## PREFACE

The Abstract of Statistics for Tamil Nadu presents in the form of a compendium, current statistics on selected items of importance. This publication is intended to serve as an authoritative gbook of reference to Government Departments, Research Scholars, Statisticians, Economists, sPlanners, etc.

This issue covers in the main, statistics for the quarter ended March 1977 with comparative data to the extent available.

Chapters on 'Economic Situation in Tamil Nadu' and 'Select Economic Indicators' highlight the tempo of progress of Tamil Nadu.

special feature of this issue is the inclusion of a report on the Study of Student Wastage Professional and Technical Colleges and Polytechnics in Tamil Nadu.

The co-operation extended by other Heads of Departments in furnishing the statistics required, gratefully acknowledged.

MADRAS,  
1977.

R. PADMAVALLI,  
*Director of Statistics.*

**PART—A.**

---

सत्यमेव जयते

## ECONOMIC SITUATION IN TAMIL NADU.

**Rainfall.**—The rainfall during the winter season, extending over January and February 1977, was deficient to an extent of 50.1 per cent for Tamil Nadu as a whole. The rainfall was deficient throughout the State, except in the districts of Tirunelveli and Kanniyakumari where it was normal.

As compared to the corresponding period of the previous year, the rainfall was above the actual in all the districts of the State except in Madras City.

**Water-supply.**—During the quarter ended March 1977, the water-supply was reported to be inadequate in the districts of South Arcot, North Arcot, Dharmapuri, Coimbatore, Tiruchirappalli, Pudukottai, Madurai, Ramanathapuram and the tail-end area of Kanniyakumari.

The water level in the various reservoirs had been steadily declining during the quarter with slight fluctuations. However, the water level in Sholavaram reservoir had risen during March, 1977.

**Crop prospects.**—During the quarter ended March 1977, rainfall was nil or negligible in all the districts of the State. The beneficial effect of North East Monsoon in the current year was deficient in most of the districts of the State.

When compared to the previous year, there was a decrease of 12.6 per cent in the area under paddy which is the principal crop in the State.

Harvests of various food and non-food crops were in progress in many parts of the State.

Harvest of paddy, groundnut and ragi crops in many parts of Salem and Coimbatore districts was in progress.

Tobacco was being harvested in Gobichettipalayam taluk of Coimbatore district. Harvest of samba paddy was in progress in Tiruchirappalli and Lalgudi taluks of Tiruchirappalli district.

Harvest of paddy, sugarcane and other crops was done in parts of Ramanathapuram district. Harvest of paddy was in full swing in Thambaraparani Delta area of Tirunelveli district. Results of the harvests were normal in most parts of the State.

**Agriculture.**—The total geographical area of Tamil Nadu according to village papers was 13.0 million hectares in 1974-75, out of which, the net area sown accounted for 5.5 million hectares, the area cultivable but not cultivated was 3.2 million hectares and the uncultivable land was 4.3 million hectares. Out of 5.5 million hectares of the net area sown, 2.4 million hectares of about 44 per cent was irrigated. The area sown more than once was 1.1 million hectares, of which 0.6 million hectares or about 55 per cent was irrigated.

The gross cropped area was 6.6 million hectares, out of which 3.0 million hectares or 46 per cent was irrigated.

**Crop Yield.**—The estimated average yield of principal crops showed an increase in 1975-76 over the previous year as shown below :

### YIELD PER HECTARE IN KILOGRAM.

								1974-75.	1975-76.	Increase.
Crop.								(2)	(3)	(4)
(1)										
										Per cent.
Rice	..	..	..	..	..	..	..	1,597	2,076	30
Groundnut	..	..	..	..	..	..	..	823	1,128	37
Gingelly	..	..	..	..	..	..	..	251	319	27
Sugarcane	..	..	..	..	..	..	..	91	93	12

## YIELD PER HECTARE IN KILOGRAM.

<i>Crop.</i>						1974-75.	1975-76.	<i>Increase</i>
(1)						(2)	(3)	(4)
						Per cent.		
Cholam—Irrigated	..	..	..	..	..	1,427	1,849	30
Unirrigated	..	..	..	..	..	414	699	69
Combined	..	..	..	..	..	602	853	42
Cumbu—Irrigated	..	..	..	..	..	1,552	1,624	6
Unirrigated	..	..	..	..	..	425	604	42
Combined	..	..	..	..	..	576	700	22
Ragi—Irrigated	..	..	..	..	..	1,629	1,815	11
Unirrigated	..	..	..	..	..	906	1,227	14
Combined	..	..	..	..	..	1,233	1,512	23
Cotton (lint)	..	..	..	..	..	187	230	23

The comparative increase in 1975-76 was mainly due to the favourable monsoon prevailed in most parts of the State.

