

# ABSTRACT OF STATISTCS

# FOR TAMIL NADU

## VOLUME XXIII

## No. 4

FOR THE QUARTER ENDED DECEMBER 1978

ISSUED BY : THE COMMISSIONER OF STATISTICS MADRAS

GOVERNMENT OF TAMIL NADU

AINTED BY THE DIRECTOR OF STATIONERY AND PRINTING. MADRAS, ON BEHALF OF THE GOVERNMENT OF TAMIL NADU 1980

## ABSTRACT OF STATISTICS FOR TAMIL NADU

## VOLUME XXIII No. 4

QUARTER ENDED DECEMBER 1978

## PREFACE

The Abstract of Statistics for Tamil Nadu presents in the form of a compendium, current statistics on select items of importance. This publication is intended to serve as an authoritative book of reference to Government Departments, Research Scholars, Statisticians, Economists, Planners, etc.

This issue covers in the main, statistics for the quarter ended December 1978 with comparative data to the extent available.

Chapters on 'Economic Situation in Tamil Nadu, and 'Select Economic Indicators' highlight the tempo of progress of Tamil Nadu.

A special feature of this issue is the inclusion of a report on un-employment among Scientists in Tamil Nadu.

The co-operation extended by other Heads of Departments in furnishing the statistics required, is gratefully acknowledged.

MADRAS, Dated : 28th February 1979.

M. A. LATIFF, Deguty Commissioner of Statistics.

State Income of Tamil Nadu .....

#### PART A

#### ECONOMIC SITUATION IN TAMIL NADU.

**Rainfall.**—The north-east monsoon had set in Tazil Nadu on 24th October 1978 with a delay of a weeks time. In the first week of October 78 there was isolated rainfall and dry weather prevailed in most parts of the State. Fairly widespred rain occured during the third week of October. Though the rainfall was deficient in October 78 the water supply from the most of the reservoirs of Tamil Nadu was adequate for agricultural operations.

The north-east monsoon was very active during the first week of November due to the low pressure that formed in the Bay of Bengal which was centred at 370 km. east-south-west of Nagapattinam on 3rd November and it moved northwards to Cuddalore. Under its influence there was heavy rainfall throughout Tamil Nadu with an exceptionally very heavy rainfall in Cuddalore and in many places of Thanjavur districts.

On November 24th a cyclonic storm with a speed of 120 km, to 140 km, per hour lashed Mandapam. During the month of December there was heavy rainfall throughout Tamil Nadu. Thrice during this month a low pressure area persisted over the south-west Bay of Bengal along Tamil Nadu coast. There was widespread rainfall in coastal Tamil Nadu and scattered rainfall in interior Tamil Nadu.

Water Supply.—During the quarter the water supply was reported to be more than adequate in all the districts as heavy rain lashed most parts of the State. All the tanks in Tamil Nadu were almost full.

WaterLevel.—The water level in the reservoirs of Papanasam, Manimuthar and Amaravathi showed an increasing trend. The water level in Periyar declined in October but increased thereafter. There were minor fluctuations in the water levels of other reservoirs. At the end of December 1978, all the reservoirs were full, except Periyar, Pechipparai, Standeley and Perunchani reservoirs where the water level declined.

Crop Prospects.—The north-east monsoon which extends from October to December was active during the quarter particularly in November and December 1978. The intensity of the showers varied from time to time and the north-east monsoon was at its peak during the end of December fetching copious supply of water to almost all irrigation tanks and reservoirs.

The occurance of two successive cyclonic storms though helpful in augmenting water for irrigational requirements, was harmful to a limited extent affecting the harvest of Kuruvai Paddy in the State.

Out of a total of 3.67 lakh acres under Kuruvai Paddy in Thanjavur district 2.22 lakh acres only were harvested before the cyclone and the yield rate in the remaining areas was reported to have decreased by 10 per cent mainly due to inundation of paddy fields ready for harvest.

A total extent of 1.73 lakh acres of paddy in Thanjavur district comprising 27,000 acres under Kuruvai 1,31,000 acres under Samba and 15,000 acres under Thalady were submerged in water. But as the water receded quickly damage to the crops was negligible.

The harvest of Groundnut in Chengalpattu and parts of North Arcct, Dharmapuri and Coimbatore was also affected due to incessant rains.

About one lakh acres of standing crops were partly affected by the torrential rains in the districts of South Arcot, Pudukkottai and Kanniyakumari.

The rains however, was beneficial to the standing crops in North Arcot, Madurai and Tirunelveli district

In general the crop prospects during the year especially in later part of khariff season and in Rabi would be much more brighter than anticipated.

