograph by Arth. Hamilton.

~~+~~ *Asiat. Reser.*—Asiatic Researches.

Aubl.—Aublet. A French traveller in Guiana.

~~+~~ *B. Cab.*—Botanical Cabinet, by Conrad Loddiges and Sons, 14 vols.

~~+~~ *B. Mag.*—Botanical Magazine, (Curtis's) formerly conducted by Sims, now by Sir William Hooker.

~~+~~ *B. Misc.*—Botanical Miscellany, (by W. J. Hooker.)

~~+~~ *B. Reg.*—Botanical Register, (Ker's) now conducted by Professor Lindley.

~~+~~ *Balbis.*—Balbis, (Joh. Baptist.) A French Professor of Botany.

Balb.-diss.—Balbis. Miscellanea Botanica, 4to. 1804.

~~+~~ *Banks. Herb.*—Banksian Herbarium.

~~+~~ *Bartl.*—Bartling, (Th. Fr.); Ord. Nat. Plantarum.

Barton's Coll. mat. med.—Barton's Collection, Materia Medica.

Bauer Ill. fl. norf.—Bauer, (Ferdin.) Illustrationes Floræ Novæ Hollandiae, fol. 1813.

Bauh.—Bauhin brothers, (Johannes and Caspar.) Professors of medicine—published 1620-1650.

~~+~~ *J. Bauh.*—Bauhin, (Johannes.)

Baum.—Baumgarten, (J. C.) M.D. of Schasburgh in Transylvania. A botanist.

Beauv.-agrost.—Beauvois, (Palisot de) Essai d'une nouvelle Agrostographie. 1 vol. Paris, 1812.

Beech. voy. pt. pl.—Beechey. A well known English navigator. Plants described in the account of his voyage, &c.

Bennet.—Bennet. Aset. Conservator of the Banksian Herbarium.

Benth.—Bentham, (Geo.) F. L. S.

Benth. Lab. gen. and sp.—Bentham. *Labiatarum Genera et Species.*

Benth. serophul. ind.—Bentham. *Scrophularinæ Indicæ.*

Berg.—Bergius, (P. J.)

Bernh.—Bernhardi. A German botanist.

Bertol.—Bertolini. A writer upon the Flora of Italy.

Bieb.—Bieberstein. A Russian botanist of note.

Bivon.—Bivona. A Sicilian botanist.

Bl. Bijdr.—Blume, (C. L.) *Bijdragen tot de Flora von Nederlandsche Indië.*

Bl. Cat.—Blume's (C. L.) Catalogue.

Bl. in Diar. batav.—Blume, (C. L.) in the Batavian Diary.

Bl. Java.—Blume's (C. L.) Flora of Java.

Bl. Rumph.—Blume, (C. L.) *Rumphia.*

Blackw. herb.—Blackwell, (Eliz.) A curious Herbal, containing 600 cuts of the useful plants, 2 vols. fol. London, 1737.

Blane.—Blane, (Gilbert.)

Bocc.—Boccone, (Paolo) 1697.

Boerh.—Boerhaave, (Hermannus.) A Dutch botanist, 1710.

Booth.—Booth, (Dr.)

Bork.—Borkhausen. A writer on the Flora of Hesse Darmstadt.

Bosc.—Bosc. A French botanist and traveller in N. America.

Bojer. Hort. Maurit.—Bojer's *Hortus of the Mauritius.*

Br. (or R. Br.)—Brown, (Robert.) The first botanist of the age.

Brown pr. fl. norf.—Brown. *Prodromus Flora Novæ Hollandiæ.*

Browne. jam.—Browne's (Patrick) Civil and Natural History of Jamaica.

Brid.—Bridel.

Brongn.—Brongniart, (Adolphe.) A French botanist.

Brot. fl. lusit.—Brotero. *Flora Lusitanica.*

Buch.—Dr. Francis Hamilton, (formerly Buchanan.)

Buch. Herb.—Buchanan's Herbarium.

Buch. MSS.—Buchanan's Manuscripts.

Buch. journ. Mysore.—Buchanan's *Mysore Journal.*

Buchoz.—Buchoz, (Pierre Joseph) *Collection des Fleurs.* Paris.

Bull. champ.—Bulliard. *Histoire des Champignons de la France.* 1798.

Bull. herb.—Bulliard. *Herbier de la France.* 1780.

Bunge. enum. pl. chin.—Bunge's plants of China.

Burch.—Burchell, (Wm.) A South African traveller and botanist.

Principal Abbreviations employed in this Volume.

SL

- + *Burm. afric.*—Burmann's (Johannes) African plants.
+ *Burm. zeyl.*—Thesaurus Zeylanicus, by J. Burmann.
+ *Burm. Ind.*—Flora Indica, by N. L. Burmann.

C. G. H.—Cape of Good Hope.

Cass.—Cassini. A French botanist.

Catal. Ceyl. pl.—Catalogue of Ceylon plants.

Cat. Car.—Catesby, (Marsh) Natural Hist. of Carolina, Florida, &c. 2 vols. London, 1741.

Cavan. ic.—Cavanilles, (Ant. Jos.) Icones et Descriptiones plantarum quae aut sponte in Hispania crescunt aut in Hortis hospitantur, 6 vols. fol. Madrid, 1791-1800.

Cham. and Schlect.—Chamisso and Schlectendal.

Chois.—Choisy. A Swiss botanist.

Clarke and Guss.—Clarke and Gussone of Naples.

+ *Colebr.*—Colebrooke, (H. T.) A well known English writer on Indian plants.

Commel. Hort. Am.—Commelyn, (Caspar) Horti Medici Amstelodamensis rariorum Plantarum Descriptio et Icones, 2 vols. 1703.

Commers. in Poir. Encyl.—Commerson in Poiret's Encyclopedia.

Crantz.—Crantz. An Austrian botanist.

Cunningh.—Cunningham.

Curt. Lond.—Curtis, (William) Flora Londinensis, 1777.

+ *Cyril.*—Cyrilli. An Italian botanist.

DC.—De Candolle, (Prof. Aug. Pyr.)

DC. pr.—De Candolle. Prodromus Systematis Naturalis Regni Vegetabilis.

DC. Cat. Hort. Monspel.—De Candolle, (Prof. Aug. Pyr.) Catalogus Horti Monspeliensis, 1777.

DC. fl. fr.—De Candolle, (Prof. Aug. Pyr.) et Lamark, Flore Françoise.

DC. leg. mem.—De Candolle, (Prof. Aug. Pyr.) Memoirs sur les Legumineuses.

DC. pl. grass.—De Candolle, (Prof. Aug. Pyr.) Plantarum historia succulentarum, 1799.

DC. reg. veg.—De Candolle, (Prof. Aug. Pyr.) Regni Vegetabilis Systema Naturale.

DC. (Alph.)—De Candolle, (Alphonse) son to A. P. De C.

Delarb.—Delarbre, (Antoine.)

Deless. ic. Select.—Delessert, (Benj.) Icones Selectæ plantarum in systema universi descriptarum, 1820.

Desf. fl. atl.—Desfontaine, (Rene Louiche) Flora Atlantica, 2 vols. 4to. Paris, 1798—1799.

Desf. mem. Mus par.—Desfontaine, (Rene Louiche) Memoires de l'Academie Royale des Sciences, 4to. Paris.

Desv.-Journ.—Desvaux. Journal Botanique, 8vo. 1808.

+ *Dicks.*—Dickson. An English Criptogamic botanist.

Dietr.—Dietrich, A German gardener.

Principal Abbreviations employed in this Volume.

SL

THE CATALOGUE IS FOUNDED ON

1. *Dr. Carey's (Roxburgh's) Hortus Bengalensis*, &c: a catalogue of about 3500 plants, which was the amount of species introduced into the Hon'ble Company's Garden, from its commencement to 1814.
2. *Dr. Carey's Garden Receipt-Book*, in which he was accustomed to put down the names of the plants introduced into his garden, and afterwards to affix marks of their success. A present from the late Mrs. Dr. Carey.
3. *Several printed Sheets*, (80 quarto pages,) embracing nearly the whole of the six first Linnæan Classes, limited to those species which had been cultivated in the Hon'ble Company's and the Serampore Gardens. This, Dr. Carey's last botanical work, was discontinued only by his death.
4. *Mr. Masters's Private Catalogue* of the Hon'ble Company's Garden.
5. *Dr. Wallich's Report to Government*, 21st Dec. 1840, enumerating such plants as had been distributed from the Hon'ble Company's Garden, from the beginning of 1836 to the end of November 1840.
6. A number of *Dried Specimens of Plants*, collected, with the Superintendent's permission, in the Hon'ble Company's Garden; and lastly,
7. *Private Papers* on botanical subjects, begun in 1830 and continued both during the life-time of Dr. Carey, and after his death, when the Superintendence of the Serampore Garden, in compliance with his wish, devolved on the Compiler.

THE CATALOGUE WILL CONTAIN

1. Remarks on each order, their general properties, and geographical (especially Indian) distribution.
2. The generic and specific names of the plants enumerated, with reference to the best authors and plates.
3. The Bengalee names of such plants as are indigenous, or commonly cultivated in Lower Bengal. These, though generally considered of little value, have been found very useful, *when shown, in their original dress*, to native gardeners, directed to go in search of particular plants.
4. The habit, flowering, and fruit-time, and the flowers of each individual plant.
5. Their habitats, properties, and use, as far as these are known. And, lastly,
6. An Appendix(*) to each order of such plants, as are thought desirable and likely to thrive in Lower Bengal. This has been added to aid horticulturists otherwise amply occupied in their selections, and if possible, to put an end to those injudicious and disappointing consignments, so frequently arriving from the nurseries in Europe.

HORTUS SUBURBANUS CALCUTTENSIS.

ORDER I.—RANUNCULACEÆ, DC. Lindl. Nat. Syst. p. 5.

THE CROW-FOOT TRIBE.

THIS chiefly herbaceous, rarely shrubby order, abounding in species, is extensively diffused throughout the cold and temperate parts of the globe. Their total amount may, perhaps, be estimated at 700, of which the greater part are found in Europe, Siberia, and the Levant. About 80 species have been discovered in N. America; 32 in S. America; 30 in China; 21 in Australasia; 15 in N. Africa; 20 in S. Africa; 6 in Mexico; 5 in the W. Indies; and a few in Japan, Cochin China, and Sierra Leone. In the tropics, they are found in mountainous regions, from the highest Alpine ranges down to such vallies of hilly tracts as are sufficiently elevated to compensate for low latitude; and though a few species straggle down to the plains, as, in India, *Ranunculus sceleratus* and *aquatalis*, Wight (*Ill. p. 3.*) is, no doubt, right in asserting, that wherever, within the tropics, we meet with herbaceous forms of Ranunculaceæ, we may feel assured of having attained an elevation sufficient to place us beyond the influence of jungle fever. In 1818, according to De Candolle, the Indian forms of this order amounted only to 19. At present their number has risen to 135; viz. 32 species of *Clematis*; 3 of *Naravelia*; 18 of *Thalictrum*; 16 of *Anemone*; 1 of *Adonis*; 32 of *Ranunculus*; 3 of *Caltha*; 1 of *Trollius*; 1 of *Coptis*; 2 of *Isopyrum*; 2 of *Aquilegia*; 14 of *Delphinium*; 7 of *Aconitum*; 1 of *Actaea*; 1 of *Cimicifuga*; and 1 of *Paeonia*. Eight of these also belong to Europe.

"Acridity, causticity, and poison, are the general characters of this suspicious order, which, however, contains species in which these qualities are so little developed as to be innoxious. The caustic principle is, according to Kropfen, as cited by De Candolle, of a very singular nature; it is so volatile that, in most cases, simple drying, infusion in water, or boiling, are sufficient to dissipate it; it is neither acid nor alkaline; it is increased by acids, sugar, honey, wine, spirit, &c. and is only effectually destroyed by water and vegetable acids." (*Lindl.*) Notwithstanding their caustic

and poisonous properties, many species of this tribe have been used in medicine, as well internally as externally ; they are, however, now obsolete. One of the Himalayan species, *Aconitum ferox*, Wall., commonly called बिश Bish, is a most virulent poison, used in the northern part of Hindoo- than for destroying tigers by means of poisoned arrows, shot from bows fixed near the tracks leading to their watering places. (*Colebrooke.*)

CLEMATIS, L. (*DC. prodr.* 1, p. 2;—*W. and A. prodr.* 1, p. 1.) *Virgin's Bower.*

1. *Flammula*, L. (*DC. l. c.*) 5 ↳ S. Europe.—Fl. smallish, white,— May and June ; fr. 0.
2. *Gouriana*, Roxb. (*Fl. Ind.* 2, p. 670;—*DC. pr.* 1, p. 3;—*W. and A. pr.* 1, p. 2;—*J. Grah. Cat. B. pl. p. 1.*) L. 5 ↳ India, from Dindygul and the Neelgherries up to Deyra Dhoon, along the foot of the Himalayas. Fl. smallish, white,—Septbr. ; fr. Jan. and Feb.
3. *Vitalba*, L. (*DC. pr.* 1, p. 3.;—*Jacq. fl. austr.* t. 308;—*E. B.* 9, t. 612.) 5 ↳ Middle and South Europe, Tauria.—Fl. middle-sized, white, fragrant,—R. S., but rare ; fr. 0.
4. *Wightiana*, Wall. (*W. and A. pr.* 1, p. 2;—*J. Grah. Cat. B. pl. p. 1.*) 5 ↳ Neelgherries, Mahableshwur, and the adjoining Ghauts. Has been introduced into H. C. G. Fl. ?
5. *grata*, Wall. (*Pl. as. rar.* 1, t. 98.) 5 ↳ Nepal. Fl. small, yellowish, fragrant. Introduced here in 1840, but has not fl. yet.
6. *cylindrica*, Sims. (*B. M.* 29, t. 1160;—*DC. pr.* 1, p. 7.) 5 ↳ N. America. Fl. large, blue,—June ; fr. 0.
7. *Viorna*, L. (*DC. pr.* 1, p. 7;—*Jacq. eel.* 1, p. 50, t. 32.) 5 ↳ Virginia, Carolina. Fl. large, blue,—June, but rare.
8. *reticulata*, Walt. (*DC. pr.* 1, p. 7.—*C. cordata*, *B. M.* 43, t. 1816.) 5 ↳ S. Carolina, Georgia. Fl. largish, pale purplish,—July ; fr. 0.
9. *integrifolia*, L. (*DC. pr.* 1, p. 8;—*B. M.* 2, t. 65.) 2. Hungary, Carniola, Siberia, Pyrenees. Fl. large, indigo-coloured,—May and June ; fr. August.
10. *ochroleuca*, Ait. (*DC. pr.* 1, p. 8.) 2. Pennsylvania, Carolina. Fl. large, yellowish,—June, but rare : fr. 0.
11. *florida*, Thunb. (*Flor. jap.* p. 240;—*DC. pr.* 1, p. 8;—*B. M.* 22, t. 834.) 5 ↳ Japan. Fl. very large, white,—C. S. Introduced in 1819, but has not fl. during the last twelve years.
12. *Viticella*, L. (*DC. pr.* 1, p. 9;—*B. M.* 16, t. 565.) 5 ↳ Warmer parts of Europe. Fl. very large, beautifully purple, with dark veins. Introduced in 1825. Has not fl.

NARAVELIA, DC. (*pr.* 1, p. 10;—*W. and A. pr.* 1, p. 2.)

1. *Zeylanica*, DC. (*L. c.*,—*W. and A. l. c.*,—*J. Grah. Cat. B. pl. p. 1.*—*Attragene zeylanica*, L.;—*Roxb. Corom.* 2, t. 188; *fl. ind.* 2, p. 670.) छागुल-बत्ती Chagul-batee. 2. ↳ Ceylon. Both Peninsulas of India, Bengal, (Serampore,) &c. Fl. middle-sized, yellowish,—R. S ;—fr. C. S.

THALICTRUM, L. (*DC. pr. 1, p. 11;—W. and A. pr. 1, p. 2.*) *Meadow Rue.*—From 1817, up to the present time, 34 species of this genus—one of the surest indicators of a cold climate—have been introduced into the Serampore Garden, but only the following two have flowered:—

1. *foliolosum*, DC. (*l. c. p. 12.*) ♀. Nepal, Kemaon, Khassya Mountains. Fl. small, yellowish,—August. Herb bitter; used by the Natives in fever.
2. *flexuosum*, Jacq. (*Loud. hort. brit. p. 229, No. 14,529.*) ♀. Native place unknown. Fl. small, yellowish,—May and June; fr. Aug.—Seeds received from the Liverpool Botanic Garden.
3. *bracteatum*, Roxb. (*Fl. ind. 2, p. 671.*) ♀. N. Bengal. Introduced in 1797. Fl. C. S. (*Roxb.*) No doubt a species of Clematis.

RANUNCULUS, L. (*DC. pr. 1, p. 26;—W. and A. pr. 1, p. 3.*) *Crow-foot.*

1. *sceleratus*, L. (*DC. pr. 1, p. 34;—E. B. 10, t. 681.*) R. *indicus*. (*Roxb. fl. ind. 2, p. 671.*) ⊖ Europe, Siberia, Cochin China, India, (Serampore, Calcutta, &c.) Fl. small, yellow, and fr. C. S.—A very acrid plant; when applied fresh, quickly producing a blister.—Besides Ranunculus aquatilis, L., a variety of which has been found about Saharunpore, this is the only species of Crow-foot hitherto discovered in the plains of tropical India. The Natives have no name for it, nor do they use it.
2. *bulbosus*, L. (*DC. pr. 1, p. 41;—E. B. 8, t. 515;—Rorb. H. B. p. 43.*) ♀. Europe, America, Kunawur. Fl. largish, bright yellow,—March and April; fr. May. The whole plant, but especially the unripe fruit, very acrid.
3. *arvensis*, L. (*DC. pr. 1, p. 41;—E. B. 2, t. 135.*) ⊖ Middle and South Europe, Suen mountains, Kemaon. Fl. small, yellow,—Febr. and March; fr. April. Poisonously acrid.
4. *muricatus*, L. (*DC. pr. 1, p. 42;—Sibth. fl. grac. t. 522.*) ⊖ S. Europe, along the Mediterranean. Fl. smallish, yellow,—Febr. and March; fr. April.
5. *nodiflorus*, L. (*DC. pr. 1, p. 43;—Waldst. and Kit. pl. rar. hung. 2, p. 192, t. 176.*) ⊖ France, Hungary. Fl. small, yellow,—Febr. and March; fr. April.

Eight other perennial species of *Ranunculus*, introduced between 1816 and 1828, could scarcely be kept alive during the hot season.

COPTIS, Salisb. (*DC. pr. 1, p. 47.*)

1. *Teeta*, Wall. (*Notes on the Drugs called Mishmee Teeta and Picha Pat. Med. and phys. soc. Calcutta, vol. 8, p. 85.*)—*W. Twining; Notes on the medical properties of the root of the Mishmee Teeta, l. c.*) ♀. Mishmee mountains. Introduced into H. C. G. Fl.?—Root pure bitter, tonic, and as such recommended by Twining.

ISOPYRUM, L. (*DC. 1, pr. 1, p. 48.*)

1. *fumarioides*, L. (*DC. l. c.,—Schkuhr. handb. 2, No. 1531, t. 153.*) ⊖ Siberia. Fl. small, white,—Febr. and March; fr. April.

NIGELLA, L. (*DC. pr. 1, p. 48.*) *Fennel Flower.*

1. *sativa*, L. (*DC. l. c. p. 49.*)

δ *indica*, DC. (*l. c.—N. indica, Roxb. fl. ind. 2, p. 646.*) कालजिरा
Kaljira. ◎ S. Europe, Asia Minor, Syria. Acclimated in the
gardens of India. Domesticated about Serampore. Fl. largish,
white, and fr. C. S.—Seeds formerly used as pepper. The
Natives esteem them as a condiment and stomachic.

2. *hispanica*, L. (*DC. l. c.—B. M. 31, t. 1265.*) ◎ Spain, Barbary.
Fl. large, blue, sometimes white,—Febr. and March; fr. April.

3. *orientalis*, L. (*DC. l. c.—B. M. 31, t. 1264.*) ◎ Aleppo. Fl.
largish, greenish-yellow, dotted with scarlet,—Febr. and March; fr.
April.

4. *damascena*, L. (*DC. l. c.—B. M. 1, t. 22.*) ◎ Countries along the
Mediterranean. Fl. large, pale, blue,—Febr. and March; fr. April.

AQUILEGIA, L. (*DC. pr. 1, p. 50.*) *Columbine.*

1. *vulgaris*, L. (*DC. l. c.;—E. B. 5, t. 297.*) 2. Europe.—Fl. large,
bluish purple, and fr. C. S.—Plant astringent.

DELPHINIUM, L. (*DC. pr. 1, p. 51;—W. and A. pr. 1, p. 4.*) *Larkspur.*

1. *Ajacis*, L. (*DC. l. c.;—W. and A. l. c.;—Roxb. H. B. p. 43;*
J. Grah. Cat. B. pl. p. 1.) ◎ Tauria. Acclimated in India.—Fl.
largish, of various colours, and fr. C. S.—Seeds very acrid.

2. *Consolida*, L. (*DC. l. c.;—E. B. 26, t. 1839.*) ◎ Europe, N. America.—Fl. large, purplish blue,—Febr. and March; fr. April.

3. *Oliverianum*, (DC. l. c.) ◎ Bagdad.—Fl. large, bluish purple,—
Febr. and March; fr. April.

No *Aconitum* or *Paeonia* has ever flowered here.

* *Clematis orientalis*, L. 5 Levant. *C. chinensis*, Retz. 5 China.
C. havanensis, H. B. and Kth. 5 Havannah. *C. balearica*, Rich.
(*C. calycina*, Ait; B. M. 24, t. 959.) 5 Minorca. *C. caripensis*,
Humb. 5 Trinidad. *C. dioica*, L. 5 Jamaica. *C. zanzibariensis*,
Bojer. 5 Zanzibar. *C. pedicellata*, Swt. (*C. cirrhosa*,
Sims; B. M. 27, t. 1070.) 5 Majorca. *C. chlorantha*, Lindl.;
B. Reg. 15, t. 1234. 5 Sierra Leone. *C. Munroiana*, Wight; ill.
t. 1. Neelgherries. *C. hedsyrsifolia*, DC.; B. Reg. 7, t. 599. 5 Burma.
C. smilacifolia, Wall. Cat. 5 Khassy Mountains.—
Ranunculus hirsutus, Ait; E. B. 21, t. 1504. ◎ Europe. *R. trilobus*,
Desf. ◎ Greece.—*Ficaria ranunculoides*, Mönch. (*Ranunculus Ficaria*, L.; E. B. 9, t. 584.) 2. Europe.—*Garidella Nigellastrum*,
L.; B. M. 31, t. 1266. ◎ France, Italy.—*Delphinium pubescens*,
DC. ◎ Mediterranean. *D. Aconiti*, L. ◎ Levant. *D. peregrinum*,
Willd. ◎ Italy. *D. ambiguum*, L. ◎ Barbary. *D. Virgatum*, Poir.
◎ Syria. *D. Staphisagria*, L. ♂ S. Europe.

Of the Sub-Order, *Podophylleæ*, Lindl. Nat. Syst. p. 7, only one species has been found in India, viz. *Podophyllum Emodi*, Wall. in Sirmore and Gossainthan.

ORDER II.—PAPAVERACEÆ, Juss.—Lindl. Nat. Syst. p. 7.

THE POPPY TRIBE.

Annual or perennial herbs, rarely under-shrubs, with a milky juice. The total amount of species is about 66, of which 28 have been found in Europe; 7 in the Levant; 9 in N. America; 5 in Mexico; 5 in India; 3 in Persia; 2 in Siberia; 2 in N. Africa; 3 in China and Japan; 1 in N. Holland; and 1 in S. Africa. Most of them are annuals, 21 perennials and chiefly mountainous, and 2 shrubby.—Of the five Indian species, two belong to *Papaver*, and three to *Meconopsis*. One of the latter, *M. nepalensis*, DC., especially its root, is according to *D. Don.* (*Pr. fl. nep.* p. 98), very poisonous.—The medicinal properties of the juice of the poppy (*opium*) are well known, and their narcotic character is more or less traced throughout the whole order. The *Sanguinaria canadensis*, L., is, however, given in large doses, emetic and purgative, and, in smaller ones, stimulant, sudorific, and expectorant. (*Barton's coll. mat. med.* 1. p. 37.)

PAPAVER, L. (*DC. pr.* 1, *p.* 117;—*W.* and *A. pr.* 1, *p.* 17.) *Poppy.*

1. *hybridum*, L. (*DC. l. c.* *p.* 118;—*E. B.* 1, *t.* 43.) ⊖ W. and S. of Europe. Fl. largish, deep red.—Febr. and March; fr. April.

2. *Argemone*, L. (*DC. l. c.*;—*E. B.* 9, *t.* 643.) ⊖ Europe. Fl. largish, scarlet,—Febr. and March; fr. April.

3. *dubium*, L. (*DC. l. c.*;—*E. B.* 9, *t.* 644.) ⊖ Europe. Fl. large, palish scarlet.—Febr. and March; fr. April.

4. *Rhoeas*, L. (*DC. l. c.*;—*E. B.* 9, *t.* 645;—*J. Grah. Cat. B. pl.* *p.* 6.) ⊖ Y. Europe. Fl. large, scarlet,—Febr. and March; fr. April.

5. *somniferum*, L. (*DC. l. c.* *p.* 119.) *Opium-Poppy.* ⊖ Morea, Egypt, hotter parts of Asia. Fl. large,—Febr. and March; fr. April and May.

a. nigrum. Fl. purplish. Seeds black.

β. album. Fl. and seeds white. (*Papaver somniferum*, *E. B.* 30, *t.* 2145;—*Roxb. fl. ind.* 2, *p.* 571;—*W.* and *A. pr.* 1, *p.* 17;—*J. Grah. Cat. B. pl.* *p.* 6.) *পোতা Posto.*—Extensively cultivated in India. The juice expressed from the seeds, held to be very useful in chronic diarrhoea. (*Dr. Gibson.*) Their oil pure, sweet, for culinary purposes almost as good as olive oil.

Several varieties of *a* and *β* occur in our gardens, f. ex. *fimbriato-rubrum*, *album* and *nigrum*; *pleno-rubrum*; *purpureum*; *pleno-album*, &c.

ARGEMONE, L. (*DC. pr. 1, p. 120;—W. and A. pr. 1, p. 17.*) *Prickly Poppy.*

1. *mexicana*, L. (*DC. l. c.—W. and A. l. c.—Roxb. fl. ind. 2, p. 571;—B. M. 7, t. 243;—J. Grah. Cat. B. pl. p. 6;—Wight ill. 1, t. 11.*)

बड़शेलकाटा *Buro-shelkanta*. ◎ Mexico.—Domesticated all over tropical India. Fl. large, yellow,—fr. Jan., Febr. and March,—Seeds narcotic, especially when smoked with tobacco. (*Gardener's mag. 6, p. 315;*)—In the W. Indies, they are used for many purposes, seemingly without much benefit.—Lamp oil extracted from the seeds, employed by the poor in the Concans. (*Dr. Gibson.*)

ROMERIA, Medik. (*DC. pr. 1, p. 122.*)

1. *hybrida*, (*DC. l. c.—Chelidonium hybridum, L.—E. B. 3, t. 201.*) *Violet horned Poppy.* ◎ S. Europe, along the Mediterranean, England. Fl. large, purple,—Febr. and March; fr. April

GLAUCIUM, Tournef. (*DC. pr. 1, p. 122.*) *Horn Poppy.*

1. *corniculatum*, Curt. (*Lond. 6, t. 32;—DC. l. c.*)

a. *phaeniceum*, DC. (*l. c.—Glaucium phoeniceum, Sm.—E. B. 20, t. 1433.*) ◎ England, France. Fl. large, scarlet,—Febr. and March; fr. April.

CHELIDONIUM, L. (*DC. pr. 1, p. 122.*) *Celandine.*

1. *majus*, L. (*DC. l. c. p. 123;—E. B. 22, t. 1581.*) ፩ Europe. Fl. smallish, yellow,—C. S.; but very rare.

2. *laciniatum*, Mill. (*DC. l. c.*) ፩ Germany, England. Introduced in 1820. Fl.?

CHRYSKIS, Lindl. (*B. Reg. 23, t. 1948*,—not Cass. nor Less.—*Eschholzia*, Cham.—*DC. pr. 3, p. 344.*)—Chamisso's name being merely a misspelling of Elsholtzia, a labiate genus, established by Willdenow in memory of Elsholtz, the father, must be excluded, though it was meant for Elsholtz, the son.—*Chrys̄cis*, Less. is a synonyme of Amberboa, DC., and *Crysc̄cis*, Cass. a section of it.

1. *californica*, Lindl. (*Eschholzia californica, Cham;—DC. l. c.;—B. Reg. 14, t. 1168;—B. M. 56, t. 2887.*) ◎ California. Fl. large, yellow,—Febr. and March; fr. April.

2. *crocea*, Lindl. (*Eschholzia crocea, Benth.;—B. Reg. 20, t. 1677;—B. M. 63, t. 3495.*) ◎ California. Fl. large, yellow,—Febr. and March; fr. April.

* *Papaver persicum*, Lindl.; B. Reg. 19, t. 1570. ◎ Persia. *P. amoenum*, Lindl.; B. Reg. app. of 1839, p. 56. N. India. Seeds from Dr. Falconer. *P. glabrum*, Royle ill. p. 67. ◎ Himalaya. *P. orientale*, L.; B. M. 2, t. 57. ◎ Levant.—*Argemone mexicana*, L. β *ochroleuca*, Lindl.; B. Reg. 16, t. 1343. ◎ *T. albiflora*, Lindl. (*A. albiflora*, Sims; B. M. 49, t. 2342.) ◎ *A. grandiflora*, Swt.; B. Reg. 15, t. 1264; B. M. 58, t. 3073. ◎ Mexico.—*Glaucium flavum*, Crantz; E. B. 1, t. 8. ፩ Europe. *G. fulvum*, Sm. ፩ ፩ S. Europe.—*Chryseis compacta*, Lindl.; B. Reg. 23, t. 1948. ◎ California.—

Hunnemannia fumariæfolia, Swt.; B. M. 58, t. 3061. ⊖ Mexico.—
Platystemon californicus, Benth; B. M. 64, t. 3579. ⊖ California.
P. leiocarpus, F. and M.—B. M. 66, t. 3750. ⊖ California.—*Platystigma lineare*, Benth.—B. M. 64, t. 3575. ⊖ California.

SUB-ORDER.—FUMARIEÆ, Lindl. Nat. Syst. p. 9.

THE FUMITORY TRIBE.

Herbaceous, mostly annual plants, inhabiting chiefly the temperate latitudes of the northern hemisphere. In all, they amount to about 70 species, of which 18 have been found in Europe; 18 in India; 11 in Siberia; 10 in N. America; 4 in S. Africa; 4 in Japan; 3 in the Levant; 2 in N. Africa; and 1 in Persia. The Indian species, besides 2 that are common to other countries, consist of 16 of *Corydalis*; 1 of *Dactylocapnos*; and 1 of *Macrocapnos*.

The herbs belonging to this tribe are filled with a watery, not milky, juice, and are bitterish, scentless, sudorific, and aperient. Their juice, formerly prescribed against abdominal obstructions, is now only used occasionally in cutaneous diseases. (DC.)

CORYDALIS, Vent. (DC. pr. 1, p. 128.)

1. *capnoides*, Pers. (DC. l. c. p. 129.)
β. *lutea*, DC. (l. c.—*Fumaria lutea*, Sm; E. B. 9, t. 588.) 2.
Europe. Fl. largish, yellow,—and fr. C. S.
2. *glaуca*, Pursh. (DC. pr. 1, p. 128.—*Fumaria glauca*, Curt., B. M. 5, t. 179.) ⊖ Canada. Fl. largish, rosy yellow,—Febr. and March; fr. April.
3. *claviculata*, DC. (l. c. p. 129.—*Fumaria claviculata*, L., E. B. 2, t. 103.) ⊖ Europe. Fl. small, yellowish-white,—Febr. and March; fr. April.
4. *aurea*, Willd. (DC. l. c. p. 128.—*Fumaria aurea*, Mühl.; B. Reg. 1, t. 66.) ⊖ Shady rocks in Pennsylvania, Virginia and Canada. Fl. largish, gold-coloured,—Febr. and March; fr. April.

FUMARIA, L. (DC. pr. 1, p. 129;—W. and A. pr. 1, p. 18.) *Fumitory*.

1. *parviflora*, Lam. (DC. l. c. p. 130;—W. and A. l. o;—Roxb. fl. ind. 3, p. 217;—J. Grah. Cat. B. pl. p. 6;—E. B. 9, t. 590;—Wight ill. 1, t. 11,* A.) बुन्सल्फा *Bunsulpha*. ⊖ Europe, Neelgherries, Candesh, Bombay, Bengal, (Serampore), &c. Nepal, Kemaon, Fl. very small, pale rose-coloured, dark purple tipped;—and fr. C. S.
2. *officinalis*, L. (DC. l. c.,—W. and A. l. c.,—E. B. 9, t. 589.) ⊖ Europe. Fl. like those of No. 1;—and fr. C. S.

* *Sarcocapnos crassifolius*, DC. 2. N. Africa.—*Fumaria capreolata*, L. ⊖ S. Europe. *F. media*, Lois. (*F. capreolata*, Lightf. E. B. 14, t. 493.) ⊖ Europe.

ORDER III.—NYMPHÆACEÆ, Salisb.—Lindl. Nat. Syst. p. 10.

THE WATER-LILY TRIBE.

Floating plants, dispersed over various parts of the world, all perennial, and distinguished generally by large, beautiful flowers. Their number amounts to 29 species, of which 7 inhabit India; 6 N. America; 4 Europe; 3 S. America; 2 Egypt; 2 Siberia; 1 China; 1 Japan; 1 Madagascar; 1 S. Africa; and 1 the W. Indies. Of the 7 Indian forms, 1 belongs to *Euryale*; to *Barclaya*; and 5 to *Nymphaea*.

Their stems are bitter and astringent, and contain a considerable quantity of faecula, which may be used as food. (DC.)

EURYALE, Salisb. (DC. pr. 1, p. 114.)

1. *ferox*, Salisb. (DC. l. c.—B. M. 35, t. 1447.—*Anneslea* (not Wall.) *spinosa*, Andr.; *B. Repos.* 9, t. 618;—*Roxb. fl. ind.* 2, p. 573.) 2. Luknow, Tippera, Chittagong, Saharunpore. Fl. small, bluish-purple. R. S., fr. C. S.—Seeds farinaceous, and, after having been heated in hot sand and husked, eaten by the Natives. (Roxb.)

NYMPHEA, L. (DC. pr. 1, p. 114;—W. and A. pr. 1, p. 16.) Water Lily;

1. *pubescens*, Willd. (DC. l. c. p. 115;—W. and A. l. c.—J. Grah. Cat. B. pl. p. 6.—N. Lotus, Burm.—Roxb. fl. ind. 2, p. 577,—not L.—Rheed. 11, t. 26. बड़ाशूलुक *Buro-shaluk*. 2. Africa. Both Peninsulas of India, Bengal, (Serampore), &c.; in short, like the other species, except N. *rubra*, found in every part of India, from 8° to 32° N. Lat. (Royle.) Fl. large, white, of a vinous smell,—R. and C. S.;—fr. H. S.
2. *rubra*, Roxb. (Fl. ind. 2, p. 576;—DC. l. c.—W. and A. l. c. p. 17;—J. Grah. Cat. B. pl. p. 5;—B. M. 31, t. 1280;—Wight. ill. 1, t. 10.) बड़रुक्कम्बल *Buro-rukto-kumbul*. 2. Both Peninsulas of India, Bengal, (Serampore). Fl. large, intensely red,—H. and R. S.,—fr. R. S.

β . *rosea*. (Roxb. l. c.—B. M. 33, t. 1364.) छोटरुक्कम्बल *chhot-to-rukto-kumbul*. 2. Bengal, (Serampore.) Fl. large, rose-coloured,—H. and R. S.,—fr. R. S.

3. *versicolor*, Roxb. (Fl. ind. 2, p. 577;—DC. l. c.,—B. M. 29, t. 1189.) बड़सूंधि *Buro-sundhi*. 2. Bengal, (Serampore), &c. Fl. large, rose-coloured, or bluish white,—H. and R. S.,—fr. R. S.

β . *alba*. Bengal, (Serampore). Fl. white.

4. *edulis*, (DC. pr. l. c.—N. *esculenta*, Roxb. fl. ind. 2, p. 578.) छोटसूंधि *Chhoto-sundhi*. 2. Bengal, (Serampore), &c. Fl. large, white,—H. and R. S.,—fr. R. S. The *underground stems* (roots) especially of this, but also of the other species, are much sought after by the Natives, both as an article of food and medicine. The *capsules* and *seeds* are either pickled, or made up with their curries, or ground and mixed with flour to make cakes. (Roxb.)

ORDER IV.—NELUMBIACEÆ, Lindl. Nat. Syst. p. 13.

THE SACRED-BEAN TRIBE.

Herbaceous plants, with very large leaves and flowers, inhabiting stagnant and quiet waters in N. America, Jamaica, the Caspian region, India, and formerly in Egypt. The order comprehends but one genus with five species; three of which are insufficiently known. The remaining two belong to India and N. America.

NELUMBIDIUM, Juss. (*DC. pr. 1, p. 113*;—*W. and A. pr. 1, p. 16.*)

1. *speciosum*, Willd. (*DC. l. c.*,—*W. and A. l. c.*,—*Roxb. fl. ind. 2, p. 647*;—*J. Grah. Cat. B. pl. p. 5.*) 2. All India, Persia, China, Cochin China, Japan. Fl. very large, nearly inodorous, H. and R. S.; fr. R. S. The *underground stems* are eaten by the Natives, boiled, or in their curries,—and the *seeds* raw, roasted, or boiled. The *leaves* are used as a substitute for plates. (*Roxb.*)—In China the roots are not only served up in summer with ice, but they are also laid up in salt and vinegar for the winter. (*Loud. enc. of pl. p. 479.*) Kent of Clapton, says, that the seeds will keep forty years, vegetate freely, and flower the first year. (*Hort. trans. 3, p. 36.*)
α. *rubrum*, (*B. M. 23, t. 903*.—*Rheede, 11, t. 30*.—*Rumph. 6, t. 73.*) রক্তপদ্ম, *Rukto-pudmo*. Fl. rose-coloured.
β. *album*. (*Wight. ill. 1, t. 9*.—*Rheede, 11, t. 31.*) খেতপদ্ম, *Shwet-pudmo*. Fl. white.

* *N. luteum*, Willd. 2. N. America.

CSL

MYRISTICACEÆ.

ORDER V.—MYRISTICACEÆ, Lindl. Nat. Syst. p. 15.

THE NUTMEG TRIBE.

Trees often yielding a red juice, (*R. Br.*) and arranged under three genera, *Myristica*, L., *Virola*, Aubl., and *Knema*, Lour. According to our materials, these contain 48 species, of which 29 are described, and 19 only named. *Myristica* numbers 46 species; 27 inhabiting the Moluccas, Cochin-China, Java, Ceylon, and the ultra-gangetic Peninsula of India; 4, the intra-gangetic Peninsula of India; 3, S. America; 2, Madagascar; 1, Aleppo; 1, Mauritius; 2, Chittagong; 2, the Khassya Mountains; and 2 New Holland. *Virola* and *Knema* have each but one species, the first a native of Guiana, the second found in Penang.

As to the properties of this order, all that can be said is this: ‘The bark (of the well known species) abounds in an acrid juice, which is viscid and stains red; the rind of the fruit is caustic; the aril and albumen, the former known under the name of *Mace*, the latter of *Nutmeg*, are important aromatics, abounding in a red oil of a consistence analogous to fat, which, in a species called *Virola sebifera*, Aubl. is so copious as to be extracted easily by immersing the seeds in hot water. The common Nutmeg is the produce of *Myristica moschata*, but an aromatic fruit is also borne by other species. The Nutmeg of Santa Fé is the *Myristica Otoba*, Humb.’ (*Lindl.*)

MYRISTICA, L. (*Spreng. syst.* 3, p. 6, No. 2382;—*R. Br. pr.* p. 399 and 400.)

1. *moschata*, Thunb. (*Spreng. o. c.* p. 64;—*Roxb. fl. ind.* 3, p. 843;—*J. Grah. Cat. B. pl.* p. 175.—*M. officinalis*, L., *Gürtz. fr.* 1, p. 194, t. 41, f. 1. *Hook. exot. fl. t.* 155-6;—*B. M.* 54, t. 2756-57. —*M. aromatica*, Lam.,—*Roxb. Corom.* 3, t. 267.—*Nux Myristica*, *Rumph.* 2, t. 4.) *True Nutmeg Tree*.—b. 25 feet.—Moluccas. Successfully cultivated in Sumatra, Bencoolen, and Penang. Fl. small, pale yellow, inodorous. In H. C. G. some old trees, introduced in 1797, fl. R. S.; fr. H. and R. S. (*Roxb.*)—*Mace*.—*Jytree*.—Albumen (Nutmeg) *জ্যুফুল*, *Juyphul*. The nut contains a volatile, as well as a fixed oil.
2. *tomentosa*, Thunb. (*Spreng. o. c.* p. 65;—*J. Grah. Cat. B. pl.* p. 175.—*Rheede*, 4, t. 5.)—*M. malabarica*, Lam. b. Moluccas, Malabar, S. Concan. Fl. small, yellowish. In H. C. G. Fl.?
3. *peltata*, Roxb. (*Fl. ind.* 3, p. 846.) b. Mountains of the Moluccas. Introduced into H. C. G. in 1798, and the ♂ there fl. H. S. (*Roxb.*)
4. *spicata*, Roxb. (*Fl. ind.* 3, p. 847.) b. Moluccas. Introduced into H. C. G. in 1798. In 1804, the ♀ fl. R. S., but proved abortive. No part of the tree possesses any fragrance. (*Roxb.*)

parviflora. Roxb. (*l. c.*) b. Moluccas. Introduced into H. C. G., where ♀ fl. R. S, but the fl. proved abortive. (*Roxb.*)

- * *Myristica fatua*, Swz. b. Guiana, W. Indies, Surinam. *M. Otoba*, Humb. b. New Granada. *M. Horsfieldii*, Spreng. b. Ceylon, Java. *M. amygdalina*, Wall. pl. as. rar. 1, t. 90. b. Moulmein. *M. sphærocarpa*, Wall. pl. as. rar. 1, t. 89. b. Martaban. *M. sylvestris*, Telf. b. Mauritius.—*Virola sebifera*, Aubl. b. Guiana.—*Knema glaucescens*, Jack. b. Penang.

ORDER VI.—MAGNOLIACEÆ, DC.—Lindl. Nat. Syst. p. 16.

THE MAGNOLIA TRIBE.

Fine trees or shrubs, with large, beautiful, often strongly odoriferous flowers. Their number amounts to 47 species, of which 9 belong to N. America; 1 to Mexico; 29 to the E. Indies; and 8 to Cochin-China, China, and Japan. R. Brown remarks, "that no species have been found on the continent of Africa, or any of the adjoining islands." (*Lindl.*) Of the 8 Asiatic species of Magnolia, enumerated by DC., in the section *Gwillimia*, Röttl., 2 have been removed to *Michelia*, and 1 to *Talauma*. Three other Magnolias, (*M. conspicua*, Salisb., *obovata*, Thunb., *gracilis*, Salisb.), though with introrse anthers, cannot be joined to *Michelia*, Bl. having terminal flowers, and their fruit, besides, being unknown. The 2 remaining species (*M.?* *Coco* and *?* *inodora*, DC.) are only known from Loureiro's very deficient descriptions. The Indian species are ranged under five genera,—*Michelia*, L.; *Manglietia*, Bl.; *Aromadendron*, Bl.; *Sphenocarpus*, Wall. Cat.; and *Talauma*, Juss. The first of these numbers 22 forms, or, if Wallich's *Magnolia punduana*, be no *Michelia*, only 21; viz. 7 from Nepal; 5 from Java; 3 from Ceylon; 2 from the Khassya Mountains; 1 from the Neelgherries; 1 from the Pulney Mountains; 1 from Malabar; 1 from Pegu; 1 from Amboyna; and 1 from Chilmori. *Manglietia* has 3 species; one from Nepal, and two from Java; *Aromadendron* and *Sphenocarpus* each 1 species, the first Javanese, the latter Khassyan; and *Talauma*, 2 Javanese—Molucca forms. Blume is of opinion, that Magnoliaceæ are absolutely known from Dilleniaceæ by their bitter and aromatic properties. Their fragrant flowers act decidedly on the nerves, some of them producing sickness, headache, and paroxysms of fever. The bark of the root of *Magnolia glauca* is an important tonic. (*Bart.*)

MICHELIA, L. Bl. (*Wight ill. p. 11, from Bl.*)

1. *Doltsopa*, Buch. (DC. pr. 1, p. 79;—Wall. tent. fl. nep. p. 7, t. 3;—*Wight. ill. 1, p. 13.*) b. Forests of Nepal. In H. C. G. Fl.? Wood fragrant, excellent, used in Nepaul for house-building. (D. Don. pr. fl. nep. p. 226.) Another Nepalese species, *M. excelsa*.

Bl. (*Magnolia excelsa*, Wall.) yields valuable timber, of a fine texture; at first greenish, but soon changing into pale yellow. *Wall. tent. fl. nep.*)

2. *Champaca*, L. (*Wight. ill. 1, p. 13*;—*Bl.*—*DC. pr. 1, p. 79*, partly;—*Roxb. fl. ind. 2, p. 656.*) చంపా *Champa*. b. Moluccas, Java. Cultivated in Bengal, (Calcutta, Serampore, &c.) Fl. large, deep yellow, intensely fragrant,—H. and R. S.; fr. C. S. Indeed, it fl. and fr. nearly throughout the year.—*Flowers* highly esteemed by the Natives, especially for the use they make of them in their religious ceremonies.
3. *Kisopa*, Buch. (*DC. l. c.*,—*Wall. tent. fl. nep. p. 8. t. 4.*,—*Wight. l. c.*) b Forests of Nepal. In H. C. G. Fl.?
4. *aurantiaca*, Wall. (*Pl. as. rar. 2, t. 147.*) L. b. Pegu. Fl. large, orange-coloured, fragrant,—C. S.; fr. June and July.
5. *fuscata*, Bl. (*Wight. ill. 1, p. 11*.—*Magnolia fuscata*, *Andr. B. Repos. 4, t. 229*;—*B. M. 25, t. 1008*;—*DC. pr. 1, p. 81*;—*Roxb. fl. ind. 2, p. 655.*) ५. China. Fl. largish, cream-coloured, purple-edged, fragrant,—March and April; fr. ०

6. *oblonga*, Wall. Cat. b. Khassy Mountains. In H. C. G. Fl.?

MAGNOLIA, L. (*DC. pr. 1, p. 79.*)

- ? 1. *obovata*, Thunb. (*DC. o. c. p. 81.*)

β *discolor*, DC. (*l. c.*—*M. discolor*, *Vent.*—*M. purpurea*, *Curt.*, *B. M.* 11, *t. 390*. *M. obovata*, *Roxb. fl. ind. 2, p. 655.*) ५. Japan, China. Fl. large, dark, purple, rose-coloured, inodorous,—R. S.; fr. O. (*Roxb.*)

- ? 2. *conspicua*, Salisb. (*Par. t. 38*;—*B. M. 39, t. 1621*.—*M. Yulan*, *DC. pr. 1, p. 81.*) ५ China. Introduced in 1840.

SYPHENOCARPUS, Wall. Cat. Sine charactere! (*Lindl. Nat. Syst. p. 16.*)

1. *grandiflorus*, Wall. Cat. (*Liriodendron grandiflorum*, *Roxb. fl. ind. 2, p. 653*. *L. indicum*, *Spreng. syst. 2, p. 642*. *Magnolia pterocarpa*, *Roxb. Corom. 3, t. 266.*) ଦୁଲୀଚିପା, *Doolee-champa*. b. Chittagong, Sylhet. Fl. large, white, fragrant,—April and May; fr. C. S.

What may be *Liriodendron Lilifera*, *Roxb.* (*Fl. ind. 2, p. 654.*) ଲୁବାଟ୍ଟିପା, *Ouva-champa*, a large tree from the Khassy Mountains, introduced into H. C. G. before 1814, is not easy to say. It is mentioned neither in Wall. Cat., nor in Royl. Ill., and to Mr. Griffith, who is familiar with Bhootan, Assam, and the Khassy Mountains, it is entirely unknown.

TALAUMA, Juss. (*G. Don's Mill. dict. 1, p. 85.*)

1. *pumila*, Bl. (*G. Don.*, *l. c.*—*Magnolia pumila*, *Andr. B. Repos. 3, t. 227*;—*B. M. 25, t. 977*;—*DC. pr. 1, p. 81.*; *Roxb. fl. ind. 2, p. 655*;—not *Spreng.*) ५ China, Mountains of Amboyna and Java. Fl. largish, white, fragrant,—nearly throughout the year; fr. O.

LIRIODENDRON, L. (*DC. pr. 1, p. 82.*)

1. *tulipifera*, L. (*DC. l. c.*,—*B. M. 8, t. 275.*) *Tulip Tree*. b. N. America. Introduced in 1840.

Chilmori. *M. macrophylla*, Don, Nepal.—*Manglietia insignis*, Arn. (*Magnolia insignis*, Wall. pl. as. rar. 2, t. 182.) 5. Nepal.—*Aromadendron elegans*, Bl. 5. Java.—*Talauma Rumphii*, Bl. 5. Moluccas. *T. Candolii*, Bl.—B. Reg. 20, t. 1709. 5. Java.

ORDER VII.—WINTERACEÆ, Lindl. Nat. Syst. p. 17.

THE WINTER'S BARK TRIBE.

Shrubs or small trees, containing, under four genera, twelve species; viz. 2, inhabiting New Holland; 2, Chili; 2, Florida; 1, the vallies about the Magellan Straits; 1, New Granada; 1, Mexico; 1, Japan and China; 1, found by Mr. Griffith, on the Khassya Mountains; and 1, New Zealand.

The general properties of this order are stimulant and aromatic. The well-known Star Anise is the fruit of *Illicium anisatum*, L. Winter's Bark, the product of *Drimys Winteri*, Forst., and formerly much used in medicine, is now nearly neglected.

ILLICIUM, L. (DC.) pr. 1, p. 77.)

1. *floridanum*, Ell. (DC. l. c.—B. M. 13, t. 439.) 5 E. Florida.
Introduced into H. C. G. Fl.?

* *Illicium anisatum*, L. 5. China, Japan. *I. parviflorum*, Michx. 5 E.
Florida.—*Drimys mexicana*, Moç and Sessé. Mexico.

ORDER VIII.—ANONACEÆ, Rich. Lindl. Nat. Syst. p. 18.

THE CUSTARD-APPLE TRIBE.

With few exceptions, a tropical order, chiefly inhabiting America and the East Indies, and comprehending upwards of 200 species. Nine of these have been found in tropical Africa; 1 in Egypt; 3 in Madagascar and Mauritius; 6 in China and Japan; 1 in New Caledonia; 1 in New Holland; 5 in Carolina and Florida;—and about 95 in the East Indies. Of the latter, there are 42 species of *Uvaria*; 23 of *Unona*; 17 of *Guatteria*; 5 of *Artabotrys*; 2 of *Orophea*; 1 of *Polyalthia*; 1 of *Miliusia*; 1 of *Hyalostemma*; 1 of *Lobocarpus*; 2 of *Pattonia*; and 1 of *Saccopetalum*.

All trees or shrubs, the roots, bark, leaves, and especially capsular fruits of which are distinguished by their powerful aromatic taste and smell.

The fleshy fruits are edible, and much esteemed in the tropics. (*DC.*)—Blume remarks, that the Javanese species require, owing to their powerful properties, to be employed with caution; for if they are administered for too great a length of time, or in too large doses, they produce vertigo, haemorrhage, or even abortion. (*Lindl.*)

ANONA, L. (*DC.* pr. 1, p. 83;—*W.* and *A.* pr. 1, p. 7.)

1. *squamosa*, L. (*DC.* o. c. p. 85;—*W.* and *A.* l. c.;—*Roxb.* fl. ind. 2, p. 657;—*B. M.* 58, t. 3095;—*J. Grah. Cat. B.* pl. p. 2.—*Rheed.* 3, t. 29.—*Rumph.* 1, t. 46.) **আতা** *Ata. Custard-Apple.* 5. No doubt a native of tropical America, notwithstanding St. Hilaire's reasonings, which would make it of Asiatic origin. No Anona has, on any good authority, been found wild in Asia, and it is, perhaps, questionable, whether *A. senegalensis*, *grandiflora* and *amplexicaulis*, are true natives of Senegal and Madagascar.—Completely domesticated in India. Fl. largish, yellowish green,—H. S.; fr. July—October.—Fruit delicious. Leaves with a heavy smell. Seeds acrid, fatal to insects, and therefore by the Natives powdered, mixed with gram flour, and thus occasionally used for washing their hair. (*Royle.*) The fruit has, on some occasions of famine, literally proved to the Natives the staff of life. (*Grah. l. c.*)
2. *reticulata*, L. (*DC.* pr. 1, p. 85;—*W.* and *A.* pr. 1, p. 7;—*Roxb.* fl. ind. 2, p. 657;—*B. M.* 56, t. 2911-12;—*J. Grah. Cat. B.* pl. p. 3.—*Rheede*, 3, t. 30, 31.) **নোনা**, *Nona. Bullock's Heart.* 5 W. Indies.—Domesticated in India. Fl. largish, yellowish-green, of a vinous smell,—H. S.; fr. July—November.
3. *muricata*, L. (*DC.* pr. 1, p. 84;—*Roxb. H. B.* p. 43;—*J. Grah. Cat. B.* pl. p. 3.) **Sour Sop.** 5 W. Indies. Cultivated in India. Fl. large, yellowish-green, of a vinous smell,—September; fr. H. S.
4. *Cherimolia*, Mill. (*DC.* l. c.;—*B. M.* 45, t. 2011;—*J. Grah. Cat. B.* pl. p. 3.) 5 Peru, New Granada. Introduced in 1820. Has not fl. here.—Its dark purple fruit is much esteemed in S. America.
5. *Suriffa*, Roxb. (*H. B.* p. 43.) b. Sylhet.—Introduced into H. C. G. in 1794, where it fl. Feb.—April. (*Roxb.*)—What this species may be, we cannot determine, never having seen it. It is not mentioned in Wall. Cat., and to Mr. Griffith it is unknown. Royle ill. p. 60, gives Shurifa as the Persian name for *Anona squamosa*, L., with which, however, Roxb. could not have confounded his *A. Suriffa*.

UVARIA, L. (*DC.* pr. 1, p. 88;—*W.* and *A.* pr. 1, p. 7.)

1. *odorata*, Lam. (*W.* and *A.* o. c. p. 8;—*Roxb.* fl. ind. 2, p. 661.—*Unona odorata*, *Dun.*—*DC.* o. c. p. 90—*Rumph.* 2, t. 65.) 5 China, Sunda Islands, Martaban, Moluccas. Fl. large, yellowish-green, fragrant, nearly throughout the year; fr. C. S.
2. *grandiflora*, Roxb. (Fl. ind. 2, p. 665;—*W.* and *A.* pr. 1, p. 9;—*Wall.* pl. as. rar. 2, t. 121.—*U. purpurea*, *Bl.*;—*Wall.* rept.—*Unona grandiflora*, *Leschen*;—*DC.* pr. 1, p. 90.) 5 Sumatra. Fl.

large, crimson, changing to dark purple,—June and July; fr. C. S.

3. *macrophylla*, Roxb. (*Fl. ind.* 2, p. 663;—*Wall. pl. as. rar.* 2, t. 122.) 5 Silhet, Chittagong. Fl. large, dull reddish,—July and Aug.; fr. 0.
4. *bicolor*, Roxb. (*Fl. ind.* 2, p. 662.) 5 Silhet. Introduced in 1826. Fl. largish, brown red,—April; fr. R. S. (*Roxb.*)
5. *ventricosa*, Roxb. (*Fl. ind.* 2, p. 658.) 5 Tippera. Fl. greenish-white, fragrant,—March; fr. July.
6. *bracteata*, Roxb. (*Fl. ind.* 2, p. 660.) 5 Sylhet. Fl. small, pale yellowish-white. Introduced into H. C. G. in 1811. Fl. April and May; fr. Aug. and Sept. (*Roxb.*)
7. *tripetala*, Roxb. (*Fl. ind.* 2, p. 667.—not Lam.;—*Unona tripetala*, DC.) 5 Moluccas. Fl. largish, greenish-yellow, inodorous,—March, April, and May; fr. 0.
8. *elongata*, Roxb. (*H. B.* p. 43.) 5 Chittagong. Introduced into H. C. G. in 1806, and there fl. R. S. (*Roxb.*)
9. *heteroclita*, Roxb. (*Fl. ind.* 2, p. 663.) 5 Garrow Hills. Introduced into H. C. G. in 1812. Fl. June and July; fr. Oct. and Nov. (*Roxb.*)

UNONA, L. (*DC. pr.* 1, p. 88; *W. and A. pr.* 1, p. 9.)

1. *discolor*, Vahl. (*DC. o. c.* p. 91;—*W. and A. l. c.*;—*Roxb. fl. ind.* 2, p. 669;—*J. Grah. Cat. B. pl.* p. 3.—*Uvaria monilifera*, *Gärtn. fr.* 2, p. 156, t. 114, f. 2.) 5 Circars, Chittagong, Penang, Tavoy. Fl. large, yellowish. Introduced in 1840.—*Wood* chiefly used for rafters. (*Roxb.*)
2. *longiflora*, Roxb. (*Fl. ind.* 2, p. 668.) 5 Silhet. Fl. large, yellow, orange,—April and May; fr. 0.
3. *undulata*, Wall. (*Pl. as. rar.* 3, t. 295.—*Uvaria undulata*, *Roxb. H. B.* p. 43,—not Dun.) 5 Silhet, Chittagong. Fl. very large, greenish-yellowish, fragrant.—H. S.; fr. Nov.
4. *dumosa*, Roxb. (*Fl. ind.* 2, p. 670.) 5 Silhet. Fl. large.—In H. C. G.,—fl. April and May; fr. Sept. and Oct. (*Roxb.*)
5. *Dasymaschala*, Bl. (*Wall. Cat.*) 5 Singapore. In H. C. G. Fl. June; fr. —
6. *laevigata*, Wall. (*Rept.*) 5 Native place? Introduced in 1840.
7. *penduliflora*, Moç. and Sessé. (*DC. pr.* 1, p. 89.) 5 Mexico.—Introduced in 1840.

SCHIZANDRÆ, Bl.—Lindl. Nat. Syst. p. 19.

With one exception, (*Villarezia*.) trailing shrubs, containing 4 genera; viz. *Kudsura*, Juss.; *Sphaerostema*, Bl.; *Schizandra*, Michx.; and *Villarezia*, Ruiz and Pav. The first genus, with one species, is a Native of Japan and the Khassy Mountains; the second, with four forms, inhabits Java and Nepal. The third and fourth, each with only one species, belong to N. America and Chili.—Leaves aromatic. (Lindl. B. Reg., not Nat. Syst. l. c. in which it is said, that Schizandréæ have no aromatic or bitter properties.) *KADSURA*, Juss. (DC. pr. 1, p. 83.—*Sarcocarpon*, Bl.)

1. *japonica*, Dun. (DC. l. c.—*Kimpf. amoena*, t. 477;—*Uvaria japonica*, L.) 5 ↗ Japan, Khassy Mountains, Nepal.—Introduced in 1827, but has not fl. here.

SPHAEROSTEMA, Bl. (B. Reg. 20, t. 1688.)

1. *propinquum*, Bl. (B. Reg. l. c.—*Kadsura propinqua*, Wall. tent. fl. nep. p. 11, t. 15.) 5 ↗ Nepal. Has been introduced into H. C. G.—Fl. ?
2. *grandiflorum*, Bl. (*Kadsura grandiflora*, Wall. tent. fl. nep. t. 14.) 5 ↗ Nepal.—Has been introduced into H. C. G.—Fl. ?

* *Sphaerostema axillare*, Bl. Java. *S. elongatum*, Bl. Java.—*Schizandra coccinea*, Michx.; B. M. 34, t. 1413. 5 ↗ Carolina, Georgia.

ORDER IX.—DILLENIACEÆ, DC.—Lindl. Nat. Syst. p. 20.

Handsome trees, shrubs, or undershrubs, rarely herbs, amounting to about 115 species, of which 47 belong to New Holland and Van Diemen's Land; 42 to the E. Indies; about 30 to S. America; 3 to Madagascar; 2 to Guinea; and 1 to New Caledonia.—The Indian forms are ranged under nine genera; viz. 12 under *Tetracera*; 5-6 under *Delima*; 3 under *Wormia*; 1 under *Actinidia*; 4 under *Colbertia*; 11 under *Dillenia*; 1 under *Capellia*; 3 under *Acrotrema*; and 1 under *Schumacheria*.—With a few exceptions, the properties of the order are unknown.

TETRACERA, L. (DC. pr. 1, p. 67;—W. and A. pr. 1, p. 20.)

1. *Rheedii*, DC. (o. c. p. 68;—W. and A. l. c.—J. Grah. Cat. B. pl. p. 1;—Wight ic. 1, t. 70;—*Rheed*. 5, t. 8.) 5 ↗ Travancore, S. Concan. Fl. middle-sized, white, fragrant. Introduced into H. C. G.—Fl. ?

DILLENIACEAE.

ORDER X.—APIACEÆ, Lindl. Nat. Syst. p. 21.

(Umbelliferæ, Juss.)

THE CELERY TRIBE.

Herbaceous, rarely shrubby, plants, "natives chiefly of the northern hemisphere, inhabiting groves, thickets, plains, marshes, and waste places. They appear to be extremely rare in all tropical countries, except at considerable elevations, where they gradually increase in number as the other parts of vegetation acquire an extra-tropical, or mountain character. Hence, although they are hardly known in the plains of India, they abound on the mountains of the Himalaya." (Lindl.) According to DC. pr. they amounted, in 1830, to about 1000 species, of which 360 inhabit Europe; 136, S. America; 113, Caucasus and the Levant; 71, N. America; 59, S. Africa; 49, N. Africa; 38, New Holland; 31, Siberia; 11, Java; 7, New Zealand; 6, the Canaries; 6, China and Japan; 4, the Mascarenhas Islands; 3, Van Diemen's Land; 2, Tristan da Cunha; 1, St. Helena; and 1 Arabia. Twenty were common to several countries, and 18 unknown as to their native place.—The Indian species, enumerated by DC. l. c., amounted to about 74, but have now, as far as we can calculate, risen to 105; viz. 6—8 of *Hydrocotyle*; 1 of *Sanicula*; 4 of *Helosciadium*; 2 of *Laserpitium*; 5 of *Ptychosis*; 1 of *Falcaria*; 3 of *Sison*; 2 of *Ammi*? 2 of *Carum*; 3 of *Pimpinella*; 1 of *Sium*; 11 of *Bupleurum*; 2 of *Oenanthe*; 3 of *Dasylooma*; 1 of *Feniculum*; 1 of *Eriocycla*; 1 of *Seseli*; 1 of *Cnidium*; 1 of *Trachydium*; 2 of *Hymenidium*; 3 of *Athamanta*; 3 of *Ligusticum*; 5 of *Selinum*? 1 of *Archangelica*; 1 of *Palimbia*; 3 of *Peucedanum*; 1 of *Anethum*; 1 of *Cortia*; 2 of *Pastinaca*; 8 of *Heracleum*; 1 of *Tordyliopsis*; 1 of *Torilis*; 4 of *Charophyllum*; 1 of *Pycnocycla*; 1 of *Osmorrhiza*; 1 of *Ozodia*; 1 of *Prangos*; 1 of *Vicatia*; 1 of *Pleurospermum*; and 9 of *Hymenolana*. Royle (Ill. p. 228,) says that the whole number is 127 species for the Indian Flora, of which eleven are found in the plains and at the foot of the hills, seven only in a cultivated state, and the remainder in the mountains, with the exception of a few in the Peninsula; but if we deduct from his herbarium those forms it has in common with Wallich's Cat. and some European species, our estimation is, we suppose, pretty correct. The S. African Apiaceæ having since 1830 increased to 120 species, (Harvey's gen. of S.

African pl. 1838,) a similar augmentation has no doubt taken place, from later discoveries, in other parts of the world.

Though, according to structure, this is one of the most natural orders, yet we find its properties very different. Some species abound in resina containing a large quantity of an essential aromatic oil, and, therefore, act more or less as aromatics and stimulants, f. ex. the fruits of *Pimpinella Anisum*, (*Anise*.) *P. magna*, *P. Saxifraga*, *Carum Carvi*, (*Caraway*.) *Anethum graveolens*, (*Dill*.) *Faniculum vulgare*, (*Fennel*.) *F. Panmori*, *Cuminum Cyminum*, (*Cumin*.) *Coriandrum sativum*, (*Coriander*.) &c. The leaves of *Petroselinum sativum*, (*Parsley*.) *Apium graveolens*, (*Celery*.) *Anthriscus Cerefolium*, (*Chervil*.) &c; the roots of *Celery*, *Meum athamanticum*, *Pastinaca sativa*, (*Parsnip*.) *Archangelica officinalis*, (*Garden Angelica*.) *Imperatoria Ostruthium*, (*Masterwort*) *Crithmum maritimum*, (*Samphire*.) *Levisticum officinale*, *Sium Sisarum*, &c.—as well as the root of *Daucus Carota*, (*Carrot*.) *Arracacha esculenta*, *Oenanthe pimpinelloides*, *Carum Bulbocastanum*, *Chaerophyllum tuberosum*, *Eryngium campestre* and *aquaticum*, &c. are especially, when cultivated, wholesome articles of food, while the leaves of *Prangos pabularis* yield abundant fodder for cattle.

Other umbelliferæ, in which the abounding essential oil and mucilage change, the former to resin, the latter to gum, yield from wounds in the stem, or from the top of the root, dense juices well known under the name of fetid gum-resins, and some of them medicinally invaluable, f. ex. *Galbanum officinale*, D. Don ; *Opopanax Chironium*, Koch ; *Ferula Asafetida* L. ; *F. persica*, Willd. ; *Dorema Ammoniacum*, D. Don, &c.—Others, lastly, in which a bitterish principle without aroma predominates, are generally speaking, suspicious, and offer in a high degree narcotically poisonous, f. ex. *Oenanthe crocata*, L. ; *O. Phellandrium*, Lam. ; *Conium maculatum*, L. ; (*Common Hemlock*), *Æthusa Cynapium*, L. (*Fool's Parsley*); *Cicuta vicsosa*, L. (*Water Hemlock*); &c.. Of the Indian species of this order none has been found poisonous.

Sta Fé de Bogota. *Smyrnium Olusatrum*, L.; E. B. 4, t. 230. ♂ England. S. Europe.

ORDER XI.—HEDERACEÆ, A. Rich. (Bot. med.—as to the name.)

Araliaceæ, A. Rich. Dict. class. d'hist. nat.—Lindl. nat. syst. p. 25.

THE IVY TRIBE.

Trees, shrubs, (sometimes climbing) rarely herbs, according to DC. pr. (1830) containing 14 genera and 123 species: 46 from the E. Indies; 42 from S. America; 8 from N. America; 5 from N. Zealand; 4 from the W. Indies; 3 from China; 3 from Japan; 3 from S. Africa; (5 *Harvey*) 3 from Mauritius and Bourbon; 1 from Madagascar; 2 from New Holland and the Sandwich Islands; 2 from Europe; and 1 unknown, as to its native place.—The E. Indian forms have since risen to 75; viz. 22 of *Panax*; 1 of *Gilibertia*? 1 of *Toricellia*; 2 of *Aralia*; 10 of *Sciodaphyllum*; 27 of *Hedera*; 9 of *Paratropia*; and 3 of *Arthrophyllum*. The greatest number of these inhabit the Moluccas, Java, and the Himalayas; the rest have been discovered on the Khassya mountains, in the two Peninsulas of India, Ceylon and Cochin China.—We are not acquainted with Endlicher's genus, *Botryodendron*.

"The plants of this family are not possessed of very decided medical properties, though the *Ginseng*, produced by *Panax quinquefolia*, L., has been more celebrated than plants of greater value. This plant, produced in the mountains of Chinese Tartary, between 39° and 47°, was recognized from the description in Canada and Virginia, whence it is now exported to China. Subsequently the same plant, or a species so closely allied to it, that Dr. Wallich had called it *Panax Pseudo-Ginseng*, (Pl. as. rar. 2, t. 137), was discovered by him on Sheopore, at an elevation of 9000 to 10,000 feet, an additional instance of the existence of similar plants in the mountains of China, N. America, and the Himalayas." (Royl. ill. p. 233 and 234.) *Aralia nudicaulis*, L. is used in N. America as a substitute for Sarsaparilla.

PANAX, L. (DC. pr. 4, p. 252;—W. and A. pr. 1, p. 376.) *Panax*, acis, f. *Lucret.*

1. *aculeata*, Ait. (DC. l. c.;—Jacq. icon. rar. 3. t. 634.) 5. China. Fl. small, greenish, C. S.
2. *cochleata*, DC. (o. c. p. 253;—J. Grah. Cat. B. pl. p. 85. *Panax conchifolium*, Roxb. fl. ind. 2, p. 77.—Rumph. 4. t. 31.) 5 Moluccas, Java. Does not fl. in Bengal, and rarely in the Moluccas. *Whole plant*, when dried, strongly smelling of Celery.
3. *fragrans*, Roxb. (Fl. ind. 2, p. 76;—DC. pr. 4, p. 254;—J. Grah. Cat. B. pl. p. 85.) 5. Khassya Mountains, Nepal. Fl. small, fragrant C. S; fr. H. S.
4. *fruticosa*, L. (DC. pr. 4, p. 254;—Roxb. fl. ind. 2, p. 76;—W. and A. pr. 1, p. 376;—J. Grah. Cat. B. pl. p. 85;—B. Repos. 9. t. 595.—Rumph. 4. t. 33.) 5. Moluccas, Java. Fl. small, brownish green,

May and June ; fr. C. S. *Pulp of berries* stains paper of a dark violet colour. *Whole plant*, especially dried, smelling strongly of Celery.

5. *digitata*, Roxb. (*Fl. Ind.* 2, p. 75.) b. Silhet. Fl. small, greenish-yellow. In H. C. G.—fl. C. S; fr. H. S. (*Roxb.*)
6. *palmata*, Roxb. (*Fl. Ind.* 2, p. 74.) 5. Chittagong. Fl. small, white. In H. C. G.—fl. Sept. and Oct.; fr. Nov. (*Roxb.*)

SCIODAPHYLLUM, P. Browne. (*DC. pr.* 4, p. 259.)

- ? 1. *pulchrum*, Wall. 5. Native place? In H. C. G. fl. Feb.

PARATROPIA, DC. (*Pr.* 4, p. 265;—*W. and A. pr.* 1, p. 377.)

1. *digitata*, (P. *venulosa*, *W. and A. l. c.*;—*Wight. ill.* 2, t. 118;—*J. Grah. Cat. B. pl.* p. 85.—*Aralia digitata*, *Roxb. fl. ind.* 2, p. 107.—not *Willd. Rheed.* 7, t. 28.) 5 Circars, Lukshmepur. Fl. small, greenish-yellow, April and May; fr. R. S. Leaves, when rubbed, smelling of turpentine.
2. *umbraculifera*, Wall. (*Rept.*—*Aralia umbraculifera*, *Roxb. fl. ind.* 2, p. 108.—*Rumph. l. t.* 53, p. 1.) 5 Moluccas. Fl. small, greenish, April.

HEDERA, L. (*DC. pr.* 4, p. 261;—*W. and A. pr.* 1, p. 376.) *Ivy.*

1. *palmata*, Wall. Cat. (*Gastonia palmata*, *Roxb. fl. ind.* 2, p. 407;—*B. Reg.* 11, t. 894. *Gilibertia palmata*, *DC. pr.* 4, p. 256.) 5. Chittagong, Nepal. Fl. largish, white.—In H. C. G. Fl.?
2. *heterophylla*, Wall. Cat. Penang. In H. C. G. Fl.?

* *P. attenuata*, Swz. b W. Indies. *P. chrysophylla*, Vall. b. Guiana.—*Paratropia Wallichiana*, W. and A. b. Courtallum. *Gastonia cutispongia*, Lam. b. Bourbon. (*Bois d'éponge.*) *Hedera repanda*, W. and A. (*Gilibertia repanda*, DC.) 5. Mauritius. *H. paniculata*, W. and A. (*Gilibertia paniculata*, DC.) b. Mauritius. *H. terebinthacea*, Vall. Penang. Courtallum.

ORDER XII.—GROSSULACEÆ, Mirb. Lindl. Nat. Syst. p. 26.

THE CurrANT TRIBE.

Shrubs, unarmed or thorny, arranged under 5 genera (*Spach.*) containing, according to DC. pr. (1828), 53 species, of which 49 inhabit N. America; 6 Siberia; 5 Europe; 2 Caucasus; 1 Syria; 11 Mexico, Chili and Peru; and 1 the vicinity of the Straits of Magellan. Three of these are common to several countries, and 1 unknown, as to its native place. Six or more have since been added from N. America, and 4 from the Himalayas. To this order belong *Ribes Grossularia*, L. (Gooseberry); *R. rubrum*, L. (Red Currant); and *R. nigrum*, L. (Black Currant.) Their refreshing flavour is well known, whereas the fruit of the other species is unpleasantly acrid.

RIBES, L. (DC. pr. 3, p. 477.)

1. *Grossularia*, L. (E. B. 18, t. 1291. R. *uva crispa*, L. ξ *sativum*, DC. o. c. p. 478.) 5 Europe, Siberia. Cultivated. This is the only species of the order, which has fl. here, and that only once in the H. S. Wall. Cat. mentions it as an inhabitant of Buddrinath, near the almost inaccessible sources of the Ganges; Royle, however, puts it down as a distinct species, under the name of *R. Himalense*.

* *Ribes orientale*, Poir. 5 Syria.

ORDER XIII.—ESCALLONIACEÆ, Lindl. Nat. Syst. p. 27.

Handsome shrubs, of 7 genera, and 34 species: 23 in S. America, at elevations of 6,000 to 14,760 feet (*Humb.*); 2 in N. America; 1 in Bourbon; 2 in New Holland; 1 in Van Diemen's Land, and 5 in the E. Indies. (*Polyosma*)—Properties unknown.

ITEA, L. (DC. pr. 4, p. 6.)

1. *virginica*, L. (DC. l. c.;—B. M. 50. t. 2409.) 5 Pennsylvania.—Lately introduced.

* *Forgesia borbonica*, Pers. 5 Bourbon.—*Polyosma fragrans*, Bennet. (*Itea?* *fragrans*, Wall.) 5 Singapore. *P. Wallichii*; Bennet. 5 Khasya mountains.

ORDER XIV.—BERBERACEÆ, Lindl. Nat. Syst. p. 29.

THE BERRERRY TRIBE.

Shrubs or perennial herbs, of 10 genera, and more than 60 species: 23 S. American; 6 N. American; 5 European; 3 Siberian; 4 from the Levant; 2 from China; 5 or more from Japan; and 9 (*Berberis*) from India. Of the latter, 6 are Himalayan; 2 from the Neelgherries; and 1 from Kunawur.—The common Berberry is well known.—Properties of the rest of no great importance.

BERBERIS, L. (DC. pr. 1, p. 105; W. and A. pr. 1, p. 15.)

1. *asiatica*, Roxb. (Fl. ind. 2, p. 182;—DC. o. c. p. 107;—Deless. icon. sel. 2, t. 1.) 5 Nepal, Kemaon. Fl. small, yellow, February and March; fr. R. S.
2. *Leschenaultii*, Wall. (W. and A. pr. 1, p. 16.—*Mahonia Napaulensis*, DC. β. Roxburghii, DC. pr. 1, p. 109.—*Berberis pinnata*, Roxb. fl. ind. 2, p. 184.) 5 Neelgherries, alt. 8000 f. Munipore. (Roxb.) Fl. smallish, bright yellow, January.

B. aristata, DC. (pr. 1, p. 106;—*B. M.* 52, t. 2549.—*B. Chitria*, *Buch. B. Reg.* 9, t. 726.) 5 Nepal, Kemaon, Mussooree.—Introduced into H. C. G. Fl.?

NANDINA, Thunb. (*DC. pr. 1, p. 109.*)

I. domestica, Thunb. (*DC. l. c.*;—*Roxb. fl. ind.* 2, p. 184;—*B. M.* 28, t. 1109.) 5 Japan.—Has not fl. here, though cultivated for many years.

* *Berberis ruscifolia*, Lam. 5. Buenos Ayres. *B. Lycium*, Royle. 5. Mussooree, 3000 f. alt. *B. tinctoria*, Lesch. Wight. icon. 1, t. 8. 5. Neelgherries. *B. Nepalensis*, Spr. 5. Nepal. *B. dealbata*, Lindl. B. Reg. 21, t. 1750.=5. Mexico. *B. tenuifolia*, Lindl. 5. Vera Cruz.

ORDER XV.—VITACEÆ, Lindl. Nat. Syst. p. 30.

THE VINE TRIBE.

Climbing, sarmentose, sometimes simple shrubs, rarely herbs. Excluding 8 of DC's. untenable species, his pr. (1824) enumerates, under 5 genera, 102 forms; viz. 32 E. Indian; 20 S. American; 11 N. American; 11 W. Indian; 4 from Madagascar, Bourbon and Mauritius; 4 S. African; 4 from Guinea; 1 from Zanguebar; 4 Arabian; 3 Syrian and Armenian; 2 Japanese; 2 from Timor; 1 from New Holland; and 3 unknown, as to their native place. Since then, the number of forms has been considerably increased, f. ex. in S. Africa to 16, (*Harvey.*) and in the E. Indies to 108. Of the latter, 87 species belong to (*Vitis*; *Vitis*, *Cissus* and *Ampelopsis*, Auct.) 20 to *Leea*; and 1 to *Pterisanthes*. There can, however, be no doubt, that upon a strict examination of authentic specimens, the number will be much reduced, as the leaves, from which their specific characters are chiefly drawn, are but little to be relied on either in *Vitis* or *Leea*.

The properties of the grape and its products are well known. The leaves of several species are acrid, or astringent, or sometimes with the young shoots and fruit so acrid, that according to Wight. (*Ill. 1, p. 151.*) the mere taste of a berry, is sufficient to cause in a short time the most insufferable sense of burning all over the mouth and fauces, lasting for several hours. With the exception of, perhaps, the N. American Fox-grapes, the grape-vine would seem to be the only species of Vitaceæ possessed of valuable properties.

VITIS, L. (*R. Br.*, *W.* and *A.* pr. 1, p. 125.) Vine.

ORDER XVI.—PITTOSPORACEÆ, Lindl. Nat. Syst. p. 31.

Trees or shrubs, simple or twining, of 6 genera, and about 35 species: viz., 15 from New Holland; 2 from Van Diemen's Land; 2 from Australasia; 2 from Mauritius; 1 from Japan and China; 1 from the Moluccas; 1 from S. Africa; 2 from the Canaries; 1 from Madeira; 1 from Guinea; and 5 from India. The latter (species of *Pittosporum*) have been found in Ceylon, on the Neelgherries, at Mussooree, and in the Kheree Pass.

"The wood of *Senacia undulata*, Lam. is handsomely veined. The berries of *Billardiera* are eatable, but they have a resinous odour, and a bitter sub-acrid taste. The bark of *Pittosporum Tobira*, Ait. has a resinous smell." (*Lindl.*) "The seeds of the Indian species are covered with a fragrant resinous fluid, which, however, soon dries on exposure to the air, and loses its smell." (*Wight.*)

PITTOSPORUM, Banks. (*DC. pr.* 1, p. 346;—*W. and A. pr.* 1, p. 153.)

1. *ferrugineum*, Ait. (*DC. l. c.*;—*B. M.* 46, t. 2075.) ৫. Guinea. Fl. small, whitish, Feb.; fr. —
2. *verticillatum*, Wall. (*Rept. P. floribundum*, *W. and A. pr.* 1, p. 154;—*Royle. ill.* p. 77.—*Celastrus verticillata*, *Roxb. fl. ind.* 1, p. 624; *ed. Carey*, 2, p. 393.—*Senacia Nepalensis*, *DC. pr.* 1, p. 347.)
5. Peninsula of India, Nepal, Kheree Pass. alt. 2000 f. Fl. small, whitish, January and June; fr. April and September.
3. *Tobira*, Ait. (*DC. pr.* 1, p. 346; *Roxb. fl. ind.* 1, p. 631; *ed. Carey*, 2, p. 416; *B. M.* 34, t. 1396. ৫ Japan. Has not fl. here, though cultivated for more than twenty years.

BILLARDIERA, Sm. (*DC. pr. 1, p. 345.*)

ORDER XVII.—OLACACEÆ, Lindl. *Nat. Syst. p. 32.*

Trees or shrubs, sometimes climbing of 12 genera, containing about 29 species: 3 from New Holland; 2 are common to several countries; 1 from Martinique; 1 from Guiana; 1 from Guinea; 1 from Jamaica; 2 from Madagascar; 1 from Mauritius; and 17 from the E. Indies. Of the latter, which chiefly inhabit the Peninsula of India, but of which species are also found in Lower Bengal, Chittagong, Silhet, the Khassy Mountains, Ceylon and Java, 10 belong to *Olax*; 1 to *Ximenia*; 1 to *Opilia*; 1 to *Stemonurus*; 3-4 to *Gomphandra*; and 1 to *Balanites*.

With the exception of the wood of *Heistera coccinea*, Jacq. (*Partridge wood of the Cabinet-makers*), the properties of the order would seem to be unimportant.

OLAX, L. (*DC. pr. 1, p. 531;—W. and A. pr. 1, p. 88.*)

ORDER XIX.—CENOTHERACEÆ, (ONAGRACEÆ, Lindl. Nat.
Syst. p. 35.)

THE EVENING PRIMROSE TRIBE.

Shrubs or herbs, (annual or perennial) under 24 genera, (*Lindl. o. c. p. 523.*) amounting to about 252 species; viz. 80 from N. America; 60 from S. America; 28 from Mexico; 7 from the W. Indies; 14 from Europe; 1 from Siberia; 8 from S. Africa; 1 from Guinea; 2 from Senegal; 1 from Egypt; 1 from Madagascar; 1 from Mauritius; 2 from N. Zealand; 1 from N. Holland; 2 from Caucasus; 1 from Persia; and 28 from the E. Indies. Six are common to several countries, and of seven, the native places unknown.—Of the E. Indian species, 14 belong to *Epilobium*; (2 common to other countries); 7 to *Ludwigia*; 5 to *Jussiaea*; and 1 to *Vanhallia*. The Epilobiums are all Himalayan; the rest tropical.—Properties nearly unknown.

SUB-ORDER.—TRAPEÆ. (HYDROCARYES, Link.; Lindl. Nat. Syst. p. 36.)

THE WATER-NUT TRIBE.

Floating plants, of 1 genus, and 5 species: 1 from Europe and Siberia; 3 from the E. Indies; and 1 from China.

TRAPA, L. (DC. pr. 3, p. 63;—W. and A. pr. 1, p. 337.) Water Cal-trops.

1. *bispinosa*, L. (DC. l. c. p. 64;—W. and A. l. c.;—Roxb. Corom. 3, t. 234; fl. ind. 1, p. 428; ed. Carey, 1, p. 449;—J. Grah. Cat. B. pl. p. 75;—Rheed. 11, t. 33.) পানীফুল Panee-phul. সিঙ্গাৱা Singara. ⊖ Both Peninsulas of India, Bengal, (Serampore,) Nepal. Fl. smallish, white, May and June; fr. C. S.—Fruit sold in the bazar, and eaten by the Natives. In Guzerat it forms an important article of food. During the *Hooly* festival a red dye is made of it, mixed with a yellow dye procured from the flowers of *Butea frondosa*, Roxb.
2. *quadrispinosa*, Roxb. (Fl. ind. 1, p. 430; ed. Carey, 1, p. 451.) ⊖ Silhet. In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*) The Kernels of this species are also eaten by the Natives.

SUB-ORDER.—HALORAGEÆ, R. Br.—Lindl. Nat. Syst. p. 37.

Herbaceous, or more rarely shrubby plants, generally growing in damp places, ditches, and stagnant waters, occasionally on hills, of 10 genera, comprising 36 species: 7 N. American; 3 S. American; 2 European; 8 from New Holland and the South Sea Islands; 1 from Australasia; 2 from China and Japan; 1 from Bourbon; 2 from S. Africa; and 7 from India. Of the latter, 4 belong to *Myriophyllum*; 1 to *Haloragis*; and 2 to *Serpicula*.—We are not acquainted with the distribution of *Mejonectes*, R. Br.; *Rieseibachia*, Presl., and *Gongylocarpus*, Schlecht.—Properties unimportant.

MYRIOPHYLLUM, L. (DC. pr. 3, p. 68;—W. and A. pr. 1, p. 338.) Water-Milfoil.

1. *verticillatum*, L. (DC. l. c.;—Roxb. H. B. p. 12;—E. B. 4, t. 218.) ⊖ Europe, N. America, Bengal, (Serampore.) Fl. small, yellow, R. and C. S.; fr. C. S.
2. *indicum*, Willd. (DC. l. c.;—W. and A. pr. 1, p. 339.) ⊖ Ceylon, Coromandel, Bengal, (Serampore.) Fl. minute, R. S.; fr. C. S.
3. *tetrandrum*, Roxb. (Fl. ind. 1, p. 451; ed. Carey, 1, p. 470;—DC. pr. 3, p. 69;—J. Grah. Cat. B. pl. p. 76.) ⊖ Peninsula of India, Bengal, (Serampore.) Fl. minute, white, R. S.; fr. C. S.
4. *tuberculatum*, Roxb. (Fl. ind. 1, p. 451; ed. Carey, 1, p. 471.) ⊖ Bengal, (Serampore.) Fl. minute, bright red, R. and C. S.; fr. C. S.

ORDER XX.—COMBRETACEÆ, R. Br.—Lindl. Nat. Syst. p. 38.

THE MYROBALAN TRIBE,

Trees or shrubs, simple or climbing, of 22 genera, and about 140 species: 44 inhabiting S. America, Mexico, and the W. Indies; 6 Senegal;

15 Guinea ; 2 S. Africa ; 4 Madagascar ; 2 Bourbon and Mauritius ; 1 the Society Islands ; 2 China ; and 64 the E. Indies. Of the latter, 23 belong to *Terminalia* ; 25 to *Combretum* ; 2 to *Poivrea* ; 2 to *Getonia* ; 2 to *Quisqualis* ; 4 to *Anogeissus* ; 2 to *Lumnitzera* ; 1 to *Bobua* ; 1 to *Sphalanthus* ; 1 to *Ceratostachys* ; and 1 to *Agatisanthes*.

Astringency seems to be the chief characteristic of the order. *Bucida Buceras*, L. yields a bark, in the W. Indies employed for tanning. The same is the case in Brazil with the bark of *Laguncularia racemosa*, Gürtn. The seeds of a species of this tribe are recommended as an efficacious vermicifuge by Dr. Oxley of Malacca, who gives them pounded and mixed with a little jam or honey. "The dose," says he, "may be as large as you can get a child to take; but I believe four or five good nuts are sufficient. The natives sometimes eat them by handfuls, so they are perfectly harmless. I have known one dose discharge, without any other medicine given after it, twenty-nine lumbrici." (*Trans. med. and phys. soc. Calcutta*, vol. 7, p. 489.) Dr. Wallich who only saw the fruit, referred it to *Quisqualis indica*, L. To judge from a flowering branch, lately received from Dr. Oxley, of the plant in question, it is, however, a species of *Combretum*.

TERMINALIA, L. (*DC. pr. 3, p. 10*;—*W. and A. pr. 1, p. 312*.)

1. *angustifolia*, Jacq. (*DC. o. c. p. 11*;—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p. 69*;—*T. Benzoin*, L.—*Catappa Benzoin*, Gürtn. *fr. 2, t. 127.*) b. Peninsula of India. Fl. small, green, odoriferous, March and April. A milky juice flows out from this tree, which being fragrant on drying and resembling *Benzoin*, is used in Churches at the Mauritius as a kind of incense. (*Royle*.) Fruit used like that of *T. Chebula*.
2. *Catappa*, L. (*DC. pr. 3, p. 11*;—*W. and A. pr. 1, p. 313*;—*Roxb. fl. ind. 2, p. 430*;—*J. Grah. Cat. B. pl. p. 69*;—*B. M. 57, t. 3004*;—*Wight. icon. 1, t. 172.*—*T. moluccana*, Lam.—*DC. l. c. not Roxb.*—*Rheed. 4, t. 3-4*;—*Rumph. 1, t. 68.*) बादाम Badam Country Almond tree. L. b Moluccas. Both Peninsulas of India, Bengal, (Serampore.) Fl. small, purplish-green, H. S.; fr. R. S.—Wood good. Kernels (*Country Almonds*) palatable.
3. *procera*, Roxb. (*Corom. 3, t. 244*;—*fl. ind. 2, p. 429*;—*DC. pr. 3, p. 12.*) L. b Andaman Islands. Fl. small, white. In H. C. G., fl. Feb. and March; fr. R. S. (*Roxb.*)
4. *bialata*, Wall. (*Rept.*—*Pentaptera bialata*, Roxb. *fl. ind. 2, p. 441*;—*DC. pr. 3, p. 15.*) L. b Mountainous parts of India. Fl. small, greenish-yellow. In H. C. G. fl. H. S.; fr. Jan. and Feb.
5. *Bellerica*, Roxb. (*Corom. 2, t. 198*;—*fl. ind. 2, p. 431*;—*DC. pr. 3, p. 12*;—*W. and A. pr. 1, p. 313*;—*Wight. ill. 1, t. 91*;—*J. Grah. Cat. B. pl. p. 69*;—*Rheed. 4, t. 10.*) बहरा Buhura, L. b Peninsula of India, Goalparrah, Sukanaghur, Goruckpur, Dhomtola, Morung Mountains. Fl. small, greyish-green, offensively smelling. H. S.; fr. C. S.—Wood white, softish, durable, (*Roxb.*) Bark, when wounded, gives

out a large quantity of an insipid gum, resembling *Gum arabic*. Fruit (*Beleric myrobalans*) astringent, tonic. Kernels, tasting like filberts, eaten by the natives, and held to be intoxicating, when eaten in abundance. (Roxb.)