*Index of Agricultural Economy.*—The index numbers of area under crops, yield, agricultural production, cropping intensity and productivity for 1975-76 increased as compared with the previous year. The index of cropping pattern, however, decreased.

*Industrial production.*—The index of Industrial Production in Tamil Nadu (1970=100) increased from 135.7 during the quarter ended September 1976 to 138.1 during the quarter ended December 1976. The index increased by 2.4 points or by 1.8 per cent.

The production of sugar (refined), tea (processed), ammonia, urea, mixed fertilizers, pesticides diesel engines, power driven pumps and railway wagons showed significant increase over the previous quarter.

The output of gypsum, refined oil, coffee (cured), tubes (all types), coated abrasives and transformers had, however, declined during the quarter ended December 1976.

*Electricity.*—During the quarter ended March 1977, the electricity generated was 1,213 million units as against 1,145 million units in the previous quarter.

The consumption of electricity increased from 1,547 million units during the quarter ended September 1976 to 1,552 million units during the quarter ended December 1976.

*Handloom.*—The estimated production of handloom cloth in Tamil Nadu was 15,80,83 thousand metres during the quarter ended December 1976 showing a fall of 0.44 per cent when compared with the previous quarter.

*Marine Fisheries.*—The marine fish production throughout the coastline of Tamil Nadu for the quarter ended March 1977 is provisionally estimated at 20,689 tonnes as against 16,271 tonnes estimated for the previous quarter indicating a rise of 27.2 per cent.

*Joint Stock Companies.*—During the quarter ended March 1977, 46 companies were newly registered as against 41 companies in the previous quarter. The total authorised capital of the companies registered during the quarter was Rs. 879.69 lakhs as against Rs. 354.39 lakhs in the previous quarter.

*Transport.*—During the quarter ended March 1977, the number of motor vehicles newly registered was 5,774 as against 6,051 in the previous quarter.

*Index numbers of wholesale prices in Tamil Nadu.*—During the quarter under review, the index numbers of wholesale prices of foodgrains, commercial products and the composite index (21st August 1939=100) declined by 4.6 per cent, 2.1 per cent and 3.0 per cent respectively.

*Consumer price index numbers.*—During the quarter under review, the consum price index numbers for March 1977 (1960=100) as compared to January 1977 advanced in Cuddalore and Madurai declined in Tiruchirappalli, Coimbatore and Nagercoil and remained unchanged in Madras City and Coonoor.

*Rural price index numbers.*—During the quarter ended March 1977, the index number of rural prices (Year ended June 1936=100) for Piliyur, Agaram, Gokilapuram and Kinathukadavu advanced while that of Thulayanatham, Eriodu, Guduvancheri and Kunnathur declined.

*Consumer price index numbers for urban non-manual employees.*—During the quarter ended December 1976, the Consumer Price Index Numbers for urban non-manual employees (1960=100) appreciated in Madras City and Tiruchirappalli, while it receded in Madurai when compared with the index for the last month of the previous quarter.

*Parity index.*—The index number of parity between the prices received and the price paid by the farmer (1954-55=100) moved up by 4.1 per cent during the quarter.

*Employment.*—Compared with the previous quarter, the total number of employment seekers on the Live Register of Employment Exchanges at the end of the quarter ended March 1977 increased by 6.0 per cent. The number of persons registered and placements made through the Employment Exchanges during the quarter decreased by 20.4 and 8.3 per cent respectively when compared with the previous quarter.

## STUDY OF STUDENT WASTAGE IN PROFESSIONAL AND TECHNICAL COLLEGES AND POLYTECHNICS IN TAMIL NADU.

The Study on Student Wastage in Professional and Technical Colleges and Polytechnics in Tamil Nadu was undertaken with the objectives of finding out the student wastage rates in Medical, Agricultural, Veterinary and Engineering Colleges and Polytechnics in Tamil Nadu and covered the first degree course in these colleges viz., M.B.B.S., B.Sc. (Ag.), B.V.Sc. and B.E. and B.Tech. and the first diploma course in Engineering in the Polytechnics viz., D.C.E., D.M.E., D.E.E., etc. Two cohorts of students were covered in each course as detailed below :—

<i>Course of study.</i>	<i>Cohorts of students covered.</i>
1. M.B.B.S.            ..    ..    ..    ..    ..	1963 and 1965 batches.
2. B.Sc. (Ag.)        ..    ..    ..    ..    ..	1966 and 1968 batches.
3. B.V.Sc.        ..    ..    ..    ..    ..	1965 and 1967 batches.
4. B.E. and B.Tech.        ..    ..    ..    ..	1965 and 1967 batches.
5. Engineering Diploma (D.C.E., D.M.E., D.E.E., etc.).	1966 and 1968 batches.