Agriculture.—The total geographical area of Tamil Nadu according to village papers was 18.0 million hectares in 1976-77. Out of which the net area sown accounted for 3.0 million hectares the area cultivable but not cultivated showed 2.7 million hectares, and the uncultivable land was 4.8 million hectares. Out of the 6.0 million hectares of the net area sown 2.8 million. hectares or about 38.8 percent was irrigated. The area sown more than once was 1.1 million hectares of which 0.7 million hectares or about 58.9 percent was irrigated.

Index numbers of agricultural economy.—The provisional index numbers of area under crops yield production, cropping intensity, cropping pattern and productivity per hectere for 1977– 78 has increased by 8.2, 12.8, 24.6, 8.2, 0.3 and 24.6 points respectively when comapred with 1976-77

*Electricity.*—During the Quarter ended December 1978, the generation of electricity was 1,666 million units as against 1,852 million units during the previous quarter.

The total consumption of electricity increased from 2,071 million units during the quarter ended June 1978 to 2172 million units during the quarter ended September 1978.

Handlooms.—The production of handloom cloth in Tamil Nadu during the quarter ended Septembar 1978 has been estimated at 151, 465,000 metres as against 150,487,000 metres for the previous quarter. While the total production of all varieties of handloom cloth has increased by 0.65 per cent.

Ioint Stock companies.—During the quarter ended December 1978, 5 public companies and 66 private companies were newly registered as against 6 public companies and 172 private companies during the previous quarter.

The total authorised capital of newly registered public and private companies during the quarter ended December 1978 was 498.04 lakhs as against 725.64 lakhs during the previous quarter.

During the quarter under revicue 2 companies went into liquidation as against 4 companies during the previous quarter.

Transport.—During the quarter ended September 1978, the total number of newly registered motor vehicles in Tamil Nadu was 8,009 as against 7,082 during the previous quarter showing an increase in the number of registrations.

*Employment.*—The total number of employment seekers on the live Register of Employment Exchanges at the end of quarter ended December 1978 increased by 0.7 percent, compared with the previous quarter. The number of persons registered in the Exchanges during this quarter decreased by 27.8 per cent compared with the previous quarter. The placements made through the exchanges during this quarter increased by 11 per cent compared with the previous quarter.

Area and yield of Coconut and Arecanut in Tamil Nadu.—The estimated production of coconut was 1,035.49 million nuts during 1977–78 showing a fall of 4.25 per cent when compared with the previous year. The fall was mainly due to the damage caused by cyclone and floods in November 1977. The estimated production of cured arecanut was 2,590 tonnes recording an increase of 1.56 per cent.

Marine Fisheries. —The marine fish landings by non-mechanised boats on the coast line of Tamil Nadu for the quarter ended 31st December 1978 is provisionally estimated at 18,170 tonnes as against 25,460 tonnes for the previous quarter.

Industries. —Industrial Production in Tamil Nadu registered an increase of 4.7 percent during the quarter ended September 1978 as the General Index rose from 158.9 percent in the quarter ended June 1978 to 166.4 percent in the quarter ended September 1978. The increase in the General Lytex wistheres all of substantial improvement in the two major sector of Manufacturing and Electricity which reported increase of 3.7 per cent and 11.3 per cent respectively.

The rise during the quarter under review was brought out by the substantia' increase in output observed in respect of Refined Oi', Rai'way Wagons, Printing Paper, Tyres (all types), Tubes (all types), and Bicyc'es under Manufacturing Sector.

Significant decreases in production were noticed in respect of Sugar (Refined), Tea (Processed), Coffee (Cared) and Earth Moving Machinery.

Index Number of Wholesale Prices in Tamil Nadu (Base · Prices on 21st August 1939-100). During the quarter ended December 1978, the index number of wholesale prices of foodgrains. commencial products and composite index advanced by 2.8 percent, 3.8 percent and by 3'4 percent respectively. Consumer Price Lidex Numbers (Basic 1960 100).—During the quarter ended December 1978, the Consumer Price Index Numbers advanced in a<sup>11</sup> the centres, viz., Madras. Cudda<sup>1</sup>ore, T<sup>i</sup>ruchirapa<sup>11</sup>i, Madutai, Coimbatore, Nagercoil and Coonoot.

Rural Price Index Numbers (Base : Year ended June 1971-100). —During the quarter ended December 1978 the index number of Rural prices advanced in Puliyur, Agram, Thulayanatham Kinathukadavu, Guduvancheri and Kunnathur, while the index declined at Gokilapuram. The index remained unaltered at Eriodu when compared with the end of the previou- quarter.

Consumer price index number for urbannonmanual employees (Base 1960=100).—Consumer price index number for urban-non-manual employees appreciated in Madurai and Tiruchirappalli while it remained unchanged at Madras when compared with the end of the previous quarter (i.e), June-1978.

Index numbers of wholesale prices of food-grains and commercial products in Tamil Nadu (Base Prices on 21st August 1939=100).—During the quarter ended December 1978, the index number of wholesale prices of foodgrains, and commercial products appreciated. As compared with the index for September 1978, the index number of wholesale prices of food grains increased by 44 points from 1597 in September 1978 to 1641 in December 1978 or by 2.8 per cent owing to an increase in the prices of rice I and II sorts samba wheat, cholam and cumbu.