6. *moluccana*, Roxb. (*Fl. ind.* 2, p. 432; non Lam.) 5 Khassya Mountains, Assam, &c. Fl. small, dull yellowish brown, unpleasantly smelling. In H. C. G. fl. April and May; fr. March. α , *macrocarpa*, largish-fruited; β , *microcarpa*, small-fruited. Both kinds of fruit sold in the bazar under the name of बहरा (Buhura.)
7. *Chebulu*, Retz. (*DC. pr.* 3, p. 12;—*W. and A. pr.* 1, p. 313;—*Roxb. Corom.* 2, t. 197;—*fl. ind.* 2, p. 435;—*J. Grah. Cat. B. pl.* p. 69.) हारीतकी *Hareetukee*, L. 5 Both Peninsulas of India, Bengal, Monghir up to Lower Nepal. Fl. small, whitish, offensively smelling, H. S.; fr. Jan. and Feb.—Fruit, as well as the galls of this species, very astringent and much used by dyers. With alum they give a durable yellow, used on the Coromandel Coast by Chintz-painters, and with ferruginous mud an excellent black, employed by harness-makers for preparing ink, &c. (*Ainslie. Roxb.*) Unripe fruit, according to age, known under the name of *black*, *yellow* and *chebulic myrobalans*, and thought to be gently laxative. (Royle.)
8. *citrina*, Roxb. (*Fl. ind.* 2, p. 435;—*DC. pr.* 3, p. 12.—*Myrobalanus citrina*, *Gärtn. fr.* 2, p. 91, t. 97.) L. 5 Assam, Khassya Mountains, &c. Fl. small, yellowish. In H. C. G. fl. H. S.; fr. Jan. and Feb.—Wood very hard, shunned by insects. (Roxb.) Fruit used as that of *T. Chebula*.
9. *Fatrea*, DC. (*pr.* 3, p. 12.) 5 Madagascar. Introduced in 1840.
10. *Berryi*, W. and A. (*pr.* 1, p. 314.—*Pentaptera angustifolia*, Roxb. *fl. ind.* 2, p. 437;—*J. Grah. Cat. B. pl.* p. 69;—*DC. pr.* 3, p. 15.) L. 5 Peninsula of India. Balla-ghaut Mountains. Banks of the rivers Kalinadi and Gutpurba. In H. C. G. fl. April and May; fr. Dec. (Roxb.) Timber good.
11. *Arjuna*, W. and A. (*pr.* 1, p. 314, *ann.*—*Pentaptera Arjuna*, Roxb. *fl. ind.* 2, p. 438;—*DC. pr.* 3, p. 14;—*J. Grah. Cat. B. pl.* p. 69.) आर्जुन *Arjooni*, L. 5 Bengal, Jungles in the S. E. of Surat. Fl. small, greenish-white, April and May; fr. Dec.—Timber good.—Bark in great repute among the Natives as a tonic internally, and a vulnerary applied externally; it is sold by most Druggists. (Dr. Gibson.)
12. *crenulata*, W. and A. (*pr.* 1, p. 314.—*Pentaptera crenulata*, Roxb. *fl. ind.* 2, p. 438; not *DC.*) L. 5 Coromandel. In H. C. G. fl. H. S.; fr. C. S. (Roxb.) Timber good.
13. *glabra*, W. and A. (*pr.* 1, p. 314.—*Pentaptera glabra*, Roxb. *fl. ind.* 2, p. 440;—*DC. pr.* 3, p. 15.—*P. crenulata*, DC. *t. c.*—*P. obovata*, DC. *o. c.* p. 14.) L. 5 Peninsula of India, Monghir, Silhet, Rajmahl. In H. C. G. fl. H. S.; fr. C. S. (Roxb.) Timber good.

14. *tomentosa*, W. and A. (pr. I, p. 314;—*Wight. icon.* 1, t. 195. *Pentaptera tormentosa*, *Roxb. fl. ind.* 2, p. 440;—*DC. pr.* 3, p. 14;—*J. Grah. Cat. B. pl.* p. 69.) আশান *Ashan*. পিয়সাল *Piysahal*, L. b. Monghir, Rajmahl, Oude. Common on the Ghauts and in the Concans. Fl. small, greenish-white, April, May and June; fr. C. S. —Timber very valuable. Much used for making shafts of Gigs, and other things where toughness of fibre is required. (*Dr. Gibson.*) Bark astringent and dyeing black.
15. *coriacea*, W. and A. (pr. I, p. 315.—*Pentaptera coriacea*, *Roxb. fl. ind.* 2, p. 438;—*DC. pr.* 3, p. 15.) L. b. Mountains of Coromandel. Fl. small, dull yellow. In H. C. G. fl. H. S.; fr. C. S. (*Roxb.*) Wood strong, hard, heavy, made into solid wheels for buffalo carts. (*Dr. Berry.*)
16. *paniculata*, W. and A. (pr. I, p. 315.—*Pentaptera paniculata*, *Roxb. fl. ind.* 2, p. 442;—*DC. pr.* 3, p. 14;—*J. Grah. Cat. B. pl.* p. 70.) L. b. Courtallum. Malabar. Vallies of the Concan Rivers near their sources. Abounding in the jungles, S. E. of Surat. (*J. Grah.*) Fl. small. In H. C. G. fl. Nov. and Dec.; fr. May and June. (*Roxb.*) Timber good.
17. *gangetica*, Roxb. (*fl. ind.* 2, p. 437. T. [by a mistake] *bengalensis*, *DC. pr.* 3, p. 12.) হুর *Hur*. b. Banks of the Ganges. In H. C. G. fl. H. S.; fr. C. S. Fruit used like chebulic myrobalans.—This tree is not alluded to in Wall. Cat., and is only mentioned in Royle ill.
- GETONIA**, Roxb. (*DC. pr.* 3, p. 15;—*W. and A. pr.* 1, p. 315.)
1. *nutans*, Roxb. (*fl. ind.* 2, p. 428;—*DC. l. c.*) ৩ কি. Rajmahl. Fl. smallish, greenish, H. S.; fr. C. S.
- ANOGRISSEUS**, DC. (pr. 3, p. 16, under *Conocarpus*.—*Wall. Cat.*)
1. *latifolius*, Wall. (*Cat.*.—*Conocarpus latifolius*, *Roxb. fl. ind.* 2, p. 442;—*DC. o. c.* p. 17;—*W. and A. pr.* 1, p. 316;—*J. Grah. Cat. B. pl.* p. 70;—*Royle. ill. t.* 45, *f.* 1.) L. b. Chillaune, Islamabad, Kenergy jungles, Vallies of the Concan Rivers near their sources, Inland Deccan Hills, Deyra-Dhoon. Fl. small, pale greenish, Jan. and Feb.; fr. H. S. Timber good, durable, if kept dry. (*Roxb.*)
2. *acuminatus*, Wall. (*Cat.*.—*Conocarpus acuminatus*, *Roxb. fl. ind.* 2, p. 443;—*DC. pr.* 3, p. 17;—*W. and A. pr.* 1, p. 316.) L. b. Nopalry. Fl. small, pale-greenish, C. S.; fr. H. S. Timber good, durable, fit, like that of No. 1, for house-building. (*Roxb.*)
- POIVREA**, Commers. (*DC. pr.* 3, p. 17;—*W. and A. pr.* 1, p. 317.)
1. *Roxburghii*, DC. (*o. c.* p. 18;—*W. and A. l. c.* *Combretum decandrum*, *Roxb. Corom.* 1, t. 59;—*fl. ind.* 2, p. 232; not *Jacq.*) ৩ কি. Mountains of Coromandel, Khassya Mountains, Nepal, Sirmore. Fl. small, pale greenish, C. S.; fr. R. S.
2. *pilosa*, W. and A. (pr. 1, p. 317, *annot.*—*Combretum pilosum*, *Roxb. fl. ind.* 2, p. 231.) ৩ কি. Khassya Mountains, Assam. Fl. small, greenish-yellow, Feb. and March; fr. R. S.

COMBRETACEAE.

SL

3. *coccinea*, DC. (pr. 3, p. 18.—*Cristaria coccinea*, Sonner.—*Combretum coccineum*, Lam.—*C. purpureum*, Vahl.—*Roxb. fl. ind.* 2, p. 233;—*B. Reg.* 5, t. 429;—*B. M.* 46, t. 2102.) 5 ↗ Madagascar. Fl. smallish, crimson, C. S. but very rare; fr. O.

COMBRETUM, Lévl. (*DC. pr.* 3, p. 18;—*W. and A. pr.* 1, p. 317.)

1. *ovalifolium*, Roxb. (*fl. ind.* 2, p. 226;—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p.* 70.) 5 ↗ Tanjore, Elephanta, Jungly tracts of the Concan, Guzerat. Fl. small, yellowish-white. In H. C. G. fl. March and April; fr. R. S. (*Roxb.*)

A most splendid species. *C. comosum*, G. Don; B. Reg. 14, t. 1165. \S (Sierra Leona.

ORDER XXI.—ALANGIACEÆ, Lindl. Nat. Syst. p. 39.

Common in S. India, whence they extend along the Malayan Peninsula to Cochin-China, northward along the forest-clad base of the Himalaya, (Royle.) Only the following 4 species have as yet been discovered.

ALANGIUM, Lam. (DC. pr. 3, p. 203;—W. and A. pr. 1, p. 325.)

1. *decapetalum*, Lam. (DC. l. c.;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 72;—Wight. icon 1, t. 194.—A. hexapetalum, Roxb. fl. ind. 2, p. 502; not Lam.—A. tomentosum, Lam.—DC. o. c. p. 204;—Rheed. 4, t. 17.) बाघ-अङ्का Bagh-ankra. \S Coromandel, Cochin, Bombay, Guzerat, Malay Peninsula, Cochin-China, Assam, Khassya Mountains, &c. up to the base of the Himalaya. Fl. middle sized, whitish-yellowish, fragrant, H. S.; fr. R. S.—Wood beautiful, (Roxb.) Fruit edible, somewhat astringent.

STYLEDIUM, R. Br.

1. *begonifolium*, R. Br. (*S. chinense*, Lour.—*Marlea begonifolia*, Roxb. Cor. 3, t. 283;—fl. ind. 2, p. 261;—DC. pr. 4, p. 267;—B. Reg. 24, t. 61.) \S Assam, China, Khassya Hills, extending northwards beyond 30° of N. L. Fl. middle sized, white, with large yellow anthers, March and April; fr. July and August. Timber employed by the natives in the construction of their houses. (Roxb.)

2. *barbatum*, R. Br. \S Khassya Hills.

* *Alangium hexapetalum*, L. Wight. ill. 2, t. 96. \S . S. India, spreading up the Western bank of the Ganges to Allahabad. Khassya Mountains.

ORDER XXII.—RHIZOPHORACÆ, Lindl. Nat. Syst. p. 40.

(W. Griffith, On the family of Rhizophoracæ; in Trans. med. and phys. soc. Calcutta, vol. 8, p. 1—13. With a plate.—Arnott; in Ann. of nat. hist. 1, p. 359—374, incl. and in Wight, ill. 1, p. 207—211.)

THE MANGROVE TRIBE.

Trees, rarely shrubs, natives of salt swamps and marshes of the tropics, where they root in the mud, forming dense, most unhealthy jungles down

to the very edge of the ocean. There are 6 genera, 26 species; 2 of these are common to several parts of the world (*Rhizophora mucronata*, Lam., and *Ceriops Candollianus*, Arn.) 6 are found in America; 1 in Madagascar; 1 in New Holland; 1 in China; and 15 in the E. Indies. Of the latter, 1 belongs to *Rhizophora*; 1 to *Ceriops*; 1 to *Kandelia*; 8 to *Bruguiera*; and 4 to *Carallia*.—Properties unimportant.

RHIZOPHORA, Lam. (*Arn. l. c.*;—*Wight. l. c.* p. 209.)

1. *mucronata*, Lam. (*Arn. l. c.*;—*DC. pr.* 3, p. 32;—*Wight. icon* 1, t. 238;—R. Mangle, *L.?* ex pte.—*Roxb. fl. ind.* 2, p. 459;—R. Candelaria, *W. and A. pr.* 1, p. 310, not DC.;—and excl. syn. *Rheed.* and *Rumph.*;—*J. Grah. Cat. ORDER XXIII.—MEMECYLACEÆ.—Lindl. Nat. Syst. p. 40.

Fine shrubs, of 3 (5) genera, containing 36 species; 26 from the E. Indies; 3 from Mauritius and Bourbon; 1 from Madagascar; 2 from Brazil; 1 from Guiana; 1 from Mexico; 1 from the W. Indies; and 1, as to its native country, unknown. Of the E. Indian forms, 2 belong to *Scutula*, a genus nearly unknown; and 24 to *Memecylon*. Two of these have been found on the Khassy Mountains; the rest in the two Peninsulas of India, Ceylon, Java and Cochin-China. *Memecylon grande*, Retz. has been traced as far northwards as Monghir. We are unacquainted with *Guildingia*, Hook, and *Fenzlia*, Endl. Properties unimportant.

MEMECYLON, L. (DC. pr. 3, p. 5;—W. and A. pr. 1, p. 319.)

ORDER XXIV.—MELASTOMACEÆ, D. Don.—Lindl. Nat. Syst. p. 41.

Trees, shrubs, (rarely climbing,) or herbs, sometimes annual, in 1828, according to DC., under 69 genera amounting to 718 species; viz. 625 American; 18 African; 3 Chinese; and 72 E. Indian. According to Lindl. (o. c. p. 42-43,) the genera had, in 1836, risen to 93, containing, says Wight, at least 1000 species. The E. Indian forms, with the additions from Wallich's and Wight's herbaria, have now risen to 133; 2 of *Oxyspora*; 18 of *Sonerila*; 29 of *Osbeckia*; 1 of *Trislemma*; 72 of *Melastoma*; 1 of *Triplectrum*; 4 of *Pternandra*; 1 of *Medinilla*; 1 of *Sarcopyramis*; 1 of *Kibessia*; and 2 of *Astronia*. To these must, however, be added Blume's new genera: *Otanthera*, *Lachnopusidium*, *Pogonanthera*, *Allomorphia*, *Pachy-sentria*, *Ochthocharis*, *Dissochetia*, *Aplectrum*, *Marumia*, *Creochiton*, *Phyl-lagathis*, and *Ewyckia*. The number of their species we have not been able to ascertain, but Wight says, that if the other genera are somewhat in proportion to *Medinilla*, of which Java produces 21 species, Blume must nearly have doubled the Indian list of Melastomaceæ.

Far the greater part of the Indian forms are tropical, but few extending towards the Khassya Mountains and the foot of the Himalayas in Nepal. These are *Melastoma malabathricum*, L.; *M. normale*, Don.; *M. Wallichii*, DC.; *Oxyspora paniculata*, DC.; *Sonerila angustifolia*, Roxb.; *S. squarrosa*, Wall.; *S. tenera*, R. Br.; *S. arguta*, R. Br.; *S. maculata*, Roxb.; *Osbeckia angustifolia*, Don.; *O. nepalensis*, Hook.; *O. stellata*, Don.; *O. ternifolia*, Don.; *O. pulchella*, Benth.; *O. campestris*, Buch.; *O. longicollis* and *crinita*, Benth.; *O. nutans*, Wall.; *O. capitata*, Benth.; *Medinilla erythrophylla*, Lindl.; and *Sarcopyramis nepalensis* and *lanceolata*, Wall.

The order, “though one of the most extensive known, is entirely destitute of any unwholesome properties.” (Lindl.) Astringency is said to be its prevailing character.

ORDER XXV.—MYRTACEÆ, R. Br.—*Lindl. Nat. Syst.* p. 43.

THE MYRTLE TRIBE.

Trees or shrubs, of 45 genera, amounting to 670 species, the greatest number of which belong to S. America, New Holland and the South Sea Islands and the E. Indies. The latter contain, according to our materials, about 131 forms; viz. 2 of *Melaleuca*; 3 of *Metrosideros*, (Roxb.); 1 of *Fabricia*, (Roxb.); 1 of *Bäckea*; 3 of *Sonneratia*; 1 of *Nelitris*; 1 of *Psidium*; 1 of *Jossinia*?; 1 of *Myrtus*; 1 of *Monoxera*; Wight, (*Myrtus spectabilis*, Bl.); 110 of *Eagenia*, (Wight. *ill. 2*, p. 13;) —, of *Rhadamnia*; 2 of *Glaphyria*, and 2 of *Myrtus*? Wall. Three have been found in Cochin-China, but are nearly unknown; 14 in Madagascar, Bourbon, Mauritius, and the Sechelles; 2 in Guinea and Senegal; 3 in S. Africa, (Harvey); and 1 (*Myrtus communis*, L.) in S. Europe.—*Bäckea frutescens*, L., a Chinese shrub has been discovered on Mount Ophir, near Malacca, by Dr. Oxley.

"The pellucid dotting of the leaves and other parts indicates the presence of a fragrant aromatic or pungent volatile oil, which gives the principal quality to the produce of the order." (Lindl.) The properties of the Indian Myrtaceæ will be adverted to under the different species.

TRISTANIA, R. Br. (*Hort. Kew. ed. alt. 4*, p. 417;—*DC. pr. 3*, p. 210.)

1. *megaphylla*, Cunningham. 5 Australasia, C. S. 1839.

1. *Cajuputi*, Roxb. (*Fl. Ind. 3*, p. 394;—*W. and A. l. c.*—*M. minor Sm.*;—*DC. o. c. p. 212.*) 5 Moluccas, &c. Fl. small, white, especially C. S.—Yields the well-known *Cajuputi-oil*.

2. *Leucadendron*, L. (*DC. pr. 3*, p. 212;—*Roxb. fl. ind. 3*, p. 397;—*Rumph. 2, t. 16.*) 5 Moluccas, Malacca. Fl. small, white, C. S.; fr. H. S.

3. *nodosum*, Sm. (*Exot. bot.—Ait. Hort Kew. ed. alt. 4*, 413.) N. Holland, December 1839.

CALLISTEMON, R. Br. (*DC. pr. 3*, p. 222.)

1. *linearis*, DC. (*I. c.*—*Metrosideros linearis*, Sm.;—*Roxb. fl. ind. 2*, p. 479.) 5 N. Holland. Fl. small, greenish, April and May; fr. Feb. and March.

2. *lophanthus*, Swt. (*G. Don. Mill. dict.* 2, p. 822.—*C. salignus*, Sims.;—*B. M.* 43, t. 1821, not DC.) 5 N. Holland. Has been introduced into H. C. G. Fl.?

METROSIDEROS, Rumph. (*DC. pr.* 3, p. 224.)

1. *verus*, Rumph. (*Herb. amb.* 3, t. 7.—*DC. l. c.*;—*Roxb. fl. ind.* 2, p. 477.) 5 Amboinia, Java. Fl. small, white, H. and R. S.; fr. Sept. and Oct.

NELITRIS, Gärtn. (*DC. pr.* 3, p. 231.)

1. *paniculata*, Lindl. (*DC. l. c.*—*N. polygama*, *Spreng.*—*Eugenia polygama*, *Roxb. fl. ind.* 2, p. 491.) 5 Penang. Has been introduced into H. C. G.?

PSIDIUM, L. (*DC. pr.* 3, p. 232;—*W. and A. pr.* 1, p. 328.) *Guava tree.*

1. *pumilum*, Vahl. (*DC. l. c.*;—*W. and A. l. c.*;—*P. Cujavillus*, *Burm. Rumph.* 1, t. 49.) 5 Ceylon, Moluccas. Fl. middle-sized, white, fragrant, March; fr. R. S., delicious.

2. *pyriferum*, L. (*DC. pr.* 3, p. 333;—*W. and A. l. c.*;—*Roxb. fl. ind.* 2, p. 480;—*J. Grah. Cat. B. pl.* p. 72;—*B. Reg.* 13, t. 1079;—*Rheed.* 3, t. 34;—*Rumph.* 1, t. 47.) 5 W. Indies, Tropical S. America. Domesticated in India. *পেয়ারা* *Peyara*. Fl. largish, white, sweetish scented, H. S.; fr. R. S.

3. *pomiferum*, L. (*DC. pr.* 3, p. 334;—*W. and A. pr.* 1, p. 328;—*Roxb. fl. ind.* 2, p. 480;—*J. Grah. Cat. B. pl.* p. 72;—*Rheed.* 3, t. 35;—*Rumph.* 1, t. 48.) *লালপেয়ারা* *Lal-peyara*. 5 W. Indies, Mexico. Tropical S. America. Domesticated in India. Fl. largish, white, sweetish scented, H. S.; fr. R. S.

4. *guineense*, Swz. (*DC. pr.* 3, p. 235.) 5 W. Indies, introduced, it is said, from Guinea. Fl. small, white, H. S.; fr. R. S. *Fruit* of a fine flavour, fulvous, red inside.

5. *polycarpon*, Lamb. (*DC. pr.* 3, p. 235;—*B. Reg.* 8, t. 653.) 5 Trinidad.—Introduced into H. C. G.—Fl. ? *Fruit* about the size of a plum, yellow inside, of a delicate taste.

JOSSINIA, Commers. (*DC. pr.* 3, p. 337.)

1. *buxifolia*, (*DC. o. c.* p. 338.—*Eugenia buxifolia*, *Lam.*) 5 Bourbon.—Introduced into H. C. G. Fl.?

MYRTUS, L. (*DC. pr.* 3, p. 238;—*W. and A. pr.* 1, p. 328.)

1. *communis*, L. (*DC. o. c.* p. 239;—*Roxb. fl. ind.* 2, p. 497;—*J. Grah. Cat. B. pl.* p. 73.) *Common Myrtle*. *বিলতি মেন্দী* *Bilati-mendee*. 5 S. Europe. Common in gardens. Fl. smallish, white, fragrant, H. S.; fr. o. Used as a hedge-plant in Egypt. (*Macculloch.*) *Berries* eaten in Syria.

2. *tomentosa*, Ait. (*DC. pr.* 3, p. 240;—*W. and A. pr.* 1, p. 328;—*Roxb. fl. ind.* 2, p. 498;—*B. M.* 7, t. 250.—*M. canescens*, *Lour.*; *Roxb. l. c. excl. No. 3.*) 5 China, Cochin-China, Neelgherries, Penang, Singapore. Fl. large rose-coloured, with crimson filaments.—Introduced into H. C. G. in 1798; but had not fl. up to 1814. *Berries* eaten on the Neelgherries.

3. *melastomoides*, Cunningham, 5 Moreton Bay:PIMENTA, Lindl. (*Loud. encyc. l. c. Wight. ill. 2, p. 13.*)

1. *vulgaris*, Lindl. (*Loud. encyc. l. c. Wight. ill. 2, p. 13.*) — Eugenia Pimenta, DC. pr. 3, p. 285, α . *longifolia*. Myrtus Pimenta, L. α *longifolia*, Roxb. H. B. p. 37; B. M. 30, t. 1236.) β Jamaica, &c. Fl. small, white, March and April; fr. July and August. The dried fruit of this tree is imported into Europe from the W. Indies in large quantities, and sold in shops under the name of Allspice or Jamaica Pepper. Leaves aromatic.
2. *acris*, Wight. (*Ill. 2, p. 13.* Eugenia acris, W. and A. pr. I, p. 331;—J. Grah. Cat. B. pl. p. 74.—E. Pimenta, DC. pr. 3, p. 285. β *ovalifolia*.—Myrtus Pimenta, L. β *latifolia*, Roxb. H. B. p. 37.—Myrcia acris, DC. pr. 3, p. 243;—B. M. 59, t. 3153.—M. pimentooides, DC. l. c.) β Jamaica, &c. Fl. small, white, March and April; fr. July and August.—*Wild Cinnamon* or *Wild Clove-tree*. Timber hard, red and heavy, capable of being polished and used for mill-cogs and other purposes, where much friction is to be sustained. Bark brown, then ash-coloured, finally white, astringent, somewhat aromatic. Leaves sweetly aromatic, agreeably astringent, often used in sauce. Berries aromatic, agreeable for culinary purposes. (*Lunan. Hort. Jamaica.*)

EUGENIA, L. (*Wight. ill. 2, p. 12.*)Sub-genus I.—*Eueugenia*, Wight. (o. c. p. 13.)

1. *bracteata*, Roxb. (fl. ind. 2, p. 490;—DC. pr. 3, p. 264;—W. and A. pr. I, p. 331.—E. zeylanica, Roxb. l. c., not Willd.) हिजलिमेन्डी *Hijolee-mendee*. ५ Ceylon, Peninsula of India. Fl. as large as those of the common myrtle, white; and fr. throughout the year.
2. *Michelii*, Lam. (*DC. pr. 3, p. 263.*—Plinia pedunculata, L. fil.;—B. M. 14, t. 473.) ५ Brazil. Fl. small, white, fragrant, H. S.; fr. R. S.

Sub-genus II.—*Jambosa*, DC. (*Wight. ill. 2, p. 14.*)

M. 61, t. 3356;—Rheed. 1, t. 17.) গোলাব জাম *Golab-jam*. Rose apple. β . Both Peninsulas of India, Bengal, Sirmore. Cultivated.—Fl. large; greenish-white, Feb.; fr. R. S.
4. *aqua*, Roxb. (*Wight. ill. 2, p. 14;—Roxb. fl. ind. 2, p. 492.*—*Jambosa aqua*, DC. pr. 3, p. 288;—W. and A. pr. I, p. 332;—*Wight. icon. 1, t. 216*;—*Rumph. 1, t. 38, f. 2, and t. 39?*) জামুর *Jambo*. β Moluccas. Cultivated. Fl. large, greenish-white, H. and R. S.; fr. R. S. Fruit somewhat aromatic.
 α , *rhodocarpa*. Fruit rose-coloured.
 β , *leucocarpa*. Fruit white.
5. *lanceæfolia*, Roxb. (*Fl. ind. 2, p. 494.*) L. β Silhet. Fl. middle-sized, white, Nov.; fr. Feb.
6. *malaccensis*, L. (*Wight. ill. 2, p. 14;—Roxb. fl. ind. 2, p. 483.*—Jam-

- bosa malaccensis, DC. pr. 3, p. 286;—W. and A. pr. 1, p. 332;—J. Grah. Cat. B. pl. p. 74.—J. purpurascens, DC. t. c. excl. syn. Roxb.—J. domestica, DC. o. c. p. 288.—Rheed. 1, t. 18;—Rumph. 1, t. 37, and t. 38, f. 1.) मालाकाअम्रूल Malaka-amrool. 5 Moluccas. Cultivated. Fl. large crimson, H. S.; fr. R. S.
7. *purpurea*, Roxb. (Wight. ill. 2, p. 14;—Roxb. Fl. ind. 2, p. 483.—Jambosa purpurea, W. and A. pr. 1, p. 333, annot.) 5 Malay Islands. Fl. large, purple, H. S.; fr. R. S.
8. *ternifolia*, Roxb. (Wight. ill. 2, p. 14;—Roxb. Fl. ind. 2, p. 489.) L. 5 Chittagong. Fl. large; white or red, April; fr. June and July.
9. *amplexicaulis*, Roxb. (fl. ind. 2, p. 483;—Wight. ill. 2, p. 14.—Jambosa amplexicaulis, DC. pr. 3, p. 287.) L. 5 Chittagong. Fl. middle-sized, greenish-white. In H. C. G. fl. and fr. at different periods through the year. (Roxb.)
10. *alba*, Roxb. (Fl. ind. 2, p. 493;—Wight. ill. 2, p. 14.—Jambosa alba, W. and A. pr. 1, p. 332.—J. macrophylla, DC. pr. 2, p. 286. excl. syn. Lam. and Rumph.) आम्रूल Amrool. 5 Malay Islands. Cultivated. Fl. largish, greenish-white, H. and R. S.; fr. R. S.
11. *polypetala*, Wall. Cat. (Wight. ill. 2, p. 14.—E. angustifolia, Roxb. fl. ind. 2, p. 490; not Lam.) 5 Chittagong, Silhet.—In H. C. G. fl. H. S.; fr. R. S.
12. *laurifolia*, Roxb. (Fl. ind. 2, p. 489;—Wight. ill. 2, p. 14.—Jambosa laurifolia, DC. pr. 3, p. 287.) 5 Native Place? Fl. white, H. S.; fr. R. S.

Sub-genus III.—*Caryophyllus*, L. (Wight. ill. 2, p. 14.)

13. *caryophyllata*, Thunb. (Roxb. fl. ind. 2, p. 495.—Caryophyllus aromaticus, L.;—DC. pr. 3, p. 262;—B. M. 54, t. 2749-50.—Myrtus Caryophyllus, Spreng.;—Rumph. 2, t. 1, 2, 3.) लुवुंगा Luwunga. Clove-tree. 5 Moluccas. Cultivated in Ceylon, the Southern parts of India, the Malayan Peninsula, Mauritius, Bourbon, Cayenne, &c. In Royle's ill^{ns}. it is said, that the Clove-tree grows freely in H. C. G.; this is a mistake. It has not only not flowered in lower Bengal, but can scarcely be kept alive throughout the year.

Sub-genus IV.—*Acmena*, DC. (Wight. ill. 2, p. 14.)

14. *claviflora*, Roxb. (Fl. ind. 2, p. 488;—Wight. ill. 2, p. 15.—Syzygium claviflorum, Wall. Cat.) L. 5 Chittagong. In H. C. G. fl. Feb. and March; fr. May and June. (Roxb.)
15. *oblata*, Roxb. (Fl. ind. 2, p. 493;—Wight. ill. 2, p. 15.—Syzygium oblatum, Wall. Cat.) 5 Chittagong. In H. C. G. fl. March; fr. June and July. (Roxb.)
16. *pulchella*, Roxb. (Fl. ind. 2, p. 496.—Syzygium pulchellum, Wall. Cat.) 5 Molucca Islands, Penang, Amherst, Tavoy, Moulmein. Fl. small, greenish white, March and April; fr. R. S.

Sub-genus V.—*Syzygium*, Gürtn. (Wight. ill. 2, p. 15.)

17. *myrtifolia*, Roxb. (H. B. (1814,) p. 37.—Fl. ind. 2, p. 490;—

- Wight, ill. 2, p. 15, not DC. (1828.) *Syzygium myrtifolium*, DC. pr. 3, p. 261.) 5 Sumatra, Singapore. Fl. very small, greenish-white, somewhat sweet-scented, March and April; fr. May and June.
18. *oleina*, Wight. (Ill. 2, p. 15.—*Syzygium oleinum*, Wall. MSS.) In H. C. G.
19. *Jambolana*, Lam. (Wight, ill. 2, p. 16;—Roxb. fl. ind. 2, p. 484.—*Syzygium Jambolana*, DC. pr. 3, p. 269.—W. and A. pr. 1, p. 329;—J. Grah. Cat. B. pl. p. 73.—*S. caryophyllifolium*, DC. o. c. p. 270.—*Eugenia obtusifolia*, Roxb. o. c. p. 485.—*E. caryophyllifolia*, Lam. not Roxb.;—Rheed. 5, t. 29;—Rumph. 1, t. 42.) कालोजाम *Kalo-jam*, L. 5 Moluccas, Peninsula of India, Bengal, (Serampore,) Kemaon, &c.—Fl. small, white, March; fr. July and August. Wood hard, close-grained, durable. Bark strongly astringent, dyes excellent durable browns of various shades, according to the corrosive employed or the strength of the decoction. Fruit subacid, astringent, eatable. (Roxb.)
20. *caryophyllifolia*, Roxb. (fl. ind. 2, p. 486; not Lam.) छोटोजाम *Chhoto-jam*. L. 5 Bengal, (Serampore,) &c. Fl. small, white, March and April; fr. May and June. Wood whitish, strong, close-grained, hard and durable. (Roxb.) Fruit unpleasantly acid, astringent, not eaten by the natives.
21. *fruticosa*, Roxb. (fl. ind. 2, p. 487;—Wight, ill. 2, p. 16.—*Syzygium fruticosum*, DC. pr. 3, p. 260.) 5 Chittagong. Fl. small, white, Dec.; fr. H. S.
22. *balsamea*, Wall. (MSS. 1836;—Wight, ill. 2, p. 16; not E. balsamica, Jacq.—*Syzygium balsameum*, Wall. Cat.) 5 Assam. Fl. small, white, H. S.; fr. R. S.
23. *operculata*, Roxb. (fl. ind. 2, p. 486;—Wight, ill. 2, p. 16.—*Syzygium nervosum*, DC. pr. 3, p. 260.) 5 Moluccas. Fl. very small, white, March and April; fr. May and June.
24. *tetragona*, Wight. (Ill. 2, p. 16.—*Syzygium tetragonum*, Wall. Cat.) 5 Silhet. In H. C. G.
25. *rubens*, Roxb. (fl. ind. 2, p. 496;—Wight, ill. 2, p. 17.) L. 5 Chittagong. In H. C. G.?
26. *inophylla*, Roxb. (fl. ind. 2, p. 496;—Wight, ill. 2, p. 17.—*Syzygium inophyllum*, DC. pr. 3, p. 260.) 5 Sumatra. In H. C. G.?
27. *grandis*, Wight. (Ill. 2, p. 17.—*E. cymosa*, Roxb. fl. ind. 2, p. 462, not Lam.) L. 5 Silhet. In H. C. G. fl. Dec. Timber very useful. (Roxb.)
28. *lonchophylla* (E. lanceolaria, Roxb. fl. ind. 2, p. 494; not E. lanceolata, Roxb.; nor lanceolata, Lam. nor lancea, Poir.) L. 5 Silhet. In H. C. G. fl. April and May. (Roxb.)
29. *acuminata*, Roxb. (H. B. 1814, p. 37; fl. ind. 2, p. 492; not Link.) 5 Moluccas.—In H. C. G. fl. March; fr. June and July. (Roxb.)

30. *brachiata*, Roxb. (*fl. ind.* 2, *p.* 488.) 5 Moluccas. In H. C. G. fl. May; fr. July. (*Roxb.*)
31. *venusta*, Roxb. (*fl. ind.* 2, *p.* 491.) 5 Tippera. Introduced into H. C. G. before 1814. Fl.?
32. *macrocarpa*, Roxb. (*fl. ind.* 2, *p.* 497.) 5 Chittagong. Introduced into H. C. G. in 1811. Fl.?

Common Pomegranate Tree. 5 N. Africa. Cultivated in India. Fl. large, scarlet and fr. at different periods of the year.—The roots of this tree were already known in the time of Celsus as a remedy against worms, but have since 1804 performed such wonders in this respect, that they may almost be considered specific against tape-worms; two ounces of the bark of the dried root, cut into pieces, are boiled in a pint and a half of water till half a pint remains, four table spoonfuls of the strained decoction are then given (to grown-up persons) every half hour, till general discomfort is produced, when the worms soon appear.—To infants it has been found preferable to give, twice a day, half a tea spoonful of the expressed juice of the young roots, mixed with a table spoonful of curds (দই) and a little sugar, till the worm is expelled. The flowers and the rind of the fruit are tonic and astringent, and as well as a decoction of the bark of the root, used in dysenteric and other affections of the bowels. (*Trans. med. phys. soc. Calcutta*, vol. 1, *p.* 363-64. β , *flore pleno*. Flowers double.)

2. *nana*, L. (*DC. pr.* 3, *p.* 4;—*B. M.* 17, *t.* 634.) 5 W. Indies, Guiana. Fl. large, scarlet, nearly throughout the year.

SUB-ORDER?—BARRINGTONIEÆ, DC.—Lindl. Nat. Syst. p. 46.

With the exception of one perennial herb,—trees, of 7 genera, and 19 species: 9 S. American; 9 E. Indian; and 1 from the Mauritius. The latter forms the genus *Foetidia*. Of the former, 7 belong to *Gustavia*; 1 to *Catinga*; and 1 to *Coupoia*; and of the E. Indian species, 5 are ranged under *Barringtonia*; 3 under *Careya*; and 1 under *Gustavia*.—Properties unimportant.

BARRINGTONIA, Forst. (DC. pr. 3, p. 288;—W. and A. pr. 1, p. 333.)

1. *speciosa*, L. (DC. l. c.;—W. and A. l. c.;—Roxb. fl. ind. 2, p. 636;—Rumph. 3, t. 114,) L. 5 Moluccas, Java, Penang, Singapore, &c. Fl. largish, deep rose-coloured, H. S. Seeds, mixed with bait, inebriate fish.
2. *racemosa*, Roxb. (fl. ind. 2, p. 634;—DC. pr. 3, p. 288;—W. and A. pr. 1, p. 333;—J. Grah. Cat. B. pl. p. 74;—B. M. 67, t. 3813;—Wight. icon. 1, t. 152;—Rheed. 4, t. 6.) Fl. largish, white, with a tinge of rose, May; fr. Nov. L. 5 Soonderbuns, Coromandel, Penang, Concan, &c.
3. *acutangula*, Gürn. (W. and A. pr. 1, p. 333;—Roxb. fl. ind. 2, p. 635;—J. Grah. Cat. B. pl. p. 74.—Stravadium rubrum and coccineum, DC. pr. 3, p. 289;—Rheed. 4, t. 7;—Rumph. 3, t. 116?) इक्कु
Hijul, L. 5 Both Peninsulas of India, Bengal, (Serampore,) Morung, Saharunpore. Fl. smallish, reddish-white, with scarlet filaments, April and May; fr. C. S.

CAREYA, Roxb. (DC. pr. 3, p. 295;—W. and A. pr. 1, p. 334.)

1. *herbacea*, Roxb. (DC. l. c.;—Roxb. Corom. 3, t. 217;—fl. ind. 2, p. 638.) भूइजानिम् Bhooi-dalim. 2. Interior of Bengal. Fl. large, reddish greenish-white, Feb. and March; fr. June and July.

52

LECYTHIDACEÆ—PHILADELPHACEÆ.

CSL

2. *sphaerica*, Roxb. (*fl. ind.* 2, p. 636,) L. b. Mountains of Chittagong. Fl. large, greenish-white, with some deep red filaments, April; fr. July.
3. *arborea*, Roxb. (*Corom.* 3, t. 218; *fl. ind.* 2, p. 638;—*DC. pr.* 3, p. 295;—*W. and A. pr.* 1, p. 334;—*J. Grah. Cat. B. pl.* p. 74;—*Wight. ill.* 2, p. 99 and 100;—*Rheed.* 3, t. 36.) Both Peninsulas of India, extending as far north as the Jumna, along the foot of the Himalayas. L. b. Fl. large, greenish-white, March; fr. July.

Foetidia, Commers. (*DC. pr.* 3, p. 295.)

1. *mauritiana*, Lam. (*DC. L. c.*;—*J. Grah. Cat. B. pl.* p. 73.) b Mauritius, where it is called “*bois puant*.” Fl. pale greenish, largish, with white filaments, fragrant, R. and C. S.; fr. 0.

* *Gustavia augusta*, L. 5 Surinam. *G. speciosa*, DC. 5 New Granada.

ORDER XXVI.—LECYTHIDACEÆ, Lindl. Nat. Syst. p. 46.

Large trees, of 6 genera, containing 27 species, all natives of the hottest parts of S. America, especially of Guiana and Brazil.

* *Lecythis ollaria*, L. b “The most gigantic tree in the ancient forests of Brazil.” (Lindl.)—*L. minor*, Jacq. b Carthagena. Fl. large, white, fragrant.—*Bertholletia excelsa*, H. and Bonpl. b S. America; cultivated in Brazil and Guiana. “The well known Brazil nuts of the shops of London, are the seeds of this tree.” (Lindl.)—*Couroupita guianensis*, Aubl. B. M. 59, t. 3158-9. This ever-flowering, most magnificent tree, a native of the forests near Cayenne, is cultivated successfully in St. Vincent. We have no tree in this country to rival its beauty.

ORDER XXVII.—PHILADELPHACEÆ, Lindl. Nat. Syst. p. 47.

THE SYRINGA TRIBE.

Deciduous shrubs, arranged under 3 genera, containing 18 species: 11 from N. America; 5 from the Himalayas; 1 from S. Europe, and 1 from Japan. The Indian forms are, 2 of *Philadelphus*, and 3 of *Deutzia*. Properties unknown.

PHILADELPHUS, L. (*DC. pr.* 3, p. 205.)

1. *coronarius*, L. (*DC. l. c.*;—*B. M.* 11, t. 391.) Common *Philadelphus*; *Mock Orange*. 5 S. Europe. Fl. large, cream-coloured, fragrant; March; but only once.

* *Decumaria barbara*, L. 5 S. Carolina.

ORDER XXVIII.—HAMAMELIACEÆ, Lindl. Nat. Syst. p. 48.

THE WITCH-HAZEL TRIBE.

Shrubs, seldom trees, of seven genera, containing nine species: 2 N. American; 1 S. African; 1 from Madagascar; 1 Persian; 1 Chinese; 1 Japanese; and 2 from the Khassy Mountains and Upper Assam. The latter *Bucklandia populnea*, R. Br. and *Liquidambar cerasifolia*, Griff. (*Sedgwickia cerasifolia*, Wall. et Griff.) Properties unknown.

BUCKLANDIA, R. Br. (*Wall. Cat.*;—*W. Griffith, As. Res.* 19, pt. 1, p. 94.)

1. *populnea*, R. B. (L. c. Griff. l. c.) L. 5 Khassy Mountains, from Cherra Poonjee to Surureem. Fl. small, greenish. Has been introduced into H. C. G. Fl.?

* *Hamamelis chinesis*, R. Br. 5 Nankin, Chusan.—*Dicoryphe stipulacea*, Jaum. 5 Madagascar.

ORDER XXIX.—CORNACEÆ, Lindl. Nat. Syst. p. 49.

THE DOGWOOD TRIBE.

Trees or shrubs, seldom herbs, of 6 genera and 28 species: 8 from N. America; 3 from Europe and N. Asia; 4 from Mexico; 2 from Japan; 1 from Guiana; 2 unknown, as to their native place; 3 from Nepal; and 5 from Java. Of the E. Indian forms, 2 belong to *Cornus*, 1 to *Benthamia*, and 2 to *Mastixia*. Properties of little importance.

AUKURA, Kämpf. (*DC. pr.* 4, p. 274.)

1. *japonica*, Thunb. (*DC. l. c.*;—*B. M.* 30, l. 1197.) 5. Japan.—Has not fl.

* *Votomita guienensis*, Aubl. 5. French Guiana.

ORDER XXX.—LORANTHACEÆ, Lindl. Nat. Syst. p. 49.

Parasitical undershrubs, arranged, according to Lindl., under 12 genera, and, as far as we can judge from DC. (*Pr.* 4, p. 277, &c. with add.), W. and A. (*Pr.* 1, p. 379, &c.) and Wight. (*Ill.* p. 67,) containing 338 species (upwards of 400, *Wight.*)—all referred by DC. to four genera. 186 species have been found in S. America, Mexico and the W. Indies; 103 in the E. Indies; 15 in S. Africa, (*Harvey*); 3 in Mauritius and Bourbon; 9 in New Holland and the South Sea Islands; 7 in Guinea and Senegal; 4 in N. America; 3 in Abyssinia; 2 in Europe; 2 in Japan; 1 in Madagascar; 1 near Tiflis; 1 in China; and 1 in Caramania. Of the Indian forms, 22 belong to *Viscum*; 78 to *Loranthus*; and 2 to *Schöpfia*, chiefly inha-

biting Java, the mountains of the two Peninsulas of India, the Khassya Mountains, and Nepal. A few only have been found in Lower Bengal, Ceylon, and Luzon. Properties nearly unknown.

Several species of *Loranthus* have been introduced into H. C. G. as well as here, but they have not succeeded.

LORANTHUS, L. (*DC. pr. 4, p. 286;—W. and A. pr. 1, p. 381.*)

1. *longiflorus*, Desr. (*DC. o. c. p. 304;—W. and A. o. c. p. 384;—Wight icon. 1, t. 302;—Roxb. fl. ind. ed. Carey, 2, p. 217.*) *L. bicolor*, Roxb. *Corom.* 2, t. 139;—*fl. ind.* 1, p. 548, and 2, p. 185; *ed. Carey*, 2, p. 205;—*DC. o. c. p. 307;—Rheed.* 10, t. 4.) बुरुमाना *Burumunda*. Parasitic. ३ Peninsula of India, Bengal. (Serampore.) &c. Fl. large, greenish orange-scarlet, and fr. nearly throughout the year.
2. *globosus*, Roxb. (*fl. ind. 1, p. 550, and 2, p. 187; ed. Carey, 2, p. 206;—DC. pr. 4, p. 297. excl. syn. Rheed.*) छोटमाना *Chhoto-munda*. Parasitic. ५ Bengal. (Serampore.) Fl. small, greenish-orange, and fr. nearly the whole year.

ORDER XXXI.—CUCURBITACEÆ.—Juss. Lindl. Nat. Syst. p. 51;
(partly) Wight. ill 2, p. 24—33.

THE GOULD TRIBE.

Annual or perennial, climbing or creeping herbs, rarely undershrubs, chiefly natives of hot countries in both hemispheres, ranged by Meissner under 35, by Endlicher under 28 genera. Of species, DC. (1828) assigns for S. America, Mexico and the W. Indies 40; for N. America 5; Europe 4; Egypt and Arabia 7; Senegal 2; Abyssinia 1; Tunis 1; Guinea 3; Mozambique 1; Astrachan 1; Persia 1; Levant 2; Canaries 3; China and Japan 5; and the Society Islands 1. The S. African forms amount to 15, (*Harvey*), and those of unknown origin to as many. In the E. Indies have been discovered about 130 species; viz. 1 of *Bryonopsis*; 4 of *Achmandra*; 1 of *Melothria*? 1 of *Pilogyne*; 2 of *Zehneria*; 2 of *Karivia*; 1-2 of *Mukia*; 31 of *Bryonia*; 2 of *Citrullus*; 12 of *Momordica*; 16 of *Luffa*; 1 of *Benincasa*; 1 of *Lagenaria*; 25 of *Trichosanthes*; 2 of *Gymnopetalum*; 12 of *Cucumis*; 4 of *Cucurbita*; 1 of *Coccinia*; 2 of *Sicyos*; 1 of *Erythropalum*; and 1 of *Herpetospermum*. To these must, however, be added about 20 species (including common forms), enumerated by Blume since 1828. DC. then assigned to this author 26, but Wight (*Ill. 2, p. 26.*) now informs us that Blume in all, enumerates 46 Javanese species; thus increasing the E. Indian Cucurbitaceæ to 160. The generic distribution of his additions we are not acquainted with.

"Acrimony and drastic tendency pervade many species, the fruit of some of which" (f. ex. the Colocynth,) "afford cathartics of remarkable power, acting, in even small doses, with great energy on nearly the whole line of

the alimentary canal. This intensity of power is, however, of rare occurrence, though the property is found more or less active in every part of the plants, mildly in the roots of some, and the leaves and young shoots of others, but in greatest intensity in the pulp surrounding the seed. The seeds themselves do not partake of this property, being nearly all mild and oily. There is reason to believe that some at least, if not all of the edible sorts, owe their freedom from this property to cultivation, as some of them in their wild state are found to possess it in great intensity. The fruit of many of the species of *Cucumis*, are powerfully cathartic, among which *C. Hardwickii* and *Pseudo-Colocynthis*, Royl., may be mentioned as the chief ones, but even the common Cucumber, especially the less highly cultivated varieties of this country, are sometimes known to prove strongly aperient in susceptible constitutions. But of all those yet mentioned, none approach the *Elaterium* (Spirting Cucumber) in the concentrated virulence of this quality, a few grains of the pulp being known occasionally to bring on symptoms of poisoning. Notwithstanding these drawbacks this is certainly a most useful family of plants, owing to the great size of their fruit, and the large quantity of nutritious matter which the edible sorts afford, and which on that account are extensively cultivated in every part of India. Those unfit for food, supply many useful medicines; but even the best known ought to be used cautiously when not ameliorated in their qualities by cultivation." *Wight. ill. 2, p. 26-27.*

KARIVIA, Arn. (*Wight. ill. 2, p. 30.*)

1. *umbellata*, Arn. (*I. c.*—*Bryonia umbellata*, *Klein*;—*DC. pr. 3, p. 305*;—*W. and A. pr. 1, p. 345*;—*J. Grah. Cat. B. pl. p. 78*;—*Momordica umbellata*, *Roxb. fl. ind. 3, p. 710*;—*Rheed. 8, t. 26.*)
রাখালসু। Rakhalusa. ৩. Both Peninsulas of India, Bengal, (Serampore,) Khassy Mountains, Sirmore. Fl. small yellowish, R. and C. S; fr. C. S. The ripe and unripe fruit, as well as the boiled roots eaten by the Natives.

MUKIA, Arn. (*Wight. ill. 2, p. 30.*)

1. *scabrella*, Arn. (*Wight. I. c.*—*Bryonia scabrella*, *L.*;—*DC. pr. 3, p. 306*;—*W. and A. pr. 1, p. 345*;—*Wight. icon. 2, p. 501*;—*Roxb. fl. ind. 3, p. 724*;—*J. Grah. Cat. B. pl. p. 78*;—*Rheed. 8, t. 13.*)
অগমকি Agumuki. ৪. Both Peninsulas of India, Bengal, (Serampore,) interior of the mountains of N. India. Fl. small, yellowish; and fr. throughout the year.

BRYONIA, L. (*Wight. ill. 2, p. 30*; from Schrader.)

1. *laciniosa*, L. (*DC. pr. 3, p. 308*;—*W. and A. pr. 1, p. 345*;—*Roxb. fl. ind. 3, p. 728*;—*Wight. icon. 2, t. 500*;—*J. Grah. Cat. B. pl. p. 78*;—*Rheed. 8, t. 19*) **মালা Mala.** ২. Peninsula of India, Goalpara, Bengal, (Serampore,) Deyra Dhoon, Cashmere. Fl. small, yellowish-green; and fr. throughout the year.

CITRULLUS, Schrad. (*Wight. ill. 2, p. 30.*)

1. *Cucurbita*, Schrad. (*Cucurbita Citrullus*, *L.*;—*W. and A. pr. 1, p.*

351;—Roxb. fl. ind. 3, p. 719;—J. Grah. Cat. B. pl. p. 79.—*Cucumis Citrullus*, Ser.; DC. pr. 3, p. 301;—Rumph. 5, t. 146, f. 1.) तरुमाला *Turnus*. Water-Melon. ◎ Cultivated. Fl. large, yellowish, Jan. and Feb.; fr. H. S.

2. *Colocynthis*, Schrad. (*Cucumis Colocynthis*, L.;—DC. pr. 3, p. 302;—W. and A. pr. 1, p. 342;—Wight. icon. 2, t. 498;—Roxb. fl. ind. 3, p. 719;—J. Grah. Cat. B. pl. p. 77.) माथोना *Makhal*. Colocynth-plant. ◎ Peninsula of India, Banks of the Jumna, Kemaon, Japan. Fl. yellow, R. S.; fr. C. S.

MOMORDICA, L. (Wight. ill. 2, p. 30; from Schrader.)

1. *Charantia*, L. (DC. pr. 3, p. 311;—W. and A. pr. 1, p. 348;—Roxb. fl. ind. 3, p. 707;—Wight. icon. 2, t. 504;—J. Grah. Cat. B. pl. p. 78; B. M. 51, t. 3455;—Rheed. 8, t. 9;—Rumph. 5, t. 151.) कटवा *Kurula*. ◎ Cultivated in all the warmer parts of Asia. Fl. middle-sized, pale yellow, R. and C. S.; fr. C. S. Fruit bitter, wholesome, while unripe eaten in curry by the Natives. It requires to be steeped in salt water, before it is cooked. (Dr. Gibson.)

2. *muricata*, W. and A. (pr. 1, p. 348.—*Momordica muricata*, L.;—DC. pr. 3, p. 311;—Roxb. fl. ind. 3, p. 707;—Rheed. 8, t. 10.) उच्छ्वा *Oochhya*. ◎ Cultivated by the Natives even more than a. Fl. middle-sized, pale yellow, R. and C. S.; fr. C. S. Fruit smaller than that of a, but more esteemed.

2. *diveca*, Roxb. (fl. ind. 3, p. 709;—DC. pr. 3, p. 312;—W. and A. pr. 1, p. 348;—J. Grah. Cat. B. pl. p. 78. Female. Wight. icon. 2, t. 505;—Rheed. 8, t. 12. Male, Wight. icon. 2, t. 506;—Rheed. 8, t. 18.) १. Both Peninsulas of India, Bengal, (Serampore.) Fl. large, yellow, R. and C. S.; fr. C. S. Tender green fruit and tuberous roots of the female plant (weighing from 2-3 pounds,) eaten by the Natives.

3. *cochininchinensis*, Spreng. (*Syst.* 3, p. 14;—M. mixta, Roxb. fl. ind. 3, p. 709;—W. and A. pr. 1, p. 349.—*Muricia cochininchinensis*, Lour.) गोलकंकडा *Golkankra*. २. Bengal, (Serampore.) Fl. large, cream-coloured, R. S.; fr. C. S.

LUFFA, Cav. (Wight. ill. 2, p. 31;—from Schrader.)

1. *pentandra*, Roxb. (fl. ind. 3, p. 712;—W. and A. pr. 1, p. 343;—J. Grah. Cat. B. pl. p. 77;—Wight. icon. 2, t. 499.—L. *Catupicinna*, Ser.; DC. pr. 3, p. 303.—L. *Petola*, Ser.; DC. l. c.;—Rheed. 8, t. 8;—Rumph. 5, t. 147.) धूँदूल *Dhoondool*, Hind. *Porol*. ◎ Cultivated all over India. Fl. large, yellow, R. and C. S.; fr. C. S.—Unripe fruit eaten by the Natives.

3. *amara*—Hind. *Tita porol*; a wild variety.

2. *fætiada*, Cav. (DC. pr. 3, p. 302;—B. M. 40, t. 1638.—L. *acutangula*, Roxb. fl. ind. 3, p. 713;—DC. l. c.;—W. and A. pr. 1, p. 343;—J. Grah. Cat. B. pl. p. 77;—Rheed. 8, t. 7;—Rumph. 5, t. 149.) खिंगा *Jhinga*, Hind. *Torooi*. ◎ Cultivated. Fl. large, yellow,

R. and C. S.; fr. C. S.—The half-grown *fruit* is one of the best Native vegetables we have in India. The Natives use it much in their curries. Peeled, boiled and dressed with butter, pepper, and salt, it is little inferior to green peas. (Roxb.)

3. *amara*, Roxb. (*fl. ind.* 3, p. 715;—*W. and A. pr.* 1, p. 343;—*J. Grah. Cat. B. pl. p.* 77.—*L. Plukenetiana, Ser.—DC. pr.* 3, p. 302.) তিতু ধূমৰাত্ৰি *Tito-dhoondool*. Hind. *Kerula*. ○ মুসলিম Peninsula of India. Bengal, (Serampore.) Fl. large, yellow, R. S.; fr. C. S.—Bitter in every part. *Fruit* violently cathartic and emetic. *Juice* of the young roasted fruit applied by the Natives to their temples to cure headache. *Seeds* in substance or infusion, used as an emeto-cathartic. (Roxb.)

? 4. *clavata*, Roxb. (*fl. ind.* 3, p. 714.) ○ মুসলিম Hindooostan. Fl. large, yellow. In H. C. G. fl. R. and C. S.; fr. C. S.—The young unripe *fruit* eaten by the Natives in their curries. (Roxb.)

? 5. *graveolens*, Roxb. (*fl. ind.* 3, p. 716.) ○ মুসলিম Rajmahl.—In H. C. G. fl. R. S.; fr. C. S. The whole plant has a most disagreeable, heavy smell. (Roxb.)

BENINCASA, Savi. (*Wight. ill.* 2, p. 31;—from Schrader.)

1. *cerifera*, Savi. (*DC. pr.* 3, p. 303;—*W. and A. pr.* 1, p. 344;—*J. Grah. Cat. B. pl. p.* 77.—*Cucurbita cerifera*, Fisch.—*G. Pepo*, Roxb. *fl. ind.* 3, p. 718;—*Rheed.* 8, t. 3.) কুমুড়া *Koomra. Pumpkin. White Gourd.* ○ মুসলিম Cultivated. Fl. large, yellow, R. S.; fr. C. S.—The young unripe *fruit* universally eaten by the Natives in their curries. (Roxb.)

LAGENARIA, Ser. (*Wight. ill.* 2, p. 31;—from Schrader.)

1. *vulgaris*, Ser. (*DC. pr.* 3, p. 299;—*W. and A. pr.* 1, p. 341;—*J. Grah. Cat. B. pl. p.* 76.—*Cucurbita Lagenaria, L.*; Roxb. *fl. ind.* 3, p. 718;—*Rheed.* 8, t. 1, 4, 5;—*Rumph.* 5, t. 144.) কোড়ু *Kodoo. লাও*—*Bottle-Gourd. White Pumpkin.* ○ মুসলিম Cultivated. Fl. large, white, R. and C. S.; fr. C. S.—The hard rind of the fruit used as a bottle for containing honey, &c. (*Fukeer's bottles*); a variety of it for making the stringed instrument, called *sitar*; another variety as a *bouy* for swimming across rivers, transporting baggage, &c. (Royle. *J. Grah.*)—The fruit of a wild variety তিতুলাটি *Tita-lao*,) considered poisonous.

TRICHOSANTHES, L. (*Wight. ill.* 2, p. 31;—from Schrader.)

1. *anguina*, L. (*DC. pr.* 3, p. 314;—*W. and A. pr.* 1, p. 350;—*Roxb. fl. ind.* 3, p. 701;—*J. Grah. Cat. B. pl. p.* 78;—*B. M.* 19, t. 722;—*Rumph.* 5, t. 148.) চিচিঙ্গা *Chichinga. Snake-Gourd.* ○ মুসলিম Cultivated. Fl. large, white, R. S.; fr. C. S. *Fruit* universally eaten by the Natives.

2. *cucumerina*, L. (*DC. pr.* 3, p. 315;—*W. and A. pr.* 1, p. 350;—*Roxb. fl. ind.* 3, p. 702;—*J. Grah. Cat. B. pl. p.* 79;—*Rheed.* 8, t. 15.) বনপটোল *Bun-putol.* ○ মুসলিম Both Peninsulas of India. Bengal, (Serampore.) Fl. small, white, R. S. and C. S.—Unripe *fruit* very bitter, eaten by the Natives in their curries. (Roxb.)

3. *lobata*, Roxb. (*fl. ind.* 3, p. 703.) बन्चिंगा *Bun-chichinga*. ○ Bengal, (Serampore.) Fl. small, white, R. and C. S.; fr. C. S.—Not eaten by the Natives, though it appears to be a useful species. (*Roxb.*)
4. *dioeca*, Roxb. (*fl. ind.* 3, p. 701.) बनपटोल *Bun-putol*.—Hind. *Pul-wal*. ♀. ○ Bengal, (Serampore.) Fl. large, white; and fr. R. S.—Much cultivated, on account of the unripe fruit and tender tops, which are eaten in curries, and reckoned very wholesome. (*Roxb.*)
5. *cordata*, Roxb. (*fl. ind.* 3, p. 703.) झीझीकुमड़ा *Bhooim-Koomra*;— (which is also the name of *Batatas paniculatum*, Choisy.) ♀. ○ Banks of the Megna, where the inhabitants use the root as a substitute for Calumba-root. It has been sent to England as the real Calumba of Mozambique.—Fl. large, white. In H. C. G. fl. R. S. (*Roxb.*)
6. *bracteata*, (*T. palmata*, Roxb. *fl. ind.* 3, p. 704;—*W. and A. pr.* 1, p. 350;—*Wight. ill.* 2, t. 104-5;—*J. Grah. Cat. B. pl. p.* 79.—*Modecca bracteata*, *Iam.*;—*DC. pr.* 3, p. 337.) बड़माकाल *Buro-makal*. ♀. Both Peninsulas of India, Bengal, (Serampore,) Khas-sya Mountains, Deyra-Dhoon. Fl. large, white, R. S.; fr. C. S.—Root reckoned poisonous (*Roxb.*); with the stem much esteemed in diseases of cattle, as inflammation of the lungs, &c. (*Dr. Gibson.*)
7. *heteroclita*, Roxb. (*fl. ind.* 3, p. 705.) ♀. Silhet. Fl. large, pale yellowish-white; on the outside tinged with brown.—In H. C. G. fl. H. S.; fr. R. S. (*Roxb.*)

CUCUMIS, L. (*Wight. ill.* 2, p. 31;—from Schrader.)

1. *Melo*, L. (*DC. pr.* 3, p. 300;—*W. and A. pr.* 1, p. 341;—*Roxb. fl. ind.* 3, p. 720;—*J. Grah. Cat. B. pl. p.* 77.) खुरबुज *Khur-buj. Melon*. ○ Persia, Kabul. Cultivated.—Fl. largish, yellow, and fr. H. S.
2. *Momordica*, Roxb. (*fl. ind.* 3, p. 725;—*W. and A. pr.* 1, p. 341;—*J. Grah. Cat. B. pl. p.* 77.) फूंठी *Phoontee*. ○ Cultivated. Fl. largish, yellow, Feb.; fr. H. S. Fruit much eaten; when young, a good substitute for the common cucumber; when ripe, (after bursting spontaneously) with a little sugar little inferior to the melon, and reckoned very wholesome. (*Roxb.*)—Seed now and then ground into a kind of meal. (*Royle.*)
3. *sativus*, L. (*DC. pr.* 3, p. 300;—*W. and A. pr.* 1, p. 342;—*Roxb. fl. ind.* 3, p. 720;—*J. Grah. Cat. B. pl. p.* 77.) मसा *Susa*. Hind. *Keera. Common Cucumber*. ○ Cultivated. Fl. largish, yellow; and fr. nearly throughout the year.
4. *utilissimus*, Roxb. (*fl. ind.* 3, p. 721;—*W. and A. pr.* 1, p. 342;—*J. Grah. Cat. B. pl. p.* 77.) काङड़ *Kankoor*. Hind. *Kakni*. ○ Cultivated. Fl. largish, yellow, H. and R. S; fr. C. S.—Fruit, when half-grown, pickled; when ripe, as large as an ostrich-egg, melon-flavored, and, if hung up, keeping good for several months. Seeds, like those of other species of the Gourd-tribe, containing much farinaceous matter, mixed with a large proportion of mild oil. The meat

is an article of diet with the Natives, and the oil is used for the lamp. Powder of the *toasted seeds* diuretic, and serviceable in promoting the passage of gravel. (Roxb.)

5. *pubescens*, Willd. (*DC. pr. 3, p. 301;—W. and A. pr. 1, p. 342;*—*Wight. icon. 2, t. 496;—Royce ill. t. 47. f. 1.*)—*C. maderaspatanus*, Roxb. *fl. ind. 3, p. 723.* बुन्गमुक् *Bun-gumuk.* ☺ Coromandel, Bengal, (Serampore,) Saharunpore, Delhi, &c. Fl. largish yellow, R. and C. S.; fr. C. S.—*Fruit* much esteemed by the Natives, though they do not cultivate the plant. (Roxb.) On ripening it becomes aromatic.
6. *turbinatus*, Roxb. (*fl. ind. 3, p. 723;—W. and A. pr. 1, p. 342.*) ☺ Coromandel. Fl. largish, yellow, R. and C. S.; fr. S. C.—*Fruit* eaten by the Natives.
7. *trigonus*, Roxb. (*fl. ind. 3, p. 722;—W. and A. pr. 1, p. 342;*—*Wight. icon. 2, t. 497.*) ☺ Coromandel. Fl. small, yellow, R. and C. S.; fr. C. S.
8. *integrifolius*, Roxb. (*fl. ind. 3, p. 724.*) ☺ Bengal. Fl. large, white; and fr. R. S.

CUCURBITA, L. (*Wight. ill. 2, p. 31*;—from Schrader.)

1. *maxima*, Duch. (*DC. pr. 3, p. 316;—W. and A. pr. 1, p. 351;*—*Wight. icon. 2, t. 507;—J. Grah. Cat. B. pl. p. 79.*)—*C. Melopepo*, Roxb. *fl. ind. 3, p. 719.* *L.?* सफ़ेरीकूम्रा *Supheree-koomra.* Squash-Gourd, Red Gourd. ☺ Cultivated. Fl. very large, yellow, R. and C. S.; fr. C. S.—Flesh of the *fruit*, when boiled, tasting somewhat like a young carrot.
- COCCINIA, W. and A. (*pr. 1, p. 347;—Wight. ill. p. 31*;—from Schrader.)
 1. *grandis*, (C. indica, W. and A. l. c.;—*J. Grah. Cat. B. pl. p. 78.*)—*Bryonia grandis*, L.; *DC. pr. 3, p. 305.*—B. ? *Melimo*, Ser; *DC. l. c.*—*Momordica monadelpha*, Roxb. *fl. ind. 3, p. 708;—Rheed. S. t. 14;*—*Burm. zeyl. t. 19. f. 1, 2;—Rumph. 5, t. 166. f. 1.*) तेलाकूचा *Tela-koocha.* 2. ☺ Both Peninsulas of India, Bengal, (Serampore,) Saharunpore, Delhi. Fl. large, white; and fr. the whole year.—Ripe *fruit* eaten raw by the Natives, and greedily devoured by birds; while green used in curries.

JOLLIFIA, Bojer. (*DC. pr. 3, p. 316.*)

1. *africana*, Delile. (*DC. l. c. Feuillea pedata, Sm. ♀ B. M. 53, t. 2681.* *Telfairia pedata*, Hook; ♂ *B. M. 54, t. 2751-2; J. Grah. Cat. B. pl. p. 79.*) 2. ☺ Pemba, near the shores of Zanzibar. Introduced into H. C. G.; fl. ? The oil of the *fruit* equal to that of the finest olives.

* *Cucurbita ovifera*, L. ☺ Astrachan. This species (*Vegetable Marrow.*) is considered one of the most nourishing and wholesome of the whole tribe. *Ceratosanthes tuberosa*, Spreng. *Trichosanthes tuberosa*, Willd.;—*B. M. 53, t. 2703.* 5 ☺ W. Indies.

SUB-ORDER.—NHANDIROBÆ, St. Hil.

Wight. ill. 2, p. 28, annot.

This small tribe consists but of 2 genera of undershrubby, climbing plants: *Fevillea* with 5 W. Indian and S. American species; and *Zanonia*, with 9 E. Indian ones. Of the latter, 6 have been found in Nepal, Assam, the Khassy Mountains, Prome and Taong Dong; 1 in the Peninsula of India, and 2 in Java. Properties unknown.

ZANONIA, L. (DC. pr. 3, p. 298;—W. and A. pr. 1, p. 340.)

1. *clavigera*, Wall. Cat. 5 ↳ Khassy Mountains. Introduced here in 1836.—Has not fl.

* *Fevillea punctata*, Poir. 5 ↳ St. Domingo.—*F. trilobata*, L. 5 ↳ Brazil.—*F. tannifolia*, H. B. and Kth. 5 ↳ S. America.—*Zanonia indica*, L. 5 ↳ Malabar.

ORDER XXXII.—LOASACEÆ, Lindl. Nat. Syst. p. 53.

Annual or perennial, seldom climbing herbs, of 11 genera, embracing more than 40 species, natives of the more temperate regions or the tropics of America. Properties unknown.

* *Klaprothia mentzeloides*, H. Kth. ♂ S. America.—*Mentzelia hispida*, Willd.; B. M. 59, t. 3205. ♀ Mexico.—*M. strigosa*, H. B. Kth. ♀ Mexico.—*Loasa nitida*, Lam.; B. M. 50, t. 2372. ♂ Peru. *L. Placei*, Lindl.; B. Reg. 19, t. 1599. ♂ Chili.—*L. lateritia*, Hook.; B. M. 65, t. 3632. ♂ ↳ Tucuman.

ORDER XXXIII.—CACTACEÆ, Lindl. Nat. Syst. p. 53.

THE INDIAN FIG TRIBE.

Of this order of succulent, polymorphous plants, which, under 9 genera, contains about 250 species, "America is the station, no species appearing to be natives of any other part of the world. The species, which are said to be either wild or naturalized in Europe, Mauritius, and Arabia," (India and China) "have been introduced from America, and having found themselves in situations suitable to their habits, have taken possession of the soil like actual natives.—Hot, dry, exposed places are the favorite stations of Cactaceæ, for which they are peculiarly adapted, in consequence of the imperfect evaporating pores which they possess, as compared with other plants; a circumstance, which, as De Candolle has satisfactorily shown, will account for the excessively succulent state of their tissue." (Lindl.)

CACTACEÆ.

GSL

The chief importance of this order, is, that some of its species supply the food on which the cochineal insect lives.

MAMMILLARIA, Haw. (*DC. pr. 3, p. 458.*)

1. *simplex*, Haw. (*DC. o. c. p. 459*;—*Cactus mammillaris*, L.;—*Roxb. H. B. p. 37.*) 5. W. Indies. Fl. smallish, white, Feb. and March; fr. 0.
2. *pusilla*, DC. (*pr. 3, p. 459.*) 5. Hot parts of America. Fl. small, yellowish-red, March, but rare; fr. 0.
3. *stellata*, Haw. (*Loud. Hort. Brit.*) p. 194, no. 12531.) 5 S. America.
4. *coronaria*, Haw. (*DC. pr. 3, p. 458.*) 5 Mexico.
5. *flavescens*, DC. (*pr. 3, p. 459.*) 5 Hot parts of America.

Introduced into H. C. G. Fl. ?

ECHINOCACTUS, Lk. and Otto. (*DC. pr. 3, p. 461.*)

1. *Ottonis*, Lk. (*B. M. 58, t. 3107.*) 5 Brazil.
2. *Erycoidesii*, Otto. (*B. Reg. 20, t. 1707; B. M. 62, t. 3411.*) 5 Mexico.
3. *cornigerus*, DC. (*pr. 3, p. 461.*) 5 Mexico.—Introduced into H. C. G. Fl. ?

Introduced in 1840. Have not fl.

CEREUS, DC. (*Pr. 3, p. 463.*)

1. *multangularis*, Haw. (*DC. l. c.*) 5 S. America.
2. *peruvianus*, Tabern. (*DC. pr. 3, p. 464.*) 5 Peru.
 β *monstrosus*, DC. (*l. c.*) 5 S. America ?
3. *hexagonus*, Haw. (*DC. pr. 3, p. 470.*)—*Cactus hexagonus*, L.; *Roxb. H. B. p. 37*;—*B. Repos. 8, t. 513.*) 5 Surinam. Fl. very large, white, fragrant, R. S.; fr. 0.
4. *tetragonus*, Haw. (*DC. pr. 3, p. 466.*)—*Cactus tetragonus*, L.; *Roxb. H. B. p. 37.*)—5 Fl. large, white, R. S.; fr. 0. (*Roxb.*)
5. *speciosissimus*, DC. (*pr. 3, p. 468.*)—*Cactus speciosissimus*, Desf.;—*B. Reg. 6, t. 486*;—*B. M. 49, t. 2306.*) 5 Mexico.—In H. C. G. Fl. ?
6. *repandus*, Haw. (*DC. pr. 3, p. 468.*)—*Cactus repandus*, L.; *B. Reg. 4, t. 336.*) 5 W. Indies. Has been introduced into H. C. G. Fl. ?
7. *columnaris*, Lodd. MSS. 5. Introduced in 1840.
8. *grandiflorus*, Mill. (*DC. pr. 3, p. 468*;—*J. Grah. Cat. B. pl. p. 82*;—*B. M. 62, t. 3381.*)—*Cactus grandiflorus*, L.;—*Roxb. H. B. p. 37.*) 5 W. Indies. Fl. very large, white, fragrant, R. S., but rare; fr. 0.
9. *triangularis*, Haw. (*DC. pr. 3, p. 468*;—*J. Grah. Cat. B. pl. p. 83*;—*B. Reg. 21, t. 1807.*)—*Cactus triangularis*, L.;—*Roxb. H. B. p. 37*;

- B. M. 44, t. 1884.) 5 ~ Mexico, W. Indies.—Fl. very large, white, fragrant, R. and C. S.; fr. 0.
10. *reptans*, Haw. 5 ~ S. America? Introduced in 1839.—Has not fl.
11. *setosus*, Salm. (*Lodd. Cab.* 9, 1887.) 5 Brazil. Introduced in 1840.
12. *phyllanthoides*, DC. (*pr.* 3, p. 469.—*Cactus phyllanthoides*, DC.;—*B. M.* 46, t. 2092.) 5 Mexico. Introduced in 1838. Has not fl.
13. *truncatus*, DC. (*pr.* 3, p. 470.—*Cactus truncatus*, Lk.—*B. Reg.* 9, t. 696;—*B. M.* 52, t. 2562.) 5 Brazil. Has been introduced into H. C. G. Fl.?
14. *Ackermannii*, Lindl. (*B. Reg.* 16, t. 1331, under *Cactus*) 5 Mexico. Fl. large, scarlet, R. S.; fr. 0.
15. *ovatus*, G. Don. 5 Chili.
16. *decorus*, Lodd. MSS. 5. } Introducing in 1840.
17. *nycticallus*, Lodd. MSS. 5. }
- OXYNTIA**, Tournef. (*DC. pr.* 3, p. 471;—*W. and A. pr.* 1 p. 363.)
1. *cylindrica*, DC. (*t. c.*—*B. M.* 61, t. 3301.—*Cactus cylindricus*, Lam.—*Roxb. H. B.* p. 37.) 5 Peru. Fl. largish, (1 inch in diameter) scarlet.—Has not fl. with me. In H. C. G. it was introduced in 1806, but had not fl. in 1814. In England it was introduced in 1799, but it does not fl. there either. The figure in B. M. is from a plant, cultivated at Madeira.
2. *curassavica*, Haw. (*DC. pr.* 3, p. 472.—*Cactus curassavicus*, L.; *Roxb. H. B.* p. 37.) 5 Curaçao. Fl. yellow, large ($1\frac{1}{2}$ inch across.) R. S.; fr. 0. (*Roxb.*)
3. *spinossissima*, Haw. ? (*DC. pr.* 3 p. 472.) L. 5. Jamaica. Fl. smallish $\frac{1}{2}$ inch in diameter,) deep orange, several times a year; fr. 0.
4. *Dillenii*, Haw. (*DC. pr.* 3, p. 472;—*W. and A. pr.* 1, p. 363;—*Wight. ill.* 2, t. 114;—*J. Grah. Cat. B. pl.* p. 88.—*Cactus Dillenii*, Ker.; *B. Reg.* 3, t. 255.—*C. indicus*, Roxb. fl. ind. 2, p. 475.) *নাগফেনা* *Nag-phena*; *Hedge Prickly-Pear*. 5. S. America.—Domesticated all over India. Fl. large, (two inches in diameter,) bright yellow, and fr. throughout the year.—"Upon this plant the Cochineal insects lately brought from America, thrive and multiply abundantly." (*Roxb.*)
5. *Roxburghiana*, (*Cactus chinensis*, Roxb. fl. ind. 2, p. 476.) L. 5. This plant was introduced into H. C. G. before 1793, and in the course of twenty years only flowered once.—No doubt also of S. American origin.
6. *Tuna*, Haw. (*DC. pr.* 3, p. 472.—*Cactus Tuna major*, Roxb. *H. B.* p. 37.) 5. S. America. Fl. large, reddish, R. S.—The favorite food of the Cochineal in Mexico and Brazil.
7. *elatior*, Haw. (*DC. pr.* 3, p. 472.—*Cactus Tuna elatior*, Willd.;—*Roxb. H. B.* p. 37.) 5. S. America. Fl. large, purplish-yellow, R. S.; fr. R. and C. S.

8. *nigricans*, Haw. (*DC. pr. 3, p. 473.*—*Cactus Tuna, B. M. 38, t. 1557.*) 5 S. America. Has not fl. here.
9. *triacantha*, DC. (*l. c.*) 5 S. America. Has been in the garden here many years, without fl.
10. *cochinillifera*, Haw. (*DC. l. c.;—J. Grah. Cat. B. pl. p. 83.*—*Cactus cochinillifer, L.; B. M. 54, t. 2741-42;—Roxb. H. B. p. 37.*) 5 S. America. Fl. long, with the petals bright rose-coloured at several periods of the year; fr. O.—Employed in the W. Indies successfully for rearing the Cochineal.
11. *Ficus-indica*, Haw. (*DC. pr. 3, p. 473.*—*Cactus Ficus-indica, L.; Roxb. H. B. p. 37.*) 5 S. America. Fl. large, sulphur, R. S.

ORDER XXXIV.—HOMALIACEÆ.—Lindl. Nat. Syst. p. 55.

Trees or shrubs, of 9 genera, embracing 28 species: 12 from Madagascar and Mauritius; 3 from S. Africa; 6 from S. America, and the W. Indies; 1 from China; and 5 from the E. Indies. The latter all belong to *Blackwellia*.—Properties unknown.

BLACKWELLIA, Commers. (DC. pr. 2. p. 54.)

1. *spiralis*, Wall. (DC. l. o. p. 55;—Wall. As. Research, 13, p. 400, with a plate.) L. 5 Pegu. Fl. very small, whitish, January and Feb.; fr. 0.
2. *fasciata*, Wall. (Ludia fasciata, Roxb. fl. ind. 2, p. 508.) 5 Amboina. Fl. small, whitish, R. S.; fr. 0.
3. *propinqua*, Wall. Cat. 5 Penang. In H. C. G., fl. Feb.
4. *cochinchinensis*, R. Br. (Astranthus cochinchinensis, Lour.;—DC. pr. 2, p. 55;—B. M. 53. t. 2659.) 5 Cochin-China. Fl. small, whitish. Introduced into H. C. G. Fl.

* *B. nepalensis*, Wall. (Pl. as. rar. 2. t. 179.) 5 Deyra Dhoon.—*B. paniculata*, Lam. ("Bois à écorce blanche.") 5 Bourbon.—*B. padiflora*, Lindl.; B. Reg. 16. t. 1308. 5 China. The finest species of the genus.—*Homalium racemosum*, Jacq.; B. Reg. 6, t. 519. 5 Jamaica.

ORDER XXXV.—MESEMBRYANTHEMACEÆ.

MESEMBRYACEÆ.—Lindl. Nat. Syst. p. 56.

Shrubby or herbaceous plants, rarely annual, referred by Lindl. to 4 genera: Mesembryanthenum, Glinus, Orygia, and Kolleria. Excluding from Harvey's genera 21 species, they contain of S. African forms alone, 477. Only a few have been found in N. Holland, Van Diemen's Land, China, Chili, Peru, S. Europe, N. Africa, and the E. Indies. The latter consist of 3-4 species of *Glinus*.—Properties, as far as they are known, of no importance.

MESEMBRYANTHEMUM, L. (DC. pr. 3, p. 415.) *Fig-marygold*.—Nearly all natives of C. G. H.

1. *crystallinum*, L. (DC. o. c. p. 448.) ♂ ♂ C. G. H. Fl. small, white, H. S.; fr. 0.—Also a native of the Canaries.
2. *cordifolium*, L. (DC. o. c. p. 449;—Jacq. ic. rar. 4, t. 487.) 5 C. G. H. Fl. smallish, crimson, nearly throughout the year; fr. 0.

Glinus, L. (*DC. pr. 3*, p. 455;—*W. and A. pr. 1*, p. 362.)

1. *dictamnoides*, L. (*DC. l. c.*;—*W. and A. l. c.*)—*Pharnaceum pentagynum*, Roxb. *fl. ind. 2*, p. 103;—*Burm. ind. t. 36*, f. 1.) কোসরা শাক *Dosura-shak*. ◎ Both Peninsulas of India. Bengal, (Serampore.) Fl. small, greenish-red, R. and C. S.; fr. C. S.—The tender shoots are eaten by the Natives in their curries.

- * *Mesembrianthemum dolabriiforme*, L.; B. M. 1, t. 32. 5—*M. coccineum*, Haw.; B. M. 2, t. 59. 5—*M. pianatiforme*, L.; B. M. 2, t. 67. ◎—*M. barbatum*, L.; B. M. 2, t. 70. 5—*M. aureum*, L.; B. M. 3, t. 262. 5—*M. edule*, L. 5—*M. viridiflorum*, Ait; B. M. 10, t. 326. 5—All Cape plants.

ORDER XXXVI.—BEGONIACEÆ, R. BR.—Lindl. *Nat. Syst.* p. 56.

Shrubby or herbaceous, rarely annual plants, amounting, as far as we can judge from Spreng. syst., B. M., B. Reg., and Wall. Cat., to 124 species, of which 1 belongs to Eupetalum, Lindl., and the rest to Begonia. The greater part of them inhabit S. America, Mexico and the W. Indies; 30 have been found in the E. Indies, chiefly in Nepal, the Khassya Mountains, the Neelgherries, and Tavoy; 2 in Madagascar; 1 in Mauritius; 1 in China; 1 in Japan, and 1 in the Island of Johanna.—Eupetalum is a Brazilian genus.—Properties apparently unimportant.

Begonia, L. (*Spreng. Syst. 2*, p. 565, No. 1998.)

1. *humilis*, Dryand. (*Spreng. o. c. p. 626*;—*B. Reg. 4, t. 284.*) ♂ W. Indies. Fl. small, whitish, H. S.; fr. R. S.
2. *nitida*, Ait. (*Spreng. syst. 2*, p. 625.) 5 Jamaica. Fl. smallish, white, H. S.
3. *argyrostigma*, Fisch. (*B. Reg. 8, t. 666.*) 5 Brazil. Fl. largish, white, R. S.; fr. 0.
4. *papillosa*, Grah. (*B. M. 55, t. 2846.*) 5 Brazil? Fl. large, rose-coloured. R. S.; fr. 0.
5. *reniformis*, Dryand. (*Spreng. syst. 2*, p. 625;—*B. M. 60, t. 3225.*) 5 Brazil. Fl. smallish, white, C. S.; fr. 0.

Reg. 15. t. 1252. Brazil.—*B. discolor*, R. Br. (B. Evansiana, Andr.; B. M. 36. t. 1473.) China.—*B. dipetala*, Grah.; B. M. 55. t. 2849. Bombay.—*B. picta*, Sm.; B. M. 57. t. 2962. Nepal.—*B. pedunculosa*, Wall. pl. as. rar. 1. t. 97. Khassya Mountains.—*Eupetalum Lindleyi*, (*Begonia petalodes*, Lindl.; B. Reg. 21. t. 1757.) Brazil.

ORDER XXXVII.—BRASSICACEÆ, Lindl. Nat. Syst. p. 58.

THE CABBAGE TRIBE.

Herbs, annual, biennial, or perennial, very seldom under-shrubs. Exclusive of species that are uncertain, or common to several different countries, it appears that about 100 are found in the southern hemisphere, and about 800 in the northern, and of these 91 in the new and the rest in the old world.

This calculation will, however, require considerable modification, especially in the Asiatic and N. American numbers, (*Lindl.*) and we shall, perhaps, not err much, if we take the amount of species of the whole order to be upwards of 1200. The Indian forms according to our materials, are 48: 7 of *Nasturtium*; 2 of *Turritis*; 2 of *Arabis*; 8 of *Cardamine*; 2 of *Pteroneuron*; 1 of *Fursetia*; 6 of *Draba*; 1 of *Cochlearia*? 1 of *Thlaspi*; 1 of *Capsella*; 1 of *Hesperis*; 1 of *Sisymbrium*; 1 of *Alliaria*; 1 of *Le pidium*; (*Rosb.*) 1 of *Tuscheria*; 9 of *Sinapis*; 1 of *Eruca*; and 1 of *Crambe*. Fourteen of these are common to several parts of the world; 16 have been found in the Himalayas; 5 on the Neelgherries; 2 in Cochin-China; 4 in Java; 8 in Kunawar; and 11 in the plains, chiefly of Bengal.

Acrimony and bitterness form the grand characteristics of this useful order, to which we owe most of our antiscorbutic herbs, and a number of our Kitchen-vegetables. The principle of acridity seems to be a volatile oil, that soon evaporate, and, therefore, is greatly diminished by drying. It abounds in the Horse-radish, Common Cress, Radish, (especially the black Spanish Radish,) &c. which renders it necessary that these should be eaten fresh. In others the acrimony is mitigated by an abundance of mucilage,

SL
17

BRASSICACEÆ.

various parts of such plants becoming wholesome food, f. ex. Turnip, Cabbage, Sea-kale, and the stems of several species of the Cabbage-tribe. The seeds retain their pungent qualities for a longer period of time, such as those of the white mustard, which have been highly esteemed for their tonic qualities. A great deal of azot enters into the nature of the whole tribe; hence perhaps their animal odour, when in a state of decomposition.

14. *cuneifolia*, Roxb. (fl. ind. 3, p. 121.) ⊙ Thibet. Fl. small, yellow. In H. C. G. fl. March; fr. April. (Roxb.)

15. *rugosa*, Roxb. (*fl. ind.* 3, p. 122.) ◎ Nepal. Fl. bright-yellow.
In H. C. G. fl. C. S.; fr. March. (*Roxb.*)

16. *erysimoides*, Roxb. (*fl. ind.* 3, p. 123.) ◎ Wynaad.—In H. C. G. fl. Feb. and March; fr. April. (*Roxb.*)

17. *divaricata*, Roxb. (*fl. ind.* 3, p. 123.) बन्द्राई *Bun-rai*. ◎ Bengal, (Serampore.) Fl. very small, yellow; and fr. the greater part of the year.

18. *patens*, Roxb. (*fl. ind.* 3, p. 124.) बिल्राई *Bil-rai*. ◎ Bengal, (Serampore.) Fl. very small, yellow, R. S.; fr. C. S.

19. *pusilla*, Roxb. (*fl. ind.* 3, p. 125.) ◎ Coromandel? Fl. minute, yellow. In H. C. G. fl. C. S. (*Roxb.*)

ERUCA, Tournef. (*DC. pr.* 1, p. 223.)

1. *sativa*, Lam. (*DC. l. c.*—*Brassica erucoides*, Horn.—*Roxb. fl. ind.* 3, p. 117.) श्वेतसूर्षा *Shwet-sursha*. ◎ S. Europe, N. Africa, Patna. Fl. small, pale yellow, Feb. Cultivated in India on account of the oil of its seeds.

CARRICHTERA, DC. (*pr.* 1, p. 224.)

1. *Vella*, DC. (*l. c.*—*Vella annua*, L.;—*E. B.* 21, t. 1442.) ◎ England, S. Europe. Fl. small, pale yellow, purple-veined, Feb.; fr. March.

CRAMBE, Tournef. (*DC. pr.* 1, p. 225.)

1. *hispanica*, L. (*DC. o. c. p.* 226.) ◎ Spain. Fl. small, white, March; fr. April.

RAPHANUS, L. (*DC. pr.* 1, p. 228.)

1. *sativus*, L. (*DC. l. c.*;—*Roxb. fl. ind.* 3, p. 126;—*J. Grah. Cat. B. pl.* p. 7.) मूला *Moola*. Common garden-radish. ◎ ♂. China, Japan, W. Asia. Fl. purplish-white, Feb. and March; fr. April.

a *radicula*: Root more or less fleshy, white, rose-coloured or red,—round or oblong.

β *niger*: Root fleshy, compact, hardish, of a very sharp taste. (*Black Spanish Radish.*) This sort, cut raw into slices, and shaken with a little salt between two plates, till the salt is dissolved, has been found an excellent stomachic and diuretic.

2. *Raphanistrum*, L. (*DC. pr.* 1, p. 229;—*E. B.* 12, t. 856.) Wild radish. ◎ Europe. Fl. largish, yellow (white-blackish streaked or purplish.) Feb. and March.

3. *maritimus*, Sm. (*E. B.* 23, t. 1643;—*DC. l. c.*) Sea-radish. ♂. Fl. largish, yellow, C. S.

4. *caudatus*, L. (*DC. pr.* 1, p. 228;—*J. Grah. Cat. B. pl.* p. 7.) ◎ Java. Fl. pale purple, Feb. and March. Much cultivated in Guzerat. (*J. Grah.*)

BUNIAS, L. (*DC. pr.* 1, p. 229.)

1. *Erucago*, L. (*DC. o. c. p.* 230.) ◎ S. Europe. Fl. smallish, yellow, Feb.; fr. March.

ERUCARIA, Gärtn. (*DC. pr.* 1, p. 230.)

1. *crassifolia*, Delile. (*DC. l. c.*) ◎ Egypt. Fl. largish, purplish-white, Feb. and March.

HELIOPHILA, N. Burm. (*DC. pr. I.*, p. 231.)

1. *arabioïdes*, Curt. (*B. M.* 14, t. 496.—*H. pilosa*, *Lam.*;— β *incisa*, *DC. o. c. p.* 233.) ⊕ C. G. H. Fl. largish, blue, Feb.; fr. March.
2. *stricta*, Sims. (*B. M.* 52, t. 2526.) ⊕ C. G. H. Fl. small, indigo-coloured, Feb.; fr. March.

* *Schizopetalon Walkeri*; Sims. *B. M.* 50, t. 2379. ⊕ Chili.—*Streptanthus obtusifolius*, Hook. *B. M.* 61, t. 3317. Arkansa.—*S. hyacinthoides*, Hook. *B. M.* 63, t. 3516. ⊕ Texas.

ORDER XXXVIII.—CAPPARIDACEÆ, Lindl. *Nat. Syst.* p. 61.

THE CAFER TRIBE.

Annual and perennial herbs, shrubs, (rarely climbing,) or trees, placed by Lindl. (*o. c. p.* 62) in 26 genera, and, according to DC. (*pr.*) amounting to about 100 species for S. America, Mexico and the W. Indies; 23 for Africa, excluding the south; 11 for Arabia; 10 for New Holland and the South Sea Islands; 4 for Persia and Iberia; 4 for the Levant; 4 for N. America; 3 for Europe; 3 for Madagascar; 2 for Tauria; 2 for Timor; 1 for Mauritius; and 1 for China. For S. America, Sprengel, (*syst.*) adds 5 species. S. Africa contains 20 forms, (Harvey;) and the E. Indies 64. Of the latter, 1 belongs to *Gynandropsis*; 4 to *Cleome*; 4 to *Polanisia*; 4 to *Cratæva*; 2 to *Niebuhria*; 2 to *Cadaba*; 46 to *Capparis*; and 1 to *Roydsia*. Of these, 2 only (*Capparis nepalensis*, DC. and *C. obovata*, Buch.) have been found in the Himalayas; the rest are all tropical. Properties unimportant. *Capers* are the flower-buds of *Capparis spinosa*, L., a S. European shrub.