*Student Wastage is of two kinds.*— (i) Real wastage and (ii) Time Wastage. Real Wastage may be defined as the percentage of students who do not complete the course or pass all the relevant examinations irrespective of time allowed, to the total number of students admitted in a particular year. Time wastage refers to the additional time taken by students to complete the course and pass the relevant examinations than the normal duration of the course.

The study revealed that B.Sc. (Ag.) Course recorded the lowest real wastage of 2.06 per cent, while engineering diploma course had the highest real wastage of 39.06 per cent. Real wastage was also high in B.V.Sc. Course with 22.51 per cent. The real wastage in M.B.B.S. and B. Tech. courses were 6.56 per cent and 7.18 per cent respectively.

Real Wastage was due to two reasons: (i) due to discontinuance of students before completing the course and (ii) failure to pass the course including those who were "Yet to pass". Especially in Professional and Technical Courses wastage due to failure to pass the course will be practically 'nil' since failure to pass the course will entail loss of career itself. There will, however, be time lag in passing the course. For the purpose of this study, a period of four years over and above the normal duration of the course has been allowed. Students who had not passed the course within this extended time were treated as wastage due to 'Yet to pass'. The study revealed that wastage due to 'Yet to pass' was not significant except in M.B.B.S. Course which recorded a wastage of 6.03 per cent on this account as against a total real wastage of 6.56 per cent. Wastage due to 'Yet to pass' was virtually 'nil' in B.Sc. (Ag.) Course. B.V.Sc. Course registered a wastage of 2.58 per cent due to 'Yet to pass', while B.E. and B.Tech. Course and Engineering diploma course registered a wastage of 1.84 per cent and 1.80 per cent respectively due to 'Yet to pass'.

Wastage 'due to discontinuance' was the highest in Engineering diploma course with 37.26 per cent. B.V.Sc. Course also recorded a high rate of wastage due to discontinuance of 19.93 per cent.

B.V.Sc. Course recorded the highest rate of time wastage of 24.19 per cent. Time wastage was also significant in M.B.B.S. Course with 16.24 per cent and in Engineering Diploma Course with 15.83 per cent. B.E. and B. Tech. and B.Sc. (Ag.) courses recorded a time wastage of 10.25 per cent and 6.31 per cent respectively.

The high rate of real wastage observed in Engineering diploma course was mainly due to discontinuance of students. This took place in three stages: (i) before appearing for the P.T.C. (Pre-technical Course) examination, (ii) after the failure in the P.T.C. examination and (iii) after passing the P.T.C. examination. While discontinuance before the P.T.C. examination (which would occur generally in the beginning of the P.T.C.) and after the failure in the Pre-Technical Course examination is not uncommon, discontinuance after passing the Pre-Technical Course examination is a peculiar phenomenon only in the Engineering diploma course. This is mainly due to the fact a pass in the Pre-technical examination course is treated as equivalent to a pass in the P.U.C. examination and entails the student eligible for admission to degree courses in Arts and Science in Arts Colleges and B.E. and B.Tech. Courses in Engineering Colleges.

The high percentage of student wastage (real as well as time wastage) in Veterinary Science Course (B.V.Sc.) may be due to many factors such as lack of aptitude on the part of the students, want of better coaching facilities, over-load in the curriculum, some of the subjects taught being very difficult to follow and master within the period of time allotted and so on. The specific causes need to be investigated and remedial measures taken so that the high rate of discontinuance and stagnation of students may be brought down to the minimum possible level.

## I. CLIMATE AND RAINFALL.

## RAINFALL.

The rainfall during the winter season (January and February 1977) was deficient in Tamil Nadu. The rainfall was scanty in the district of Madras, Chengalpattu, South Arcot, North Arcot, Salem, Pudukkottai and the Nilgiris. The rainfall was deficient in the other districts of the State except in the districts of Tirunelveli and Kanniyakumari where it was normal. During the month of March 1977, the rainfall for the State as a whole was deficient to an extent of 46.5 per cent. There was no rain in the districts of Madras and Chengalpattu. The rainfall was scanty in the districts of Chengalpattu, South Arcot, Coimbatore and Tiruchirappalli and was deficient in the districts of Madurai, Ramanathapuram and Kanniyakumari. The rainfall was normal in the other districts of the State.