The index number of wholesale prices of commercial products too moved up by 101 points from 2692 in September 1978 to 2793 in December 1978 or by 3.8 per cent. Higher prices of chillies, cane jaggery, palm jaggery, gingelly seed, coconuts, gingelly oil, groundnutoil, cotton seed, tobacco, tanned cow-hides, tanned goat skins and tanned sheep skins contributed for the upward trend in the index.

Minor Crops.—The total area for the districts covered under onion was 14,534 hectares, under chillies was 59,422 hectares under potato (winter and summer) combined was 11,057 hectares and under tapioca was 34,540 hectares in 1976-77.

The estimated production of onion was 125,490 tonnes, chillies was 1,13,910 tonnes, potato (winter and summer) combined was 1,31,050 tonnes and tapioca was 8,11,760 tonnes in 1976-77.

Trade.—The total volume of foreign imports and exports through the ports in Tamil Nadu during the quarter ended 30th September 1978 was of the order of Rs. 350.52 crores of which exports accounted for Rs. 155.10 crores and imports were Rs. 195.42 crores.

When compared with the corresponding quarter of the previous year, the imports increased by 28.8 per cent whereas the exports showed a nominal increase of 3.7 per cent only.

#### PART B

### UNEMPLOYMENT AMONG SCIENTISTS IN TAMIL NADU.

Introduction.— The scientific and technical manpower is an important segment of human resources, the development of which is essential for the progress of the nation. The scientists who are so indispensable for the Nations developmental planning are also confronted with the problem of unemployment and under employment. This study aims at revealing the causes of unemployment among highly educated scientific and technical personnel and the problems associated with it.

Definition of the term scientists.—The post-graduates in the faculty of science and graduates in agriculture, medicine, engineering and veterinary have been considered as scientists for the purpose of this study.

**Unemployment of scientists.**—The number on the Live-Register is often taken to represent the unemployed component of the labour force, in the absence of any other source for such data. But the Employment Exchange data in subject to the limitations viz. (i) under registration. of the unemployed and (ii) registration of those, who are already employed.

These figures have however to be suitably connected to arrive at the estimates of unemployment. The number of scientists in Tamil Nadu who sought employment through Employment Exchange revealed that as much as 7,300 scientists remained unemployed in Tamil Nadu during the year 1976, while as much as 4,500 scientific and technical persons were estimated to be unemployed in our country. That is about 16 percent of the total unemployed scientists were in Tamil Nadu. The unemployment situation in Tamil Nadu as indicated by the number of job seekers per million population, shows that the position has worsened as between 1964 and 1971. The number of unemployed scientists per million increased from 21 (in 1964) to 302 (in 1971) in Tamil Nadu.

Post-graduates in Science.—Post-graduates in science formed the bulk of the unemployed constituting about 44 percent, while engineering graduates constituted 35 percent, medicine 16 per cent and remaining 5 percent represented the agricultural and veterinary science graduates. These were as much as 3,703 post-graduates in science subjects who alone constituted 44 percent of the unemployed among scientists, during the year 1977. It may also be observed that unemployment situation of post-graduate scientist has more than doubled in the year 1977 compared to the position that prevailed during the year 1972. It would thus appear that the problem of unemployment among scientists has assumed alarming proportions and the incidence of unemployment being more among post-graduates in science than in other categories.

According to the Live-Register figures, the number of unemployed agricultural graduates in Tamil Nadu is well below 50 till the year 1975. There was a sudden increase in the number of unemployed agricultural graduates to 196 in the year 1976 and 286 in 1977. The scientific manpower required for the development of agriculture is very essential as this sector constitutes more than 50 percent of the State Income. The unemployment of engineering graduates in Tamil Nadu has recorded the highest figure of 2,960 in the year 1977. Though, the problem of unemployment among the engineering persons has been brought under control by restricting the level of in-take in colleges, the economy does not seem to have been fully geared up to absorb the bulk of the unemployed engineering personnel.

In the case of medical graduates, it is only the profession among the highly educated scientific personnel, where self-employment is significant. It can therefore be reasonably assumed that most of the Doctors borne on the Live-Register are self-employed and have registered their names for better prospects. The number of unemployed medical graduates, which stood at 154 in 1971, has shot upto 1,358 in 1977 an all time high. It is highly paradoxical that the number of the Live-Register is increasing by leaps and bounds from year to year, while vast majority of population in the rural areas are deprived of the bare minimum medical facilities. The problem of unemployment among the veterinary science graduates is not so severe as to cause anxiety upto 1974. There were only 10 veterinary science graduates on the Live-Register as on 31st December 1974. There was more than cent per cent increase during 1975, when compared to the previous years (1974) figure. The employment situation of veterinary science graduates got still more worsened during the year 1976, in as much as 94 veterinary science graduates were on the Live-Register, which was nearly 5 times when compared to previous year's figure. **Placement** of Scientists.—The registration of unemployed scientists which remained at a low ebb during the beginning seventies, registered a marked increase over the period. But the placements effected have not shown corresponding increase and the increase if any is only nominal Consequently the number on the Live-Register has shot up and multiplied itself many times during the years.