GYNANDROPSIS, DC. (*pr. I.*, p. 237;—*W. and A. pr. I.*, p. 21.)

1. *pentaphylla*, DC. (*o. c. p.* 238;—*W. and A. I. c.*;—*J. Grah. Cat. B. pl. p. 7.*—*Cleome pentaphylla*, L.;—*Roxb. fl. ind.* 3, p. 126;—*B. M.* 40, t. 1681;—*Rheed.* 9, t. 24;—*Rumph.* 5, t. 96, f. 3.) কানালা Kanala, শাদাহুরহুরি Shada Hoorhooriya. ⊕ W. Indies. Tropical America. Peninsula of India. Bengal, (Serampore,) Scharunpore, Nepal. Fl. middle-sized, white, with crimson filaments, and fr. nearly the whole year. Leaves eaten by the Natives in their curries; bruised and applied to the skin, they act as a rubefacient.

CLEOME, L. (*DC. pr. I.*, p. 238;—*W. and A. pr. I.*, p. 21.)

1. *monophylla*, L. (*DC. o. c. p.* 239;—*W. and A. I. c.*;—*Roxb. fl. ind.* 3, p. 129;—*J. Grah. Cat. B. pl. p. 7.*—*C. cordata*, DC. *b. c.*;—*Rheed.* 9, t. 34;—*Burm. zeyl.* t. 100.) ⊕ C. G. H. Ceylon. Peninsula of India. Fl. small, pale rose-coloured. In H. C. G. fl. R. and C. S.; fr. C. S. (*Roxb.*)
2. *heptaphylla*, L. (*DC. pr. I.*, p. 238.) ⊕ W. Indies.—In H. C. G. fl. and fr. the whole year. (*Roxb.*)

POLANISIA, Rafin. (*DC. pr. 1, p. 242;—W. and A. pr. 1, p. 22.*)

1. *Chelidonii*, DC. (*I. c.;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 7;—Wight. icon. 2, t. 319.*—*Cleome Chelidonii*, L.;—*Roxb. fl. ind. 3, p. 127.*) ◉ Peninsula of India. Fl. large, rose-coloured; and fr. R. S. —*Seeds* pungent, when powdered used by the Natives in their curries.
2. *icosandra*, W. and A. (*pr. 1, p. 22;—Wight. icon. 1, t. 2;—J. Grah. Cat. B. pl. p. 8.*—*P. viscosa*, β . *DC. pr. 1, p. 242.*—*Cleome icosandra*, L. C. *dodecandra*, L. ex. pte. et. excl. syn.—*C. viscosa*, L. excl. syn.; *Roxb. fl. ind. 3, p. 128.*—*Rumph. 5, t. 96, f. 2.*) छुक्किया *Hoorhooriya*. ◉ Both Peninsulas of India. Bengal, (Serampore,) Saharunpore, Nepal. Fl. smallish, yellow, and fr. nearly the whole year. Leaves, bruised and applied to the skin, act as a sinapism. Seeds pungent, used by the Natives in their curries.

CRATEVA, L. (*DC. pr. 1, p. 242;—W. and A. pr. 1, p. 23.*)

1. *Roxburghii*, R. Br. (*W. and A. l. c.;—J. Grah. Cat. B. pl. p. 7.*—*Capparis trifoliata*, *Roxb. fl. ind. 2, p. 571.*) तिक्तोशाह *Tikto-shah*, b. Both Peninsulas of India. Bengal, (Serampore,) Saharunpore. Fl. large, white, becoming cream-coloured, with purple filaments, Feb. and March; fr. R. S.
2. *Nurvala*, Buch. (*W. and A. pr. 1, p. 23;—Rheed. 3, t. 42.*) 5 Malabar, Mysore. Introduced in 1839. Has not fl.—Does it really differ from No. 1.?
3. *obovata*, Vahl. (*Symb. 3, p. 61.*) 5 Madagascar.

NIEBUHRIA, DC. (*pr. 1, p. 243;—W. and A. pr. 1, p. 23.*)

1. *linifolia*, (N. *linearis*, *DC. pr. 1, p. 244;—W. and A. l. c.;—Wight. icon. 1, t. 174.*—*Capparis linifolia*, *Roxb. H. B. (1814.) p. 41.*) 5 Coromandel. Fl. greenish-dark-purple, small, April; fr. O.
2. *oblongifolia*, DC. (*pr. 1, p. 244;—W. and A. pr. 1, p. 23;—J. Grah. Cat. B. pl. p. 7.*—*Capparis oblongifolia*, *Forsk.*—*C. heterocarpa*, *Roxb. fl. ind. 2, p. 570.*) 5 ◉ Peninsula of India. Agra, Delhi. Fl. small, pale green, Dec. Jan. and Feb.; fr. O.

CAPPARIS, L. (*DC. pr. 1, p. 245;—W. and A. pr. 1, p. 24.*)

1. *brevispina*, DC. (*o. c. p. 246;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 8.*—*C. acuminata*, *Roxb. fl. ind. 2, p. 566*; not Willd. nor Lindl.) कलोकरा *Kalokera*. 5 Malabar, Bengal, (Serampore.) Fl. largish, yellowish-white, C. S.; fr. R. S.
2. *Heyniana*, Wall. (*W. and A. pr. 1, p. 25;—J. Grah. Cat. B. pl. p. 9;—Rheed. 6, t. 57.*) 5 Courtallum, Cochin, S. Concan. In H. C. G. Fl. ?
3. *urophylla*? Wall. North-east of Bengal.
4. *horrida*, L. (*DC. pr. 1, p. 246;—W. and A. pr. 1, p. 26;—Wight. icon. 1, t. 173.*—*C. zeylanica*, Banks.;—*Roxb. fl. ind. 2, p. 567*; not L.) 5 ◉ Peninsula of India, Bengal, (Serampore,) Saharunpore. Fl. largish, white, becoming rose-coloured, H. S.; fr. R. S.

5. *septaria*, L. (*DC. pr. 1, p. 247*;—*W. and A. pr. 1, p. 26*;—*Roxb. fl. ind. 2, p. 568*;—*J. Grah. Cat. B. pt. p. 9.*) कौटुम्बकामादि *Kanta-goor-kamree*. 5 Peninsula of India. Bengal, (Serampore.) Fl. small, white, H. S.; fr. R. S. An excellent hedge-plant. (*Roxb.*)
6. *aphylla*, Roxb. (*H. B. p. 41*;—*DC. pr. 1, p. 246*;—*W. and A. pr. 1, p. 27*;—*J. Grah. Cat. B. pt. p. 9.*) 5 Banks of the Jumna, Tinnevelly, Deccan, Guzerat. On his journey to Cabul, the Honorable Mr. Elphinstone found it growing in the midst of the desert. Has not fl. either here or in H. C. G. (at least in 1814,) though it had then been there seven years. In Guzerat the berries are pickled by the Natives.

? *ROYDSIA*, Roxb. (*Spreng. syst. 2, p. 561*, No. 1958.)

1. *suaveolens*, Roxb. (*Spreng. o. c. p. 607*;—*Roxb. fl. ind. 2, p. 643.*) 5 Silhet. Fl. largish, yellow, fragrant. In H. C. G. fl. March; fr. August.

ORDER XXXIX.—RESEDACEÆ, DC.—Lindl. Nat. Syst. p. 62.

THE MIGNONETTE TRIBE.

Annual or perennial herbs, of 4 genera, (*Lindl. l. c.*) containing, according to Spreng. syst., 22 species: 13 from Europe; 5 from N. Africa; 1 from S. Africa; 1 from the Canaries; 1 from China; and 1 from Cochin-China. One of the European species has been found on the Neelgherries.—Properties unimportant."

RESEDA, L. (*Spreng. syst. 2, p. 445*, No. 1791;—*W. and A. pr. 1, p. 28.*)

1. *Luteola*, L. (*Spreng. o. c. p. 463*;—*E. B. 5, t. 320.*) *Dyer's Weed*. ♂ Europe. Fl. small, yellowish, Feb. and March; fr. April.—Yields a yellow dye.
2. *virescens*, Horn. (*Spreng. l. c.*) ♂ Spain. Fl. small, greenish, Feb. and March; fr. April.

3. *odorata*, L. (*Spreng. o. c. p. 464;—B. M. 1, t. 29;—J. Grah. Cat. B. pl. p. 9.*) *Mignonette*. ♂ N. Africa. Fl. small, greenish, fragrant, Feb. and March; fr. April.
4. *Phyteuma*, L. (*Spreng. l. c.*) ♂ Austria, Switzerland, S. Europe. Fl. small, greenish, Feb. and March.
5. *lutea*, L. (*Spreng. l. c.;—E. B. 5, t. 321.*) *Wild Mignonette*. ♂ Europe. Fl. small, yellowish, Feb. and March; fr. April.
6. *alba*, L. (*Spreng. l. c.;—W. and A. pr. 1, p. 28;—Wight ill. 1, t. 15.*) ♂ S. Europe, Neelgherries. Fl. small, white, C. S.

* *Ochradenus baccatus*, Delile. ♂ Egypt.

ORDER XL.—VIOLACEÆ, Lindl. Nat. Syst. p. 63.

THE VIOLET TRIBE.

Perennial, rarely annual herbs, under-shrubs or shrubs (sometimes climbing) or small trees, amounting, under 17 genera, (*Lindl.*) according to DC. pr., to 66 species for S. America, Mexico and the W. Indies; 34 for N. America; 27 for Europe; 6 for Siberia; 6 for N. Holland; 7 for Madagascar; 3 for Senegal; 2 for Caucasus; 1 for Altai; 1 for Persia; 1 for Arabia; and 1 for Manilla. S. Africa contains 3 species; (*Harvey*) and the E. Indies 27, viz. 11 from Nepal; 2 from the Khassya Mountains; 2 from the Neelgherries; 1 from Kunawur; 1 from Ceylon; 2 from Java; 2 from Penang; 1 from Oude; 4 from the plains of India; and 1 from Cochin-China; 19 of them belong to *Viola*; 3 to *Ionidium*; 3 to *Alsodeia*; and 1-2 to *Pentaloba*.

The roots of nearly all of the section *Violæ*, have an acrid, nauseous taste, and possess the property of acting as emetics, in a greater or smaller degree. This is especially the case with *Pombalia Ituba*, Ging., a S. American under-shrub, which with *Ionidium parviflorum*, Vent. is considered to form part of those plants that produce *Ipecacuanha*. In Europe, *Viola odorata*, *canina*, *tricolor* and *arvensis* are among the emetic plants, though not acting powerfully enough to be of use in medicine.

VIOLA, L. (DC. pr. 1, p. 291;—W. and A. pr. 1, p. 31.)

1. *cucullata*, Ell. (DC. o. c. p. 292; β *glaberrima*;—B. M. 43, t. 1795.) ♀. N. America. Fl. large, purplish-blue, C. S.; fr. 0.
2. *Roxburghiana*, (V. *primulifolia*, Roxb. fl. ind. 1, p. 650; ed. Carey, 2, p. 448; not L. nor Pursh. V. *mysorensis*, Wall. Cat. ?) ♂ Interior of Bengal, (Roxb.) Fl. smallish, indigo-coloured; and fr. throughout the year.
3. *odorata*, L. (DC. pr. 1, p. 296;—E. B. 9, t. 619.) *Sweet Violet*. ♀. Europe, Siberia, China. Fl. largish, violet, sweet-scented, C. S.
4. *serpens*, Wall. (DC. l. c.;—Roxb. fl. ind. ed. Carey, 2, p. 449;—

Royle, ill. t. 18, f. 1.) 2. Nepal, Khassy Mountains. Fl. smallish white, C. S.

5. *distantis*, Wall. (*Cat.*;—*Trans. med. and phys. soc. Calcutt.* vol. 7, part 2, p. 227) 2. Khassy Mountains. Fl. small, palish-violet, C. S.

6. *tricolor*, L. (*DC. pr.* 1, p. 303;—*J. Grah. Cat. B.* pl. p. 10;—*E. B.* 18, t. 1287.) *Heart's-ease.* ◎ Europe, Siberia, N. America. Fl. largish, violet, variegated with white and yellow, Jan. Feb. and March. *Herb* successfully used against *crusta lactea*.

IONIDIUM, Vent. (*DC. pr.* 1, p. 367;—*W. and A. pr.* 1, p. 32.)

1. *suffruticosum*, Ging. (*DC. o. c.* p. 311;—*W. and A. l. c.*;—*Wight. icon.* 1, t. 308;—*J. Grah. Cat. B.* pl. p. 10.—*Viola suffruticosus*, L.; *Roxb. fl. ind.* 1, p. 649; ed. *Carey*, 2, p. 447.—*Rheed.* 9, t. 60.) **ଛୂରବାଡ଼ୀ** *Noonbora*. 5 Peninsula of India, Bengal, (Serampore,) extending up the Gangetic Valley, nearly as far as Delhi. Fl. small, rose-coloured; and fr. nearly throughout the year.

ALSODEIA, Pet. Th. (*DC. pr.* 1, p. 313.)

1. *bengalensis*, Wall. (*Trans. med. and phys. soc. Calcutt.* vol. 7, part 2, p. 224.—*Pentaloba?* *bengalensis*, Wall. *Cat.*) 5 Khassy Mountains. Fl. very small, white, nearly throughout the year.

2. *Roxburghii*, Wall. (*l. c.*—*Vareca heteroclita*, *Roxb. fl. ind.* 1, p. 648; ed. *Carey*, 2, p. 446.—*Pentaloba?* *Roxburghii*, Wall. *Cat.*) 5 Lucknow, Amboina. Fl. small, white, C. S.

* *Calyptrion Aubletii*, Ging. 5 ~ Guiana.—*C. pyrifolium*, Mart. 5 Brazil. *Noisettia longifolia*, H. and B. 5 Cayenne.—*Glossarrhen floribundus*, Mart. 5 Brazil.—*Viola premorsa*, Dougl.;—B. Reg. 15, t. 1254. 2. California. Fl. large, gold-coloured.—*V. cornuta*, L.; B. M. 21, t. 791. 2. Spain.—*V. lactea*, Sm.; E. B. 7, t. 445. 2. Europe.—*V. palmarata*, L.; B. M. 15, t. 535. 2. Virginia.—*V. pedata*, L.; B. M. 3, t. 89.—*V. biflora*, L.; B. M. 46, t. 2089. 2. S. Europe.—*V. Patrinii*, DC. Wight. ill. t. 18. Siberia, Neelgherries.—*V. canina*, L.; E. B. and Kth. 5 Havanna.—*Alsodeia physiphora*, R. Br. 5 Brazil.—*Piparea dentata*, Aubl. 5 Cayenne.

SUB-ORDER.—SAUVAGESIEÆ, Lindl. Nat. Syst. p. 64.

Shrubs or annual herbs, of 2 genera, and 9 species; 8 from tropical S. America, and 1 from Madagascar.—Properties unimportant.

* *Sauvagesia geminiflora*, Moç. and Sesse. 2. Mexico.—*S. erecta*, L. ◎ S. America.

ORDER XLI.—SAMYDACEÆ, Lindl. Nat. Syst. p. 64.

Shrubs or trees, of 3 genera, containing, to judge from DC. pr., Wall. Cat. and Rept. and Royle ill., 60 species: 1 from New Caledonia; 1 from Mauritius; 37 from S. America, Mexico and the W. Indies; and 21 from the E. Indies. Of the latter, 18 belong to *Casearia*, and 3 are by R. Br. in Wall. Cat. put down as *Samidea*. They inhabit chiefly the Himalayas, the Circars, the Khassya Mountains, Assam, and Penang. 1 has been found in the Moluccas, and 3 in Java.—Properties unimportant.

CASEARIA, Jacq. (DC. pr. 2, p. 48.)

1. *Vareca*, Roxb. (*fl. ind.* 2, p. 418.—*Vareca*, Gärtn. *fr.* 1, *t.* 60.) 5 Khassya Mountains, Goalpara. Fl. small, greenish-yellow, May; fr. Sept. and Oct.
2. *glomerata*, Roxb. (*o. c. p.* 419.) 5 Silhet. Fl. small, greenish-yellow.—In H. C. G. fl. Dec.; fr. March. (Roxb.)
3. *Canziana*, Wall. (Samyda Canziana, Buch. in Wall. Cat.—C. ovata, Roxb. *fl. ind.* 2, p. 420. excl. syn. Rheed;—not Willd.) 5 Goalpara. Fl. small, greenish, March.
4. *glabra*, Roxb. (*fl. ind.* 2, p. 421.) L. 5 Moluccas. Fl. small, greenish. In H. C. G. fl. nearly throughout the year. (Roxb.)
5. *tomentosa*, Roxb. (*fl. ind.* 2, p. 421.) 5 Circars, Kemaon, Deyra-Dhoon. Fl. small, greenish, yellow, H. S.; fr. R. S.
6. *lanuginosa*, Buch. Goalpara.

* *Samyda rosea*, Sims.; B. M. 16, t. 550. 5 St. Domingo.

ORDER XLII.—MORINGACEÆ, Lindl. Nat. Syst. p. 65.

THE HORSE-RADISH-TREE TRIBE.

The only genus belonging to this order is:—

MORINGA, Burm. (DC. pr. 2, p. 478;—W. and A. pr. 1, p. 178.)

1. *pterygosperma*, Gärtn. (DC. l. c.;—W. and A. l. c.;—Wight. ill. 1, *t.* 77;—J. Grah. Cat. B. pl. p. 43.—Hyperanthera Moringa, Vahl.;—Roxb. *fl. ind.* 2, p. 368;—Rheed. 6, *t.* 11;—Rumph. 1, *t.* 74.) मॉरिंगा
Sujina. Horse-radish-tree. 5 Both Peninsulas of India. Bengal, (Serampore,) Hindoothan, &c. up to the Himalayas.—Domesticated in equatorial America. Fl. middle-sized, smelling of honey, Jan. Feb. and March; fr. H. S.—Root a substitute for Horse-radish, used medicinally by the Natives.—Bark, wounded, exudes a quantity of gum. Leaves, flowers and immature capsules eaten by the Natives in their curries, the latter forming, according to Dr. Gibson, a good substitute

for asparagus. Oil of the seeds in the W. Indies used as salad oil, and because it does not congeal or turn rancid, employed by watch-makers, and for retaining the aroma of delicate flowers.

B. rubriflora, Roxb. Fl. red.—Malda.

* *M. concanensis*, Nimmo; J. Grah. Cat. B. pl. p. 43. b South Concan.

Besides these two species, 3 additional ones (2 Indian, and 1 Arabian,) are mentioned, but they are very uncertain.

ORDER XLIII.—DROSERACEÆ, DC.—Lindl. Nat. Syst. p. 66.

THE SUNDEW TRIBE.

Herbaceous, rarely shrubby, bog or water-plants, of 6 genera amounting to 52 species: 13 from S. America; 6 from N. America; 4 from Europe; 12 from S. Africa; 1 from Madagascar; 8 from New Holland; 2 from Van Diemen's Land; 2 from China; and 4 from the E. Indies. One species, *Drosera Burmanni*, Vahl., grows on the mountains as well as on the plains, and one, *Drosophyllum lusitanicum*, Lk., lives on hills and on the barren sands of Portugal. Of the E. Indian forms, 1 belongs to *Aldrovanda*, and is, according to W. and A., identical with the S. European *A. vesiculosa*, L. The 3 others are species of *Drosera*. Properties unimportant. *Drosera communis*, St. Hil., of Brazil, is said to be poisonous to sheep. The same has been said of other species. *D. lunata*, Buch. might perhaps, according to Royle, yield a valuable dye, as the paper in which the plants were dried became of a pink colour.

DROSEBA, L. (DC. pr. 1, p. 317;—W. and A. pr. 1, p. 33.)

1. *Burmanni*, Vahl. (DC. o. c. p. 318;—W. and A. o. c. p. 34;—Roxb. fl. ind. 2, p. 113;—Wight. ill. 1, p. 42, t. 20;—J. Grah. Cat. B. pl. p. 11.—Burm. zeyl. t. 94, f. 2.) ◎ Ceylon, Peninsula of India. Bengal, Silhet. Fl. very small, yellow; and fr. C. S.

ALDROVANDA, L. (DC. pr. 1, p. 319;—W. and A. pr. 1, p. 34.)

1. *vesiculosa*, L. (DC. l. c.;—W. and A. l. c.—*A. verticillata*, Roxb. fl. ind. 2, p. 112.) बालाकांडा जंजीरि Malaka-jhanji. ◎ Standing water in S. Europe and Bengal. Fl. small, white. Has been introduced into H. C. G. The Bengalee name of the plant is familiar to some of my gardeners, but they have as yet not succeeded in procuring it from the neighbourhood.

* *Drosera indica*, L.; Wight. ill. 1, p. 42, t. 20, f. C. Ceylon, Peninsula of India, Tavoy.—*D. lunata*, Buch.; Wight. ill. 1, p. 42, t. 20, f. D. under the name of *D. peltata*.

SUB-ORDER.—PARNASSIÆ. Arn.—Wight ill. 1, p. 43.

A small tribe of herbaceous perennial herbs, of 1 genus, and 12 species : 1 European ; 1 Siberian ; 5 N. American ; and 5 Indian. Of the latter, 1 has been found on the Mountains in the south of the Peninsula of India ; 1 in Mysore ; the rest in the Himalayas. Properties unimportant. *Parnassia palustris*, L. was formerly used in diseases of the eye, and liver.

* *Parnassia mysorensis*, Heyne. Wight. ill. 1, p. 45, t. 21. 24. Mysore.

ORDER XLIV.—FRANKENIACEÆ, St. Hil.—Lindl. Nat. Syst. p. 67.

Herbs, rarely annual, or under-shrubs, of 3 genera, containing 25 species ; 3 N. African ; 6 S. African ; 2 N. American ; 1 S. American ; 1 from the Canaries ; 1 from St. Helena ; 1 from Mogador ; 3 from New Holland ; 1 from Tauria ; and 5 common to several parts of the world.—Properties unknown.

* *Frankenia pulverulenta*, L.—E. B. 17, t. 1211. ◎ Sea-shores of Europe.
Beatsonia portulacifolia, Roxb. 5. Shores of St. Helena.

ORDER XLV.—PASSIFLORACEÆ.—Lindl. Nat. Syst. p. 67.

THE PASSION-FLOWER TRIBE.

Herbs or shrubs, generally climbing, seldom erect, very rarely trees, of 14 genera, and more than 200 species. By far the greater part of these inhabit S. America, Mexico, and the W. Indies. 20 have been found in the E. Indies ; 7 in New Holland and Van Diemen's Land ; 4 in Madagascar ; 3 in Sierra Leona ; 2 in S. Africa ; 1-2 in N. America ; and 1 in Mauritius. Of the E. Indian forms, which chiefly have been found in Java and both Peninsulas of India, 1 belongs to *Tacsonia* ; 6 to *Passiflora* ; and 12 to *Medecca*.

"Nothing is known of the properties of this order further than that the succulent aril and pulp that surround the seed are fragrant, juicy, cooling, and pleasant, in several species." (Lindl.)

PASSIFLORA, L. (DC. pr. 3, p. 322 ;—W. and A. pr. 1, p. 352.)

1. *minima*, Jacq. (DC. o. c. p. 325 ;—B. Reg. 2, t. 144 ;—Roxb. H. B. p. 49 ;—J. Grah. Cat. B. pl. p. 80.) 5 ↳ Curaçao. Fl. small, yellowish-green, fragrant ; and fr. the whole year.
2. *suberosa*, L. (DC. l. c. ;—Roxb. H. B. p. 49.) 5 ↳ W. Indies. Fl. white, fragrant, R. S.

3. *biflora*, Lam. (*DC. pr. 3, p. 326*;—*B. lunata, Sm.*;—*B. Reg. 7, t. 577*;—*B. M. 49, t. 2354*) 5 ↳ Mexico, Jamaica. Fl. middle-sized, greenish-white, fragrant, throughout the year.
4. *serratifolia*, L. (*DC. pr. 3, p. 327*;—*B. M. 18, t. 651*) 5 ↳ Surinam. Fl. large, greenish-blue, purple, fragrant, R. S.
5. *quadrangularis*, L. (*DC. pr. 3, p. 328*;—*B. M. 46, t. 2041*;—*B. Reg. 1, t. 14*) 5 ↳ Jamaica. Fl. very large, whitish rose-coloured, variegated with blue, &c. fragrant, R. S.
6. *alata*, Ait. (*DC. l. c.*;—*B. M. 2, t. 66*;—*B. Cab. 3, t. 246*) 5 ↳ Peru, W. Indies. Fl. very large, rose-scarlet, variegated with several colours, fragrant, R. S.
7. *laevis*, L. (*DC. l. c.*;—*Roxb. H. B. p. 49*;—*J. Grah. Cat. B. pl. p. 80*;—*B. Reg. 1, t. 13*) 5 ↳ W. Indies, Surinam. Fl. large, blue, variegated with several colours, fragrant, R. S.; fr. C. S.
8. *racemosa*, Brot. (*DC. pr. 3, p. 329*;—*B. Reg. 4, t. 285*;—*B. M. 45, t. 2001*.—*P. princeps, B. Cab. 1, t. 84*) 5 ↳ Brazil. Fl. very large, intensely red, variegated with purple, scentless; at different periods of the year, but especially C. S.
9. *coeruleo-racemosa*, Sab. (*DC. l. c.*;—*B. C. 6, t. 573*) A Hybrid of *P. racemosa* (female) and *P. coerulea* (male.) 5 ↳ Fl. large, scentless, blue, R. S.
10. *incarnata*, L. (*DC. pr. 3, p. 329*;—*B. M. 65, t. 3697*.) β *alba*. 5 ↳ Virginia. Introduced in 1840.
11. *edulis*, Sims. (*B. M. 45, t. 1989*;—*DC. l. c.*;—*P. incarnata, β , B. Reg. 2, t. 152*) 5 ↳ Brazil. Fl. middle-sized, greenish-white, R. S., fr. C. S., eatable, of a grateful scent.
12. *coerulea*, L. (*DC. pr. 3, p. 330*;—*B. M. 1, t. 28*;—*B. Reg. 6, t. 488*;—*Roxb. H. B. p. 49*) 5 ↳ Brazil. Fl. large, pale-green, variegated with deep-green, blue, pale-rose and yellow, R. S.
13. *foetida*, Cav. (*DC. pr. 3, p. 331*;—*B. Reg. 4, t. 321*;—*B. M. 53, t. 2619*;—*J. Grah. Cat. B. pl. p. 80*) 2. Creeping. W. Indies. Fl. largish, greenish-white, R. S.; fr. C. S.—Whole plant fetid.
14. *chinensis*, Wall. MSS. 5 ↳ China? Introduced in 1836. Fl. 1839.
15. *Mayana*, Veitch. MSS. 5 ↳ Received from Killerton Nursery, Exeter. Has not fl. here.
16. *phoenicea*, Lindl. (*B. Reg. 19, t. 1603*) 5 ↳ S. America? Fl. in 1840.
17. *holosericea*, L. (*ejusdem amoena 226, t. 10, b. 15*;—*B. Reg. 1, t. 59*;—*B. M. 45, t. 2015*) Vera Cruz, Fl. 1840.
18. *kermesina*, Lk. and Otto. (*B. Reg. 19, t. 1633*;—*B. M. 63, t. 3503*) Fl. 1840.

MURUCUIA, Tournef. (*DC. pr. 3, p. 333*)

1. *ocellata*, Pers. (*DC. l. c.*—*Passiflora Murucuia, L.*;—*B. Reg. 7, t. 574*) 5 W. Indies. Fl. middle-sized, scarlet, R. S.
- MODECCA, Rheed. (*DC. pr. 3, p. 336*;—*W. and A. pr. 1, p. 353*)
1. *palmata*, Lam. (*DC. l. c.*;—*W. and A. l. c.*;—*Wight. icon. 1, t. 201*—

- M. *tuberosa*, Roxb. *fl. ind.* 3, p. 134.—M. *integrifolia*, Lam.; *DC. l. c.*; —*Rheed.* 8, t. 20-23.) 5 (Courtallum, Cochin. Fl. largish, yellowish-pale-green, scentless. In H. C. G. fl. R. S.; fr. Oct. (*Roxb.*)
2. *dubia*, Roxb. (*fl. ind.* 3, p. 135.) 5 (Sumatra. Fl. small, pale greenish-yellow. In H. C. G. fl. Feb. (*Roxb.*)
3. *trilobata*, Roxb. (*Corom.* 3, t. 271;—*fl. ind.* 3, p. 132;—*Spreng. syst.* 3, p. 45.) 5 (Chittagong. Fl. middle-sized, yellow. In H. C. G. fl. R. S.; fr. Sept. and Oct. (*Roxb.*)
4. *furfuracea*, Wall. Cat. 5 (Prome. Introduced in 1839. Has not fl.
5. *extensa*, Wall. 5 (Khassy Mountains. In H. C. G. fl. R. S.

Indies.—*Ryanæa speciosa*, Vahl. 5 (Trinidad, Cayenne.—*Patricia bicolor*, DC. 5 (Cayenne.

ORDER XLVI.—PAPAYACEÆ,—Mart. Lindl. Nat. Syst. p. 69.

THE PAPAW TRIBE.

Trees, natives of S. America, arranged in 1 genus, containing according to Spreng. syst., 6 species.

CARICA, L. (*Spreng. syst. 3*, p. 895, No. 3190;—*W. and A. pr. 1*, p. 325.)

1. *Papaya*, L. (*Spreng. o. c. p. 905*;—*Roxb. fl. ind. 3*, p. 824;—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p. 80*;—*B. Reg. 6. t. 459. (male)*;—*B. M. 56. t. 2898-9*;—*Wight. ill. 2. t. 106-7*;—*Rheed. 1. t. 15. f. 1. (male.) and 2 (female.)*;—*Rumph. 1. t. 50.*) (পেপিয়া) *Pepiya*. 5. S. America. Domesticated in India. Fl. middle-sized, pale yellow, fragrant; and fr. nearly the whole year.—*Trees* about Serampore either straight and without branches like a palm, or branched. *Leaves* employed by the negroes in the W. Indies to wash their linen, instead of soap. *Fruit*, when unripe, used in curries by the Natives, also pickled, and made into a preserve;—when ripe, the soft, yellow pulp, which is very delicious to many, is eaten without the addition of pepper and sugar, as in the W. Indies. It is certainly wholesome, more especially when some of the olive-coloured, pungent, caper-like seeds are partaken of at the same time. *Juice of the pulp* employed in the W. Indies against freckles, *of the unripe fruit* as an efficient vermifuge. “The tree has, moreover, the singular property of rendering the toughest animal substances tender, by causing a separation of the muscular fibre; its very vapour even does this; newly-killed meat suspended among the leaves, and even old hogs and old poultry, when fed on the leaves and fruit, become tender in a few hours.—A principal constituent of the juice of the unripe fruit is fibrine, a principle otherwise supposed peculiar to the animal kingdom and to fungi.” (*Lindl.*)

* *C. citriformis*, Jacq. fil.; *B. M. 65. t. 3133.* 5 Guiana.

ORDER XLVII.—FLACOURTIACEÆ.—*Lindl. Nat. Syst. p. 70.*

Bennet in *Horsf. pl. jav. rar. 2*, p. 189-190

Shrubs or small trees, forming 10-13 genera. *Flacourtia*, *Phoberos*, *Roumea*, *Banara*, *Zylosma*, *Prockia*, *Thiodia*, *Aphloia*, *Azara*, *Echinocarpus*, *Trichospermum*, *Ludia?* *Laetia?* from Madagascar; Guinea; Africa; Mauritius; New Holland; S. America. Fifteen species are from the E. Indies. Of those which inhabit Nepal, the Neelgherries, Java, Sumatra and the Moluccas, 9 belong to *Flacourtia*, and 9 to *Phoberos*.—Properties nearly unknown.

FLACOURTIA, L'Herit. (*DC. pr. 1. p. 256*;—*W. and A. pr. 1. p. 29.*)

1. *Ramontchi*, L'Herit. (*DC. l. c.*;—*W. and A. l. c.*;—*Roxb. fl. ind. 3. p. 834*;—*Wight. icon. 1. t. 85*;—*J. Grah. Cat. B. pl. p. 10.*) 5 Madagascar. Introduced into H. C. G. Fl.?
2. *sapida*, Roxb. (*Corom. 1. t. 69*;—*fl. ind. 3. p. 835*;—*DC. pr. 1. p. 256*;—*W. and A. pr. 1. p. 29*;—*J. Grah. Cat. B. pl. p. 10.*) ৰুইচ Boinch. 5 Peninsula of India. Bengal, (Serampore,) Hindoos-

than and northwards to Deyra-Dhoon. Fl. minute, greenish, C. S.; fr. H. S.—*Fruit* eaten by the Natives.

3. *sepiaria*, Roxb. (*Corom.* 1, *t.* 68;—*fl. ind.* 3, *p.* 835;—*DC. pr.* 1, *p.* 256;—*W. and A. pr.* 1, *p.* 29;—*J. Grah. Cat. B. pl.* *p.* 10;—*Rheed. 5. t.* 39.) 5 Peninsula of India, Bengal, Nepal, Kemoan. Fl. minute, greenish, C. S.; fr. H. S.
4. *inermis*, Roxb. (*Corom.* 3, *t.* 222;—*fl. ind.* 3, *p.* 833;—*DC. pr.* 1, *p.* 256;—*W. and A. pr.* 1, *p.* 29.) 5 Moluccas, both Peninsulas of India, Silhet. Fl. minute, greenish, Feb. and March; fr. Nov. *Fruit* too sour to be eaten raw, but makes very good tarts. (*Roxb.*)
5. *cataphracta*, Roxb. (*fl. ind.* 3, *p.* 834;—*DC. pr.* 1, *p.* 256.) পানিজাতা *Paneeyala*. 5 Assam, Monghir, Nepal. Fl. minute, greenish, C. S.—*Fruit* palatable, reckoned wholesome. (*Roxb.*)
6. *ferox*, Wall. MSS.—In H. C. G. Fl.?
7. *obcordata*, Roxb. (*fl. ind.* 3, *p.* 835.) 5 Chittagong. Has been introduced into H. C. G.?
8. *cordifolia*, Roxb. (*H. B.* *p.* 73.) 5 Silhet. Introduced into H. C. G. in 1810, but had not fl. in 1814.
9. *rotundifolia*, Roxb. (*I. c.*) 5 Coromandel. Introduced into H. C. G. in 1804, but had not fl. in 1814.
10. *Campbelliana*, Roxb. (*I. c.*) 5 Sumatra.—Introduced into H. C. G. in 1800, but had not fl. in 1814.

PHOBEROS, Lour. (*W. and A. pr.* 1, *p.* 29.)

1. *chinensis*, Lour. (*Roumea chinensis*, *Wall. Cat.*) 5 Introduced in 1840.
2. *Roxburghii*, Bennet. (in *Pl. Jav. Rar.* *p.* 182. *sine charactere*.—*Ludia spinosa*, *Roxb. fl. ind.* 2, *p.* 507.—*Flacourtie?* *Stigmarota*, *Wall. Cat.*) 5 Sumatra. Fl. small, reddish-white, March and April; fr. Sept. (*Roxb.*) The tree in the garden here unarmed.

* ? *Erythrospermum macrophyllum*, Poir. 5 Mauritius. ?—*E. paniculatum*, Poir. 5 Mauritius. ?—*E. verticillatum*, Lam. 5 Mauritius.

ORDER XLVIII.—PANGIACEÆ, Lindl. Nat. Syst. *p.* 70.

Containing only the 3 following species:—

HYDNOCARPUS, Gärtn. (*DC. pr.* 1, *p.* 257;—*W. and A. pr.* 1, *p.* 30.)

1. *inebrians*, Vahl. (*DC. I. c.*;—*W. and A. I. c.*;—*Wight. ill. 1, t.* 16;—*J. Grah. Cat. B. pl.* *p.* 10.) 5 Ceylon, Malabar. Fl. small, white.—In H. C. G. Fl.?—*Fruit* used at Ceylon for poisoning fish.
2. *odoratus*, Lindl. (*Wight. ill. 1, p.* 37.—*Gynocardia odorata*, *Roxb. Cor.*—*Chaooolmoogra odorata*, *Roxb. fl. ind.* 3, *p.* 836.) 5 Assam, Silhet. Fl. large, pale yellow, fragrant. Has been in the garden

here for more than twelve years, without fl.—*Seeds* used by the Natives at Silhet in the cure of cutaneous disorders. Freed from their integuments, they are beaten up with clarified butter into a soft mass, and in this state applied thrice a day to the parts affected. (*Roxb.*)

* *Pangium Rumphii*, (*Rumph.* 2, t. 59.) 5 Java, Moluccas.

ORDER XLIX.—TURNERACEÆ, DC.—Lindl. Nat. Syst. p. 71.

Annual and perennial herbs, sometimes under-shrubs, all natives of S. America, Mexico and the W. Indies, of 2 genera and 31 species.—Properties unknown.

TURNERA, L. (*DC. pr.* 3, *p.* 346.)

1. *ulmifolia*, L. (*DC. l. c.*)

β. *angustifolia*, DC. (*T. angustifolia*, Curt.;—*B. M.* 8, *t.* 221.) 5 Jamaica. Fl. largish, uniformly yellow; and fr. the whole year. Domesticated about Serampore.

2. *trioniflora*, Sims. (*B. M.* 47, *t.* 2106.—*DC. pr.* 3, *p.* 346.) 2. Brazil, Trinidad, Mexico. Fl. large, cream-coloured with a dark purple-eye; and fr. the whole year. Domesticated about Serampore.

* *T. cuneiformis*, Juss. 5 Rio Janeiro—*T. brasiliensis*, Willd. 5 Brazil.—*T. acuta*, Spreng. 5 Jamaica.—*Piriqueta villosa*, Aubl. 2 Guiana.

ORDER L.—BIXACEÆ.—Lindl. Nat. Syst. p. 72.

THE ARNOTTO TRIBE.

Trees of only one genus, and 1-2 species.

BIXA, L. (*DC. pr.* 1, *p.* 259;—*W. and A. pr.* 1, *p.* 31.)

1. *Orellana*, L. (*DC. l. c.*) 5 Hot parts of America. Fl. largish, inodorous, R. S.; fr. C. S.

α caribaæ, (*Bixa Orellana*, *B. M.* 35, *t.* 1456.) Cultivated in the W. Indies. Fl. rose-coloured; immature fr. dark reddish-brown.

β. indica, (*Bixa Orellana*, *Roxb. fl. ind.* 2, *p.* 581;—*W. and A. pr.* 1, *p.* 31;—*Wight. ill.* 1, *t.* 17;—*J. Grah. Cat. B. pl. p.* 10;—*Rumph.* 2, *t.* 19.) लुटकन *Lutkun*. Flowers white; immature fruit, green. Cultivated in India.

Bixa yields the substance *Arnotto*, in France called *Rocou*, which is the pulp of the seeds. Farmers use it to stain their cheeses, and dyers to obtain a reddish colour. The dye of the Indian variety is neither so abundant, nor so good, as that from the W. Indies; where also the bark of the tree is used for cordage.

ORDER LI.—GARCINIACEÆ (CLUSIACEÆ. Lindl. Nat. Syst. p. 74.)

THE MANGOSTEEN TRIBE.

Trees or shrubs, rarely climbing, sometimes (*Clusia*) parasitical, with the exclusion of *Xanthochymus*, contained, according to Lindl. (*l. c.*) in 22 genera. Of these our materials only assign 35 species to S. America, Mexico and the W. Indies, but their number must be considerably greater. Two species have been found in Madagascar; 1 in Mauritius; 1 in Guinea; 1 in Tongatabu; and 60 in the E. Indies. (Moluccas, Java, Ceylon. Both Peninsulas of India. The Khassya Mountains, Silhet.) Of the latter, 30 belong to *Garcinia*; 20 to *Calophyllum*; 6 to *Mesua*; 1 to *Gynotroches*; 1 to *Kayea*; 1 to *Calysaccion*; and 1 to *Apoterium*.

A very good synopsis of the Indian Garciniaceæ (Guttiferae) will be found in *Wight's. ill. I.*, p. 124-129.

"The species of this order, (Guttiferae,) all abound in a viscid, yellow, acrid and purgative gum-resinous juice resembling *Gamboge*. This gum-resin is obtained by removing the bark, or by breaking the leaves and young shoots." (*Lindl.*) "The most important and finest qualities are generally considered to come from the kingdom of Siam, and are imported into England from China by way of Singapore. Among these the wholesale druggist distinguishes by name at least two, and generally three varieties—*Pine Gamboge*, *Cake or Lump Gamboge* and *Coarse Gamboge*." (*Graham in Companion to Bot. Mag.*) The first variety is well known under the name of Gum Gamboge.

GARCINIA, L. (*Wight. ill. I.*, p. 124.)

1. *Mangostana*, L. (*Wight. l. c.*;—*DC. pr. I.*, p. 560;—*Gürtz. fr. 2.* t. 103;—*Roxb. fl. ind. 2.*, p. 618;—*J. Grah. Cat. B. pl. p. 26*;—*Rumph. 1.*, t. 43, female.) 5 Moluccas. Malay Islands. Fl. large, reddish green yellow. Has not fl. in Bengal, I believe; indeed, it can scarcely be kept alive.—Gives the well-known fruit, *Mangoosten*, believed to be the most palatable of all known fruits.
2. *cornea*, L. (*Wight. ill. I.*, p. 124;—*DC. pr. I.*, p. 561;—*Roxb. fl. ind. 2.*, p. 229;—*Wight. icon. 1.*, t. 105;—*Rumph. 3.*, t. 30.) 5 Moluccas. Penang. Moulmein. Fl. middle-sized, yellowish, Feb. and March; fr. May and June.
3. *Kydiana*, Roxb. (*H. B. p. 42*;—*Wight. ill. I.*, p. 125; *icon. 1.*, t. 113.—G. Kydia, *Roxb. fl. ind. 2.*, p. 623, not W. and A.) 5 Andaman Islands. Fl. middle-sized, yellowish.—In H. C. G. fl. Feb.; fr. July. Fruit very sharp but pleasantly acid, and, like the rest of the genus, the aril is by far the more palatable part. (*Roxb.*)
4. *pedunculata*, Roxb. (*fl. ind. 2.*, p. 625;—*Wight. ill. I.*, p. 125;—*icon. 1.*, t. 114. (female,) and 115. (male.) L. 5 Rungpore.—In H. C. G. Fl.?—Aril copious, firm, and of a very sharp, pleasantly acid taste. (*Roxb.*)

5. *paniculata*, Roxb. (*fl. ind.* 2, p. 628;—*Wight, ill.* 1, p. 125; *icon.* 1, t. 112.) 5 Silhet. Fl. small, white. In H. C. G. fl. C. S.; fr. July. Aril palatable, tasting somewhat like that of the Mangosteen. (*Roxb.*)

6. *purpurea*, Roxb. (*fl. ind.* 2, p. 624;—*Wight, ill.* 1, p. 125;—*J. Grah. Cat. B. pl.* p. 25.) 5 Malabar. In H. C. G. Fl.?—Fruit agreeably acid, eaten by the Natives. Workers in iron use the acid juice as a mordaunt; a concrete oil is obtained from the seeds, which is well known and used at Goa for adulterating ghee. (*Bombay Courier*, 12th June, 1830.)

7. *lanceolata*, Roxb. (*fl. ind.* 2, p. 623;—*Wight, ill.* 1, p. 125;—*icon.* 1, t. 103. male.) 5 Silhet. In H. C. G. Fl.?—Cultivated at Silhet, on account of its fruit, of which the Natives are fond.

8. *Roxburghii*, Wight. (*ill.* 1, p. 125;—*icon.* 1, t. 104;—*J. Grah. Cat. B. pl.* p. 26.—G. Cambogia, *Roxb. Corom.* 3, t. 298;—*fl. ind.* 2, p. 621; not Desrouss.—G. zeylanica, *Roxb. fl. ind.* p. 621.—G. Cowa, *Roxb. fl. ind.* 2, p. 622;—*W. and A. pr.* 1, p. 101.—G. affinis, *W. and A. l. c.*—*J. Grah. Cat. B. pl.* p. 25.) 5 Ceylon, Travancore, Malabar, Chittagong. Fl. small, sulphur-coloured, Feb.; fr. June. Fruit eatable, but very acid.

9. *dioeca*, Sm. (*Rees' Cyclop.* vol. 15.) 5 In H. C. G. Fl.?

10. *porrecta*, Wall. Ceylon. In H. C. G. Fl.?

MAMMEA, L. (*DC. pr.* 1, p. 561.) *Mamme tree.*

1. *americana*, L. (*DC. l. c.*;—*Roxb. H. B.* p. 41.) 5 W. Indies.—In. H. C. G. fl. H. S. (*Roxb.*) In the W. Indies the juice is employed to destroy the chiggers, little insects which attack the naked feet, introducing themselves into the flesh below the toe nails. (*Lindl.*)

MESUA, L. (*DC. pr.* 1, p. 562;—*W. and A. pr.* 1, p. 102.)

1. *Roxburghii*, Wight. (*ill.* 1, p. 127.—*Mesua ferrea*, *Roxb. fl. ind.* 2, p. 605, not W. and A.?) *নাগকুশুর* *Nagkushur.* 5 Cultivated in Bengal. Fl. very large, fragrant, H. S.; fr. C. S. Flowers found in the bazars in a dried state, being used in medicine as well as esteemed for their fragrance. The grandees of Ava are said to stuff their pillows with the dried anthers of the flowers, on account of their fragrance. (*Roxb.*)

CALOPHYLLUM, L. (*DC. pr.* 1, p. 562;—*W. and A. pr.* 1, p. 102.)

1. *Leptophyllum*, L. (*DC. l. c.*;—excl. syn. Rumph.;—*W. and A. o. c.* p. 103. excl. syn. Rumph. and C. Bintagor, *Roxb.*;—*Roxb. fl. ind.* 2, p. 606;—*Wight, icon.* 1, t. 77;—*J. Grah. Cat. B. pl.* p. 26.) *সুলতানাচংপা* *Sultana-champa.* L. 5 Both Peninsulas of India. Fl. largish, white, fragrant, June and July; fr. C. S.

2. *polyanthum*, Wall. 5 Khassy Mountains. In H. C. G.

3. *angustifolium*, Roxb. (*fl. ind.* 2, 608.) 5 Penang.

4. *Tacamahaca*, Wild. (*DC. pr.* 1, p. 562.) 5 Madagascar, Sechelles.

210
SLKAYRA, Wall. (*Wight, ill. 1, p. 129.*)

1. *floribunda*, Wall. (*Pl. as. rar. 3, t. 201;—Wight, I. c.*) L. 5 Khassya Mountains. Fl. largish, white, tinged with rose, fragrant. In H. C. G. Fl.?

* *Garcinia speciosa*, Wall. pl. as. rar. 3, t. 258. b. Amherst.—*G. celebica*, L. Rumph. 1, t. 44. 5 Island of Celebes.—*G. cochinchinensis*, Choisy. Rumph. 3, t. 32. b. China. Perhaps the very tree that yields the Pipe Gamboge.—*G. Cambogia*, Desrousse. Rheed. 1, t. 24. 5 Ceylon. Malabar. Courtallum.—*G. Gutta*, Wight. ill. 1, t. 44. 5 Ceylon.—*G. javanica*, Bl. 5 Java.—*G. Bhoomicowa*, Wall. Cat. 5 Silhet.—*Gynotroches axillaris*, Bl. 5 Java.—*Mesua speciosa*, Choisy. Rheed. 3, t. 53. b. Malabar.—*M. ferrea*, L. Wight. icon. 1, t. 118. 5 Ceylon. *M. coromandelina*, Wight. icon. 1, t. 117. 5 Courtallum.—*M. penduliflora*, Wight. icon. 1, t. 119. 5 Mergui.—*Calophyllum Blumii*, Wight. 5 Java.—*C. Bintagor*, Roxb. Rumph. 2, t. 71. 5 Moluccas. Mauritius.—*C. tomentosum*, Wight. 5 Ceylon.—*C. decipiens*, Wight. Rheed. 4, t. 39. 5 Travancore. S. Concan.—*C. Moonii*, Wight. icon. 1, t. 111. 5 Ceylon.—*C. Burmanni*, Wight. icon. 1, t. 108. 5 Ceylon.—*Calysaccion longifolium*, Wight. 5 Bombay.—*Rheedia lateriflora*, L. 5 Martinique.—*Pentadesma butyracea*, R. Br. The Butter-tree of S. Leon.—*Moronobea coccinea*, Aubl. 5 Guiana.—*Micranthera clusiifolia*, Choisy. 5 Cayenne.—*Quapoya scandens*, Aubl. 5 Guiana.—*Q. Panapanari*, Aubl. 5 Guiana.—*Clusia rosea*, L. 5 St. Domingo.—*C. alba*, L. 5 S. America.—*C. flava*, L. 5 Jamaica.—*Tavomita guianensis*, Aubl. 5 Guiana, Brazil.

ORDER LIL.—CANELLACEÆ, Mart.—(Sub-Order? CANELLEÆ, Lindl.
Nat. Syst. p. 75.)

Trees, contained in 2 genera, *Platonia* Mart.; S. American, and *CANELLA*, P. Browne, (*DC. pr. 1, p. 563.*)

1. *alba*, Murr. (*DC. I. c.;—Trans. Linn. Soc. 1, p. 102, t. 8.* Winterana Canella, L.) 5 W. Indies. Fl. small, glaucous-brown, fragrant, H. S.; fr. O. Bark stimulant, tonic, but now almost obsolete.

ORDER LII.—CARYOCARACEÆ, (RHIZOBOLACEÆ.—DC. Lindl.
Nat. Syst. p. 76.)

" Six large trees found in the forests of the hottest parts of S. America constitute the whole of the order.—Some of them are known for producing the *Souari* (*vulgò Suwarrow*) Nuts, of the shops, the kernel of

which is one of the most delicious fruits of the nut kind that is known. An oil is extracted from them not inferior to that of the Olive." (*Lindl.*)

- * *Caryocar nuciferum*, L. B. M. 54. t. 2727-8. *Souari*, or *Butter-nut*. Essequebo, Berbice. Flowers very large, purplish-brown.—*C. glabrum*, Pers. Guiana.—*C. tomentosum*, Willd. Guiana.—*C. butyrosorum*, Willd. Guiana.

ORDER LIV.—MARCGRAAVIACEÆ, Juss.—Lindl. Nat. Syst. p. 77.

Shrubs, sometimes of a scrambling habit, (*Marcgravia*) of 4 genera, containing 9 species : 1 from New Caledonia, and 8 from S. America and the W. Indies.—Properties unknown.

- * *Marcgravia umbellata*, L. 5 Trinidad. *M. coriacea*, Vahl. 5 Guiana. *Norantea guianensis*, Aubl. 5 Guiana. *N. brasiliensis*, Choisy. 5 Brazil. *Ruyschia clusiifolia*, Jacq. 5 Guiana. *R. Souroubea*, Willd. 5 Guiana.

ORDER LV.—HYPERICACEÆ, Lindl. Nat. Syst. p. 77.

THE TUTSAN TRIBE.

Perennial herbs, undershrubs, shrubs, or trees, "very generally spread all over the earth, inhabiting mountains and vallies, marshes and dry plains, meadows and heaths, in N. America, Asia, S. America, Europe, Africa, and its neighbouring Islands, and New Holland," (*Lindl.*), who refers all of them to 13 genera.—"These are by Spach increased to 27, species of 23 of which were formerly united under the large and very complex genus *Hypericum*." (*Wight. ill. 1, p. 111.*) DC. (1824) enumerates 165 species, of which N. America contains the largest number, 38; Europe 28; S. America 20; the E. Indies 9, &c. The latter now amount to 45; 1 of *Ancistrolobus*; 4 of *Xanthochymus*; 7 of *Norysca*; 2 of *Brathys*; and, according to DC., Spreng, and Wall. Cat., 31 of *Hypericum*, and " *Hypericinae*;"—Most of these species have been found on the Himalayas, the Khassy Mountains, the Neelgherries, and at Penang and Singapore.—Properties unimportant.

ANCISTROLOBUS, Spach. (*Wight. ill. 1, p. 111.*)

1. *carneus*. Wall. (*Rept.*—*Hypericum carneum*, *Wall. Cat.*) 5 China. Fl. small, palish scarlet, March, April and May; fr. C. S.

XANTHOCHYmus, Roxb. (*DC. pr. 1, p. 562;*—*W. and A. pr. 1, p. 101*)—Referred to this order conformably with the views of *Wight. ill. 1, p. 122.*

1. *pictorius*, Roxb. (*Corom. 2, t. 196;*—*fl. ind.* 2, p. 633;—*DC. pr. 1, p. 562;*—*W. and A. pr. 1, p. 102.*) L. 5 Circars. Penang. Silhet.

SL

- Fl. small, greenish-white, April; fr. C. S.—This beautiful tree yields a green fruit and a large quantity of indifferent gamboge. (*Roxb.*) Does not possess the elements of Gamboge. (*Wight.*)
2. *ovalifolius*, Roxb. (*fl. ind. 2. p. 632*;—*W. and A. pr. 1. p. 102*;—*J. Grah. Cat. B. pl. p. 26*.—Stalagmites cambogioides, *Moon's Cat. Ceylon, pl.*.—Cambogia Gutta, *Burm. fl. ind. ex pte.*) 5 Ceylon. Fl. very small, greenish-white, H. S. fr. July.
3. *dulcis*, Roxb. (*fl. ind. 2. p. 631*;—*B. M. 58. t. 3088*;—*Wight. icon. 1. t. 192.*) 5 Moluccas, Penang. Fl. smallish, greenish-white, June and July; fr. C. S.

NORYSCA, Spach. (*in Wight. ill. 1. p. 113.*)

1. *chinensis*, (*Hypericum chinense*, *L.*;—*DC. pr. 1. p. 545*.—*H. monogynum*, *L.*;—*B. M. 10. t. 334*;—*Roxb. fl. ind. 3. p. 400.*) 5 China. Fl. large, gold-coloured, and fr. the greater part of the year.
2. *cernua* (*Hypericum cernuum*, *Roxb. fl. ind. 3. p. 400.*) 5 Hurdwar, Shreenagur. Fl. large, gold-coloured, Jan. Feb. and March; fr. O.
3. *patula*, (*Hypericum patulum*, *Thunb.*.—*H. uralum*, *Buch.*;—*B. M. 50. t. 2375.*) 5 Nepal, Kemaon, Khassya Mountains.—Has been introduced into H. C. G. Fl.?

-
- * *Heronga madagascariensis*, Choisy. 5 Madagascar, Bourbon.—*Vismia sessilifolia*, Pers. 5 Guiana.—*V. reticulata*, Choisy. 5 Guiana.—*V. guianensis*, Pers. 5 Guiana.—*V. rufescens*, Pers. 5 Guiana.—*V. brasiliensis*, Choisy. 5 Brazil.—*V. cayennensis*, Pers. 5 Cayenne.—*Norysca mysorensis*, Arn. 5 Mysore, Neelgherry.—*N. Hookeriana*, Wight. 5 Peninsula of India.—*Brathys japonica*, Wight. 5 Khassya Mountains, Martaban.—*B. Wightiana*, Wight. 5 Neelgherry.—? *Ochroma arguta*, Lindl.; B. Reg. 21, t. 1819. 5 China.

ORDER LVI.—TERNSTRÖMIACEÆ, DC.—Lindl. Nat. Syst. p. 79.

Trees or shrubs, according to Lindl., forming 28 genera, to which our materials refer 132 species: 56 for S. America, Mexico and the W. Indies; 57 for the E. Indies; 13 for China and Japan; 4 for N. America; and 1 for Guinea. Of the E. Indian forms, chiefly discovered in Java, Ceylon, both Peninsulas of India, the Khassya Mountains, Assam, and Nepal, 1 belongs to *Cochlospermum*; 9 to *Ternströmia*? 1 to *Anneslea*; 1 to *Adinandra*; 9 to *Eurya*; 4 to *Cleyera*; 12 to *Saurauja*; 9 to *Gordonia*; 7 to *Cumellia*; 1 to *Thea*; 2 to *Sehina*;—to *Pyrenaria*; and 1 to *Reinwardtia*, *Geeria*. Bl. as perhaps not distinct. (*Wight.*) is here joined to *Eurya*.

The most remarkable plant of the tribe is the *Tea*, of which by far the best information will be found in *W. Griffith's Report on the Tea-plant of Upper Assam*.

ANNESEA, Wall. (*Pl. as. rar.* 1, t. 5.)

1. *fragrans*, Wall. (*l. c.*) 5 Moulmein. Fl. smallish, whitish-yellow, fragrant.—Introduced into H. C. G. ?

EURYA, Thunb. (*DC. pr.* 1, p. 525;—*W. and A. pr.* 1, p. 86.)

1. *fasciculata*, Wall. (*Cat.*) 5 Silhet.—Has been introduced into H. C. G. fl. ?

SAURAUJA, Willd. (*DC. pr.* 1, p. 525.)

1. *fasciculata*, Wall. (*Pl. as. rar.* 2, t. 148.) 5 Nepal. Fl. smallish, white, rose-coloured, slightly sweet-scented. Introduced into H. C. G. Fl. ?

2. *Roxburghii*, Wall. (*Ternströmia serrata*, *Roxb. fl. ind.* 2, p. 521.) 5 Sylhet. Fl. small, rose-coloured. In H. C. G. fl. April and May; fr. July and Aug. (*Roxb.*)

GORDONIA, Ellis. (*DC. pr.* 1, p. 528;—*W. and A. pr.* 1, p. 87.)

1. *integrifolia*, Roxb. (*H. B.* p. 23,—*fl. ind.* 2, p. 572.—*G. Wallichii*, *DC. pr.* 1, p. 528.) L. 5 Khassy Mountains. Has been introduced into H. C. G. Fl. ?

2. *floribunda*, Wall. Cat. Martaban, Chappedong, Tavoy. Has been introduced into H. C. G. Fl. ?

CAMELLIA, L. (*DC. pr.* 1, p. 529.)

1. *Kissi*, Wall. (*Pl. as. rar.* 3, t. 256;—*DC. pr.* 1, p. 529.) 5 Nepal.
2. *caudata*, Wall. (*Pl. as. rar.* 3, p. 36.) 5 } Khassy Mountains. } In H. C. G. Fl. ?

THEA, L. (*DC. pr.* 1, p. 530.)

1. *chinensis*, Sims. (*DC. l. c.*)
β. *Bohea*. (*B. M.* 25, t. 998.) 5 China. In H. C. G. fl. C. S. (*Roxb.*)

COCHLOSPERMUM, Kth. (*DC. pr.* 1, p. 527;—*W. and A. pr.* 1, p. 87.)

1. *Gossypium*, DC. (*l. c.*;)—*W. and A. l. c.*;—*J. Grah. Cat.* *B. pl. p.* 22.—*Bombax Gossypium*, L. *Roxb. fl. ind.* 3, p. 169.) 5 Travancore, Coromandel, Hurdwar. Fl. large, bright-yellow, March and April; fr. R. S. The tree yields the gum, called *Kuteera*, which in the N. W. Provinces of India is substituted for Tragacanth. (*Royle.*)

* *Eurya Wightiana*, Wall. Wight. ill. 1, t. 38. 5 Peninsula of India. *E. tristyla*, W. and A. 5 Peninsula of India.—*E. chinensis*, R. Br. 5 China.—*Laplacea speciosa*, H. B. and Kth. 5 S. America.—*Venetia glauca*, Beauv. 5 Benin in Africa.—*Cochlospermum insigne*, A. St. Hil. 5.—*C. serratifolium*, DC. 5 Mexico.—*C. vitifolium*, Spreng. 5 N. Spain.—*C. tinctorium*, R. Br. 5 Senegambia.—*Archytia triflora*, Mart. 5 Brazil.—*Mahurea palustris*, Aubl. 5 Guiana, Brazil.—*Marila racemosa*, Swz. 5 W. Indies.—*Kielmeyera corymbosa*, Mart. Brazil.—*K. rosea*, Mart. Brazil.

ACERACEÆ—SAPINDACEÆ.

GSL

ORDER LVII.—ACERACEÆ, Lindl. Nat. Syst. 1, p. 81.

THE SYCAMORE TRIBE.

Trees, under 3 genera, comprising 40 species; 10 from N. America; 9 from Nepal and the Himalayas; 9 from Europe; 6 from Japan; 1 from Iberia; 1 from the Levant; 1 from Tartary; 1 from Mexico; 1 from Cochinchina? and 1 of unknown origin. Of the Indian species, 8 belong to *Acer*, and 1 to *Dobinea*.

"The species are only known for the sugary sap of *Acer saccharinum* and others, from which sugar is extracted in abundance, and for their light useful timber." (Lindl.)

Acer, L. (DC. pr. 1, p. 593.)

1. *oblongum*, Wall. (DC. l. c.) L. 5 Nepal. Fl. very small, greenish, March; fr. 0.

2. *lavigatum*, Wall. (Pl. as. rar. 2, t. 104.) L. 5 Higher Mountains of Nepal, Kernaon. In H. C. G. Fl.?

NEGUNDO, Möch. (DC. pr. 1, p. 596.)

1. *fraxinifolium*, Nutt. (DC. l. c.;—*Acer Negundo*, L.) 5 N. America.
Has been in the garden many years, but does not fl.

* *Dobinea vulgaris*, Buch. 5 Nepal.

ORDER LVIII.—SAPINDACEÆ, Juss.—Lindl. Nat. Syst. p. 81.

THE SOAP-TREE TRIBE.

Trees or shrubs, often climbing and cirriferous, seldom climbing herbs. The order contains 43 genera, of which the greater number of species (150) inhabits S. America, Mexico and the W. Indies. One has been found in the southern parts of the United States; 2 in Senegal; 4 in Guinea; 10 in S. Africa; 1 in Madagascar; 9 in Bourbon and Mauritius; 2 in Japan; 4 in China; 2 in Timor; and about 10 in New Holland and the South Sea Islands. Our materials furnish us with only 50 forms for the E. Indies; 2 of *Cardiospermum*; 1 *Sieja*; 9 of *Schmidelia*; 1 of *Harpullia*; 3 of *Baccaurea*; 14 of *Sapindus*; 2 of *Cupania*; 1 of *Hedycarpus*; 10 of *Nephelium*; 1 of *Schleichera*; 2 of *Dodonæa*; 1 of *Eustathes*; and 1 of *Pedicella*.—What may be the amount of species discovered in Java, and of Wall's unpublished Sapindaceæ, we have no means of ascertaining, but the probability is, that they will at least double our Indian forms. Blume's new genera are *Irina*, *Lepisanthes*, *Mischocarpus*; (*Cupania*, *Lindl.*) and *Aphania*.

"It is singular that while the leaves and branches of many of these plants are unquestionably poisonous, the fruit of others is valuable as an article of

dessert." (*Lindl.*) To the former belong some species of *Paullinia*, and, as regards fish, also of *Magonia* and *Serjania*; to the latter *Nephelium Lichi* and *lappaceum*, *Pierardia sapida* and *dulcis*, *Hedycarpus malayanus*, *Schmidelia dulcis*, *Sapindus esculentus*, *Paullinia subrotunda*, *Cupania sapida*, &c. The fruit of several species of *Sapindus* is used instead of soap.

SUB-ORDER?—**MILLINGTONIEÆ**,—Lindl. *Nat. Syst. p. 83.*

A small tribe, with 1 genus, and 6 species, all arboreous, and natives of Nepal, the Khassy Mountains, the Neelgherries, and Ceylon.—Properties unknown.

MILLINGTONIA, Roxb. (*W. and A. pr. 1. p. 115.*)

1. *simplicifolia*, Roxb. (*Corom. 3. t. 254;*—*fl. ind. 1. p. 103; ed. Carey,*

1. *p.* 102;—*W.* and *A. l. c.*) 5 Madura, Khassy Mountains, Nepal.
Fl. minute, yellow, Feb. and March; fr. July and Aug.
2. *pinnata*, Roxb. (*fl. ind.* 1. *p.* 104;—*ed. Carey*, 1. *p.* 103.) 5 Silhet.
Fl. small, white.—In H. C. G. fl. April. (*Roxb.*)
3. *pungens*, Wall. 5 Neelgherries, Nepal, Khassy Hills.

* *M. dilleniæfolia*, Wall. 5 Simla, Nepal.—*M. Arnottiana*, Wight. ill. I, t. 53. 5 Ceylon. Neelgherries.

ORDER LIX.—ÆSCULACEÆ.—Lindl. Nat. Syst. p. 84.

THE HORSE-CHESTNUT TRIBE.

Trees or shrubs, of 4 genera, and 14 species: 9 from N. America; 2 from Nepal and the Khassy Mountains; 1 from N. India; (*DC.*) and 2 of unknown origin.—“The bulky seed of *Pavia indica*, containing a large proportion of fecula, though combined with some bitter principle, is eaten in the Himalayas, as those of the Horse Chestnut (*Æsculus Hypocastanum*, L.) have been in other parts of the world, in times of famine.” (*Royle*.) The bark of the latter has been used as a febrifuge, but with little success.

Pavia, Boerh. (*DC. pr.* 1. *p.* 598.)

1. *indica*, Colebr. L. 5 Kemaon, Sirmore, Gurhwal, Kunawar; alt. 8000—10,000 f.
2. *khassiana*, (P. *punduana*, Wall. Cat.) 5 Khassy Mountains; alt. 4500 f.—Does not exist at Pundua, (*Griff.*) Both of these trees have been introduced into H. C. G. Fl.?

* *Pavia macrostachya*, Herb. amat. t. 212. (*Macrothrysus?*) 5 Banks of the rivers of Georgia.

ORDER LX.—POLYGALACEÆ.—Lindl. Nat. Syst. p. 84.

THE MILK-WORT TRIBE.

Herbs or shrubs, rarely climbing or arboreous, ranged under 15 genera. *DC. pr.* and *Spreng. syst.* enumerate 92 species for S. America, Mexico and the W. Indies; 22 for N. America; 11 for Europe; 10 for New Holland and Van Diemen's Land; 4 for Guinea; 3 for Siberia; 2 for Japan; 2 for China; 1 for Arabia; 1 for Madagascar; 1 for the Canaries; and 1 for Armenia. The S. African forms amount to 100, (*Harvey*); and the E. Indian to 49. Of the latter, our materials furnish 29 of *Polygala*; 6 of *Salomonia*; 11 of *Xanthophyllum*; 1 of *Soulamea*; and 2 of *Securidaca*;—all, with a few exceptions, inhabiting mountainous or hilly places in Nepal, the Khassy Mountains, both Peninsulas of India, Ceylon, Java and the Moluccas.

The chief characteristic of the order is bitterness, but its qualities have not been thoroughly examined, and the praise which was formerly bestowed on the medicinal powers of some, has, in most cases, been found to be undeserved. Even *Polygala Senega* is now comparatively seldom used in diseases of the chest, and that only in chronic catarrhs, where all inflammation has ceased.

POLYGALA, L. (*DC. pr. 1, p. 321;—W. and A. pr. 1, p. 36.*)

1. *myrtifolia*, L. (*DC. o. c. p. 322;—B. Reg. 8. t. 669.*) 5 C. G. Hope.

Fl. largish, pale rose-coloured, purple-veined, nearly the whole year; fr. 0.

2. *telephioides*, Willd. (*DC. pr. 1, p. 332;—Roxb. fl. ind. 3, p. 218;—W. and A. pr. 1, p. 36.*) 4. Peninsula of India, Bengal. Fl. small, greenish rose. In H. C. G. fl. R. S.; fr C. S. (*Roxb.*)

3. *ciliata*, L. (*W. and A. pr. 1, p. 38.* Salomonia? *ciliata*, *DC. pr. 1, p. 334.*)

β. *minor* (P. *prostrata*, Willd.;—*DC. o. c. p. 333.*—P. *arvensis*, Roxb. *fl. ind. 3, p. 218*; not Willd.) মেরাদু Meradoo. গারুড় Garoodoo. 4. Peninsula of India, Bengal, (Serampore.) Fl. small, greenish white, with a tinge of rose, R. S.; fr. C. S.

SALOMONIA, Lour. (*DC. pr. 1, p. 333;—Wight. ill. 1, p. 49.*)

1. *cantoniensis*, Lour. (*DC. o. c. p. 334.*) ⊖ Canton, Khassya Mountains. Fl. small, greenish rose-coloured; C. S.

XANTHOPHYLLUM, Roxb. (*W. and A. pr. 1, p. 39.*)

1. *virens*, Roxb. (*fl. ind. 2, p. 221.*) L. b Khassya Mountains, Assam. Fl. small, yellowish-rose-coloured. In H. C. G. fl. Feb. March and April; fr. June and July.—Wood said to be remarkably hard, and useful to the Natives. (*Roxb.*)

SECURIDACA, L. (*DC. pr. 1, p. 340.*)

1. *scandens*, Buch. (S. *paniculata*, Roxb. *fl. ind. 3, p. 219*; not Lam.) L. 5 Fl. smallish, red. In H. C. G. fl. R. S.; fr. March and April. (*Roxb.*)

Roxburghianum*, Wight. b Courtallum.

ORDER LXI.—KRAMERIACEÆ, Mart.—Lindl. Nat. Syst. p. 87.

Undershrubs, of 1 genus, and 8 species, natives of S. America, Mexico, and the W. Indies.—"The genus is of an extremely anomalous structure, and remarkable for its tonic and excessively astringent qualities.

Its root is sold in Europe under the name of *Ratanhia*, and is one of the substances which, in conjunction with gum Kino, is used for adulterating port wine in England." (*Lindl.*)

- * *Krameria ixina*, L. 5 Cumana, St. Domingo.—*K. pauciflora*, Moç and Sesse. 4. Mexico.—*K. triandra*, Ruiz and Pav. 5 Peru.

ORDER LXII.—VOCHYACEÆ.—*Lindl.* Nat. Syst. p. 87.

Trees, of 8 genera, and 37 species, all "natives of equinoctial America, where they inhabit ancient forests, by the banks of streams, sometimes rising up mountains to a considerable elevation. They are often trees with large spreading heads.—Properties unknown." (*Lindl.*)

- * *Callisthene major*, Mart. 5 Plains of Brazil.—*Amphilochia cordata*, Mart. 5 Brazil.—*Vochya guianensis*, Aubl. 5 Guiana.—*V. emarginata*, Vand. 5 Brazil.—*V. tetraphylla*, Lindl. 5 Guiana.—*Qualea rosea*, Aubl. 5 Guiana.—*Q. carulea*, Aubl. 5 Guiana.—*Erisma floribundum*, Rudg. 5 Guiana.—*E. violaceum*, Mart. 5 Brazil.

ORDER LXIII.—ELATINACEÆ.—*Lindl.* Nat. Syst. p. 88.

THE WATER-PePPER TRIBE.

Marshy annuals, of 4, or perhaps 5 genera, containing 10 species: 4 European; 1 S. American; 1 common to several parts of the world; 1 S. African; and 4 Indian. Of the latter, all, with one Nepal exception, are natives of most parts of tropical India and Java; 2 belong to *Elatine*; 2 to *Bergia*; and 1 to *Anisadenia*. Properties unknown.

BERGIA, L. (*DC. pr. 1*, p. 390.)

1. *verticillata*, Willd. (*DC. l. c.*;—*Roxb. fl. ind.* 2, p. 456.—B. aquatica, *Roxb. Corom.* 2, t. 142.—B. capensis, L.—*Elatine verticillata*, *W.* and *A. pr. 1*, p. 41;—*J. Grah. Cat. B. pl. p. 12*.—E. luxurians, *Delile*;—*Rheed.* 9, t. 78.) लालकेश्वरीया *Lal-Keshooreeya*. ⊖ Banks of rivers and rice-fields all over India, (Serampore.) Egypt. Fl. very small, white, R. S.; fr. C. S.
2. *ammannoides*. Roxb. (*fl. ind.* 2, p. 457;—*DC. pr. 1*, p. 390.—B. pentandra, *Camb.*—*Elatine ammannoides*, *W.* and *A. pr. 1*, p. 41;—*Wight ill.* 1, t. 25 *A.*;—*J. Grah. Cat. ORDER LXIV.—LINACEÆ.—Lindl. Nat. Syst. p. 89.

THE FLAX TRIBE.

Annual and perennial herbs, undershrubs and shrubs, referred to 2 genera. According to DC. pr. and Spreng. syst., 32 species have been found in Europe; 9 in S. America and Mexico; 6 in N. Africa; 3 in N. America; 2 in Tauria and Iberia; 1 in Dahuria; 1 in Siberia; 1 in Syria; and 1 in New Zealand. The S. African forms amount to 10, (*Harvey*); and the Indian ones to 5, all natives of the Peninsulas, the Khassya Mountains and Nepal, and all belonging to *Linum*.—The common flax (*Linum usitatissimum*, L.) is found everywhere in the plains, though perhaps only domesticated.

"The tenacity of their fibre, and the mucilage of their diuretic seeds, are striking characters of Linaceæ, which are also usually remarkable for the beauty of their flowers." (Lindl.)

LINUM, L. (DC. pr. 1, p. 423;—W. and A. pr. 1, p. 134.)

1. *gallicum*, L. (DC. l. c.) ♂ France. Fl. small, yellow, C. S.; fr. H. S.
2. *luteolum*, Bieb. (DC. pr. 1, p. 424.) ♂ Tauria. Fl. small, yellow, C. S.; fr. March.
3. *narbonense*, L. (DC. pr. 1, p. 426.) ♂ Spain, S. France, Italy. Fl. smallish, blue, C. S.
4. *usatissimum*, L. (DC. l. c.;—Roxb. fl. ind. 2, p. 110;—W. and A. pr. 1, p. 134;—J. Grah. Cat. B. pl. p. 33;—E. B. 19, t. 1357.) *Common Flax*. मसिना *Musina*. ♂ Europe. Fl. smallish, sky-blue; C. S.; fr. H. S. Much cultivated in N. India for the seeds, from which the natives extract the oil.
5. *angustifolium*, Huds. (DC. pr. 1, p. 426;—E. B. 6, t. 381.) ♀ England, France, Italy. Fl. small, sky-blue, C. S.; fr. H. S.
6. *bicolor*, Schousb. (DC. pr. 1, p. 428.) ♂ Tangier. Fl. small, yellowish, with a purple-streaked, blue eye, C. S.; fr. H. S.
7. *catharticum*, L. (DC. l. c.;—E. B. 6, t. 382.) *Purging Flax*. ♂ Europe. Fl. very small, yellowish-white, C. S.; fr. H. S.
8. *tetragynum*, Colebr. (B. Reg. 16, under t. 1326.) ♂ Khassya Mountains, Nepal. Fl. largish, sulphur-coloured, C. S.; fr. H. S.
9. *trigynum*, Roxb. (fl. ind. 2, p. 110;—DC. pr. 1, p. 425;—W. and A. pr. 1, p. 134;—J. Grah. Cat. B. pl. p. 34;—B. M. 27, t. 1100.) गूलासरुफ *Goolasruph*. ♂ Mountains of the Peninsula of India. Commonly cultivated in gardens. Fl. large, gold-coloured, C. S.; fr. H. S.

* *L. Berendieri*, Hook; B. M. 63, t. 3480. ♂ Texas.—*L. mexicanum*, Humb. B. Reg. 16, t. 1326. ♀ St. Rosa in Mexico.—*L. arboreum*, L.; B. M. 7, t. 234. ♂ Candia.—*L. flavum*, L.; B. M. 9, t. 312. ♀ Austria.—*L. africanum*, L.; B. M. 12, t. 403. ♂ C. G. H.—

L. quadrifolium, L.; B. M. 12, t. 431. 5 C. G. H.—*L. viscosum*, L.; B. M. 26, t. 1048. 2. S. Europe.—*L. hirsutum*, L.; B. M. 27, t. 1087. 2. S. Europe.—*L. anglicum*, Mill.; E. B. 1, t. 40. 2. England.
L. monogynum, Forst.; B. M. 64, t. 3574. 5 N. Zealand.—*L. myosorensis*, Heyne. Wight. ill. 1, t. 60. ♂ Mysore. Mussooree.—*L. repens*, Don. 5 Nepal, resembles most *L. trigynum*, Roxb.—*Radiola linoïdes*, Gm. (R. Millegrana, Sm. E. B. 13, t. 893.) ♂ Europe.

ORDER LXV.—HUGONIACEÆ, Arn.—Lindl. Nat. Syst. p. 89.

The following are the only known species of this shrubby order, which consists of one genus:—

HUGONIA, L. (DC. pr. 1, p. 522;—W. and A. pr. 1, p. 72.)

1. *Mystax*, L. (DC. l. c.;—W. and A. l. c.;—Wight. ill. 1, t. 32;—Rheed. 2, t. 19.) 5 Malabar, Coromandel, Ceylon. Fl. large, yellow. Has been introduced into H. C. G.? Fl.?

* *H. ferruginea*, W. and A. 5 Ceylon.—*H. serrata*, Lam. 5 Mauritius.
—*H. tomentosa*, Cav. 5 Mauritius.

ORDER LXVI.—CHLENACEÆ,—Pet. Th.—Lindl. Nat. Syst. p. 90.

Trees or shrubs, of 4 genera, and 8 species, all natives of Madagascar.—Properties unknown.

* *Sarcolæna grandiflora*, Pet. Th.—*Leptolæna multiflora*, Pet. Th.—*Schizolæna rosea*, Pet. Th.—*Rhodolæna altivola*, Pet. Th.

ORDER LXVII.—CISTACEÆ, Lindl. Nat. Syst. p. 91.

THE ROCK-ROSE TRIBE.

Herbs and undershrubs, of 4 genera, and, according to DC., 160 species: 15 N. American; 6 S. American; 3 Syrian, and the rest all from S. Europe, N. Africa, and the Canaries.—Properties unimportant.

HELIANTHEMUM, Tournef. (DC. pr. 1, p. 266.)

1. *eriocaulon*, Don. (DC. o. c. p. 271.) ♂ Spain, France. Fl. smallish, yellow, Feb. and March; fr. April.
2. *inconspicuum*, Thib. (DC. l. c.) ♂ Spain. Fl. minute, yellow, Feb. and March; fr. April.
3. *egyptiacum*, Mill. (DC. o. c. p. 273.) ♂ Egypt, Barbary, Spain. Fl. small, white, Feb. and March; fr. April.

H. guttatum, Mill; E. B. S. t. 544. ⊕ England, S. Europe.—*H. plan-tagineum*, Pers. ⊕ S. Europe, N. Africa.—*H. punctatum*, Willd. ⊕ France.—*H. ledifolium*, Mill, E. B. 34. t. 2414. ⊕ England.—*H. intermedium*, Thib. ⊕ Spain.—*H. denticulatum*, Thib. ⊕ S. France.—*H. salicifolium*, Pers. ⊕ Spain, Italy.—*H. sanguineum*, Lag. ⊕ Spain.

ORDER LXVIII.—REAUMURIACEÆ.—Lindl. Nat. Syst. p. 91.

Shrubs, of 2 genera, and a few species, belonging to Sicily, Egypt, and Syria.—Properties unimportant.

* *R. vermiculata*, L. 5 Egypt.

ORDER LXIX.—STERCULIACEÆ, Vent.—Lindl. Nat. Syst. p. 92.

Trees or shrubs, sometimes climbing or twining, referred to 82 genera, DC. pr. and Spreng. syst. enumerate about 115 species for S. America, Mexico and the W. Indies, which, however, have been much increased since 1827; 19 for Bourbon and Mauritius; 3 for Madagascar; 2 for St. Helena; 8 for Tropical Africa; 16 for New Holland and Van Diemen's Land; 2 for Timor; 1 for Arabia; 1 for Persia; and 3 for China. S. Africa exhibits 100 forms, (*Harvey*); and the E. Indies (in a great measure exclusive of Java) 111, viz., 1 of *Isora*; 15 of *Helicteres*; 1 of *Pterygota*; 3 of *Heritiera*; 1 of *Sterculia*; (Endl. and Schott.) 13 of *Sterculia*; (Roxb. Wall. DC.—partly); 9 of *Southwellia*, 2 of *Cavallium*; 2 of *Hildegardia*; 1 of *Scaphium*; 1 of *Erythropsis*; 1 of *Ophelus*; 2 of *Durio*; 1 of *Gossampinus*; 2 of *Salmania*; 1 of *Pentapetes*; 3 of *Methania*; 1 of *Trochetia*? 13 of *Pterospermum*; 4 of *Kydia*; 2 of *Wallichia*; 2 of *Abroma*; 2 of *Commersonia*; 8 of *Büttnera*; 1 of *Kleinhowia*; 1 of *Jürgensia*; 3 of *Lochenia*, Arn.; 1 of *Visenia*; and 1 of *Waltheria*.—By far the greater part of these inhabit the two Peninsulas of India, the Khassya Mountains, and Assam. Some few extend to Nepal.—“Excluding Bombaceæ, Java has, according to Blume, 22 species” (*Wight*), among which representatives are found of his new genera—*Prosthesia*, *Visemia*, and *Maranthes*.

The whole order is chiefly remarkable for abundance of mucilage and tenacity of fibre. Its peculiar properties will be mentioned under the different species.

A. *Helicterea*, Schott. and Endl. (*Melet. bot.* p. 30.)

ISORA, Schott and Endl. (*t. c.*)

1. *corylifolia*, Schott. and Endl. (*t. C.*—*Wight icon.* 1, t. 150.—*Helicteres Isora*, L.;—DC. pr. 1, p. 475;—Roxb. fl. ind. 3, p. 143;—W. and A. pr. 1, p. 60;—J. Grah. Cat. B. pl. p. 16;—B. M. 46, t. 2061;—

Rheed. 6, t. 30;—Rumph. auct. t. 17, f. 1.) आठनोडा *Antumora*. 5

Extends from one end of India to the other, particularly along the foot of the Himalayas. (Serampore.) Fl. largish, brick-coloured, R. and C. S.; fr. Feb. and March. *Fruit* used by the Natives in dysenteries and bowel-complaints, from mere superstition. At Bombay it is employed medicinally in diseases of the ear. (Dr. Gibson.)

HELICTERES, L. (*DC. pr. 1, p. 476*; *sect. Orthocarpæa*.—Schott. and Endl. o. c. p. 31.)

1. *hirsuta*, Lour. (*DC. pr. 1, p. 476*;—*J. Grah. Cat. B. pl. p. 16*.—*H. spicata*, Colebr.;—*Roxb. H. B. p. 97*.) ५ Cochin-China, Archipelago of the Eastern Peninsula of India. Fl. largish, dark purplish brown, throughout the year; fr. C. S.
2. *angustifolia*, L. (*DC. pr. 1, p. 476*.) ५ China. Fl. small, white-purple, C. S.; fr. H. S.
3. *elongata*, Wall. Cat. ५ Taong-Dong. Fl. largish, pale yellow, C. S.; fr. H. S.
4. *virgata*, Wall. Cat. (*G. Don's Mill. dict. 1, p. 508*.) ५ China. Fl. small, C. S.; fr. H. S.
5. *pulchra*, Wall. ५ Burma. Fl. small, C. S.; fr. H. S.

B. *Sterculiæ*, Schott. and Endl.

PTERYGOTA, Schott. and Endl. (o. c. p. 32.)

1. *Roxburghii*, Schott. and Endl. (*I. c.*—*Sterculia alata*, Roxb. *fl. ind. 3, p. 182*.) L. ५ Silhet. Chittagong. Fl. largish, ferruginous, streaked with crimson and yellow, Feb. and March; fr. Dec.—*Seeds* at Silhet eaten by the Natives as a cheap substitute for opium. (*Roxb.*)

HERITIERA, Ait. (*DC. pr. 1, p. 484*;—*W. and A. pr. 1, p. 63*;—Schott. and Endl. *I. c.*)

1. *minor*, Lam. (*DC. I. c.*;—*Roxb. fl. ind. 3, p. 142*;—*excl. syn. Rumph.*—*H. Fomes*, Willd.;—*Buch.*;—*DC. I. c.*—*Balanopteris minor*, Gärtn. *fr. 2, t. 98, f. 2*.) सून्दरी Soondree. L. ५ Soonderbuns. Fl. small, dull orange, March and April; fr. Sept. and Oct. Used in Calcutta, &c., for fire-wood.
2. *litoralis*, Ait. (*DC. pr. 1, p. 484*; *excl. syn. Rumph.*—*Roxb. fl. ind. 1, p. 142*;—*W. and A. pr. 1, p. 63*;—*J. Grah. Cat. B. pl. p. 18*.—*Balanopteris Tothila*, Gärtn. *fr. 2, t. 99*;—*Rheed. 6, t. 21*.) ५ Mauritius, Peninsula of India. Fl. small reddish.—Introduced into H. C. G. in 1810, but had not fl. in 1814.
3. *macrophylla*, Wall. ५ Munipore. Fl. small, yellowish, H. S. fr.—
4. *acuminata*, Wall. ५ Hills N. E. of Bengal.

TRIPHACA, Lour.

1. *africana*, Lour. (*fl. cochin. 2, p. 577*;—*DC. pr. 1, p. 483*.) ५ Mozambique. C. S. 1838.

STERCULLA, L. (*Schott. and Endl.*)

1. *fæstida*, L. (*DC. pr. 1, p. 483*;—*Roxb. fl. ind. 3, p. 154*;—*W. and A. pr. 1, p. 63*;—*Wight. icon. 1, t. 181 and 2, t. 364*;—*J. Grah.*

Cat. B. pl. p. 18;—Sonner. it. 2, t. 132;—Rumph. 3, p. 169, t. 107.)

জঙ্গলীবাদাম Junglee-badam. L. b. Moluccas. Both Peninsulas of India, Bengal. Fl. middle-sized, scarletish-sulphur, very fetid. March; fr. R. S.—Seeds roasted, and eaten by the Natives. (Roxb.)

SOUTHWELLIA, Salisb. (Schott. and Endl. l. c.)

1. *Balanghas*, Schott. and Endl. (l. c.—*Sterculia Balanghas*, L.;—DC. pr. 1, p. 482;—Roxb. fl. ind. 3, p. 144;—W. and A. pr. 1, p. 62;—ill. 1, t. 30;—J. Grah. Cat. B. pl. p. 17;—Rheed 1, t. 49.) *China Chesnut*. 5 China. Both Peninsulas of India. Fl. small, flesh-coloured, faintly fragrant, H. S.; fr. R. S. Seeds considered wholesome, and, when roasted, nearly as palatable as chesnuts. (Roxb.)
2. *coccinea*, (*Sterculia coccinea*, Roxb. fl. ind. 3, p. 151;—DC. pr. p. 1, 482.) 5 Silhet, Penang. Fl. largish, greenish-yellow, tinged with rose, C. S.; fr. H. S.
3. *angustifolia*, (*Sterculia angustifolia*, Roxb. fl. ind. 3, p. 148;—DC. pr. 1, p. 482;—not Jack.) 5 Nepal, Penang. In H. C. G. fl. March. (Roxb.)
4. *parviflora* (*Sterculia parviflora*, Roxb. fl. ind. 3, p. 147;—G. Don Mill. dict. 1, p. 516.) 5 Tippera, Penang. In H. C. G. fl. Feb. March and April. (Roxb.)

CAVALLIUM, Schott. and Endl. (l. c. p. 33.)

1. *urens*, Schott. and Endl. (l. c.—*Sterculia urens*, Roxb. Corom. 1, t. 24;—fl. ind. 3, p. 145;—DC. pr. 1, p. 483;—W. and A. pr. 1, p. 63;—J. Grah. Cat. B. pl. p. 18.) L. 5 Peninsula of India. Fl. small, greenish, C. S.; fr. H. S.—Yields a gum resembling Tragacanth. Seeds roasted and eaten by the Natives, though they are said to be cathartic.—A kind of coffee may be made of them. (Dr. Gibson.) Native guitars are made of the wood of this tree, (J. Grah.) which is soft and spongy.
2. *comosum*, Schott. and Endl. (l. c.;—*Sterculia comosa*, Wall. pl. as. rar. 2, t. 127.) L. 5 Amboyna. Fl. small, purplish, sweet-scented. In H. C. G. fl.?

HILDEGARDIA, Schott. and Endl. (l. c.)

1. *populifolia*, Schott. and Endl. (l. c.;—*Sterculia populifolia*, Roxb. fl. ind. 3, p. 148;—Wall. pl. as. rar. 1. t. 3;—not DC.) 5 Coromandel. Fl. large, scarlet. Introduced into H. C. G. in 1800, but had not fl. in 1814.

ERYTHROPSIS, Lindl. (Schott. and Endl. l. c.)

1. *Roxburghiana*, Lindl. (*Sterculia colorata*, Roxb. Corom. 1 t. 23;—fl. ind. 3, p. 146;—DC. pr. 1, p. 483;—W. and A. pr. 1, p. 83;—J. Grah. Cat. B. pl. p. 17.) L. 5 Peninsula of India, Khassya Mountains, Hurdwar. Fl. large, red, C. S.; fr. H. S.

FIRMIANA, Marsigli.

1. *platanifolia*, Schott. and Endl. (*Sterculia platanifolia*, L. suppl. DC. pr. 1, p. 483.) 5 China, Japan—R. S. 1838.

*Sterculia* not referable to Schott. and Endl. genera *l. c.*

- a. *villosa*, Roxb. (*fl. ind. 3. p. 153*;—*DC. pr. 1. p. 483*;—*W. and A. pr. 1. p. 83*;—*J. Grah. Cat. B. pl. p. 18.*) 5 Peninsula of India. Forests from Hurdwar to the Jumna. Fl. smallish, pale yellow-scarlet, March; fr. 0.
- b. *guttata*, Roxb. (*fl. ind. 3. p. 148*;—*DC. pr. 1, p. 482*;—*W. and A. pr. 1. p. 62*;—*Wight. ic. 2. t. 487*;—*J. Grah. Cat. B. pl. p. 17*;—*Rheed. 4. t. 61.*) 5 Peninsula of India. Fl. middle-sized, yellow, inside with purple glands, Dec.; fr. June. Bark fibres tough, adapted for cordage.—The Natives of the lower coasts of Wynaad contrive to make a sort of clothing from them. (Roxb.)
- c. *lanceolata*, Roxb. (*fl. ind. 3. p. 150*.—*S. Roxburghiana, Wall. pl. as. rar. 3. t. 262.*) 5 Khassya Mountains. Fl. middle-sized, scarlet, C. S.; fr. H. S. (Roxb.)
- d. *acerifolia*, Cunningham. (*S. heterophylla, Cunn. MSS.*;—*S. diversifolia, G. Don.*) 5 Fl. middle-sized, whitish-sulphur, somewhat scented like the common Primrose, H. S.; fr. 0.
- e. *pallens*, Wall. 5 Nepal.
- f. *campanulata*, 5 Khassya Mountains. } Have not fl. here as yet.
- g. *ornata*, Wall. MSS. 5 Burma. In H. C. G.