## RAINFALL BY DISTRICTS.

## WATER-SUPPLY.

During the quarter ended March 1977, the water supply was reported to be inadequate in districts of South Arcot, North Arcot, Dharmapuri, Coimbatore, Tiruchirappalli, Pudukkottai, Madurai, Ramanathapuram and the tail-end areas of Kanniyakumari districts.

The water level in the reservoir of Redhills, Poondi, Sathanur, Willingdon, Periyar, Amaravathi Stanley, Krishnagiri and Perumchani had been steadily decreasing during the quarter ended review. The water levels of Bhavani and Pechipparai reservoirs had also shown the same trend but for the insignificant increase in the first week of March. However, the water levels in Sholavaram reservoir which was decreasing until February had increased in March. The water level in the reservoirs of Vaigai, Papanasam and Manimuthar had increased slightly in February but declined in March.

## II. AREA AND POPULATION.

## AREA, POPULATION, DENSITY, LITERACY, ETC.

Tamil Nadu occupies the eleventh rank among the States in India in regard to size with an area of 130,059 sq. km.

As regards population, Tamil Nadu ranks fifth among the States in India. According to Census 1971, the population in Tamil Nadu is 41,199,168, of which 50.6 per cent are males and 49.4 per cent are females. 28,734,334 persons or 69.7 per cent of the population are in rural areas and the remaining 12,464,834 persons or 30.3 per cent are in urban areas.

Of the total population, 14,741,967 persons (35.8 per cent) are classified as workers and 26,457,201 persons (64.1 per cent) as non-workers. Among the workers 11,667,065 (79.1 per cent) are males and 3,074,902 (20.9 per cent) are females.

Literates form 39.5 per cent of the total population (16,256,393 persons) as against 31.4 per cent in 1961. Madras City has the highest percentage of literacy, viz. 62.01 while Dharmapuri district has the lowest percentage, viz. 22.3.

According to Census 1971, the density of population in Tamil Nadu works out to 317 per sq. km. Madras City has the highest density of population, viz. 19,293 while Dharmapuri district has the lowest density of population, viz. 174.

The population of Scheduled Castes and Scheduled Tribes in Tamil Nadu is 7,627,110 forming 18.51 per cent of the total population. 7,315,595 persons belong to scheduled castes and 311,515 persons are scheduled tribes. Chengalpattu district has the largest percentage of these two classes of people, i.e., 27.22 while Kanniyakumari district has the lowest percentage of scheduled castes and scheduled tribes, i.e. 4.12.

## III. AGRICULTURE.

**Land Utilisation.**—The total geographical area of Tamil Nadu according to village papers was 13.0 million hectares in 1975-76. Out of which, the net area sown accounted for 6.0 million hectares, the area cultivable but not cultivated showed 2.7 million hectares and the uncultivable land was 4.3 million hectares. Out of the 6.0 million hectares of the net area sown, 2.6 million hectares or about 43 per cent was irrigated. The area sown more than once was 1.2 million hectares of which 0.8 million hectares or about 65 per cent was irrigated.

Out of 2.7 million hectares of total area cultivable but not cultivated, 1.4 million hectares or 52 per cent was under current fallows and the remaining 48 per cent was under other non-cultivated lands excluding current fallows. The extent of area under uncultivable land was 4.3 million hectares comprising 2.0 million hectares (46 per cent) of forest land and 2.3 million hectares (54 per cent) of other uncultivable area including land put to non-agricultural uses.

The gross cropped area was 7.2 million hectares, out of which 3.4 million hectares or 47 per cent was irrigated.

*Irrigation.*—Out of 6.0 million hectares of net area sown in 1975–76, 2.6 million hectares or 43 per cent was irrigated. The proportion of net area irrigated to the net area sown was above 50 per cent in the deltaic district of Thanjavur, being 86.1 per cent. In the non-deltaic districts of Chengalpattu, South Arcot and Pudukkottai, the percentages are 71.7 per cent, 53.1 per cent and 53.1 per cent respectively. The figure was less than 50 per cent in other districts of the State as indicated below :—

<i>District.</i>	<i>Percentage of net area irrigated to the net area sown.</i>
(1)	(2)
1 North Arcot .. ..	48.2
2 Coimbatore .. ..	41.6
3 Ramanathapuram .. ..	35.8
4 Madurai .. ..	33.7
5 Kanniyakumari .. ..	33.5
6 Tirunelveli .. ..	33.4
7 Tiruchirappalli .. ..	28.8
8 Salem .. ..	27.4
9 Dharmapuri .. ..	15.5
10 The Nilgiris .. ..	0.2