The employment potential of the scientists is on the increase. The number of Agricultural graduates which stood at 2528, has increased over the years and reached to 3,137 in 1976. The number of Engineers employed rose from 16,879 in 1971 to 23,080 in 1976, medical graduates also rose from 10,339 in 1971 to 13,627 in 1976 and that of veterinary science graduates from 1,253 in 1971 to 1,790 in 1976.

The supply of educated manpower is determined by outturn from the educational institutions, which in turn is dependent on the intake, that is enrolment of students. The declining trend in supply is caused mainly by the reducing trend in out-turn of Engineering and Veterinary science graduates. This is mainly due to the policy of the Government to restrict the intake of the students to these courses of study-as the economy is not able to absorb all the personnel of these faculties.

The estimated stock of Agricultural science graduates as worked out by this department is 5,205 in 1977-78. The stock at 5,205 in 1977-78 is expected to reach 6,563 in 1983-84 an increase of nearly 25 percent. The stock of Engineering graduates, which is about 26,982 in 1977-78 is expected to increase to 35,148 in 1983-84 constituting an increase of 34 per cent. The stock of allopathic Doctors is estimated to be 15,514 in 1977-78 and this trend is expected to reach a 20,000 mark in 1983-84. The stock by veterinary science graduates which stood at 1957 in 1977-78 is expected to grow to 2,017 by the end of 1978-79 and would reach a figure of 2,328 by the end of the sixth plan (i,e,) in 1983-84.

#### PART D

#### I. CLIMATE AND RAINFALL.

#### RAINFALL.

The North-East monsoon had set in Tamil Nadu on 24th October with a delay of a week time. In the first week of October there was isolated rainfall and dry weather prevalied in most parts of the State. Fairly widespread rain occurred during the third week of October. Though the rainfall was deficient in October the water-supply from the most of the reservoirs of famil Nadu was adequate for agricultural operations.

The North-East monsoon was very active during the first week of November due to the pressure that formed in the Bay of Bengal which was centred at 370 km east-south-west of Nagapattinam on 3rd November and it row moved northwards to Cuddalore. Under its influence there with heavy rainfall throughout Tamil Nadu with an exceptionally very heavy rainfall in Cuddalore and in many places of Thanjavur district.

On November 24th a cyclonic storm with a speed of 120 km. to 140 km per hour lashed Mandap.m. Vencular traffic in the Nilgiris has been disrupted owing to the failing of trees following heavy rain. Power supply has been cut by falling tress. Municpal market in cooncor was washed away and extensive damage to property and standing crops was caused by flash floods following torrential rain in the hill station on 26th November 1978.

Heavy landslips at a number of places between Coonoor and Mettupalayam occured and though communication was interrupted. Tamil Nadu Government has estimated the damages to public and private properties on account of flood and landslips in the State in the first week of November 1978 at Rs. 25 crores.

During the month of December there was heavy rainfall throughout Tamil Nadu. Thrice during this month, a low pressure area persisted over the South-west Bay of Bengal along Tamil Nadu coast. There was widespread rainfall in coastal Tamil Nadu and scattered rainfall ir interior Tamil Nadu. Nilgiris and Kanniyakumari districts have recorded about 100 per cent of excess rainfall in the current North-East monsoon season. Coimbatore, Salem and part of Tiruchirappalli and Thanjavur districts have had 40 per cent to 50 per cent excess rainfall during the season. The low pressure area moved westwards and lay on the 24th morning over the extreme south west Bay of Bengal and adjoining land area of Srilanks with its through extending north east to Tamil Nadu and Andhra coasts. Under its influence the North-East monsoon has been vig rous over coastal Tamil Nadu. Madras and suburbs were lashed by heavy rain from 25th December. Many thoroughfares were flooded and consequently vehicular traffic was distocated. Madras recorded the heaviest rainfall of 20 cm. The figure was the heaviest for the month of December in the past 17 years the previous record was 15<sup>x</sup>7 cm on December 9, 1967.

Malras received about 61 per cent of the normal monsoon rainfall during the last week of December alone. Madras and Chengalpattu districts touched the peak after 1946.