C. *Bombææ* (*Bombaceæ*, Schott. and Endl. *l. c. p. 34.*)

OCHROMA, Swz. (*DC. pr. 1. p. 480*;—*Schott and Endl. l. c.*)

1. *Lagopus*, Swz. (*DC. l. c.*) 5 Mountains of Jamaica, Portorico, Mexico. &c. In H. C. G. fl. April; fr. C. S. (Roxb.)

DURIO, L. (*DC. pr. 1. p. 480*;—*Schott. and Endl. l. c.*)

1. *zibethinus*, L. (*DC. l. c.*;—*Roxb. fl. ind. 3. p. 398*;—*J. Grah. Cat. B. pl. p. 17*;—*Linn. Trans. 7. t. 14, 15 and 16*.—*Rumph. 1. t. 29.*) Durian Tree. 5 Moluccas, Indian Archipelago. Was introduced into H. C. G. in 1809, but had not fl. in 1814.—Fl. largish, white; fr. remarkably fetid, but its taste considered delicious.—Flowering specimens of a second species have lately been sent us from Malacca, by Dr. Oxley.

GOSSAMPINUS, Buch (*Scott. and Endl. l. c.*)

1. *Rumphii*, Schott. and Endl. (*l. c.*.—*Eriodendron anfractuosum, DC. a. indicum, pr. 1. p. 479*;—*W. and A. pr. 1. p. 61*;—*J. Grah. Cat. B. pl. p. 17*;—*Wight. icon. 2. t. 400*.—*Bombax pentandrum, L.*; *Roxb. fl. ind. 3. p. 165*.—*Ceiba pentandra, Gärtn. fr. 2. t. 133*;—*Rheed. 3. t. 49, 50, 51*;—*Rumph. 1. t. 80.*) श्वेतशिमूल Shwet Shimool, White Cotton Tree. L. 5 Moluccas, both Peninsulas of India, Bengal, (Serampore,) Hindooasthan. Fl. largish, whitish, Feb. and March; fr. April and May. The woolly cotton that envelops the seeds of this species, as well of those of the Red Cotton Tree, is much esteemed for stuffing cushions and bedding, being unfit for the loom. The wood yields a gum, which is given with spices in certain stages of bowel complaints. (Ainslie.)

SALMALIA, Schott. and Endl. (*t. c.*)

1. *malabarica*, Schott. and Endl. (*l. c.*)—*Bombarum malabaricum*, DC. pr. 1. p. 479;—*W. and A. pr. 1. p. 61*;—*Wight. ill. 1. t. 29. a. b.*;—*J. Grah. Cat. B. pl. p. 16*.—*B. heptaphyllum*, Cav.;—*Roxb. fl. ind. 3. p. 167*;—*Corom. 3. t. 247*;—*Rheed 3. t. 52*). रुक्तशिमूल Rukto Shimool. Red Cotton Tree, L. 5 Extends from one end of India to the other, particularly along the foot of the Himalayas. Fl. very large, deep red. Febr. and March; fr. April and May. Bark of the root used in Java as an emetic. (Blume.)—Wood light, white, spongy, frequently used in India for floating rafters. (Royle.)
2. *insignis*, Schott. and Endl. (*l. c.*)—*Bombarum insigne*, Wall. pl. as. rar. 1. t. 79, 80.) 5 Yenangheun in Burma. Fl. very large, deep red. Has been introduced into H. C. G.?

BOMBAX, L. (*Schott. and Endl. l. c.*)

1. *Ceiba*, L. (DC. pr. 1. p. 478;—Schott. and Endl. o. c. p. 36.)—*Roxb. H. B. p. 50*;—*J. Grah. Cat. B. pl. p. 17*.) L. 5 Jamaica, &c. Was introduced into H. C. G. in 1808, but had not fl. in 1814.—In the W. Indies its immense trunk is commonly scooped out and converted into canoes.—Juice of the root aperient; bark emetic.

ADANSONIA, L. (DC. pr. 1. p. 478;—Schott. and Endl. o. c. p. 36.)

1. *digitata*, L. (DC. l. c.;—W. and A. o. c. p. 61;—Roxb. fl. ind. 3. p. 164;—J. Grah. Cat. B. pl. p. 16;—B. M. 55, t. 2791-2.) Baobab or Monkey-Bread Tree. L. 5 Senegal. Cultivated in India at Samulcotta, Madras, Negapatam, Bombay, Guzerat, &c. Fl. very large, white, May and June; fr. C. S.—The largest tree in the world in the diameter of its trunk, which is sometimes 30 feet. Its height is not in proportion. “It is emollient and mucilaginous in all its parts. The leaves dried and reduced to powder constitute *Lalo*, a favorite article with the Africans, which they mix daily with their food, for the purpose of diminishing the excessive perspiration to which they are subject in those climates, and even Europeans find it serviceable in cases of diarrhoea, fevers and other maladies. The fruit is perhaps the most useful part of the tree. Its pulp is slightly acid and agreeable, and frequently eaten; while the juice is expressed from it, mixed with sugar, and constitutes a drink, which is valued as a specific in putrid and pestilential fevers.” (Hook; B. M. l. c.) The dried pulp is mixed with water, and administered, in Egypt, in dysentery. (Detile.) Along the sea-coast of Guzerat, the fishermen use the large fruit as a float for their nets. It is also used medicinally by the Natives, who, like the Africans, esteem it cooling. The leaves are eaten with their food, and are said to restrain excessive perspiration. (J. Grah. l. c.)

D. *Dombeyæ*. (Dombeyæ, DC.)

MONTEZUMA, Moc. and Sesse.

1. *speciosissima*, Moc. and Sesse. (DC. pr. 1. p. 477.) 5 Mexico. 1837.

RUIZIA, Cav. (*DC. pr. 1. p. 497.*)

1. *tobata*, Cav. (*DC. l. c.*) 5 Bourbon. Has been introduced into H. C. G. Fl.?

PENTAPETES, L. (*DC. pr. 1. p. 498;—W. and A. pr. 1. p. 67.*)

1. *phœnicea*, L. (*DC. l. c.;—W. and A. l. c.;—Roxb. fl. ind. 3. p. 157;—J. Grah. Cat. B. pl. p. 19;—B. Reg. 7. p. 525;—Rheed. 10. t. 56;—Rumph. 5. t. 100, f. 1.*) দুপহারিয়া *Doopahariya*. ◎ Both Peninsulas of India, Java, Moluccas, Bengal. (Serampore, &c.) Fl. largish, scarlet, R. S.; fr. C. S.

2. *albiflora*. Fl. white.

DOMBEYA, Cav. (*DC. pr. 1. p. 498;—W. and A. pr. 1. p. 67.*)

1. *palmata*, Cav. (*DC. l. c.;—W. and A. o. c. p. 68;—J. Grah. Cat. B. pl. p. 19;—Wall. pl. as. rar. 3. t. 235.*) 5 Bourbon. Fl. middle-sized, greenish-white, C. S.; fr. H. S.

2. *angulata*, Cav. (*DC. pr. 1. p. 498;—J. Grah. Cat. B. pl. p. 19;—B. M. 56. t. 2905.—D. tiliæfolia, Roxb. fl. ind. 3. p. 157;—Cav. ?—D. cordifolia, DC. o. c. p. 199.*) 5 Bourbon. Fl. middle-sized, rose-coloured, C. S.; fr. H. S.

3. *acutangula*, Cav. (*DC. pr. 1. p. 498.*) 5 Bourbon. Introduced into H. C. G. Fl.?

4. *astrapæoides*, Bojer. 5 Bourbon. Mauritius.

MELHANIA, Forsk. (*DC. pr. 1. p. 499.*)

1. *Hamiltoniana*, Wall. (*Pl. as. rar. 1. t. 77.*) 5 Banks of the Irrawaddi, Taong Dong. Fl. smallish, sulphur-coloured, C. S.; fr. H. S.

PTEROSPERMUM, Schreb. (*DC. pr. 1. p. 500;—W. and A. pr. 1. p. 68.*)

1. *suberifolium*, Lam. (*W. and A. l. c.;—J. Grah. Cat. B. pl. p. 19.—P. canescens, Roxb. fl. ind. 3. p. 162.*) 5 Ceylon, Peninsula of India. Fl. large, white, fragrant, March, April and May; fr. Nov. and Dec.

2. *Heynianum*, Wall. (*W. and A. pr. 1. p. 69;—Wight. icon. 2. t. 489.—P. suberifolium, Willd.;—DC. pr. 1. p. 500, excl. syn. L.;—Roxb. fl. ind. 3. p. 160;—B. ORDER LXX.—MALVACEÆ, Juss.—Lindl. Nat. Syst. p. 95.

THE MALLOW TRIBE.

Herbs, undershrubs, shrubs, rarely climbers, and trees, referred to 36-37 genera. Of species, DC. pr. and Spreng. syst. assign about 260 to S. America, Mexico and the W. Indies; 50 to Europe; 24 to Bourbon and Mauritius; 16 to N. America; 12 to N. Africa; 12 to New Holland and the South Sea Islands; 8 to China; 7 to tropical Africa; 6 to the Levant; 4 to Timor; 4 to the Canaries; 3 to Madagascar; 5 to Arabia; 1 to Persia; 1 to Siberia; and 1 to Caucasus. Forty have been found in S. Africa; (*Harvey*) and, judging from our materials, 130 in the E. Indies, viz. 9 of *Malva*; 1 of *Althaea*; 10 of *Urena*; 4 of *Pavonia*; 2 of *Lebretonia*; 30 of *Hibiscus*; 3 of *Paritium*; 2 of *Decaschistia*; 14 of *Abelmoschus*; 3 of *Thespisia*; 5 of *Gossypium*; 2 of *Lagunea*; 11 of *Abutilon*; and 34 of *Sida*. From these must, however, be deducted 12-41 species, common to other parts of the world. As in Sterculiaceæ, by far the greater part of the order is tropical, a few species only extending to the slope of the Himalayahs.

"The uniform character of this tribe is to abound in mucilage, and to be totally destitute of all unwholesome qualities." (*Lindl.*) The peculiar properties are noticed under the several species.

MALVA, L. (DC. pr. 1, p. 430;—W. and A. pr. 1, p. 45.)

1. *americana*, L. (DC. l. c.) 5 St. Domingo. Fl. small, yellow, Feb. and March; fr. April. Domesticated about Scrampore.
2. *polystachya*, Cav. (DC. pr. 1, p. 430.) 5 Perú. Has been introduced into H. C. G. Fl.?
3. *hispanica*, L. (DC. pr. 1, p. 431.) 5 Spain, Barbary. Fl. small, flesh-coloured, C. S.; fr. March.

R. and C. S.; fr. C. S.—Root intensely bitter, and stomachic. (*Ainslie*)
3. *alba*, L. (*DC. pr.* 1, p. 460;—*Roxb. fl. ind.* 3, p. 174;—*W. and A. pr.* 1, p. 58.) नागबुडा *Nag-buda*. बागबाड़ीजा *Nag-barjala*. ५ Coromandel, Bengal. Fl. small, white. R. and C. S.; fr. C. S.
4. *carpinifolia*, L. fil. (*DC. pr.* 1, p. 461.) ५ Madeira. Fl. middle-sized, yellow, R. and C. S.; fr. C. S.
5. *jamaicensis*, Cav. (*DC. pr.* 1, p. 460.) ५ Jamaica, St. Domingo. Fl. middle-sized, yellow, R. and C. S.; fr. Feb. and March.
6. *microphylla*, Cav. (*DC. pr.* 1, p. 461;—*Roxb. fl. ind.* 3, p. 170.) ५ Bengal. Fl. small, yellow, R. and C. S.; fr. C. S.
7. *cuneifolia*, Roxb. (*fl. ind.* 3, p. 170.—*Riedleia truncata*, *DC. pr.* 1, p. 491;—*W. and A. pr.* 1, p. 66.) ५ Fl. largish, yellow, R. and C. S.; fr. C. S.
8. *rhombifolia*, Roxb. (*fl. ind.* 3, p. 176.) ५ Bengal, लालबाड़ीजा *Lal-barjala*. Fl. smallish, yellow, R. and C. S.; fr. C. S.
9. *rhomboidea*, Roxb. (*fl. ind.* 3, p. 176;—*DC. pr.* 1, p. 462;—*W. and A. pr.* 1, p. 57.) श्वेतबाड़ीजा *Shvet barjala*. ५ Peninsula of India, Bengal, (Serampore.) Fl. smallish, pale-yellow, R. and C. S.; fr. C. S.; “The bark of this and the last species yield an abundance of very delicate, flaxy fibres, and might, I think, be advantageously employed for many purposes. When the seed is sown thick in a good soil, the plants grow tall and slender, without branches, and are in every way fit for such purposes.” (*Roxb.*)
10. *retusa*, L. (*DC. pr.* 1, p. 462;—*Roxb. fl. ind.* 3, p. 175;—*W. and A. pr.* 1, p. 58;—*Rheed.* 10, t. 18;—*Rumph.* 6, t. 19.) ५ Peninsula of India, Bengal, (Serampore.) Fl. small, yellow, R. and C. S.; fr. C. S.
11. *humilis*, Willd. (*DC. pr.* 1, p. 463;—*Roxb. fl. ind.* 3, p. 171;—*W. and A. pr.* 1, p. 59.) ४ Both Peninsulas of India, Bengal, (Serampore.) Fl. very small, yellow, and fr. nearly throughout the year.
12. *cordifolia*, L. (*DC. pr.* 1, p. 464;—*Roxb. fl. ind.* 3, p. 177;—*W. and A. pr.* 1, p. 58;—*J. Grah. Cat. B. pl.* p. 16.—*S. herbacea*, Cav. *DC. o. c.* p. 463.—*S. rotundifolia*, Cav.;—*DC. o. c.* p. 464;—*Rheed.* 10, t. 54.) बाड़ीजा *Barjala*. ५ Both Peninsulas of India, Bengal, (Serampore.) Fl. middle-sized, yellow, R. and C. S.; fr. C. S. The mucilage of this plant, mixed with rice, is used to alleviate dysentery. (*Ainslie*)
13. *truncata*, Cav. (*DC. pr.* 1, p. 471.) ० St. Domingo. Fl. small, yellow; R. and C. S.; fr. C. S.
14. *nervosa*, DC. (*pr.* 1, p. 465.) ५ St. Domingo. Fl. small, yellow, and fr. nearly the whole year.

SL

MALVACEAE.

NAPSEA, L. (*Gen. pl.* p. 273.)

1. *Itevis*, L. (*Sida Napaea, Cav.*;—*DC. pr.* 1, p. 466;—*B. M.* 48, t. 2193;—*Roxb. fl. ind.* 3, p. 175.) 2. Virginia. Fl. middle-sized, white, R. and C. S.; fr. C. S.

ABUTILON, Mönch. (*W. and A. pr.* 1, p. 55.)

1. *polyandrum*, W. and A. (*i. c.*;—*J. Grah. Cat. B. pl.* p. 15.—*Sida polyandra, Roxb. fl. ind.* 3, p. 178.—*S. persica, Burm. ind.* t. 47, f. 1;—*DC. pr.* 1, p. 473.) ♂. Neelgherries, Nundidroog, Hills about Parr, Kandalla, &c. Fl. largish, yellow, R. and C. S.; fr. C. S.
2. *periplocifolium*, G. Don. (*W. and A. pr.* 1, p. 55.—*Sida periplocifolia, L.*;—*DC. pr.* 1, p. 467;—*Roxb. fl. ind.* 3, p. 142.) 5. Sumatra, Malay Islands. Fl. very small, yellow, R. and C. S.; fr. C. S.
3. *crispum*, G. Don. (*W. and A. pr.* 1, p. 56;—*Wight. icon.* 1, t. 68.—*Sida crispia, L.*;—*DC. pr.* 1, p. 469;—*Roxb. fl. ind.* 3, p. 177.) 2. Coromandel, Gingie Hills. Fl. middle-sized, yellow, R. and C. S.; fr. C. S.
4. *indicum*, G. Don. (*W. and A. pr.* 1, p. 56. a.—*Wight. icon.* 1, t. 12;—*J. Grah. Cat. B. pl.* p. 15.—*Sida indica, L.*;—*DC. pr.* 1, p. 471;—*Roxb. fl. ind.* 3, p. 179.) Country Mallow-leaf. ♂. 2. Both Peninsulas of India, Bengal, (Serampore.) Fl. largish, orange, R. and C. S.; fr. C. S.
5. *populifolium*, G. Don. (*Mill. dict.* 1, p. 503;—*A. indicum*. β *W. and A. pr.* 1, p. 56.—*Sida populifolia, Lam.*;—*DC. pr.* 1, p. 470;—*Roxb. fl. ind.* 3, p. 179;—*Rheed.* 6, t. 45;—*Rumph.* 4, t. 11.) ♂. 2. Fl. largish, orange, R. and C. S.; fr. C. S. Moluccas, Peninsula of India, Bengal, (Serampore.)
6. *asiaticum*, G. Don. (*W. and A. pr.* 1, p. 56;—*J. Grah. Cat. B. pl.* p. 15.—*Sida asiatica, L.*;—*DC. pr.* 1, p. 470;—*Roxb. fl. ind.* 3, p. 179.) ♂. Peninsula of India, Bengal, (Serampore.) পেটোরি Petarce. Fl. largish, orange, R. and C. S.; fr. C. S.
- The three last species contain a great deal of mucilage, and are on that account used in the same manner here, as the Mallows and Marsh-mallows in Europe.
7. *graveolens*, W. and A. (*pr.* 1, p. 56;—*J. Grah. Cat. B. pl.* p. 15.—*Sida graveolens, Roxb. fl. ind.* 3, p. 179;—*DC. pr.* 1, p. 473;—*Rumph.* 4, p. 29, t. 10.) बुराकुंगि Bura-kungi. 2. Moluccas. Both Peninsulas of India, Bengal, Hindooosthan. Fl. large, deep orange, C. S.; fr. H. S.
8. *tomentosum*, W. and A. (*pr.* 1, p. 56.—*Sida tomentosa, Roxb. fl. ind.* 3, p. 178.) ♂. Peninsula of India, Bengal. Fl. large, light orange, R. and C. S.; fr. C. S.
9. *Avicennæ*, Gärtn. (*fr.* 2, t. 135, f. 1.—*Sida Abutilon, L.*;—*DC. pr.* 1, p. 470;—*Roxb. fl. ind.* 3, p. 178. excl. syn. *Rumph.*) ♂. France, Switzerland, Siberia, N. China. Fl. largish, light orange, R. S.; fr. C. S.—Said to be cultivated in the North of China, as a substitute for hemp and flax. (*Roxb.*)

10. *auritum* (Sida aurita, Wall. Cat.;—DC. pr. 1, p. 468;—B. M. 51, t. 2495.) 5 Java. Fl. largish, deep orange, and fr. whole year.

11. *molle*, G. Don. (Mill. dict. 1, p. 503.—Sida mollis, Ort.;—DC. pr. 1, p. 470.—S. grandifolia, Willd.;—B. Reg. 5, t. 360.) 5 Peru. Fl. large, yellow, and fr. throughout the year.

12. *striatum*, Dicks. (B. M. 67, 3840.) 5 Brazil. Fl. C. S. 1841.

LAGUNEA, Cav. (DC. pr. 1, p. 474;—W. and A. pr. 1, p. 55.)

1. *lobata*, Willd. (DC. l. c.;—W. and A. l. c.—Solandra lobata, Murr.;—Lam. ill. t. 580.—Triguera acerifolia, Cav. diss. 1, t. 11.) 5 Dingyug, Ginghie, Monghir. Fl. white, smallish. In H. C. G. fl. R. S.; fr. C. S. (Roxb.) As this genus only differs from Hibiscus by the total absence of an involucel, it is rather singular to observe Hibiscus Solandra, Roxb. fl. ind. 3, p. 197, and H. pumilus, Roxb. o. c. p. 203, quoted, (in W. and A. pr. add. and corrig. p. 448,) as synonymes of Lagunea lobata, Willd.; Roxburgh saying of the former, "exterior calyx minute or wanting," and of the latter "exterior calyx minute and from 6-9 parted." Perhaps the genus Lagunea, has been formed from specimens, in which the involucel had dropped off.

ANODA, Cav. (DC. pr. 1, p. 458.)

1. *hastata*, Cav. (DC. o. c.) 5 Mexico. Fl. largish, light blue, C. S.; fr. Feb. and March.

2. *Dilleniana*, Cav. (DC. l. c.—Sida cristata, Curt.;—B. M. 10, t. 330, excl. syn.) 5 Mexico. Fl. large, deep-rose coloured, C. S.; fr. Feb. and March.

3. *triangularis*, DC. (pr. 1, p. 459.—Sida deltoidea, Horn.) 5 Mexico. Fl. largish, light-blue, C. S.; fr. Feb. and March.

4. *acerifolia*, DC. (l. c.—Sida hastata, Sims;—B. M. 37, t. 1541, excl. syn.) 5 Mexico. Fl. largish, pale-blue, C. S.; fr. Feb. and March.

PAVONIA, Cav. (DC. pr. 1, p. 442;—W. and A. pr. 1, p. 47.)

1. *Columella*, Cav. (DC. o. c. p. 443.) 5 Bourbon. Fl. largish, white-purplish, C. S.; fr. March.

2. *odorata*, Willd. (DC. pr. 1, p. 444;—Roxb. fl. ind. 3, p. 214;—W. and A. pr. 1, p. 47.—P. sidaoides, Horn.;—DC. l. c.) 5 Gingie, Dingyug, Vendaloore. Fl. middle-sized, rose-coloured, and fr. the whole year. An infusion of the roots is prescribed as a diet-drink in fevers. (Wight.)

3. *rosea*, Wall. Cat. 5 Burma. Fl. middle-sized, rose-coloured, and fr. the whole year.

4. *zeylanica*, Cav. (DC. pr. 1, p. 444;—Roxb. fl. ind. 3, p. 214;—W. and A. pr. 1, p. 47;—J. Grah. Cat. B. pl. p. 246.—Hibiscus zeylanicus, L.;—Burm. ind. t. 48, f. 3.) 5 Ceylon, Trichinopoly. Fl. middle-sized, whitish, R. S.; fr. C. S.

ACRANIA, Swz. (Malvaviscus, DC. pr. 1, p. 445.)

1. *Molvaviscus*, Swz. (B. M. 49, t. 2305.—Malvaviscus arboreus Cav.,

- DC. l. c.*) 5 Jamaica, N. Granada, Mexico. Fl. largish, crimson, C. S.; fr. H. S.
2. *pilosa*, Swz. (*Malvaviscus pilosus, DC. pr. 1, p. 445.*) 5 Jamaica. Fl. largish, crimsonish, C. S.; fr. H. S.
- HIBISCUS*, L. (*W. and A. pr. 1, p. 47.*)
1. *vesicarius*, Cav. (*DC. pr. 1, p. 453;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 13.*) ♂ C. G. H. Peninsula of India. Fl. large, cream-coloured, with a dark-purple eye, C. S.; fr. Feb. and March.
 2. *Trionum*, L. (*DC. l. c.;—B. M. 6, t. 209;—Roxb. H. B. p. 52.*) ♂ Italy, Carniola. C. G. H. Cuddapah in the Peninsula of India. Fl. like those of No. 1, C. S.; fr. Feb.
 3. *surrattensis*, L. (*DC. pr. 1, p. 449;—Roxb. fl. ind. 3. p. 205;—W. and A. pr. 1, p. 48;—J. Grah. Cat. B. pl. p. 13;—B. M. 33, t. 1356;—Wight. icon. 1, t. 197;—Rheed. 6, t. 44;—Rumph 4, t. 16.*) ♀ Moluccas. Both Peninsulas of India. Fl. large, pale sulphur, with a dark-purple eye, R. and C. S.; fr. Feb. and March.
 4. *furcatus*, Roxb. (*fl. ind. 3, p. 204;—DC. pr. 1, p. 449;—W. and A. pr. 1, p. 48;—J. Grah. Cat. B. pl. p. 246.*) 5. Ghauts. Interior of Bengal. Fl. large, pale sulphur, with a dark purple eye, R. S.; fr. C. S.—Yields an abundance of strong, white, flaky fibres, but being very prickly, it is unfit for handling. (*Roxb.*)
 5. *bifurcatus*, Cav. (*DC. pr. 1, p. 449;—Roxb. H. B. p. 51.*) 5. Porto-Rico, Brazil. Fl. large, purplish, (*DC.*) In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*)
 6. *Lindleyi*, Wall. (*pl. as. rar. 1, t. 4;—B. Reg. 17, t. 1395.*) ♂ Segaeen, Tavoy, Taong-Dong. Fl. large, deep crimson, with a dark-purple eye, R. and C. S.; fr. C. S.
 7. *radiatus*, Cav. (*DC. pr. 1, p. 449;—Roxb. fl. ind. 3, p. 209;—W. and A. pr. 1, p. 48;—B. M. 44, t. 1911.*) ♂ Common in gardens. Native place? Jamaica? Fl. large, pale sulphur, with a dark purple eye, R. and C. S.; fr. C. S.
 8. *aculeatus*, Roxb. (*fl. ind. 3, p. 206.*) ♂ Native Place? Fl. large, sulphur, with a dark purple eye, R. and C. S.; fr. C. S.
 9. *Lampas*, Cav. (*DC. pr. 1, p. 447;—Roxb. fl. ind. 3, p. 197;—W. and A. pr. 1, p. 48;—J. Grah. Cat. B. pl. p. 13;—Wight. icon. 1, t. 5.*) 5 Both Peninsulas of India, Bengal, Hindooosthan, extending to the foot of Himalaya. Fl. large, sulphur, with a dark purple eye, R. and C. S.; fr. C. S.
 10. *lunatifolius*, Willd. (*DC. pr. 1, p. 451;—W. and A. pr. 1, p. 49;—Wight. icon. 1, t. 6.*—*Hibiscus pruriens, Roxb. fl. ind. 3, p. 196.*) ♂ Dindygul, Segaeen, Ava, Taong-Dong. Fl. large, sulphur, with a dark purple eye, H. and R. S.; fr. C. S.
 11. *Rosa sinensis*, L. (*DC. pr. 1, p. 448;—Roxb. fl. ind. 3, p. 194;—W. and A. pr. 1, p. 49;—J. Grah. Cat. B. pl. p. 13;—B. M. 5, t. 158;—B. Reg. 21, t. 1826.*) ଜ୍ଵାଳି ଜୁବା. Shoo-flower. 5 China, Mo-

- luccas, interior of Hindoothan. Fl. large, crimsonish, nearly the whole year, fr. 0. Petals astringent, used by the Chinese to blacken their shoes and eyebrows.
- β. *rubro-plenus*; double red. (*Rheed.* 2, t. 17;—*Rumph.* 4, t. 8.)
- γ. *flavo-plenus*; double yellow.
- δ. *carneo-plenus*; double flesh-coloured.
- ε. *luteo-plenus*; double yellowish.
- ο. *variegato-plenus*; double variegated.
12. *liliiflorus*, Cav. β. *hybridus*, (*B. M.* 56, t. 2891;—*J. Grah. Cat. B. pl. p. 13.*) 5 A hybrid plant, derived from *H. liliiflorus*, (a native of the mountains of Bourbon) whose flowers were fertilized by the pollen of *H. Rosa sinensis*. Fl. very large, deep rose-coloured, the whole year.
β. *ruber*, fl. deep red.
γ. *luteus*, fl. buff-coloured.
13. *Genevii*, Bojer. (*B. M.* 59, 3144.) 5 Bourbon, Mauritius, 1835.
14. *syriacus*, L. (*DC. pr.* 1, p. 448;—*Roxb. fl. ind.* 3, p. 195;—*J. Grah. Cat. B. pl. p. 246.*—*H. rhombifolius*, Cav.;—*DC. o. c. p. 452.*) 5 Syria, Carniola. Cultivated in India. Fl. large, purplish-lilac, with a dark-purple eye, R. S.; fr. 0.
β. *pallido-roseus*, fl. pale rose-coloured, with a dark-brown eye. (*B. M.* 3, t. 83.)
γ. *roseo-plenus*, double rose-coloured.
ε. *albo-plenus*, double white. শান্তিজীবী *Sada-juva*.
15. *panduriformis*, Burm. (fl. ind. t. 47, f. 2;—*DC. pr.* 1, p. 455;—*W. and A. pr.* 1, p. 50;—*J. Grah. Cat. B. pl. p. 246.*—*H. tubulosus*, Cav.;—*DC. o. c. p. 447*;—*Roxb. fl. ind.* 3, p. 196.) 5 Peninsula of India, Bengal, (Serampore.) Fl. large, sulphur, with a dark purple eye, Oct. and Nov.; fr. Jan. and Feb.
16. *cannabinus*, L. (*DC. pr.* 1, p. 450;—*Roxb. Corom.* 2, t. 190; fl. ind. 3, p. 208;—*W. and A. pr.* 1, p. 50;—*J. Grah. Cat. B. pl. p. 13.*) 5 Both Peninsulas of India, Bengal, (Serampore.) মেষ্টাপাতা *Mesta-pato*. Fl. large, sulphur, with a dark-brown eye, R. S.; fr. C. S.—Leaves acidulous, eaten by the natives as spinach. Fibres of the bark used for cordage.
17. *vitifolius*, L. (*DC. pr.* 1, p. 450;—*Roxb. fl. ind.* 3, p. 200;—*W. and A. pr.* 1, p. 50.—excl. *H. truncata*, Roxb.;—*J. Grah. Cat. B. pl. p. 13*;—*Rheed.* 6, t. 46.) বনকাপাস *Bun-kapas*. 5 Both Peninsulas of India, Bengal, (Serampore.) Fl. large, sulphur, with a dark-purple eye, R. and C. S.; fr. C. S.
18. *truncatus*, Roxb. (fl. ind. 3, p. 200.) 5 Ceylon. Fl. largish, sulphur, with a dark-purple eye. In H. C. G. fl. R. and C. S.
19. *scandens*, Roxb. (fl. ind. 3, p. 200.) L. 5 Chittagong. Fl. large, pale sulphur, with a dark-brown eye, March; fr. 0.
20. *Patersonia*, Ait. (*DC. pr.* 1, p. 454;—*B. Rep.* 4, t. 286.—*Lagunsea Patersonia*, *B. M.* 20, 769.) 5 Norfolk Island.

SL

21. *heterophyllus*, Vent. (*DC. pr.* 1, *p.* 450;—*Roxb. fl. ind.* 3, *p.* 213;—*B. Reg.* 1, *t.* 29.) 5 N. Holland. Fl. large, white, rosy-tinged, with a dark blood-coloured eye, March; fr. 0.

22. *diversifolius*, Jacq. (*Icon. rar.* 3, *t.* 551;—*DC. pr.* 1, *p.* 449;—*Roxb. fl. ind.* 3, *p.* 208;—*B. Reg.* 5, *t.* 381.—*H. ficutineus*, Cav.; not of others.) 5 East Africa, Madagascar. Fl. large, primrose-coloured, with a dark blood-coloured eye, C. S.; fr. H. S.

23. *mutabilis*, L. (*DC. pr.* 1, *p.* 452;—*Roxb. fl. ind.* 3, *p.* 201;—*W. and A. pr.* 1, *p.* 51;—*J. Grah. Cat. B. pl.* *p.* 13;—*B. Reg.* 7, *t.* 589;—*Rheed.* 6, *t.* 38, *t.* 40, *f.* 1, *t.* 42;—*Rumph.* 4, *t.* 9.) 5 Moluccas. Fl. very large, in the morning white, at noon pale-rose, in the evening deep rose, R. and C. S.; fr. C. S.

♂ *plenus*; double-flowered. (*Rheed.* *t.* 39, *t.* 40, *f.* 2, *t.* 41.) ଅଳପଣ୍ଡ
Thulpuðmo.

24. *collinus*, Roxb. (*H. B.* *p.* 51;—*fl. ind.* 3, *p.* 198.—*H. eriocarpus*, *DC. pr.* 1, *p.* 452;—*W. and A. pr.* 1, *p.* 51.) 5 Circars. Fl. very large, pale-rose, with a dark-blood coloured eye, R. and C. S.; fr. C. S.

25. *hirtus*, L. (*W. and A. pr.* 1, *p.* 51;—*J. Grah. Cat. B. pl.* *p.* 14.—*H. Rosa malabarica*, *Kön*;—*B. ORDER LXXI.—ELÆOCARPACEÆ, Lindl. Nat. Syst. p. 97.

Trees or shrubs, referred to 9 genera including 65 species: 5 from S. America; 2 from New Zealand; 2 from New Holland; 1 from Mauritius, and 55 from the E. Indies. Of the latter, 40 belong to *Elæocarpus*, which, however, upon a strict revision of authentic species, will, no doubt, be somewhat reduced; 11 to *Monocera*; 2 to *Ganitrus*; and 1 to *Acronodia*. 2-3 are natives of Cochin-China; 2 of the Moluccas; 1 of Luzon; 7 of the Khassyá mountains and Assam; 11 of Java; and the rest of the two Peninsulas of India. Properties but little known.

A synopsis of some of the Indian species will be found in *Wight's ill. I.*, p. 83-84.

MONOCERA, Jack. (*W. and A. pr. I.*, p. 83.)

1. *rugosa*, Wight. (*ill. I.*, p. 83;—*icon. 1, t. 61*).—*Elæocarpus rugosus*, Roxb. *fl. ind. 2, p. 596.*) L. 5 Assam, Chittagong. Fl. large white. In H. C. G. fl. fr. Feb. and March; fr. June and July. (*Roxb.*)
2. *Roxburghii*, Wight. (*ill. I.*, p. 83;—*icon. 1, t. 63*).—*Elæocarpus aristatus*, Roxb. *fl. ind. 2, p. 599.*) L. 5 Khassyá Mountains. Fl.

middle-sized, yellow, fragrant. In H. C. G. fl. April; fr. August. (Roxb.)

GANITRUS, Rumph. (*Gärtn. fr.* 2, p. 271.)

1. *sphaericus*, Gärtn. (*o. c. t.* 189;—*Wight. ill.* 1, p. 83;—*icon.* 1, t. 66.—*Elæocarpus Ganitrus*, Roxb. *fl. ind.* 2, p. 592;—*J. Grah. Cat. B. pl.* p. 22;—*Rumph.* 3, t. 101.) L. 5 Moluccas, Assam, Khassyia and Morung Mountains, Nepal. Fl. middle-sized, white. In H. C. G. fl. Feb. and March; fr. Nov. (Roxb.) The hard, dry, deeply grooved and elegantly sculptured seeds are frequently worn as beads by Brahmins and Fakirs, and set in gold, are sometimes even sold as ornaments in England. (Royle.)

ELÆOCARPUS, L. (*W. and A. pr.* 1, p. 82.)

1. *primodes* (E. serratus, Roxb. *fl. ind.* 2, p. 596, not L.;—*W. and A. l. c. annot.*) জলপাই Jolpai. 5 Assam, Khassyia Mountains, Kamaon. Fl. small, white, H. S.; fr. R. S. Fruit eaten by the Natives in their curries, or pickled. No oil can be extracted from them. (Roxb.)
2. *lanceifolius* Roxb. (*fl. ind.* 3, p. 598;—*Wight. icon.* 1, t. 65.) 5 Khassyia Mountains, Assam. Fl. small, white. In H. C. G. fl. June and July; fr. Sept. and Oct. (Roxb.) Seeds used like those of *Ganitrus sphaericus*. (Royle.)
3. *robustus*, Roxb. (*fl. ind.* 2, p. 597;—*Wight. icon.* 1, t. 64.) L. 5 Khassyia Mountains. Fl. largish, white, fragrant, June and July; fr. Sept. and Oct.
4. *Iucidus*, Roxb. (*fl. ind.* 2, p. 600.) 5 Chittagong. Introduced into H. C. G. in 1810, but had not fl. in 1814.
5. *longifolius*, Bl. (*Spreng. c. p. p.* 189.) 5 Java. Banks of the Saluen. Introduced in 1839. Has not fl.
6. *integrifolius*, Lam. (*DC. pr.* 1, p. 519.) 5 Mauritius. Has been introduced into H. C. G. Fl.?

ORDER. LXXII.—DIPTEROCARPACEÆ. (DIPTERACEÆ, Lindl.
Nat. Syst. p. 98.)

THE CAMPHOR TREE TRIBE.

Generally large trees, arranged in 5 genera comprising 32 species: 2 for Sierra Leona; (*Lophira*); and the rest E. Indian, viz. 11 of *Dipterocarpus*;

10 of *Hopea*; 5 of *Vatica*; and 4 of *Vateria*. Beside these, Blume has three species for Java, probably belonging to *Dipterocarpus*. Roxburgh's *Hopea eglandulosa*, constitutes a new genus, to be referred probably to Euphorbiaceæ or its neighbourhood. More than 2-3ds. of the species inhabit mountainous or hilly parts of the two Indian Peninsulas.

Almost every species of this order abounds in a balsamic resinous juice, well known under the common English names of *Dammer* and *Wood-oil*, according to its hardening or continuing liquid, when exposed to the air. That drawn from the *Vaticas* and *Vaterias* hardens and forms *Dammer* and *Piney*; that from the *Dipterocarpi* retains its fluidity, and is the *Wood-oil* of the bazars. Some of the species produce a fragrant resin, which is burnt in the temples as incense. *Dammer* is used in India for most of the purposes to which pitch and rosin are applied in Europe. *Wood-oil* either alone, or thickened with *Dammer*, supplies a useful varnish for wood, possessing the valuable property of repelling, for a long time, the attacks of white ants, as well as of resisting the influence of the climate. (*Wight.*)

VATERIA, L. (*W. and A.* pr. 1, p. 83.)

1. *indica*, L. (*W. and A.* l. c.; — *Wight* ill. 1, t. 36; — *Roxb. Corom.* 3, t. 288; *fl. ind.* 2, p. 602; — *J. Grah. Cat. B.* pl. p. 22. *Eleocarpus copalliferus*, *Retz.*; — *Rheed.* 4, t. 15.) *Piney Varnish tree*. L. 5 Malabar. Fl. middle-sized, white. In *H. C. G.* fl. *H. S.*; fr. Aug. (*Roxb.*)

Vateria indica produces the resin called in India, *Copal*, (in England known by the name of *Gum Anime*) as very nearly approaching the true resin of that name. (*Lindl.*) When recent, it is found from pale green to a deeper amber colour, with all the intermediate shades. In some parts of India, beads are made of such pieces as most resemble Amber beads, even to being electrical, when excited by rubbing. (*Roxb.*) The resin is procured by cutting a notch in the tree, sloping inwards and downwards. This is soon filled with the juice, which in a short time hardens by exposure to the air. When used as a varnish (*Piney Varnish*), the usual practice is to apply the balsam, before it has become hard; but when this cannot be procured, the resin melted by a slow fire and mixed with boiling Linseed-oil forms a varnish, which answers equally well for most purposes. The resin is on the Malabar-coast also made into candles. While burning, these diffuse an agreeable fragrance, give a fine clear light with little smoke, and consume the wick so as not to require snuffing. (*Wight.*)

2. *lanceæfolia*, Roxb. (*fl. ind.* 2, p. 601; — *Wight* ill. 1, p. 88.) L. 5 Assam, Khassy Mountains. Fl. largish, white, fragrant. In *H. C. G.* fl. April and May; fr. July and Aug. (*Roxb.*) This tree yields a resin like that of No. 1, from which the Indians prepare one of the materials of their religious oblations. (*As. Res.* 12, p. 539.)

VATICA, L. (*W. and A.* pr. 1, p. 84). — *Shorea*, (*Roxb.*)

1. *robusta*, W. and A. (*Shorea robusta*, *Roxb.* *fl. ind.* 2, p. 615; — *Corom.* 3, t. 212.) *सौल Sal*, L. 5 Morung, Nepal. Extends more nor-

therly than any other of the order, being found all along the Himalaya, to the neighbourhood of the Jumna, forming vast forests, frequently unmixed with any other tree, but generally confined in the most northern parts within the first range of the hills, (*Royle*). Fl. middle-sized, yellowish-white, fragrant, April and May; fr. R. S. It affords the best and most extensively used timber in India; the goodness of which must depend in a great measure on the resin, (called *ral* in the northern, and *dhoona* in the southern provinces) which it contains. (*Royle*.)

2. *Tumbuggaia*, W. and A. (pr. 1, p. 84;—*Wight icon.* 1, t. 27.—*Shorea Tumbuggaia*, *Roxb.* *H. B.* p. 42;—*fl. ind.* 2, p. 617.) 5 Paulghat Mountains. Fl. middle-sized. Introduced into H. C. G., before 1814. Fl.?

DIPTEROCARPUS, Gärtn. (*W. and A. pr. 1, p. 84.*)

1. *lavis*, Buch (*W. and A. o. c. p. 85.*—*Dipterocarpus turbinatus*, *Roxb.* *Corom.* 3, t. 213;—*fl. ind.* 2, p. 612.) L. 5 Tippera, Ava. Fl. large white, tinged with red. In H. C. G. fl. March; fr. May and June. Yields an abundance of *Wood-oil*. A large notch is cut into the trunk of the tree, near the ground, where a fire is kept up, till the wound is charred, soon after which the balsam begins to ooze out: the average produce of the best trees during the season, is said to be sometimes 40 gallons. It is found necessary, every three or four weeks, to cut off the old charred places and burn them again. In large healthy trees, abounding in balsam, they even cut a second notch in some other part of the tree and char it as the first. These operations are performed during the months of November, December, January and February. Should any of the trees appear sickly the following season, one or several years respite is given them. (*Roxb.*)
2. *angustifolius*, W. and A. (pr. 1, p. 84. *annot.*—*Dipterocarpus costatus*, *Roxb.* *fl. ind.* p. 613, not Gärtn.) L. 5 Chittagong. In H. C. G. fl. C. S.; fr. April and May. (*Roxb.*) Next to the following species, it furnishes the largest quantity of *Wood-oil*.
3. *icanus*, Roxb. (*fl. ind.* 2, p. 614.) L. 5 Chittagong. In H. C. G. fl. Nov. and Dec.; fr. April. (*Roxb.*)
4. *alatus*, Roxb. (*fl. ind.* 2, p. 614.) L. 5 Pegu, Mascal Islands. Introduced into H. C. G. in 1809. Here the tree has not fl., though cultivated for more than fourteen years.

HOPEA, Roxb. (*W. and A. pr. 1, p. 85.*)

1. *odorata*, Roxb. (*fl. ind.* 2, p. 609.) 5 Chittagong, Pegu. Fl. small, pale-yellow, fragrant. In H. C. G. fl. April and May; fr. R. S. (*Roxb.*)
2. *faginea* Wall Cat. Penang. Introduced in 1840.

* *Vateria Roxburghiana*, *Wight icon.* 1, t. 26. 5 Peninsula of India.—*V. ceylanica*, *Wight*. Ceylon.—*Vatica laccifera*, *W. and A.*; *Wight*

ORDER. LXXXIII.—TILIACEÆ, Juss. Lindl. Nat. Syst. p. 99.

THE LINDEN TRIBE.

Trees, shrubs, seldom undershrubs or herbs, referred by Lindl. to 29 genera, from which must be deducted *Vatica*. As to species, DC. pr. and Spreng. syst. enumerate 53 from S. America, Mexico, and the W. Indies; 8 from tropical Africa; 6 from Europe; 5 from Japan; 4 from N. America; 4 from Arabia; 2 from the Society Islands; 2 from Mauritius; 1 from China; 1 from Madagascar, and 1 from New Zealand. To these Wall. Cat. adds 1 from St. Helena, and 1 from Zanzibar. Six forms have been discovered in S. Africa (*Harvey*); and 82 in the E. Indies, viz. 53 of *Grewia*; 12 of *Triumfetta*; 8 of *Cochrorus*; 3 of *Columbia*; 1 of *Diphlophractum*; 1 of *Neesia*; 1 of *Porpa*; 1 of *Espera*; (Spreng.) 1 of *Berrya*; and 1 of *Brownlowia*. With the exception of a few Nepalese species, the order is in India confined to the tropics.

General properties mucilaginous and emollient; special ones noticed under the different species.

CORCHORUS, L. (DC. pr. I, p. 504;—W. and A. pr. I, p. 72.)

1. *fascicularis*, Lam. (DC. pr. I, p. 505;—W. and A. l. c.;—Roxb. fl. ind. 2, p. 582.) जङ्गलि पाटे Junglee-pat. बिल मालिता Bil-nalita. ⊖ Peninsula of India, Bengal, (Serampore,) extending up to the arid region on the western banks of the Jumna. Fl. small, yellow, R. and C. S.; fr. C. S.

2. *trilocularis*, L. (DC. pr. I, p. 504;—W. and A. pr. I, p. 72;—Roxb. fl. ind. 2, p. 582;—J. Grah. Cat. B. pl. p. 20.) ⊖ Peninsula of India, Prome, Bengal, (Serampore.) Fl. small, yellow, Aug. and Sept.; fr. Oct. and Nov.

3. *olitorius*, L. (DC. pr. I, p. 504;—W. and A. pr. I, p. 73;—Roxb. fl. ind. 2, p. 581;—J. Grah. Cat. B. pl. p. 20;—B. M. 55, t. 2810. C. decemangularis, Roxb. o. c. p. 582.) पाटे Pat. ⊖ Both Peninsulas of India, Bengal, (Serampore.) Fl. small yellow, R. S.; fr. Oct. and Nov. used in India, and in Egypt, as a pot-herb. Cultivated in Bengal for the fibres of its bark, which, like those of *C. capsularis*, L., are employed in making a coarse kind of cloth (*gunny*, or rice bags,) cordage for agricultural purposes and boats, and Bengalee paper.

4. *acutangulus*, Lam. (*DC. pr. 1*, p. 505;—*W. and A. pr. 1*, p. 73;—*J. Grah. Cat. B. pl. p. 20*.—*C. fuscus*, Roxb. *fl. ind. 2*, p. 582.—*C. aestuans*, Gärtn. *fr. 2, t. 64*.) তিতা পাট Tita-pat. ◎ Both Peninsulas of India, Bengal, (Serampore,) extending up to Saharunpore. Fl. small, yellow, R. S.; fr. C. S.
5. *capsularis*, L. (*DC. pr. 1*, p. 505;—*W. and A. pr. 1*, p. 73;—*Roxb. fl. ind. 2*, p. 581;—*Wight icon. 1, t. 311*.—*Rumph. 5, t. 78, f. 1*.) ঘি নালিতা পাট Ghi-nalita-pat. ◎ China, Moluccas, both Peninsulas of India, Bengal, (Serampore,) extending up to Saharunpore. Fl. small, yellow, R. S.; fr. Sept. and Oct. Cultivated in China and Bengal, for the same purposes as No. 3.

TRIUMFETTA, L. (*DC. pr. 1*, p. 506;—*W. and A. pr. 1*, p. 73.)

ORDER LXXIV.—LYTHRACEÆ,—Lindl. Nat. Syst. p. 100.

THE LOOSESTRIFE TRIBE.

Herbs, undershrubs, seldom shrubs or trees, referred to 27 genera. Of species, DC. (1828) enumerates about 105 for S. America, Mexico and the W. Indies; 10 for Europe; 7 for N. America; 4 for N. Africa; 4 for Senegal; 1 for Iberia; 1 for Caucasus; 1 for Timor; 1 for Mauritius; 1 for China; and 1 for New Holland. In South Africa have been found 3 species, (*Harvey*); and in the E. Indies 32: 3 of *Rotala*; 1 of *Symmetria*; 2 of *Cryptotheca*; 4 of *Ameletia*; 7 of *Ammannia*; 1 of *Lythrum*; (Cashmere); 1 of *Fatioa*; (*Lagerströmia parviflora?*) (*Royle*); 1 of *Pemphis*; 1 of *Nesaea*, (*Wight*); 1 of *Lawsonia*; 1-2 of *Grislea*; 8 of *Lagerströmia*; and 1 of *Duabanga*. Five of these have also been found in other parts of the world. Most of them are tropical, only 4 extending to the foot of the Himalayas, in the Deyra Dhoon.—Properties unimportant.

ROTALA, L. (*Wight. ill. 1, p. 205-6.*)

1. *Rozburghiana*, Wight. (ill. 1, p. 206; *icon. 1 t. 260. A.*—*Ammannia pentandra*, Roxb. *fl. ind.* 1, p. 427; *ed. Carey*, 1, p. 448;—*DC. pr. 3, p. 79.*—*W. and A. pr. 1, p. 305.*) 5 Peninsula of India, Bengal, (Serampore,) Nepal. Fl. minute, red; and fr. R. S.

SL

AMELETIA, DC. (*Wight. ill. 1, p. 205-6.*)

1. *indica*, DC. (*pr. 3, p. 76;—W. and A. pr. 1, p. 303;—Wight. ill. 1, p. 206; icon. 1, t. 257.* *A. Ammannia nana, Roxb. ? fl. ind. 1, p. 427; ed. Carey, 1, p. 448.*) ⊙ Peninsula of India, Bengal, (Serampore.) Fl. minute; and fr. R. S.
2. *rotundifolia*, Wight (*ill. 1, p. 206;—icon. 1, t. 258.* *Ammannia rotundifolia, Buch. ;—Roxb. fl. ind. 1, p. 425; ed. Carey, 1, p. 446;—DC. pr. 3, p. 79;—W. and A. pr. 1, 306.*) ⊙ Neelgherries, Khassy Mountains, Deyra-Dhoon. ⊙ Fl. small, red; and fr. R. S.

Exists in a cultivated state in N. Africa and most parts of the Oriental region. Fl. small, pale greenish, fragrant; and fr. the whole year. This is the *Henna-plant* of Egypt. The fresh leaves, beaten up with Catechu, dye the nails and skin of a reddish orange colour, which is much admired by the women of India and Egypt. The fresh made paste is laid on at bed-time, and removed in the morning, when the colour remains till the nails or epidermis are renewed or removed. (Roxb.) The leaves are also used for dyeing skins and maroquins reddish yellow, and for many other purposes. They contain no tannin. (Edinb. Phil. Journ. 12, p. 416.)

GRISLEA, Löfl. (DC. pr. 3, p. 92;—*W.* and *A.* pr. 1, p. 307.)

ORDER LXXV.—MELIACEÆ, Juss.—Lindl. Nat. Syst. p. 101.

THE BEAD-TREE TRIBE.

Trees or shrubs, by Lindl. referred to 35 genera, (adding Munronia and Monocyclis, and deducting Aitonias, which Harvey places among Zygophylaceæ.) Of their species, DC. pr. and Spreng. syst. enumerate 22 for S. America, Mexico and the W. Indies: 1 for tropical Africa; 5 for Madagascar; 5 for Mauritius; 1 for Arabia; 1 for China; and 3 for New Holland and the South Sea Islands. To these Lindl. adds an Hartighsea for N. Zealand. S. Africa exhibits 3 species, (*Harvey*); and the E. Indies

72; viz., 5 of *Turrea*; 1 of *Naregamia*; 4 of *Munronia*; 4-5 of *Melia*; 1 of *Azadirachta*; 2 of *Mallea*; 1 of *Cipadessa*; 5 of *Amoora*; 3 of *Milaea*; 4 of *Walsura*; 1 of *Monocyclis*; 2 of *Sphaerosacme*; 10 of *Dysosylum*; 1 of *Chisocheton*; 2 of *Hartighsea*; 6 of *Epicharis*; 1 of *Didymocheton*; 1 of *Gonocheton*; 1 of *Sandoricum*; 1 of *Lansium*; 5 of *Heynia*; 2 of *Xylocarpus*; 1 of *Calpandria*; and 7 of *Aglaia*. Twenty-four of these inhabit Java; 4 the Moluccas; 4 Assam; 4 the Khassy Mountains; 4 Nepal; and the rest the two Peninsulas of India, Ceylon, Sumatra, and Bengal.

"Bitter, astringent, and tonic qualities belong to the species of this order, but often developed in so considerable a degree as to render their employment dangerous, without much precaution." (Lindl.) The latter is however, not the case with our Indian Meliaceæ, unless f. ex. the Neem-bark and fruit are taken in an immoderate dose.

QUIVISIA, Juss. (*DC. pr. I. p. 620.*)

1. *heterophylla*, Cav. (*Diss. 7. p. 368. t. 213*;—*DC. o. c. p. 621.*) 5

Mauritius. Fl. small, whitish, April; fr. 0

Persian Lilac. L. 5 Syria, China, N. India. Common about villages both in the Concan and Deccan. Fl. smallish, white, externally lilac at the top, fragrant, March; fr. Nov. and Dec.—Cultivated in Provence and in our gardens.—Root bitter, nauseous, used in N. America as anthelmintic. (*A. Richard.*)

4. *Bukayun*, Royle. (*ill. p. 141.*—*Melia sempervirens*, Roxb. *fl. ind. 2. p. 395*;—*W. and A. pr. I. p. 117*; Swz.?) बाकाजन *Bukarjun*: Hind, *Bukayun*. 5 Persia, Nepal, Kemaon. Cultivated in our gardens. Fl. smallish, lilac, fragrant; and fr. the whole year.

AZADIRACHTA, Ad. Juss. (*W. and A. pr. I. p. 117.*)

1. *indica*, Ad. Juss. (*W. and A. o. c. p. 118*;—*J. Grah. Cat. B. pl. p. 30*;—*Wight. icon. 1. t. 17.*—*Melia Azadirachta*, L.;—*DC. pr. I. p. 622*;—*Roxb. fl. ind. 2. p. 394*;—*Burm. zeyl. t. 15*;—*Rheed 4. t. 52.*) निम *Nim*. 5 Ceylon, Peninsula of India, Ava, Bengal, (Serampore.)

Hindoosthan, Assam. Fl. small, white, honey-scented, Feb. and March; fr. May and June. Bark used as a good substitute for Peruvian bark. Leaves, especially mixed with equal parts of those of *Vitex Negundo*, L. are used successfully in various ways. The mixed, dried leaves, added to common poultices, act powerfully in preventing glandular tumors from coming to maturity. The same diuretic effect is produced, after the application of leeches, in all kinds of bruises and sprains, by a watery or vinous infusion of them, particularly when spirit of camphor is now and then sprinkled over the cloth, steeped in the infusion. We have seen the greatest benefit from this application, in the worst cases of compound fracture. A *succulus aromaticus* of these leaves, with a few grains of powdered camphor, seldom fail to afford relief in rheumatic affections of the ears, eyes, and teeth. From the fruit a bitter oil is expressed, which is used against worms, and that, according to Dr. Buchanan, in doses of one ounce. This, Achil. Richard observes, is another instance, after the Olive, of the pericarp (pulp) yielding that substance which is usually obtained from the seed. The seeds after being skinned are used for killing insects, and the kernels, powdered and mixed with water, for washing the hair. Timber hard, durable, fit for ship-building—"Leaves beaten into a pulp, and thus externally applied, act like a charm in removing the most intractable forms of psora, and other pustular eruptions." (Wight.)

MALLEA, Ad. Juss. (*W. and A.* pr. 1, p. 118.)

1. *Rothii*, (*W. and A.* l. c.;—*J. Grah. Cat. B.* pl. p. 31.—*Melia baccifera*, *Roth.*;—*DC.* pr. 1, p. 622.—*Ekebergia indica*, *Roxb.* fl. ind 2, p. 392.) ५ Circars, Katruj Ghaut, near Poona. Fl. small, white; and fr. the whole year.

ORDER LXXVI.—CEDRELACEÆ, Ad. Juss. Lindl. Nat. Syst. p. 103.

THE TOON-TREE TRIBE.

Large trees, of 9-10 genera comprising about 16-18 species: 5 from South America, Mexico and the W. Indies; 2 from New Holland; 1 from Senegal, and 8-10 from the E. Indies. Of the latter, 1 belongs to *Soymida*; 1 to *Chikrassia*; 1 to *Chloroxylon*; 1 to *Flindersia*; 4-5 to *Cedrela*; and 1 to *Ixionanthes*, which, perhaps does not belong to the order. Properties under the species.

SWIETENIA, L. Ad. Juss.

1. *Mahagoni*, L. (*DC. pr. I.*, p. 625;—*Cav. diss. 7.*, p. 365, t. 209;—*Roxb. H. B.* p. 33.) *Mahagoni Tree.* L. 5 Rocky places in the hotter parts of America. Fl. very small, pale greenish-white, April; fr. 0.—*Bark* accounted febrifugal.

SOYMIDA, Ad. Juss. (*W. and A. pr. I.*, p. 122.)

1. *febrifuga*, Ad. Juss. (*W. and A. I. c.*—*Swietenia febrifuga, Roxb. Corom.* 1, t. 17; *fl. ind.* 2, p. 398;—*DC. pr. I.*, p. 625;—*J. Grah. Cat. B. pl.* p. 32.) *রোহুনা Rohuna. Red-Wood tree.* L. 5 Central and Southern Provinces of India. In considerable abundance in various parts of Guzerat; also at the Sindwah Ghaut, and in the Adjunta and Jowar jungles. Fl. smallish, greenish-white, March and April; fr. July and Aug. The *Rohuna Bark* is a useful tonic in intermittent fevers, where quinine cannot be had.

CHICKRASSIA, Ad. Juss. (*W. and A. pr. I.*, p. 122.)

1. *tabularis*, Ad. Juss. (*W. and A. o. c.* p. 123;—*Wight ill. 1.*, t. 76.—*Swietenia Chickrassa, Roxb. fl. ind.* 2, p. 399;) *চিক্রাশি Chikrasee*, L. 5 Chittagong. Cunnawady Hills, near Dindygul. Fl. middle-sized, greenish-white. In H. C. G. fl. H. S.; fr. C. S. The *wood* of this tree, (*Chittagong Wood,*) is close-grained, light-coloured, elegantly veined, and employed by the cabinet-makers. (*Roxb.*)

CHLOROXYLON, DC. (*pr. I.*, p. 625;—*W. and A. pr. I.*, p. 123.)

1. *Swietenia*, DC. (*I. c.*;—*W. and A. I. c.*;—*J. Grah. Cat. B. pl. p. 32.*—*Swietenia Chloroxylon, Roxb. Corom.* 1, t. 64; *fl. ind.* 2, p. 400.) *Satin-Wood tree.* 5 Circars, about the falls of Gokauk, on sandstone hills, Alleh Belah Hills. Fl. small, greenish-white, March and April; fr. C. S. *Wood*, close-grained, yellow-coloured, like the box. One of the trees that yield wood-oil.

FLINDERSIA, R. Br. (*DC. pr. I.*, p. 125;—*Spreng. syst. 1.*, p. 520. No. 889.)

1. *amboinensis*, Poir. (*DC. I. c.*;—*Spreng. syst. 1.*, p. 794;—*Rumph. 3.*, t. 129.) 5 Moluccas. In H. C. G. fl. ?

2. *australis*, R. Br. (*DC. I. c.*) 5 N. Holland. In H. C. G. fl. ?

CEDRELA, L. (*DC. pr. I.*, p. 624;—*W. and A. pr. I.*, p. 123.)

1. *Toona*, Roxb. (*Corom.* 3, t. 238; *fl. ind.* 1, p. 635;—*ed. Carey*, 2, p. 423;—*DC. I. c.*;—*W. and A. o. c.* p. 124;—*Wight icon. 1.*, t. 161. —*C. hexandra, Wall. in Roxb. o. c. annot.*;—*Rumph. 3.*, t. 39.) *তূন Toon.* L. 5 Peninsula of India, Bengal, (Serampore.) Foot of the Himalayas. Fl. small, whitish, honey-scented, May and June; fr. R. S. *Wood* forms the Mahogany of India, though it is lighter and more loose-textured than Mahogany. *Bark* accounted febrifugal.

* *Khaya senegalensis*, Ad. Juss. 5 Senegal.—*Cedrela serrata*, Royle; ill. t. 25. 5 Valleys of the Himalaya.—*G. odorata*, L. 5 W. Indies.—*G. angustifolia*, Moç. and Sessé. 5 N. Spain.—*Oxleya xanthoxylla*, Cunningham. 5 N. S. Wales.

SL

ORDER LXXVII.—HUMIRIACEÆ.—Ad. Juss. Lindl. Nat. Syst. p. 104.

"All Brazilian trees." (Lindl.)

* *Helleria obovata*, Mart.—*Humirium crassifolium*, Mart.—*H. floribundum*, Mart. The latter, "when the trunk is wounded, yields a fragrant, liquid, yellow balsam, called *Balsam of Umiri*, resembling in properties *Copaiva* and *Balsam of Peru*." (Martius.)

ORDER LXXVIII.—CITRACEÆ.—(AURANTIACEÆ, CORR.

Lindl. Nat. Syst. p. 105.)

THE CITRON TRIBE.

Trees or shrubs, comprehended in 18 genera. Of the species, 2 have been found in the South Sea Islands; 5 in China; 1 in Timor; 1 in Mauritius; 1 in Madagascar; 2 in Japan; 1 in Florida; 2 in S. America; and 74 in the E. Indies. Of the latter, 5 belong to *Atalantia*; 1 to *Triphasia*; 11 to *Limonia*; 11 to *Glycosmis*; 11 to *Sclerostylis*; 1 to *Bergera*; 3 to *Murraya*; 4-5 to *Cookia*; 8-9 to *Clausena*; 1-2 to *Micromelum*; 1-2 to *Paramignya*; 2 to *Luvunga*; 1 to *Polycyema*; 1 to *Feronia*; 1 to *Ægle*; 9 to *Citrus*, and 1 to *Chionotria*. Several species of the order will, however, require a thorough re-examination from authentic specimens. With the exception of *Limonia Laureola*, Wall., and *L. retusa*, D. Don, (Nepalese plants,) all the Indian species are tropical.

The wood of the species of this order is universally hard and compact. They abound in a volatile, fragrant, bitter, exciting oil. The pulp of the fruit is always more or less acid, (DC.)

A. LIMONEÆ, W. and A. pr. 1, p. 90.

ATALANTIA, Corr. (DC. pr. 1, p. 535;—W. and A. pr. 1, p. 90.)

1. *monophylla*, DC. (l. c.;—W. and A. o. c. p. 91;—J. Grah. Cat. B. pl. p. 23.—*Limonia monophylla*, L.;—Roxb. Corom. 1, t. 82; fl. ind. 2, p. 378.—*Turrea virens*, Kön; not L.—*Trichilia?* *spinosa*, Willd.;—DC. pr. 1, p. 623.—*Limonia pumila*, Burm. zeyl. t. 65, f. 1;—Rheed. 4, t. 12, 5 Coromandel. Common on the Ghauts, at Sidney Point, Mableshwur. Fl. small, white, Oct. and Nov.; fr. Feb.

2. ? *pubigera*, Wall. 5 Assam. Introduced in 1839, has not fl.

TRIPHASIA, Lour. (DC. pr. 1, p. 535;—W. and A. pr. 1, p. 91.)

1. *trifoliata*, DC. (o. c. p. 536;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 23.—T. Aurantiola, Lour.;—Roxb. H. B. p. 25.—*Limonia trifoliata*, L.;—Burm. ind. t. 35, f. 1;—Jacq. icon. rar. 3, t. 463.—L. ? *diacantha*, DC. pr. 1, p. 536.) চীনা নারঞ্জি Cheena-narungee. 5 China. Cultivated in gardens. Fl. middle-sized, white, fragrant; and fr. the whole year. Fruit very pleasant.

LIMONIA, L. (DC. pr. 1, p. 536;—W. and A. pr. 1, p. 91.)

1. *acidissima*, L. (DC. l. c.;—W. and A. o. c. p. 92;—J. Grah. Cat. B. pl. p. 23.—*L. crenulata*, Roxb. Corom. 1, t. 86;—fl. ind. 2, p. 381;—DC. l. c.;—Rheed. 4, t. 14.) 5 Coromandel. Common on sandstone hills at Padshapore, and at the Falls of Gokauk. Monghir. Hurdwar. Assam. Fl. small, white, fragrant, H. S.; fr. R. S.—Fruit much used as a tonic in Malabar, where it forms an article of commerce with the Arabs. (J. Grah.)
2. *angulata*, W. and A. (pr. 1, p. 91. annot.—*Citrus angulata*, Willd.—DC. pr. 1, p. 540;—Rumph. 2, t. 32.) 5 Moluccas. Soonderbuns. Fl. small, white, fragrant. Introduced in 1840. Has not fl.
3. *caudata*, Wall. Khassy Hills. Introduced in 1839. Has not fl.
4. ? *grata*, Wall. Native place?—In H. C. G. Fl.?
5. ? *alternans*, Wall. 5 Pegu, Oct. 1821.

GLYCOSMIS, COR. (DC. pr. 1, p. 538;—W. and A. pr. 1, p. 92.)

1. *arborea* DC. (l. c.;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 23.—*Limonia arborea*, Roxb. Corom. 1, t. 85; fl. ind. 2, p. 381;—B. M. 46, t. 2074.) 5 Circars. Bombay Presidency. Ava. Fl. small, greenish-white. Has been introduced into H. C. G.? Fl.?
2. *pentaphylla*, DC. (pr. 1, p. 538;—W. and A. pr. 1, p. 93;—J. Grah. Cat. B. pl. p. 23.—*Limonia pentaphylla*, Retz?—Roxb. fl. ind. 2, p. 381;—Corom. 1, t. 84.) 5 Peninsula of India, Bengal, (Serampore.) Fl. small, white, fragrant; and fr. R. and C. S.
3. *tetraphylla*, Wall. 5 Khassy Mountains. Fl. small, white, fragrant, nearly the whole year; fr. O.
4. *oxyphylla*, Wall. 5 Near to No. 4. Khassy Mountains.

SCLEROSTYLLIS, Bl. (W. and A. pr. 1, p. 93.)

1. *atalantiooides*, W. and A. (l. c.—*Limonia bilocularis*, Roxb. fl. ind. 2, p. 377.) 5 Coromandel. Fl. small, white, nearly inodorous,—May and June; fr. July and Aug.

BERGERA, Kön. (DC. pr. 1, p. 537;—W. and A. pr. 1, p. 94.)

1. *Kinigii*, L. (DC. l. c.;—Roxb. Corom. 2, t. 112; fl. ind. 2, p. 375;—W. and A. l. c.;—Wight icon. 1, t. 13;—J. Grah. Cat. B. pl. p. 24;—Trans. Linn. Soc. 15, t. 5, f. 4;—Rheed. 4, t. 53.) 5 Coromandel, Assam, Kemaon. Fl. small, white, fragrant, C. S.; fr. H. S. Leaves very fragrant, used for seasoning curries, stomachic, and tonic. Dried they retain these qualities, and are sold in the bazars. An infusion of them considered antemetic.

B. CLAUSENEAE, W. and A. pr. 1, p. 90.

5. *punctata*, W. and A. (*pr. 1, p. 95. annot.*—*Amyris punctata*, Roxb. *fl. ind. 2, p. 251*.) 5 Chittagong. Fl. small, white, H. S.; fr. R. S.

MICROMELUM, Bl. (*Wight. ill. p. 107*.)

1. *integerrimum*, W. and A. (*pr. 1, p. 94. annot.*—*Bergera integerrima*, Buch.;—*Roxb. fl. ind. 2, p. 376*;—*DC. pr. 1, p. 537*.) 5 Banks of the Megna. Fl. small, greenish-white, fragrant, C. S.; fr. R. S.

PARAMIGNYA, Wight (*ill. 1, p. 108*.)

- ? 1. *citrifolia*, Wight. (*Limonia citrifolia*, Roxb. *fl. ind. 2, p. 379*.) 5 Chittagong. Fl. middle-sized, white, fragrant, H. S.; fr. O.

LUVUNGA, Buch. (*Wight ill. 1, p. 108*.)

1. *scandens*, Buch. (*Limonia scandens*, Roxb. *fl. ind. 2, p. 380*.) लवुंगा Luvunga-luta. 5 Silhet, Chittagong. Fl. middle-sized, white, fragrant, H. S.; fr. August and Sept.

POLYCYEMA.

1. *pentaphyllum*, (Amyris pentaphylla, Roxb. *fl. ind.* 2, p. 247.) 5 Cawnpore. Fl. small, whitish, fragrant, H. S.; fr. R. S.;—Leaves, when bruised between the fingers, very fragrant. *W.* and *A.* would refer it to Cookia, from which, as well as from Clausenæ, the many ovula in each cell of the ovary exclude it.

FERONIA, Corr. (*DC. pr.* 1, p. 538;—*W.* and *A. pr.* 1, p. 96.)

1. *Elephantum*, Corr. (*DC. l. c.*;—*W.* and *A. l. c.*;—*Roxb. Corom.* 2, t. 141; *fl. ind.* 2, p. 411;—*Wight icon.* 1, t. 15;—*J. Grah. Cat. B. pl. p. 24.*—Crataeva Vallanga, Kön. Anisifolius, *Rumph.* 2, t. 43.) कथरेल Kuthbel. Elephant or Wood-Apple. L. 5 Moluccas. Coromandel. Bombay Presidency, especially at Guzerat. Bengal, (Serampore.) Assam. Fl. small, greenish-white, anise-scented, March; fr. Oct. Wood hard, durable. From wounds in the bark exudes a very transparent gum, having the properties of Gum Arabic, and said to be better suited for mixing colours than it. The young leaves emit a fragrance of anise, and are therefore considered stomachic and carminative. The pulp of the fruit affords a very pleasant jelly, so closely resembling black currant jelly, as to be only distinguished by a slight degree of astringency. (*Wight.*)

ÆGLE, Corr. (*DC. pr.* 1, p. 538;—*W.* and *A. pr.* 1, p. 96.)

1. *Marmelos*, Corr. (*DC. l. c.*;—*W.* and *A. l. c.*;—*Roxb. Corom.* 2, t. 143; *fl. ind.* 2, p. 579;—*J. Grah. Cat. B. pl. p. 24.*—*Wight icon.* 1, t. 16.—Feronia lucida, *Roth.*;—*DC. l. c.*—Crataeva Marmelos, L.;—*Rheed* 3, t. 37.—*Rumph.* 1, t. 81.) बेल Bel. 5 Coromandel. Malabar Hill, Bombay. Elephanta. Bengal, (Serampore.) Assam. Common about the Pagodas, as the Natives have a deep reverence for this tree. Fl. middle-sized, greenish-white, fragrant, May; fr. Oct. and Nov. The fruit is nutritious, warm, cathartic, delicious, exquisitely fragrant. Its aperient and detergative qualities, and its efficacy in removing habitual costiveness, have been proved by constant experience. (*Roxb. in As. Res.* 2, p. 349.) The bark of the root is sometimes used by the Natives in compound decoctions against intermittent fevers; while the fresh expressed juice of the leaves, diluted, is praised in catarrhs and feverishness—the leaves in a poultice against ophthalmias and a decoction of the immature dried fruit against diarrhoea and dysentery. The mature fruit, mixed with tamarind juice, forms a sort of antifebrile sherbet. (*Trans. Med. and Phys. Soc. Calcutta.* 4, p. 110.) The astringent rind of the fruit is used in dyeing yellow, while the glutinous and tenacious matter which surrounds the seeds is considered an excellent addition to mortar, especially in well-building. (*Royle.*)

CITRUS, L. (*DC. pr.* 1, p. 539;—*W.* and *A. pr.* 1, p. 97.)

1. *decumana*, L. (*DC. l. c.*;—*W.* and *A. l. c.*;—*Roxb. fl. ind.* 3, p. 393;—*J. Grah. Cat. B. pl. p. 25.*—*Risso and Poit. Hist. d'Or.* t. 61.

Fl. small, greenish-yellow, March; fr. Dec. and Jan. *Fruit* used in the same manner as that of No. 1.

POUPARTIA, Commers. (*DC. pr. 2, p. 75.*)

1. *borbonica*, Lam. (*DC. l. c.*) 5 Bourbon. In H. C. G. fl. in March.

* *Spondias purpurea*, L. 5 W. Indies.—*S. lutea*, L. 5 W. Indies.

ORDER LXXX.—RHAMNACEÆ.—Lindl. Nat. Syst. p. 107.

THE BUCKTHORN TRIBE.

Trees and shrubs, simple or climbing, by Lindl. referred to 30 genera. Of species, DC. pr. and Spreng. syst. enumerate 58 for S. America, Mexico and the W. Indies; 22 for New Holland and the South Sea Islands; 16 for Europe; 15 for N. America; 7 for China; 5 for Mauritius; 4 for N. Africa; 3 for the Canaries; 3 for Timor; 2 for Persia; 2 for Senegal; 2 for St. Helena; 1 for Dauria; 1 for Siberia; 1 for the Azores; 1 for Guinea; 1 for Abyssinia; 1 for Tristan d'Acunha, and 1 for the Antarctic Islands. S. Africa possesses 50 species, (*Harvey*); and the E. Indies, according to our materials, 55; viz. 2 of *Palinurus*; 25 of *Zizyphus*; 5 of *Berchemia*; (3 uncertain, DC.) 2 of *Sageretia*; 1 of *Ventilago*; 6 of *Rhamnus*; 1 of *Scutia*; 1 of *Hovenia*; 2 of *Colubrina*; 3 of *Ceanothus*; and 4 of *Gouania*. With Blume's two new genera, *Lepionurus* and *Crypteronia*, and the Javanese species in general we are not acquainted. Of the Indian forms, 23 have been discovered at the foot of the Himalayas and in Nepal; the rest are tropical. Properties under the species,

ZIZYPHUS, Tournef. (*DC. pr. 2, p. 19*;—*W. and A. pr. 1, p. 161.*)

1. *rugosa*, Lam. (*DC. o. c. p. 20*;—*W. and A. o. c. p. 162*;—*J. Grah. Cat. B. pl. p. 39*;—*Wight. icon. 2, t. 339*;—*Z. latifolia*, Roxb. *fl. ind. p. 607*; *ed. Carey. 2, p. 355*;—*DC. l. c.*) 5 Travancore, the Ghants. Khassy Mountains. Assam. Oude. Nepal. Fl. minute, greenish, March; fr. R. S.—*Fruit* eaten by the Natives. (*J. Grah.*)

2. *glabrata*, Heyne. (*W. and A.* pr. 1, p. 162;—*Wight. icon.* 1, t. 282.—*Z. trinervia*, *Roxb. fl. ind.* 1, p. 606; *ed. Carey*, 2, p. 354;—not *Poir.*) 5 Mysore. Fl. small greenish-yellow. In H. C. G. fl. H. S.; fr. Oct. and Nov. (*Roxb.*)
3. *Xylopyrus*, Willd. (*DG. pr.* 1, p. 21;—*W. and A. pr.* 1, p. 162;—*Roxb. fl. ind.* 1, p. 611; *ed. Carey*, 2, p. 360;—*J. Grah. Cat. ORDER LXXXI.—CHAILLETIACEÆ, DC. Lindl. Nat. Syst. p. 108.

Trees or shrubs, referred by Lindl. to 4 genera. Of their species, 3 have been found in Guiana; 2 in Sierra Leona; 2 in Madagascar; 1 in Timor; and 1 in Silhet. To the latter R. Br. in Wall. Cat. adds 2 more, one from Penang, the other from Tavoy. Properties nearly unknown.

Meacurra, Roxb. (*fl. ind.* 2, p. 69.)

1. *gelonioides*, Roxb. (*l. c.*) 5 Silhet. Fl. small, greenish. In H. C. G. fl. April and May; fr. Dec. (*Roxb.*)

* *Chailletia pedunculata*, DC. 5 Cayenne.—*C. timoriensis*, DC. 5 Timor.

—*C. Dichapetalum*, R. Br. 5 Madagascar.—*Tapura guianensis*, Aubl.

5 Guiana.—*Montabea guianensis*, Aubl. 5 Guiana.

ORDER LXXXII.—BURSERACEÆ, Kth. Lindl. Nat. Syst. p. 110.

Trees or shrubs, (excluding Colophonia,) referred by Lindl. to 12 genera. Of their species, 29 inhabit S. America, Mexico and the W. Indies; 3-4 Arabia; 3 Madagascar; 2 S. Africa; 1 Congo; 1 Mauritius; and 1 Timor. In the E. Indies 18-19 forms have been found: 7 of *Canarium*; 4-5 of *Protium*; 3 of *Boswellia*; 2 of *Balsamodendron*; 1 of *Icica*; and 1 of *Garuga*;—nearly all natives of the tropics.

They have all an abundance of fragrant resinous juice, which is, however, destitute of the acridity and staining property of that of Anacardiaceæ.—*Balsam of Acouchi* is produced by *Icica Aracouchini*, Aubl.; *Gum elemi* by *Icica heptaphylla*, Aubl.; *Balm of Gilead* by *Balsamodendron gileadense* Kth.; *Myrrh* by *B. Myrrha*, Ehrenb. and Hempr.; *Opobalsamum* or *Balsam of Mecca*, by *B. Opobalsamum*, Kth.; a substance like *Gum elemi* by *Icica Icicariba*, DC. and Carana,—and a yellow concrete essential oil by *Bursera acuminata*, Willd. (*Lindl.*)

Boswellia, Roxb. (*DC. pr.* 2, p. 76;—*W. and A. pr.* 1, p. 174.)

1. *serrata*, Stackh. (*B. thurifera*, Colebr.;—*Roxb. fl. ind.* 2, p. 333;—*W. and A. l. o.*;—*J. Grah. Cat. B. pl. p. 42.*) शाखाई *Sala*. लबन *Luban*. L. 5 Mountains of Coromandel. S. Concan. Jungles above Rajoor. Hill of Shendoor in the Chichooree Talook, of the Belgaum Collectorate. Bundlekund. Fl. smallish, greenish-white, March and April; fr. C. S.—This tree produces the gum-resin, *Olibanum*, (शुद्ध कून्दुरो) a substance chiefly used as a grateful incense, but which also possesses stimulant, astringent, and diaphoretic properties. (*Ainslie.*)

Canarium, L. (*DC. pr.* 2, p. 79;—*W. and A. pr.* 1, p. 174.)

1. *commune*, L. (*DC. l. c.*;—*W. and A. o. c. p. 175*;—*Kön. in ann. bot.*

1, p. 260. l. 7, f. 2;—*Roxb. fl. ind.* 3, p. 137.—*C. Mehenbethene*,

Gärtn. fr. 2, p. 98. *t.* 102?—*Amyris zeylanica*, *Retz.*—*Balsamodendron zeylanicum*, *Kth.*;—*DC. pr.* 2, p. 76.—*Colophonia mauritiana*, *DC. pr.* 2, p. 79.—*Bursera paniculata*, *Lam.*—*Rumph.* 2, *t.* 47.) L. 5 Moluccas. Ceylon. Mauritius. Peninsula of India. Introduced into H. C. G. in 1798, but had not fl. up to 1814. The resinous juice of this tree has the same properties as the Balsam of Copaiwa. The three-cornered nuts are eaten in Java both raw and dressed, and an oil is expressed from them, which is used at table when fresh, and for burning when stale. The raw nuts are, however, apt to produce diarrhoea. (*Ainslie.*)

2. *strictum*, Roxb. (*Jl. ind.* 3, p. 138;—*W. and A. pr.* 1, p. 175.) 5 Tinevelly. Introduced into H. C. G. in 1808, but had not fl. in 1814. Known in Malabar under the name of the *Black Dammer-tree*, in contradistinction to *Vateria indica*, or white Dammer-tree. It is common in the alpine forests about Courtallum in the Tinevelly district, and is there regularly rented for the sake of its Dammer. This is transparent and of a deep brownish yellow or amber colour, when held between the eye and the light, but when adhering to the tree has a bright shining black appearance. (*Wight.*)
3. *bengalense*, Roxb. (*Jl. ind.* 3, p. 136.) L. 5 Assam. Fl. small. In H. C. G. fl. May and June; fr. Jan. and Feb. (*Roxb.*) From fissures and wounds in the bark, a large quantity of very pure, clear, amber-coloured resin exudes, which soon becomes hard and brittle, and is not unlike *Copal*, yet the natives set little or no value on it. (*Roxb.*)
4. *nigrum*, Roxb. (*Jl. ind.* 3, p. 138.—*Marignia acutifolia*, *DC. pr.* 2, p. 79.—*Dammara nigra*, *Rumph.* 2, p. 160, *t.* 52, 53.) L. 5 Amboyna, and other Molucca Islands. Fl. small. In H. C. G. fl. May. A reddish, soft, viscid, heavy-smelling substance exudes from wounds in the bark. (*Rumph.*)
5. *sylvestre*, Gärtn. (*fr.* p. 99, *t.* 102;—*DC. pr.* 2, p. 79;—*Roxb. Jl. ind.* 3, p. 137.—*C. sylvestre alterum*, *Rumph.* 2, p. 155, *t.* 49.—*C. Pimela*, *Kön.*;—*Ann. bot.* 1, p. 361, *t.* 7, *f.* 1;—*DC. pr.* 2, p. 80.—*Pimela nigra*, *Lour.*) 5 Amboyna. Cochin China, China. Introduced into H. C. G. in 1798, but had not fl. up to 1814.

Icica, Auhl. (*DC. pr.* 2, p. 77;—*W. and A. pr.* 1, p. 177.)

1. *bengalensis*, (L. *indica*, *W. and A. l. c.*—*Bursera serrata*, *Wall.*;—*Colebr. in Linn. soc. trans.* 15, p. 362, *t.* 4.—*Schinus bengalensis*, *Saharia* and *Niara*, *Hb. Buch.*) L. 5 Chittagong, Assam. Fl. very small, green, March and April.—*Timber* close-grained, hard, as tough, but heavier than oak, used for furniture by the Natives.

BALSAMODENDRON, Kth. (*DC. pr.* 2, p. 76;—*Wight ill.* 1, p. 185.)

1. *Berryanum*, (B. *Berryi*, *Arn.*;—*Wight ill. l. c.*—*Protium gileadense*, *W. and A. pr.* 1, p. 177, excl. syn. Kth., DC. and Vahl.—*Amyris gileadensis*, *Roxb. Jl. ind.* 2, p. 246, excl. syn. Willd. and “*Arabia.*”) 5 Peninsula of India, where it is constantly used for making fences.

(Wight.) Was introduced, by Dr. Berry, into H. C. G. in 1798, but had not fl. up to 1814.

2. *Roxburghianum*, Wall. (Protium Roxburghianum, *W.* and *A.* pr. 1, p. 176.—*Amyris acuminata*, *Roxb.* fl. ind. 2, p. 246;—not Poir.) 5 Moluccas. Fl. small, yellowish, May; fr. 0.—The bark and all the tender parts, on being bruised or wounded, discharge a small quantity of pale whey-coloured liquid, which possesses a fragrance somewhat like that of an orange leaf. (*Roxb.*)

3. *Agallocha*, W. and A. (pr. 1, p. 96, annot.—*B. Roxburghii*, *Arn.*;—*Wight ill.* 1, p. 185.—*Amyris Agallocha*, *Roxb.* H. B. p. 28.—*A Commiphora*, *Roxb.* fl. ind. 2, p. 244, excl. syn. *Jacq.*) 魔爾草 *Googkul*. 5 Assam, Garrow-Hills. Fl. small, reddish, Feb. and March; fr. 0. Produces the *Gum Bdelium* of commerce, and perhaps of *Dioscorides*, (*Royle*.) The whole plant, whilst growing, is considerably odiferous, particularly when any part is broken or bruised, and diffuses to a considerable distance around a grateful fragrance, like that of the finest myrrh. (*Roxb.*)

MARIGNIA, Commers. (DC. pr. 2, p. 79.)

1. *obtusifolia*, DC. (*l. c.*—*Bursera obtusifolia*, Lam.—*Dammara graveolens*, Gärtn. fr. 2, p. 100. t. 103. f. 11, excl. syn. Rumph.) 5 Mauritius, where it is called *Colophane bastard*.—Fl. small, whitish, May; fr. 0.

SORINDEIA, Pet. Th. (*DC.* pr. 2, p. 80;—*W. and A.* pr. 1, p. 170.)

1. *madagascariensis*, (DC. l. c.;—W. and A. l. c.) *Mangifera pinnata*, Lam. ;—not L.) 5 Madagascar, where the French call it *Manguier à grappes*.—Fl. small, greenish, Feb; fr. May 1836.
 2. ? *attenuata*, Wall. 5 Penang.—March 1835.

GARUGA, Roxb. (*DC.* pr. 2, p. 80;—*W.* and *A.* pr. 1, p. 175.)

1. *pinnata*, Roxb. (*Corom.* 3, t. 208; — *fl. ind.* 2, p. 400; — *DC. o. c. p.* 81; — *W. and A. I. c.*; — *J. Grah. Cat. B.* pl. p. 43; — *Rheed* 4, t. 33.)
जूम L. 5 Coromandel. The Ghauts. The hilly parts of the
Concan. Bengal, (Serampore,) Assam. Deyra Dhoon, Kyarda. Flow-
ers smallish, cream-coloured, March; fr. C. S.—Fruit eaten by the
Natives raw or pickled.

* *Boswellia glabra*, Roxb. Corom. 3, t. 207. 5 Mountains of Coromandel, Deccan.—*Bursera gummosa*, Jacq. 5 W. Indies.—*B. acuminata*, Willd. 5 St. Domingo.—*Protium caudatum*, W. and A. 5 Peninsula of India.—*P. pubescens*, W. and A. 5 Peninsula of India.—*P. javanicum*, Burm. Rumph. 7, t. 23. 5 Java.—*Icica Aracouchini*. 5 Guiana.—*I. guianensis*, Aubl. 5 Cayenne. *I. heptaphylla*, Aubl. 5 Guiana.—*I. Icicariba*, DC. 5 Brazil.—*Balsamodendron Wightii*, Arn. 5 Peninsula of India.—*B. gileadense*, Kth. 5 Arabia.—Was, in 1837, introduced into the Bombay Hort. Soc. Gardens from Mecca.—*Hedwigia balsamifera*, Swz. 5 Hayti.

ORDER LXXXIII.—EUPHORBIACEÆ, Ad. Juss.—Lindl. Nat.
Syst. p. 112.

THE EUPHORBIUM TRIBE.

As we have but extremely insufficient materials regarding this large family, we shall abridge from Lindley's remarks (*t. o.*) as much as will suit our purpose. "Trees, shrubs, or herbaceous plants, often abounding in acrid milk. The order, which probably does not contain fewer than 1500 species, exists in the greatest abundance in equinoctial America, where about 3-8ths of the whole number have been found, sometimes in the form of large trees, frequently of bushes, still more usually of diminutive weeds, and occasionally of deformed, leafless, succulent plants, resembling Cactaceæ in their port, but differing from them in every other particular. In the Western world they gradually diminish, as they recede from the equator, so that not above 50 species are known in N. America, of which a very small number reaches as far as Canada.—There are about 120 species from Europe, including the basin of the Mediterranean; of these 16 only are found in Great Britain, and 7 in Sweden." (Lindl.) S. Africa contains 100 species, (Harvey.) Of Indian, Roxb. in his *fl. ind.* describes 112. What may be the amount of Blume's Javanese Euphorbiaceæ, we cannot ascertain, his works being inaccessible to us. That their number however, must be considerable, we conclude from his 21 new genera, enumerated by Lindl. Our ignorance is still more increased by the Catalogues of Heyn's, Klein's, Rottler's, Buchanan's, Finlayson's, Wallich's, Wight's, and Royle's discoveries in this order being unpublished.

"The general property of this order is that of exciting, varying greatly in degree, and consequently in effect. This principle resides chiefly in the milky secretion of the order, and is most powerful in proportion as the secretion is abundant. The smell and taste of a few are aromatic; but in the greater part the former is strong and nauseous, the latter acrid and pungent. The hairs of some species are stinging. Some of them are emetic, others cathartic—many of them are also dangerous, even in small doses, and so fatal in some cases, that no practitioner would dare to prescribe them; as for example, Manchineel. In fact, there is a gradual and insensible transition, in this order, from mere stimulants to the most dangerous poisons. Whatever the stimulating principle of Euphorbiaceæ may be, it seems to be of a very volatile nature, because application of heat is sufficient to dissipate it. Thus the root of *Jatropha Manihot* or *Cassava* which, when raw, is one of the most violent of poisons, becomes a wholesome nutritious article of food when roasted. In the seeds, the albumen is harmless and eatable, but the embryo itself is acrid and dangerous. Independently of this volatile principle, there are two others belonging to the order, which require to be noticed; the first of these is Caoutchouc, that most innocuous of all substances, produced by the most poisonous of all families,

SL

which may be almost said to have given a new arm to surgery, and which has become an indispensable article of life; it exists in Artocarpeæ and elsewhere, but is chiefly the produce of species of Euphorbiaceæ. The other is the preparation called Turnsol, which, although chiefly obtained from Crozophora (Croton) tinctoria, is to be produced equally abundantly from many other plants of the order." (Lindl.)

A. BUXEÆ, Bartl.

SARCOCOCCA, Lindl. (*B. Reg.* 12, t. 1012.)

1. *pruniformis*, Lindl. (*l. c.*) *Nepal Bastard-Plum*. 5 Nepal. Fl. small, greenish-yellow, C. S.; fr. 0.
 - a. *latifolia*. (*Pachysandria* ? *coriacea*, *Hook. exot. fl. t.* 148.)
 - b. *angustifolia*. (? *Buxus saligna*, *Don. pr. fl. nep.* p. 63;—*Spreng. syst. 3*, p. 847.)

BUXUS, L. (*Spreng. syst. 3*, p. 760, No. 3103.)

1. *chinensis*, Lk. (*Spreng. syst. p.* 847.) *China Box Tree*. 5 China. Fl. small, yellowish-green. Has been introduced into H. C. G. Fl.?
2. *balearica*, Lam. (*Spreng. l. c.*) *Balearic Box Tree*. 5 Minorca. Fl. small, yellowish-green. Introduced in 1841. Has not fl.
3. *sempervirens*, L. (*Spreng. syst. l. c.*) 5 South Europe, North Persia. In H. C. G.

In some parts of Persia where Box Trees abound, the Camel cannot be employed, because it is found impracticable to prevent that animal from browsing upon the leaves, which invariably prove poisonous to it. (Lindl.)

SECURINEGA, Juss. (*Spr. syst. 1, No.* 1112.)

1. *borbonica*, Rich. Bourbon.

FLUGGEA, Willd. (*Spreng. syst. 1, p.* 523. No. 939.)

