PREFACE

The Statistical Abstract of Andhra Pradesh, 1979 is the 23rd in the series of this annual publication. It presents data on various aspects of the State economy for the latest year with comparative figures for the preceding years. In respect of the latest year, the district-wise break-up has also been given for most of the items. The Comparative Statistics section has also been expanded to include the State-wise statistics on selected socio-economic indicators.

It is hoped that this publication would serve as a useful reference book to the general public, research workers and administrators.

I thank all the Heads of Departments, both of the State and the Central Government, who extended their co-operation in furnishing the requisite data.

(o) Prior to 1975-76 estimates of area relating to irrigation were prepared mainly on the basis of information received from Irrigation Department. But the estimates for 1975-76 were prepared on the basis of data collected through TRS. The large variation noticed between the estimates of 1975-76 and earlier years may thus be chiefly due to the difference in the source of data used in preparing these estimates

(a) Below 500 Hectares.

(b) Relates to the year 1953-54.

(d) Total net and gross irrigated figures estimated on the basis of T. R. S. Source-wise break up has been worked out in proportion to that in the year 1973-74. The figures for individual crops based on T.R.S. figures except otherwise stated.

(e) Ad hoc Estimates.

(f) Relates to the year 1973-74.

(h) Relates to the year 1967-68.

(g) Total net and gross irrigated figures supplied by the State in the abridged tables for 1975-76 has been utilised. Source-wise break-up has been worked out in proportion to that in the year 1974-75. Irrigated area under crops is based on T. R. S. figures except otherwise stated.

* Includes data in respect of Union Territories also.

(o) Prior to 1975-76 estimates of area relating to irrigation were prepared mainly on the basis of information received from irrigation department. But the estimates for 1975-76 were prepared on the basis of data collected through T. R. S. The large variation noticed between the estimates of 1975-76 and earlier year may thus be mainly due to the different methods of collection of data on irrigation statistics.

** Relates to minor and lift irrigation.

++ Included under tanks.