The incessant rain in Madras inundated several slums and localities and rendered homelees at least 50,000 people. power supply was disrupted due to heavy rain. The rain during the month of December has brought copious inflows into the reservoirs of the city's water-supply, as the water in Adyar river started rising appreciably. The water level in the chembarambakkam lake in Chengalpattu district, one of the biggest in Tamil Nadu with a spread of 26 sq. km. had meadily risen. P.W.D. autorities released several cuses of water from Chembarambakkam lake t the water in the lake had been surplussing.

In Thanjavur district breaches had occurred in 21 channles about 100 villages were inundated and 2,386 huts damaged. Several acres of crops were submerged.

But for these calamities, the monsoon had brought copious supply of water to the **Eydel** reservoirs improving the power supply position.

A table showing the district-wise rainfall in mm and the water level in the various second woirs of the State is enclosed.

DISTRICT WISE RAINFALL DURING THE NORTH EAST MONSCON OF 1978.

## \* Figures are provisional

Water Supply and level in select reservoirs. – During the quarter under report, the water supply was reported to be more than adequate in all the districts as heavy then letter new profe of the State. All the tanks in Tamil Nadu were almost full.

The water level in the reservoirs of Papanasam, Manimuthar and Amaravethi showed an increasing trend. The water level in Periyar declined in October but increased thereefter Therel was minor fluctations in the water levels of other reservoirs. At the end of December, 1978 all the reservoirs were full. Except in Periyar, Pechipparai, Stanley and Perunchani reservoirs where the water level declined.

#### II. AREA AND POPULATION.

#### AREA AND POPULATION.

Tamil Nadu occupies the eleventh rank among the States in India in regard to size with an area of 1,30,069 sq. km.

As regards population, Tamil Nadu ranks fifth among the States in India. According to Census 1971, the population in Tamil Nadu is 41,199 168 of which 50 6 per cent are males and 49 4 per cent are females. 28,734,334 persons or 69 7 per cent of the population are in rural areas and the remaining 12,464,834 persons or 30 3 per cent are urban areas.

Of the total population, 14,741,967 persons (35'8 per cent) are classified as workers and 26,457,201 persons (64'2 per cent) as non-workers. Among the workers 11,667,065 (79'1 per cent) are m les and 3,074,902 (20'9 per cent) are females.

Literates form 39.5 per cent of the total population (16,256,393 persons) as against 31.4 per cent in 1961. Madras city has the highest percentage of literacy, viz., 62.01 while Dharmapuri district has the lowest percentage, viz., 22.3.

According to census 1971, the density of population in Tamil Nadu works out to 317 per. sq.km. Madras city has the highest density of population viz., 19,293 while Dharmapuri district has the lowest density of population, viz., 174.

The population of scheduled castes and scheduled tribes in Tamil Nadu is 7,627,110 forming 18.51 per cent of the total population 7,315,595 persons belong to scheduled castes and 311,515 persons are scheduled tribes. Chengalpattu district has the largest percentage of these two classes of people., i.e., 27.22 while Kanniyakumari district has the lowest percentage of scheduled castes and scheduled tribes, i.e., 4.12.

#### III. AGRICULTURE.

Land Utilisation.—The total geographical area of Tamil Nadu according to village papers was 13.0 million hectares in 1976–77. Out of which the net area sown accounted for 6.0 million hectares the area cultivable but not cultivated showed 2.7 million hectares and the uncultivale land was 4.3 million hectares. Out of the 6.0 million hectares of the net area sown, 2.3 million hectares or about 30.8 per cent was irrigated. The area sown more than once was 1.1 million hectares of which 0.7 million hectares or about 58.9 per cent was irrigated.

Out of 2.7 million hectares of total area cultivable but not cultivated, 1.4 million hectares or 52.1 per cent was under current fallows and the remaining 47.9 per cent was under other noncultivated lands excluding current fallows. The extent of area under uncultivable land was 4.3 million hectares comparising 2.0 million hectares (46.8 per cent) of forest land and 2.3 million hectares (53.2 per cent) of other uncultivable area including land put to non-agricultural uses.

The gross cropped area was 7.1 million hectares out of which 3.0 million hectares or 42 per cent was irrigated.

#### IRRIGATION.

Out of 6.0 million hectares of net aera sown 2.3 million hectares or 38.8 per cent was irrigated. The percentage of net area irrigated to net area sown was maximum at 77.7 per cent in Chengalpattu district. Thanjavur district came next in order, the percentage being 70.8 per cent followed by South Arcot with 53.3 per cent. The figure was less than 50.0 per cent in the remaining districts of the State as indicated below :--

	District.				Percentage of net area irrigated to net area sown.

The different sources of irrigation and the percentage of area irrigated by each to the total net area irrigated are indicated below :---

Sources of in	rrigatio <del>n</del> .			Percentage of area irrigated to the total net area irrigated.
(	(1)			(2)
1. Wells (Tube wells and	Ordinary well	s)		35.4
2. Tanks	•• ••			34.4
3. Government canals	•• ••	• •	••	29.0
4. Other sources including	g private cana	ls		1.2

Wells supplementing other irrigation sources constituted 5.0 per cent.