1. *Leucopyrus*, Willd. (*Spreng. syst. 1, p.* 825.—*Phyllanthus Leucopyrus*, Kön.;—*Roxb. fl. ind. 3, p.* 658.) L. 5 Coromandel. Fl. small, greenish; and fr. R. S.
2. *retusa*, Roxb. (*Phyllanthus retusus*, *Roxb. fl. ind. 3, p.* 657.) L. 5 Bengal, (Serampore,) extending northwards to the banks of the Jumna. Fl. small, greenish; and fr. whole year.
3. *viresa*, Roxb. (*Phyllanthus virosus*, *Roxb. fl. ind. 3, p.* 659;—*Spreng. syst. 3, p.* 22.) L. 5 Circars, Banks of the Jumna. Fl. small, greenish. In H. C. G. fl. H. and R. S.; fr. R. S. (*Roxb.*) The bark is a strong astringent, and possesses, when thrown into the water, the power of intoxicating fish, whereby they are easily taken. (*Roxb.*)

B. PHYLLANTHEÆ, Bartl.

GLOCHIDION, Forst. (*Juss. gen. pl.* p. 442. *Bradleia*, Gürtn.; *Lindl. nat. Syst.* p. 116.)

1. *multiloculare*, (*Bradleia multilocularis*, *Roxb. fl. ind. 3, p.* 696;—*Spreng. syst. 3, p.* 19.) 5 Bengal, (Serampore.) Fl. small, greenish cream-coloured, H. and R. S.; fr. C. S.

2. *lanceolarium*, (Bradleia lanceolaria, Roxb. fl. ind. 3, p. 697.) L. 5 Assam. Fl. small, greenish cream-coloured, March and April; fr. R. S.—A useful timber-tree. (Roxb.)
3. *nitidum*, (Bradleia nitida, Roxb. fl. ind. 3, p. 699.) 5 Circars. Fl. small, greenish cream-coloured, C. S.; fr. H. S.
4. *sinicum*, (Bradleia sinica, Gürtn. fr. 2, p. 127, t. 109, f. 1;—Spreng. syst. 3, p. 19;—Roxb. fl. ind. 3, p. 700;—J. Grah. Cat. B. pl. p. 184, under Bridelia.) 5 Penang. Kandalla. Along the Ghauts. Fl. small, white. In H. C. G. Fl.?
5. *hirsutum*, (Bradleia hirsuta, Roxb. fl. ind. 3, p. 699.) 5 Penang. Introduced into H. C. G. Fl.?
- ? 6. *pinnatum*, (Bradleia pinnata, Roxb. fl. ind. 3, p. 700.—Phyllanthus obscurus, Roxb. Willd.;—Spreng. syst. 3, p. 22.) 5 Penang. Fl. small, yellow, nearly the whole year.

CICCA, L. (Spreng. syst. 1, p. 375, No. 569.)

1. *disticha*, L. (Spreng. syst. 1, p. 500;—Lam. ill. t. 757, f. 1;—J. Grah. Cat. B. pl. p. 180.—Phyllanthus longifolius, Jacq. Schönb. 2, p. 36, t. 1, 194;—Roxb. fl. ind. 3, p. 672.—Averrhoa acida, L.;—Rheed. 3, t. 47-48.—Rumph. auct. p. 33, t. 17, f. 2.) चराणी Nubaree. चड़ी Nuree. 5 Native place uncertain. Commonly cultivated in gardens. Fl. small, reddish, H. S.; fr. R. and C. S. Leaves sudorific. Fruit succulent, sub-acid, cooling, wholesome, eaten raw, or made into pickles and preserves.—Seeds cathartic.

EMBLICA, Gärtn. (Spreng. syst. 3, p. 4, No. 2343.)

1. *officinalis*, Gärtn. (fr. 2, p. 122, t. 108, f. 2;—Spreng. syst. 3, p. 20.—Phyllanthus Emblica, L.;—Roxb. fl. ind. 3, p. 671;—J. Grah. Cat. B. pl. p. 180;—Rheed. 1, t. 38;—Rumph. auct. p. 1, t. 1.) आमा Amla. L. 5 Moluccas. Coromandel. Concans, Deccan. South Mahratta country. Bengal, extending northwards to the Banks of the Jumna. Cultivated in gardens. Fl. minute, greenish-yellow, H. and R. S.; fr. C. S. Wood hard and durable, particularly under water. Bark very astringent, used by the Natives for tanning.—Fruit succulent, sharp, unpalatable, unless pickled or preserved with sugar. (Roxb.)

PHYLLANTHUS, L. (Spreng. syst. 3, p. 4. No. 2344.)

1. *maderaspatensis*, L. (Spreng. syst. 3, p. 21;—Roxb. fl. ind. 3, p. 654;—J. Grah. Cat. B. pl. p. 180.) ◎ Peninsula of India, Bengal, (Serampore.) Fl. small, greenish; and fr. the whole year. Taste herbaceous, somewhat astringent. Cattle eat it. (Roxb.)
2. *simplex*, Retz. (Spreng. syst. 3, p. 23;—Roxb. fl. ind. 3, p. 654.) ◎ Coromandel, Bengal, (Serampore.) Fl. small, greenish, R. S; fr. C. S.—Fresh leaves, bruised and mixed with butter-milk, used by the Natives to cure the itch in children. (Roxb.)
3. *fasciculatus*, Poir. (p. 304.—Phyllanthus Kirganelia, Willd.;—Roxb. fl. ind. 3, p. 668.—Kirganelia virginica, Pers. syn. 2, p. 591.—

- Kirganelia, Juss.) ५ Mauritius, where it is called *Bois de Demoiselle*. Fl. small, reddish, the whole year; fr. O. or rare.
4. *reticulatus*, Poir. (*Ph. Vitis Idea*, Kön.;—*Roxb. fl. ind.* 3, p. 665;—*J. Grah. Cat. B. pl. p.* 180;—*Rheed. 5 t. 44.*) हमकाटूलि *Hamkato-jooli*. L. ५ Coromandel. Concans. Bengal, (Serampore.) Fl. small, greenish; and fr. the whole year. Wood white and durable, employed by the Hill people for various economical purposes. Cattle eat the leaves. Frequently employed for ornamental hedges. (*Roxb.*)
5. *obcordatus*, Roxb. (*fl. ind.* 3, p. 656.) ५ Bengal, (Serampore.) Fl. small, greenish; and fr. the whole year.
6. *Niruri*, L. (*Spreng. syst.* 3, p. 23;—*Roxb. fl. ind.* 3, p. 659;—*J. Grah. Cat. B. pl. p.* 180.—*Urinaria indica*, *Burm. zeyl.* t. 93;—*Rheed. 10, t. 15.*) शादहाजरमनि *Sada-hajur-muni*. Peninsula of India, Bengal, (Serampore.) Fl. minute, greenish; and fr. the whole year. Leaves deobstruent, diuretic, healing. Fresh root a good remedy in jaundice. Half an ounce, rubbed up in a cup of milk, and given every morning and evening, will complete the cure in a few days, without any sensible operation of the medicine. (*Roxb.*)
7. *Urinaria*, L. (*Spreng. syst.* 3, p. 23;—*Lam. ill. t.* 756, *f. 2*;—*Roxb. fl. ind.* 3, p. 660;—*J. Grah. Cat. B. pl. p.* 180;—*Rheed. 10, t. 16.*;—*Rumph. 6. t. 17, f. 2.*) हाजरमनि *Hajur-muni*. ◎ Peninsula of India. Bengal, (Serampore.) Moluccas.—Fl. minute, greenish; and fr. the whole year.—Plant powerfully diuretic.
8. *bacciformis*, L. (*Roxb. fl. ind.* 3, p. 661;—*Pers. syn.* 2, p. 690.—*Agyneia phyllanthoides*, *Spreng. syst.* 3, p. 19.) σ' Coromandel. Fl. small, greenish; and fr. the whole year.

Burm. ind. t. 63, f. 2;—*Rheed.* 2, t. 32;—*Rumph.* 4, t. 41.) डेवूळी
Bherunda. Palma Christi. Castor-oil plant. 5 Greece, N. Africa, India.
Much cultivated. Seeds used by dyers to mix with colours and ren-
der them permanent. (*J. Grah.*) The oil often used in lamps, especial-
ly by the Natives. Leaves a favourite food of some silk worms.

2. *dicoccus*, Roxb. (*fl. ind.* 3, p. 690;—*Rumph.* 4, t. 64.) 5 Amboyna.
Fl. small, greenish-yellow, H. S.; fr. R. S.

3. *Mappa*, L. (*Roxb. fl. ind.* 3, p. 690.—*Mappa moluccana*, *Spreng. syst.*
3, p. 878.—*Acalypha Mappa*, *Willd.*;—*Rumph.* 3, t. 108.) 5 Moluccas.
Fl. small, greenish, R. and C. S.; fr. 0.

JANIPHA, Kth. (*Spreng. syst.* 3, p. 8, No. 2404.)

1. *Yuquilla*, Kth. (var. *J. Lofingii*, Kth.;—*Spreng. syst.* 3, p. 77.) 5 S.
America. Introduced in 1841.

2. *Manihot*, Kth. (*Spreng. syst.* 3, p. 77;—*B. M.* 58, t. 3071.—*Jatro-*
pha Manihot, L.;—*Roxb. H. B.* p. 69;—*J. Grah. Cat. B. pl. p. 183.)
Tapioca. Manioc, or *Cassava. Plant.* Fl. smallish, reddish. Has never fl.
here, nor had it done so in H. C. G. in 1814, though introduced
in 1794.—S. America.—The roots yield a flour (Cassava) of immense
importance in S. America. This is obtained by crushing them, after
the bark has been removed, and then straining off the water; after
which the mass is gradually dried in pans over a fire. *Tapioca* is a
preparation from the same root. (*Lindl.*)*

JATROPHA, L. (*Spreng. syst.* 3, p. 8, No. 2403.)

1. *panduræfolia*, Andr. (*Spreng. syst.* 3, p. 76;—*B. M.* 17, t. 604.) 5
Cuba. Fl. largish, scarlet; and fr. the whole year.

2. *Curcas*, L. (*Spreng. syst.* 3, p. 77;—*Roxb. fl. ind.* 3, p. 686;—*J. Grah.*
Cat. B. pl. p. 183.—*Castiglionia lobata*, *Ruiz. and Pav.*) बाघभरंगा
Bagh-bharanda. 5 Cuba, S. America. Domesticated in India. Fl.
small, green; and fr. the whole year. Seeds purgative and occasion-
ally emetic. An expressed oil is obtained from them, which is reckoned
a valuable external application in itch and herpes; it is also used, a

little diluted, in chronic rheumatism. The varnish used by the Chinese for covering boxes is made by boiling this oil with oxide of iron. The leaves are considered rubefacient and diuretic. The milky-juice is supposed to be detergent and healing, and dyes linen black. (Ainslie.)

3. *multifida*, L. (Spreng. syst. 3, p. 77;—Roxb. H. B. p. 69;—J. Grah. Cat. B. pl. p. 183;—Salish. lond. t. 91.) Coral-plant. 5 S. America. Fl. small, red; and fr. the whole year.
4. *glandulifera*, Roxb. (fl. ind. 3, p. 688.—*J. glauca*, Vahl.?) 5 India; locality uncertain. Fl. small, greenish-yellow; and fr. the whole year. Exudes a pale thin juice, which the Hindoos employ for removing films from the eyes. (Roxb.)
5. *carnosa*, Wall. 5 Bengal. H. C. G.

MACARANGA, Pet. Th.?

1. *Roxburghii*, Wall. (*Osyris peltata*, Roxb. 3, p. 755.) 5 Circars. All the young parts of this plant are covered more or less with soft resinous adhesive matter, smelling strongly of turpentine.

ELACOCOCA, Commers. (Elaeococcus, Spreng. syst. 3, p. 763, No. 3140.)

1. *Vernicia*, Ad. Juss. (Spreng. syst. 3, p. 884.—*Vernicia montana*, Lour.—*Dryandra Vernicia*, Corr.) 5 China, Cochin-China. Assam. Fl. largish, white, R. S. This and the next species are the Varnish-trees of the Chinese.
2. *verrucosa*, Ad. Juss. (Spreng. syst. 3, p. 884.—*Dryandra cordata*. Thunb. jap. p. 267, t. 27.—*D. oleifera*, Lam.;—Banks icon., Kämpf. t. 23.) 5 Japan. In H. C. G.? Fl.?

ORDER LXXXIV.—EMPETRACEÆ, Lind. Nat. Syst. p. 117.

THE CROWBERRY TRIBE.

Small shrubs, of 3 genera, and 4 species; 2 from S. Europe; 1 from N. America; and from the Straits of Magellan.—Properties unknown.

* *Corema album*, D. Don. 5 Portugal.

ORDER LXXXV.—FOUQUIERACEÆ, DC.—Lindl. Nat. Syst. p. 118.

Trees or shrubs, of 2 Mexican genera, each with 1 species.—Properties unknown.

* *Fouquiera formosa*, H. B. and Kth. 5 Mexico.

ORDER LXXXVI.—CELASTRACEÆ, Lindl. Nat. Syst. p. 119.

Trees or shrubs, sometimes climbing, referred by Lindl. (adding *Lophopetalum*) to 26 genera. Of species, DC. pr. and Spreng. syst. enumerate 22 from S. America, Mexico and the W. Indies; 9 from N. America; 5 from Japan; 5 from Madagascar and Mauritius; 3 from Europe; 2 from N. Africa; 2 from the Canaries; 2 from Arabia; 2 from New Holland and the South Sea Islands; 1 from China; 1 from Caucasus; and 1 from Senegal. To these Wall. Cat. adds 1 for China, and 1 for Mauritius. S. Africa exhibits 60 forms, (*Harvey.*) and the E. Indies, according to our materials, 80. Of these, 28 belong to *Euonymus*; 3 to *Lophopetalum*; 33 to *Celastrus*; 3-4 to *Elaeodendron*; 2 to *Pleurostylia*; — to *Actegeton*; 4 to *Kurrimia*; 4 to *Microtropis*; and 1 to *Tralliana*. Twenty-two inhabit the Himalayas; 12 the Khassa and Morung Mountains; 4 the Neelgherries; and the rest Ceylon, Malabar, Mysore, Travancore, Singapore, Penang, Prome, Tavoy, &c. Properties unimportant.

EUONYMUS, L. (DC. pr. 2, p. 3;—W. and A. pr. 1, p. 160.) Spindle-Tree.

1. *Hamiltonianus*, Wall. (Cat.—E. atropurpurens, Roxb. fl. ind. 1, p. 627; ed. Carey, 2, p. 402;—not Jacq.) 5 Deyrah Dhoon. Fl. small, greenish-white, March and April; fr. 0.
2. *glaber*, Roxb. (fl. ind. 1, p. 628; ed. Carey, 2, p. 403.) 5 Chittagong. Fl. small, greenish-white, May; fr. 0.
3. *grossus*, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 408.) 5 Nepal. Fl. small, greenish, June; fr. 0.
4. *echinatus*, Wall. (Roxb. fl. ind.; ed. Carey, 2, p. 410;—B. M. 54, t. 2767;—Royle ill. t. 21.) 5—Nepal. 5-7000 ft. alt. Fl. small, green. In H. C. G. Fl.?

5. *bullatus*, Wall. (*Cat.*) Khassy Mountains. In H. C. G. Fl. ?
? 6. *grandiflorus*, Wall. (*Roxb. fl. ind.*; *ed. Carey*, 2, p. 404;—*pl. as. rar.*

SUB-ORDER.—HIPPOCRATEÆ, Lindl. Nat. Syst. p. 120.

Arborescent or climbing shrubs, referred to 6 genera. Of their species, DC. pr. and Spreng. syst. assign 31 to S. America, Mexico and the W.

Indies; 3 to Guinea; 1 to Senegal; 2 to Madagascar; 2 to Timor; and 1 to China. The E. Indian forms amount to 27; 8 of *Hippocratea*; and 19 of *Salacia*. Eight of these inhabit Nepal, Assam, the Khassya, Morung, and Monghir Hills; the rest are found in Java, Cochin-China, Penang, Singapore, Tavoy, Ceylon and Malabar.

" The fruit of *Salacia* (*Tonsella*) pyriformis, a native of Sierra Leona, is eatable. It is about the size of a Bergamot Pear; its flavour is rich and sweet. (*Hort. trans.*) The nuts of *Hippocratea comosa* are oily and sweet. *Swartz.* (*Lindl.*)

SUB-ORDER.—ERYTHROXYLÆ, Kth.—Lindl. *Nat. Syst.* *p.* 122.

Shrubs or trees, of 1 genus, and 31 species: 19 natives of S. America, Mexico and the W. Indies; 6 of Madagascar, Bourbon, and Mauritius; and 6 of the E. Indies. Of the latter, 1 has been found in Ceylon, 1 on the Khassa Mountains; and the rest in Courtallum.

"Erythroxylon Coca is a plant much used by the miners of Peru for its remarkable power in stimulating the nervous system, in which respect it much resembles opium. Its leaves are chewed with a small mixture of finely powdered chalk. No effects that have been ascribed to the immoderate use of opium are exceeded by what seems the consequence of chewing the Coca-leaf." (Lindl.)

ORDER LXXXIX.—PORTULACACEÆ, Lindl. Syst. 1, p. 123.

THE PURSLANE TRIBE.

Succulent herbs, sometimes shrubs or under-shrubs, referred by Lindl. to 11 genera. Of the species according to DC. pr., Spreng syst., B. M. and B. Reg. 43 are from S. America, Mexico and the W. Indies; 8 from N. America; 4 from Arabia; 4 from Siberia; 2 from Europe; 1 from Guinea; 1 from the Society Islands; and 1 from St. George's Island. Twenty species inhabit S. Africa, (*Harvey*.) and 13 the E. Indies. Of the latter, 7 belong to *Portulaca*; 5 to *Trianthema*; and 1 to *Talinum*;—3, however, are common to other parts of the world. They are all found in the Peninsula of India, Java, and Bengal, with the exception of 2, discovered at Monghir and Delhi. *Talinum Strictum*, *Wall. Cat.* is perhaps not different from *T. cuneifolium*, *Willd.*

Properties of no importance. The use of the common Purslane is well known. *Portulacaria afra*, *Jacq.* is greedily eaten by the Elephants in S. Africa.

TRIANTHEMA, L. (*DC. pr. 3, p. 351*;—*W. and A. pr. 1, p. 354*;—*Wight ill. 2, p. 43.*)

America.

ORDER XC.—SILENACEÆ, Lindl. Nat. Syst. p. 124.

THE DIANTHUS TRIBE.

Herbs, sometimes undershrubs, referred by Lindl. to 12 genera. According to DC. pr. Spreng. syst., B. M. and B. Reg. about 200 species are natives of Europe; 32 of the Levant; 32 of Tauria and Caucasus; 20 of N. Africa; 14 of Siberia; 12 of N. America; 5 of China and Japan; 5 of Mexico; 4 of Tartary; 2 of Persia; 2 of Arabia; 2 of Altai; 1 of the Canaries; and 1 of the Straits of Magellan. Thirty species (including some Cerastia) have been found in S. Africa, (*Harvey.*) and 23 in the E. Indies. Of the latter, 1 belongs to *Dianthus*; 1 to *Gypsophila*; 1 to *Acosmia*; 1 to *Cucubalus*; 9 to *Silene*; and 10 to *Lychnis*; but of these, 7 are common to other parts of the world. With the exception of *Gypsophila Vaccaria*, *Sm.*,

also growing in the plains, they are all natives of the Himalayas, Kunawur, and Cashmere.—Properties unimportant.

DIANTHUS, L. (*DC. pr. 1, p. 355.*) *Pink.*

1. *prolifer*, L. (*DC. l. c.;—E. B. 14, t. 956.*) ⊖ Europe. Fl. small, purplish, Feb. and March; fr. April and May.

3. *barbatus*, L. (*DC. pr. 1, p. 355;—B. M. 6, t. 205. β.*) *Sweet William.* ♀. France, Germany. Fl. pink, middle sized, Feb. and H. S.
4. *Carthusianorum*, L. (*DC. pr. 1, p. 356;—β. B. M. 43, t. 1775.*) ♀. Europe. Fl. middle-sized, red, C. S.; but rarely.
5. *chinensis*, L. (*DC. pr. 1, p. 359;—Roxb. fl. ind. 2, p. 446;—J. Grah. Cat. B. pl. p. 245;—B. M. 1, t. 25.*) ⊖ ♂. China. Fl. middle-sized, deep red, Feb. and H. S.; fr. May.
6. *pratensis*, Bieb. (*DC. pr. 1, p. 358.*) ⊖ (here) Crimea. Fl. middle-sized, yellowish-white; and fr. H. S.
7. *Caryophyllus*, L. (*DC. pr. 1, p. 359;—E. B. 3, t. 214.*) *Clove Pink. Carnation.* ♀. S. France, England. Fl. smallish, rose-coloured, fragrant; and fr. January—May.
8. *plenus*; (*Roxb. fl. ind. 2, p. 446;—J. Grah. Cat. B. pl. p. 245.*) *Double Carnation.* Fl. large, deep rose, fragrant, C. and H. S.
9. *hyssopifolius*, Hortul. ♀. S. Europe. Fl. small, pink, C. and H. S.
10. *petraeus*, Waldst. and Kit. (*DC. pr. 1, p. 362;—β. B. M. 30, t. 1204.*) ♀. Hungary. Fl. largish, white, Jan., Feb. and March.

GYPSOPHILA, L. (*DC. pr. 1, p. 351;—W. and A. pr. 1, p. 42.*)

1. *viscosa*, Murr. (*DC. o. c. p. 352.*) ⊖ Levant. Fl. small, white, March; fr. April.
2. *repens*, L. (*DC. pr. 1, p. 353;—B. M. 35, t. 1448.*) ♀. Road-sides of the Alps and Pyrenees. Fl. small, white, with a faint tinge of rose, C. S.; fr. H. S.
3. *muralis*, L. (*DC. pr. 1, p. 354;—fl. dan. t. 1268.*) ⊖ Denmark. Germany. France. Switzerland. Crimea. Fl. small, pale rose-coloured, Feb.; fr. March.
4. *Vaccaria*, Sm. (*W. and A. pr. 1, p. 42.*—*Saponaria Vaccaria*, L.;—*DC. pr. 1, p. 365;—B. M. 49, t. 2290.*)—*S. perfoliata*, *Roxb. fl. ind. 2, p. 445;—DC. l. c.*) ⊖ Europe. Bengal. Fl. largish, rose-coloured, C. S.; fr. R. S.

SAPONARIA, L. (*DC. pr. 1, p. 365.*) *Soap-wort.*

1. *officinalis*, L. (*DC. l. c.;—E. B. 15, t. 1060.*) ♀. Road-sides of Europe. Fl. largish, sweet-scented, pale rose-coloured, Jan., Feb. and March; fr. O.

CUCUBALUS, L. (DC. pr. 1, p. 367.)

1. *bacciferus*, L. (DC. l. c.;—E. B. 22, t. 1577.) ♀. Shady places of Europe. Himalayahs on Jumbo. (Royle.) Fl. middle-sized, greenish-white, C. S.; but rarely.

SILENE, L. (DC. pr. 1, p. 367;—W. and A. pr. 1, p. 42.) *Catchfly*.

The annuals among the following species have either small or middle-sized flowers, and these have appeared in February and March, some of them having been succeeded by ripe seeds.

1. *inflata*, Sm. (DC. pr. 1, p. 368.)—Cucubalus Behen, L.;—E. B. 3, t. 164.) ♀. Europe. Nepal, Kemaon, Choor, Mussooree. Fl. largish, purple greenish-white, C. S.
2. *oblongifolia*, Ott. (DC. pr. 1, p. 369.) ♂ Native place unknown. Fl. white.
3. *apetala*, Willd. (DC. pr. 1, p. 369.) ♂ Spain. Fl. greenish.
4. *viscosa*, Pers. (DC. pr. 1, p. 370.—Cucubalus viscosus, L.; fl. dan. t. 1209.) ♂ Denmark, Sweden. Italy. Levant. Kunawur. (Royle.) Fl. white, C. S.
5. *conica*, L. (DC. pr. 1, p. 371;—E. B. 13, t. 922.) ♂ England. coloured, France. Spain. Levant. Fl. rose-sweet-scented.
6. *anglica*, L. (DC. pr. 1, p. 371;—E. B. 17, t. 1178.) ♂ England, France, &c. Fl. white.
7. *lusitanica*, L. (DC. pr. 1, p. 371.) ♂ Portugal. Fl. pale rose-coloured.
8. *gallica*, L. (DC. pr. 1, p. 371.) ♂ France. Fl. pale, rose-coloured.
9. *quinquevulnera*, L. (DC. pr. 1, p. 372;—E. B. 2, t. 86.) ♂ England. France. Spain, &c. Fl. white, with five deep red spots.
10. *nocturna*, L. (DC. pr. 1, p. 372.) ♂ France. Spain, &c. Fl. brownish.
11. *vespertina*, Retz. (DC. pr. 1, p. 374;—B. M. 18, t. 677.) ♂ Portugal. N. Africa. Fl. deep rose-coloured.
12. *colorata*, Schousb. (DC. pr. 1, p. 374.) ♂ Morocco. Island of Scio. Fl. deep rose-coloured.
13. *obtusifolia*, Willd. (DC. pr. 1, p. 374.) ♂ Native place uncertain. Fl. deep rose-coloured.
14. *pendula*, L. (DC. pr. 1, p. 375;—B. M. 4, t. 114.) ♂ Sicily. Candia. Fl. deep rose-coloured.
15. *inaperta*, L. (DC. pr. 1, p. 376.) ♂ S. Europe. Fl. brownish.
16. *linifolia*, Willd. (DC. pr. 1, p. 376.) ♂ Native place unknown. Fl. greenish yellow.
17. *antirrhina*, L. (DC. pr. 1, p. 376;—Roxb. H. B. p. 34.) ♂ Virginia. Fl. white.
18. *cretica*, L. (DC. pr. 1, p. 376.) ♂ Candia. Fl. greenish white.
19. *stricta*, L. (DC. pr. 1, p. 379.) ♂ Spain. Fl. purplish,
20. *noctiflora*, L. (DC. pr. 1, p. 379;—E. B. 5, t. 291.) ♂ Denmark, Sweden. England. Fl. cream-coloured, tinged with red.

21. *bupleuroides*, L. (DC. pr. 1, p. 382.) ♂ (here) Persia. Fl. whitish purple.

22. *Armeria*, L. (DC. pr. 1, p. 383;—E. B. 20, t. 1398.) ♂ Denmark. Germany. France. Fl. purplish.

LYCHNIS, L. (DC. pr. 1, p. 385.)

1. *Viscaria*, L. (DC. l. c.;—E. B. 11, t. 788.) ♀ Europe. Fl. largish, purplish deep-rose, Feb. and March; fr. April and May.

2. *Coeli rosa*, Desrousse, (DC. pr. 1, p. 386.—*Agrostemma Coeli rosa*, L.; B. M. 9, t. 295.) ♂ Sicily. Barbary. Levant. Fl. large deep rose-coloured, Feb. and March.

3. *dioeca*, L. (DC. pr. p. 386;—E. B. 22, t. 1580.) ♂ Road sides of Europe. Fl. large, white, Feb. and March.

4. *indica*, Benth. (Royle, ill. p. 18.—*Silene indica*, Roxb. fl. ind. 2, p. 446.) ♂ Nepal. In H. C. G. fl. H. S.; fr. R. S. (Roxb.)

AGROSTEMMA, L. (*Githago*, DC. pr. 1, p. 387.)

1. *Githago*, L. (E. B. 11, t. 741.—*Lychnus Githago*, Lam.; DC. l. c.) *Corn Cockle*. ♂ Europe. Fl. large, purplish, Feb. and March; fr. April and May.

* *Dianthus Arbuscula*, Lindl; B. Reg. 13, t. 1086. ♂ China.—*D. longicaulis*, Ten. 2. Italy.—*D. caryophylloides*, L.—Varieties of double Carnation.—*Saponaria oymoides*, L.; B. M. 5, t. 154. 2. France.—*S. glutinosa*, Bieb.; B. M. 55, t. 2855. ♂ Caucasus.—*S. bellidifolia*, Sm. 2. Italy.—*Lychnus neglecta*, G. Don. (*Viscaria alba*, Hortul.) 2. Native place uncertain.—*L. latifolia*, Ait. ♂ Portugal.

ORDER XCI.—AL SINACEÆ.—Lindl. Nat. Syst. p. 125.

THE CHICKWEED TRIBE.

Herbs, annual or perennial, by Lindl. referred to 32 genera. Of these, according to DC. pr. and Spreng. syst. about 140 species inhabit Europe; 44 Siberia; 30 S. America, Mexico and the W. Indies; 30 N. America; 30 Tauria, Caucasus and Dauria; 12 the Levant; 8 N. Africa; 4 Persia; 4 Greenland; 2 the Straits of Magellan; 1 Madeira; 1 Bourbon; 1 Altai; 1 Arabia; 1 Japan; 1 the Sandwich Islands; and 1 Melville Island. S. Africa contains several species of *Cerastium*, all of which are common to Europe, and probably introduced from thence, (*Harvey*.) In the E. Indies 24 have been discovered; viz. 1 of *Alsinella*, 2 of *Cherleria*, (D. Don.); 7 of *Arenaria*; 4 of *Cerastium*; 1 of *Brachystemma*; 7 of *Stellaria*; 2 of *Leucostemma*; and 1 of *Lärrea*;—four of these are common to Europe. Excepting *Stellaria tetragona*, Bl., (Java) and *Cerastium cordifolium*, Roxb. (Bengal,) all the rest are natives of the Himalayas and the

Neelgherries. One species, (*Brachystemma calycinum*, D. Don.) has also been found on the Khassa Mountains.—“Properties of the order none.” (*Lindl.*)

BUFFONIA, L. (*DC. pr. 1. p. 388.*)

1. *annua*, DC. (*I. c.—B. tenuifolia, Lam.;—E. B. 19, t. 1313.*) ⊖ England. France. Fl. minute, white, Feb. and March; fr. March and April.

SAGINA, L. (*DC. pr. 1. p. 389.*)

1. *apetala*, L. (*DC. l. c.;—E. B. 13, t. 881.*) ⊖ England. Germany. Italy. Fl. minute, pale-green, Feb. and March; fr. April.

MINUARTIA, Löfl. (*DC. pr. 3. p. 379.*)

1. *dichotoma*, Löfl. (*DC. o. c. p. 380.*) ⊖ Spain. Fl. minute, greenish, Feb. and March; fr. April.

ARENARIA, L. (*DC. pr. 1. p. 400;—W. and A. pr. 1. p. 43.*)

1. *serpyllifolia*, L. (*DC. pr. 1. p. 411;—E. B. 13, t. 923.*) ⊖ Europe. Sirmore, Deyra Dhoon. Fl. small, white, Feb. and March; fr. —

CERASTIUM, L. (*DC. pr. 1. p. 414;—W. and A. pr. 1. p. 42.*)

1. *dichotomum*, L. (*DC. l. c. p. 415.*) ⊖ Spain. Algiers.—Fl. small, white, Feb. and March; fr. April and May.

2. *vulgatum*, L. (*DC. pr. 1. p. 415;—W. and A. pr. 1. p. 43;—E. B. 11, t. 789.*) ⊖ Europe.—Fl. small, white, Feb. and March.

3. *cordifolium*, Roxb. (*fl. ind. 2, p. 458.*) ⊖ Bengal.—Fl. and fr. C. S. (Roxb.)

STELLARIA, L. (*DC. pr. 1. p. 396;—W. and A. pr. 1. p. 42.*)

1. *media*, Sm. (*DC. l. c.;—W. and A. l. c.;—E. B. 8, t. 537.*) ⊖ Europe, Neelgherries.—Fl. small, white, C. S.

2. *triandra*, Wall. ⊖ Nepal.

ORDER XCII.—TAMARICACEÆ.—*Lindl. Nat. Syst. p. 126.***THE TAMARISK TRIBE.**

Shrubs, occasionally perennial herbs, referred to 3 genera. Of these, 3 species are natives of Dauria; 4 of Siberia; 2 of Astrachan; 2 of Arabia; 3 of Europe; 1 of N. Africa; 1 of the Canaries; 1 of Senegal; 1 of Persia; and 1 of China. In S. Africa only *Tamarix orientalis*, Försk. which also is a native of Arabia and Persia, has been found. The E. Indies exhibit 6 species, (one of which is a variety of *Tamarix gallica*, L.) viz. 3 of *Tamarix*; 1 of *Trichaurus*; and 2 of *Myricaria*. Four of these inhabit the plains of the Peninsula and Hindooosthan, the latter 2 were found near Cashmere, and in Kunawur.

Bark slightly bitter and astringent. (DC.) Ehrenberg found that the Manna of Mount Sinai is produced by a variety of *Tamarix gallica*.

This substance being analysed by Mitscherlich, was found to contain no crystallisable Mannite, but to consist wholly of pure mucilaginous sugar. Lindl. from *Ann. des scienc.* 12, 68. (1827.)

TAMARIX, L. (*DC. pr.* 3, *p.* 95;—*W. and A. pr.* 1, *p.* 40.)

1. *gallica*, L. (*DC. o. c. p.* 96;—*E. B.* 19, *t.* 1318.)

ORDER XCIII.—ILLECEBRACEÆ.—Lindl. *Nat. Syst.* *p.* 127.

THE KNOT-GRASS TRIBE.

Herbs or half-shrubby plants, by Lindl. referred to 39 genera. Of these, DC. pr. and Spreng. syst. assign about 40 species to Europe; 22 to S. America, Mexico and the W. Indies; 10 to N. America; 8 to N. Africa; 6 to the Canaries; 3 to Guinea; 3 to Arabia; 1 to Abyssinia; 1 to Senegal; 1 to Madagascar; 1 to Persia; 1 to Dauria; 1 to Siberia; 1 to China; 2 to New Holland; and 1 to Van Diemen's Land. Excluding *Scleranthus annuus*, S. Africa exhibits 49 species. In the E. Indies about 17 forms have been discovered; viz. 1 of *Herniaria*. (Cashmere.) 1 of *Hapalosia*; (common;) 1 of *Illecebrum*; (Kunawur;) 4 of *Polycarpea*; (Ceylon, Peninsula of India, Silhet;) 2 of *Drymaria*; (Himalayas, Khassya Mountains, Dindigul, Taong-Dong, Java;) and 8 of *Mollugo*; (Ceylon, both Peninsulas, Bengal, Nepal, Cochin-China.) A few of them are common to other parts of the world.

“ A trace of astringency pervades the order, and is the only sensible property that it is known to possess.” (Lindl.)

HAPALOSIA, Wall. (*W. and A. pr. 1, p. 358.*)

1. *Löfelingia*, Wall. (*W. and A. l. c.*—*Pharnaceum depressum*, L.—*Löfelingia indica*, Retz.;—*Roxb. fl. ind.* 1, p. 165; *ed. Carey*, 1, p. 169.—*Polycarpaea?* *depressa*, DC. *pr. 3*, p. 375.) ◎ Both Peninsulas of India, Bengal, (Serampore,) &c. Fl. small, whitish, Feb.; fr. March.

Nima quassooides, Buch. Nepal. Valley of Gurhwal. Banks of the Sutlej.

ORDER XCVI.—RUTACEÆ, DC.—Lindl. Nat. Syst. p. 130.

THE RUE TRIBE.

Trees or shrubs, very rarely herbaceous plants, by Lindl. referred to 44 genera. Of these, DC. pr. and Spreng. syst., assign about 48 to New Holland and the South Sea Islands; 44 to S. America, Mexico and the W. Indies; 12 to Europe; 3 to the Levant; 2 to Tauria and Caucasus; 2 to Dahuria; 1 to Siberia; 2 to Persia; 1 to the Canaries; 2 to N. Africa; and 1 to Mauritius. One hundred and ten species inhabit S. Africa, (*Harvey.*) In the E. Indies have been found 1 *Ruta*; 1 *Aphyllum*; 2 *Cymnosma*; 1 *Evodia*; (Moluccas, DC.) and 1 *Dictamnus*. One *Cymnosma* stretches from China, Cochin China, Java and Ceylon, through both Peninsulas of India, up to the Khassya Mountains. The rest are natives of Nepal and the Himalayas.

This order in general, possesses sharp, aromatic, bitterish, tonic or intensely stimulant properties. The common Rue is well known on account of its very strong and unpleasant smell. It is a powerful stimulant in diseases of the uterus. “*Ruta angustifolia*, Pers., said to be common in Persia, Cabul, and Tinkaboon, is given in India as a substitute for *R. graveolens*, L., and considered emenagogue. *R. albiflora* is employed as a stimulant in the hills.” (*Royle.*) *Dictamnus albus*, L., whose bitter aromatic root was formerly used as a sudorific, is now nearly obsolete. Its abundance of volatile oil is so great, that in hot weather the surrounding atmosphere may be lighted by a candle. The *Diosmeæ* of S. Africa are remarkable for their powerful and offensive smell, more especially *Barosma crenulata*, Willd. (*Bucku.*) whose leaves have been much extolled in wounds, rheumatism, spasms, and diseases of the bladder. The American species are in many instances powerfully febrifugal, f. ex. *Galipea Cusparia*, St. Hil.; *Evodia febrifuga*, St. Hil.; *Ticorea febrifuga*, St. Hil.; *Hortia brasiliiana*, Vand, &c.

RUTA, L. (DC. pr. p 709;—W. and A. pr. 1, p. 146.) *Rue.*

1. *angustifolia*, Pers. (DC. o. c. p. 710;—W. and A. l. c.;—B. M. 49, t. 2311.—*R. chalepensis*, Vill.—*R. graveolens*, a. L. sp. 548;—*Roxb. fl. ind.* 2, p. 374;—*J. Grah. Cat. B. pl. p. 36.*—*R. chalepensis*, β. L. mant. p. 69.) 5 S. France. Cultivated in India. Fl. small, yellowish green, heavy smelling. C. S; fr. H. S.

ORDER XCVII.—ZYGOPHYLLACEÆ.—Lindl. Nat. Syst. p. 133.

THE BEAN-CAFER TRIBE.

Herbs, under-shrubs, shrubs, or trees, referred by Lindl., (including Aitonia) to 18 genera. Of these, DC. pr. and Spreng. syst., enumerate 13 species for S. America, Mexico and the W. Indies; 1 for N. America; 4 for Europe; 10 for N. Africa; 1 for Senegal; 1 for Sierra Leonæ; 1 for Arabia; 1 for Persia; 1 for Siberia; 3 for the Levant; and 3 for New Holland and the South Sea Islands. The S. African forms amount to 40, (*Harvey*); and the E. Indian ones to 6. Of the latter, 1 belongs to *Tribulus*, (both Peninsulas of India, Bengal, Monghir.) 1 to *Biebersteinia*, (*Kunawur*); 1 to *Peganum*, (Peninsula of India, Agra,); 1 to *Zygophyllum*? (*Taong-Dong*); and 1 to *Melianthus*? (*Kemaon*).—*Biebersteinia odora* is also common to Altai, and *Peganum Harmala* to Europe and the Levant.

"The woody plants of the order are remarkable for the extreme hardness of their wood. All the Guaiacums are well known for their exciting properties; the bark and wood of *Guaiacum sanctum* and *officinale* have a somewhat bitter and acrid flavour, and are principally employed as sudorifics or alteratives; they contain a particular matter, often designated as

184

ZYGOPHYLLACEÆ—XANTHOXYLACEÆ.

CSL

resin or gum-resin, but which is now considered a distinct substance, called Guaiacine." (DC. Lindl.)

TRIBULUS, L. (DC. pr. 1, p. 703;—W. and A. pr. 1, p. 144.) *Caltrops.*

1. *lanuginosus*, L. DC. o. c. p. 704;—W. and A. o. c. p. 145;—Roxb. fl. ind. 2, p. 401;—Wight icon. 1, t. 98;—J. Grah. Cat. B. pl. p. 35;—Burm. zeyl. t. 106, f. 1.) গোথুর *Gokhoor*. 2. Paghamew. Ceylon. Coromandel. Deccan. Bengal. (Serampore.) Monghir. Fl. large, bright yellow, sweet-scented; fr. the whole year.
2. *cistoides*, L. (DC. pr. 1, p. 703;—Jacq. Schönb. t. 103;—B. R. 10, t. 791;—Roxb. H. B. p. 33.) 2. S. America. Fl. large, yellow; and fr. the whole year.

GUAIACUM, L. (DC. pr. 1, p. 706.)

1. *officinale*, L. (DC. o. c. p. 707;—B. Reg. (1839,) t. 9.) Jamaica, Hayti. Fl. small, beautiful, blue. Has not fl. here as yet, and does not seem to like the climate.

America.—*Guaiacum sanctum*, L. 5 Equinoctial America.

ORDER XCVII.—XANTHOXYLACEÆ.—Lindl. Nat. Syst. p. 135.

Trees or shrubs, sometimes climbing, by Lindl. referred to 15 genera. Of these, DC. pr. and Spreng. syst. assign 22 species to S. America, Mexico and the W. Indies; 4 to N. America; 2 to Senegal; 1 to Madagascar; 6 to Mauritius and Bourbon; 1 to Abyssinia; 4 to China; 2 to Japan; and 2 to New Holland. S. Africa exhibits 4 species, (Harvey,) and the E. Indies 37. Of the latter 2-3 belong to *Brucea*; 22 to *Xanthoxylum*; 1 to *Blackburnia*? (Roxb.); 1 to *Lacuris*; 3-4 to *Toddalia*; 4 to *Ailanthus*; 1 to *Eurycoma*; and 1 to *Ptelea*? (Lour.); but two are also natives of China. With the exception of 11 which inhabit Nepal, the Khasya and Morung Mountains, the rest are nearly all natives of the Peninsulas of India, the Moluccas and Cochin China. The Javanese species, including *Ruteæ*, are stated by Blume to be 14, (Wight,;) but we are not acquainted with their generic distribution.—To the Mauritius and Bourbon Xanthoxylaceæ, Wall. Cat. adds 2 species of *Xanthoxylon*.

" Nearly all the species of this order are aromatic and pungent—*Xanthoxylon Clava Herculis* and *fraxineum* are powerful sudorifics; they are

remarkable, according to Barton, for their extraordinary power in exciting salivation, whether applied immediately to the gums or taken internally; two plants are reputed to have been used successfully in paralysis of the muscles of the mouth and in rheumatic affections. (DC.)—*Xanthoxylon hyemale* is employed as a remedy for pain in the ear, for which purpose the powder of its bark is made use of.—*Brucea antidyserterica* contains a poisonous principle, called *Brucia*, which is similar in its effects to *Strychnia*, but 12 or 16 times less energetic than that alkali. *Turner*. (*Lindl.*)
BRUCEA, J. S. Mill. (DC. pr. 2, p. 88.)

ORDER XCIX.—GERANIACEÆ, DC.—Lindl. Nat. Syst. p. 137.

THE GERANIUM TRIBE.

Herbs, under-shrubs or shrubs, by Lindl. referred to 10 genera. Of these, according to DC, about 50 species (Geraniums and Erodiums) in-

habit Europe; 4 Siberia; 5 Caucasus and Tauria; 2 Iberia; 5 Dahuria; 2 the Levant; 9 N. Africa; 2 Teneriffe and Madeira; (1 *Geranium*; 1 *Pelargonium*) 2 St. Helena; (P.) 11 New Holland and Van Diemen's Land; (9 G. and E.; 2 P.) 1 Arabia; (E.) 2 N. America (E.); 14 S. America; (2 *Rhynchothecas*; the rest G. and E.) and 1 *Tristan d'Acunha*. (P.) In S. Africa have been found 350 species; viz. 8 *Monsonias*, and a few *Geraniums* and *Erodiums*, the rest all *Pelargoniums*. (*Harvey*.) The E. Indian forms amount to about 14, (13 of *Geranium*, and 1 of *Erodium*.) With the exception of one species from the Peninsula of India, they are all natives of the Himalayas. One of them, *Geranium eriostemon*, Fisch, is also an inhabitant of Dahuria.

"An astringent principle and an aromatic or resinous flavour are the characteristics of this order.—Some of the *Pelargoniums* are acidulous, but this genus is chiefly known as an object of garden culture, for which its great beauty, and the facility with which the species or supposed species intermix, render it well adapted. (*Lindl.*) This intermixture, so unpleasant to those who wish to see plants distinct in their characters, has fully justified W. Curtis's prophecy (in 1797), "that in a few years, from the multiplication of seminal varieties, springing from seeds casually or perhaps purposely impregnated with the pollen of different sorts, such a crop will be produced as will baffle all our attempts to reduce to species, or even regular varieties."

MONSONIA, L. fil. (*DC. pr. 1, p. 638, sect. 3.*)

1. *pilosa*, Willd. (*DC. l. c.*—*M. speciosa*, *Swt. ger. t. 77.*) 2. C. G. H. Fl. large, greenish-white, with a red eye, March.

2. *speciosa*, L. (*DC. pr. 1, p. 638*;—*B. M. 3, t. 73.*) 2. C. G. H. Fl. large, pale rose-coloured, with a crimson eye, March.

GERANIUM, L. (*DC. pr. 1, p. 639*;—*W. and A. pr. 1, p. 133.*)

1. *nepalense*, *Swt. ger. t. 12*;—*DC. pr. 1, p. 643.* ⊖ Nepal, Mussooree. Cashmere. Fl. largish, deep rose, with a dark purple eye, C. S.; fr. H. S.

2. *rotundifolium*, L. (*DC. pr. 1, p. 643*;—*E. B. 3, t. 157.*) ⊖ Europe. Fl. small, deep rose, Feb. and March; fr. April.

3. *columbinum*, L. (*DC. l. c.*;—*E. B. 4, t. 259.*) ⊖ Europe. Fl. smallish, rose-coloured, March.

6. *Robertianum*, L. (*DC. l. c.*;—*E. B. 21, t. 1486.*) ⊖ Europe. Fl. small, purplish, Feb. and March; fr. April.

ERODIUM, L'Herit. (*DC. pr. 1, p. 644.*)

1. *cicutarium*, Sm. (*DC. o. c. p. 646*;—*E. B. 25, t. 1768*;—*Roxb. H. B. p. 49.*) ⊖ Europe, N. Africa, Levant. Fl. small, deep rose, Feb. and March; fr. April.

2. *moschatum*, Ait. (*DC. pr.* 1, p. 647;—*E. B.* 13, t. 902.) ♂ S. Europe. England. N. Africa. C. G. H.—Peru. Fl. small, deep rose, Feb. and March; fr. April.
3. *gruinum*, Ait. (*DC. l. c.*;—*Roxb. H. B.* p. 49.) ♂ Candia. N. Africa. Spain. In *H. C. G. fl. C. S.* (*Roxb.*)
- PELARGONIUM, L'Herit. (*DC. pr.* 1, p. 649.)
1. *melananthum*, Jacq. (*Icon. rar.* 3, t. 514;—*DC. pr.* 1, p. 653.—*Hoarea melanantha*, *Swt. ger.* t. 73.) ♀ C. G. H. Introduced in 1841.
 2. *astragalifolium*, Pers. (*DC. pr.* 1, p. 653.—*P. pinnatum*, *B. M.* 16, t. 579.) ♀ C. G. H. Introduced in 1841.
 3. *zonale*, Willd. (*DC. pr.* 1, p. 659;—*Roxb. H. B.* p. 49.) ♂ C. G. H. Fl. largish, scarlet, C. S.; fr. H. S.
 4. *inquinans*, Ait. ? (*DC. pr.* 1, p. 659?—*Roxb. H. B.* p. 49;—*J. Grah. Cat. B. pl.* p. 247.) Scarlet Geranium. Fl. largish, scarlet, nearly the whole year; fr. C. and H. S.—DC. says, “Folia tacta inquinant colore ferrugineo. Petala chermesina.” This does not agree with our plant.
 5. *primulinum*, Swt. (*DC. pr.* 1, p. 665.—*P. crassicaule*, *B. M.* 14, t. 477;—not *L'Herit.*) ♂ C. G. H. Introduced in 1841.
 6. *peltatum*, Ait. (*DC. pr.* 1, p. 666.—*Geranium peltatum*, *Curt. B. M.* 1, t. 20.) ♂ C. G. H.—Fl. large, pale rose, the two upper petals with a deep rose-coloured spot about the middle, March; fr. O.
 7. *cucullatum*, Ait. (*DC. pr.* 1, p. 671.) ♂ C. G. H. Has not fl. here, though cultivated for several years.
 8. *vitifolium*, Ait. (*DC. pr.* 1, p. 674;—*Roxb. H. B.* p. 49.) Balm-scented Geranium. ♂ C. G. H. Fl. small, rose-coloured, with the two upper petals dark-purple-streaked, C. S.; fr. H. S.
 9. *capitatum*, Ait. (*DC. pr.* 1, p. 674;—*Roxb. H. B.* p. 49;—*J. Grah. Cat. B. pl.* p. 247.) Rose-scented Geranium. ♂ C. G. H. Fl. small, light purple, with the two upper petals striped, C. S.; fr. H. S.
 10. *Radula*, L'Herit. (*DC. pr.* 1, p. 679.—*Geranium Radula*, *Cav.*—*B. M.* 3, t. 95.) ♂ C. G. H.—Fl. largish, pale rose, the two upper petals with a dark-purple spot about the middle, Feb. and March; fr. O.
 11. *balsameum*, Jacq. (*DC. pr.* 1, p. 679.) ♂ C. G. H. Introduced in 1841.

* *Rhynchotheca integrifolia*, H. B. and Kth. ♂ Quito.—*R. diversifolia*, H. B. and Kth. ♂ Peru.—*Pelargonium glutinosum*, Ait. *B. M.* 4, t. 143. ♂ C. G. H.—*P. ternatum*, Jacq.; *B. M.* 12, t. 413. ♂ C. G. H.—*P. glaucum*, L'Herit. (*Geranium lanceolatum*, *B. M.* 2, t. 56.) ♂ C. G. H.—*P. bicolor*, Ait.; *B. M.* 16, t. 201. ♂ C. B. S.—*P. fragrans*, Willd.; *Swt. ger.* t. 172. ♂ C. G. H.—*P. quinatum*, *Curt.*; *B. M.* 15, t. 547. ♂ C. G. H.—*P. cordatum*, Ait. (*P. cordifolium*, *B. M.* 5, t. 165.) ♂ C. G. H.—*P. betulinum*, Ait.; *B. M.* 5, 148. ♂ C. G. H.—*P. pulchellum*, *Curt.*; *B. M.* 15, t. 524. ♂ C. G. H.—*P. acetosum*, Ait.; *B. M.* 3, t. 103. ♂ C. G. H.—*P. tetragonum*, L'Herit.; *B. M.* 4, t. 136. ♂ C. G. H.—*P. ceratophyllum*, L'Herit.; *B. M.* 9, t. 315.

5 C. G. H.—*P. dasycaulon*, Sims.; B. M. 46, t. 2049. 5 C. G. H.—*P. odoratissimum*, Ait. 24. C. G. H.—*P. glomeratum*, Jacq. (*P. australe*, Swt. ger. t. 68.) 24. N. Holland. Commonly cultivated in the Madras Presidency.

ORDER C.—BALSAMINACEÆ.—Lindl. Nat. Syst. p. 138.

THE BALSAM TRIBE,

Succulent, herbaceous, generally annual plants, sometimes under-shrubby, referred to 2 or 3 genera. Of these DC. pr. mentions; 1 species for Europe; 1 for Siberia; 2 for N. America; 1 for Madagascar; 2 for China; and Harvey, 2 for S. Africa. The rest have all been found in the E. Indies, where, according to our materials, they amount to 74 species of *Impatiens*; and 2 of *Hydrocera*. Several have, however, been found lately in Ceylon, Courtallum, and the Shevagery Hills.—They are eminent-ally alpine plants, luxuriating in moisture and a moderate temperature, especially during the rainy season, and they, therefore, chiefly inhabit mountains and hills from the Himalayas down to Ceylon, and the Malacca Peninsula—Excepting *Hydrocera angustifolia*, Bl. we are unacquainted with the Javanese forms of the order. (See Wight. ill. 1, p. 156, 160.)

"Chiefly remarkable for the elastic force with which the valves of the fruit separate at maturity, expelling the seeds." (Lindl.)

IMPATIENS, L. (W. and A. pr. 1, p. 135.)

1. *Balsamina*, L. (W. and A. l. c.) ଦୋପାଟି ଡୋପାଟି *Dopatee*.

SUB-ORDER.—TROPAEOLEÆ, Juss.—Lindl. Nat. Syst. p. 139.

THE NASTUETIUM TRIBE.

Trailing or twining herbs, of 3 genera, and according to DC. pr., B. M. and B. Reg., 16 species, all Natives of Peru, Chili, New Granada, and Brazil.—Properties unimportant.

TROPAEOLUM, L. (DC. pr. 1, p. 683.) *Nasturtium*.

1. *majus*, L. (DC. l. c.;—B. M. 1, t. 23;—Roxb. H. B. p. 32;—J. Grah. Cat. B. pl. p. 247.) Great Indian Cress. ♂ Peru. Fl. large, orange, crimson-streaked, fragrant, C. S.; fr. 0.—Fleshy fruit acid, possessing the properties of Cress.

-
- * *T. minus*, L.; B. M. 3, t. 98. ♂ Peru.—*T. aduncum*, Sm.; B. Reg. 9, t. 718. (*T. peregrinum*, B. M. 33, t. 1351.) ♂ Peru, Mexico.—*T. pentaphyllum*, Lam.; B. Reg. 18, t. 1547; B. M. 59, t. 3190. ♀ Buenos Ayres.—*T. Moritzianum*, Klotzsch.; B. M. 67, t. 3844. ♂ Cumana.—*Magallana aparrifolia*, Cav. ♂ S. America. Tuberous roots, in excellent condition, of *Tropeolum tricolor*, Swt.; and *tuberosum*, Ruiz. and Pav.; have been tried here, but without success.

ORDER CI.—OXALIDACEÆ.—Lindl. Nat. Syst. p. 140.

THE WOODSORREL TRIBE.

Herbs, under-shrubs, rarely trees, by Lindl. referred to 5 genera. Of these, DC. pr. and Spreng. syst. enumerate about 100 species for S. America; 5 for N. America; 2 for Europe; 1 for Iberia; 1 for Bourbon;

2 for New Holland ; 1 for Terra del Fuego ; and 1 for the Falkland Islands. S. Africa is inhabited by 110 species, (*Harvey.*) In the E. Indies have only been found 2 forms of *Averrhoa*; (Moluccas, Peninsulas of India, Bengal, Assam, &c.) 2—4 of *Biophytum*; (All India, but especially Courtallum, the Neelgherries, Ceylon, and Monghir,) and 1 of *Oxalis*, which is a native of most parts of the world.

"Acidity is the predominating characteristic of this order. " *Averrhoa* Bilimbi and the pinnated *Oxalis* called *Biophytum* have sensitive leaves. Their foliage is generally acid, so that they are fit to supply the place of sorrel.—*Oxalis Acetosella*, (Common Woodsorrel,) contains pure oxalic acid." (*Lindl.*)

AVERRHOA, L. (*DC. pr. 1, p. 689* ;—*W. and A. pr. 1, p. 141.*)

1. *Carambola*, L. (*DC. l. c.*;—*W. and A. l. c.*;—*Roxb. fl. ind. 2, p. 450*;—*J. Grah. Cat. B. pl. p. 34*;—*Rheed. 3, t. 43, 44*;—*Rumph. 1, t. 35.*) 5 Moluccas. Cultivated. Fl. small, purplish-red, H. and R. S.; fl. C. S.

a. acida; कमरुङ्ग *Kumurunga*. Ripe fruit cooling, used in fevers.

β. dulcis; मिट्ठा कामरुङ्ग *Mita-Kamrunga*. Ripe fruit sweet.

2. *Bilimbi*, L. (*DC. pr. 1, p. 689*;—*W. and A. pr. 1, p. 142*;—*Roxb. fl. ind. 2, p. 451*;—*J. Grah. Cat. B. pl. p. 34*;—*Rheed. 3, t. 45, 46*;—*Rumph. 1, t. 36.*) बिलिंबि *Bilimbi*. 5 Moluccas. Cultivated. Fl. small, reddish-brown, H. S.; fr. R. S. Fruit pickled, or preserved with sugar.

BIOPHYTUM, DC. (*pr. 1, p. 689.*)

1. *sensitivum*, DC. (*v. c. p. 690*;—*Wight. ill. 1, t. 69, f. 9.*—*Oxalis sensitiva*, L.;—*W. and A. pr. 1, p. 142*;—*Roxb. fl. ind. 2, p. 457*;—*J. Grah. Cat. B. pl. p. 35*;—*Rheed. 9, t. 19*;—*Rumph. 5, t. 104, f. 2.*) बन चारांग *Bun-naranga*. ⊕ Moluccas. Both Peninsulas of India, Bengal, (Serampore.) Fl. smallish, yellow; and fr. C. S.

OXALIS, L. (*DC. pr. 1, p. 690*;—*W. and A. pr. 1, p. 142.*)

1. *corniculata*, L. (*DC. pr. 1, p. 692*;—*W. and A. l. c.*;—*Roxb. fl. ind. 2, p. 457*;—*J. Grah. Cat. B. pl. p. 35*;—*E. B. 24, t. 1726*;—*Wight. icon. 1, t. 18.*—*O. pusilla*, *Satisb.*;—*Roxb. l. c. excl. No. 2.*) आम्रूल *Amrool*. ⊕ Europe. N. America. Mexico. African Islands, Japan. India, from Ceylon to the foot of the Himalaya. Fl. small, yellow; and fr. nearly the whole year.

2. *rosacea*, Jacq. (*DC. pr. 1, p. 694*;—*B. M. 41, t. 1698.*) 2. C. G. H. Introduced in 1841.

3. *tetraphylla*, Cav. (*DC. pr. 1, p. 695*;—*Spreng. syst. 2, p. 431.*) 2. Mexico. Fl. largish, lilac-purplish, May; fr. O.

4. *violacea*, L. (*DC. pr. 1, p. 695*;—*B. M. 48, t. 2245*;—*Roxb. H. B. p. 35.*) 2. N. America. Fl. largish, violet, C. S; fr. O.

5. *cernua*, Thunb. (*DC. pr. 1, p. 696*;—*O. caprina*, *B. M. 7, t. 237*;—*Roxb. H. B. p. 34.*) 2. C. G. H. Fl. largish, lemon-coloured, Jan., Feb. and March; fr. O.

OXALIDACEÆ—CORIARIACEÆ.

6. *variabilis*, Jacq. (*Lindl.*; *B. Reg.* 18, t. 1505.) 2. C. G. H.—Fl. largish, Jan. Feb. and March; fr. 0.
a. *albiflora*; (*B. Reg.* l. c.;—*B. M.* 41, t. 1683.) Fl. white, with an orange eye.
β. *rosea*; (*B. Reg.* l. c.;—*B. M.* 41, t. 1712.) Fl. deep rose, with an orange eye.
7. *Bowiei*, Herb. (*B. Reg.* 19, t. 1585.) 2. C. G. H.—Fl. very large, deep rose-coloured, R. S. C. and fr. 0.
8. *Deppii*, B. Cab. (16, t. 1500.) 2. Mexico 1833.
9. *floribunda*, Lehmann. 2. Brazil, C. S.

O. hirta, L.; *incarnata*, L.; *convexula*, Jacq.; *Acetosella*, L.; *versicolor*, L.; and *flava*, L; have been cultivated here for many years without fl.

- * *O. bipunctata*, Grah.; *B. M.* 54, t. 2781. 2. Rio Janeiro.—*O. tenera*, Spreng.; *B. Reg.* 13, t. 1046. 2. Brazil.—*O. divergens*, Benth.; *B. Reg.* 19, t. 1620. 2. Mexico.—*O. Barrelieri*, Jacq.; *B. M.* 66, t. 3748. 5 Brazil.—*O. Plumieri*, Jacq.; *B. Reg.* 10, t. 810. 5 S. America.—*O. fruticosa*, Rad.; 5 Rio Janeiro.—*O. Dillenii*, Jacq.; 2 Guadeloupe.—*O. floribunda*, Lehm.; *B. Reg.* 13, t. 1123. 2. S. America.—*O. palustris*, St. Hil. 2. Brazil.—*O. stricta*, L.; Fl. dan. t. 873. 2 N. America. Europe.—*O. albicans*, H. B. and Kth. 2. Mexico.—*O. debilis*, H. B. and Kth. 2. Caraccas.—*O. Jacquiniana*, H. B. and Kth. 2. Mexico.—*Biophytum Candollianum*, Wight. ill. 1, t. 62. and f. 8. 2 Courtallum.—*B. proliferum*, Wight. 2 Ceylon.—*B. intermedium*, Wight. 2 Ceylon.—*B. polyphyllum*, Munro. 2 Neelgherries.—*B. verticillatum*, Wight. 2 Courtallum.—*Ledocarpum pedunculare*, Lindl.; *B. Reg.* 17, t. 1392. 5 Chili. A very beautiful plant.

ORDER CII.—CORIARIACEÆ.—*Lindl.* *Nat. Syst.* p. 141.

Shrubs of 2 genera; one (*Coriaria*) containing, according to DC. pr., 7 species: 1 from Europe and N. Africa; 4 from Peru; 1 from Mexico; and 1 from New Zealand. The other genus, *Ercilla*, Ad. Juss. we are not acquainted with. The E. Indies exhibit but one species.

" *Coriaria myrtifolia* is used by dyers for staining black. Its fruit is poisonous. (DC.) Its leaves have been used to adulterate Senna, and have produced fatal consequences." (Fee. *Lindl.*)

CORIARIA, L. (DC. pr. 1, p. 739.)

1. *nepalensis*, Wall. (*pl. as. rar.* 3, t. 289.) 5 Mountains near Deyra Dhoon, Kemaon, Mussooree, alt. 5-7000 f. Has been cultivated

here for more than fourteen years, without fl. Fruit eaten in the hills. (Royce.)

* *C. atropurpurea*, Moç. and Sessé. 5 Mexico.

ORDER CIII.—SURIANACEÆ.—Lindl. Nat. Syst. p. 142.

The only true species of this order is

* *Suriana maritima*, L. 5 Sea-coasts of India.—Properties unknown.

ORDER CIV.—LIMNANTHACEÆ.—Lindl. Nat. Syst. p. 142.

The only species of this order, besides *Flörkea palustris*, Nutt. a N. American plant, is

* *Limnanthes Douglassii*, R. Br.; B. Reg. 20, t. 1673. ◎ California.

ORDER CV.—ROSACEÆ.—Lindl. Nat. Syst. p. 143.

THE ROSE TRIBE.

Herbs or shrubs, excluding *Rhinanthera*, and adding *Hotelia*, by Lindl. referred to 35 genera. Of these, DC. pr. and Spreng. syst. assign about 154 species for Europe; 100 for N. America; 44 for Siberia; 30 for S. America, Mexico and the W. Indies; 30 for China and Japan; 12 for Tauria and Caucasus; 9 for the Levant; 8 for Dahuria; 5 for Greenland; 5 for the Straits of Magellan; 4 for Bourbon and Mauritius; 3 for New Holland and the Society Islands; 3 for Java; 3 for Melville Island; 2 for Persia; 1 for Iberia; 2 for Abyssinia; 1 for St. Helena; 1 for Luzon; and 1 for Terra Nova Island.—In S. Africa have been found 1 *Geum*; 1 *Potentilla*; 1 *Agrimonia*, and several species of *Rubus*, (Harvey).—According to our materials, which, in general, do not touch Java, 117 Rosaceæ inhabit the E. Indies; viz. of *Rosa*, 12 (Nepal; a few from the Khassya Mountains, the Neelgherries and the banks of the Irrawaddy); of *Rubus* 38, (Himalayas, Khassya Mountains, Neelgherries, Moluccas); of *Dalibarda* 1, (Nepal); of *Frugaria* 4, (Gosain Than, Deyra Dhoon, Oude, Java, Penang); of *Potentilla* 38; (Nepal, Khassya Mountains, Neelgherries, and 1 Ceylonese; 3 also common to Siberia, *P. cataclines*, *multijida* and *bifurca*); of *Sibbaldia* 2; (Himalayas, 1 of them, *S. procumbens*, L. also a

native of Europe and Siberia); of *Geum* 3, (Himalayas); of *Sieversia* 1, (Himalayas); of *Agrimonia* 2; (one Nepal; the other, a variety of *A. Eupatorium*, Ceylon); of *Spiraea* 11; (Himalayas. Two of them common to Kamtschatka and Japan); of *Hotelia* 1, (Himalayas, Japan); of *Schizonotus* 1, (Himalayas); and of *Neillia* 3, (Nepal, Khassy Mountains.)

"No Rosaceous plants are unwholesome; they are chiefly remarkable for the presence of an astringent principle, which has caused some of them to be reckoned febrifuges.—One of the most powerful anthelmintics in the world, an Abyssinian plant, known to botanists by the name of *Brayera anthelmintica*, *Kth.* belongs to this family. Upon the authority of Brayer, after whom is it named, two or three doses of the infusion are sufficient to cure the most obstinate cases of *taenia*." (*Lindl.*)

Rosa, L. (*DC. pr. 2, p. 597*;—*W. and pr. 1, p. 301*.)

1. *involuta*, Roxb. (*fl. ind. 2, p. 513*;—*DC. pr. 2, p. 602*;—*B. Reg. 6, t. 739*;—*Wight. icon. 1, t. 234*.) 5 ～ Kemaon. Silhet. Soonderbuns. Fl. large, white, fragrant, C. S.; fr. H. S.
2. *carolina*, L. (*DC. pr. 2, p. 605*.) 5 N. America. In H. C. G. Fl. ?
3. *damascena*, Mill. (*DC. pr. 2, p. 620*;—*J. Grah. Cat. B. pl. p. 65*.) *Damascus Rose*. 5 Syria. Fl. large, fragrant rose, C. S. but seldom. The petals yield a highly fragrant essential oil, called Atter of Roses.
4. *centifolia*, L. (*DC. pr. 2, p. 619*;—*Roxb. fl. ind. 2, p. 513*.) *Provence Rose*. সুরাবাই গোলাৰ *Busurai-golab*. 5 S. Europe, fl. large, double rose, fragrant, Feb. and H. S.
β. *muscosa*, Ser. (*DC. l. c.*;—*B. M. 63, t. 3475*.—*Rosa muscosa*, Mill.;—*B. M. 2, t. 69*.) *Moss Rose*. 5 France. Introduced in 1841.
5. *rubiginosa*, L. (*DC. pr. 2, p. 617*.)
β. *micrantha*, Lindl. (*R. micrantha*, Sm.;—*E. B. 35, t. 2490*.) *Small flowered Sweet Briar*. 5 England. Fl. small, pale rose, H. S.; fr. O.

SUB-ORDER.—POMEÆ, Lindl. Nat. Syst. p. 145.

THE APPLE TRIBE.

Trees and shrubs, referred (including *Hesperomeles* and *Stranæsia*) by Lindley to 13 genera. Of these, according to DC. pr. and B. Reg., about 30 species have been found in Europe; 30 in N. America; 12 in China and Japan; 7 in S. America and Mexico; 5 in Siberia; 5 in the

Levant; 3 in N. Africa; 2 in Tauria and Caucasus; 2 in Persia; 1 about Astrachan; 1 in Madeira; and 1 in the Sandwich Islands. In the E. Indies, excluding Java, 29 species have been discovered, viz. 1 of *Crataegus*; (Nepal.) 1 of *Stranæsia*; (Nepal.) 1 of *Rhaphiolepis*; (China; scarcely found in India,) 6 of *Photinia*; (Nepal. Khassya Mountains, Neelgherries,) 1 of *Eriobotrya*; (Nepal.) 8 of *Cotoneaster*; (Nepal, 1 from the Neelgherries,) 10 of *Pyrus*; (Himalayas, Khassya Mountains, Taong-Dong, Assam.) and 1 of *Cydonia*, (Nepal.) *Cydonia vulgaris*, Pers. is only cultivated in Hindooosthan.

"The fruit is an article of food, and the flowers for their beauty, are the chief peculiarities of this order, which consists exclusively of trees and bushes, without any herbaceous plant." (Lindl.)

CRATAEGUS, L. (DC. pr. 2, p. 626.)

1. *crenulata*, Roxb. (fl. ind. 2, p. 509;—DC. l. c.) 5 Nepal, Kemaon.
Fl. largish, white, April and May; fr. Aug.

RHAPHIOLEPIS, Lindl. (DC. pr. 2, p. 630;—Lindl. B. Reg. under t. 1956.

1. *indica*, Lindl. (DC. l. c.—*Crataegus indica*, L. ? E. M. 42, t. 1726;
—Roxb. H. B. p. 38.) 5 China. Fl. small, white, March and
April; fr. O.

PHOTINIA, Lindl. (DC. pr. 2, p. 631;—W. and A. pr. 1, p. 302;—Lindl.
B. Beg. under t. 1956.)

1. *bengaleensis*, Wall. (P. ? *dubia*, Lindl.;—DC. l. c.—*Mespilus bengaleensis*, Roxb. fl. ind. 2, p. 510.) L. 5 Chittagong. Assam. Khassya Mountains. Nepal. Fl. small, white, Dec. and Jan.; fr. June and July. Bark used in Nepal for dyeing scarlet. (DC.)

2. *eugenifolia*, Lindl. (B. Reg. under t. 1956.) 5 Khassya Mountains. Fl. small, white, R. S.

ERIOPOTRYA, Lindl. (DC. pr. 2, p. 631;—W. and A. pr. 1, p. 302;—
Lindl. B. Reg. under t. 1956.)

1. *japonica*, Lindl. (DC. l. c.;—W. and A. l. c.;—B. Reg. 5, t. 365;
—Wight. icon. 1, t. 226;—J. Grah. Cat. B. pl. p. 65.—*Mespilus japonica*, Thunb.;—Roxb. fl. ind. 2, p. 510.) *Loquat*. 5 Japan, China.
Cultivated in gardens. Fl. smallish, white, fragrant, R. S.; fr.
Dec. Jan. Feb. and March.

COTONEASTER, Medik. (DC. pr. 2, p. 632.)

1. *affine*, Lindl. (DC. l. c.) 5 Nepal, Shreenagur. Has not fl. here,
though cultivated for many years.

2. *ovatum*, Wall. Nepal.

PYRUS, L. (DC. pr. 2, p. 633.)

1. *communis*, L. (DC. l. c.;—E. B. 25, t. 1784.) *Wild pear-tree*. Europe.
γ. sativa, (Roxb. fl. ind. 2, p. 510.) *Cultivated pear-tree*. Fl. large,
white, fragrant, Feb. and March; fr. O.

2. *sinensis*, Lindl. (B. Reg. 15, t. 1248.—P. chinensis, Roxb. fl. ind.
2, p. 511.) *Sandy Pear*. *China Pear*. 5 China. In H. C. G. Fl?
Introduced there before 1794, but had not fl. up to 1814.

Malus, L. (*DC. pr.* 2, *p.* 635;—*Roxb. fl. ind.* 2, *p.* 511;—*J. Grah. Cat. B. pl.* *p.* 66.) *Apple Tree*. 5 Europe. Persia. Assam, &c. Fl. large, reddish white, fragrant, Feb. and March; fr. 0.

4. *spectabilis*, Ait. (*DC. pr.* 2, *p.* 635;—*B. M.* 8, *t.* 267;—*Roxb. H. B.* *p.* 38.) 5 China. Fl. large, deep rose, afterwards pale rose. Introduced into H. C. G. in 1812. Fl. ?
5. *indica*, Roxb. (*fl. ind.* 2, *p.* 511;—*Wall. pl. as rar.* 2, *t.* 173.) 5 Khassy Mountains. Has not fl. here, though cultivated for more than ten years.

6. *lanuginosa*, Wall. Nepal.

CYDONIA, Tournef. (*DC. pr.* 2, *p.* 638.)

1. *vulgaris*, Pers. (*DC. l. c.*—*Pyrus Cydonia*, L.;—*Jacq. austr.* *t.* 342;—*Roxb. fl. ind.* 2, *p.* 511;—*J. Grah. Cat. B. pl.* *p.* 66.—*P. tomentosa*, Roxb. *o. c. p.* 512; not DC.) *Common Quince Tree*. 5 Rocky places and hedges of S. Europe, Hindooosthan? Introduced into H. C. G. in 1794, but had not fl. up to 1814.
2. *japonica*, Pers. (*DC. pr.* 2, *p.* 638.—*Pyrus japonica*, *Thunb.*;—*B. M.* 18, *t.* 692;—*Roxb. H. B.* *p.* 38.) *Japan Quince Tree*. 5 Fl. large crimson. In H. C. G. fl. H. S. (*Roxb.*)

* *Stranvaesia glaucescens*, Lindl.; B. Reg. 23, *t.* 1956. 5 Nepal, Kumaon.—*Rhaphiolepis Phaeostemon*, Lindl.; (*Rhaphiolepis indica*, B. Reg. 6, *t.* 468, not Lindl.). 5 China.—*R. rubra*, Lindl.; B. Reg. 17, *t.* 1400. 5 China.—*R. salicifolia*, Lindl.; B. Reg. 8, *t.* 652. 5 China.—*Chamæleæ coriacea*, Lindl. 5 Madeira.—*Photinia serrulata*, Lindl. (*Crataegus glabra*, *Thunb.*; B. M. 47, *t.* 2105.) 5 Japan, China.—*P. pustulata*, Lindl. Canton.—*P. integrifolia*, Lindl. Nepal.—*P. Lindleyana*, W. and A.; Wight. icon. 1, *t.* 228. 5 Neelgherries.—*P. Notoniana*, Wall. Wight. ill. 1, *t.* 85. 5 Neelgherries.—*Eriobotrya elliptica*, Lindl. Nepal. 5.—*Osteomeles anthyllidifolia*, Lindl. 5 Sandwich Islands.—*Pyrus crenata*, Don.; B. Reg. 20, *t.* 1655. 5 Nepal.—*P. baccata*, L. 5 Kamaon.—*P. foliolosa*, Wall. pl. as. rar. 2, *t.* 189. 5 Nepal.—*Cydonia sinensis*, Thouin.; B. Reg. 11, *t.* 905. 5 China.

SUB-ORDER.—AMYGDALEÆ, Lindl. Nat. Syst. p. 146.

THE ALMOND TRIBE.

Trees or shrubs, by Lindl. referred to 6 genera. Of these, DC. pr. assigns about 16 to N. America; 14 to Europe; 7 to S. America, Mexico and the W. Indies; 7 to Japan; 3 to the Levant; 1 to Siberia; 1 to Kalmukia; 1 to Caucasus; 1 to Arabia; 1 to Persia; 1 to China; and 1 to N. Africa. In the E. Indies, (mostly exclusive of Java) have been dis-

covered 20 species : 1 of *Prunus* ; (*P. bokharensis*, Royle.) 12 of *Cerasus* ; (Nepal, one a native of Moulmein, another also common to China.) 3 of *Amygdalus* ; (Kemaon, Cochin-China. One [*Persica saligna*, Royle.] a native of the Bisshur district.) 3 of *Polyodontia* ; (1 Javanese ; 2 Ceylonese,) and 1 of *Pygeum*. (Khassya Mountains.)

The kernels and leaves of several species, f. ex. *Cerasus capricida*, *C. virginiana*, *C. Laurocerasus*, &c., contain the deadly prussic acid, but the fruit is in many instances delicious, f. ex. peaches, nectarines, cherries, plums, apricots, almonds. The leaves of the sloe (*Prunus spinosa*) have been employed as a substitute for tea, and are still used in Europe for adulterating the black tea of China. *Kirshengeist* (*l'eau de cerises*) is a spirit prepared from the kernels of a variety of *Cerasus avium* in the Vosges, the Black Forest, and Switzerland. The well known liqueur, *Noyau*, is flavoured by the kernels of *Cerasus occidentalis*, and the *Maraskino*, it is said by those of *C. Mahaleb*.

PRUNUS, L. (*DC. pr. 2, p. 532.*)

1. *domestica*, L. (*DC. o. c. p. 533 ;—E. B. 25, t. 1783.*) *Common Plum-Tree*. 5 S. Europe. England. Fl. small, white, Febr.; fr. 0, or rare and sour.

CERASUS, Juss. (*DC. pr. 2, p. 535.*) *Cherry*.

1. *Puddum*, Wall. (*pl. as. rar. 2, t. 143 ;—DC. o. c. p. 537.*)—*Prunus Puddum*, Roxb. MSS.—*P. sylvatica*, Roxb. fl. ind. p. 501.) 5 Deyra Dhoon. Sirnmore. Mountains of Hindooosthan. Has not fl. here.
2. *triflora*, Wall. (*Prunus triflora*, Roxb. H. B. p. 38, by a mistake *trifolia*, in Roxb. fl. ind. 2, p. 501.) 5 China. Nepal. Fl. small, white, Feb.; fr. May and June.
3. *nepalensis*, Ser. (*DC. pr. 2, p. 540.*—*C. glaucifolia*, Wall. Cat.) 5 Nepal, Kemaon. Has been introduced into H. C. G. Fl.?
4. *caroliniana*, Michx. (*DC. pr. 2, p. 540.*—*Prunus caroliniana*, Ait.) 5 From Carolina to Florida. Has been introduced into H. C. G. Fl.?

ARMENIACA, Tournef. (*DC. pr. 2, p. 531.*)

1. *vulgaris*, Lam. (*DC. o. c. p. 532.*—*Prunus Armeniaca*, L.;—Roxb. fl. ind. 2, p. 501 ;—J. Grah. Cat. B. pl. p. 66.) *Common Apricot*. 5 Armenia. Fl. small, white, fragrant, Jan. and Feb.; fr. H. S., but rare and bad.

AMYGDALUS, L. (*DC. pr. 2, p. 530.*)

1. *Persica*, L. (*Roxb. fl. ind. 2, p. 500 ;—J. Grah. Cat. B. pl. p. 66.*—*Persica vulgaris*, Mill.;—*DC. pr. 2, p. 531.*) *Peach Tree*. 5 Persia. Cultivated in gardens. Fl. largish, pale rose, Jan. and Febr.; fr. May. *B. nectarina*; (*Amygdalus Persica nectarina*, Ait.—*Persica laevis*, DC. l. c.) 5 Native place unknown. Fl. and fr. with a.
2. *cordifolia*, Roxb. (*fl. ind. 2, p. 500.*) L. 5 China. In H. C. G. fl. C. S; fr. H. S. Of this tree, which, according to Roxb. was very common about Calcutta in 1814, we know nothing, nor is it mentioned in Wall. Cat.

The common Almond and Cherry Tree has been tried here repeatedly, but without success.

- * *Prunus insititia*, L.; E. B. 12, t. 841. 5 England, Germany, S. France.—*P. Cocomilla*, Ten. 5 Calabria.—*P. japonica*, Thunb. 5 China, Japan.—*a. simplex*, B. Reg. 21, t. 1801.—*β. plena*, B. Reg. 1, t. 27. (*Amygdalus pumila*, B. M. 47, t. 2176.)—*Cerasus acuminata*, Wall. pl. as. rar. 2, t. 181. Nepal.—*C. cornuta*, Wall.; Royle. ill. t. 38, f. 2. Sirmore.—*C. Pseudocerasus*, Lindl. B. Reg. 10, t. 800. 5 China.—*C. Laurocerasus*, Lois. 5 Levant.—*Armeniaca dasycarpa*, Pers.; B. Reg 15, t. 1243. 5 Country unknown.

SUB-ORDER.—SANGUISORBEÆ, Lindl. Nat. Syst. p. 148.

THE BURNET TRIBE.

Herbs or under-shrubs, by Lindl. referred to 10 genera. Of these, DC. pr. enumerates 24 species for S. America and Mexico; 12 for Europe; 4 for the Straits of Magellan; 2 for N. Africa; 1 for N. America; 1 for Falkland Islands; 1 for the Levant; 2 for Caucasus; 1 for Dauria; 1 for the Canaries; 1 for New Zealand; and 1 for Tristan d'Acunha. In S. Africa have been found more than 30 species. In India we have *Sanguisorba diandra*, from Gossain Than; and *Alchemilla vulgaris*, from the Neelgherries. The latter is also common to Europe. Properties unimportant. The common Burnet (*Sanguisorba officinalis*, L.) is greedily eaten by cattle. (Hornem.)

POTERIUM, L. (DC. pr. 2, p. 594.)

1. *caudatum*, Ait. (DC. l. c.;—B. M. 49, t. 2341.) 5 Canaries. Fl. minute, crimson, C. S.; extremely rare.
2. *Sanguisorba*, L. (DC. l. c.;—E. B. 12, t. 860;—Roxb. H. B. p. 68.) 2. Europe. Fl. green, with purple filaments and yellow anthers. H. S.

-
- * *Alchemilla arvensis*, L. E. B. 15, t. 1011. 5 Europe.—*Sanguisorba officinalis*, L.; E. B. 19, t. 1312. 2. Europe.

ORDER CVI.—FABACEÆ, Lindl. Nat. Syst. p. 148. LEGUMINOSÆ.
of others.

THE BRAN TRIBE.

Herbs, under-shrubs, shrubs, or trees, arranged under about 362 genera. Of these, according to DC. pr., B. M. and B. Reg., about 1220 species belong to S. America, Mexico and the W. Indies; (620 Curvembriae, 600 Rect-

embriæ,) 578 to Europe (1 Rect.); 224 to N. America (12 R.); 284 to New Holland and the South Sea Islands (94 R.); 118 to Siberia; 118 to N. Africa (6 R.); 115 to the Levant (3 R.); 78 to Tauria and Caucasus; 80 to tropical Africa (20 R.); 42 to China and Japan (4 R.); 25 to Iberia; 25 to Dahiria (2 R.); 18 to the Canaries; 20 to Bourbon and Mauritius; (3 R.); 14 to Persia; 22 to Madagascar (11 R.); 20 to Arabia (11 R.); 11 to Abyssinia (6 R.); 12 to Timor (7 R.); 3 to Madeira; 2 to Manilla; 1 to the Marianne Islands; and 1 to Melville Island. S. Africa contains 700 species, referred to 80 genera, of which with the exception of *Arachis* and *Voadzeia*, all the papilionaceous ones belong to *Curvembriæ*, and those with regular or subregular flowers to *Rectembriæ*. (*Harvey.*) In the E. Indies, excluding almost entirely Java, have been discovered 891 species, arranged under 133 genera, viz.—

Properties under the several species, as far as India is concerned. :—

A. CURVEMBRIA. Radicle back upon the cotyledons.

A. PAPILIONÆ.

Lobes of the calyx distinct. Stamens perigynous. Corol papilionaceous.

B. SWARTZIÆ.

Calyx bladder-shaped, with indistinct lobes. Stamens hypogynous. Corol none, or of one or two petals.

B. RECTEMBRIA. Radicle bent straight.

A. CÆSALPINÆ.

Petals before opening imbricated. Stamens perigynous.

a. *Geoffrea*. Filaments variously connected.

b. *Cassiaæ*. Filaments distinct.

B. MIMOSÆ.

Sepals and petals before opening valvate. Stamens hypogynous.

§. *Detarieæ*.

Petals none. Fruit drupaceous.

A. PAPILIONÆ.

a. *Phyllotobaæ*.

Cotyledons pushed above ground, becoming green and resembling leaves. Very few bear seeds eaten by man or animals.

a. *Sophoreæ*. Legume continuous. Stamens distinct.

β. *Loteæ*. Legume continuous. Filaments grown together.

γ. *Hedysareæ*. Legume transversely jointed. Filaments nearly always grown together.

b. *Sarcolobaæ*.

Germinate with their cotyledons under ground. Among these only *pulse* is found.

a. *Vicieæ*. Legume many-seeded, opening. Leaves cirriferous; primordial ones alternate.

β. *Phaseoleæ*. Legume many seeded, opening. Leaves not cirriferous, primordial ones opposite.

γ. *Dalbergieæ*. Legume one or two-seeded, not opening. Leaves not cirriferous.

A. SOPHOREÆ, Spreng.

(DC. pr. 2, p. 74.—W. and A. pr. 1, p. 179.)

SOPHORA, L. (DC. o. c. p. 95;—W. and A. l. c.)

1. *glauca*, Leschen. (DC. l. c.;—W. and A. l. c.) 5 Neelgherries. Fl. middle-sized, white, tinged with rose,—H. and R. S.

2. *tomentosa*, L. (DC. pr. 2, p. 95;—W. and A. pr. 1, p. 179;—Roeb. Jl. ind. 2, p. 316;—J. Grah. Cat. B. pl. p. 44;—Lam. ill. t. 325. f. 2;—Rumph. 4, t. 22.) 5 Moluccas. Mauritius. Ceylon. Both Peninsulas of India. Cultivated in Gardens.—Fl. largish, bright yellow, fragrant, and fr. nearly the whole year.—Seeds very bitter, and according to Rumphius, considered a specific in cholera; dose—three or four rubbed up with water. A cold infusion of the root praised in spurious pleuritis, and against all poisons produced from the sea.

β. *occidentalis*; (B. M. 62, t. 3390.—S. *occidentalis*, L.) 5 W. Indies. In H. C. G.

EDWARDSSIA, Salisb. (DC. pr. 2, p. 97.)

1. *mollis*, Royle. (ill. t. 32, f. 2.—*Sophora mollis*, Wall. Cat.—S. *Houghiana*, Wall. Cat.) 5 Hills in the Deyra Dhoon. Sahunsadhara. Sirmore. Fl. middle-sized, yellow, R. S.

2. *maderaspatana*, Wight. 5 Madras. Introduced in 1841.

E. microphylla, Salisb. has been cultivated here, but without success.

The same is to be said of *Virgilia capensis*, Lam.; and *Baptisia australis*, R. Br.

ORMOSIA, Jacks. (DC. pr. 2, p. 97.)

1. *dasyarpa*, Jacks. (trans. Linn. soc. 10, t. 26;—DC. l. c.—*Sophora monosperma*, Swz.—*Podalyria monosperma*, Poir.;—Roxb. H. B. p. 13.) 5 W. Indies. Fl. middle-sized, dark purple, fragrant,—April; fr. O.

? 2. *robusta*, Wight. (*Sophora robusta*, Roxb. H. B. p. 31;—Wight. icon. 1, t. 245.) 5 Assam.—In H. C. G. fl. April; fr. July. (Roxb.)

1. *vulgare*, Savi. (*DC. I. c.*;—*W. and A. I. c.*;—*J. Grah. Cat. B. pl. p.* 52;—*Wight. icon.* 1, t. 57, 203.—*Dolichos Lablab, L.*—*Roxb. fl. ind.* 3, p. 305.) ♂ or ♀. ↗ Fl. and fr. C. S. Commonly cultivated in the Moluccas, both Peninsulas of India. Ceylon. Bengal, (Serampore.) Assam, &c.
- a. *dumetorum*.—(*Dolichos spicatus, Kön.*—*Rumph. 5, t. 141, f. 1.*)
বন শিম *Bun-shim*. Common about Serampore. Fl. smallish, purple. Seeds dark grey, mottled. Not cultivated.
- β. *sepiarium*.—In hedges, near Samulcota. Differs from a in being very downy. Fl. red. Seeds dark grey, mottled. Not cultivated.
- γ. *Annapa*; Roxb.—Coromandel. Whole plant of a heavy disagreeable smell. Much cultivated on the Coast, and yields in a good soil about forty-fold. The seeds bear a low price, compared to most other sorts of grain, and are much eaten by the poorer classes, particularly when rice is dear. They are not palatable, but reckoned wholesome substantial food. Cattle are also fed with the seed, and greedily eat the straw. (*Roxb.*)
- δ. *albiflorum*, (*Dolichos albus, Lour.*—*D. bengalensis, L.*—*Rumph. 5, t. 37.*) খেত শিম *Shwet-shim*. Fl. smallish, white. Cultivated in gardens and supported by poles, often forming arbours about the doors of the poor Natives. The tender pods eaten like French beans; the seeds never. The plant has no disagreeable smell.
- ε. *rubriflorum*; (*Rumph. 5, t. 136.*) জীাশা শিম *Jea-shim*. Cultivated like the last, and much esteemed by the Natives. Fl. red.
- φ. *purpurascens*; গুড়দল শিম *Goordal-shim*. Fl. large, purplish. A larger variety. Cultivated like ε. Legumes broader, with the seeds more remote than any of the other varieties.
- η. *purpureum*, DC. (*pr. 2, p. 401.*—*Dolichos purpureus, Jacq. fragm.* 45, t. 55;—*B. Reg.* 10, t. 830;—*Smith exot. bot.* t. 71.—*D. Lablab, B. M.* 23, t. 896.) রক্ত শিম *Rukto-shim*. Stem and the large flowers purple. Pods deep purple.
2. *culturatum*, DC. (*pr. 2, p. 402;—W. and A. pr.* 1, p. 251.—*Dolichos ligustrinus, Roxb. fl. ind.* 3, p. 307; not L.—*D. culfratus, Thunb.*;—*Willd.*)
♀. ↗ All the varieties of this species are cultivated during the cold season in the gardens and about the doors of the Natives, forming not only cool, shady arbours, but furnishing them with an excellent pulse for their curries, &c. in their tender pods. In short, adds Dr. Rox-

burgh, these and the four last mentioned cultivated varieties of *L. vulgare*, may be called the *kidney-beans of the Asiatics*.

a. rectum; Pods straight; seeds reddish; flowers, white, large, পাখ শিম *Panch-shim*.

b. falcatum minus; Pods falcate, size of the little finger; flowers white, largish. বাষ্পকো শিম *Baghonuko-shim*.

γ. falcatum majus; Pods falcate, much longer than in *β*; flowers purple. দুধ পিটলী শিম *Dood-pituli-shim*.

δ. gladiatum, flore albo; Pods gladiate-clavate, length of the little finger. শাদা জামাই পলি শিম *Sada-jamai-puli-shim*.

ε. gladiatum, flore purpureo; Flowers reddish purple; pods as in *γ*. পিটলী জামাই পলি শিম *Pitulee-jamai-puli-shim*.

φ. macrocarpum; the largest of all. Fl. red; pods 6-8 inches long; seeds black with a white eye. গ্যাচি শিম *Gychi-shim*.

Peninsula of Indiu. Bengal, (Serampore,) &c. Fl. large, rose purplish, R. S.; fr. C. S. Considered by the Natives a poisonous plant.

3. *obtusifolia*, DC. (pr. 2, p. 404;—*W. and A. pr. 1, p. 253*;—*J. Grah. Cat. B. pl. p. 53*.—*Dolichos obtusifolius*, Lam.—*D. rotundifolius*, Vahl.)—Roxb. fl. ind. 3, p. 302;—*Rheed. 8, t. 43.*) ♂ ~ Coromandel. The Concans. Fl. large, bluish rose, R. S.; fr. C. S.

4. *obcordata*, (*Dolichos obcordatus*, Roxb. fl. ind. 3, p. 303.) ♀. ~ China. Fl. large, red violet, odoriferous, R. S.; fr. C. S.

5. *mollis*, Wight and Arn. ♀. Neelgherries. Dindygul.

6. *incana*, Wall. (*Buchanan. 1814.*)

7. *bracteata*, Wall. Goruckpur. Mountains near Ava.

MUCUNA, Adans, (*DC. pr. 2, p. 404*;—*W. and A. pr. 1, p. 253.*)

1. *monosperma*, (*DC. o. c. p. 406*;—*W. and A. o. c. p. 254*;—*J. Grah. Cat. B. pl. p. 53*;—*Wight. icon. 1, t. 35*;—*Hook. Bot. Misc. 2, p. 346*; *suppl. t. 12*.—*Carpopogon monospermum*, Roxb. fl. ind. 3, p. 283.) ♀. ~ Coromandel. Bombay. Khassyia Mountains. Assam. Kheree jungle. Deyra-Dhoon. Fl. large, dark purple, C. S.; fr. H. S. Produces the Brahminee vegetable called *Negro Bean*. (*Dr. Lush.*) Cattle do not eat it.

2. *atropurpurea*, DC. (pr. 2, p. 406;—*W. and A. pr. 1, p. 254*;—*J. Grah. Cat. B. pl. p. 53*.—*Carpopogon atropurpureum*, Roxb. fl. ind. 3, p. 287.) ♀. ~ Courtallum. Travancore. S. Concan. Fl. large, dark-purple, Feb. and March; fr. R. S.

3. *gigantea*, DC. (pr. 2, p. 404;—*W. and A. pr. 1, p. 254*;—*Hook. Bot. Misc. 2, p. 357*; *suppl. t. 14*;—*J. Grah. Cat. B. pl. p. 53*.—*Dolichos giganteus*, Willd.—*Carpopogon giganteum*, Roxb. fl. ind. 3, p. 287;—*Rheed. 8, t. 36.*) ♀. ~ Negapatam. The Concans. Soonderbuns. Fl. large, sulphur-coloured, R. and C. S.; fr. H. S.

4. *pruriens*, Hook. (*Bot. Misc. 2; suppl. t. 18*;—*W. and A. pr. 1, p. 255*;—*J. Grah. Cat. B. pl. p. 53*.—*Carpopogon pruriens*, Roxb. fl. ind. 3, p. 283; excl. syn. L.—*Rheed. 8, t. 35*;—*Rumph. 5, t. 142.*) अल्कुशी *Alkushee*. Cow Itch. ♂ ~ Moluccas. Both Peninsulas of India. Bengal, (Serampore.) Assam. Kheree jungle. Deyrah-Dhoon. Fl. large, dark purple, C. S.; fr. H. S.

5. *utilis*, Wall. (*Wight. icon. 1, t. 280.*) *Pois noir de Bourbon*. ♂ ~ Extensively cultivated in the Mauritius and Van Diemen's Land as a table vegetable, and also as fodder for cattle. Fl. very large, dark purple blackish, R. and C. S.; fr. Feb. and March. Certainly dif-

ferent from No. 4, which has been cultivated in the garden here for many years, without its pods becoming less stinging.

6. *capitata*, W. and A. (*pr. 1*, p. 255, and not DC. who has omitted the plant.—*Carpopogon capitatum*, *Roxb. fl. ind. 3*, p. 284, as to the cultivated plant.) ♂ ~ Native place unknown. In H. C. G.?
7. *nivea*, Buch. (*DC. pr. 2*, p. 406;—*W. and A. pr. 1*, p. 255. *annot.*—*Carpopogon niveum*, *Roxb. fl. ind. 3*, p. 285.) খামাচ *Khamach*. ♂ ~ Bengal, (Serampore.) Fl. very large, white, R. S.; fr. C. S. By removing the exterior velvety skin of the large, fleshy, tender pods, they are, when dressed, a most excellent vegetable for the table, and the full grown beans are scarcely inferior to the large garden beans of Europe. (*Roxb.*)
8. *imbricata*, DC. (*pr. 2*, p. 406.—*Carpopogon imbricatum*, *Roxb. H. B. p. 54.*) ♂ ~ Silhet. In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*)
9. *bracteata*, DC. (*pr. 2*, p. 406.—*Carpopogon bracteatum*, *Roxb. H. B. p. 54.*) ♂ ~ Chittagong. In H. C. G. fl. C. S. (*Roxb.*)

CANTHAROSPERMUM, W. and A. (*pr. 1*, p. 255.)

1. *pauciflorum*, W. and A. (*l. c.*—*Cajan scarabaeoides*, *Pet. Th.*—*Dolichos scarabaeoides*, *L.*;—*Roxb. fl. ind. 3*, p. 315, excl. sp. char. and descript.—*D. medicagineus*, *Roxb. l. c.* excl. syn.—*Rynchosia? scarabaeoides*, *DC. pr. 2*, p. 387.) বানুর কলাই *Banur-kulay*. ♂ ~ Madagascar. Bourbon. Mauritius. Ceylon. Peninsula of India, Bengal. (Serampore,) Khassya and Monghir Hills. Assam. Mussoorie. Nepal. Fl. small, yellow, R. and C. S.; fr. C. S. Eaten by cattle.

CAJANUS, DC. (*pr. 2*, p. 406;—*W. and A. pr. 1*, p. 256.)

1. *indicus*, Spreng. (*syst. 3*, p. 248;—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p. 53.*) অড়ি *Urur*. ♂ Ceylon. Both Peninsulas of India. Bengal, (Serampore.) Assam. Fl. largish, and fr. C. S. Cultivated. The seeds (দাল *dal*) are much esteemed by the Natives, who hold them third in rank among the leguminous seeds. Cattle greedily eat the tender parts of the plant, whether green or dry; the dry wood is excellent fuel, and well adapted for producing fire by friction.
 - α. *flavus*; (*C. flavus*, *DC. l. c.*—*Cytisus Cajan*, *L.*;—*Jacq. Obs. 1*, t. 1;—*Roxb. fl. ind. 3*, p. 325, excl. syn. *Rheed.*)
 - β. *bicolor*; (*C. bicolor*, *DC. l. c.*—*Cytisus Cajan*, *β. Lam.*—*C. Pseudo-cajan*, *Jacq. hort. vind. 2. t. 119.*—*Rheed. 6*, t. 13.)

CYLISTA, Ait. (*DC. pr. 2*, p. 410;—*W. and A. pr. 1*, p. 259.)

1. *scariosa*, Ait. (*DC. l. c.*;—*W. and A. l. c.*;—*Roxb. Corom. 1*, t. 92; *fl. ind. 3*, p. 320;—*J. Grah. Cat. B. pl. p. 54.*) ♂ ~ Mountainous parts of the Circars. Common on the ghauts and hilly parts of the Concan. Abundant in Kennery jungles. Salsette. Fl. middle-sized, yellow, R. and C. S.; fr. C. S.

CYANOSPERMUM, W. and A. (*pr. 1*, p. 259.)

(DC. pr. 2, p. 415;—W. and A. pr. 1, p. 261.)

BUTEA, Kön (DC. pr. 2, p. 414;—W. and A. l. c.)

1. *frondosa*, Roxb. (Corom. 1, t. 21;—fl. ind. 3, p. 244;—DC. pr. 2, p. 415;—W. and A. l. c.;—Hook Bot. miscel. 3, p. 102; suppl. t. 32;—J. Grah. Cat. B. pl. p. 54. *Erythrina monosperma*, Lam.—

- Rheed* 6, t. 16, 17.) ପଲାଶ *Pulash*.—*Palasi*. *Asiat. Res.* 3, p. 469, and 4, p. 229. A venerable and holy tree; gave its name to the celebrated plain of "Plassey" in Bengal. ५ Circars. Negapatam, Travancore. Common in the Concans, Kandesh and Goozerat. Bengal, (Serampore.) Chittagong. Silhet. Khassy Mountains. Assam. Saharunpore. Fl. very large, deep orange, Feb., March and April; fr. May and June.—From fissures and wounds in the bark issues, during the hot season, a beautiful red juice, soon hardening into a ruby coloured, brittle, astringent gum; which, however, soon loses its colour by exposure to the air. Seeds considered anthelmintic by the Natives. An infusion of the flowers of this and the next species dye cotton, previously prepared with alum, a bright yellow, which may be changed by an alkali into deep reddish-orange. (*Roxb.*)
2. *superba*, Roxb. (*Corom.* 1, t. 22;—*fl. ind.* 3, p. 247;—*DC. pr.* 2, p. 415;—*W. and A. pr.* 1, p. 261.) ५ ॐ Circars. Kheree jungle. Deyra Dhoon. Fl. very large, deep orange, scarlet, March; fr. 0. The same gum exudes from fissures in the bark as in No. 1.

CERATONIA, L. (DC. pr. 2, p. 486.)

1. *Siliqua*, L. (DC. l. c.;—B. Repos. 9, t. 567;—Gärtn. fr. 2, p. 310, t. 146, f. 1.) Carob Tree. 5 S. Europe. N. Africa. Levant. Fl. small, brownish yellowish. C. S.; fr. 0. Flesh of the pod of a mild sugary taste, nourishing, gently aperient, and much eaten by the people where the tree grows. In Egypt a syrup is prepared from it, and used to preserve other fruits. (A. Richard.) Prof. Lindley has recommended, through Dr. Royle, the introduction of this tree into the northern parts of India, especially into such places as are occasionally visited by famine. The plant seeking its nourishment under ground, is so independent of surface irrigation and so retentive of life, that according to M. Bové, a tree supposed to be 300 years old, which was cut down during the French invasion of Egypt, sprang up again thirty years after on wells being sunk in its neighbourhood. The crop of the Carob trees is very abundant, some of them yielding from 800 to 900 pounds of pods. Prof. Lindley adds, that during the Peninsula war, the horses of the British cavalry often thrived upon the seeds of the Carob trees. The same is the case with cattle, mules, and asses in Egypt, Syria, and S. Europe. (Loud. encycl. of pl. p. 868.)

HARDWICKIA, Roxb. (DC. pr. 2, p. 486;—W. and A. pr. 1, p. 284.)

1. *binata*, Roxb. (Corom. 3, t. 209;—fl. ind. 2, p. 423;—DC. o. c. p. 487;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 61.) 5 Mountains of Coromandel. Guzelhete-pass. Common in Lulling-pass, between Malligam and Dhoolea. Fl. small, yellowish. Introduced into H. C. G. in 1800, but had not fl. up to 1814.
2. *pinnata*, Roxb. (fl. ind. 2, p. 425;—DC. pr. 2, p. 487;—W. and A. pr. 1, p. 284.) 5 Travancore. Introduced into H. C. G. in 1809, but had not fl. up to 1814.

Ava. Cultivated in gardens. Fl. large, sulphur, R. and C. S.; fr. Feb. and March.

10. *suffruticosa*, Kön. (*DC. pr. 2, p. 496*;—*W. and A. pr. 1, p. 289*.—C. speciosa, *Roxb. H. B. p. 31*.—*Senna speciosa, Roxb. fl. ind. 2, p. 347*.) 5 Deyra Dhoon. Banks of the Irawaddi. Martaban. Tavoy, Singapore. Cultivated in gardens. Fl. large, yellow, the whole year; fr. Feb. and March.
11. *auriculata*, L. (*DC. pr. 2, p. 496*;—*W. and A. pr. 1, p. 290*;—*Roxb. H. B. p. 31*;—*J. Grah. Cat. B. pl. p. 63*.—*Senna auriculata, Roxb. fl. ind. 2, p. 349*.) 5 Ceylon. Coromandel. Sterile tracts of the Deccan and Goozerat.—Fl. large, bright yellow, Oct. Nov. and Dec.; fr. Feb. and March.—Bark astringent, used by the natives to tan and dye leather of a buff colour. (*Roxb.*) Workers in iron employ the root in tempering iron with steel. (*Dr. Gibson.*) Branches made into native tooth-brushes. (*Dr. Burn.*)
12. *biflora*, L. (*DC. pr. 2, p. 495*;—*B. M. 21, t. 810*;—*B. Reg. 16, t. 1310*.) 5 W. Indies. S. America. Fl. large, yellow, C. S.; fr. Feb.
13. *aversiflora*, Herb. (*B. M. 53, t. 2676*.) 5 Brazil. Fl. largish, yellow, C. S.; Feb. and March.
14. *marilandica*, L. (*DC. pr. 2, p. 498*;—*Roxb. H. B. p. 31*.) 5 Temperate N. America. Fl. middle-sized, yellow, R. and C. S.; fr. Feb. and March. Leaves used in N. America as a substitute for Alexandrian Senna.
15. *ligustrina*, L. (*DC. pr. 2, p. 498*;—*B. Reg. 2, t. 109*;—*B. M. 43, t. 1829*;—*Roxb. H. B. p. 32*.) 5 America, from Cayenne to Virginia. Fl. large, yellow-orange, was introduced into H. C. G. in 1800, but had not fl. up to 1814.
16. *frondosa*, Ait. (*DC. pr. 2, p. 496*;—*Roxb. H. B. p. 32*.) 5 Hot parts of America. W. Indies. Introduced into H. C. G. in 1800, but had not fl. up to 1814.
17. *australis*, Sims. (*B. M. 53, t. 2676*;—*B. Reg. 16, t. 1322*.) 5 N. Holland. Fl. largish, bright-yellow, C. S.; fr. 0.
18. *aurata*, Roxb. (*H. B. p. 32*.—*Senna aurata, Roxb. fl. ind. 2, p. 342*.) 5 Malay Islands. Fl. middle-sized, gold-coloured, R. and C. S.; fr. C. S.
19. *hirsuta*, L. fil. (not Desv.—*DC. pr. 2, p. 497*.—C. caracassana, *Jacq. hort. schön. t. 270*.) 5 S. America. Fl. largish, bright-yellow, R. and C. S.; fr. Feb. and March.
20. *occidentalis*, L. (*DC. pr. 2, p. 497*;—*W. and A. pr. 1, p. 200*;—*B. Reg. 1, t. 83*;—*Roxb. H. B. p. 31*;—*J. Grah. Cat. B. pl. p. 63*.—*Senna occidentalis, Roxb. fl. ind. 2, p. 343*.) 5 W. Indies. Hot parts of America. Senegambia. Domesticated nearly all over India. It has like the next species, a most offensive, sickening smell. Leaves purgative.
21. *Tora*, L. (*W. and A. pr. 2, p. 200*;—*J. Grah. Cat. B. pl. p. 63*.—C. obtusifolia, *Burn. ind. p. 95*, excl. syn.—C. foetida, *Salisb.*—C. gallinaria, *Collad.*—*Rumph. 5, t. 97, f. 2*.) 5 Fl. small, yellow, R. and C. S.; fr. C. S. Leaves purgative.

- a. *diffusa*; (C. Tora, DC. pr. 2, p. 493;—Roxb. H. B. p. 31.—*Senna Tora*, Roxb. fl. ind. 2, p. 340.) चाकुन्डा Chakunda. Both Peninsulas of India. Ceylon. Moluccas. Bengal, (Serampore.) Assam. Senegambia.
- b. *erecta*; (C. Tagera, Lam.;—DC. pr. 2, p. 494; not L.—C. *toröides*, Roxb. H. B. p. 31.—*Senna toröides*, Roxb. fl. ind. 2, p. 341;—Rheed. 2, t. 43.) Mysore.
22. *Absus*, L. (DC. pr. 2, p. 500;—W. and A. pr. 1, p. 291;—Roxb. H. B. p. 31.—*Senna Absus*, Roxb. fl. ind. 2, p. 340;—Burm. zeyl. t. 97.) ♂ Ceylon. Coromandel. Monghir Mountains. Deyra-Dhoon. Senegambia. Fl. small, yellow, and fr. the whole year.
23. *Chamaecrista*, L. (DC. pr. 2, p. 503;—Roxb. H. B. p. 32.) ♂ W. Indies. Carolina. Virginia. Fl. small, yellow, and fr. nearly whole year.
24. *Burmanni*, DC. (pr. 2, p. 502.—C. *flexuosa*, Burm. fl. cap. prod. p. 12, excl. syn.) ♂ C. G. H. Fl. small, yellow, and fr. C. S.
25. *nictitans*, L. (DC. pr. 2, p. 503;—Roxb. H. B. p. 32.—*Grimaldia assurgens*, Schrank.) ♂ W. Indies. Carolina. Pennsylvania. Fl. small, yellow, R. S.; fr. C. S.
26. *Wallichiana*, DC. (pr. 2, p. 505, excl. syn. Roxb.;—W. and A. pr. 2, p. 292.) 5 Peninsula of India. Bengal, (Serampore.) Tavoy. Mussooree. Nepal. Fl. small, yellow, R. S.; fr. C. S.
27. *Telfairiana*, Wall. (Cat.) 5 Mauritius. Fl. small, yellow, and fr. the whole year.
28. *angustissima*, Lam. (DC. pr. 2, p. 505;—W. and A. pr. 1, p. 292.—C. *sensitiva*, Roxb. H. B. p. 32.—*Senna sensitiva*, Roxb. fl. ind. 2, p. 353;—Rumph. 6, t. 67, f. 1.) 5 Both Peninsulas of India. Moluccas. Bengal, (Serampore.) Maldah. Assam. Mussooree. Nepal. Fl. small, yellow, R. S.; fr. C. S.
29. *pumila*, Lam. (DC. pr. 2, p. 504;—W. and A. pr. 1, p. 292.—C. *prostrata*, Roxb. H. B. p. 32.—*Senna prostrata*, Roxb. fl. ind. 2, p. 352.) 5 Coromandel. Monghir. Fl. small, yellow. In H. C. G. fl. R. S.; fr. C. S. (Roxb.) Cattle eat it.
30. *Leschenaultiana*, DC. (pr. 2, p. 504.—*Cassia dimidiata*, Roxb. H. B. p. 32.—*Senna dimidiata*, Buch.;—Roxb. fl. ind. 2, p. 352.) ♂ Bengal, (Serampore.) Nepal. Fl. small, yellow, R. S.; fr. C. S.
31. *tenella*, Roxb. (H. B. p. 32.—*Senna tenella*, Roxb. fl. ind. 2, p. 354.) ♂ Bengal, (Serampore.) Fl. small, yellow, R. S.; fr. C. S.
32. *Kleinii*, W. and A. (pr. 1, p. 293;—Rheed. 9, t. 21.) 5 Travancore. Fl. small, yellow. Has been introduced into H. C. G.?
33. *exigua*, Roxb. (H. B. p. 31.—*Senna exiguia*, Roxb. fl. ind. 2, p. 339.) ♂ Bengal. Fl. small, yellow. In H. C. G. fl. R. S.; fr. C. S. (Roxb.)
34. *palmaea*, Wall. (Cat.) Tavoy. Martaban. In H. C. G.
35. *fulgens*, Wall. (Cat.) Native place unknown. In H. C. G.

B. pl. p. 63.*) *Gum Anime Tree. Courbaril Locust Tree.*—L. b S. America. Petals an inch long, here pure white. Filaments here pure white. Fl. June and July; fr. 0. The filamentose, white substance contained in the pods is sweet as honey, and greedily eaten by the Indians, while fresh purgative, but afterwards losing this quality. Between the principal roots of the tree exudes a fine transparent resin, white, yellowish or red, which is collected in large lumps, and called by the English Gum Anime, though, according to Martius, "the genuine Anime is the produce of a species of Icica, and very nearly allied to Elemi." The Courbaril resin (*American Copal, Mart.*) makes the finest varnish that is known, superior even to the Chinese lac. "For this latter use it is dissolved in the highest rectified spirits of wine. It burns readily, and with a clear flame, emitting a grateful and fragrant smell, for which reason it is sometimes ordered by way of fumigation in the chambers of persons labouring with asthmas or suffocative catarrhs. Its vapours not only strengthen the head, but all parts of the body affected with cold. Some apply it outwardly, dissolved in oil or spirits of wine, to strengthen the nerves. An oil may be distilled from it, useful in palsies, and contractions of the sinews. The inner bark is an excellent vermifuge in spirit or decoction. The timber of old trees is reckoned excellent, and is in great request for wheel-work

in sugar mills, particularly for cogs to the wheels, being extremely hard and tough. It is so heavy that a cubic foot weighs a hundred pounds. It also takes a fine polish." (*G. Don.*)

TRACHYLOBIUM, Hayne. (*G. Don's. Mill. dict.* p. 158.)

1. *Lamarckianum*, Hayne. (*G. Don. o. c. p. 159.*—*Hymenæa verrucosa*, *Lam. ill. t. 330, f. 2*; not *Gärtn. nor Lam. dict.*) 5 Madagascar. Fl. an inch long, pure-white, R. S.; fr. C. S.

CSL

- M. Catechuoides, *Roxb. fl. ind.* 2, p. 562.) खुरा गाछ *Khuera-ghach*. 5 Coromandel. Hills about Vear, Salsette; and in some parts of the N. Concan. Yenangheun. Tavoy. Bengal, (Serampore.) Monghir. Rajmahl. Morung Mountains. Assam. Delhi. Nepal. Fl. small, white, H. and R. S.; fr. C. S. The old high-coloured wood, owing to the transference into it of astringent matter, is used for making the astringent extract known under the name of *Catechu*, formerly called *Japan earth*.
2. *Suma*, Buch. (*Mimosa Suma*, *Roxb. fl. ind.* 2, p. 563, excl. syn. Willd.) शैकंता *Shai-kanta*. 5 Bengal, (Serampore, Calcutta.) Fl. small, white, R. S.; fr. C. S.
3. *Sundra*, DC. (pr. 2, p. 458;—*W. and A. pr.* 1, p. 273.—*A. Chundra*, Willd.—*Mimosa Sundra*, *Roxb. Corom.* 3, t. 225; *fl. ind.* 2, p. 562.) 5 Mountains of Coromandel. Soonderbuns. Fl. small, yellow, R. S.; fr. C. S. Wood hard, chocolate-coloured. (*Roxb.*)
4. *ferruginea*, DC. (pr. 2, p. 458;—*W. and A. pr.* 1, p. 273.—*Mimosa ferruginea*, *Roxb. fl. ind.* 2, p. 561.) L. 5 Circars. Courtallum. Fl. small, pale yellow. In H. C. G. fl. H. S.; fr. C. S. (*Roxb.*) Bark very astringent. (*Roxb.*)
5. *latronum*, Willd. (DC. pr. 2, p. 460;—*W. and A. pr.* 1, p. 273;—*J. Grah. Cat. B. pl.* p. 58.—*Mimosa latronum*, *Kön.*;—*L. fil. suppl.* excl. spec. char.;—*Roxb. fl. ind.* 2, p. 559.—*M. cornigera*, *L. suppl.* p. 438.) 5 Coromandel. Common in the barren tracts of the Deccan. Fl. small, fragrant, white, becoming yellowish. In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*)
6. *modesta*, Wall. (*pl. as. rar.* 2, t. 130;—*G. Don's Mill. dict.* 2, p. 412;—*J. Grah. Cat. B. pl.* p. 58.) 5 In the dry Bangur land between Saharunpore and Delhi. Fl. small, white, fragrant. Probably in H. C. G., as the shrub has been introduced from Bengal into the Horticultural Society's Garden at Bombay.
7. *dumosa*, W. and A. (pr. 1, p. 274.—*Mimosa latronum*, *L. fil. suppl.* as to spec. char.—*M. dumosa*, *Roxb. fl. ind.* 2, p. 559.) 5 In the dry Bangur land between Saharunpore and Delhi. Fl. small, whitish, R. and C. S.
8. *lophantha*, Willd. (DC. pr. 2, p. 457;—*B. Reg.* 5, t. 361;—*B. M.* 47, t. 2108.—*Mimosa distachya*, *Vent.*—*M. elegans*, *Andr.*) 5 N. Holland. Fl. small, yellowish. Has been introduced into H. C. G. Fl.?
9. *stipulata*, DC. (pr. 2, p. 469;—*W. and A. pr.* 1, p. 274;—*J. Grah. Cat. B. pl.* p. 58.—*Mimosa stipulata*, *Roxb. H. B.* p. 40.—*M. stipulacea*, *Roxb. fl. ind.* 2, p. 549.) L. 5 Courtallum. Common in the Ghauts, about Kanalla, &c. Banks of the Attrah. Assam. Deyra-Dhoon. Fl. small, white rose-coloured, H. S.; fr. C. S. One of the largest trees of the genus.
10. *Smithiana*, Wall. (*Mimosa Smithiana*, *Roxb. fl. ind.* 2, p. 550.) L. 5 Chittagong. Silhet. Fl. small, white, May; fr. Dec.

11. *arborea*, Willd. (*DC. pr.* 2, p. 469.—*Mimosa arborea*, *L.*—*M. filicifolia*, *Lam.*—*Sloan. hist. Jam.* 2, t. 182, f. 1, 2.) 5 Jamaica. Portorico. Fl. small, pale flesh-coloured. Has been introduced into H. C. G. Fl. ?
12. *amara*, Willd. (*DC. pr.* 2, p. 469;—*W. and A. pr.* 1, p. 274;—*J. Grah. Cat. B. pl.* p. 58?—*Mimosa amara*, *Roxb. Corom.* 2, t. 122; *fl. ind.* 2, p. 548.) 5 Coromandel. Fl. small, yellow, H. S.; fr. C. S. Bark bitter, astringent. (*Roxb.*)
13. *mollis*, Wall. (*pl. as. rar.* 2, t. 177;—*G. Don's Mill. dict.* 2, p. 421.) 5 Himalayas; alt. 6000 f. in 30° N. L. Fl. small, yellow. Has been introduced into H. C. G. Fl. ?
14. *fruticosa*, (*Mimosa fruticosa*, *Roxb. fl. ind.* 2, p. 549.) L. 5 China. Fl. small, white, April; fr. O.
15. *myriophylla*, Grah. (*Wall. Cat.*—*Mimosa microphylla*, *Roxb. fl. ind.* 2, p. 549; not *Acacia microphylla*, Willd.) 5 Khassy Mountains. Fl. minute, greenish yellow. In H. C. G. fl. May and June; fr. March and April. With the bark of this tree the Mountaineers make an intoxicating liquor, which they drink as we do beer. (*Roxb.*)
16. *Wightii*, Grah. (*W. and A. pr.* 1, p. 274.—*Mimosa pulchella*, *Roxb. fl. ind.* 2, p. 548; not *Acacia pulchella*, R. Br.) 5 Malabar. Dindygul. Introduced into H. C. G. by Dr. Berry, in 1804, but had not fl. up to 1814.
17. *odoratissima*, Willd. (*DC. pr.* 2, p. 466;—*W. and A. pr.* 1, p. 275;—*J. Grah. Cat. B. pl.* p. 58.—*A. lomatocarpa*, *DC. o. c.* p. 467.—*Mimosa odoratissima*, *L. suppl.* p. 437;—*Roxb. Corom.* 2, p. 120;—*fl. ind.* 2, p. 546.—*M. marginata*, *Lam.*—*Rheed.* 6, t. 5.) L. 5 Coromandel. The Concans and Neelgherries. Moulmein. Tavoy. Monghir Mountains. Assam. Fl. pale, yellowish, fragrant, May and June; fr. C. S. Timber hard, strong.
18. *elata*, Grah. (*Wall. Cat.*—*Mimosa elata*, *Roxb. fl. ind.* 2, p. 546.) L. 5 Banks of the Irawaddi, and the Attran. Tavoy. Assam. Deyra-Dhoon. Fl. small, white, May and June; fr. C. S. Timber of good quality. (*Royle.*)
19. *Kalkora*, (*Mimosa Kalkora*, *Roxb. fl. ind.* 2, p. 547.) L. 5 Assam. In H. C. G. fl. May and June; fr. C. S.
20. *Sirissa*, Buch. (*A. speciosa*, *Willd.*;—*DC. pr.* 2, p. 467;—*W. and A. pr.* 1, p. 275;—*J. Grah. Cat. B. pl.* p. 58.—*Mimosa speciosa*, *Jacq. ic. rar.* 1, p. 198.—*M. Sirissa*, *Roxb. fl. ind.* 2, p. 544.) शिरीश *Sireesha*. L. 5 Coromandel. Bombay. Paghamew. Chittagong. Bengal, (Serampore.) Soonderbuns. Silhet. Assam. Monghir. Deyra-Dhoon. Fl. small, white, fragrant, H. and R. S.; fr. C. S. Timber large, dark coloured, very hard, close-enough-grained for furniture. Large masses of very pure *gum* are often seen on this tree. (*Roxb.*)
21. *frondosa*, Willd. (*DC. pr.* 2, p. 468;—*W. and A. pr.* 1, p. 275.—*A. Coranja*, *Buch. in Wall. Cat.*) 5 Patna. (*Buch.*) Fl. small, white,

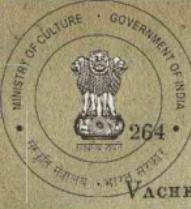

- R. S.; fr. C. S. Pods three to five inches long, 7 lines broad, 10-20 seeded.
22. *glauea*, Willd. (*DC. pr. 2, p. 467*;—*J. Grah. Cat. B. pl. p. 58*.—*Mimosa glauca*, *L.*;—*Roxb. H. B. p. 41.*) L. 5 S. America. Fl. small, white, R. S.; fr. C. S. Common in gardens.
23. *tomentosa*, Willd. (*DC. pr. 2, p. 462*;—*W. and A. pr. 1, p. 276*;—*J. Grah. Cat. B. pl. p. 59*.—*Mimosa tomentosa*, *Roxb. fl. ind. 2, p. 558*;—*Rottl.*—*M. Kleinii*, *Poir.*) शालपंचाइ बाबूल। *Salsain-babula*. 5 Coromandel. Common in Deccan and Kandesh jungles, also in the Sholapore districts. Bengal, (Serampore.) Fl. small, white, rather offensive, C. and H. S.; fr. R. S.
24. *horrida*, Willd. (*DC. pr. 2, p. 460*.—*M. horrida*, *L.*.—*M. leucacantha*, *Javq. Schönb. t. 393*.—*M. eburnea*, *Lam.* not Willd.—*Acacia capensis*, *Burch.*—*Mimosa capensis*, *Burm.*;—*Roxb. H. B. p. 41.*) 5 S. Africa. Arabia. Fl. small, yellow. Introduced into H. C. G. in 1799, but had not fl. up to 1814.
25. *tortuosa*, Willd. (*DC. pr. 2, p. 461*.—*Mimosa tortuosa*, *L.*;—*Roxb. H. B. p. 41.*) 5 Sandy fields of Jamaica. St. Thomas. Fl. small, yellow. Introduced into H. C. G. in 1807, but had not fl. up to 1814.
26. *arabica*, Willd. (*DC. pr. 2, p. 461*;—*W. and A. pr. 1, p. 277*;—*J. Grah. Cat. B. pl. p. 59*.—*Mimosa arabica*, *Lam.*;—*Roxb. Corom. 2, t. 149*;—*fl. ind. 2, p. 557.*) बाबूल। *Babula*. 5 Peninsula of India. Bengal, (Serampore.) Sukanaghur. Saharunpore. Fl. small, bright-yellow, fragrant, May and Oct.; fr. March. Produces, with *A. speciosa*, and *Vachellia Farnesiana*, a gum, which is used as a substitute for Gum Senegal, and Gum Arabic. Wood strong, tough, durable, making excellent knees and crooked timber in ship-building. Bark astringent, used for tanning leather, and to dye various shades of brown. A decoction of the bark employed as a substitute for soap. (Roxb.) Seeds and pods of great value to the shepherd, in the hot season, as food for his flock, when grass is scarce. (Dr. Gibson.) This officer suggested some years ago to plant the waste part of the Deccan with this tree, as it grows rapidly and requires no water.
27. *vera*, J. Bauh. (*DC. pr. 2, p. 461*.—*Mimosa nilotica*, *L.*) True *Acacia* or *Gum Arabic-tree*. *Egyptian thorn*. 5 Africa, from Senegal to Egypt. Fl. small, yellow. Has been introduced into H. C. G. Fl.?
28. *leucophleæa*, Willd. (*DC. pr. 2, p. 462*;—*W. and A. pr. 1, p. 277*;—*J. Grah. Cat. B. pl. p. 59*.—*A. alba*, *Willd. DC. l. c.*—*Mimosa leucophleæa*, *Roxb. Corom. 2, t. 150*;—*fl. ind. 2, p. 558*.—*M. alba*, *Rottl.*) 5 Coromandel. Common in some parts of the South Mahratta country, and in the Sholapore districts between the Bheema and Krishna. Delhi. Fl. small, pale yellowish, R. S.; fr. C. S. Bark astringent. The natives distil an ardent spirit from it, mixed with

palm-wine and a little coarse sugar. On this account, the trees are farmed in some places from Government. (*Roxb. Law.*)

29. *pennata*, Willd. (*DC. pr. 2, p. 464?*—*W. and A. pr. 1, p. 277*;—*J. Grah. Cat. B. pl. p. 59.*—*A. megaladena, Desv.*;—*DC. o. c. p. 465.*—*Mimosa pennata, L.*; excl. syn.—*M. torta, Roxb. fl. ind. 2, p. 566.*—*M. ferruginea, Rottl.*;—*DC. pr. 2, p. 431.*) L. 5 ↳ Courtallum. Neelgherries. Ceylon. Gutpurba, near Duddi. Paghamew. Fl. small, yellow, R. S.; fr. H. S.
30. *rugata*, Buch. (*A. concinna, DC. ; pr. 2, p. 464*;—*W. and A. pr. 1, p. 277*;—*J. Grah. Cat. B. pl. p. 59.*—*Mimosa concinna, Willd.*;—*Roxb. fl. ind. 2, p. 565.*—*M. rugata, Lam.*;—*DC. pr. 2, p. 431.*—*M. abstergens, Spr.*;—*DC. l. c.*—*M. saponaria, Roxb. ; in E. I. C. mus. t. 498.*—*Burm. zeyl. t. 1.*) रेता Reeta, L. 5 ↳ Peninsula of India. Banks of the Attran. Moulmein. Bengal, (Serampore.) Silhet. Assam. Nepal. Fl. small, white, R. S.; fr. C. S. The thick, succulent legumes are sold in the bazar, and used as soap for washing the hair, &c. They are also employed by the Hindoos for marking the forehead. The leaves are acid, and used in cookery instead of tamarinds. (*Nimmo.*)
31. *Buchananiana*, (*Mimosa pennata, Roxb. fl. ind. 2, p. 565*; excl. syn. Willd.—*A. pennata, Buch. in Wall. Cat.*) L. 5 ↳ Chittagong. Silhet. Assam. In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*)
32. *cæsia*, W. and A. (*pr. 1, p. 278.*—*A. alliacea, Buch.*—*A. Arrar, Buch.*—*A. intscioides, DC. pr. 2, p. 464.*—*Mimosa cæsia, L.*; as to the reference to Plukenet's description; *Roxb. ? fl. ind. excl. syn. Willd.*—*M. tenuifolia, Roxb. H. B. p. 41.*—*Pluk. t. 330, f. 1.*) 5 ↳ Coromandel. Olipur. Monghir. Saharunpore. In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*)
33. *Intsia*, Willd. (*DC. pr. 2, p. 464*;—*W. and A. pr. 1, p. 278*;—*J. Grah. Cat. B. pl. p. 59.*—*Acacia cæsia, Willd.*; excl. syn. Pluk; *DC. pr. 2, p. 465.*—*Mimosa Intsia, L.*;—*Roxb. fl. ind. 2, p. 565.*—*M. cæsia, L.*; excl. syn. Pluk, and therefore the name.—*Rheed. 6. t. 4.*) 5 ↳ Coromandel. Common on the Ghauts and throughout the jungly tracts of the Concan. Nawaubgunj. (Buch.) In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*)
34. *semicordata*, Roxb. (*H. B. p. 40.*) 5 Malabar. Introduced into H. C. G. in 1808, but had not fl. up to 1814.
35. *diluta*, Wall. Nagpur.
36. *Cavalum*, Buch. (*Roxb. H. B. p. 41.*) 5 Bengal. In H. C. G. fr. C. S. (*Roxb.*)

ORDER CVII.—CONNARACEÆ, R. Br.—Lindl. Nat. Syst. p. 157.

Trees or shrubs of 5 genera. Of these, DC. pr. enumerates 7 species for S. America; 8 for Sierra Leona and Owaree; 2 for Madagascar; and 1 for Mauritius. In the E. Indies, our materials mention 6 species of *Connarus*; (Peninsula of India, Chittagong. Silhet.) 1 of *Omphalobium*; (Moluccas.) 5 of *Rourea*; (Ceylon. Silhet. Nicobar Islands,) and 3 of *Tetradium*. (Silhet? Cochin China.) Two species of *Connarus*, (*Roxburghii* and *microphyllus*, Hook. and Arn.) have been found in China. They belong, however, both to *Rourea*, according to W. and A. Properties unknown.

CONNARUS, L. (*DC. pr. 2, p. 84*;—*W. and A. pr. 1, p. 143.*)

1. *paniculatus*, Roxb. (*Jl. ind. 3, p. 139.*) 5 Chittagong. Fl. small, yellow. In H. C. G. fl. June. (*Roxb.*) A large timber-tree.
2. *nitidus*, Roxb. (*H. B. p. 49.*) 5 Silhet. Fl. small, whitish, H. S.; fr. Sept. and Oct.
3. *igneus*, Wall. MSS. 5 Native place? Introduced in 1840.

ROUREA, Aubl. (*W. and A. pr. 1, p. 143.*)

1. *Sookurloontee*, (*Cnestis monadelpha*, Roxb. *Jl. ind. 2, p. 454.*)
শুকুর লুণ্টী *Sookur-loontee*. 5 Chittagong. Silhet. Fl. small, white, fragrant, June and July; fr. Oct.

* *Connarus monocarpus*, L.; Rheed. 7, t. 26. 5 Travancore.—*C. pin-natus*, Lam.; Wight. ill. 1, t. 64. 5 Coromandel, Concan, Goa jungles.—*C. pubescens*, DC. 5 Guiana.—*Omphalobium Lamberti*, DC. 5 Guiana.—*O. (*Cnestis florida*, Jack.)—*R. mimosoïdes*, W. and A. (*Cnestis mimosoïdes*, Jack.) 5 Nicobar Islands.—*Cnestis glabra*, Lam. 5 Mauritius. Bourbon.

ORDER CVIII.—CHRYSOBALANACEÆ, Lindl. Nat. Syst. p. 158.

TRE COCOA-PLUM TRIBE.

Trees or shrubs, referred by Lindl. to 11 genera. Of these, DC. pr. and Spreng. syst. assign 33 species to S. America, Mexico and the W. Indies; 1 to Georgia in N. America; 2 to Sierra Leone; 1 to Senegal; 1 to Bourbon; — to Madagascar; and 1 to New Holland. Two species have been found in India: *Prinsepia utilis*, in the Himalayas, and a *Parinarium*? at Singapore. *Fruit* of several species of Chrysobalanus and Parinarium eatable.

CHYSOBALANUS, L. (*DC. pr. 2, p. 525.*)

1. *Icaco*, L. (*DC. l. c.—Jacq. am. 154, t. 94.*) 5 S. America, and the W. Indies; by the sea-side. Southern parts of N. America. Fl. white. Fruit eatable. Introduced into H. C. G. before 1814. Fl.?

PRINSEPIA, Royle. (*Ill. p. 206.*)

1. *utilis*, Royle. (*o. c. t. 38, f. 1.*) 5 Common on the driest and most barren rocks of the Himalayas, as in the neighbourhood of Muttiana, in N. lat. $31\frac{1}{2}^{\circ}$, and at elevations of 5-6000 feet, where its seeds yield by expression a useful oil. Fl. nearly middle-sized, whitish. Has been in the garden here several years without flowering.

* *Chrysobalanus oblongifolius*, Schott. 5 Brazil.—*C. macrophyllus*, Schott. 5 Brazil.—*Moquilea guianensis*, Aubl. 5 Guiana.—*M. ca-*

CSL

nomensis, Mart. 5 Brazil.—*Conepia guianensis*, Aubl. 5 Guiana.—*C. Parillo*, DC. 5 Guiana.—*Acioa guianensis*, Aubl. 5 Guiana.—*Parinarium campestre*, Aubl. 5 Guiana.—*P. senegalense*, Perr. 5 Senegal.—*P. excelsum*, Hort. Trans. 5 Sierra Leone. Introduced at Goa.—*Grangeria borbonica*, Lam. 5 Bourbon.—*Licania incana*, Aubl. 5 Guiana.—*L. humilis*, Cham. 5 Brazil.—*Hirtella triandra*, Swz. 5 W. Indies. New-Spain.—*H. rugosa*, Pers. 5 St. Domingo. St. Thomas.—*H. hirsuta*, Lam. 5 Cayenne.—*H. racemosa*, Lam. 5 Guiana.

ORDER CIX.—CALYCANTHACEÆ, Lindl. Nat. Syst. p. 159.

THE CAROLINA ALLSPICE TRIBE.

Shrubs, referred by Lindl. to 2 genera: *Calycanthus*, with 3 N. American species; and *Chimonanthus*, with a Japanese one. Properties unimportant.

CALYCANTHUS, L. (DC. pr. 3, p. 2.)

l. floridus, L. (DC. l. c.;—B. M. 14, t. 503;—Roxb. H. B. p. 39.) 5 Shady banks of rivulets of Carolina. Fl. large, dark red-brown, sweetly apple-scented. Wood and roots strongly smelling of Camphor. Introduced into H. C. G. in 1804, but had not fl. up to 1814.

CHIMONANTHUS, Lindl. (DC. pr. 3, p. 2.)

l. præcox, Lindl. (in Wall. Cat.—C. fragrans, Lindl.; B. Reg. 5, t. 404.—*Calycanthus præcox*, L.;—B. M. 13, t. 466;—Roxb. fl. ind. 2, p. 672.) 5 Japan. Fl. large, greenish-white, inside crimson spotted, fragrant, Dec., Jan. and Feb.; fr. 0.

* *Chimonanthus præcox*, β. *grandiflorus*, Lindl. (C. fragrans, β. *grandiflorus*, Lindl.; B. Reg. 6, t. 451.) 5 Japan.

ORDER CX.—CUNONIACEÆ, R. Br.—Lindl. Nat. Syst. p. 161.

Trees or shrubs, by Lindl. referred to 13 or 14 genera. Of these, DC. pr. enumerates 31 species for S. America and the W. Indies; 6 for New Holland and the South Sea Islands; 1 for Madagascar; 1 for Bourbon; 2 for S. Africa; and 4 for Java. Of the latter, 2 belong to *Cunonia*; and 2 to *Arnoldia*. Properties little known.

* *Weinmannia glabra*, L. fil. 5 W. Indies.

ORDER CXI.—SAXIFRAGACEÆ, DC.—Lindl. Nat. Syst. p. 162.

THE SAXIFRAGE TRIBE.

Shrubs or undershrubs, seldom trees, most frequently little elegant herbs, exclusive of *Parnassia*, referred by Lindl. to 28 genera. Of these, DC. pr. assigns about 75 species to Europe; 42 to N. America; 20 to Siberia; 6 to S. America; 5 to Japan; 3 to Caucasus; 3 to Melville Island; 3 to Greenland; 2 to the Levant; 2 to N. Africa; 2 to the Straits of Magellan; 1 to China; 1 to Senegal; 1 to Nubia; 1 to S. Africa; 2 to N. W. Africa; 1 to Madeira; 1 to Iceland; 1 to Spitzbergen; 1 to Dahuria; 1 to Altai; and 1 to the Sandwich Islands. In the E. Indies have been discovered about 34 species, viz. 6 of *Hydrangea*, (Nepal, Java, Assam,) 1 of *Ciamitis*, (Java,) 1 of *Adamia*, (Nepal,) 21 of *Saxifraga*, (Nepal, Khassy Mountains, Peer Punjal, Kunawar,) 1 of *Chrysosplenium*, (Nepal,) 1 of *Tiarella*, (Nepal,) 1 of *Astilbe*, (Nepal,) and 2 of *Vahlia*, (Coast of Coromandel.) Properties of no importance.

HYDRANGEA, L. (DC. 3, p. 13.)

1. *Hortensia*, DC. (*I. c.*; —*J. Grah. Cat. B. pl. p. 84*.—*H. opuloïdes*, Lam.—*H. hortensis*, Sm.; —*B. M. 13, t. 438*; —*Roxb. H. B. p. 34*.) 5 China. Japan. Fl. largish, rose-coloured, C. S.; fr. 0.

ADAMIA, Wall. (DC. pr. 3, p. 16.)

1. *cyanæa*, Wall. (*tent. fl. nep.* 46, *t. 36*; —*pl. as. rar. 3, p. 213*; —*B. M. 58, t. 3046*.) 5 Nepal. Fl. middle-sized, blue. Has been ten years in the garden here, without flowering.

SAXIFRAGA, L. (DC. pr. 3, p. 17.)

1. *ligulata*, Wall. (DC. o. c. p. 38; —*B. M. 62, t. 3406*.) 4. Deyrah-Dhoon. Kemaon. Fl. large, white with a tinge of rose. Has been cultivated here for more than five years, without flowering.

* *Vahlia oldenlandioïdes*, Roxb. ♂ Tranquebar.—*V. viscosa*, Roxb. ♂ Tranquebar.—*Hydrangea quercifolia*, Bartr.; B. M. 25, *t. 975*. 5 Florida.

ORDER CXII.—CRASSULACEÆ, DC.—Lindl. Nat. Syst. p. 163.

THE HOUSE-LEEK TRIBE.

Succulent herbs and shrubs, by Lindl. referred to 22 genera. Of these DC. pr. ascribes to S. America and Mexico 9 species; to N. America 9; to Europe 63; to Siberia 9; to Caucasus 9; to Iberia 2; to Dahuria 2; to the Levant 2; to China 3; to Japan 1; to New Holland 2; to Arabia 3; to Sierra Leone 1; to Madeira 6; to the Canaries 14; to N. Africa 8; and to the Straits of Magellan 1. Adding 4 Köllerias, S. Africa exhibits 304 species, (Harvey); the E. Indies 27; viz. 1 of *Tillaea*?

(Kemaon, Mussooree,) 1 of *Umbilicus*, (Mussooree,) 7 of *Kalanchoe*, (Neelgherries, Nundydroog, Mysore, Bengal, Moluccas, Deyra-Dhoon, Taong-Dong.) 1 of *Bryophyllum*, (Moluccas,) and 17 of *Sedum*, (Himalayas.) Properties unimportant.

SEPTAS, L. (*DC. pr. 3, p. 383.*)

1. *capensis*, L. (*DC. l. c.*) 2. C. G. H. Introduced in 1841.

KALANCHOË, Adans. (*DC. pr. 2, p. 394;*—*W. and A. pr. 1, p. 359.*)

1. *acutiflora*, Haw. (*DC. o. c. p. 395.*—*Vereia acutiflora*, *Andr.*;—*B. Reps.* 10, t. 610.) 5 India. Fl. smallish, white, C. S.

2. *laciniata*, DC. (*pl. grass. t. 100;*—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p. 81.*—*Cotyledon laciniata*, L.—*Roxb. fl. ind. 2, p. 456.*—*Rumph. 5, t. 95.*) **Himsagur**. 5 Moluccas. Java. Mauritius. Bourbon. Hills about Dharwar. Pandooghur Fort, near Wye. Bengal, (Serampore, Patna.) Fl. smallish, bright-yellow, R. S.; fr. C. S.

3. *heterophylla*, W. and A. (*pr. 1, p. 360.*—*Cotyledon heterophylla*, *Roxb. fl. ind. 2, p. 456.*) 5 Mysore. In H. C. G. fl. C. S.; fr. H. S. (*Roxb.*)

4. *teretifolia*, Wall. (*pl. as. rar. 2, t. 166.*) 5 Taong-Dong. Fl. smallish, yellow, C. S.; fr. H. S.

5. *varians*, Haw. (*K. subamplectens*, *Wall. pl. as. rar. 2, t. 167.*) Fl. smallish, yellow, C. S.; Deyra-Dhoon. Sirmore.

BRYOPHYLLUM, Salisb. (*DC. pr. 3, p. 395;*—*W. and A. pr. 1, p. 360.*)

1. *calycinum*, Salisb. (*DC. o. c. p. 396;*—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p. 82;*—*B. ORDER CXIII.—AMYRIDACEÆ, Lindl. Nat. Syst. p. 165.

Fragrant resinous trees or shrubs, by Lindl. referred to 6 genera. Of these, according to DC. pr. and Spreng. syst., 36 species have been found in S. America, Mexico and the W. Indies; 1 in Florida; and 1 in Guinea. Only one species (*Amyris alata*, Spreng.) has been found in S. Africa, (Harvey); and 4 species of *Sabia* in Nepal and the Khassya Mountains.

" All the species of the genus *Copaifera* yield the *Balsam of Copaiava*; but it is not in all of them of equal quality. *Myrospermum peruiferum*, produces a fragrant resin in much use for burning as a perfume, and for medicinal purposes, called the *Balsam of Tolu*. Both it and the *Balsam of Peru* are also yielded, according to Ach. Richard, by *M. toluiferum*." (Lindl.)

SABIA, Colebr. (*Roxb. fl. ind. ed. Carey* 2, p. 308;—*G. Don's Mill. dict.* 2, p. 69.)

1. *lanceolata*, Colebr. (*Roxb. o. c. p. 309*;—*Trans. Linn. soc.* 12, p. 355, t. 14;—*G. Don's Mill. dict. l. c.*) L. 5 Khassya Mountains. Fl. small, greenish, purple dotted, very fragrant, May.
2. *limoniacea*, Wall. (*Cat.*) 5 Khassya Mountains. Introduced here in 1840.

* *Amyris maritima*, Jacq. 5 Jamaica, Cuba.—*A. sylvatica*, Jacq. 5 S. America. St. Domingo. St. Thomas.—*A. brasiliensis*, Spreng. 5 Brazil.—*A. Plumieri*, DC. 5 W. Indies. Produces a sort of Gum-elemi.—*A. pinnata*, H. B. and Kth. 5 Tropical S. America.—*A. bipinnata*, Moç. and Sessé. 5 Mexico.—*Spathelia simplex*, L.; B. Reg. 8, t. 670. 5 Jamaica.—*Tapiria guianensis*, Aubl. 5 Guiana.—*Myrospermum frutescens*, Jacq. 5 Bushy places at Carthagena and St. Martha.—*M. pubescens*, DC. 5 Carthagena. Bark filled with resin, of a very grateful smell and taste.—*M. peruiferum*, DC. 5 Peru. New Granada. Mexico.—*M. toluiferum*, A. Rich. 5 S. America, on the banks of the river Magdalena.—*Copaifera Beyrichii*, Hayne. 5 Brazil.—*C. guianensis*, Desf. 5 Guiana.—*C. Martii*, Hayne. 5 Brazil.—*C. Jacquiniana*, Hayne. 5 Trinidad. Martinique.—*C. multijuga*, Hayne. 5 Brazil. Produces Copaiava-balsam in the greatest abundance. (*Mart.*)

ORDER CXIV.—ANACARDIACEÆ.—Lindl. Nat. Syst. p. 166.

THE CASHEW TRIBE.

Trees or shrubs, rarely climbing, abounding in a resinous, sometimes highly poisonous juice and by Lindl. placed under 36 genera, excluding *Lunanea*, DC. which according to Hooker, is a species of *Sterculia*. Of

these, according to DC. pr. Spreng. Syst. and B. Reg., 46 species have been discovered in S. America, Mexico and the W. Indies; 9 in N. America; 5 in S. Europe; 3 in China and Japan; 3 in Mogador; 2 in Syria; 2 in N. Africa; 1 in the Canaries; 1 in Arabia; 1 in Mauritius; and 2 in the South Sea Islands. Exclusive of 6 species, belonging to other orders, S. Africa exhibits 44 species, (Harvey.) In the E. Indies our materials only mention 53 Anacardiaceæ; viz. 2 species of *Anacardium*; 7 of *Semecarpus*; 2 of *Holigarna*; 6 of *Mangifera*; 7 of *Buchanania*; 2 of *Melanorrhæa*; 2 of *Stagmaria*; 1 of *Gluta*, (Java,) 2 of *Syndesmis*, (Penang, Tavoy,) 1 of *Cambessedea*, W. and A. (Burma,) 1 of *Pistacia*? (Lour.) 1 of *Pegia* (Shevagerry Hills,) 1 of *Solenocarpus*, (Courtallum,) 1 of *Coniogeton*, (Java,) 13 of *Rhus*, (Nepal, Tavoy, Peninsula of India,) 1 of *Phlebochiton* (Khassy Mountains,) 1 of *Odina*, (all over India,) 1 of ? *Triceros*, (Lour.) 1 of ? *Rumphia*, L. (Malabar,) and 1 of ? *Thysanus*, (Lour.) "Wallich's list is very imperfect as regards this order, including only about 25 species. Blume has 23 for Java, excluding Zanthoxylaceæ which he includes in the order." (Wight.) Properties under the several species.

A. ANACARDIEÆ, R. Br.

(DC. pr. 2, p. 62.)

ANACARDIUM, Rottb. (DC. l. c.;—W. and A. pr. 1, p. 168.)

1. *occidentale*, L. (DC. l. c.;—W. and A. l. c.;—Roxb. Fl. Ind. 2, p. 312;—J. Grah. Cat. B. pl. p. 40.—*Acajuba occidentalis*, Gürtn. fr. 1, p. 192, t. 40, f. 2.—*Cassuvium pomiferum*, Lam.;—Rheed. 3, t. 54.—*Rumph.* 1, t. 69.) हिजिनि वादाम *Hijili-badam*. 5 W. Indies. Mexico. S. America. Moluccas. Malabar and Parell Hills. Bombay. Salsette. Penang. Tavoy. Chittagong. Fl. smallish, greenish-red, Feb. and March; fr. R. S. The *Cashew-tree* annually exudes from 5-12 pounds weight of a fine semitransparent *gum*, like gum-arabic, and not inferior to it in virtue or quality. From the body of the tree is procured by tapping or incision a *milky juice*, which will stain linen of a deep black that cannot be washed out again. The *receptacle* of the fruit has an agreeable, acidulous, subastringent flavour, and is eaten like an apple. The juice expressed from it and fermented, yields a pleasant wine, and distilled, affords a spirit, far exceeding arrack or rum. The *Cashew-nut* springs from one end of the receptacle, and has two shells, between which there is a thick inflammable *oil*. This is very caustic, will raise blisters on the skin, and has often been very troublesome to those who have incautiously put the nuts into their mouths to break the shell. It has been used successfully in eating off ring-worms, cancerous, ulcers and corns, but it ought to be applied with caution. The *kernel*, when fresh, has a most delicious taste, and abounds with a sweet milky-juice. When older, it is usually roasted and then eaten as a moderately good substitute for almonds. (G. Don.)

SEMICARPUS, L. (*DC. pr.* 2, p. 62;—*W. and A.* 1, p. 168.)

1. *Anacardium*, L. (*DC. l. c.*;—*γ. W. and A. l. c.*;—*Roxb. fl. ind.* 2, p. 83;—*Corom.* 1, t. 12;—*J. Grah. Cat. B. pl. p. 41.*)—*Anacardium latifolium*, Lam. *ill. t. 208.*—*A. officinarum*, Gürtn. *fr. 1, p. 191, t. 40, f. 1.*) भेला Bhela. L. 5 Coromandel. Common throughout the Concanas, and in Goozerat, (whence, according to Dr. Gibson, a considerable quantity of nuts is exported.) Berar. Silhet. Assam, extending to Deyra-Dhoon and Kyarda. Fl. small, green, May, June and July; fr. Jan. and Feb. The wood of the *Marking-nut Tree* is of no use, partly on account of its softness, and partly because its abundance of acrid juice renders it dangerous to work. Bark mildly astringent, giving out in decoction a deep colour, which dyes brown of various shades. Wounded, it yields a dirty looking, brownish, soft gum, slowly dissolving in the mouth without much taste. The receptacle of the fruit roasted in ashes, is eaten by the natives, and tastes like roasted apples, whereas raw, it is astringent and acrid, leaving a painful sensation for some time on the tongue. The green nuts, well-pounded into a paste, make good bird-lime. The pure black, acrid juice of the nuts is employed by the natives to remove rheumatic pains, aches and sprains, though in tender constitutions it often produces inflammation, doing much more harm than good; but in general the rubbing on of the oil has not this effect, and is then an efficacious remedy. It is generally employed to mark all sorts of cotton-cloth. By a mixture of quick lime and water, the colour is improved, prevented from running, and fixed. (*Roxb.*)

2. *Cassuvium*, Roxb. (*fl. ind.* 2, p. 85.—*Cassuvium silvestre*, Rumph. 1, t. 70.) 5 Moluccas. Fl. small, greenish-yellow. In H. C. G. fl. H. S.; fr. R. S. (*Roxb.*) Tender leaves eaten at Amboina. The acrid juice of the stem employed to varnish shields, canes, &c. (*Rumph.*)
3. *cuneifolius*, Roxb. (*fl. ind.* 2, p. 86;—*J. Grah. Cat. B. pl. p. 41.*) L. 5 Lanowlee Grove, Kandalla. Jungles about Parr. Hindooosthan. Nepal. Introduced into H. C. G. in 1808, but had not fl. up to 1814.
4. *acuminatus*, Wall. (*Cat.*) 5 Chittagong. Introduced here five years ago, but has not fl.
5. *odoratus*, Wall. Royal garden at Ceylon.
6. *humilis*, Wall. Prome.

HOLIGARNA, Roxb. (*DC. pr.* 2, p. 63;—*W. and A. pr.* 1, p. 169.)

1. *longifolia*, Roxb. (*Corom.* 3, t. 282;—*fl. ind.* 2, p. 80;—*DC. l. c.*;—*W. and A. l. c.*;—*J. Grah. Cat. B. pl. p. 41.*—*Rheed.* 4, t. 9.) L. 5 Travancore. Malabar. Hilly wooded parts of the Concan. Chittagong. Assam. Fl. small, whitish, January; fr. May and June. Juice of the wood, very acrid, employed in Malabar for varnishing shields. (*Buch.*)
2. *racemosa*, Roxb. (*fl. ind.* 2, p. 82;—*W. and A. pr.* 1, p. 169, annot.) L. 5 Chittagong. Silhet. Assam. Fl. small, green, Feb. and March; fr. June and July. Juice of the wood acrid.

MANGIFERA, L. (*DC. pr. 2, p. 63;—W. and A. pr. 1, p. 169.*)

1. *indica*, L. (*DC. l. c.;—W. and A. o. c. p. 170;—Roxb. fl. ind. 1, p. 641; ed. Carey. 2, p. 435;—J. Grah. Cat. B. pl. p. 41.*) *M. montana*, Heyne.—*M. domestica*, *Gürtn. fr. 2, p. 95, t. 100.*—*Rheed. 4, t. 1, 2.*—*Rumph. 1, t. 25.*) आम Am. L. ५ All over India, thriving northwards up to Nahn, alt. 4000 f., but its fruit does not ripen there. Fl. small, greenish-yellowish, Feb. and March; fr. May, June and July. Wood dull grey, porous, pretty durable if kept dry, but soon decaying by exposure to wet. In very large old trees, it acquires a light chocolate colour towards the centre of the trunk and larger branches, and is there hard, closer grained, and much more durable. From wounds in the bark issues a soft, reddish-brown *gum-resin*, hardening by age, and then much resembling Bdellium. Fruit too well known to require more than to be mentioned. Kernels large, seemingly containing much nourishment, but only used during times of scarcity and famine, when they are boiled in the steam of water and eaten. (*Roxb.*)
2. *sylvatica*, Roxb. (*fl. ind. 1, p. 644;—ed. Carey. 2, p. 438;—J. Grah. B. pl. p. 41.*) L ५ Khassy Mountains. Assam. Near Kennery Caves, Bombay. Fl. small, white, tinged with rose, Sept. and Oct.; fr. Feb. and March. (*Roxb.*) Fruit eaten by the natives, where the tree grows, though by no means so palatable as even a bad domestic mango; also dried and kept for medicinal purposes. (*Roxb.*)
3. *Gandaria*, Roxb. (*H. B. p. 18.*) Moluccas. Introduced into H. C. G. in 1803, but had not fl. up to 1814.

CAMBESSEDEA, W. and A. (*pr. 1, p. 170, annot.*;—not Kth.)

1. *oppositifolia*, W. and A. (*Mangifera oppositifolia, Roxb. fl. ind. 1, p. 640;—ed. Carey. 2, p. 434;—J. Grah. Cat. B. pl. p. 41.*) ५ Rangoon. Fl. small, greenish sulphur, Feb. and March; fr. June and July. Wood reddish, hard, close-grained, and said to be durable. Fruit universally eaten in Burma. (*Roxb.*)

BUCHANANIA, Roxb. (*DC. pr. 2, p. 63;—W. and A. pr. 1, p. 169.*)

1. *latifolia*, Roxb. (*fl. ind. 2, p. 385;—DC. o. c. p. 64;—W. and A. l. c.;—J. Grah. Cat. B. pl. p. 41.*) *Spondias elliptica*, Röttl.) L. ५ Mountains of Coromandel. Common in the Barria jungles, east of Baroda. Jungles near Belgaum. Salsette. Moulmein. Hurdwar. Oude. Valleys of Deyra and Kyarda. Fl. small, greenish-white, Feb. and March; fr. R. S. Wood used for various purposes. Kernels a general substitute for almonds amongst the natives, and sold in the bazars. (*Roxb.*)
2. *angustifolia*, Roxb. (*fl. ind. 2, p. 386;—Corom. 3, t. 262;—DC. pr. 2, p. 64;—W. and A. pr. 1, p. 169;—Wight. icon. 1, t. 101;—J. Grah. Cat. B. pl. p. 41.*) *Spondias simplicifolia*, Röttl.—*Mangifera axillaris*, Lam.—*Cambessedea*, Kth.) ५ Mountains of Coromandel. Adjunta jungles. Fl. small, greenish, May and June; fr. Feb. and March.

3. *lanceæfolia*, Roxb. (*H. B.* p. 32.—*B. lancifolia*, Roxb. *fl. ind.* 2, p. 386;—not *B. lanceolata*, Wight.) L. 5 Chittagong. Introduced into H. C. G. in 1810, but had not fl. up to 1814. *Fruit* eaten by the natives. (*Roxb.*)

MELANORRHEA, Wall. (*pl. as. rar.* 1, p. 9;—*G. Don's Mill. dict.* 2, p. 67.)

1. *usitissima*, Wall. (*o. c. t.* 11, 12;—*G. Don. l. c.*) L. 5 *Varnishing-tree of the Burmese*. Prome. Martaban. Moulmein. Tavoy. Has been in the garden here for five years, but has not flowered yet. This is identical with the majestic *Khen* or varnish-tree of Munipur, which perhaps does not differ from the varnish-tree of the Chinese. The varnish is procurable in great quantities from Munipur, where it is used for painting river-craft, and for varnishing vessels destined to contain liquid. The drug is conveyed to Silhet by the merchants. On being handled it occasions extensive cryspelatous swellings, attended with pain and fever, but never of long duration. In the neighbourhood of Prome, a considerable quantity of varnish is extracted from the tree, but very little at Martaban. Short joints of a thin sort of bamboo, sharpened at one end, and shut up at the other, are inserted in a slanting direction into holes made in the trunk and principal branches, and left there for 24 or 48 hours; after which they are removed, and their contents emptied into a basket previously varnished over. Sometimes a hundred bamboos may be seen sticking into the tree at once during the collecting season, which lasts as long as the tree is destitute of leaves, namely from January until April, and they are renewed as long as the juice will flow. Every article of household destined to contain liquid food is lacquered over with this juice in its pure state or variously coloured, after having previously been prepared with calcined bones. The process of drying is the most difficult part, being effected in a very slow and gradual manner by the varnished articles being placed in subterranean vaults for several months. The drug is also used as size-glue in the process of gilding; nothing more being required than to besmear the surface of the article to be gilded with it, and immediately to apply the gold leaf. The beautiful Pali writing of the religious order of the Burmese on ivory, palm leaves, or metal, is entirely done with this varnish in its native and pure state. (*Wall.*)

PISTACIA, L. (*DC. pr.* 2, p. 64.)

1. *vera*, L. (*DC. l. c.*) 5 Syria, from whence it was introduced into Italy by the emperor Vitellius, when he was legate in that province. It is now found throughout the whole region of the Mediterranean. Fl. small, brownish green. Has been introduced into H. C. G. Fl.? Produces the *Pistachia* or *Pistach* nuts.

2. *Terebinthus*, L. (*DC. pr.* 2, p. 64.) *Venetian or Chian Turpentine-tree*. 5 S. Europe. N. Africa. The resin of this tree is the Chian or

Cyprus-turpentine, generally preferred for medical use to what is obtained from the fir-tribe. Has been introduced into H. C. G. Fl.?

3. *Lentiscus*, L. (*DC. pr. 2, p. 65;—B. M. 45, t. 1967.*) कुम्भ रुबी
Koondoo-roomee. रुबी मस्तिक *Roomee-mastuki*. *Mastick-tree*. 5 S.
 Europe. N. Africa. Fl. small, green. Produces the resin, usually called *Gum Mastick*. Has been introduced into H. C. G. Fl.?

The first of these three species, under the name of *P. officinarum*, was introduced into H. C. G. in 1806, but had not fl. up to 1814.

B. RHIOEÆ.

SUMACHINEÆ. (*DC. pr. 2, p. 66.*)

- RHUS*, L. (*DC. l. c.;—W. and A. pr. 1, p. 172.*)

1. *glabra*, L. (*DC. pr. 2, p. 67.*) 5 N. America, from New England to Carolina, common in fields. Introduced into H. C. G. before 1814. Fl.?
2. *succedanea*, L. (*DC. pr. 2, p. 68;—Roxb. fl. ind. 2, p. 98.*) 5 Japan. Kemaon. Nepal. Fl. small, yellow, Dec. Jan. Feb. and March; fr. March. (*Roxb.*)
3. *vernicifera*, DC. (*pr. 2, p. 68.—R. vernix, L. mat. med. 151;—Thunb. jap. p. 121; not of others. R. juglandifolia, Wall.;—D. Don. pr. fl. nep. p. 248;—not Willd.*) 5 Japan. Kemaon. Nepal. Gurhwal. In H. C. G. Fl.? This is the *Japan varnish-tree*, which is said to be equally poisonous with the next species.
4. *venenata*, DC. (*pr. 2, p. 68.—R. Vernix, L. sp. p. 380.—Toxicodendron pinnatum, Mill. dict. No. 5.*) 5 N. America, from Canada to Carolina in low copses, where it is called *Poison Sumach* or *Poison Wood*. Introduced into H. C. G. in 1801, but had not fl. up to 1814. The whole tree is in a high degree poisonous, and the poison is communicated by touching or smelling any part of it. (*Mill. dict.*)
5. *Bucki-amela*, Roxb. (*fl. ind. 2, p. 99.—R. Amela, G. Don. pr. fl. nep. p. 248.—R. semialata, β. Roxburghii, DC. pr. 2, p. 67.*) 5 Kemaon. Shreenagur. Fl. small, greenish-yellow, Aug. and Sept.; fr. C. S.
6. *copallina*, L. (*DC. pr. 2, p. 68;—Jacq. hort. schönb. t. 341.*) 5 N. America, in dry fields and woods, particularly in a sandy soil, from New Jersey to Carolina. Introduced into H. C. G. before 1814. Fl.?
7. *radicans*, L. (*DC. pr. 2, p. 69;—β. vulgaris, B. M. 43, t. 1806.—Toxicodendron vulgare and volubile, Mill. dict.*) 5 N. America, from Canada to Georgia, common in all woods, fields, and along fences. Introduced into H. C. G. in 1807, but had not fl. up to 1814. Like the preceding species it is poisonous to some persons, but in a less degree.
8. *Toxicodendron*, L. (*DC. pr. 2, p. 69.—Toxicodendron pubescens, Mill. dict.*) 5 N. America, creeping upon walls or trees. Introduced into H. C. G. before 1814. Fl.?

9. *lucida*, L. (*DC. pr. 2*, p. 69;—*Roxb. H. B.* p. 22;—*J. Grah. Cat. B. pl. p. 42.*) 5 C. G. H. Has not fl. here, though cultivated for many years.
10. *paniculata*, Wall. (*Cat.—G. Don's Mill. dict. 2*, p. 73.) 5 Burma.
Fl. small, pale-green, Nov.; fr. H. S.
11. *laevigata*, L. (*DC. pr. 2*, p. 70.—*R. elongata, Jacq. hort. schönbr. t. 344.*) 5 C. G. H. Introduced into H. C. G. in 1799, but had not fl. up to 1814.
12. *parviflora*, Roxb. (*fl. ind. 2*, p. 100;—*DC. pr. 2*, p. 70;—*J. Grah. Cat. B. pl. p. 42.*) 5 Nepal. Kemaon. Fl. minute, greenish-yellowish, May, June and July; fr. 0.
13. *zanzibariensis*, Bojer. 5 Zanzibar. Introduced in 1840.
14. *caustica*, Hook. (*Bot. Beech. p. 15, t. 7*;—*G. Don's Mill. dict. 2*, p. 75.) 5 Chili. Has been introduced into H. C. G. Fl. ?

PHLEBOCHITON, Wall. (*Transact. of med. phys. soc. Calcutta*, 7th vol. 2d part, p. 230.)

1. *extensus*, Wall. (*I. c. p. 231*.—*Robergia hirsuta, Roxb. fl. ind. 2*, p. 455?) L. 5 — Khassy Mountains. Fl. small, white, Feb.; fr. April. Bark and tender parts aromatic.

ODINA, Roxb. (*W. and A. pr. 1*, p. 171.)

1. *Wodier*, Roxb. (*fl. ind. 2*, p. 293;—*W. and A. I. c.*;—*Royle. ill. t. 31, f. 2*;—*Wight. icon. 1, t. 60*;—*J. Grah. Cat. B. pl. p. 42.*) 5 Coromandel Mountains. Malabar Hill, Bombay. Elephanta. Pretty common on the Ghauts. Bengal, (Serampore.) Hindoothan, northwards to the valleys of Deyra and Kyarda. Fl. small, greenish yellowish, externally purplish, Feb. and March; fr. Sept. and Oct. Wood of old trees close-grained, of a deep reddish mahogany colour towards the centre. This coloured part is serviceable for many purposes, and looks well. From wounds in the bark issues a gum which, when dry, is like pieces of dry-glue. (*Roxb.*)

? SCHINUS, L.

1. *terebinthifolius*, Raddi. (*DC. 2*, p. 74.) 5 Brazil.

ORDER CXV.—QUERCACEÆ. (Corylaceæ, Mirb.—Lindl. Nat. Syst. p. 170.)

THE NUT TRIBE.

Trees or shrubs, containing among them the Oak, the Hazel Nut, the Beech, the Hornbeam and the Spanish Chestnut, and by Lindl. referred to 8 genera. Of these, Spreng. syst. enumerates 37 species from N. America; 34 from S. America and Mexico; 21 from Europe; 6 from Japan; 3 from the Levant; 2 from Caucasus and Tauria; 2 from China; 1 from N. Africa, with several others common to Europe and the Orient; and 1 from Terra del Fuego. In the E. Indies, according to our materials, have been discovered 60 species, viz. 2 of *Carpinus*; 2 of *Corylus*; 9 of *Castanea*; 46 of *Quercus*; and 1 of *Lithocarpus*;—most of them from Nepal, Kemaon, the Khassya Mountains, Rungpore, Chittagong, Assam, Darjeeling, Amherst, Penang, Singapore, and Taong-Dong. With Blume's plants of this order we are not acquainted.

CASTANEA, Tournef. (Spreng. syst. 3, p. 761, No. 3123;—Endl. gen. pl. 1, p. 275.) *Chestnut*.

1. *indica*, Roxb. (fl. ind. 3, p. 643;—Wall. pl. as. rar. 2, p. 105;—Wight. icon. 2, t. 417.) 5 Chittagong. Khassya and Nepal Mountains. In H. C. G. fl. Dec.; fr. Sept. Kernels eaten by Europeans and Natives, and may be compared to indifferent filberts. (Roxb.)
2. *vesca*, Gärtn. (fr. 1, p. 181, t. 352;—Spreng. syst. 3, p. 856.—*Fagus Castanea*, L.; E. B. 13, t. 886;—Roxb. H. B. p. 68.) *Common Chestnut Tree*. S. Europe. N. America. Introduced into H. C. G. in 1799, but had not fl. up to 1814.

3. *chinensis*, Spreng. (*syst. 3*, p. 856.—*C. pumila*, Roxb. *fl. ind. 3*, p. 644.—*Fagus Castanea*, Lour.; not L.) 5 China. Cochin China. Introduced into H. C. G. in 1807, but had not fl. up to 1814.
 4. *Roxburghii*, Lindl. (*Wall. pl. as. rar. 2*, p. 106.—*Quercus castanocarpa*, Roxb. *fl. ind. 3*, p. 640.) L. 5 In H. C. G. fl. July and Aug.; fr. Nov. and Dec. (*Roxb.*)
 5. *tribuloides*, Lindl. (*Quercus tribuloides*, Sm.—*Q. ferox*, Roxb. *fl. ind. 3*, p. 639;—*Wight. icon. 1, t. 218.*) L. 5 Khassy and Nepal Mountains. Has been introduced into H. C. G. Fl.?
- QUERCUS, L.** (*Spreng. syst. 3*, p. 761, No. 3124;—*Endl. gen. pl. p. 274.*) *Oak.*
1. *Phellos*, L. (*Spreng. o. c. p. 857*;—*Catesb. car. 1*, p. 16, t. 16;—*Roxb. H. B. p. 68.*) 5 N. America. Introduced into H. C. G. in 1800, but had not fl. up to 1814.
 2. *fenestrata*, Roxb. (*fl. ind. 3*, p. 633;—*Wight. icon. 1, t. 219.*) L. 5 Khassy Mountains. In H. C. G. fl. April and May; fr. Sept. and Oct. (*Roxb.*) *Wood* of good quality.
 3. *lanceifolia*, Roxb. (*fl. ind. 3*, p. 634;—*Wight. icon. 1, t. 212.*) L. 5 Garrow-hills, Assam. In H. C. G. fl. Dec.; fr. Oct. (*Roxb.*) *Wood* light coloured, like the English oak, but harder, and reckoned one of the most durable timbers where it grows. (*Roxb.*)
 4. *lappacea*, Roxb. (*fl. ind. 3*, p. 637;—*Wight. icon. 1, t. 220.*) Khassy Mountains. L. 5. In H. C. G. fl. Dec. and January; fr. Aug. and Sept. (*Roxb.*) *Wood* strong, in colour like that of the common oak, but harder and more close-grained. (*Roxb.*)
 5. *turbinata*, Roxb. (*fl. ind. 3*, p. 636;—*Wight. icon. 1, t. 221, f. 1.*) L. 5 Chittagong. In H. C. G. fl. April and May; fr. Sept. and Oct. (*Roxb.*) *Wood* only used for fuel. (*Roxb.*)
 6. *spicata*, Buch. (*in Rees. cyclop.*;—*Wall. pl. as. rar. 1, t. 46*;—not Humb.—*Q. squamata*, Roxb. *fl. ind. 3*, p. 638;—*Wight. icon. 1, t. 213.*) L. 5 Garrow-hills. Khassy Mountains, Nepal. Chittagong. In H. C. G. fl. Feb.; fr. Oct. (*Roxb.*) *Wood* lighter-coloured than English oak, but equally close-grained, and apparently as strong. (*Roxb.*)
 7. *semiserrata*, Roxb. (*fl. ind. 3*, p. 641;—*Wight. icon. 1, t. 211.*) L. 5 Garrow-hills, Khassy Mountains. In H. C. G. fl. Jan., Feb. and March; fr. Aug. and Sept. (*Roxb.*)
 8. *prinodes*, (=*Q. serrata*, Roxb. *fl. ind. 3*, p. 641;—not Thunb. fl. jap. p. 176.) L. 5 Garrow-hills. In H. C. G. fl. Sept. and Oct. Timber useful. (*Roxb.*)
 9. *pedunculata*, Willd. (*Spreng. syst. 3*, p. 864.—*Q. Robur*, L.;—*E. B. 19, t. 1342*;—*Roxb. H. B. p. 68.*) *Common British Oak.* L. 5 Europe. Introduced into H. C. G. in 1798, but had not fl. up to 1814.

* *Castanea martabanica*, Wall. *pl. as. rar. 2, t. 107.* 5 Amherst.—*C. sphærocarpa*, Lindl. (*Quercus armata*, Roxb.) L. 5 Khassy Mountains.

ORDER CXVI.—BETULACEÆ.—Lindl. Nat. Syst. p. 171.

THE BIRCH TRIBE.

Fine timber trees, or shrubs, referred to 2 genera. Of these, Spreng. syst. assigns 12 species to N. America; 8 to Europe; 2 to Siberia; 2 to S. America and Mexico; and 1 to Terra del Fuego. In the E. Indies have been discovered 11 forms, viz. 8 of *Betula*; and 3 of *Alnus*; all natives of Nepal. 1 (or perhaps 2) species of *Alnus* has been found in S. Africa. (*Harvey*.)

"Their bark is astringent, and sometimes employed as a febrifuge; but they are chiefly valued for their importance as ornaments of a landscape. Their wood is often light, and of inferior quality, but that of the Black Birch of N. America is one of the hardest we know." (Lindl.)

* *Betula nitida*, Don. Nepal.—*B. alnoïdes*, Buch. Nepal.—*B. utilis*, Don. Nepal.—*B. accuminata*, Wall. Silhet.—*Alnus jorullensis*, Kth. Mexico.—*A. ferruginea*, Kth. New Granada.

ORDER CXVII.—SCEPACEÆ.—Lindl. Nat. Syst. 1. p. 171.

Trees, of the following 3 genera containing 4 species. Properties nearly unknown.

LEPIDOSTACHYS, Wall. (*Cat.*—*Lindl. Nat. Syst. p. 441. No. 21*);—*Endl. gen. pl. 1, p. 288.*)

1. *Roxburghii*, Wall. (*Cat.*—*Lindl. l. c.*—*Alnus dioica*, Roxb. fl. ind. 3, p. 580.) L. b Khassa Mountains. In H. C. G. fl. March and April; fr. Sept. and Oct. (Roxb.) Timber hard, and used for various economical purposes. (Roxb.)

* *Scarpa villosa*, Lindl. Moulmein. Banks of the Saluen.—*S. stipulacea*, Lindl. Burma.—*Hymenocardia punctata*, Wall. Cat. Moulmein.

ORDER CXVIII.—HENSLOVIACEÆ.—Lindl. Nat. Syst. p. 173.

Two trees, natives of tropical India, of unknown properties form this family.

* *Henslovia pubescens*, Wall. pl. as. rar. 3, t. 221. Penang.—*H. glabra*, Wall. Cat. Silhet.

ORDER CXIX.—TREWIACEÆ, Lindl. Nat. Syst. p. 174.

Consists of a couple of trees, natives of tropical India.

TREWIA, L. (*Spreng. syst. 3*, p. 895, No. 3195.)

1. *nudiflora*, Spreng. (*syst. 3*, p. 906;—*Roxb. fl. ind. 3*, p. 837;—*J. Grah. Cat. B. pl. p. 185*.—*Tetragastris ossea*, *Gürtu. fr. 2*, p. 130, t. 3. 109, f. 5.—*Rottlera indica*, *Willd. (Serampore.) Fl. small, whitish-greenish, H. S.; fr. R. S. Wood soft and of little value.

2. *atroviridis*, Wall. 5 Penang.

ORDER CXX.—URTICACEÆ, Endl.—Lindl. Nat. Syst. p. 175.

THE NETTLE TRIBE.

Trees, shrubs or herbs, often lactescent, by Gaudichaud referred (adding *Lepurandra*, *Nimmo*) to 66 genera. Of these, Spreng. syst enumerates 142 species from S. America, Mexico and the W. Indies; 20 from New Holland and the South Sea Islands; 18 from N. America; 18 from Mauritius and Bourbon; 12 from Arabia; 13 from Europe; 5 from China; 5 from Japan; 5 from Guinea; 4 from the Canaries; 3 from N. Africa; 3 from the Straits of Magellan; 2 from the Levant; 1 from Persia; 1 from Siberia; 1 from Madagascar; and 1 from Patagonia. Adding 1 *Laurophyllus*, 21 species have been discovered in S. Africa, (*Harvey*), and in the E. Indies, according to Spreng. syst, *Roxb. fl. ind.*, *Wall. Cat.* and *Royl. ill. 298*, viz. of *Urtica* 59; *Böhmeria* 11; *Procris* 21; *Parietaria* 1; *Cannabis* 1; *Antiaris* 1; *Conocephalus* 2; *Morus* 13; *Broussonetia* 1; *Ficus* 167; *Lepurandra* 1; *Dorstenia*? 1; *Artocarpus* 14; *Batis* 2; *Epicarpurus* 1; and *Trophis* 2. Properties under the different species.

12. *suffruticosa*, Roxb. (*fl. ind.* 3, p. 584.) 5 Sumatra. Fl. small, greenish-yellow, R. S.; fr. C. S.
13. *decumana*, Rumph. (*Amb.* 6, t. 20, f. 1;—*Roxb. fl. ind.* 3, p. 587.) 5 Moluccas. Fl. small, greenish, R. and C. S. (*Roxb.*)
14. *pulcherrima*, Roxb. (*fl. ind.* 3, p. 588.) 5 Chittagong. Silhet. Goalpara. Fl. small, greenish, R. S.; fr. C. S.
15. *bicolor*, Roxb. (*fl. ind.* 3, p. 589.) 5 Mountains of Bareilly. In H. C. G. fl. R. S. (*Roxb.*)
16. *nivea*, L. (*Spreng. syst.* 3, p. 843.—*U. tenacissima*, *Roxb. fl. ind.* 3, p. 590.—*Rumph.* 5, t. 79, f. 1.) 5 Sumatra. Moluccas. China. Cochin China. Japan. Mauritius. Silhet. Assam. Fl. small, greenish-yellow, Oct. and Nov. Bark abounding in fibres of very great strength and fineness. (*Roxb.*) To procure them the young shoots are cut down, dried and beaten, after which the rind is stripped off. (*Marsden.*)
17. *crenulata*, Roxb. (*fl. ind.* 3, p. 591; not Pers.) 5 Khassya Mountains. Fl. small, greenish, latter part of R. S. This plant stings dreadfully. Leschenault de la Tour (*Mem. Mus.* 6, p. 362,) happened slightly to touch with his fingers one of its leaves in H. C. G. The consequence was intolerable pain, without any swelling, extending to the armpit, and subsequently producing frequent sneezing, copious

running from the nose, and a contraction of the jaws. The pain abated somewhat after the lapse of two days, but returned in full force when the hand was put into water, and at last disappeared on the ninth day. A similar circumstance occurred, with precisely the same symptoms, to a workman in the Calcutta Garden. This man described the sensation, when water was applied to the stung part, as if boiling oil was poured over him. (*Lindl.*)

18. *involucrata*, Roxb. (*H. B.* p. 67;—*fl. ind.* 3, p. 592; not Sims, *B. M.* vol. 51, t. 2481.) ፩ Malay Islands. In *H. C. G. fl. R. S.* (*Roxb.*)

CSL

D. CANNABIÆ. (Cannabineæ, Bl.)

(Lindl. Nat. Syst. p. 177.)

CANNABIS, L. (Spreng. syst. 3, p. 894, No. 3178;—Endl. gen. pl. 1, p. 286.) Hemp.

1. *sativa*, L. (Spreng. syst. 3, p. 903;—Roxb. fl. ind. 3, p. 772;—J. Grah. Cat. B, pl. p. 187;—Rheed. 10, t. 60. (male,) t. 61. (female.) Cannabis indica, Rumph. 5, t. 77.) *गुन्जा* Gunja. ♂ Siberia. Tauria. Scythia. Thracia. (Herod. 4. 74.) whence the Hemp-plant was introduced into the West by the inhabitants of Marseilles; at least Hiero, the Syracusan, is said (Athen. 5. 40.) to have received it from the river Rhodus for ropes. Fl. small, greenish-white, and fr. the whole year. In India cultivated every where in the plains, near villages, for the sake of the intoxicating liquor called *bhang*, which is prepared from it, also for the leaves which are smoked to cause intoxication. “In the Himalayas it is indigenous, extremely abundant at elevations of 6-7000 feet, and of very luxuriant growth, rising sometimes to a height of ten and twelve feet. Here though it likewise affords an intoxicating drug, it is also known for the tenacity of its fibre, which is employed by the mountaineers in Ghurwal and Sirmore for making a coarse sackcloth, and strong ropes for crossing their rivers.” (Royle.) After so many experiments have been made to discover an efficient substitute for hemp, it is not a little remarkable that no attempts have been made to obtain the plant for commercial purposes, especially as its abundance and use in the North of India were fully known to Dr. Roxburgh, some twenty-six years ago, and by him placed before the public. The Grass-cloth of China would seem to be made of hemp, which the Malays use for sewing-thread and twine, and for making fishing-nets. That the hemp plant is highly narcotic, producing giddiness, symptoms of incipient intoxication, rush of blood to the head, bleeding from the nose, strangury, aphrodisiacal sensations, &c. is well known. Lately, however, it appears, from Dr. O’Shaughnessy’s experiments with the *churru* or hemp-resin, that this substance is an efficient remedy against traumatic tetanus. (On the preparations of the Indian Hemp, or Gunjah, their effects on the animal system in health, and their utility in the treatment of tetanus, and other convulsive disorders. Calcutta, 1839.)

Mulberry.

1. *alba*, L. (*Spreng. syst.* 1, p. 492;—*Roxb. fl. ind.* 3, p. 594;—*J. Grah. Cat. B. pl.* p. 194.) सुपेड तूत् Suphed-toot. 5 Persia. Asia Minor. Found in gardens in several parts of India. Fl. small, greenish, end of C. S.; fr. March. Much cultivated in S. Europe, for its leaves to feed the silk-worm "Mr. Mutti, an Italian, commenced a plantation of standard trees at the Heera Baugh, near Poona, six or seven years ago, on the principle that as soon as they attained a certain size, their roots would strike beyond the sun's influence, and render little irrigation necessary, at the same time that an equal quantity of leaves would be obtained from an equal space of ground, with the further advantage of growing annual crops between the rows of trees. The experiment has been successful, and small plantations under his direction are now gradually extending over the Deccan. One was made in Bombay, near Parell, of about 2000 trees, by Mr. De Ramos, in 1838. It bids fair to answer expectations. The plants are chiefly of the white St. Helena mulberry, to which Mr. Mutti gives the preference from its rapid growth, the small quantity of water required, and the nourishing qualities of its leaves." (*J. Grah.*) *Morus alba* contains moroxylic acid in combination with lime. (Turner.)

2. *nigra*, L. (*Spreng. syst.* 1, p. 492;—*Roxb. H. B.* p. 67;—*J. Grah. Cat. B. pl.* p. 194.) 5 Persia. Introduced into *H. C. G.* in 1795, but had not fl. up to 1814. It is grown in Egypt for feeding silk-worms. (Macculloch.)
3. *atropurpurea*, Roxb. (*fl. ind.* 3, p. 595;—*J. Grah. Cat. B. pl.* p. 194 ?—*M. rubra*, *Lour.*) 5 China. Fl. small, greenish, Feb.; fr. March and April. Attempts to feed the silk-worm with the leaves of this species have not succeeded. (*Roxb.*)
4. *rubra*, L. (*Spreng. syst.* 1, p. 492;—*Roxb. H. B.* p. 67.) 5 N. America, from Canada to Florida. Fl. small, greenish, Oct. and Nov.
5. *indica*, L. (*Spreng. syst.* 1, p. 492;—*Roxb. fl. ind.* 3, p. 596;—*J. Grah. Cat. B. pl.* p. 194;—*Rumph. auct. t. 5.*) 5 तूत् Toot. 5 Native place unknown. Extensively cultivated in Bengal to feed silk-worms;

the way in which this is done may be learnt from Roxb. l. c. Fl. small, greenish, Feb.; fr. April.

6. *tatarica*, Pall. (*Pers. syn.* 2, p. 557;—*Pall. ross.* 2, p. 9, t. 52;—*Roxb. H. B.* p. 67;—*fl. ind.* 3, p. 598.) 5 Banks of the Wolga and Dnieper. Cultivated in gardens. In H. C. G. fl. Feb. (*Roxb.*)
7. *paniculata*, Roxb. (*fl. ind.* 3, p. 599.—*Urtica fruticosa*, *Bks. Herb.*—*Rumph.* 4, t. 56.) 5 Moluccas. Fl. small, greenish, July; fr. Sept. Taste of the ripe fruit sweetish. (*Roxb.*)
8. *serrata*, Roxb. (*fl. ind.* 3, p. 596.—*M. cuspidata*, *Wall. Cat.*) 5 Kamaon. Sirmore, below Mussoorie, and at Simla. Has been in the garden here more than fourteen years without flowering.
9. *multicaulis*, Perrottet. (*M. cucullata*, *Bonafons.*) 5 China. Philippine Islands. In H. C. G. Fl. 2 This species will probably entirely supersede the common white Mulberry for feeding silk-worms. (*Proceedings of Agric. and Hortic. Soc. Calcutta*. 1840, January, p. 9-13.)
- ? 10. *scandens*, Wall. (*Cat.*—*J. Grah. Cat. B. pl.* p. 194.) 5 China. Fl. small, pale-green, C. S.
11. *bifaria*, Wall. (*Cat.*) In H. C. G. Fl. ?

AMPALIS, Bojer.

1. *madagascariensis*, Bojer. (*Morus mauritiana*, *Jacq. icon. rar.* 3, t. 617.—*Spreng. syst.* 1, p. 492;—*Roxb. fl. ind.* 3, p. 599.—*M. Ampalis*, *Poir.*) 5 Madagascar. Fl. small, green, June and July; fr. Sept. and Oct.

BROUSSONETIA, Vent. (*Spreng. syst.* 3, p. 893, No. 3170;—*Endl. gen. pl.* p. 278.)