Government canals and tanks.—Government canals were the principal sources of irrigation in the district of Thanjavur(93.1 per cent) Kanniyakumari (47.8 per cent), Tiruchirappalli (45.2 per cent) and Coimbatore (33.0 per cent). The districts in which tank irrigation was the important sources are given below together with the percentage of area irrigated.

	District.				Percentage of area irrigated from tanks to the total net area irrigated in the district.

South Arcot			•		27.6

Wells and other sources. — Wells including tube wells were the chief irrigation scurce in Salem, Dharmapuri, Coimbatore, Madurai, South Arcot, North Arcot, Tiruchirappalli and Tirunelveli districts accounting for 85.8 per cent, 65.3 per cent, 65.2 per cent, 51.3 per cent, 45.3 per cent, 45.1 per cent, 40.9 per cent and 34.9 per cent respectively.

Other sources of irrigation such as channels and kasams, were important in the Nilgiris district where it accounted for 90.7 per cent.

Wells supplementing other irrigation sources. —Wells supplementing other irrigation sources served fairly large areas in Chengalpattu, South Arcot and North Arcot districts, their percentage to the total net are a irrigated in the districts, being 9.5, 6.8 and 7.1 respectively.

**Crops irrigated.**— The total extent raised with crops (gross cropped area) was 7.1 million hectares and net area sown was 6.0 million hectares. The difference represents the area on which more than one crop as raised. The area of crops irrigated in the State was 3.0 million hectares which showed a decrease of 0.4 million hectares as compared with the previous year. The area of crops irrigated was as high as 79 4 per cent in Chengalpattu district followed by Thenjavur district, with 58.5 per cent. The rea of crops irrigated was less than 25 per cent of the gross area sown in the following districts:—

	District.			Percentage of the area of crops irrigated to the gross area sown.
	(1)			(2)
Dharmapuri				14.6
The Nilgiris		 ••	• •	0.5

The total area of crops irrigated 78.2 per cent accounted for cereals and pulses 5.1 per cent, for sugarcane, 5.4 per cent for oil seeds (groundnut, gingelly and caster) 3'0 per cent for cetton and the remaining 8.3 per cent for other crops.

The area irrigated more than once was 1.1 million hectares.

AREA IRRIGATED BY SOURCES/CROPS-1976-77-cont.

#### INDEX NUMBERS OF AGRICULTURAL ECONOMY.

The Index Numbers of area under crops and Index Number of cropping intensity have each inc reased by 8.2 points from 99.0 in 1976–77 to 107.2 in 1977–78 and 99.1 in 1976–77 to 107.3 in 1977–78 respectively.

The Index Number of yield has increased by 12.8 points from 121.5 in 1976-77 to 134.3 in 1977-78.

The Index Number of agricultural production has increased by 24.6 points from 123.2 in 1976-77 to 147.8 in 1977-78.

The Index number of cropping pattern has increased by 0.3 points from 102.3 in 1976-77 to 102.6 in 1977-78.

The Index number of productivity per hectare has increased by 24.6 points from 123.3 in 1976-77 to 147.9 in 1977-78.

## IV. CROP PROSPECTS.

The North East Monsoon which extends from October to December was active during the quarter particularly in November and December 1978 The intensity of the showers at varied from time to time and the North Fast monsoon was at its peak during the end of December fetching .oplous supply of water to almost all irrigation tanks and Reservoirs.

The occurence of two successive cyclonic storms though helpful in augmenting water for irrigational requirements, was harmful to limited extent affecting the harvest of Kuruvai Paddy in the State.

Out of a total of 3.67 lakh acres under Kuruvai Paddy in Thanjavur district 2.22 lakh acres only were harvested before the cyclone and the yield rate in the remaining acres was reported to have decreased by 10 per cent mainly due to inundation of Paddy fields ready for harvest.

A total extent of 1.73 lakh acres of paddy in Thanjavur district comprising 27,000 acres under Kuruvai 1,31,000 acres under Samba and 15,000 acres under Thalady were Submerged in water. But as the water receded quickly damage to the crops was negligible.

The harvest of Groundnut in Chengalpattu, and parts of North Arcot, Dharmapuri and Coimbatore was also affected due to incessant rains.

About one lakh acres of standing crops were partly affected by the torrential rains in the districts of South Arcot, Pudukkottai and Kanniyakumari.

The rains however, was beneficial to the standing crops in North Arcot, Madurai and Tirunelveli districts.

The North East monsoon had revived with added force in the last weeks of December and caused flood havoes in certain parts of the State. But the coin is not without the otherside. The Strong, sturdy incessant rains brought copious supply of water to all the irrigation tanks, and all the reservoirs were full or nearful.