1. *papyrifera*, Vent. (*Spreng. syst.* 3, p. 901;—*B. Repos.* 8, t. 488;—*B. M.* 50, t. 2358.—*Papyrius japonica*, *Lam.*; *Poir.*—*Morus papyrifera*, *L.*) Paper mulberry tree. 5 Japan. Society Islands. New Zealand. Has been in the garden here more than twelve years without flowering. A kind of paper is manufactured from its bark by reducing it to a pulp, which is afterwards spread into sheets of greater or less thickness. (*Kämpf.*)

G. FICÆ, Gaudich.

(*Lindl. Nat. Syst.* p. 178.)

FICUS, L. (*Spreng. syst.* 3, p. 758, No. 3075;—*Endl. gen. pl.* 1, p. 278.) Fig.

1. *Carica*, L. (*Spreng. syst.* 3, p. 785;—*Gürtn. fr.* 2, p. 66, t. 91, f. 7;—*Roxb. fl. ind.* 3, p. 528;—*J. Grah. Cat. B. pl.* p. 194.) 5 Doomoor. Common cultivated Fig-tree. L. 5 5 S. Europe. N. Africa. Asia Minor. Cultivated in Arabia, Persia, and India. Fruit-receptacles solitary, sessile, turbinate, umbilicated, smooth, appearing March, April and May, ripening in June and July.
2. *triloba*, Buch. (*F. hirsuta*, *Roxb. H. B.* p. 65;—*fl. ind.* 3, p. 528; not Schott.—*F. hirta*, *Roxb. fl. ind.* 3, p. 531; not Vahl.) 5 Silhet.

- Assam. Fruit-receptacles in pairs, axillary, sessile, oval, very hairy, appearing H. S.; ripening R. S. Fruit eaten by the natives where the tree is indigenous. (*Roxb.*)
3. *caricooides*, Roxb. (*fl. ind.* 3, p. 529.) 5 Patna. Gya. Rohilcund. Fruit-receptacles axillary, solitary, long-peduncled, turbinate, umbilicate, wrinkled, appearing and ripening the whole year. Fruit not eatable. (*Roxb.*)
4. *virgata*, Roxb. (*fl. ind.* 3, p. 530; not Reinwardt.) 5 Rohilcund. Kemaon. Sirmore. Fruit-receptacles axillary, solitary, ovate, the size of a pea, longish-peduncled, appearing and ripening the whole year.
5. *urophylla*, Wall. N. E. Bengal.
6. *denticulata*, Vahl. (*symb.* 1, 83.—*enum.* 2, 202; not Bl.—F. *querifolia*, Roxb. *fl. ind.* 3, p. 534.) 5 creeping. Sumatra. Fruit-receptacles axillary, solitary, peduncled, short-oval, warty, the size of a pea, appearing and ripening the whole year.
7. *rubescens*, Vahl. (F. *heterophylla*, *Lam. Spreng. syst.* 3, 785; not L. *fil. ex. Vahl. l. c.*;—*Roxb. fl. ind.* 3, p. 532;—*Rheed.* 3, t. 62.—F. *aquatica*, *Kön. excl. F. heterophylla*, *L. fil.*—*Rheed.* 3, t. 62.) 5 गोरी शिरो गोरी शिरो. 5 Coromandel. Malabar Hill, Bombay. The Ghauts. Bengal, (Serampore.) Silhet. Assam. Fruit-receptacles axillary, paired, peduncled, round-turbinate, the size of a large gooseberry, scabrous, appearing and ripening the whole year. Bark of the root very bitter, given to remove pains in the bowels. (*Roxb.*)
8. *humilis*, Roxb. (*fl. ind.* 3, p. 535.) 5 creeping. Sumatra. Fruit-receptacles paired, axillary, peduncled, the size of a pea, oblong, elevatedly-umbilicate. In H. C. G. appearing and ripening the whole year. (*Roxb.*)
9. *repens*, Roxb. (*fl. ind.* 3, p. 535;—*Spreng. syst.* 3, p. 783.—F. *morfolia*, *Vahl. enum.* 2, 203? not *Forsk*, quæ F. *Forskählii*, Vahl. 196; nor *Lam.* quæ *lateriflora*, Vahl. p. 197, ideoq. *hd.* *Willd.* p. 1150.) 5 भूमि दूमूर भूमि दूमूर. 5 Creeping. Bengal, (Serampore.) Fruit-receptacles axillary, solitary, peduncled, obovate, roughish, the size of the point of the little finger, appearing and ripening the whole year.
10. *pisifera*, Wall. 5 Penang. Fruit-receptacles axillary, solitary, sessile, smooth, the size of a pea, ripening H. S.
11. *radicans*, Roxb. (*fl. ind.* 3, p. 536.) 5 उड्डानीय. 5 radican. Silhet. Fruit-receptacles axillary, solitary or paired, long-peduncled, globular, the size of a black currant; in H. C. G. appearing and ripening the whole year. (*Roxb.*)
12. *diadema*. (F. *biglandulosa*, Wall, not *biglandula*, Bl.) 5 China. C. S.
13. *albinervis*, Wall. Mauritius. H. S.
14. *scabrida*, Wall. Penang. R. S.
15. *mangifolia*, Wall. Penang. R. S.

16. *anabatos*, (Ficus scandens, Roxb. fl. ind. 3, p. 536; not Lam.) 5 Silhet. Fruit-receptacles axillary, paired, longish-peduncled, globular, rough, the size of a black currant; in H. C. G. appearing and ripening the whole year. (Roxb.)
17. *Goolereea*, Roxb. (fl. ind. 3, p. 538.) 5 Hindooosthan. Fruit-receptacles axillary, paired, long-peduncled, nearly globose, downy. Introduced into H. C. G. before 1814. Fl. ?
18. *Wassa*, Roxb. (fl. ind. 3, p. 539;—*Rumph.* 3, t. 94.) 5 Moluccas. Fruit-receptacles axillary, solitary or paired, peduncled, compressedly turnip-shaped, smooth, the size of a gooseberry, appearing in H. C. G. in H. S.; ripening, R. S. (Roxb.)
19. *indica*, L. (*Amoen. acad.* 1, p. 27;—*Roxb. fl. ind.* 3, p. 539;—*J. Grah. Cat. B. pl. p. 189*; not Forsk, nor Lam. or Vahl.—*F. bengalensis*, L. *syst.*;—*Rheed.* 1, t. 28.) बटे But. Banyan-tree. L. 5 radicant. Fruit-receptacles axillary, paired, sessile, as large as a middle-sized cherry, appearing and ripening H. S. Common all over India, in some places of an immense size. Lieut. Colonel Sykes mentions one at the village of Mhow, in the Poonah Collectorate, with 68 stems descending from the branches, and capable of affording shade, under a vertical sun, to 20,000 men. (*Madr. Journ. of Science*, No. 22.) *Kabir Bur*, near Broach, now the gloomy recess of superstitions, and the haunt of its hateful birds, the owls and flying foxes. (*Nimmo.*) Bark smooth, light ash-coloured. Wood light, white, and porous. Leaves used by the Brahmins to eat off, for which purpose they are joined together by inkles. Birdlime is prepared from the tenacious milky juice, which every part of the tree yields in abundance on being wounded. Birds eat the fruit, and the seeds grow the better for having passed through them. If they drop in the axils of the leaves of the Palmyra-tree, (*Borasus flabelliformis*, L.) they grow, and extend their descending parts so as in time to embrace entirely the Palmyra, except its upper parts. In very old ones the top thereof is just seen issuing from the trunk of the Banyan itself, as if it grew from thence, whereas it runs down through its centre, and has its roots in the ground, the Palm being the oldest. (Roxb.)
20. *elastica*, Roxb. (fl. ind. 3, p. 541;—*Spreng. syst.* 3, p. 781;—*J. Grah. Cat. B. pl. p. 190.*) Indian Rubber-tree. L. 5 radicant. Khassy Mountains. Assam. Fruitt-receptacles axillary, paired, sessile, oval, smooth, the size of an olive, appearing, H. S.; ripening, R. S. Every part of this tree abounds in a rich milky juice which furnishes about one-third of its weight of Caoutchouc, a substance also discovered by Dr. Roxburgh in *Ureola elastica*, Roxb., *Willoughbeia edulis*, Roxb., and *Melodinus monogynus*, Forst. With the milky juice the natives paint the insides of their vessels and baskets, and the Caoutchouc furnishes them with candles and flambeaux. (Roxb.) For a circumstantial account of this tree, see Roxb. l. c.

21. *lucifera*, Roxb. (*fl. ind.* 3, p. 545.) L. 5 Silhet. Fruit-receptacles axillary, sessile, oval, smooth, the size of a gooseberry, appearing H. S.; ripening R. S. (*Roxb.*)
22. *religiosa*, L. (*Spreng. syst.* 3, p. 778; not *Forsk.*; — *Roxb. fl. ind.* 3, p. 547; — *J. Grah. Cat. B. pl.* p. 190; — *Rheed.* 1, t. 27; — *Rumph.* 3, t. 91.) অশুথ *Ashwuth*. পিপল *Pippal*. L. 5 Common all over India. Fruit-receptacles axillary, paired, sessile, depressed, the size of a small cherry, appearing H. S.; ripening R. S. Birds are very fond of the fruit, eat it greedily, and often drop the seeds in cracks of buildings, where they vegetate, occasioning great damage if not removed in time. *Wood* light and of little use.
23. *Rumphii*, Bl. (*p.* 437; — *Roxb. H. B.* p. 66; — *fl. ind.* 3, p. 548; not *Bl.*; — *Rumph.* 3, t. 91 and 92.) L. 5 Moluccas. Bengal, (Serampore.) Assam. Kemaon. গ্যাশুথ *Guyashwuth*. Fruit-receptacles axillary, sessile, paired, globular, smooth, the size of a cherry, appearing H. S.; ripening R. S.
24. *Tsiela*, Roxb. (*fl. ind.* 3, p. 849; — *J. Grah. Cat. B. pl.* p. 191; — *Rheed.* 3, t. 68.) L. 5 Mountains and Plains of Coromandel. The Ghauts. Fruit-receptacles axillary, paired, sessile, round-turbinate, smooth, the size of a cherry, in H. C. G. appearing H. S.; ripening R. S. (*Roxb.*)
25. *venosa*, Ait. (*Spreng. syst.* 3, p. 779; not *Willd.* — *F. infectoria*, *Willd.*; — *Roxb. fl. ind.* 3, p. 551; — *J. Grah. Cat. B. pl.* p. 191; — *Rheed.* 3, t. 64.) পাকুড় *Pakoor*. L. 5 The Concans. Bengal, (Serampore.) Fruit-receptacles paired, axillary, sessile, globular, smooth, the size of a pea, appearing H. S.; ripening R. S.
26. *racemifera*, Roxb. (*fl. ind.* 3, p. 560; — *Rumph.* 3, t. 93.) 5 Sumatra. Fruit receptacles solitary, short-peduncled, shortly turbinate, flattish, on compound glomerate racemes, from the woody part of the tree below the leaves, in H. C. G. appearing and ripening throughout the year.
27. *rapiformis*, Roxb. (*fl. ind.* 3, p. 551.) 5 Moluccas. Fruit-receptacles axillary, solitary, short-peduncled, turnip-shaped, the size of a small medlar, appearing in H. C. G. in Sept. and Oct. (*Roxb.*)
28. *excelsa*, Vahl. (*Spreng. syst.* 3, p. 783; — *Roxb. fl. ind.* 3, p. 552; — *J. Grah. Cat. B. pl.* p. 191; — *Rheed.* 3, t. 58.) 5 Moluccas. Peninsula of India. Fruit-receptacles axillary, solitary or paired, peduncled, somewhat turbinate, smooth, the size of a cherry, appearing in June and July; ripening C. S.
29. *vagans*, Roxb. (*fl. ind.* 3, p. 537.) 5 radicant. Chittagong. Silhet. Fruit-receptacles axillary, paired or solitary, long peduncled, nearly globular, the size of a nutmeg, in H. C. G. appearing, H. S.; ripening R. S. (*Roxb.*)
30. *Blumii*, Wall. (F. *exasperata*, *Roxb. fl. ind.* 3, p. 555; not *Vahl.* — *Rumph.* 4, t. 63?) 5 Moluccas. Fruit-receptacles axillary, solitary,

- or paired, peduncled, globular, size of a pea, rough, appearing in Sept.; ripening in Dec. (*Roxb.*)
31. *nitida*, Thunb. (*Spreng. syst.* 3, p. 781;—*J. Grah. Cat. B. pl.* p. 190;—*Rheed.* 3, t. 55.) 5 China. Lower Nepal. Khassya Mountains. Penang. Coromandel. Fruit receptacles lateral, fascicled, globular, sessile, the size of a large pea, smooth, appearing C. S.; ripening H. S. *Fruit* eaten by birds.
32. *polycarpa*, Roxb. (*fl. ind.* 3, p. 556.) 5 Moluccas. Penang. Singapore. Fruit-receptacles in fascicles from the trunk, and large branches, peduncled, globular, scabrous, the size of a large pea, in H. C. G. appearing and ripening R. S. (*Roxb.*)
33. *Roxburghii*, Wall. (*Cat.*—*F. macrophylla*, *Roxb. fl. ind.* 3, p. 556;—not Desf. nor Decaisne.) 5 Chittagong. Silhet. Nepal. Fruit-receptacles collected in bundles near the root of the stem, and on the lower parts of the branches, turnip-shaped, 8-12 ribbed, hairy, as large as the common fig, or larger, when ripe diffusing a strong scent of Russia leather, appearing and ripening throughout the year. *Fruit* eaten by the natives, where the tree is indigenous. (*Roxb.*)
34. *lanceolata*, Roxb. (*fl. ind.* 3, p. 557.) 5 Chittagong. Fruit-receptacles in bundles near the root of the trunk and larger branches, peduncled, warty, compressedly turbinate, deeply umbilicate, the size of a small common fig, appearing and ripening more or less throughout the year.
35. *glomerata*, Roxb. (*Corom.* 2, t. 123;—*fl. ind.* 3, p. 558;—*Spreng. syst.* 3, p. 781;—*J. Grah. Cat. B. pl.* p. 190, excl. syn. L. and *Rheed.*—*Rumph.* 3, t. 94.) जुग्या दूमोर Juguya-doomoore. L. 5 Coromandel. Common about Veer on Salsette, and generally by the banks of water-courses throughout the Concans. Table-land of Mahableshwur. Bengal, (Serampore.) Fruit-receptacles short-peduncled, turbinate, nearly as large as a common fig, downy, umbilicated, appearing and ripening throughout the year. The *fruit* disagreeable, but eaten by the natives. (*Roxb.*)
36. *Cunia*, Buch. (*Roxb. fl. ind.* 3, p. 561.—*F. conglomerata*, *Roxb. o. c.* p. 559;—*J. Grah. Cat. B. pl.* p. 190, excl. syn. *Rumph.*—*Rheed.* 3, t. 61.) 5 Coromandel. The Concans. Taong-Dong. Moulmein. Rajmahl. Oude. Nepal. Fruit-receptacles turbinate, ribbed, pedicelled, the size of a large filbert, hairy, umbilicated, generally in pairs or in threes, on long, procumbent, radical and caudine, compound, leafless branches, appearing and ripening throughout the year.
37. *congesta*, Roxb. (*fl. ind.* 3, p. 560.) 5 Moluccas. Fruit-receptacles short-peduncled, roundish-turbinate, smooth, the size of a filbert, heaped on radical and caudine, short, leafless, ramous branchlets, appearing and ripening throughout the year. (*Roxb.*)
38. *oppositifolia*, Roxb. (*Corom.* 2, t. 124;—*fl. ind.* 3, p. 561; excl. syn. *Rheed.*—*Spreng. syst.* 3, p. 784; excl. syn. *Daemonum*.—*J.*

- Grah, Cat. B. pl. p. 191.) काक घृणूर *Kaku-doomoor*. 5 Coromandel Hills east of Panwell. Kandella. Bengal. (Serampore.) Fruit-receptacles in axillary pairs, peduncled, globular, umbilicated, hairy, the size of a large nutmeg, or on caudine racemes, appearing and ripening throughout the year. This species is, from its being sown by birds, a great destroyer of houses and walls.
39. *Dæmonum*, Kön. MSS. (*Vahl. enum.* 2, p. 198; not Roth.; — *Roxb. fl. ind.* 3, p. 562; — *Spreng. syst.* 3, p. 784.) 5 Coast of the Tanjore Country. Fruit-receptacles in pairs, on long radical racemes, often under ground, or single or in pairs on the trunk and branches, obovate, very hairy, umbilicated, the size of a large nutmeg, in H. C. G. appearing and ripening throughout the year. (*Roxb.*)
40. *Ampelos*, Burm. (*ind.* p. 226.—*F. asperrima*, *Roxb.*; — *Rheed.* 3, t. 60.) Hilly parts of the Concan.
41. *Benjamina*, L. (*Mant.* — *Roxb. fl. ind.* 3, p. 550; — *Rheed.* 1, t. 26.) Kamrup. Peninsula of India.
42. *artocarpifolia*, Wall. Penang. Dec. 1833.

G. DORSTENIÆ, Gaudich.

(*Lindl. Nat. syst.* p. 178.)

DORSTENIA, L. (*Spreng. syst.* 3, p. 758. No. 3074; — *Endl. gen. pl.* 1, p. 278.)

1. *Contrayerva*, L. (*Spreng. syst.* 3, p. 777.—*Plum. ed. Burm.* t. 119; — *Jacq. icon. rar.* 4, t. 614.) 2. Peru, Mexico, and some of the W. India Islands. Fl. most minute, green, on a fleshy receptacle, R. S.; fr. C. S. but not often. Root bitterish, somewhat pungent, with a remarkable overpowering odour, sudorific, formerly used as an antidote to the bites of venomous animals. (Fee.)

H. ARTOCARPEÆ, Gaudich.

(*Lindl. Nat. Syst.* p. 178.)

ARTOCARPUS, L. (*Spreng. syst.* 3, p. 758. No. 3082; — *Endl. gen. pl.* 1, p. 281.)

1. *integrifolius*, L. (*Suppl.*; — *Spreng. syst.* 3, p. 804; — *Roxb. Corom.* 3, t. 250; — *fl. ind.* 3, p. 522; — *B. M.* 55, t. 2833-34; — *J. Grah. Cat. B.* pl. p. 192.—*A. heterophylla*, Lam.—*Rademachia integra*, *Thunb. act. holm.* 36, p. 252.—*Polyphema Jaca*, *Lour.*—*Sitodium caulinorum*, *Gärtn. fr.* 1, p. 345, t. 71, 72; — *Rheed.* 3, t. 26, 27, 28; — *Rumph.* 1, t. 30, 31.) कट्टिका Kantal. Jack-fruit. Entire-leaved Bread-fruit. 5 Moluccas. Both Peninsulas of India, Ceylon, Bengal, (Serampore.) Much cultivated. Fl. very minute, greenish or (the male) white, crowded on a large receptacle, so as to form an amentum, Jan. and Feb.; fr. May, June and July. Wood hard, approaching in appearance to mahogany, much used for furniture in Ceylon, and some other parts of India. The natives prepare their best *birdlime* from the tenacious white juice, which abounds in all the uneatable parts

- of the fruit, and the young tender parts of the tree, and flows freely from recent wounds. The large *fruit*, which grows from the trunk and larger branches, forms to the natives, f. ex. in Ceylon, a considerable article of diet. *Seeds*, when roasted, not inferior to the best chestnuts. (Roxb.)
2. *Lacoocha*, Roxb. (*fl. ind.* 3, p. 524;—*J. Grah. Cat. B. pl.* p. 193.)
ଡେଫୁଳ ଡେଫୁଳ Bengal, (Serampore.) Not uncommon in gardens. Fl. minute, internally rose-coloured; aments appearing in March, April and May.; fr. R. S. Whole tree, and unripe fruit containing much tenacious, milky juice. The roots dye yellow. *Male spadix* acid, astringent, eaten by the natives in their curries. *Fruit* eaten by the natives. (Roxb.)
3. *Chaplasha*, Roxb. (*fl. ind.* 3, p. 525.) L. 5 Chittagong. Tipperah. Assam. Aments appearing from Feb. to May; fr. R. S. From this immense tree canoes are made for the Fennee and Gomootee rivers. The wood is also useful for many other purposes, particularly when it is to be employed under water. (Roxb.)
4. *echinatus*, Roxb. (*fl. ind.* 3, p. 527.) *Tamponi*. 5 Malay Islands. In H. C. G. fl. H. S. (Roxb.)
5. *incisus*, L. fil. (*B. M.* 55, t. 2869, 70, 71. a. and β.—*Roxb. fl. ind.* 3, p. 527;—*J. Grah. Cat. B. pl.* p. 192.)

BROSIMUM, Swz. (*Spreng. syst. 1*, p. 6, No. 49;—*Endl. gen. pl. 1, p. 279.*)

1. *Alicastrum*, Swz. (*fl. ind. occ. 1, t. 1, f. 1*;—*Spreng. syst. 1*, p. 22;—*Roxb. H. B. p. 71.*) *Jamaica Bread-nut Tree*. 5 Jamaica. Introduced into H. C. G. in 1804, but had not fl. up to 1814. Abounds in a tenacious, gummy milk. Its leaves and young shoots are much eaten by cattle, but when they become old, they cease to be innocuous. The roasted nuts are used instead of bread, and have much the taste of Hazel nuts. (*Swz.*)

2. *utilis*, Endl. (*l. c.—Galactodendron utilis*, Humb.—*B. M. 66, t. 3723-24.*—*Palo de Vaca*, Humb.) *Cow Tree of the Caracas*. 5 Stem more than twenty feet in circumference at about five feet from the root, running up to a height of sixty feet, perfectly uninterrupted by either leaf or branch, when its vast arms and minor branches, most luxuriantly clothed with foliage, spread on every side, fully twenty-five or thirty feet from the trunk, and rise to an additional elevation of forty feet, so that this stupendous tree is upwards of a hundred feet high. Native place Caracas, more peculiarly on the Cordillera of the shore, at an elevation of about 4000 feet, in dense forests where the thermometer in May is 70°. Incisions made in the trunk of the tree are followed by a profuse flow of gluey, thickish milk, destitute of acridity, of an agreeable balsamic odour, and very nutritious. The negroes and free people, who work in the plantations, soak in it bread made of Maize, Cassava, &c. and generally grow stouter during the season when the Palo de Vaca yields most milk. (*Humb.*) In H. C. G. where, however, it does not thrive.

SUB-ORDER.—CERATOPHYLLEÆ, DC.—Lindl. Nat. Syst. p. 178.

Floating herbs, of 1 genus, and 5-6 species: 2 natives of Europe and 3-4 of the Peninsula of India. One of the latter also common to Egypt. Properties unknown.

CERATOPHYLLUM, L. (*Spreng. syst.* 3, p. 762, No. 3131;—*Endl. gen. pl.* p. 268.)

1. *verticillatum*, Roxb. (*Fl. ind.* 3, p. 624.) ♂ Bengal, (Serampore.) Fl. Feb. and March, most minute; fr. H. S.

ORDER CXXI.—ULMACEÆ, Mirb.—Lindl. Nat. Syst. p. 178.

THE ELM TRIBE.

Trees or shrubs, by Lindl. referred to 6 genera. Of these Spreng. syst. assigns 9 species to S. America, Mexico and the W. Indies; 9 to N. America; 5 to Europe; 2 to Caucasus; 1 to Dauria; 1 to Siberia; and 1 to Senegambia. In the E. Indies have been discovered according to Spreng. Wall. Cat. and Royl. ill. 5 species of *Ulmus*; (Nepal, Kemaon, Kunawur, Hurdwar, Chittagong,) and 13 of *Celtis*; (Nepal, Khassia Mountains, Circars, Penang, Singapore,) How many of the latter must be referred to *Sponia*, we have no means to ascertain.

The Elms are well known in Europe as good timber-trees. The same may be said of those found in India and its mountains. (Royl.)

ULMUS, L. (*Spreng. syst.* 1, p. 532, No. 1099;—*Endl. gen. pl.* 1, p. 276.)

Elm.

1. *integrifolia*, Roxb. (*Corom.* 1, t. 78;—*fl. ind.* 2, p. 68;—*Spreng. syst.* 1, p. 931;—*J. Grah. Cat. B. pl.* p. 188.) L. ♂ Circar Mountains. Hurdwar. Foot of the Himalayas. Malabar Hill, Bombay, Salsette. Ghauts, near Arcot. In H. C. G. fl. C. S. Wood of good quality, and employed for a variety of uses, f. ex. for making carts, door-frames, &c. Forks of the branches used by the natives to protect their straw against cattle.

2. *virgata*, Roxb. (*fl. ind.* 2, p. 67;—*Wall. pl. us. rar.* 3, t. 290.) 5 China. Nepal. Kemaon. Mussooree. Fl. small, orange, Nov.; fr. Feb.

* *Antidesma sylvestre*, Lam. *Rheed.* 5, *t.* 26. 5 S. Concan.—*Falconeria insignis*, Royle, *ill. t.* 98, *f. 2*, 5 Deyra-Dhoon.

ORDER CXXIII.—MYRICACEÆ,—Lindl. *Nat. Syst.* *p.* 179.

THE GALE TRIBE.

Aromatic shrubs or trees, by Lindl. referred to 4 genera. Of these, according to Spreng. syst. 10 species are natives of S. America; 3 of N. America; 4 of S. Africa; 1 of the Azores; 1 of Europe; 4-5 are found in the E. Indies. The latter are 3-4 *Myricas*; (Nepal Mountains, Singapore, Peninsula of India,) and 1 *Putranjiva*, (Assam, and Khassyá Mountains, Oude, Coromandel.) Royle observes that *Myrica sapida* is in his opinion not distinct from *M. integrifolia*,—*M. esculenta* and *octandra*, Buch. we find only in Spreng. *c. p.* pag. 47 and 48. Are they really distinct from Roxburgh's plant? Properties of no great importance. "Comptonia asplenifolia, Ait. possesses astringent and tonic properties, and is much used in the domestic medicine of the United States in cases of diarrhoea. Barton. 1, *p.* 224. The root of *Myrica cerifera*, L. is a powerful astringent, and wax is obtained in great abundance from its berries." (Lindl.)

MYRICA, L. (*Spreng. syst.* 1, *p.* 374, *No.* 554;—*Endl. gen. pl.* 1, 271.)

1. *integrifolia*, Roxb. (*fl. ind.* 3, *p.* 765.) L. 5 Khassyá Mountains. In H. C. G. fl. December and January; fr. May. Fruit pickled by the natives, and used as a condiment. (Roxb.)
2. *sapida*, Wall. (*tent. fl. nep. t.* 45.) Himalayas, from the Sutlej to Silhet. Fruit agreeably flavoured. Introduced in 1840.

PUTRANJIVA, Wall. (*Endl. gen. pl. 1*, p. 287.)1. *Roxburghii*, Wall. (*Cat.*;—*Royle. ill. t. 100*;—*Endl. ichnogr. t. 19*.

—*Nageia Putranjiva*, *Roxb. fl. ind. 3*, p. 766;—*J. Grah. Cat. B. pl. p. 196*;—*Rheed. 7*, t. 59.) L. 5 Coromandel Mountains. Ravines at Nagotnah and Kandalla. Kennery jungles, Salsette. Jungles to the N. and E. of Belgaum. Concans. Silhet. Assam. Oude. Common along the foot of the Himalayas. Fl. minute, yellow, March and April; fr. January. Wood white, close grained, and very hard. Nuts strung by parents round the necks of their children to keep them in health. (*Roxb.*)

* *M. mexicana*, Willd. Mexico.—*M. xalapensis*, Humb. Mexico.—*M. arguta*, Humb. Mexico.—*M. segregata*, Jacq. Brazil.

ORDER CXXIV.—JUGLANDACEÆ, Lindl. Nat. Syst. p. 180.

THE WALNUT TRIBE.

Trees, referred to 4 genera. Of these Spreng. syst. enumerates 14 species from N. America; 1 from Greece, Asia Minor and Persia; 1 from Caucasus; and 1 from Jamaica and St. Domingo. In the E. Indies Wall. Cat. mentions 6 species: 3 of *Juglans*, (Nepal, &c. Taong-Dong. Tavoy. one of them the common Walnut, and 3 of *Engelhardtia*, (Nepal, Khassya Mountains. Penang. Singapore.) All valuable timber-trees.

JUGLANS, L. (*Spreng. syst. 3*, p. 762, No. 3127.) Walnut.

1. *regia*, L. (*Spreng. syst. 3*, p. 865;—*Lam. ill. t. 781*;—*Roxb. fl. ind. 3*, p. 631.) অঞ্চলিক *Akurot*. 5 Extends from Greece and Asia Minor, over Lebanon and Persia, probably all along the Hindoo Koosh to the Himalayas. Abundant in Cashmere. Sirmore. Kemaon. Nepal. Assam, and the Khassya Mountains. Introduced into H. C. G. in 1795, but had not fl. up to 1814. Walnuts are imported into Bengal from Cashmere, the Himalayas, the Khassya Mountains, &c.

ENGELHARDTIA, Leschen.

1. *Roxburghiana*, Lindl. (*Wall. pl. as. rar. 2*, t. 199.—*Juglans pterococca*, *Roxb. fl. ind. 3*, p. 631.) L. 5 Khassya Mountains. Kamrup forests. Nepal. Tenasserim Coast, &c. Fl. minute, yellowish. In H. C. G. fr. July and Aug. Wood light-coloured, used by turners. Bark thick, dark brown, containing much tannin. (*Roxb.*)

* *Juglans baccata*, L. Jamaica.—*J. arguta*, Wall. Taong-Dong.—*Engelhardtia Colebrookiana*, Lindl.; Wall. pl. as. rar. 3, t. 208. Nepal.—*E. Wallichiana*, Lindl. Penang. Singapore.

ORDER CXXV.—CASUARINACEÆ, (Casuaraceæ, Lindl.
Nat. Syst. p. 181.)

Weeping trees, referred to a single genus, which according to Spreng. syst. contains 13 species: 10 from New Holland and the South Sea Islands; 1 from the Mascarenhas; 1 from E. Africa; and 2 from the E. Indies, one of which is also a native of the South Sea Islands. Timber excellent.

CASUARINA, L. (Spreng. syst. 3, p. 758, No. 3081;—Endl. gen. pl. 1, p. 271.)

1. *equisetifolia*, Forst. (Spreng. syst. 3, p. 803;—Lam. ill. t. 746;—Roxb. H. B. p. 66;—Rumph. 3, t. 57.) 5 Islands of the Pacific Sea. Moluccas. Introduced into H. C. G. before 1814. Here it has not fl. Wood reddish-grey, very heavy, hard. (Rumph.)
2. *nodiflora*, Forst. (Spreng. syst. l. c.) 5 South Sea Islands. Introduced into H. C. G. in 1810. Fl.?
3. *muricata*, Roxb. (fl. ind. 3, p. 519;—Spreng. syst. 3, p. 804;—J. Grah. Cat. B. pl. p. 196.—C. *equisetifolia*, L. suppl. excl. syn. Forst.) L. 5 Coast along the Malayan Peninsula up to Chittagong. Now introduced into every part of the plains of India, where in some places it is completely domesticated, f. ex. in Lower Bengal, about Calcutta, Barrackpore, Serampore, &c. Fl. minute, greenish, Feb. and March; fr. C. S. Wood reddish, of a texture like Toon, but held in no estimation. (Roxb.)
4. *torulosa*, Ait. (Spreng. syst. l. c.) 5 New Holland. Introduced into H. C. G. in 1811. Fl.?
5. *distyla*, Vent. (Spreng. syst. 3, p. 804.) 5 New Holland. Introduced into H. C. G. in 1811. Fl.?

* *Casuarina lateriflora*, Lam. 5 Mascarenhas Islands.

ORDER CXXVI.—DATISCACEÆ, Lindl. Nat. Syst. p. 182.

Herbs, by Lindl. referred to 3 genera: *Datisca*, L.; *Tetrameles*, R. Br.; and *Tricerastes*, Presl. The first has one species in S. Europe, Asia Minor, Iberia, Cashmere and Nepal; and another in Pennsylvania. The second is a Javanese genus. With the third we are not acquainted. Properties unimportant.

DATISCA, L. (Spreng. syst. 3, p. 895, No. 3191.)

1. *cannabina*, L. (Spreng. syst. 3, p. 906;—Lam. ill. t. 823.—D. Nepalensis, Don.?) 2. S. Europe, Asia Minor, Iberia, Kunawar, Cashmeer, Nepal. Has been introduced into H. C. G. Fl.?

* *Tetrameles nudiflora*, R. Br. Horsf. pl. as. rar. 1, p. 79, t. 17. L. 5 Java.

ORDER CXXVII.—LACISTEMACEÆ, Lindl. Nat. Syst. p. 183.

Small trees or shrubs, of 1 genus, and according to Spreng. syst. 5 species, all natives of Brazil and the W. Indies Properties unknown.

- * *Lacistema serrulatum*, Mart. nov. gen. t. 95. ♂ Brazil.—*L. Berterianum*, Mart. ♂ Cuba. St. Domingo.—*L. pubescens*, Mart. nov. gen. t. 94. ♂ Brazil.—*L. myricoides*, Swz. ♂ Jamaica.

ORDER CXXVIII.—CHLORANTHACEÆ, Lindl. Nat. Syst. p. 183.

Herbs or undershrubs, by Lindl. referred to 3 genera: *Ascarina*, Forst. with 1 species from the Society Islands: *Chloranthus*, Swz., with 3 from China and Japan, and 3 from the Khassya Mountains, Java, and Penang; and *Hedyosmum*, Swz. with 5 from the W. Indies and New Granada. The roots of *Chloranthus officinalis* have a fragrant camphorated smell, and an aromatic, somewhat bitter flavour. There seems no doubt that it is a stimulant of the highest order. (*Lindl. from Blum. fl. Jav.*)

CHLORANTHUS, Swz. (Spreng. syst. 3, p. 683, No. 3408;—Endl. gen. pl. 1, p. 265.)

1. *inconspicuus*, Swz. (Spreng. syst. 3, p. 750;—Roxb. H. B. p. 11.—*Nigrina plicata*, Thunb.—*Creodus odorifer*, Lour.) ♂ China. Japan. Fl. small, R. S.; fr. O.

2. *erectus*, Wall. (Cat.) ♂ Khassya Mountains. Assam. In H. C. G. Fl.?

- * *Chloranthus monostachys*, R. Br.; B. M. 48, t. 2190. ♂ China.—*C. brachystachys*, Bl. ♂ Penang.—*Hedyosmum nutans*, Swz. ♂ Jamaica.—*H. arborescens*, Swz. ♂ Jamaica.—*H. hirsutum*, Kth. New Granada.

ORDER CXXIX.—SAURURACEÆ, Lindl. Nat. Syst. p. 184.

Herbs, excluding *Spathium* and *Aponogeton*? referred to 2 genera: *Houttuynia*, with one species from Japan, Nepal, the Khassya Mountains and Cochin China; and *Saururus*, L. with 2 from N. America. Properties unknown.

HOUTTUYNIA, Thunb. (Spreng. syst. 1, p. 138, No. 371;—Endl. gen. pl. 1, p. 267.)

1. *cordata*, Thunb. (Spreng. syst. 1, p. 364;—Thunb. jap. t. 26;—B. M. 54, p. 2731;—Roxb. fl. ind.; ed. Carey, 1, p. 360.—*Polypara* Cochin-

chinensis, *Lour.*) 2. Japan. Nepal. Assam. Khassya Mountains. Cochin China. Has not fl. here. The plant, while young, is used as a potherb by the inhabitants of Nepal, as well as those of Cochin China.

ORDER CXXX.—PIPERACEÆ, Rich.—Lindl. Nat. Syst. p. 185.

THE PEPPER TRIBE.

Herbs, undershrubs or shrubs, by Lindl. referred to 4 genera. Of these, according to Spreng. syst. 188 are natives of S. America, Mexico and the W. Indies; 5 of the Mascarenhas Islands; 3 of the South Sea Islands; 1 of Guinea; and 1 of Carolina. 3-4 species have been discovered in S. Africa, (*Harvey.*) and 48 of *Piper* (Spreng.; Roxb. Wall.) in the E. Indies, Moluccas, Sunda Islands, Ceylon, both Peninsulas of India, the Khassya Mountains, Assam, Nepal, Kemaon. Only a few herbaceous forms belong to the plains. Common Pepper, Cubebs and Betle are well known to every one. *Piper inebrians* is narcotic, and used by the South Sea islanders for preparing an intoxicating drink.

PIPER, L. (*Spreng. syst.* 1, p. 28, No. 130;—*Endl. gen. pl.* 1, p. 265.)

1. *Chaba*, W. Hunt. (*Roxb. fl. ind.* 1, p. 156; *ed. Carey*, 1, p. 158;—*Spreng. syst.* 1, p. 112.—P. Chuvya, *Roxb. H. B.* p. 4;—*Rumph.* 5, t. 116, f. 1.) ଚାଇ Chai. 5 मूल Moluccas. Singapore. Penang. Introduced into H. C. G. in 1808, but had not fl. up to 1814, nor has it fl. here during the last twelve years.

ORDER CXXXI.—SALICACEÆ, Lindl. Nat. Syst. p. 186.

THE WILLOW TRIBE.

Trees or shrubs, of 2 genera: *Salix* and *Populus*. Of these, Spreng. syst. enumerates 75 species from Europe; 36 from N. America; 6 from S. America and Mexico; 3 from Dahuria; 1 from Iberia; 1 from Spitzbergen; 1 from Siberia; 1 from Melville Island; 1 from Japan; 1 from Patagonia; and 1 from Egypt. In the eastern and northern districts of S. Africa have been found several species of *Salix*. That of the Gariep (*S.*

Gariepina, Burch.) is, according to Burchell, one of the greatest ornaments of the noble river whose name it bears, (*Harvey.*) The E. Indies present, according to Wall. Cat. and Royle. ill. 2 species of *Populus*, (Himalayas); and 15 of *Salix*; 2 from Oude; 3 from the Peninsula of India; 1 from Lower Bengal; and the rest from the Himalayas.

The willows and poplars are valuable trees for their timber, or for economical purposes.

SALIX, L. (*Spreng. syst.* 1, p. 28, No. 129;—*Endl. gen. pl.* 1, p. 290.)
Willow.

1. *babylonica*, L. (*Spreng. syst.* 1, p. 99;—*Roxb. fl. ind.* 3, p. 754;—*J. Grah. Cat. B. pl. p. 195.*) *Weeping Willow.* 5 Greece. Asia Minor. Nepal. Cultivated in gardens. Fl. March.
2. *tetrasperma*, Roxb. (*Corom. l. t. 97*;—*fl. ind.* 3, p. 753;—*Spreng. syst.* 1, p. 100;—*J. Grah. Cat. B. pl. p. 195.*) *পানী জমা* *Panee-juma.* 5 Kheree Pass, along the foot of the Mountains, and in other hot parts of India, as Bengal and the Peninsula. In the Presidency of Bombay, the vale of Yena, and other moist places, Mahableshwur; various places of the Southern Mahratta Country. Fl. H. and R. S.

* *Salix glabrescens*, Lindl. Oude. Rohilkund.—*S. urophylla*, Lindl. Oude.—*S. Bonplandiana*, Humb. Mexico.—*S. ægyptiaca*, L. Egypt.—*S. paradox*, Humb. Mexico.—*Populus græca*, Ait. Greece.

ORDER CXXXII.—PLATANACEÆ, Lindl. Nat. Syst. p. 187.

Trees or shrubs of one genus, of which Spreng. syst. enumerates 4 species: 1 from Europe and Asia Minor; 2 from Asia Minor; and 1 from N. America. Wood very valuable.

* *Platanus orientalis*, L. b. S. Europe. Asia Minor. Caucasus. Cashmere.

ORDER CXXXIII.—BALSAMACEÆ, Lindl. Nat. Syst. p. 188.

BALSAMIFLUM, BL.

Tall trees yielding balsam, (*Bl.*) contained in one genus, *Liquidambar*, of which Spreng. syst. enumerates 2 species, one from the warmer parts of N. America; the other from the neighbourhood of Smyrna. A third *Liquidambar cerasifolia*, Griff. (*Sedgwickia cerasifolia* Wall. et Griff.) is found in the E. Himalayas and Assam. “The fragrant resin Storax is yielded by several species of Liquidambar.” (*Lindl.*)

ORDER CXXXIV.—MONIMIACEÆ, Lindl. Nat. Syst. p. 188.

Aromatic trees or shrubs, by Lindl. referred to 6 genera, of which Spreng. syst. enumerates 3 species from Madagascar and the Mascarenhas Islands; and 6 from S. America.

" All the parts of the bark and leaves exhale an aromatic odour, which is compared by travellers to that of Laurels or Myrtles. (*DC.*) *Ruizia*, the *Boldu* of Chili produces a succulent fruit which is eaten by the natives. Both the wood and leaves are very fragrant; the former makes a kind of charcoal, which is preferred beyond all other kinds by smiths. (*Bridges.*)" (*Lindl.*)

AMBORA, Juss. (*Endl. gen. pl.* 1, p. 313.)

1. *Tamboirissa*, Lam. (*ill. t.* 784.—*Mithridatea quadrifida*, Willd.—

Roxb. H. B. p. 2.) 5 Madagascar. Mascarenhas Islands. Introduced into H. C. G. in 1810, but had not fl. up to 1814.

* *Monimia rotundifolia*, Pet. Th. Mascarenhas Islands.—*M. ovalifolia*, Pet. Th. Mascarenhas Islands.

ORDER CXXXV.—ATHEROSPERMACEÆ, Lindl. Nat. Syst. p. 189.

Trees, referred by Lindl. to 3 genera: *Atherosperma*, Labill. with 1 species from N. Holland; *Laurelia*, Juss. with 1 from Chili; and *Citrosma*, Ruiz. and Pav., of which Spreng. syst. enumerates 18 species from S. America. Aromatic plants.

* *Atherosperma moschata*, Lindl. 5 New Holland.

ORDER CXXXVI.—PODOSTEMACEÆ, Lindl. Nat. Syst. p. 190.

Herbaceous floating plants, referred by Lindl. to 8 genera, of which Spreng. syst. enumerates 5 species from S. America; 1 from N. America; 2 from Madagascar; and 1 from Etruria, Chili and N. America; 2 species of *Podostemon*, (Wallichii R. Br. et Griffithii, Wall.) have been found on the Khassy Mountains.

* *Mniopsis scaturiginum*, Mart. Brazil.

ORDER CXXXVII.—CALLITRICHACEÆ, Lindl. Nat. Syst. p. 191.

Small annual aquatic herbs of 1 genus, containing, according to DC. 4 species from Europe and N. America. One species has been found on the Neelgherries. Properties unknown.

* *Callitricha verna*, L.; E. B. 11, t. 722. ◎ Europe.

ORDER CXXXVIII.—SANTALACEÆ, R. Br.—Lindl. Nat. Syst.
p. 193.

THE SANDERS-WOOD TRIBE.

Herbs, shrubs or trees, referred to 18-20 genera. Of these Spreng. syst. enumerates 21 species for New Holland; 9 for Europe; 8 for N. America; 2-4 for Chili and Peru; 1 for Patagonia; and 1 for Japan. In S. Africa have been found 40 species, (*Harvey.*) and in the E. Indies, according to our materials, 10; viz. 1-2 of *Thesium*, (Peninsula, Himalayas); 1-2 of *Santalum*; 2 of *Osyris*, (Nepal, Peninsula); 1-2 of *Sphaerocarya*, (Nepal, Khassya Mountains); 1 of *Scleropyrum*, (Malabar); and 1 of *Octarillum*, (Lour.) Properties under *Santalum album*.

SANTALUM, L. (*Spreng. syst. 1, p. 373, No. 538.*)

1. album, L. (*Roxb. fl. ind. 1, p. 442; ed. Carey, 1, p. 462;—J. Grah. Cat. B. pl. p. 177;—B. M. 60, t. 3235;—Buch. journ. Mysore, 1, p. 186 and 202—2, p. 117 and 132—3, p. 192;—W. Griffith. On the ovulum of Santalum album, in Linn. soc. trans. 18 vol. page 59-71.*—*Sandalum album*, *Rumph. 2, t. 11.*) चुंदूंच Chundun. Sandal-Wood. 5 China. Cochin China. Both Peninsulas of India, Assam. Fl. small, first straw-coloured, afterwards deep ferruginous-purple, inodorous, and fr. nearly the whole year. Yields the Sandal-wood of commerce, which is usually cut into billets, and disposed of in that state. It is burnt to perfume temples and dwelling houses, both in China and India. Reduced to powder, it enters into a composition for marking the forehead. (*J. Grah. l. c.*)

* *Osyris nepalensis*, Don. (*O. arborea*, Wall. Cat.) Nepal. Sirmore, Hurdwar.—*O. Wightiana*, J. Grah. Kandalla. Mahableshwur.—*Sphaerocarya edulis*, Wall.; Wight. icon. 1, t. 255. Nepal.—*Scleropyrum Wallichianum*, Arn. Wight. icon. 1, t. 241.

ORDER CXXXIX.—ELÆGNACEÆ, Lindl. Nat. Syst. p. 194.

THE OLEASTER TRIBE.

Trees or shrubs, by Lindl. referred to 4 genera, of which Spreng. syst. assigns 5 species to Japan; 3 to N. America; and 2 to Europe, Asia Minor, Tauria and Egypt. In the E. Indies have, according to Roxb. Wall. Cat. and Royle. ill. been discovered 8 species of *Elæagnus*, (Himalayas, Khassya Mountains, Garroo Hills, Ludak, Neelgherries, Travancore, Ceylon, Sumatra, Java, (one also a native of Japan,) and *Hippophaë conferta*, Wall. a native of the Himalayas. Properties unimportant.

4. *parvifolia*, Wall. (*Royl. ill. p. 323, t. 81, f. 1.*) Nepal. Sirmore. Kemaon. 5 fl. small, white. In H. C. G. Fl.
5. *ferruginea*, Rich. (*Spreng. I. c.*) 5 Java. Neelgherries. Has not fl. here.

* *Elægnus latifolia*, L. Ceylon. Travancore.

ORDER CXL. THYMELACEÆ, Lindl. Nat. Syst. p. 194.

THE MEZEREUM TRIBE.

Shrubs, seldom herbs, by Lindl. referred to 22 genera. Of these Spreng. syst. enumerates for New Holland and the South Sea Islands 46 species; for Europe 22; for S. America, Mexico and the W. Indies 9; for China 3; for Japan 1; for Siberia 2; for Caucasus 2; for Persia 1; for N. Africa 2, exclusive of those common with Europe; for the Levant 2, exclusive of those common with Europe; for N. America 1; and for the Straits of Magellan 1. In S. Africa have been discovered 80 species, (*Harvey.*) and in the E. Indies, according to Wall. Cat. and Royl. ill. 17, viz. 14 of *Daphne*, (Nepal, Khassya Mountains, Darjeeling, South Mahratta Country,) 1 of *Linostoma*, (Khassya Mountains), and 2 of *Cansjera*, (Malabar, Amherst,) to these Spreng. adds *Dais octandra*, L., with which we are not acquainted. For China Wall. Cat. has a new species, *Daphne viridiflora*.

A caustic, skin-blistering, tenacious bark characterises the order. A soft, smooth and tough paper is manufactured in Cochin China and Nepal from the inner bark of *Daphne cannabina*, Lour. The lace bark-tree of Jamaica is of this family.

DAPHNE, L. (*Spreng. syst. 2.*, p. 174, No. 1477.)

1. *viridiflora*, Wall. (*Cat.*) 5 China. Fl. small, pale green and fr. the whole year.

2. indica, L. (*Pers. syn.* 1, p. 435;—*Spreng. syst.* 2, p. 236.) 5 China.
New Holland. Has been introduced into H. C. G. Fl.?

LINOSTOMA, Wall. (*Cat.*)

1. *decandrum*, Wall. (*Cat.*—*Nectandra decandra*, Roxb. *fl. ind.* 2, p. 425.)
L. 5 Silhet. Fl. largish, greenish-white, fragrant. In H. C. G. Fl.?

* *Daphne mexicana*, Spreng. Mexico.—*D. tinifolia*, Swz. Jamaica.—*D. occidentalis*, Swz. Jamaica.—*D. involucrata*, Wall. Khassy Mountains.—*D. eriocephala*, Wall. Neelgherries. Hilly parts of S. Mah-ratta Country. Mahableshwur.—*Cansjera Rheedii*, Gmel. (*C. scandens*, Roxb. Corom. 2, t. 103.) 5 Malabar Hill, Bombay. Elephanta. Salsette. The Ghauts. Circars.—*Lagetta lintearia*, Juss. (Lace-bark-tree.) 5 Jamaica.

ORDER CXLI.—HERNANDIACEÆ, Lindl. *Nat. Syst.* p. 195.

Trees of 2 genera and 4 species: 3 from Moluccas and South Sea Islands and 1 from Guiana. Properties under the species.

HERNANDIA, L. (*Spreng. syst.* 3, p. 759, No. 3097.)

1. *ovigera*, L. (*Spreng. syst.* 3, p. 835, excl. syn. Aubl. and Lam.;—*Gärtn. fr.* 1, p. 193, t. 40, f. 3;—*Roxb. fl. ind.* 3, p. 577.) Arbor ovigera, Rumph. 3, t. 123, as to flowers and fruit.) 5 Moluccas. Fl. small, white, Aug. Sept. and Oct.; fr. H. S.

INOCARFUS, Forst. (*Spreng. syst.* 2, p. 274, No. 1538)

1. *edulis*, Forst. (*Spreng. syst.* 2, p. 285;—*Roxb. fl. ind.* 2, p. 416;—*J. Grah. Cat. B. pl.* p. 106;—*Rumph.* 1, t. 65.) Otaheyte Chestnut-tree. L. 5 Society and Friendly Islands. New Hebrides. Amboyna. Java. Fl. small, very pale yellow, fragrant, H. S.; fr. Aug. and Sept. Kernels edible, but by no means pleasant to the taste. Bark astringent, used in dysentery. The inhabitants of New Guinea smear the heads of their arrows with the expressed resinous juice.

* *Hernandia sonora*, L. (Rumph. 2, t. 85.) 5 Moluccas.—*H. guianensis*, Aubl. 5 Guiana.

ORDER CLII.—AQUILARIACEÆ, Lindl. *Nat. Syst.* p. 196.

THE AGALLOCHUM TRIBE.

Trees containing the following 2 genera and 4 species.

AQUILARIA, Lam. (*Spreng. syst.* 2, p. 281, No. 1669;—*Arn. in Lind. Nat. Syst.* p. 442, No. 24.)

1. *Agallocha*, Roxb. (*fl. ind.* 2, p. 422;—*DC. pr.* 2, p. 59;—*Royle ill. t.* 36, *f.* 1.) 5 Ugoor. Agallochum. Aloe's wood. Agila wood. Eagle

wood. L. 5 Mountainous tracts E. and S. E. of Silhet. Fl. small, green, March and April; fr. R. S. Contains a fragrant resinous substance of a dark colour. It is considered a cordial by some Asiatic nations, and has been prescribed in Europe in gout and rheumatism. (Ainslie.)

* *Aquilaria malaccensis*, Lam. 5 Malacca.—*A. sinensis*, Spreng. L. 5 China.—*Gyrinops Walla*, Gärtn. 5 Ceylon.

ORDER CXLIII.—PROTEACEÆ, Juss.—Lindl. Nat. Syst. p. 197.

Shrubs or trees, by Lindl. referred to 42 or 43 genera. Of these, Spreng. syst. enumerates 219 species for New Holland and the South Islands; 20 for S. America; 1 for Abyssinia; and 1 for the Straits of Magellan. In S. Africa have been found 200 species (*Harvey.*); and in the E. Indies, according to Bennett 11 of *Helicia*, (Khassya Mountains, Java, Singapore, Penang, Tavoy, Martaban.) To these may, perhaps, be added *Cylindria rubra*, Lour. (Cochin China.)

"Of no known use, except as fire wood, for which they are commonly employed at C. G. H. The fruit of *Guevina Asellana*, Mol. is sold like nuts in the markets of Chili." (Lindl.) At least 2 of the Indian species, *Helicia robusta* and *excelsa*, R. Br. are large timber trees.

GUEVINA, Molin.

1. *Avellana*, Mol. (Spreng. syst. 1, 472.) 5 Chili. 1840.
GREVILLEA, R. Br.

1. *robusta*, Cunningham. 5 B. M. 59, 3184. New Holland.

* *Helicia excelsa*, R. Br. L. 5 Chittagong. Coast of Martaban.—*H. attenuata*, R. Br. Penang. Khassya Mountains.—*H. glabrata*, R. Br. Tavoy.—*H. robusta*, Wall. Khassya Mountains.—*Rhopala sessilifolia*, Rich. Guiana.—*R. nitida*, Rudg. Guiana.

ORDER CXLIV.—LAURACEÆ, Lindl. Nat. Syst. p. 200.

THE CINNAMON TRIBE.

Trees, often of great size, seldom shrubs, by Lindl. referred to 45 or perhaps 46 genera. Of these, Spreng. syst. enumerates about 50 for S. America, Mexico, and the W. Indies; 12 for N. America; 7 for Japan; 7 for China, including those of Nees; 7 of New Holland; 3 of the Canaries; 2 of Madagascar; 1 of Mauritius; and 1 of S. Europe. In S. Africa has

been found only one species, *Laurus bullata*, a tall forest tree, whose fine grained, dark coloured wood is much used in cabinet work, under the unpromising name of 'Stinkwood,' so called from the offensive smell of the fresh sawn timber. When made into furniture, the better specimens have much the appearance of Rose-wood, and take a fine polish, (*Harvey.*) In the E. Indies alone, according to Nees, (*Systema Laurinarum*) we find 86 species: viz. 2 of *Polyadenia*; 6 of *Daphnidium*; 1 of *Benzoin*; 1 of *Dodecadenia*; 6 of *Litsæa*; 25 of *Tetranthera*; 1 of *Cylicodaphne*; 1 of *Actinodaphne*; 1 of *Endiandra*; 2 of *Cryptocarya*; 2 of *Beilschmiedia*; 1 of *Cecidodaphne*; 4 of *Machilus*; 8 of *Ocotea*; 3 of *Alseodaphne*; 2 of *Camphora*; and 20 of *Cinnamomum*. The greater part of these inhabit Nepal, the Khassya Mountains, Assam, the Circars, the Neelgherries, the Peninsula of Malacea with the adjacent Islands, the Moluccas, and Java. But few species have been found in the plains. Cinnamon, Camphor, Sassafras, Benzoin, the Avocado Pear, and Laurel-leaves are the most important products of this order, and are too well known to require details.

CINNAMOMUM, Burm. (*Nees. in Wall. pl. as. rar. 2, p. 73.*)

1. *obtusifolium*, Nees. (*l. c.—Laurus obtusifolia, Roxb. fl. ind. 2, p. 302.*

L. Bejolgota, Buch. trans. Linn. Soc. 13, 2. p. 559; excl. Laurus malabathrica, Roxb.) 5 Mountainous countries immediately east of Bengal. Fl. small, greenish-yellow, Jan. and Feb.; fr. July and Aug. Timber very useful for various purposes. (*Roxb.*)

2. *iners*, Reinw. (*Nees. l. c.—Wight. icon. 1, t. 122, et t. 130;—J. Grah. Cat. B. pl. p. 173.—Rheed. I, t. 57.*) *Wild Cinnamon.* 5 Along the great range of the Ghauts, and in the hilly parts of the Concans and Malabar. Java. Penang. Moulmein. Attrah. Chappedong. Fl. small, greenish-yellow, C. S. The leaves on being bruised have a strong spicy smell. Billets of this tree are often sold together with other kinds of firewood, by the wood-cutters. (*Nimmo.*) In H. C. G. ? Fl. ?

3. *eucalyptoïdes*, Nees. (*l. c.—Laurus malabathrica, Soland MSS.;—Roxb. fl. ind. 2, p. 297.*) 5 Malabar Mountains. Introduced into H. C. G. before 1794, but had not fl. up to 1814. It must, however, have fl. afterwards, since the dried specimens, examined by Prof. Nees. v. Essenbeck, had been gathered there. The leaves have a strong, acrid, clove-like taste and odour, somewhat tinged with camphor. (*Nees.*)

4. *nitidum*, Nees. (*l. c.;—Hook. exot. fl. t. 176, excl. syn. *Cinnamomum Cassia*, Nees, Disput.—Wight. icon. 1, t. 124.—*Laurus nitida*, Roxb. fl. ind. 2, p. 300.*) 5 Sumatra. Fl. small, pale yellowish, Feb. and March; fr. May and June. Taste and odour of the bark cinnamon-like. (*Nees.*)

5. *zeylanicum*, Nees. (*l. c. p. 74.*) 5 Ceylon. Fl. small, greenish-white, Jan. and Feb.; fr. May and June.—*True Cinnamon-tree.* දාල්චිනි ගැඹ *Dalchini-gachh.*

- β . *latifolium*, Roxb. (*H. B.* p. 30.—*C. zeylanicum*, *Wight. icon.* 1, t. 123.)
- γ . *angustifolium*, Roxb. (*I. c.—Wight. icon.* 1, t. 128.—*Laurus Cassia*, *B. M.* 40, t. 1636.—*Cinnamomum perpetue florens*, *Burm. zeyl.* p. 63, t. 28.—*Rheed.* 1, t. 57.)
6. *albiflorum*, Nees. (*o. c. p.* 75.—*Wight. icon.* 1, t. 140.—*C. camphoratum*, *Bl.*—*Laurus Cassia*, *Roxb. fl. ind.* 2, p. 297, excl. syn. *Willd.* and *Rheed.*) 5 Nepal. Tipperah. Fl. small, white, Feb. March and April; fr. June and July. Bark smelling and tasting strongly of camphor and cinnamon.
7. *dulce*, Nees. (*I. c.*—*C. chinense*, *Bl.*—*Laurus dulcis*, *Roxb. fl. ind.* 2, p. 303;—*Wight. icon.* 1, t. 138.) 5 China. Fl. small, pale yellowish, March and April; fr. R. S.—Leaves and bark of a sweet aromatic taste and odour. (*Roxb.*)
8. *Culitlawan*, Nees. (*I. c.*—*Wight. icon.* 1, t. 137.—*Laurus Culitlawan*, *Roxb. fl. ind.* 3, p. 299;—*Laurus Caryophyllus*, *Lour.*—*Cortex caryophylloides*, *Rumph.* 2, t. 14.) 5 Moluccas. Cochin China. Fl. small, white, inodorous. In H. C. G. fl. March and April. (*Roxb.*) Bark smelling like a mixture of sassafras and cloves, yielding by distillation an essential oil which the inhabitants of Amboyna esteem an excellent remedy in retention of urine, when given in a dose of six drops twice a day. (*Roxb.*)
9. ? *recurvatum*, Wight. (*icon.* 1, t. 133.—*Laurus recurvata*, *Roxb. fl. ind.* 2, p. 301.) 5 China. In H. C. G. fl. April and May. (*Roxb.*)
10. *caudatum*, Nees. (*o. c. p.* 76.) 5 Nepal. Has not fl. here.
- CAMPHORA**, Nees, (*Wall. pl. as. rar.* 2, p. 72.)
1. *officinarum*, Bauh. (*Nees. I. c.*—*Laurus Camphora*, *L.*; *B. M.* 53, t. 2658.—*L. camphorifera*, *Kämf. amoen.* t. 771;—*Roxb. fl. ind.* 2, p. 304.) ~~কর্পুর~~ Kurpoor. *Officinal Camphor-tree*. 5 China. Japan. Fl. small, pale greenish-yellow, March and April.
2. *glandulifera*, Nees. (*I. c.*—*Laurus glandulifera*, *Wall.*; *trans. med. and phys. soc. Calcutta*, 1, p. 45, with a plate.) L. 5 Nepal Mountains. Fl. small, odoriferous, yellowish-greenish. Has not fl. here. Wood pale yellow, very light, possessing little strength, while fresh strongly smelling of camphor, unfit for furniture. (*Wall.*)
3. *porrecta*, (C. *Parthenoxylon*, *Nees. I. c.*—*Laurus Parthenoxylon*, *Jack. mal. misc.* 1, p. 28.—*L. porrecta*, *H. B.* p. 30;—*Roxb. fl. ind.* 2, p. 308.—*L. Pseudo-sassafras*, *Bl.*) L. 5 Penang. Sumatra. Java. Fl. small, pale yellow. In H. C. G. fl. C. S.; fr. May. (*Roxb.*) Wood strong and durable, if not exposed to wet. (*Jack.*)
- OCOTEA**, Aubl. (*Nees. o. c. p.* 70.)
1. *glaucescens*, Nees. (*o. c. p.* 71.—*Laurus glaucescens*, *Roxb. fl. ind.* 2, p. 307.—*L. sylvestris*, *Bks. Herb.*) L. 5 Silhet, Northern Circars. Fl. small, greenish-yellowish, Feb. March and April; fr. May and June. Timber used by the natives for many economical purposes. (*Roxb.*)

2. *lanceolaria*, (O. *lanceolata*, Nees. *l. c.*—*Laurus lanceolaria*, Roxb. *fl. ind.* 2, *p. 309.*) 5 Khassy Mountains. Nepal. Fl. small, pale yellowish, Feb. March and April; fr. May and June. Wood employed by the natives for many useful purposes. (Roxb.)

3. *mollis*, Wall. 5 Burma.

PERSEA, Gärtn. (Nees. in Wall. pl. as. rar. 3, *p. 32.*)

1. *gratissima*, Gärtn. (Nees. *l. c.*—Gärtn. *fil. fr.* 3, *p. 222*;—*Bl. Bijd.* *p. 567*;—*J. Grah. Cat. B. pl.* *p. 174*;—*B. Reg.* 15, *t. 1258*.—*Laurus Persica*, Jacq. *obs. fasc. 1, p. 37*;—*Roxb. H. B. p. 30.*) Avocado, and *Subaltern's butter-tree* of the W. Indies. Alligator pear. 5 Tropical America. Cultivated in India. Fl. small, pale-greenish, Feb. and March; fr. July and August.

BEILSCHMIEDIA, Nees. (Wall. pl. as. rar. 2, *p. 69.*)

1. *Roxburghiana*, Nees. (*l. c.*—*Laurus bilocularis*, Roxb. *fl. ind.* 2, *p. 311.*) 5 Tipperah. Fl. small, yellow, March and April; fr. June.

AGATHOPHYLLUM, Juss. (*Spreng. syst. 2, p. 444*;—*Endl. gen. pl. 1, p. 318.*)

1. *aromaticum*, Willd. (*Spreng. syst. 2, p. 460*;—*Roxb. H. B. p. 36.*—*Ravensara aromatica*, Sonner. *it. 2, t. 127.*—*Ervodia Ravensara*, Gärtn. *fr. 2, p. 101, t. 103, f. 2.*) L. 5 Madagascar. Introduced into H. C. G. in 1802, but had not fl. up to 1814.

CRYPTOCARYA, R. Br. (Nees. in Wall. pl. as. rar. 2, *p. 69.*)

1. *floribunda*, Nees. (*l. c.*) 5 Silhet. Has been introduced into H. C. G. Fl. ?

SASSAFRAS, Nees. (Wall. pl. as. rar. 2, *p. 68.*)

1. *officinarum*, (Laurus Sassafras, L.;—*Pers. syn. 1, p. 450*;—*Roxb. H. B. p. 30*;—*Catesb. car. 1, p. 55, t. 55.*—*Persea Sassafras*, Spreng. *syst. 2, p. 270.*) 5 N. America. Introduced into H. C. G. in 1809, but had not fl. in 1814. Produces the bark and root in commerce called Sassafras.

BENZOIN, Nees. (Wall. pl. as. rar. 2, *p. 63.*)

1. *odoriferum*, Nees. (*l. c.*—*Laurus Benzoin*, L.; *Pers. syn. 1, p. 450*;—*Commel. hort. 1, p. 189, t. 27*;—*Roxb. H. B. p. 30*;—*Spreng. syst. 2, p. 265.*) 5 N. America. Introduced into H. C. G. before 1814. Fl. ?

TETRANTHERA, Jacq. (Nees. in Wall. pl. as. rar. 2, *p. 64.*)

1. *lanceolifolia*, Roxb. (*fl. ind.* 3, *p. 822*;—*Nees. o. c. p. 65.*) 5 Silhet. In H. C. G. fl. Feb. March and April; fr. R. S. (Roxb.)

2. *Roxburghii*, Nees. (*l. c.*—*Litsæa sebifera*, Pers. *syn. 2, p. 4.*—*To-mex sebifera*, Willd.—*Laurus involucrata*, Retz.—*Tetranthera apetala*, Gärtn. *fr. 3, p. 225, t. 222, f. 2.*)

a. *T. apetala*, Roxb. (*Corom. 2, p. 147*;—*fl. ind.* 3, *p. 819 excl. syn. Lour.*—*Litsæa apetala*, Pers. *syn. 2, p. 4.*—*Tetranthera citrifolia*, Juss.;—*Spreng. syst. 2, p. 266.*) কুকুর চিতা Kookoor-chita. 5 Peninsula of India. Bengal, (Serampore.) Assam. Tropical

- New Holland. Fl. small, greenish-yellowish, May and June; fr. R. S.
3. *laurifolia*, Jacq. (*Hort. schönb.* 1, t. 113;—*Nees. o. c.* p. 66;—*Spreng. syst.* 2, p. 66, excl. syn. *Lour.*—*Roxb. fl. ind.* 3, p. 823;—*B. Reg.* 11, t. 893.—*Tomex Tetrantha*, *Willd.*—*Litsæa Tetrantha*, *Pers. syn.* 2, p. 4.) 5 China. Bengal, (Serampore.) Fl. small, yellowish-greenish, May and June; fr. at the end of the rains.
4. *monopetala*, Roxb. (*fl. ind.* 3, p. 821;—*Corom.* 2, t. 148;—*Nees. l. c.*) बड़ कुकुर चिता *Buro-Kookoor-chita.* 5 Peninsula of India. Bengal, (Serampore.) Oude. Assam. Silhet. Nepal. Fl. small, yellowish-greenish, May and June; fr. R. S.
5. *glauca*, Wall. (*Nees. l. c.*) 5 Khassya Hills, 1823. In H. C. G. fl. ?
6. *nitida*, Roxb. (*fl. ind.* 3, p. 818;—*Nees. o. c.* p. 67.) 5 Assam. Garrow-hills. Fl. small, greenish-yellowish, July and Aug.; fr. April. A useful timber tree, from which are made canoes full fifty feet long. (*Roxb.*)
7. *macrophylla*, Roxb. (*fl. ind.* 3, p. 822.) 5 Silhet. In H. C. G. fl. April; fr. Aug. (*Roxb.*)
8. *quadriflora*, Roxb. (*fl. ind.* 3, p. 821.) 5 Garrow-hills. In H. C. G. fl. Feb. and March; fr. R. S. (*Roxb.*)
9. *fruticosa*, Roxb. (*fl. ind.* 3, p. 823.) 5 Silhet. In H. C. G. fl. June and July; fr. C. S. (*Roxb.*)
10. *glabra*, Roxb. (*H. B.* p. 78.) 5 Coromandel. In H. C. G. fl. H. S.; fr. R. S. (*Roxb.*)
11. *foliosa*, Wall. (*Cat.*—*Tetradenia foliosa*, *Nees.* 5 Silhet Has not fl. here yet.)

LAURUS, Plin. (*Nees in Wall. pl. as. rar.* 2, p. 62.)

1. *nobilis*, L. (*Spreng. syst.* 2, p. 65;—*Nees l. c.*;—*Blacw. t.* 175;—*Plenck. t.* 315;—*Roxb. H. B.* p. 30.) Sweet Bay. 5 S. Europe. Levant. Introduced into H. C. G. in 1794, but had not fl. up to 1814.

ORDER CXLV.—ILLIGERACEÆ, Lindl. Nat. Syst. p. 202.

Trees or shrubs, referred by Lindl. to 2 genera : *Illigera*, Bl. and *Gyrocarpus*, Jacq. with the first we are unacquainted. The second has 1 species in S. America ; 1 in the E. Indies ; and 2 in New Holland. Properties nearly unknown.

GYROCARPUS, Jacq. (Nees. in Wall. pl. as. rar. 2, p. 68.)

1. *asiaticus*, Willd. (Nees. l. c.—Gyrocarpus Jacquinii, Roxb. Corom. I, t. 1;—fl. ind. 1, p. 445; ed. Carey. I, p. 465;—Spreng. syst. I, p. 489;—Pers. syn. I, p. 145, excl. syn.—G. americanus;—J. Grah. Cat. B. pl. p. 250.) 5 Coromandel Mountains. Banks of the Krishna, near Nalutwar. Fl. very small, greenish-yellowish, C. S. Wood white, very light, when procurable, used in preference to others to make Catamarans. (Roxb.)

* *G. americanus*, Jacq. 5 New Granada.—*G. sphenopterus*, R. Br. Endl. ichnogn. t. 43. 5 Tropical N. Holland.—*G. rugosus*, R. Br. 5 Tropical New Holland.

ORDER CXLVI.—CASSYTHACEÆ, Lindl. Nat. Syst. p. 202.

Parasitical, leafless, twining herbs or undershrubs, of one genus and six species ; 4 from New Holland ; 1 from St. Vincent ; and 1 from the E. Indies. Properties unknown.

CASSYTA, L. (Nees. in Wall. pl. as. rar. 2, p. 69.)

1. *filiformis*, L. (Nees. L. c.;—Pers. syn. 1, p. 450;—Bl. bidjr. p. 574;—Spreng. syst. 2, p. 271, ex. pte.; Roxb. fl. ind. 2, p. 314;—J. Grah. Cat. B. pl. p. 175; not Hook.—Calodium Cochin-chinense, Lour.—Rheed. 7, t. 44;—Rumph. 5, t. 184, f. 4.) আকাশ বলী Akash-bullee.
2. ↗ Moluccas, Ceylon. Both Peninsulas of India, Arabia, Bengal, (Serampore.) Fl. small, white, C. S.; fr. Feb.

* *C. americana*, Nees. (*C. filiformis*, Hook. exot. t. 167.) St. Vincent.

ORDER CXLVII.—PENÆACEÆ, R. Br.—Lindl. Nat. Syst. p. 203.

Much branched, small shrubs, referred to 3 genera containing 20 species, all natives of S. Africa, (Harvey.) Several plants, belonging to this order, have been introduced from C. G. H. but none have lived through the R. S.

ORDER CXLVIII.—NEPENTHACEÆ, Lindl. Nat. Syst. p. 205.

THE PITCHER-PLANT TRIBE.

Herbaceous or half-shrubby caulescent plants, of 1 genus, and 6 species: 1 from Madagascar; 1 from Cochin China; 1 from Java; and at least 2-3 from Singapore and Malacca. Properties unknown.

NEPENTHES, L. (Spreng. syst. 3, p. 9, No. 2423.)

1. *distillatoria*, Ait. (L. ?—Lodd. Cab. t. 1017;—B. M. 55, t. 2798, (male.) N. indica, Lam.—N. Phylloamphora, (female.) B. M. 53, t. 2629, excl. syn. Willd. Poir. Lour. and Rumph.) ♂ Fl. small, male, green with a red column of stamens, C. S. Khassy Mountains.
-

* *N. Rafflesiana*, Jack. Singapore.—*N. ampullacea*, Jack. Singapore.

ORDER CXLIX.—ARISTOLOCHIACEÆ, Lindl. Nat. Syst. p. 205.

THE BIRTHWORT TRIBE.

Herbs or shrubs, often twining or trailing, by Lindl. referred to 8 genera. Of these, Spreng. syst. enumerates 38 species from S. America, Mexico and the W. Indies; 13 from Europe and N. Africa; 7 from N. Amer-

africa; 3 from Syria and Asia Minor; 2 from Japan; (1 of them *Heterotropa asaroïdes*, Morr. and Decaisne); 2 from the Mascarenhas Islands; and 1 from New Holland. Of Indian species, have been discovered 4 of *Bragantia*; (Cochin China, Ceylon, the Concans,) and 5 of *Aristolochia*, (Java, Peninsulas of India, Bengal, Hindoostan, Khassy Mountains.) *Aristolochia rotunda*, *longa* and *Clematitis* are like the order in general, tonic and stimulating. *A. fragrantissima* of Peru possesses antidysenteric properties. *A. Serpentaria* is considered a powerful stimulant in the so-called adynamic fevers.

ARISTOLOCHIA, L. (*Spreng. syst.* 3, p. 683, No. 3050.)

1. *anguicida*, L. (*Spreng. syst.* 3, p. 751;—*Pers. syn.* 2, p. 527;—*Jacq. amer. t.* 144, ed. *piet. t.* 220;—*Roxb. H. B.* p. 64.) 5 ↳ Carthagena. Mexico. In *H. C. G. fl. R. S.* (*Roxb.*)
2. *indica*, L. (*Spreng. syst.* 3, p. 751;—*Pers. syn.* 2, p. 527;—*Roxb. fl. ind.* 3, p. 489;—*J. Grah. Cat. B. pl.* p. 178, excl. *syn. Rumph.*—*Rheed.* 8, t. 25.) ईश्वर मूल *Ishwur-mool*. 5 ↳ Rangoon. Penang. Coromandel. Cross-Island. Bombay Harbour. Hills throughout the Concan. Bengal, (Serampore,) Hindoosthan. New Holland. Fl. largish green, brownish red, R. S.; fr. C. S. Root nauseously bitter, considered by the natives to possess virtues against lues and menostasia. (*Ainstlie.*)
3. *acuminata*, Lam. (*Spreng. syst.* 3, p. 751;—*Pers. syn.* 2, p. 527;—*Roxb. fl. ind.* 3, p. 480;—*J. Grah. Cat. B. pl.* p. 178.) 5 ↳ Mauritius. Banks of the Irawaddi. Taong-Dong. Penang. Chittagong. Courtallum. S. Concan. Silhet. Fl. largish, dark-greenish-purple, H. and R. S.; fr. C. S.
4. *saccata*, Wall. (*pl. as. rar.* 2, t. 103.) 5 ↳ Nepal. Khassy Mountains. Fl. dark-purple, internally yellow, Nov. and Dec.; fr. O.
5. *odoratissima*, L. (*Spreng. syst.* 3, p. 752;—*Pers. syn.* 2, p. 526;—*Sloan. hist.* 1, p. 162, t. 104;—*Roxb. H. B.* p. 64.) 5 ↳ Jamaica. Mexico. Introduced into *H. C. G.* before 1814. Fl.?
6. *labiosa*, Ker. (*B. Reg.* 9, t. 689;—*B. M.* 52, t. 2545;—*Spreng. syst.* 3, p. 753.) 5 ↳ Brazil. Has been introduced into *H. C. G.* Fl.?
7. *cymbifera*, Mart. (*Spreng. syst.* 3, p. 753;—*Mart. nov. gen. and sp. pl.* 1, p. 76, t. 49;—*B. Reg.* 18, t. 1543.) 5 ↳ Brazil. Introduced in 1841.
8. *bracteata*, Retz. (*Spreng. syst.* 3, p. 754;—*Pers. syn.* 2, p. 527;—*Roxb. fl. ind.* 3, p. 490;—*J. Grah. Cat. B. pl.* p. 178.) 2 ↳ Coromandel, near Madras. Abundant on dark red, or black soil in the Deccan. Banks of the Jumna. Fl. dark-purple, and fr. nearly the whole year. Every part of this plant is nauseously bitter. The dried leaves are anthelmintic. Two of them fresh rubbed up in a little water, and given to an adult for a dose, once in twenty-four hours, are considered a cure for purging with gripes. (*Roxb.*) The

natives squeeze the juice of this plant into wounds to kill worms.
(Dr. Gibson.)

9. *Clematitis*, L. (*spec. 2, p. 1364.—E. B. 6, t. 368.*) \curvearrowright Europe. Fl. July 1841.

Reg. 17, t. 1399. \curvearrowright W. Indies.—*A. caudata*, Booth. \curvearrowright B. Reg. 17, t. 1453. Brazil.—*Bragantia Wallichii*, R. Br. Rheed. 6, t. 28. \curvearrowright S. Concán.—*Heterotropa asaroides*, Morr. and Decaisne, 2. Japan.

ORDER CL.—AMARANTACEÆ, R. Br.—Lindl. Nat. Syst. p. 207.

THE AMARANT-TRIBE.

Herbs or shrubs, sometimes climbing, by Lindl. excluding Cyathula and Leiospermum, referred to about 40 genera. Of these Spreng. syst. enumerates about 100 species for S. America, Mexico, and the W. Indies; 29 for N. Holland and Van Diemen's Land; 10 for N. America; 5 for Europe; 4 for Arabia; 2 for China and Japan; 1 for Middle Asia; 1 for Iberia; 1 for Tauria; 1 for E. Africa; 1 for Madagascar; 1 for the Mascarenhas Islands; and 1 for Guinea. In S. Africa, including Blepharolepis, Nees, have been discovered 11 species, (*Harvey*); and in the E. Indies, according to Martius, Roxb. flor. and Wall. Cat., about 70; viz. 2 of *Digera*; 3 of *Deeringia*; 3 of *Allmannia*; 20 of *Amarantus*; 5 of *Ærua*; ? 1 of *Polychroa*, (Lour.); 8 of *Celosia*; 1 of *Cladostachys*; 2 of *Gomphrena*; 2 of *Alternanthera*; 2 of *Psilotrichum*; 2 of *Centrostachys*; 8 of *Achyranthes*; 8 of *Desmodchaeta*; 1 of *Pupalia*; and 2 of *Polyscalis*. Properties under the species.

DIGERA, Forsk. (*Spreng. syst. 1, p. 519, No. 874;—Endl. gen. pl. 1, p. 303.*)

+ 1. *muricata*, Mart. (*Desmodchaeta alternifolia, DC.—Cladostachys alternifolia, Swt.*—Achyranthes alternifolia, L.;—*Hb. Banks*;—Roxb. fl. ind. 1, p. 674; ed. Carey, 2, p. 500. Achyranthes muricata, Lam.; not L.) लता मुहूरी *Lata-muhoori*. \odot Both Peninsulas of India. Bengal, (Serampore.) Fl. small, red, R. S.; fr. C. S. Leaves and tender tops used by the natives in their curries. (Roxb.)

+ 1. *tenuifolius*, Willd. (*Spreng. syst.* 1, p. 926;—*Roxb. fl. ind.* 3, p. 602.—J. Grah. *Cat. B. pl. p.* 602.) शीर्षिटि नटि *Gheenti-nutee.* ◎ Peninsula of India. Bengal, (Serampore.) Fl. minute, green, and fr. R. S.

+ 2. *polygonoides*, Roxb. (*fl. ind.* 3, p. 602;—*Wight. icon.* 2, t. 512.—L.?) चेरू नटि *Cheroo-nuti.* ◎ Bengal, (Serampore.) Fl. minute, greenish, and fr. C. S. Though not cultivated, the natives use it as a pot-herb, as it is considered very wholesome, especially for convalescents. (*Roxb.*)

+ 3. *polygamus*, L. (*Spreng. syst.* 1, p. 927;—*Roxb. fl. ind.* 3, p. 603;—J. Grah. *Cat. B. pl. p.* 169;—*Rumph. 5, t. 82, f. 1.*) छापा नटि *Champa-nuti.* Fl. minute, greenish, and fr. R. S. Peninsula of India. Bengal, (Serampore,) &c. Cultivated all over the southern parts of Asia.

β *ruber*. A reddish variety. लाल छापा नटि *Lal-champa-nutee.*

4. *Blitum*, L. (*Spreng. syst.* 1, p. 927;—*Roxb. H. B. p. 67*;—*E. B. 31, t. 2212.*) ◎ Europe. Fl. minute, greenish, R. S.

5. *tristis*, L. (*Spreng. syst.* 1, p. 928;—*Roxb. fl. ind.* 3, p. 604;—J. Grah. *Cat. B. pl. p.* 169;—*Wight. icon.* 2, t. 514;—*Rumph. 5, t. 82, f. 2.*) ◎ Cultivated all over India. Fl. minute, green, H. and R. S.; fr. R. S.

6. *campestris*, Willd. (*Spreng. syst.* 1, p. 927;—*Pers. syn.* 2, p. 559.) ◎ Bengal, (Serampore,) &c. Fl. minute greenish, H. S. and R. S.; fr. R. S. Cultivated.

7. *polystachys*, Willd. (*Spreng. syst.* 1, p. 928;—*Pers. syn.* 2, p. 550.) ◎ Bengal, (Serampore,) &c. Fl. minute, greenish, H. and R. S.; fr. R. S. Cultivated.

8. *viridis*, L. (*Spreng. syst.* 1, p. 927;—*Roxb. fl. ind.* 3, p. 605;—*J. Grah. Cat. B. pl.* p. 169.) ◎ Jamaica. Brazil. Peninsula of India. Bengal. Fl. minute, greenish, and fr. R. S. *Tender tops* eaten by the natives, though not so much esteemed as those of the cultivated species. (*Roxb.*)
9. *lividus*, L. (*Spreng. syst.* 1, p. 928;—*Pers. syn.* 2, p. 560;—*Roxb. fl. ind.* 3, p. 605.) গোৰাঙ্গি নটি *Gobura-nuti*. ◎ Virginia. Bengal, (Serampore.) Fl. minute, greenish, and fr. R. S. Cultivated.
- + 10. *oleraceus*, L. (*Spreng. syst.* 1, p. 928;—*Roxb. fl. ind.* 3, p. 605;—*J. Grah. Cat. B. pl.* p. 169.) ◎ Peninsula of India. Bengal, (Serampore,) &c. Fl. minute, greenish, and fr. R. S. Several varieties cultivated as pot-herbs, of which the following are remarkable:—
- a. viridis*; the common green sort. Most cultivated.
- b. ruber*; a beautiful variety, with a clear bright red stem, branches, petioles, nerves, and veins, and the leaves themselves rather rust-coloured.
- c. albus*; all the parts that are red in *b* are here of a clear, shining white colour. শাদা নটি *Sada-nuti*. Much cultivated in Bengal.
- d. giganteus*, Kön.; five to eight feet high, with a stem as thick as a man's wrist. The tender succulent tops of the stems and branches are sometimes served up on our tables, as a substitute for asparagus. (*Roxb.*)
- + 11. *gangeticus*, L. (*Spreng. syst.* 1, p. 928.—*Roxb. fl. ind.* 3, p. 606.) রংশা শাক *Ranga-shak*. লাল শাক *Lal-shak*. ◎ Bengal, (Serampore.) Assam, &c. Fl. small, greenish or reddish, and fr. R. S. Varieties of this species many, tolerably permanent, differing chiefly in colour from green with the slightest tinge of red, to rufous, liver-colored, and bright red. They are more generally used among the natives of Bengal than any other species or variety, and with No. 10, differ from No. 3, 5, 6 and 7, in not admitting of being cut, with the hope of succeeding crops from the same roots. (*Roxb.*)
- + 12. *lanceolatus*, Roxb. (*fl. ind.* 3, p. 607.—*A. lanceæfolius*, *Roxb. H. B.* p. 67.) বাঁশ পাট নটি *Bans-pata-nuti*. ◎ Bengal, (Serampore.) Fl. minute, greenish, and fr. R. S. The leaves and *tender tops* are eaten by the natives in their curries. (*Roxb.*)
- + 13. *atropurpureus*, Roxb. (*fl. ind.* 3, p. 608.) লাল নটি *Lal-nuti* কঙা নটি *Kunka-nuti*. ◎ Bengal, (Serampore.) Fl. minute, greenish and fr. R. S. Cultivated as a pot-herb by the natives of Bengal, who sometimes call it বাঁশ পাট লাল নটি *Bans-pata-lal-nuti*.
14. *tricolor*, L. (*Spreng. syst.* 1, p. 927;—*Roxb. fl. ind.* 3, p. 668;—*J. Grah. Cat. B. pl.* p. 169.) ◎ China. Common in gardens. Fl. minute, greenish, and fr. nearly the whole year.
15. *melancholicus*, L. (*Spreng. syst.* 1, p. 927;—*Roxb. fl. ind.* 3, p. 608.) ◎ Common in gardens. Fl. minute, greenish, and fr. R. S.
16. *fasciatus*, Roxb. (*fl. ind.* 3, p. 609) তুন তুনি নটি *Toon-tooni-nuti*.

ବନ୍ ନଟି *Bun-nuti*. ◎ Peninsula of India. Bengal, (Serampore.) Fl. minute, greenish, and fr. R. S.

17. *hybridus*, L. (*Spreng. syst.* 1, p. 929;—*Roxb. fl. ind.* 3, p. 609.) ◎ Virginia. Persia. In H. C. G. fl. R. S. (*Roxb.*)

+ 18. *frumentaceus*, Buch. (*Roxb. fl. ind.* 3, p. 609.) ◎ Mysore. Coimbatore, where this large luxuriant species is extensively cultivated for its seed chiefly, the flour of which forms a great article in the diet of the natives. In H. C. G. fl. R. and C. S.; fr. C. S. (*Roxb.*)

19. *retroflexus*, L. (*Spreng. syst.* 1, p. 929;—*Roxb. H. B.* p. 67.) ◎ Italy. N. America. Fl. small, greenish, R. S.; fr. C. S.

20. *caudatus*, L. (*Spreng. syst.* 1, p. 929;—*Roxb. H. B.* p. 67;—*J. Grah. Cat. B. pl. p.* 169.) Love lies bleeding. ◎ Persia. Common in gardens. Fl. small, deep-red, C. S.; fr. H. S.

21. *paniculatus*, L. (*Spreng. syst.* 1, p. 929;—*Roxb. H. B.* p. 67.) ◎ N. America. W. Indies. Fl. minute, green, and fr. R. S.

22. *hypochondriacus*, L. (*Spreng. syst.* 1, p. 929;—*Roxb. H. B.* p. 67.) ◎ Virginia. Fl. minute, deep-red, and fr. C. S.

+ 23. *spinulosus*, L. (*Spreng. syst.* 1, p. 929;—*Roxb. fl. ind.* 3, p. 611;—*Wight. icon.* 2, t. 513;—*J. Grah. Cat. B. pl. p.* 169;—*Rumph.* 5, t. 83, f. 1.) କଣ୍ଟେ ନଟି *Kanta-nuti*. ◎ Cochin China. Both Peninsulas of India. Bengal, (Serampore.) Assam. Fl. minute, green, R. and C. S.; fr. C. S.

ORDER CLI.—CHENOPIDIACEÆ,—Lind. *Nat. Syst.* p. 208.

THE GOOSEFOOT TRIBE.

Herbs or undershrubs, by Lindl. referred to 51 genera. Of these, Spreng. syst. assigns about 85 species to Europe; 36 to New Holland and Van Diemen's Land; 16 to N. America; 15 to Siberia; 15 to S. America;

20

CHENOPODIACEAE.

SL

18 to N. Africa; 10 to Dahuria; 10 to Caucasus; 7 to Tauria; 4 to Arabia; 2 to the Levant; 2 to Japan; 1 to China; 1 to Tartary; 1 to Madeira; and 1 to the Canaries. In S. Africa, including two Galenias, have been found 22 species, (*Harvey*); and in the E. Indies, according to Wall, Cat and Roxb. flor. 18, viz. 2 of *Salicornia*; 5 of *Salsola*; 1 of *Spinacia*; 1 of *Axyris*; 1 of *Atriplex*; 6 of *Chenopodium*; and 2 of *Basella*.—Properties under the species.

SALICORNIA, L. (*Spreng. syst. 1, p. 5, No. 29; —Endl. gen. pl. 1, p. 293.*)
Glasswort.

1. *brachiata*, Roxb. (*Fl. ind. 1, p. 84; ed. Carey, 1, p. 82.*) 5 Coromandel. Soonderbuns.—Fl. small, greenish, C. S.; fr. H. S.—This species, as well as the next, and *Salsola nudiflora*, grow so abundantly on the coasts of India, that by incineration they would be able to supply barilla enough to make soap and glass for the whole world. (*Roxb.*)—The 'sejje muttee' of the bazars, a coarse kind of barilla, is procured by the incineration of unknown plants, growing on the shores of the salt lakes which are scattered through the Indian deserts. (*Royle.*)

2. *indica*, Willd. (*Spreng. syst. 1, p. 18; —Roxb. fl. ind. 1, p. 85; ed. Carey, 1, p. 83; —J. Grah. Cat. B. pl. p. 171.*) জুড় পালং *Judo-palung*. 5 Coromandel. Bombay. Soonderbuns. New Holland. Fl. very small, greenish, C. S.; fr. H. S. It is pickled by the natives. (*J. Grah.*)

SPINACIA, L. (*Spreng. syst. 3, p. 894, No. 3179; —Endl. gen. pl. 1, p. 294.*) Spinach.

1. *oleracea*, L. (*Spreng. syst. 3, p. 903; —Gürtn. fr. 2, p. 198, t. 126, f. 4.*—*Roxb. H. B. p. 72; —J. Grah. Cat. B. pl. p. 171.*) Common Spinach. ♂ ♂. Arabia. (*Forsk.*) The Arabs were the first who introduced it into Spain. Fl. small, green, C. S.; fr. H. S.

2. *tetrandra*, Roxb. (*H. B. p. 72; —fl. ind. 3, p. 771; not Stev.*) ♂ পিনশি *Pinish*. Much cultivated in Bengal. Native place uncertain. Fl. very small, green, C. S.; fr. H. S. This pot-herb is much esteemed by the natives.

BLITUM, L. (*Spreng. syst. 1, p. 6, No. 47; —Endl. gen. pl. 1, p. 295.*)

1. *virgatum*, L. (*Spreng. syst. 1, p. 22; —B. M. 8, t. 276; —Roxb. H. B. p. 2.*) ♂ S. France. Spain. Tartary. Fl. minute, greenish, H. S.
2. *capitatum*, L. (*Spreng. syst. 1, p. 22.*) ♂ Tyrol. Switzerland. Fl. like those of No. 1, H. S.

BETA, L. (*Spreng. syst. 1, p. 534, No. 1136; —Endl. gen. pl. 1, p. 295.*) Beet.

1. *vulgaris*, L. (*Spreng. syst. 1, p. 950; —Gürtn. fr. 1, p. 360, t. 75, f. 5.*—*Roxb. H. B. p. 21; —J. Grah. Cat. B. pl. p. 171.*) Common Beet. ♂ S. Europe. N. Africa. Middle Asia. Fl. small, green, C. S.; fr. H. S.

a. viridis; Green Beet.

b. rubra; Red-rooted Beet.

c. alba; White-rooted Beet.