Another, important feature of the extended monsoonic benefit was that it changed the adverse situation in the districts of North Arcot, Pudukkottai, Dharmapuri and especially in Ramanatha puram and Tirunelveli which were in the grip of inadequate irrigational facilities during the early period of December and it also brightened the prospects of all crops in general and cotton in particular in the traditionally drought prone regions of Ramanathapuram and Tirunelveli.

In general the crop prospects during the year especially in later part of Khariff season and in Pabi would be much more brighter than anticipated.

#### V. INDUSTRIES.

## RESULTS OF ANNUAL SURVEY OF INDUSTRIES.

Annual Survey of Industries is conducted by National Sample Survey Organisation, Government of India under the collection of Statistics Act 1953 and collection of Statistics (Central) Rules 1959.

The factories registered under Section 2 m (i) and 2 m (ii) of the Factory Act 1948, and the Beedi Establishments are covered by the Survey.

The Survey is covered under two patts, viz. Census and Non-Census. Factories employing 50 or more workers using Power and 100 or more workers not using power are covered under the Census Sector. Factories employing 10 to 49 workers using power to 20 to 99 workers not using power are covered under Non-Census Sector. The Survey excludes from its purview, the units engaged in defence production, storage and distribution of oils restaurants and services, technical institutions not producing anything for sale or exchange even though they are registered as factories under the Factories Act 1948. A copy of the return for each factory collected by the National Sample Survey Organisation is received by this Department for the purpose of analysing the results for the use of State Government.

The Survey for the year 1975-76 is the latest for which results are available and the same has been given in this issue.

# ANNUAL SURVEY OF INDUSTRY 1975-76 (FACTORY SECTOR)-cont.

INDUSTRIAL PRODUCTION IN TAMIL NADU.

Industrial Production in Tamil Nadu increased during the Quarter ended September 1978 as the average General Index (Base 1970 = 100) increased by 7.5 points or 4.7 per cent.

Sizeable increases in output were noticed in respect of Bauxite (25.4 per cent), Refined Oil (109.4 per cent), Printing Paper (40.8 per cent), Tyres (all types) (33.1 per cent), Tubes (all types) (55.8 per cent), Superphosphate (27.6 per cent), Pesticides (41.3 per cent), Typewriters (29.7 per cent), Railway Wagons (76.8 per cent) and Bicycles (40.6 per cent).

Significant decreases in output were observed in respect of Sugar (Refined) (79.8 per cent), Tea (Processed) (47.4 per cent), Coffee (cured) (21.2 per cent), Earth Moving Machinery (27.1 per cent).

Statements indicating the Index Numbers and Production of selected items of Products are appended.

#### VI. HANDLOOMS.

Production of Handloom Cloth .-- The production of handloom cloth in Tamil Nadu during the quarter ended September 1978 has been estimated at 151,465,000 metres as against 150,487,000 metres for the previous quarter. While the total production of all varieties of handloom cloth has increased by 0.65 per cent the individual varieties have increased at different rates as shown below:---

			Varie	ety of c	loth.			Percentage of increase.
1.	Cotton	••		• •				0.20
2.	Silk	••	••	••		••		2.51
3.	Art-silk			••	••			2.29
4.	Mixture	••	••	••	••	••	••	1.06

A close analysis of the production of handloom cloth during the previous three quarters, has revealed that the industry is steadily progressing overcoming all the natural calamities encountered last year.

Among the different varieties of cloth produced, saree alone has accounted for 27.11 per cent while towels, dhoties and lungies constituted 17.52 per cent, 17.26 per cent and 13.30 per cent respectively. The remaining 24.81 per cent of production was shared by shirting, bed spread, carpet, gada, etc.

Out of the total production, cotton fabrics along has accounted for 87.83 per cent followed by mixture, art-silk and silk. fabrics which accounted for 5.73 per cent, 5.71 per cent and 0.73 per cent respectively. Despite a slight increase in the price of yarn and dyeing materials, there was no abnormalities in the supply.

The average monthly sale of handloom goods to the total available stock in Tamil Nadu during the quarter under review in respect of co-operative fold was 36-17 per cent while for outside cooperative fold it was 45.06 per cent.

The variety-wise production of handloom cloth during the quarter ended September 1978 is furnished below:---

#### INDEX NUMBER OF BUILDING COST IN MADRAS CITY.

The index number of building cost in Madras City for the quarter ended September 1 978 rose by 19 points as compared to quarter ended June 1978. This was due to rise in the prices of all building mitorials except electrical fittings together with a rise in the wages of building labour and other charges contributed to the upward thrend in the index.

# INDEX NUMBERS OF WHOLESALE PRICES OF FOOD-GRAINS AND COMMERCIAL PRODUCTS IN TAMIL NADU.

(Base : Prices on 21st August 1939=100).