2. *bengalensis*, Roxb. (*fl. ind.* 2, p. 59.) ◎ পালঁশক Palung-shak. Native place unknown. Commonly cultivated in Bengal and the N. Circars. Fl. small, green, and fr. C. S. Leaves (only) used by the natives in their curries.

CHENOPodium, L. (*Spreng. syst.* 1, p. 532, No. 1091; *Endl. gen. pl.* 1, p. 296.) *Goosefoot.*

1. *urbicum*, L. (*Spreng. syst.* 1, p. 919;—*E. B.* 10, t. 717;—*Roxb. H. B.* p. 21.) ◎ N. Europe. Tauria, Greece. Fl. very small, minute, pale green, C. S.; fr. H. S.

2. *rubrum*, L. (*Spreng. syst.* 1, p. 920;—*E. B.* 24, t. 1721.) ◎ Europe. Fl. very small, reddish-green, C. S.; fr. H. S.

3. *murale*, L. (*Spreng. syst.* 1, p. 920;—*E. B.* 24, t. 1722;—*Roxb. H. B.* p. 21.) ◎ Europe. C. G. H. America, near Loxa. Fl. small, green, Feb. and March; fr. March.

4. *album*, L. (*Spreng. syst.* 1, p. 920.) ◎ Europe, from Lapland down to Portugal and Tauria. Egypt. India. N. America. Fl. small, green, C. S.; fr. H. S. Used by the Natives of India as a pot-herb.

a. album; (*E. B.* 24, t. 1723;—*Roxb. fl. ind.* 2, p. 58.) চন্দুন বেতু Chundun-betoo.

5. *viride*; (*Chenopodium viride*, Willd.;—*Roxb. l. c.*;—*J. Grah. Cat. B. pl. p. 171.*) বেতু শাক Bettoo-shak. Entirely green.

γ. *purpureum*, Roxb. (*l. c.*) লাল বেতু Lal-betoo. Angles of the stem and branches of a fine purple colour; leaves and the mealy panicles somewhat reddish. (*Roxb.*)

5. *ficifolium*, Sm. (*Spreng. syst.* 1, p. 920;—*E. B.* 24, t. 1724.—*C. viride*, Curt. *lond.* 2, t. 16; not Willd.) ◎ Europe. Fl. small, green, Feb. and March; fr. March.

6. *hybridum*, L. (*Spreng. syst.* 1, p. 920;—*E. B.* 27, t. 1919.) ◎ England. Tauria. Siberia. N. America. Fl. small, pale greenish, Feb. and March; fr. March.

7. *Quinoa*, Willd. (*Spreng. syst.* 1, p. 920;—*B. M.* 65, t. 3641.) ◎ S. America, where along the Pacific, from the temperate parts of the Andes to the coast, it is the chief nourishment of the people. The seeds are either boiled in water into a sort of gruel, which, seasoned in various ways, especially with Pimento, is much relished by those who are accustomed to it;—or they are toasted and used as coffee. Fl. small, greenish, Feb.; fr. March and April.

8. *Botrys*, L. (*Spreng. syst.* 1, p. 920;—*Roxb. H. B.* p. 21.) ◎ S. Europe. Siberia. Pennsylvania. New York. Fl. small, green, Jan. and Feb.; fr. March. Contains an essential oil, which renders it tonic and antispasmodic. The same is the case with the next species.

9. *ambrosioides*, L. (*Spreng. syst.* 1, p. 921;—*Roxb. H. B.* p. 21.) ◎ S. America. Georgia. Portugal. Hungary. C. G. H. Fl. small, pale greenish, and fr. nearly throughout the year. Completely domesticated about Serampore.

CHENOPODIACEÆ—TETRAGONIACEÆ.

ORDER CLIV.—POLYGONACEÆ, Lindl. Nat. Syst. p. 211.

THE BUCK-WHEAT TRIBE.

Herbs, rarely shrubs, or trees, by Lindl. (adding *Ampelygonum*,) referred to 25 genera. Of these about 44, according to Spreng. syst. belong to Europe; 34 to S. America, Mexico, and the W. Indies; 30 to N. America; 24 to Siberia; 18 to New Holland and the South Sea Islands; 10 to N. Africa; 12 to Japan and China; 5 to the Levant; 4 to Thibet and Mongolia; 2 to Caucasus; 2 to the Canaries; 1 to Iceland; 1 to Dahuria; 1 to Arabia; 1 to Tristan d'Acunha; 1 to Madagascar; 2 to Cochin China; 1 to the Moluccas, and 1 to Java. In S. Africa have been found 20 species, (*Harvey*.); and in the E. Indies, according to Meisner and Roxb. fl. 64: viz. 1 of *Königia*, (also a native of Iceland,); 6 of *Rumex*; 1 of *Oxyria*; 4 of *Rheum*; 2 of *Coccoloba*; 1 of *Ceratogon*; 1 of *Ampelygonum*; 46 of *Polygonum*; and 3 of *Fagopyrum*. Properties under the species.

POLYGONUM, L. (*Spreng. syst.* 2, p. 175, No. 1510;—*Endl. gen. pl. I.* p. 306.)

1. *orientale*, L. (*Spreng. syst.* 2, p. 257; *Meisner in Wall. pl. as. rar.* 3, p. 54;—*B. M.* 6, t. 213.) C. B. S. India, Japan, New Holland.
- β. *pilosum*, Meisn. (l. c.—*Polygonum pilosum*, Roxb. fl. ind. 2, p. 286.—*Laguncula Cochinchinensis*, Lour.) বড় পানী মরিচ *Buropanee-murich*. ◉ Bengal, (Serampore.) Fl. small, white, R. S.; fr. C. S.
2. *autans*, Roxb. (fl. ind. 2, p. 285.) ◉ Native place uncertain. Fl. small, white. In H. C. G. fl. R. S.; fr. C. S. (Roxb.)
3. *tomentosum*, Willd. (*Spreng. syst.* 2, p. 257;—*Meisn. in Wall. pl. as. rar.* 3, p. 55;—*Roxb. fl. ind.* 2, p. 287.) ◉ Both Peninsulas of India. Ceylon. Bengal, (Serampore.) Saharunpore. Fl. small, white, R. S.; fr. C. S. Cattle eat this species greedily. (Roxb.)

4. *lanigerum*, R. Br. (*Spreng. syst.* 2, p. 258;—*Meisn. in Wall. pl. as. rar.* 3, p. 55;—P. *lanatum*, *Roxb. fl. ind.* 2, p. 285.) ◎ পানী মরিচ *Shwet-panee-murich.* ◎ New Holland. Nepal. Neelgherries. Bengal, (Serampore.) Fl. small, white, R. S.; fr. C. S.
5. *barbatum*, L. (*Spreng. syst.* 2, p. 257;—*Meisn. in Wall. pl. as. rar.* p. 56;—*Roxb. fl. ind.* 2, p. 289.) ◎ Both Peninsulas of India. Bengal. Saharunpore. China. Japan. Fl. small, rose-coloured. In H. C. G. fl. R. S.; fr. C. S. (*Roxb.*) Cattle eat it greedily. (*Roxb.*) Seeds carminative. (*Ainslie.*)
6. *glabrum*, Willd. (*Spreng. syst.* 2, p. 258;—*Meisn. in Wall. pl. as. rar.* 3, p. 57, excl. syn. P. *tenellum*, *Roxb. H. B.*;—*Roxb. fl. ind.* 2, p. 287;—*J. Grah. Cat. B. pl.* excl. syn. *Rheed.* 10, t. 80; B. M. and P. *orientale*, L.—*Rheed.* 12, t. 77.) ◎ Both Peninsulas of India. Bengal, (Serampore.) Saharunpore. Fl. small, rose-coloured, R. S.; fr. C. S.
7. *tenellum*, Roxb. (*fl. ind.* 2, p. 289.) ◎ Bengal, (Serampore.) Fl. small, white, R. S.; fr. C. S.
8. *rivulare*, Kön. (*Roxb. fl. ind.* 2, p. 290;—*J. Grah. Cat. B. pl.* p. 172.—*Rheed.* 12, t. 76.) ◎ Peninsula of India. Bengal, (Serampore.) Fl. small, rose-coloured, R. S.; fr. C. S.
9. *flaccidum*, Roxb. (*fl. ind.* 2, p. 291.) পানী মরিচ *Panee-murich.* ◎ Bengal, (Serampore.) Fl. small, white, R. S.; fr. C. S.
10. *horridum*, Buch. (*Roxb. fl. ind.* 2, p. 291;—*Meisn. in Wall. pl. as. rar.* 3, p. 58.) ৫ ◎ Penang. Khassy Mountains. Assam. Nepal. Introduced into H. C. G. in 1810, but had not fl. up to 1814.
11. *perfoliatum*, L. (*Spreng. syst.* 2, p. 259;—*Roxb. fl. ind.* 2, p. 288;—*Meisn. in Wall. pl. as. rar.* 3, p. 59;—*Burm. ind. t.* 31, f. 2;—*Lam. ill. t.* 315, f. 3.) ৫ ◎ Khassy Mountains. Nepal. In H. C. G. fl. and fr. throughout the year. (*Roxb.*)
12. *herniaroides*, Delil. (*Spreng. syst.* 2, p. 256;—*Meisn. in Wall. pl. as. rar.* 3, p. 62.—P. *Dryandri*, *Spreng. syst.* 2, p. 255.—P. *elegans*, *Roxb. fl. ind.* 2, p. 291;—*Soland*; not *Tenore.*) ৩. Egypt. Oude. Bengal, (Serampore. Monghir. Silhet.) Fl. minute, rose-coloured, and fr. Jan., Feb. and March.
13. *aviculare*, L. (*Spreng. syst.* 2, p. 255;—*E. B.* 18, t. 1252;—*Roxb. H. B.* p. 29.) ◎ Europe. Asia. N. America. Fl. very small, greenish-white-red, May and June.

AMPELYGONUM, Lindl. (*B. Reg.* 1838, app. p. 62.)

1. *chinense*, Lindl. (L. c.—*Polygonum chinense*, L.;—*Spreng. syst.* 2, p. 254;—*Meisn. in Wall. pl. as. rar.* p. 60;—*Roxb. fl. ind.* 2, p. 289;—*J. Grah. Cat. B. pl.* p. 172;—*Burm. ind. t.* 30, f. 3.) ৫ Japan. China. Java. Nepal. Kemaon. Khassy Mountains. Assam. Burma. Neelgherry. Dindygul. Courtallum. Bangalore. Mahableshwar. Hills about Parr. Fl. small, white, nearly the whole year, but especially H. S.

FAGOPYRUM, Tournef. (*Meisn.* in *Wall. pl. as. rar.* p. 63;—*Endl. gen. pl.* 1, p. 307.)

1. *esculentum*, Mönch. (*Meisn. l. c.*—*Polygonum Fagopyrum*, *L.*;—*Spreng. syst.* 2, p. 254;—*Roxb. fl. ind.* 2, p. 292;—*E. B.* 15, t. 1044.) *Common Buck-wheat.* ⊙ Fl. small, pale rose, C. S.; fr. H. S. Central Asia. Cultivated all over the mountainous countries N. of Bengal. This like the following species, is used as food:—
2. *tataricum*, Gärtn. (*fr.* 2, p. 182, *t.* 119, *f.* 6.—*Polygonum tataricum*, *L.*;—*Spreng. syst.* 2, p. 254;—*Gmel. sib.* 3, p. 64, *t.* 13, *f.* 1.) ⊙ *Tartary.* Fl. small, pale rose, C. S.; fr. H. S.
3. *cymosum*, Meisn. (*Wall. pl. as. rar.* 3, p. 63.) 2. Assam. Nepal. Has been introduced into H. C. G. by Mr. Webb. Fl. ?

CERATOGONUM, Meisn. (*Wall. pl. as. rar.* 3, p. 63;—*Endl. gen. pl.* 1, p. 308.)

1. *atriplicifolium*, Meisn. (*l. c.*) 2. Native place uncertain. In H. C. G.
- COCCOLOBA*, L. (*Spreng. syst.* 2, p. 175, No. 1509;—*Endl. gen. pl.* 1, p. 308.) *Sea-side Grape.*
1. *uvifera*, L. (*Spreng. syst.* 2, p. 252;—*B. M.* 59, *t.* 3130;—*Roxb. H. B.* p. 29.) 5 W. Indies. S. America. Fl. small, whitish, fragrant, April; fr. Oct. *Fruit sweetish-acid*, rather agreeable, but not much esteemed, though generally sold in the markets.—*Wood*, when boiled in water, gives out a red colour; it is also employed for Cabinet-work. (*Hook.*)
2. *crispata*, Buch. (*Roxb. fl. ind.* 2, p. 292.) 2. Nepal. In H. C. G. fl. C. S. (*Roxb.*)
3. *pubescens*, Linn. (*B. M.* 59, *t.* 3166.) 5 W. Indies.
4. *excoriata*, L. (excl. syn. *Pluk.*) 5 W. Indies.

RUMEX, L. (*Spreng. syst.* 2, p. 15, No. 1385.—*Meisn.* in *Wall. pl. as. rar.* 3, p. 63;—*Endl. gen. pl.* 1, p. 308.) *Dock.*

1. *sanguineus*, L. (*Pers. syn.* 1, p. 394;—*E. B.* 22, *t.* 1533.) 2. Europe. Virginia. Fl. small, greenish-yellowish. Has not fl. here, though cultivated for many years.
2. *pulcher*, L. (*Spreng. syst.* 2, p. 160;—*Pers. syn.* 1, p. 395;—*E. B.* 22, *t.* 1576.) 2. Europe. Fl. small, pale-yellow. Has not fl. here, though cultivated for many years.
3. *Wallichianus*, Meisn. (*Wall. pl. as. rar.* 3, p. 64; not Röm. and Sch.—R. *acutus*, *Roxb. fl. ind.* 2, p. 208, not L.; nor R. *Roxburghianus*, Röm. and Sch. which is R. *tuberosus*, Roxb. in Willd. Hb.) बुल पालुंग *Bun-palung*. ⊙ Bengal. (Serampore.) Assam. Oude. Fl. small, yellowish, Jan., Feb. and March; fr. April. Every part of this plant possesses a considerable degree of astringency and bitterness, but no acidity. (*Roxb.*)
4. *vesicarius*, L. (*Spreng. syst.* 2, p. 160;—*Meisn.* in *Wall. pl. as. rar.* 3, p. 64;—*Roxb. fl. ind.* 2, p. 209;—*J. Grah. Cat. B. pl.* p. 172.) चुक पालुंग *Chook-palung*. *Country Sorrel.* Fl. small, reddish, R. S.;

fr. C. S. ⊖ Africa. Cultivated in gardens all over Asia for culinary and medicinal purposes.

5. *Acetosa*, L. (*Spreng. syst.* 2, p. 461;—*E. B.* 2, t. 127;—*Roxb. H. B.* p. 26.) *Common Sorrel*. 2. Europe. Has not fl. here.

6. *Acetosella*, L. (*Spreng. syst.* 2, p. 461;—*E. B.* 24, t. 1674;—*Roxb. H. B.* p. 26.) 2. Europe. Fl. small, red, Feb. and March, but seldom; fr. 0.

EMEX, Neck. (*Spreng. syst.* 2, p. 162;—*Endl. gen. pl.* 1, p. 308.)

1. *spinosa*, Campd. (*Spreng. l. c.*—*Rumex spinosus*, L.) ⊖ Portugal. Sicily. Greece. N. Africa. Fl. small, greenish, Feb. and March; fr. April.

* *Fagopyrum emarginatum*, Meisn. (*Polygonum emarginatum*, Roth; B. Reg. 13, t. 1065.) Nepal.—*Coccoloba longifolia*, L. 5 W. Indies.—*C. tenuifolia*, L. 5 Jamaica.—*C. diversifolia*, Jacq.; Hook exot. fl. t. 102, 5 St. Domingo.—*C. punctata*, L. 5 W. Indies.—*C. nivea*, Jacq. 5 Jamaica.—*Triplaris americana*, L. 5 S. America.—*Podopterus mexicanus*, H. and B. 5 Mexico.

ORDER CLV.—PETIVERIACEÆ, Lindl. Nat. Syst. p. 212.

Herbs or undershrubs, of 2-3 genera and as many species, natives of S. America and the W. Indies. *Seguiera asiatica*, Lour. most likely does not belong to the order. Properties unknown.

PETIVERIA, L. (*Spreng. syst.* 2, p. 164, No. 1402.)

1. *alliacea*, L. (*Spreng. syst.* 2, p. 168.) 5 Jamaica. Yields a strong smell of garlic. Introduced into H. C. G. before 1814. Fl. ?

* *Seguiera americana*, L. S. America.

ORDER CLVI.—SCLERANTHACEÆ, Lindl. Nat. Syst. p. 213.

Small herbs, referred to 3 genera containing 8 species: 4 from N. Holland and the South Sea Islands; 3 from Europe; and 1 from S. America. They are of no known use.

SCLERANTHUS, L. (*DC. pr.* 3, p. 378.)

1. *annuus*, L. (*DC. l. c.*;—*E. B.* 5, t. 351.) ⊖ Europe. Levant. N. America. Fl. small, pale green, Feb. and March.

* *Guillemina illecebroides*, H. B. and Kth. 2. Quito.

ORDER CLVII.—NYCTAGINACEÆ, Lindl. Nat. Syst. p. 213.

THE MARVEL-OF-PERU TRIBE.

Herbs, shrubs or small trees, by Lindl. referred to 16 genera. Of these, Spreng. syst. assigns 42 species to S. America, Mexico and the W. Indies; 4 to N. America; 2 to New Holland; 1 to the Society Islands; 1 to Madagascar; 1 to Europe, and 1 to Egypt. 1 species of Boerhaavia has been found in S. Africa, according to Burchell. In the E. Indies have been discovered 5 species of *Boerhaavia*; 4 of *Pisonia*; 1 of *Oxia*, (Lour.) and — of *Epilithes*, Bl. Properties unimportant.

MIRABILIS, L. (*Spreng. syst.* 1, p. 501, No. 570;—*Endl. gen. pl.* 1, p. 311.) *Marvel-of-Peru*.

1. *Jalapa*, L. (*Spreng. syst.* 1, p. 536;—*B. M.* 11, t. 371;—*Roxb. H. B.* p. 16;—*J. Grah. Cat. B. pl.* p. 167.—*Nyctago hortensis*, Juss.—*Rheed.* 10, t. 75;—*Rumph.* 5, t. 89.) कृष्ण केली *Kishno-keli*. 2. Peru. Domesticated in our gardens; fl. and fr. whole year. Root purgative, whence the plant was formerly supposed to be the true Jalap-plant. Flowers large.

a. *kermesina*; Flowers crimson.

β. *kermesina-alba*; ditto, crimson-white.

γ. *alba*; ditto white.

δ. *flava*; ditto yellow.

ε. *flavo-alba*; ditto yellow-white.

2. *longiflora*, L. (*Spreng. syst.* 1, p. 536;—*Sm. exet. bot.* 1, t. 23;—*Roxb. H. B.* p. 16.) 2. Mexico. Introduced into H. C. G. in 1807, but had not flowered up to 1814.

OXYBAPHUS, L'Herit. (*Spreng. syst.* 1, p. 128, No. 199;—*Endl. gen. pl.* 1, p. 311.) *Umbrella-wort*.

1. *viscosus*, L'Herit. (*Spreng. syst.* 1, p. 180;—*B. M.* 13, t. 434.—*Mirabilis viscosa*, Cav.) 2. Peru. Fl. middle-sized, deep-rose. C. S.

BOERHAAVIA, L. (*Spreng. syst.* 1, p. 24, No. 65;—*Endl. gen. pl.* 1, p. 311.)

1. *erecta*, L. (*Spreng. syst.* 1, p. 36, excl. syn.—*B. procumbens*, *Hb. Banks*;—*Roxb. fl. ind.* 1, p. 146; *ed Carey* 1, p. 148;—*J. Grah. Cat. B. pl.* p. 167;—*Rheed.* 7, 56;—*Burm. ind.* 1,) 2. A very troublesome Weed common all over India. Fl. minute, and fr. whole year.

a. *rosea*; गोला पुराणा *Gada-poorna*. Fl. deep-rose.

β. *alba*; श्वेत पुराणा *Shwet-poorna*. Fl. white.

2. *repanda*, Willd. (*Pers. syn.* 1, p. 36;—*Roxb. H. B.* p. 2,) 2. St. Helena. Fl. minute, C. S.; fr. H. S.

PISONIA, Plum. (*Spreng. syst.* 2, p. 164, No. 1401;—*Endl. gen. pl.* 1, p. 312.)

1. *villosa*, Poir. (*Spreng. syst.* 2, p. 168.—*P. aculeata*, *Roxb. fl. ind.* 2, p. 217;—*J. Grah. Cat. B. pl.* p. 167; not L.) बाहस्त्राचुरा *Bogachura*.

- 5 ♂ Peninsula of India. Bengal, (Serampore.) Fl. small, greenish-white, March and April; fr. C. S. Makes impenetrable hedges.
2. *aculeata*, L. (*Spreng. l. c.*)—*Lam. ill. t. 861*;—*Gärtn. fr. 1, p. 367. t. 76, f. 4.*) 5 ♂ W. Indies. Fl. small, greenish-whitish, March and April.
3. *mitis*, Willd. H. C. G. in 1814.

BUGINVILLEA, JUSS.

ORDER CLVIII.—MENISPERMACEÆ, DC.—Lindl. Nat. Syst. p. 214.

THE COCCULUS TRIBE.

Twining shrubs, rarely trees, excluding Brannea, Bagalatta and Tiliacora, and adding Cyclea, Arn., referred by Lindl. to 20 genera. Of these, DC. pr. and Spreng. syst., enumerate 26 species for S. America, Mexico and the W. Indies; 4 for N. America; 3 for Madagascar; 3 for Japan; 3 for Timor; 1 for Senegal; 1 for Owaree; 1 for Arabia; 1 for Egypt; 1 for Mozambique; 1 for Mauritius; 1 for Dahuria; and 1 for the South Sea Islands. In S. Africa have been discovered 4 species, (*Harvey.*); and in the E. Indies about 60; viz. 1 of *Anamirta*; 3 of *Clypea*; 1 of *Cyclea*; 35 of *Cocculus*; 1 of *Epibacterium*, (*Nephroia*, Lour.); 1 of *Pselium*, (*Lour.*); 2 of *Gynostemma*, (*Bl.*); 8 of *Cissampelos*; 1 of *Stephania*, (*Lour.*); 4 of *Phytocrene*; 1 of *Natsiatum*; 1 of *Coscinium*; *Cocculus hexagynus*, Colebr. belongs to South China. — Properties under the species.

ANAMIRTA, Colebr. (*W. and A. pr. 1, p. 446.*)

1. *Cocculus*, W. and A. (*l. c.*);—*J. Grah. Cat. B. pl. p. 4.*—*A. paniculata*, Colebr. *Linn. soc. trans. 13, p. 52* and *66.*—*Menispermum Cocculus*, L.; *Gärtn. fr. 1, p. 219. t. 70, f. 7.*—*M. heteroclitum*, Rozb. *fl. ind. 3, p. 817.*—*Cocculus suberosus*, W. and A. pr. 1, p. 11;—*DC. pr. 1, p. 97.*—*C. orbiculatus*, DC. o. c. p. 98; excl. syn. Pluk.—*C. lacunosus*, DC. o. c. p. 97.) 5 ♂ Circar Mountains. The Concans. Fl. small, greenish. In H. C. G. Fl. ? Seeds ascertained to be an irritating poison to quadrupeds and fishes, owing to the Picrotoxine

they contain, and which is so active, that twelve grains given to a dog killed it in five minutes, notwithstanding the copious vomiting the dose excited. *Seeds* (*Cocculus indicus* of the shops) used to adulterate beer, though prohibited under a penalty of from £200 to 500 on the seller. (*Wight.*)

CLYPEA, Bl. (*W.* and *A.* pr. 1, p. 14.)

1. *herinandifolia*, W. and A. (*l. c.*—*Cissampelos herinandifolia*, *Willd.*;—*DC. pr. 1*, p. 100;—*Roxb. fl. ind. 3*, p. 842.—*C. hexandra*, *Roxb.*—*o. c. p. 841*, excl. syn?) निमूका $\textcircled{5}$ \curvearrowleft Peninsula of India. Bengal, (Serampore.) Assam. Fl. minute, greenish, R. S.
2. *glabra*, W. and A. (*pr. 1*, p. 450, annot.—*Cissampelos glabra*, *Roxb.* *fl. ind. 3*, p. 840.—*Cocculus Roxburghianus*, *DC. 1*, p. 96.) $\textcircled{5}$ \curvearrowleft Silhet. Fl. minute, yellowish, May; fr. Oct. and Nov. Root very large, acrid, used medicinally by the natives of Silhet.

CYCLEA, Arn. (*Wight. ill. 1*, p. 22.)

1. *Burmanni*, Arn. (*l. c.*—*Clypea Burmanni*, *W.* and *A.* pr. 1, p. 14.—*J. Grah. Cat. B. pl. p. 5.*—*Cocculus Burmanni*, *DC. pr. 1*, p. 96;—*C. peltatus*, *DC. l. c.*—*Menispermum peltatum*, *Lam.*—*Wal-tjedde, Gärtn. fr. 2*, p. 488, *t. 180*, *f. 12*;—*Rheed. 7*, *t. 49*;—*Burm. zeyl. t. 101.*) $\textcircled{5}$ \curvearrowleft Coromandel. The Concans. Ceylon. Has been introduced into H. C. G. ? Fl. ?

CISSAMPELOS, L. (*DC. pr. 1*, p. 100;—*W.* and *A.* pr. 1, p. 14.)

1. *convolvulacea*, *Willd.* (*W.* and *A. l. c.*;—*Roxb. fl. ind. 3*, p. 842, excl. syn. *Rheed.*—*J. Grah. Cat. B. pl. p. 5.*) $\textcircled{5}$ \curvearrowleft Dindygul. Rajmahl. Nepal. Fl. small, greenish, R. S.

2. *mauritiana*, Pet. Th. $\textcircled{5}$ Mauritius.

COCCULUS, Bauh. (*DC. pr. 1*, p. 96;—*W.* and *A.* pr. 1, p. 11.)

1. *cordifolius*, DC. (*o. c. p. 97*;—*W.* and *A. o. c. p. 12*;—*J. Grah. Cat. B. pl. p. 4.*—*♂. Wight. icon. 2*, *t. 485*, ♀ *ibid. t. 486.*—*C. convolvulaceus*, *DC. l. c.*—*Menispermum cordifolium*, *Willd.*;—*Roxb. fl. ind. 3*, p. 81.—*M. glabrum*, *Klein*; not *Kön.*) गोलुचा $\textcircled{5}$ \curvearrowleft Peninsula of India. Bengal, (Serampore.) Assam. Fl. small, yellowish. H. and R. S.; fr. C. S. Used extensively in a variety of diseases by the native practitioners of India, especially in such as are attended by febrile symptoms not of a high inflammatory kind, and in fevers of debility. The parts used are the root, stems, and leaves, from which a decoction called *Pachuna* is prepared. A sort of extract called *Palo* is obtained from the stem, and considered an excellent remedy in urinary affections and gonorrhœa. (*Trans. med. and phys. soc. Calcutta*, 3, p. 298.) From fifteen to thirty grains of the powdered root constitute a good emetic. (*Wight.*)

2. *crispus*, DC. (*pr. 1*, p. 97.—*Menispermum crispum*, L.—*M. verrucosum*, *Fleming*; *Roxb. fl. ind. 3*, p. 808;—*Rumph. 5*, *t. 44*, *f. 1.*) $\textcircled{5}$ \curvearrowleft Moluccas. Sumatra. Java. Fl. small, greenish, Feb. and March. Used against intermittent fevers among the Malays.

3. *acuminatus*, DC. (pr. 1, p. 99;—*W. and A.* pr. 1, p. 12;—*Deless. icon. sel.* 1, t. 95;—*J. Grah. Cat. B. pt. p.* 5.—*C. radiatus*, DC. *L. c.* —*Menispermum acuminatum*, Lam.—*M. radiatum*, Lam.—*M. polycarpon*, Roxb. *fl. ind.* 3, p. 816.—*Tiliacora racemosa*, Colebr.; Linn. *soc. trans.* 13, p. 67.—*Braunea menispermoidea*, Willd.; as to the leaves and male flowers.—*Rheed.* 7, t. 3.) **বাষ্ণবতা** *Baghaluta*. **তিলিয়াকুরা** *Tiliyakura*. ৩ ~ Both Peninsulas of India. Bengal, (Serampore.) Oude. Assam. Fl. small, cream-coloured, sweet-scented, H. and R. S.; fr. C. S.
 4. *villosus*, DC. (pr. 1, p. 98;—*W. and A.* pr. 1, p. 13.—*C. sepium*, Colebr.—*Menispermum villosum*, Lam.; not Roxb.—*M. hirsutum*, L. Roxb. *fl. ind.* 3, p. 814; excl. syn. Gärtn.—*M. myosotoides*, L.) **হস্তের** *Hoyer*. ৩ ~ Both Peninsulas of India. Bengal, (Serampore.) Hurdwar. Fl. minute, greenish, R. S.; fr. C. S. The juice of the ripe berries makes a good, durable, bluish-purple ink. A decoction of the fresh roots, with a few heads of long pepper, in goat's milk, is administered by the natives for rheumatic pains, half a pint every morning. It is considered heating, laxative, and sudorific. Curry is made of the leaves for patients who are under a course of the roots. (Roxb.)
 5. *incanus*, Colebr. (*Menispermum villosum*, Roxb. *fl. ind.* 3, p. 812; —not Lam.) ৩ ~ Chittagong. Silhet. In H. C. G. fl. R. S. (Roxb.)
 6. *tomentosus*, Wall. (*Cat.*—*Menispermum tomentosum*, Roxb. *fl. ind.* 3, p. 813.) **পদ্ম গুলঁচা** *Pudmo-gooluncha*. ৩ ~ Bengal, (Serampore.) Fl. small, green, C. S.; fr. H. S.
 7. *hexagonum*, Colebr. (*Menispermum hexagonum*, Roxb. *fl. ind.* 3, p. 816;—*Spreng. syst.* 2, p. 155.) ৩ ~ South of China. In H. C. G. fl. whole year. (Roxb.)
 8. *triandrus*, Wall. (*Cat.*—*Menispermum triandrum*, Roxb. *fl. ind.* 3, p. 816.) ৩ ~ Penang. In H. C. G. fl. R. S. (Roxb.)
 9. *palmatus*, DC. (pr. 1, p. 98;—*B. M.* 57, t. 2970, 71.—*Menispermum palmatum*, Lam.—*M. columba*, Roxb. *fl. ind.* 3, p. 807.) **কলঁচা** *Kulumbo*. ৪ ~ Forests on the coast of Mozambique. Fl. small, green, R. S. much cultivated in the Mauritius. This plant produces the well known *Calumba root*, so much esteemed for its powerful antiseptic, tonic, and astringent properties.
 10. *laurifolius*, DC. (pr. 1, p. 100;—*Deless. icon. select.* 1, t. 97.) ৫ Nepal, Kemaon. Fl. small, yellowish-greenish, H. S.; fr. O.
 11. *calophyllus*, Wall. MSS. In H. C. G. Fl. ?
 12. *megaspermus*, (Menispermum megaspermum, Roxb. *H. B.* p. 72.) ৩ ~ Silhet. In H. C. G. fl. H. S. (Roxb.)
- MENISPERMUM**, L. (DC. 1, p. 102.)
1. *canadense*, L. (DC. 1. c.;—*B. M.* 44, t. 1910.) ৩ ~ N. America. Has not fl. here.

SL

COSCINIUM, Colebr. (*Lindl. nat. syst. p. 216.*)

1. *fenestratum*, Colebr. (*Menispermum fenestratum, Gürtn. fr. 1, p. 219. t. 46, f. 5;—DC. pr. 1, p. 103;—Roxb. fl. ind. 3, p. 809.*) 5 ~ Ceylon. Has been introduced into H. C. G. ?

- * *Cocculus macrocarpus*, W. and A.; Wight. ill. 1, t. 7. Rheed. 11, t. 62. 5 ~ The Ghauts.—*C. malabaricus*, DC. 5 ~ S. Concan.—*C. Plukenetii*, DC. 5 ~ Tanjore.—*C. oleracea*, Buch. Gungachara.—*Gynostemma pedatum*, Bl. Java.—*G. simplicifolium*, Bl. Java.—*Phytocrene gigantea*, Wall. pl. as. rar. 3, t. 216. 5 ~ Martaban, near Amherst.—*P. bracteata*, Wall. ORDER CLIX.—LARDIZABALACEÆ.

(Sub-Order ? Lardizabaleæ,—Lindl. Nat. Syst. p. 216.)

Twining shrubs, seldom trees, (Burasaia) of 3 genera, DC. pr. enumerates 3 species for Chili and Peru; 1 for Madagascar; and 1 for China. The published Indian species are the following :—

STAUNTONIA, DC. (pr. 1, p. 96.—Hollböllia, Wall.)

1. *latifolia*, R. Br. (Hollböllia latifolia, Wall. tent. fl. nep. t. 16.) 5 ~ Nepal. Kemaon. Has not fl. here.

- * *S. angustifolia*, R. Br. (Hollböllia angustifolia, Wall. tent. fl. nep. t. 17.) 5 ~ Nepal.

ORDER CLX.—BREXIACEÆ, Lindl. Nat. Syst. p. 218.

The following are the only published species of this order, the properties of which are unknown.

BREXIA, Pet. Thouars. (*Spreng. syst. 1, p. 520, No. 879.*)

1. *madagascariensis*, Ker. (*B. Reg. 9, t. 730;—Spreng. syst. 1, p. 792;—c. p. p. 94.*—Venana madagascariensis, Lam.;—Roxb. fl. ind. ed. Carey, 2, p. 312.) 5 Madagascar. Fl. large, pale green, H. S.; fr. R. S. 2. *spinosa*, Lindl. (*B. Reg. 11, t. 872;—Spreng. syst. c. p. p. 94;—B. heterophylla, Bojer.*—Theophrasta serratifolia, Hortul.) 5 Madagascar. In H. C. G.

* *B. chrysophylla*, Swt. 5 Madagascar.

ORDER CLXI.—ERICACEÆ, DC.—Lindl. Nat. Syst. p. 220.

THE HEATH TRIBE.

Undershrubs, shrubs or trees, by Lindl. referred to 43 genera. Of these, Spreng. syst. enumerates about 50 species from N. America; 46 from S. America, Mexico and the W. Indies; 26 from Europe; 9 from Siberia; 6 from the Mascarenhas Islands; 4 from the Straits of Magellan; 2 from the Levant, 1 from Caucasus; 1 from Dauria; 1 from Madeira; 1 from the Canaries; 1 from Greenland; 2 from New Zealand; 3 from China; and 1 from Japan. In S. Africa, have been discovered 450 species, (Harvey); and in the E. Indies, according to Wall Cat. and Royle ill. 22; viz. 8 of *Andromeda*; 1 of *Cassiope*; 3 of *Gaultheria*; and 10 of *Rhododendron*.—To the E. Indian Ericaceæ must be added the Javanese species of *Diploscia*, *Vireya*, and *Hymenanthus*, Bl. Exclusive of Java, all the Indian plants of this order have been found on the Himalayas, the Khassya Hills, and the Neelgherries ones excepted.—General properties astringent and diuretic.

RHODODENDRON, L. (Spreng. syst. 2, p. 275, No. 1548.)

1. *arboreum*, Sm. (exot. bot. t. 9;—B. Reg. 11, t. 890;—Spreng. syst. 2, p. 292;—Hook. exot. fl. t. 168;—Sut. fl. gard. 3, t. 250.—R. puniceum, Roxb. fl. ind. 2, p. 409.—R. purpureum, Buch. MSS.) 5 Nepal. Kemaon. Fl. large, dark scarlet. In H. C. G. fl. April and May, (Roxb. H. B. p. 33).—*Wood* used for making gun-stocks. (Hardwicke.)

* *Gaultheria fragrantissima*, Wall. 5 Nepal.

ORDER CLXII.—VACCINIACEÆ, Lindl. Nat. Syst. p. 221.

THE BILBERRY TRIBE.

Shrubs or small trees, by Lindl. referred to 8 genera. Of these, Spreng. syst. assigns 30 species to S. America, Mexico, and the W. Indies; 30 to N. America; 3 to Europe; 3 to Japan; 1 to the Society Islands; 1 to Madagascar; 1 to Armenia; and 1 to Madeira. In the E. Indies, according to Wall. Cat. and Royle ill., have been discovered 10 species; viz. 3 of *Vaccinium*; 2 of *Gaylussacia*; and 6 of *Thibaudia*;—all natives of the Khassya Mountains, except 1 from the Neelgherries; 1 from Tavoy, and 1 from Java.—Properties unimportant.

VACCINIUM, L. (Spreng. syst. 2, p. 171, No. 1421.)

1. *Sprengelii*, Wall. (Cat.) 5 Khassya Mountains.—Has not fl. here.
2. *secundum*, Wall. 5 Neelgherries.
3. *Schmidianum*, Wall. 5 Neelgherries.

THIBAUDIA, Pav. (*Spreng. syst.* 2, p. 275, No. 1553.)

1. *variegata*, Wall. (*Cat.*;—*Royle*. t. 79, f. 1.—*Ceratostema variegatum*, *Roxb. fl. ind.* 2, p. 413.—*Agapetes variegata*, *D. Don.*; in *G. Don's Mill. dict.* 3, p. 862.) 5 Garrow Hills. Khassy Mountains. Fl. large, red and rose-coloured, with the mouth greenish, C. S.; fr. June and July. (*Roxb.*)
2. *vaccinacea*, Wall. (*Cat.*—*Ceratostema vaccinaceum*, *Roxb. fl. ind.* 2, p. 412.) 5 Garrow Hills. Khassy Mountains. Fl. small, white, tinged with green, March and April; fr. June and July. (*Roxb.*)
3. *setigera*, Wall. (*Cat.*—*Agapetes setigera*, *D. Don.*; in *G. Don's Mill. dict.* 3, p. 862.) 5 Khassy Mountains. Fl. largish, red, internally pale red, Feb., fr. 0.

* *Thibaudia loranthiflora*, Wall. Tavoy.—*T. acuminata*, Wall. Khassy Mountains.—*Gaylussacia serrata*, Lindl. Khassy Mountains.

ORDER CLXIII.—EPACRIDACEÆ.—Lindl. Nat. Syst. p. 222.

Shrubs or small trees, by Lindl. referred to 26 genera, containing more than 150 species, all natives of N. Holland and South Sea Islands. Properties unimportant.

* *Leucopogon malayanus*, Jack. 5 Singapore, the only Indian species yet discovered.

ORDER CLXIV.—PRIMULACEÆ, Vent.—Lindl. Nat. Syst. p. 223.

THE PRIMROSE TRIBE.

Herbs, by Lindl. referred to 24 genera. Of these, *Spreng. syst.* enumerates about 65 species for Europe; 20 for N. America; 14 for S. America; 12 for Siberia; 10 for New Holland and the South Sea Islands; 6 for Caucasus; 5 for the Levant; 3 for N. Persia; 2 for Dahuria; 2 for China; 1 for Japan; 2 for Altai; 1 for N. Africa; 1 for Tauria; 1 for Arabia; 1 for Bourbon; 2 for Greenland; 1 for Patagonia; 1 for the Straits of Magellan. Five species have been found in S. Africa, (*Harvey.*); and about 47 in the Himalayas; viz. 8 of *Androsace*; 22 of *Primula*; 14 of *Lysimachia*; 1 of *Anagallis*; 1 of *Centunculus*; and 1 of *Samolus*. (*D. Don. Wall. Cat. Royle. ill.*) Properties of no importance.

PRIMULA, L. (*Spreng. syst.* 1, p. 504, No. 616.)

1. *denticulata*, Sm. (*exot. bot.* 2, t. 114;—*Roxb. fl. ind. ed. Carey*, 2,

1. *persicum*, Mill. (*Spreng. syst.* 1, p. 572;—*B. M.* 2, t. 44.) 2. Greece. Has been introduced into H. C. G. Fl. ?

ANDROSACE, L. (*Spreng. syst.* 1, p. 504, No. 617.)

1. *nana*, Horn. (*Loud. hort. brit.* p. 56, No. 3756.) ♂ Fl. small, white, C. S. Denmark.

CENTUNCULUS, L. (*Spreng. syst.* 1, p. 369, No. 457.)

1. *minimus*, L. (*Spreng. syst.* 1, p. 440;—*E. B.* 8, t. 531.) ♂ Europe. Fl. very small, rose-coloured, Feb.

ANAGALLIS, L. (*Spreng. syst.* 1, p. 503, No. 610.)

1. *arvensis*, L. (*Pers. syn.* 1, p. 173;—*E. B.* 8, t. 529.—*A. phoenicea*, Lam.—*Spreng. syst.* 1, p. 570.) ♂ Europe. Middle Asia. N. America. Fl. smallish, scarlet, C. S.; fr. March.

β *coerulea*; (*A. arvensis*, *Roxb. fl. ind. ed. Carey.* 2, p. 24; excl. syn.) ♂ Khamon. Nepal. Khassy Mountains. Fl. light blue, C. S.

2. *coerulea*, Schreb. (*Pers. syn.* 1, p. 173;—*Spreng. syst.* 1, p. 570;—*E. B.* 26, t. 1823.) ♂ Europe. Middle Asia. Fl. smallish, blue, Feb.

ORDER CLXV.—MYRSINACEAE.—Lindl. Nat. Syst. p. 224.

Shrubs, rarely climbing, or trees, by Lindl. referred to 20 genera. Of these, Spreng. syst. and Alph. DC. enumerate 59 species for S. America, Mexico and the W. Indies; 4 for Japan; 5 for New Holland and the South Sea Islands; 6 for Bourbon and Mauritius; 3 for Madagascar; 1 for N. America; 1 for the Canaries; 1 for the Azores; and 1 for China. Harvey assigns 15 species to S. Africa. In the E. Indies have, according to Alph. DC., (including *Oncinum*) been discovered 102 species; viz. 2 of *Ægiceras*; 13 of *Myrsine*; (including *M. acuminata*, Royl.); 1 of *Badula*, (Ceylon.); 54 of *Ardisia*; 13 of *Embelia*; 2 of *Choripetalum*; 2 of *Samara*, (Roxb.); 14 of *Mæsa*; and 1 of *Oncinus*. (Lour.) To these must be added 6 species uncertain as to their genus. Most of them inhabit the Himalayns, Assam, the Khassy Mountains, the Circars, Neelgherries, and the Mountains of the ultra-gangetic Peninsula of India, and of Jaya. But few species have been found in the plains. Properties almost unknown.

BADULA, Juss.

ORDER CLXVI.—SAPOTACEÆ, Endl.—Lindl. *Nat. Syst.* p. 225.

THE SAPODILLA TRIBE.

Trees and shrubs, referred by Lindl. (excluding Hunteria and Acosta, and adding Isonandra, Wight.) to 14 genera. Of these, Spreng. syst. enumerates 38 species for S. America, Mexico, and the W. Indies; 3 for Mauritius, (including 2 from Wall. Cat.); 6 from New Holland and the Friendly Islands; 4 from N. America; 1 from Arabia; 1 from N. Africa; and 1 from Guinea. In S. Africa, have been found 10 species, (*Harvey.*); and in the E. Indies 22; viz. 2 of *Chrysophyllum*; 5 of *Mimusops*; 7 of *Bassia*; 6 of *Sideroxylon*; and 2 of *Isonandra*;—nearly all natives of Nepal, Assam, the Khassya Mountains, the Circars, the Concans, the Mountains of India east of the Ganges, Ceylon, the Moluccas, and Java. Properties under the species.

ACHRAS, L. (*Spreng. syst.* 2, p. 12, No. 1316;—*G. Don's Mill. dict.* 4, p. 33.)

1. *Sapota*, L. (*Spreng. syst.* 2, p. 132;—*G. Don. l. c.*;—*Roxb. Jl. Ind.* 2, p. 181;—*J. Grah. Cat. B. pl. p. 106*;—*B. M. 58, t. 3111 and 3112*.) Common Sapota. Bully-tree. L. 5 W. Indies. Abundantly cultivated,

340

SAPOTACEÆ.

GL

throughout all the hot parts of South America for the sake of its fruit. Not uncommon in our gardens. Fl. smallish, whitish, H. S.; fr. R. S. *Timber* considered of great service in the making of shingles for corn houses. *Bark* astringent, and commonly known by the name of *Cortex jamaicensis*, according to Browne, being frequently administered to the Negroes in lieu of Jesuit's Bark, and found to answer all the purposes of that medicine. From every part of the tree a tenacious, viscid, white juice issues. *Fruit* in appearance like an old, decayed potato, yet one of the most luscious in the W. Indies; but so abundant in an acrid milk, that it cannot be eaten until it is completely ripe; or, according to French authors, until it almost begins to be putrid. *Seeds* aperient, diuretic. (*Hook. l. c.*)

a. Fruit elliptic or ovate. (*Jacq. am. p. 57, t. 41.—Browne, jam. p. 200, t. 19, f. 3.*)

β. Fruit roundish, somewhat depressed. (*Jacq. am. l. c. t. 41. β. Achras Zapotilla, Browne, jam. p. 200.—Sloane, jam. 2, p. 171, t. 230;—ibid. p. 172, t. 169, f. 2.*)

LUCUMA, Juss. (*Spreng. syst. 1, p. 510, No. 723;—G. Don's Mill. dict. 4, p. 33.*)

1. *mammosa*, Juss. (*Gen. pl. p. 152;—Gürtn. fil. fr. 3, p. 129;—Spreng. syst. 1, p. 667; G. Don. l. c.—Achras mammosa, L.; Roxb. H. B. p. 25.—A. Sapota major, Jacq. am. 56, t. 182, f. 19; ed. pict. p. 32, t. 59.)—*Sapota mammosa*, *Mill. dict. No. 2;—Gürtn. fr. 2, p. 104.—Sloane, jam. 2, p. 124, t. 218.*) L. b S. America. W. Indies.—*Common Mamme Sapota*. Fl. small, whitish. *Fruit*, (*American Marmalade*.) large, oval or top-shaped, covered with a brownish rough skin, under which is a soft pulp, of a russet colour, very luscious, which is called natural marmalade, from its likeness to marmalade of quinces. Was introduced from China into H. C. G. in 1807, but had not fl. up to 1814.*

CHRYSOPHYLLUM, L. (*Spreng. syst. 1, p. 510, No. 722;—G. Don's Mill. dict. 4, p. 31.*)

1. *Cainito*, L. (*Spreng. syst. 1, p. 666;—G. Don. l. c.;—Jacq. am. p. 51, t. 37, f. 1; ed. pict. p. 30, t. 51;—Lam. ill. t. 120;—Gürtn. fr. 3, p. 120, t. 201;—B. M. 58, t. 3072;—Roxb. H. B. p. 17;—Browne, jam. p. 171, t. 14, f. 2;—Sloane, jam. 2, p. 170, t. 229.) *Star-apple*. L. b W. Indies. S. America. Fl. small, yellowish-white, H. S.; fr. R. S. The Star-apple is a well known fruit in the W. Indies, where, however, it appears to be more esteemed by the natives, than it is by Europeans. (*Hook.*)*

2. *macrophyllum*, G. Don? (*Mill. dict. 4, p. 32.*) L. b Sierra Leonæ. In H. C. G. Fl.?

3. *Roxburghii*, G. Don. (*Mill. dict. 4, p. 33.—C. acuminatum, Roxb. fl. ind. 1, p. 599; ed. Carey, 2, p. 345;—J. Grah. Cat. B. pl. p. 105; not, Lam.*) b Khassya Mountains. Assam. Fl. minute, pale yellow,

April and May; fr. Oct. *Fruit* greedily eaten by the natives, though the pulp is nearly insipid, and uncommonly clammy, adhering to the lips and knife with great tenacity. (*Roxb.*)

4. *oblongum*, Wall. 5 Khassya Hills, 1828.

IMBRICARIA, Commers. (*Juss. gen. pl. p. 152*;—*G. Don's Mill. dict. 4, p. 35.*)

1. *Commersonii*, G. Don. (*l. c.*—*Mimusops Imbricaria*, *Willd.*;—*Spreng. syst. 2, p. 208*;—*Bl. bijdr. p. 675.*) 5 Bourbon. Mauritius. Java. In gardens. Has been cultivated here for many years, without flowering.

MIMUSOPS, L. (*Spreng. syst. 2, p. 170*, No. 1419;—*G. Don's Mill. dict. 4, p. 34.*)

1. *Elengi*, L. (*Spreng. syst. 2, p. 208*;—*G. Don. l. c.*;—*Gürtn. fr. 1, p. 198*, *t. 42, f. 4*;—*Roxb. Corom. 1, t. 14*; *fl. ind. 2, p. 236*;—*J. Grah. Cat. B. pl. p. 106*;—*Rheed. 1, t. 20*;—*Rumph. 2, t. 63.*) 5 *বুকুল* *Bukul.* 5 Moluccas. Ceylon. Both Peninsulas of India. Bengal, (Serampore.) Silhet. Fl. middle-sized, white, fragrant, H. S.; fr. R. S. A very ornamental tree, on account of its fragrant flowers generally found in the gardens of the Natives, and round Mussulman Mausoleums.

2. *Kauki*, L. (*Spreng. syst. 2, p. 208*;—*G. Don's Mill. dict. 4, p. 35*;—*Roxb. fl. ind. 2, p. 238*;—*J. Grah. Cat. B. pl. p. 106*;—*R. Br. pr. 1, p. 581.*—*Mimusops dissectus*, *Spreng. l. c.*;—*B. M. 59, t. 3157*, excl. syn.—*Mimusops hexandra*, *Roxb.*—*Achras dissecta*, *Forst.*—*A. Balata*, *Aubl.*;—*Rheed. 4, t. 25*;—*Rumph. 3, t. 8.*) 5 New Holland. Moluccas. Malay Islands. Malabar. Gour. Fl. middle-sized, yellowish white, faintly tinged with rose, H. S. An unctuous fluid exudes from this tree. *Fruit* esculent, agreeably acid, on which account the tree is extensively cultivated in China, Manilla, and Malabar. The leaves pounded and mixed with the roots of Curcuma and with Ginger, are used as cataplasms for tumours. (*Hook.*)

3. *hexandrus*, Roxb. (*Corom. 1, t. 15*; *fl. ind. 2, p. 238*;—*Spreng. syst. 2, p. 208*;—*G. Don's Mill. dict. 4, p. 35*;—*J. Grah. Cat. B. pl. p. 106.*) 5 Mountainous parts of the Circars. Malabar Hill. Bombay. Fl. smallish, whitish, H. S.; fr. R. S. Wood much used in Guzerat for a variety of purposes, such as making sugar-mill-beams, well-frames, and other things where toughness is required. *Fruit* eatable. (*Dr. Gibson.*)

4. *Erythroxylon*, Bojer. 5 Mauritius. Bourbon.

BASSIA, Kön. (*Spreng. syst. 2, p. 442*, No. 1746;—*G. Don's Mill. dict. 4, p. 35.*)

1. *longifolia*, L. (*Spreng. syst. 2, p. 447*;—*G. Don. l. c.*;—*Gürtn. fr. 2, p. 104, t. 104, f. 2*;—*Roxb. fl. ind. 2, p. 523.*) 5 Southern part of the Coast of Coromandel. Malabar. Ceylon. Fl. middle-sized, whitish, May; fr. Aug. and Sept. Wood as hard and durable as teak, but not so easily worked, nor is it procurable of such length. The leaves are

342

SAPOTACEAE.

GSL

boiled in water, and given as a medicine in several diseases. The *bark* is a cure for the itch. The *flowers*, which fall in May, are gathered by the common people, dried in the sun, roasted, and eaten as food. They are also bruised and boiled to a jelly, and made into small balls, which are sold, or exchanged for fish, rice, &c. The *milk* of the *green fruit*, and of the tender bark is given as a medicine. The *oil* pressed from the *fruit* is used for lamps. It is the principal ingredient in making country soap, and to the common people a substitute for ghee and cocoa-nut in their curries and other dishes. Cakes are made of it, and many of the poor get their livelihood by selling these sweet oil-cakes. The cake, left after the oil is expressed, is used for washing the head, and carried as a small article of trade to those countries where the tree is not to be found. (Roxb.)

2. *latifolia*, Roxb. (*Corom.* 1, t. 19; *fl. ind.* 2, p. 526;—*Spreng. syst.* 2, p. 447, excl. syn. Forst.;—*G. Don's Mill. dict.* 4, p. 36;—*J. Grah. Cat. B. pl. p. 107.*) गहरा। *Muhooa*. ५ Mountainous parts of the Circars. Bengal. Malabar Hill. Bombay. Throughout the Concan. Guzerat. Malwa. Fl. middle-sized, white, with a tinge of green and cream-colour, March and April; fr. July and Aug. *Wood* hard, very strong, and proper for naves of wheel-carriages. *Flowers* eaten raw by the natives. An ardent spirit is distilled from them by the hill-people. The *seeds* yield by expression a large quantity of concrete oil, which is used to adulterate ghee, for frying cakes, and by the poorer people to burn. There is frequently to be found a drop of whitish, soft, tasteless resin on the apices of the flowers, before they open. (Roxb.)

3. *butyracea*, Roxb. (*As. Res.* 8, p. 477;—*fl. ind.* 2, p. 527;—*Spreng. syst. c. p. p. 189*;—*G. Don's Mill. dict.* 4, p. 36;—*D. Don. pr. fl. nep.* p. 146.) ५ Almora Hills. Nepal. Fl. smallish, white. Has not fl. here as yet. This tree produces a vegetable butter. The *Kernels* are bruised into the consistence of cream, and then put into a cloth bag, with a moderate weight laid upon them, and left to stand till the oil or fat is expressed. This becomes immediately of the consistence of hog's lard, and is of a delicate white colour. It is much esteemed in rheumatism and contractions of the limbs. It is also used by the natives of rank perfumed as an unction. The pulp of the *fruit* is eaten by some. (Roxb.)

SIDEROXYLON, L. (*Spreng. syst.* 1, p. 510, No. 721;—*G. Don's Mill. dict.* p. 28.)

ORDER CLXVII.—DIOSPYRACEÆ.—EBENACEÆ, Vent.—Lindl.
Nat. Syst. p. 226.

THE EBONY TRIBE.

Trees or shrubs, by Lindl. referred (adding *Euclea*) to 8 genera. Of these, Spreng. syst. assigns 11 species to New Holland and the Friendly Islands; 7 to S. America, Mexico, and the W. Indies; 6 to the Mascarenhas; 2 to N. America, and 1 to N. Africa, and S. Europe. *Diospyros vaccinoïdes*, Hook. belongs to China. In S. Africa have been found 30 species. (*Harvey.*) and in the E. Indies, according to Spreng., Roxb. and Wall. Cat., 42 species of *Diospyros*; and 2 of *Maba*. They are all discovered in the islands of the Indian Archipelago and in both Peninsulas of India; *Diospyros* extending from the Khassya Mountains to the Himalayas.

"Remarkable only for the hardness and blackness of the wood of some species, and for the eatable quality of the fruit. The former is well known under the name of Ebony and Ironwood; the latter is occasionally introduced from China as a dry sweetmeat. It is noted for extreme acerbity before arriving at maturity." (Lindl.)

DIOSPYROS, L. (Spreng. syst. 2, p. 170, No. 1412; G. Don's Mill. dict. 4, p. 38.)

1. *tomentosa*, Roxb. (fl. ind. 2, p. 532;—G. Don. l. c.;—Wight. icon. 1, t. 182, 83.) তুমাল Tumal. L. 5 N. of Bengal, extending to Kheree

- jungle. Fl. small, whitish, April and March; fr. O. Wood hard, black, heavy. (*Roxb.*)
2. *Chloroxylon*, Roxb. (*Corom.* 1, t. 49; *fl. ind.* 2, p. 538;—*Spreng. syst.* 2, p. 204;—*G. Don's Mill. dict.* 4, p. 38.) 5 Coast of Coromandel, among the Circars. Fl. small, white. In H. C. G. fl. March and April. (*Roxb.*)
3. *cordifolia*, Roxb. (*Corom.* 1, t. 50; *fl. ind.* 2, p. 538;—*Spreng. syst.* 2, p. 204;—*G. Don's Mill. dict.* 4, p. 38.) बुन्गाब *Bun-gab.* 5 Peninsula of India, Bengal, (Serampore. Monghir.) Fl. small, greenish-white, March and April; fr. R. S.
4. *sylvatica*, Roxb. (*Corom.* 1, t. 47; *fl. ind.* 2, p. 537;—*Spreng. syst.* 2, p. 203;—*G. Don's Mill. dict.* 4, p. 40.) 5 Circars. Introduced into H. C. G. in 1803, but had not fl. up to 1814.
5. *reticulata*, Willd. (*Spreng. syst.* 2, p. 203;—*G. Don's Mill. dict.* 4, p. 40.) 5 Mauritius. Has not fl. here, though cultivated for many years.

SUB-ORDER ? STYRACEÆ, Rich.—Lindl. *Nat. Syst.* p. 227.

A very unsettled order, requiring a complete re-examination.—Trees or shrubs, (excluding *Hopea*, L.) by Lindl. referred to 8 or 9 genera. Of these, *Spreng. syst.* enumerates 24 species for S. America, Mexico and the W. Indies; 4 for N. America; 1 for Asia Minor and S. Europe; and 1 for China. In the E. Indies have been found according to *Spreng.*, *Roxb.* and *Wall. Cat.*, 27 species of *Symplocos*; 5 of *Styrax*; and 1 of *Decadia*. (*Lour.*) all natives of the mountains of India. Only one has been discovered in the plains of Bengal. *Styrax Benzoin* is a native of Sumatra, and *Decadia* of Cochin China. Properties unimportant.

SYMPLOCOS, L. (*Spreng. syst.* 3, p. 831, No. 2626;—*G. Don's Mill. dict.* 4, p. 1.)

1. *ferruginea*, Roxb. (*fl. ind.* 2, p. 542;—*G. Don's Mill. dict.* 4, p. 2.) 5 Khassy Mountains. Fl. middle-sized, yellow, Sept. and Oct.

2. *spicata*, Roxb. (*fl. ind.* 2, p. 541;—*G. Don's Mill. dict.* 4, p. 2.) 5 Khassy Mountains. Assam. Fl. small, yellow, R. S.; fr. C. S. Nuts hard, about the size of a pea, strung like beads, by the natives and hung round the necks of their children to prevent evil. (*Roxb.*)

3. *racemosa*, Roxb. (*fl. ind.* 2, p. 539;—*G. Don's Mill. dict.* 4, p. 3.) 5 Loh. Burdwan. Midnapore. Nepal. Kemaon. Fl. small, lively yellow, Dec.; fr. May. Bark much in request as a mordant in dyeing red with *Rubia cordifolia*, L. The red powder (*Abeer*) used by the natives during the *Hoolee* holidays is made of the bark of this tree. (*Roxb.*)

4. *pulcherrima*, Wall. 5 Nepal.

STYRAX, L. (*Spreng. syst.* 2, p. 274, No. 1539;—*G. Don's Mill. dict.* 4, p. 4.)

1. *serrulatus*, Roxb. (*fl. ind.* 2, p. 415;—*G. Don. o. c. p. 5.*) 5 Chittagong. Fl. largish. In *H. C. G. fl. H. S.*; fr. R. S. (*Roxb.*)

2. *Benzoin*, Dryand. (*philos. trans.* 77, p. 308, t. 12;—*Spreng. syst.* 2, p. 285;—*G. Don's Mill. dict.* 4, p. 6;—*Roxb. fl. ind.* 2, p. 416;—*Bl. bijdr.* p. 671.) 5 Sumatra. Introduced into *H. C. G.* in 1812. Fl. ? This tree produces the gum-resin called Benzoin, of which the only preparation is *flores benzoës*, a medicine now nearly out of use.

ORDER CLXVIII.—ILICIACEÆ, AQUIFOLIACEÆ, DC.—Lindl. Nat. Syst. p. 228.

THE HOLLY TRIBE.

Trees or shrubs, by Lindl. referred to 14 genera. Of these, DC. pr. and Spreng. syst. enumerate 28 for S. America, Mexico, and the W. Indies; 20 for N. America; 9 for Japan; 2 for Europe; 2 for Madagascar; 1 for Mauritius; 1 for the Canaries; 1 for Madeira; 1 for China; 1 for the Straits of Magellan; 1 for N. Africa; and about 10 for S. Africa. In the East Indies have, according to Spreng. and Wall. Cat. been discovered about 14 species of *Ilex* or *Prinos*; and 2 of *Monetia*. With the exception of *Monetia tetracantha*, an inhabitant of the plains of India, all the Indian forms of this order have been found in the Himalayas, the Khassy Mountains, the Neelgherries, and the mountains about Penang, Singapore and Moulmein. Properties unimportant.

CASSINE, L. (*Spreng. syst.* 1, p. 533, No. 1110;—*G. Don's Mill. dict.* 2, p. 12;—*DC. pr.* 2, p. 11.)

1. *barbara*, L. (*Spreng. syst.* 1, p. 939;—*G. Don. o. c. p. 13.*;—*DC. o. c. p. 12.*) 5 C. B. S. Introduced in 1840.

ORDER CLXXI.—CONVOLVULACEÆ, R. Br.—Lindl. Nat. Syst.
p. 231.

THE BINDWEED TRIBE.

Herbs or shrubs, usually twining, rarely creeping, or erect, by Lindl. referred to 28 genera. Of these, though much underrating, Spreng. syst. enumerates about 150 for S. America, Mexico and the W. Indies; 18 for Europe; 16 for N. America; 8 for N. Africa; 6 for Guinea; 7 for the Canaries; 5 for Siberia; 4 for E. Africa; 4 for the Mascarenhas Islands; 2 for Madagascar; 4 for Arabia; 4 for China; 3 for Japan; 3 for Tauria; 2 for the Orient; 1 for Dauria; 1 for Persia; and 1 for the Azores. Many are common to several parts of the world. In S. Africa, excluding Falkia, Retzia, Lonchostoma and Cuscuta, have been found 23 species, (Harvey); in N. Holland and the South Sea Islands more than 50; (R. Br.) and in the E. Indies, according to Choisy, 130; viz. 5 of *Rivea*; 31 of *Argyreia*, (including *A. floribunda*, Wall.); 1 of *Blinkworthia*; 2 of *Moorcroftia*; 2 of *Quamoclit*; 3 of *Batatas*; 3 of *Pharbitis*; 3-4 of *Calonyction*; 2 of *Lepistemon*; 53 of *Ipomoea*; 6 of *Convolvulus*; 4 of *Aniseia*; 1 of *Calystegia*; 1 of *Hewittia*; 1 of *Skinnera*; 4 of *Porana*; 2 of *Neuropeltis*; 4 of *Breweria*; 1 of *Cressa*; and 2 of *Evolvulus*. They are to be found everywhere both in the mountains and plains, but most abundantly on the latter.

"Their roots abound in an acrid milky juice, which is strongly purgative; this quality depends upon a peculiar resin, which is the active principle of the Jalap, the Scammony, and the others whose roots possess similar qualities." (Lindl.)

Rivea, Choisy. (G. Don's Mill. dict. 4, p. 253.)

1. *tiliaefolia*, Choisy. (G. Don. l. c.;—J. Grah. Cat. B. pl. p. 127.—*Convolvulus tiliæfolius*, Desrousse. in Lam. dict. 3, p. 544.—*C. gangeticus*, Roxb. fl. ind. 1, p. 467; ed. Carey, 2, p. 46.—*Ipomoea tiliæfolia*, Röhm. and Sch.—I. *gangetica*, Swt.—I. *campanulata*, L.; not Lour.) 5 ↗ Philippine Islands. Both Peninsulas of India. Bengal, (Serampore.) Mauritius. C. G. H. W. Indies. Peru. Fl. very large, pale rose-coloured, tinged with purple, with a dark purple eye. C. S.; fr. H. S. β. *leucantha*. Flowers white.

2. *ornata*, Choisy. (*G. Don's Mill. dict.* 4, p. 254.—*Letsomia ornata*, Roxb. *fl. ind.* 1, p. 496; *ed. Carey*, 2, p. 86.—*Argyreia ornata*, Swt.—*Convolvulus candidans*, Roth.; not hb. Willd.) 5 ~ Coromandel. Monghir. Cawnpore. Nepal. Fl. very large, pure white, with a pale greenish eye, R. S.; fr. C. S.
3. *Bona nox*, Choisy. (*G. Don's Mill. dict.* 4, p. 254.—*Letsomia Bona nox*, Roxb. *fl. ind.* 1, p. 494; *ed. Carey*, 2, p. 84.—*Argyreia Bona nox*, Swt.—*Rivea fragrans*, Nimmo;—*J. Grah. Cat. B. pl.* p. 127.) कल्मी लता *Kulmee-lata*. Clove-scented creeper. Midnapore creeper. 5 ~. The Concans. Guzerat. Bengal, (Serampore, Midnapore.) Fl. large, pure white, expanding at sun-set, and perfuming the air to a considerable distance with a fragrance resembling that of the finest cloves, R. S.; fr. C. S. Leaves used by the natives in their curries.
- ARGYREIA**, Lour. (*G. Don's Mill. dict.* 4, p. 254.)

B. rubra. (*Convolvulus Jalapa*, *Lam.*;—*B. M.* 38, *t.* 1572.—*C. Jalapa*, *B. rosea*, *Ker. B. Reg.* 8, *t.* 521.) $\frac{1}{2}$ Mexico, about Vera Cruz. Fl. very large, deep rose-coloured, R. and C. S. This variety, has been introduced into Bengal by Lord Auckland. It is not the true Jalap Plant, nor does it, according to Dr. O'Shaughnessy's chemical analysis, contain any resin. The above-mentioned white-flowered variety, *a.* the Jalap of N. America, (*Convolvulus macrorrhizos*, *Roxb. H. B.* *p.* 14,) was introduced into H. C. G. in 1801, but had not flowered up to 1814.

The true Jalap of the shops is the product of *I. Jalapa*, Schiede and Deppe. (*G. Don's Mill. dict.* 4, *p.* 271;—*I. Purga*, Wenderoth.—*Convolvulus Jalapa*, *Houst. MSS. in Mill. dict. ed.* 8, No. 31;—*Linn. Mant.* 1, *p.* 43; not of others.—*Ipomoea Schiedeana*, *Zucc.*) It is a native of Mexico, in the woods of Chiconquiaco, from whence it is brought to Vera Cruz by the inhabitants of Jalapa or Xalapa. The plant is called Purga and Laschachne in Mexico, it abounds also on the eastern slope of the Cordillera of Anahuac, in the same latitude with the *Vanilla aromatica*, Swz, and *Smilax Sarsaparilla*, L., and in its wild state delighting in a dry sandy soil.

31. *trichophora*, Ell. (*fl. car.* 2, *p.* 260;—*G. ORDER CLXXII.—POLEMONIACEÆ,—Lindl. Nat. Syst. p. 232.

THE GREEK VALERIAN TRIBE.

Herbs, with an occasionally climbing stem, by Lindl. referred to 16 genera. Of these, according to Spreng. syst. B. Reg. (19, t. 1622, app.) B. M., and Royl. ill., about 60 species have been found in N. America, especially California; 22 in S. America and Mexico; 2 in Siberia; 1 in Europe and N. Asia; and 3-4 in the Himalayas. The latter are *Polemonium caeruleum* and *gracile*, if both really are distinct; and ? *Cyananthus integer* and *lobatus*.—“Properties none, or unknown.” (Lindl.)

POLEMONIUM, L. (G. Don's Mill. dict. 4, p. 238.)

1. *caeruleum*, L. (G. Don. l. c.;—E. B. 1, p. 14;—Roxb. fl. ind.; ed. Carey, 2, p. 24.) Greek Valerian. Jacob's Ladder. 2. N. Europe. Siberia. Kemaon. Fl. large, sky-blue, C. S. but very rarely.
2. *mexicanum*, Cervant. (G. Don's Mill. dict. 4, p. 239;—B. M. 6, t. 460.) 2. Mexico. Fl. large, pale-blue, C. S.

GILLA, Ruiz. and Pav. (G. Don's Mill. dict. 4, p. 244.)

1. *achilleæfolia*, Benth. (G. Don. o. c. p. 245;—B. Reg. 20, t. 1682;—B. M. 62, t. 3440.) ① California. Fl. small, lilac-blue, March.
2. *capitata*, Dougl. (G. Don. l. c.;—B. M. 53, t. 2698;—B. Reg. 14, t. 1170.) ① North-west America. Fl. small, blue, March.

COLLOMIA, Nutt. (G. Don's Mill. dict. 4, p. 246.)

1. *linearis*, Nutt. (G. Don. l. c.;—B. M. 56, t. 2893;—B. Reg. 14, t. 1166.) ① N. America. Fl. small, rose-coloured, Feb. and March.

CALDARIA, Willd. (G. Don's Mill. dict. 4, p. 247.)

1. *heterophylla*, Willd. (G. Don. l. c.;—B. Reg. 2, t. 92.—Bonplandia *geminiflora*, Cav. icon. 6, t. 532.) ① New Spain. Fl. smallish, pale blue, C. S.

- * *Phlox Drummondii*, Hook; B. M. 62, t. 3441. ♂ Texas.—*Linanthus dichotomus*, Benth. ♀ California.—*Leptosiphon grandiflorus*, Benth. ♀ California.—*L. androsaceus*, Benth. ♂ B. Reg. 20, t. 1710;—*L. densiflorus*, Benth. B. Reg. 20, 1725. ♀ California.—*Fenzlia dianthiflora*, Benth. ♀ California.—*Gilia tenuiflora*, Benth.; B. Reg. 22, t. 1888. ♀ California.—*G. tricolor*, Benth; B. Reg. 20, t. 1704. ♀ California.—*Navarretia pungens*, Lindl. (*Gilia pungens*, Dougl. B. M. 57, t. 2977.) ♀ California.—*Löselia coccinea*, G. Don. ♂ Mexico.—*L. cærulea*, G. Don. ♂ Mexico.

ORDER CLXXIII.—COBÆACEÆ, D. Don.—Lindl. Nat. Syst. p. 233.

Climbing shrubs, of 1 genus, containing 2 species, both from S. America and Mexico.—Properties unknown.

- * *Cobæa scandens*, Cav. B. M. 22, t. 851. ♂ Mexico.—*C. macrostemma*, Pav. MSS; B. M. 66, t. 3780. ♂ Guayaquil.

ORDER CLXXIV.—HYDROLEACEÆ, Kth.—Lindl. Nat.
Syst. p. 325.

Herbs or undershrubs, by Lindl. referred to about 7 genera. Of these, Choisy, and Lindl. assign 15 species to S. America; 3 to Carolina and Georgia; 1 to Unalaska; 1 to Madagascar; 1 to S. Africa; and 2 (*Hydrolea*) to the E. Indies. Properties unknown.

HYDROLEA, L. (G. Don's Mill. dict. 4, p. 249.)

1. *zeylanica*, Vahl. (*Symb.* 2, p. 46;—*G. Don. I. c.*;—*J. Grah. Cat. B. pl.* p. 127.—*Nama zeylanica*, L.;—*Roxb. fl. ind.* 2, p. 73.—*Steris javana*, L. *Mant.*—*Steris aquatica*, Burm. *ind.* t. 39, f. 3;—*Rheed.* 10, t. 28.) କାନ୍ଧରା କଞ୍ଛରା. ♀ Mexico. Rio Janeiro. Java. Ceylon. Both Peninsulas of India. Bengal, (Serampore.) Hindoostan. Lower Nepal. Fl. small, deep blue C. S.; fr. H. S.

WIGANDIA, Kth.

1. *wrens*, Kth. (*Nov. gen. and sp.*) ♀ Mexico. Peru.

- * *Hydrolea quadrivalvis*, Walt. β. *inermis*. ♀. Guiana.—*H. spinosa*, L. B. Reg. 7, t. 566. ♂ S. America.—*Nama undulata*, H. B. and Kth. ♀. Mexico.—*N. origanifolia*, H. B. and Kth. ♂ St. Jago.—*N. longiflora*, Choisy. ♂ Mexico.—*Wigandia Kunthii*, Choisy. ♀ Mexico.

ORDER CLXXV.—LOBELIACEÆ, Juss.—Lindl. Nat. Syst. p. 235.

Herbs and shrubs, by Lindl. referred to 20 genera. Of these, Spreng. syst. enumerates for S. America, Mexico, and the W. Indies, about 68 species; for S. Africa, 34; for N. Holland, and the South Sea Islands 20; for N. America 12; for Europe 7; for the Mascarenhas Islands 3; for Japan 2; for China and for Kamtschatka 1. In the E. Indies have been found 1 species of *Piddingtonia*; and, according to Spreng. and Wall. Cat. and MSS. 14 of *Lobelia*, mostly mountain-plants, from the Himalayas down to Ceylon and the Peninsula of Malacca.

"All dangerous or suspicious, in consequence of the excessive acridity of their milk." (Lindl.)

PRATIA, Gaudich. (*G. Don's Mill. dict.* 3, p. 699.)

1. *rudicans*, G. Don. (*o. c. p.* 700;—*J. Grah. Cat. B. pl. p.* 102.—*Lobelia radicans*, Willd. *spec.* 1, *p.* 948;—*Roxb. fl. ind.* 1, *p.* 507; *ed. Carey*, 2, *p.* 111; not Thunb.) 2. China. Fl. smallish, rose-coloured, sweet-scented, R. and C. S.; fr. C. S.
2. *Careyana*, (L. *radicans* var. *major*, *Carey*, *MSS.*) ◇ Native place uncertain. Fl. small, white, C. S.; fr. H. S.

PIDDINGTONIA, Alph. DC.

1. *begonifolia*, Alph. DC. (Pratia begonifolia, *Lindl.*;—*B. Reg.* 16, *t.* 1373;—*G. Don's Mill. dict.* 3, *p.* 699.—*Lobelia begonifolia*, *Wall.*; *Roxb. fl. ind.*; *ed. Carey*, 2, *p.* 115.—*L. obliqua*, *Buch.*;—*D. Don. pr. fl. nep.* *p.* 158.) 2. Katmandu. Fl. smallish, purplish, C. S.

TUPA, G. Don. (*Mill. dict.* 3, *p.* 700.)

1. *Feuillei*, G. Don. (*l. c.*—*Lobelia Tupa*, L.;—*B. M.* 52, *t.* 2552;—*B. Reg.* 19, *t.* 1612.) 2. Chili. Peru. A very poisonous species. Even the smell of the flowers will cause vomiting according to Feuillee, and the milk of it, if by any accident it touches the eyes, occasions blindness. Fl. large, reddish-scarlet. Has been introduced into H. C. G. Fl.?

LOBELIA, L. (*G. Don's Mill. dict.* 3, *p.* 704.)

1. *persicifolia*, Lam. (*Dict.* 3, *p.* 584;—*G. Don. o. c. p.* 707.) 2. Guadeloupe. Has been introduced into H. C. G. Fl.?
2. *zeylanica*, L. (*G. Don. Mill. dict.* 3, *p.* 709;—*Roxb. fl. ind.*; *ed. Carey*, 2, *p.* 113.) 2. China. Ceylon. Khassya Mountains. Fl. small, purple, C. S.
3. *triangulata*, Roxb. (*H. B.* *p.* 16.—*L. trigona*, *Roxb. fl. ind.*; *p.* 506; *ed. Carey*, 2, *p.* 111;—*G. Don's Mill. dict.* 3, *p.* 709.—*L. stipularis*, *Roth.*) ◇ Peninsula of India. Prome. Bengal, (Serampore.) Khassya Mountains. Nepal. Kemaon. Fl. small, blue, R. and C. S.; fr. C. S.
4. *eurostos*, (*Lobelia robusta*, *Wall. MSS.*;—not *Grah.*) L. ◇ Munipore. Fl. 1837. large, white, Jan. and Feb.; fr. H. S.

B. 13, t. 882. 6 N. Africa.

ORDER CLXXVI.—CAMPANULACEÆ, R. Br.—Lindl. Nat. Syst.
p. 237.

THE CAMPANULA TRIBE.

Herbs or undershrubs, sometimes climbing, by Lindl. referred to 21 genera. Of the 311 species belonging to this order, only 19 are found in intratropical countries. Alph. DC. remarks, that "it is within the 36° and 47° N. lat. that in our hemisphere the greatest number of species is found; the chain of the Alps, Italy, Greece, Caucasus, the Altai range are their true country. In whatever direction we leave these limits, the number of species rapidly decreases. In the southern hemisphere, the Cape of Good Hope, (lat. 34° S.) is another centre of habitation, containing not fewer than 63 species." (Lindl.) In the E. Indies, have, according to Wall. Cat. and Royl. ill., been found 36 species, viz. 1 of *Cephalostigma*, (Banks of the Irrawaddi,) 8 of *Codonopsis*, (Himalayas, one from the rocks of Pingee, on the banks of Irrawaddi,) 2 of *Wahlenbergia*, (one from Nepal; the other from the plains of India,) 24 of *Campanula*, (Himalayas, 1 from the Neelgherries; another from Prome,) and 1 of

Symphiandra. (Himalayas.) In these are included *Codonopsis lurida*, Lindl.; *Campanula pallida*, Wall. *C. lanceæfolia*, Roxb. *C. integrerrima*, Buch. and *C. ? repens*, Lour.

"Their milky juice is rather acrid, but nevertheless the roots and young shoots of some, particularly of *Campanula Rapunculus*, L. or Rampion, of *Phyteuma spicatum*, L., of *Canarina Campanula*, Lam. &c. are an occasional article of food. The chief value of the order, however, is its beauty." (Lindl.)
WAHLENBERGIA, Schrad. (*G. Don's Mill. dict.* 3, p. 737.)

1. *capensis*, Alph. DC. (*G. Don. o. c. p.* 738.—*Campanula capensis*, L. ;—*B. M.* 20, t. 782.—*Roella decurrens*, Andr.; *Bot. repos.* 1, 238.) ⊖ C. G. H. Fl. large, externally bluish-green, internally dark-blue at the bottom, greenish just under the lobes, black-spotted within the lobes at the recesses, and the lobes violaceous, Feb. and March.
2. *hederacea*, Alph. DC. (*G. Don's Mill. dict.* 3, p. 739.—*Campanula hederacea*, L. ; *E. B.* 2, t. 73.—*C. hederæfolia*, Salisb.—*C. arvatica*, Lag.—*Aikinia hederacea*, Salisb.—*Schultesia*, Roth.) 2. N. W. Europe. N. America. Fl. smallish, bluish-rose-coloured, C. S.
3. *dehiscens*, Alph. DC. (*G. Don's Mill. dict.* 3, p. 740.—*Campanula dehiscens*, Roxb. fl. ind. 1, p. 504; ed. Carey, 2, p. 96;—*J. Grah. Cat. B. pl.* p. 103.) ⊖ Mahabaleshwur. Bengal, (Serampore.) Khassy Mountains. Nepal. Fl. small, white, Jan. Feb. and March; fr. April.
4. *cernua*, Alph. DC. (*G. Don. I. c.*—*Campanula cernua*, Thunb.) ⊖ C. G. H. Fl. smallish, white and blue, March.
5. *hispidula*, Alph. DC. (*G. Don's Mill. dict.* 3, p. 742.—*Campanula hispidula*, Thunb; L. excl. syn. Comm. hort, t. 37.) ⊖ C. G. H. Fl. smallish, blue, March.

PHYTEUMA, L. (*G. Don's Mill. dict.* 3, p. 746.)

1. *orbiculare*, L. (*G. Don. o. c. p.* 747;—*E. B.* 2, t. 142.—*P. cordatum*, Vill.—*B. M.* 36, t. 1466.) 2. Europe. Fl. small, purplish-blue, C. S. but very rare.

CAMPANULA, L. (*G. Don's Mill. dict.* 3, p. 750.)

1. *laciniosa*, L. (*G. Don. o. c. p.* 751.) ⊖ Archipelago. Fl. large, pale blue, March.
2. *Medium*, L. (*G. Don. I. c.*—*C. grandiflora*, Lam.) *Canterbury Bells*. ♂. S. Europe. Caucasus. Tauria. Fl. large, blue, June.
3. *divergens*, Willd. (*G. Don's Mill. dict.* 3, p. 754;—*Sweet fl. gard. n. s.* t. 256.—*C. spathulata*, Wald. and Kit. not Sm.—*C. nutans*, Vahl.; Horn.—*C. cernua*, Hort. not Thunb.) ♂. Siberia. Hungary. Fl. large, violet blue, June.

ORDER CLXXVII.—SPHENOCLEACEÆ, Martius.—Lindl. Nat. Syst. p. 238.

Comprehends only one genus, and the following marshy herb, whose properties are unknown.

PONGATIUM, Juss. (*Gen. pl.* p. 423.)

1. *indicum*, Lam. (*Sphenoclea zeylanica*, Gärtn.; fr. 1, p. 113, t. 24, f. 5; —*Roxb. fl. ind.* 1, p. 507; —*ed. Carey*, 2, p. 116; —*J. Grah. Cat. B. pl.* p. 248; —*Spreng. syst.* 1, p. 622.—*Rapania herbacea*, Low.—*Gartnera Pongati*, Retz. *obs.* 6, p. 24; —*Rheed.* 2, t. 24.) जील मरिच Jeel-murich. ⊙ Ceylon. Both Peninsulas of India. Bengal, (Serampore.) Hindooosthan. Fl. very small, white; R. and C. S.; fr. C. S.

ORDER CLXXVIII.—STYLDIACEÆ, Lindl. Nat. Syst. p. 240.

Herbs or undershrubs, by Lindl. referred to 3 genera. Of these 47 species belong to N. Holland and the South Sea Islands, and 1 to Terra del Fuego; 4 species have been found in India, viz. *Stylium tenellum*, Swz. (Malacca.) *S. uliginosum*, Swz. (Ceylon.) *S. Wightianum*, Wall.; (Peninsula of India,) and *S. Kunthii*, Wall. (Silhet.) Properties unknown.

STYLEDIUM, Swz. (*G. Don's Mill. dict.* 3, p. 719.)

- L. tenellum*, R. Br. ? (*pr. p. 571.—Swz. ?*) ♂ Ditches about Serampore. Fl. small, greenish-lilac, R. S. ; fr. C. S.

* *Stylium eriorrhizon*, R. Br. ♀. Tropical New Holland.—*S. floribundum*, R. Br. ♀. Tropical New Holland.—*S. capillare*, R. Br. Tropical New Holland.—*S. rotundifolium*, R. Br. ♀. Tropical New Holland.—*S. pedunculatum*, R. Br. ♀. Tropical New Holland.

ORDER CLXXIX.—GOODENIACEÆ, Lindl. Nat. Syst. p. 241.

Herbs, rarely shrubs, by Lindl. referred to 9 genera. Of these, 45 species have been found in New Holland and the South Sea Islands; 24 (Cyphia) in S. Africa, (*Hervey.*) and 1 (*Pentaphragma begonifolium*, Wall.) in Penang. Properties unknown.

CYPHIA, Berg. (*G. Don's Mill. dict.* 2, p. 718.)

- L. bulbosa*, Berg. (*G. Don. t. c.*—*C. capensis*, *Gmel.*—*Lobelia bulbosa*, *L.*—*L. Cyphia*, *Gmel.*) ♀. C. G. H. Introduced in 1841.

* *Pentaphragma begonifolium*, Wall. ♀. Penang.—*Velleia spathulata*, R. Br. ♀. Tropical New Holland.—*V. pubescens*, R. Br. ♀. Tropical N. Holland.—*Leschenaultia filiformis*, R. Br. ♀. Tropical N. Holland.

ORDER CLXXX.—SCÆVOLACEÆ, Lindl. Nat. Syst. p. 242.

Herbs or shrubs, by Lindl. referred to 4 genera. Of these, 36 species have been discovered in New Holland, and in the South Sea Islands; 1 in the W. Indies; 1 in S. Africa, which is also common to New Holland and Cochin China; and 3 (*Scævola*) in the E. Indies, one also common to Mauritius; another to New Holland, and Cochin China. Properties unknown.

SCÆVOLA, L. (*G. Don's Mill. dict.* 3, p. 727.)

1. *Taccada*, Roxb. (*fl. ind.* 1, p. 527; *ed. Carey*, 2, p. 146;—*G. Don's o. c.* p. 728;—*J. Grah. Cat. B. pl.* p. 103, excl. syn. *Bot. Mag.*—*Lobelia Taccada*, *Gartn. fr.* 1, p. 119, t. 25, f. 5;—*Rheed.* 4, t. 59?—*Rumph.* 4, t. 54.) ♂ Sea shores of the Moluccas. Malay Islands. Penang. Mauritius, &c. Fl. middle-sized, white, sweet-scented, and fr. whole year.

* *Scævola Königii*, Vahl.; B. M. 54, t. 2732. ♂ Tropical New Holland. Cochin China.—*S. Plumieri*, Vahl. ♂ W. Indies.—*S. sericea*, Forst.

5 Tropical New Holland.—*S. oppositifolia*, Roxb. 5 Moluccas.—*S. ovalifolia*, R. Br. 5 Tropical N. Holland.—*S. revoluta*, R. Br. 5 Tropical N. Holland.—*S. angulata*, R. Br. 5 Tropical New Holland.—*Dampiera ferruginea*, R. Br. 5 Tropical N. Holland.

ORDER CLXXXI.—CINCHONACEÆ,—Lindl. Nat. Syst. p. 243.

THE COFFEE TRIBE.

Trees, shrubs, or herbs, by Lindl. (excluding *Uncaria*, *Tarenna* and *Cenotheca*, and adding *Neurocalyx*, *Oxystoma* and *Psilospermum*.) referred to 233 genera. Of these, DC. pr. enumerates about 870 species for S. America, Mexico, and the W. Indies; 54 for Guinea; 52 for New Holland and the South Sea Islands; 40 for the Mascarenhas Islands; 24 for Senegal; 22 for Madagascar; 18 for China; 14 for N. America, especially its southern provinces; 4 for Arabia; 3 for Zanguebar; 3 for Timor; 3 for Persia; 3 for Japan; 2 for the Canaries; 1 for S. Europe; 1 for St. Helena; 1 for Ascension; and 1 for Tristan d'Acunha. In S. Africa, excluding one *Rubia*, and several *Galiums*, have been found about 52 species; and in the E. Indies, according to DC., W. and A., and Wall. Cat., 695, viz.

G. H. Manilla. Fl. large, white, fragrant, June, but very seldom; fr. 0.
11. *Rothmannia*, L. (*fil. suppl. p. 165*;—*DC. pr. 1, p. 382*;—*G. Don's Mill. dict. 3, p. 498*;—*B. M. 18, t. 690*;—*Roxb. H. B. p. 15*.—*Rothmannia capensis*, Thunb.) 5 C. G. H. Fl. very large, white, crimson-spotted, fragrant. Introduced into H. C. G. in 1799, but had not fl. up to 1814.
12. *macrocarpa*, Carey MSS. 5 Seeds received from Messrs. Loddiges and Co., in 1822. Flowers very large, white, in the evening becoming yellow, fragrant, April and May; fr. C. S. Branches rigid, ash-coloured, powdery; branchlets tern, conform; leaves at the end of the branchlets, tern or quatern, very short-petioled, from oblong to cuneate obovate, obtuse, undulate, firm, coriaceous, puberulous; (1 $\frac{1}{2}$ -3 $\frac{1}{2}$ inches, by $\frac{1}{2}$ - $1\frac{1}{2}$ inch); flowers solitary and sessile at the ends of the branchlets, and at base surrounded with three, patent, elliptic, obtuse glabrous, equal small floral leaflets; calyx cylindric, rigid, (6 lines) 6 lineolate, puberulous, within adpressedly villous and glandularly dotted, at the mouth 6-8 toothed; the teeth rigid, laterally compressed, patent, obliquely ovate, sharply mucronate, (2 lines;) tube of the corol incurvedly erect, rigid, terete, thick fleshy, within 6 lineolate and villous, without obscurely 6-culcate and puberulous, from a narrowish base widening gradually till its mouth is 7 lines in diameter, very long, (3 inches); limb in 5-7 recurved, oblong, obtuse, fleshy, glabrous, equal laciniae (1-1 $\frac{1}{2}$ inch long, by 7-9 lines wide); filaments 6, pubescent, (1 line) inserted into the base of 6 oval foveolæ on the inside of the uppermost part of the corol-tube; anthers inserted by the middle of their back, erect, reaching to the mouth of the corol-tube; stigma clavate, at apex contortedly 6-lobulate, subexsert. Drupe oval, (2 $\frac{1}{2}$ -3 inches, by 1-1 $\frac{1}{4}$ inch) at apex deeply umbilicated, externally ash-coloured.

rugose and powdery, tough, thick, (6-8 lines) fibrous, ligneous, internally cream-coloured, glabrous, nitid, 5-costate. Seeds ○○ immersed in a fleshy, viscid, yellowish substance, ovate, biconvex. (2-2½ lines long.) Seems nearest allied to *G. ternifolia*, Thonn.

13. *amoena*, Sims. (*B. M.* 44, t. 1904;—*B. Reg.* 9, t. 735;—*DC. pr.* 4, p. 382;—*G. Don's Mill. dict.* 3, p. 498.) 5 China. Fl. large, white, having the lobes crimson on the outside during aestivation, March and April.
14. *turgida*, Roxb. (*fl. ind.* 1, p. 711; *ed. Carey*, 2, p. 557;—*DC. pr.* 4, p. 382;—*G. Don's Mill. dict.* 3, p. 498.) 5 Bhootan. Fl. largish, white, fragrant, March and April; fr. 0.
15. *campanulata*, (*fl. ind.* 1, p. 710; *ed. Carey*, 2, p. 556;—*DC. pr.* 4, p. 383;—*G. Don's Mill. dict.* 3, p. 498.) 5 Chittagong. Fl. largish, white, pale yellowish in the evening, March and April; fr. Nov. The fruit is used by the natives as a cathartic and anthelminthic, and also to wash out stains in silk. (*Roxb.*)
- ? 16. *densa*, Wall. (*Roxb. fl. ind.*; *ed. Carey*, 2, p. 559;—*DC. pr.* 4, p. 383;—*G. Don's Mill. dict.* 3, p. 499.) 5 Sheopoor in Nepal. Fl. small, yellowish-white, fragrant. Has been introduced into H. C. G. Fl. ?
17. *obtusifolia*, Roxb. (*H. B.* p. 15.) 5 Pegu. Introduced into H. C. G. in 1809, but had not fl. up to 1814.