During the quarter ended December 1978, the index number of wholesale prices of foodgrain and commercial products appreciated. As compared with the index for the September 1978 the index number of wholesale prices of foodgrains increased by 44 points from 1597 in Septembe 1978 to 1641 in December 1978 or by 2.8 per cent owing to an increase in the prices of rice I and II, sorts, samba, wheat, cholam and cumbu.

The index number of wholesale prices of Commercial products too moved up by 101 points from 2692 in September 1978 to 2793 in December 1978 or by 3.8 per cent. Higher prices of Chillies, Cane jaggery, Palm jaggery, gingelly seed, Coconuts, gingelly oil, groundnut oil Cotton seed, tobacco, tanned cow-hides, tanned goat skine and tanned sheep skins contributed f r the upward trend in the index.

## CONSUMER PRICE INDEX NUMBERS FOR DIFFERENT CENTRES IN TAMIL NADU.

#### (Base: 1960=100).

The Consumer Price Index Number for December 1978 as compared to September 1978 advanced in all the centres, viz., Madras City, Cuddalere, Tiruchirappalli, Macurai, Ceimbatere, Nagercoil and Cooncor.

As compared with the index for September 1978 the Index for December 1978 was higher by 12 points in Madras City, by 4 points in Cuddalore, by 26 points in Tiruchirappalli, by 18 points in Madurai, by 8 points in Coimbatore, by 1 point in Nagercoil and by 20 points on Coonoor.

The Consumer Price Index Number for Madras City for the month of October 1978 was higher by 5 points from 313 to 318 when compared to September 1978, because of an increase in the prices of rice, redgram dhall, green gram dhall, blackgram dhall, edible oils, chillies, tamarind, garlic, vegetables and fruits, betel leaves and Casuarina.

The index for November 1978 advanced by 10 points from 318 in October 1978 to 328 in November 1978. Higher prices of rice, redgram dhall, mutton, fresh fish (nethill) egg, chillies (dry), tamarind, onions, garlic, certain selected vegetables, coconuts, gur, firewcod (both jungle wood and Casuarina), dhoti, saree, towel, bedsheets, pillow, stationery (Pencil) hair oil, shaving requisites (blades), umbrella, trunk, brass utensil, laundry charges and tailoring charges contributed for the upward trend in the index.

As compared to November 1978 the index for December 1978 was lower by 3 points from 328 to 325. Lower prices of rice, ragi, redgram dhall, bengalgram dhall, black gram dhall, cc conut oil, gingelly oil, fresh fish (both Nethili and Prawn), dry fish (both Valai arc. Kattal), cuid, glee, turmeric, chillies (dry,) onions, coriander, ginger (dry), pepper, mustard, cummin seed, certain selected vegetables, banana, sugar and snack (sweets) contributed for the downward trend in the index.

#### XV. STATE INCOME.

#### STATE INCOME OF TAMIL NADU.

According to the Quick Estimates, the State Income of Timil Negutics the year 1977-78 (at 1970-71 prices) shows an increase of 10.2 per cent over the previous year. Per capita income in real terms has increased by 8.5 per cent. During 1976-77, the S ate Income at Constant Prices increased by 0.5 per cent and per capita income fell by 0.9 per cent.

The Net State Domestic Product for the year 1977-78 is estimated at Rs. 2,978.26 crores (at 1970-71 prices) and per capita income at Rs. 657. The corresponding estimates fer 1976-77 were Rs. 2,691 crores and Rs. 612 respectively.

The impressive rise in State Income during 1977-78 was mainly due to the good performance of Agriculture sector. The production of food grains went up by about 28 per cent during 1977-78 from 63:36 lakh tonnes in 1976-77 to 80:99 lakh tonnes in 1977-78. Production of Groundnut (with shell) went up by about 41 per cent, Sugarcane by 121 per cent and Cotton Kapas by 23 per cent during 1977-78. As a result, the income from Agriculture sector increased by about 15 per cent.

Basides this, there was an increase in the Industrial Production (Manufacturing) in Tamil Naduasevidenced by the upward trend in the index number of industrial production (Manufacturing) from 137 to 143 during the years under review leading to a rise in income from industrial sector by about 6 per cent in 1977-78 over the previous year.

Many otherstsectors registered increase during 1977-78, the outstanding among them being Electricity, Gas and Water Supply (12.9 per cent), Trade, Hetels and Restaurants (12.1 per cent), Banking and Insurance (10.1 per cent), Public Administration (11.6 per cent) and allways (20.4 per cent).

Of the three sectors, the contribution of the primary sector increased by 14'4 per cent over the previous year, whereas the increase recorded by the secondary sector was 6'4 per cent. The teriforv sectors contribution rose up by 8'7 per cent.

At current prices the Net State Domestic Product in 1977-78 stood at Rs. 4,669'90 crores with a per capita income of Rs. 1,031. The corresponding estimates for 1976-77 were Rs. 4,241'16 crores and Rs. 950 respectively.