The different sources of irrigation and the per centages of area irrigated by each to the total area irrigated are shown below :—

<i>Source of irrigation.</i>	<i>Percentage of area irrigated to the total net area irrigated.</i>
(1)	(2)
1 Government canals .. ..	35.5
2 Wells (Tube wells and ordinary wells) .. ..	33.9
3 Tanks .. ..	29.2
4 Other sources including private canals. .. ..	1.4

*Government Canals and tanks.*—Government canals were the principal source of irrigation in the district of Thanjavur (97.4 per cent) Kanniyakumari (56.8 per cent), Tiruchirappalli (48.4 per cent) and Coimbatore (47.9 per cent). The districts in which tank irrigation was the important source are given below together with the percentage of area irrigated :—

<i>District.</i>	<i>Percentage of area irrigated from tanks to the total net area irrigated in the district.</i>
(1)	(2)
1 Ramanathapuram .. ..	82.2
2 Pudukkottai .. ..	78.5
3 Chengalpattu .. ..	63.4
4 Kanniyakumari .. ..	39.1
5 North Arcot .. ..	38.0
6 Tirunelveli .. ..	36.6
7 South Arcot .. ..	27.1

*Wells and other sources.*—Wells including tube wells were the Chief source of irrigation in Salem, Dharmapuri, North Arcot, Coimbatore, Tirunelveli, Madurai, Tiruchirappalli and South Arcot districts accounting for 76.8 per cent, 59.5 per cent, 53.0 per cent, 50.0 per cent, 46.6 per cent, 46.1 per cent, 35.0 per cent, and 27.0 per cent respectively.

Net area irrigated by springs, channels and kasams was negligible in the Nilgiris district.

*Wells supplementing other irrigation sources.*—Wells supplementing other irrigation sources served fairly large areas in North Arcot, Chengalpattu and South Arcot districts, their percentages to the total net area irrigated in the districts being 10.9, 10.0 and 8.3 respectively.

*Crops irrigated.*—The area of crops irrigated in the State was 3.4 million hectares. It was more than 50 per cent of the gross area sown under all crops in the district of Chengalpattu and Thanjavur, the percentages being 74.9 and 73.0 respectively. It was less than 25 per cent of gross area sown in the districts of Dharmapuri (18.4 per cent) and the Nilgiris (0.2 per cent).

Of the total area of crops irrigated, 81.5 per cent was under cereals and pulses, 3.8 per cent under sugarcane, 5.2 per cent under oilseeds (groundnut, gingelly and castor) 2.1 per cent under cotton and the remaining 7.4 per cent under other crops.

The area irrigated more than once was 0.8 million hectares.

## INDEX NUMBERS OF AGRICULTURAL ECONOMY

(Triennium ended 1961-62=100)

The index number of area under crops like has registered an increase of 13.6 points from 93.0 in 1974-75 to 106.6 in 1975-76.\*

The index of yield showed an increase of 25.0 points from 102.9 in 1974-75 to 127.9 in 1975-76

The index of agricultural production showed an increase of 43.1 points from 113.0 in 1974-75 to 156.1 in 1975-76.

The index of cropping pattern decreased by 3.6 points from 118.0 in 1974-75 to 114.4 in 1975-76.

The index number of cropping intensity showed an increase of 14.7 points from 100.8 in 1974-75 to 115.5 in 1975-76.

The index number of productivity recorded an increase of 46.7 points from 122.4 in 1974-75 to 169.1 in 1975-76.

\*The index numbers for 1975-76 are provisional.

## INDEX NUMBERS OF AGRICULTURAL ECONOMY

## WAGES PAID TO CERTAIN CATEGORIES OF AGRICULTURAL LABOUR

The index numbers of wages paid to the agricultural labourers (1960=100) during the quarter ended March 1977 showed an upward trend over the previous quarter in the case of non-adults under 'Field labourers' and men, women and non-adults under 'Tending cattle'. In the case of women under 'Field labourers' and men, women and non-adults under 'Other agricultural labourers' the index numbers decreased. The index number of wages paid to men under 'Filed labourers' remained unchanged. The increase ranged from 1 point to 7 points whereas the decrease ranged from 2 points to 10 points.

#### IV CROP PROSPECTS.

During the quarter ended March 1977, rainfall was nil or negligible in all the districts of the State. The beneficial effect on North East Monsoon in the current year was deficient in most of the districts of the State.

As compared to the previous year, there was a decrease of 12.6 per cent in the area under paddy which is the principal crop in the State.

Harvests of various food and non-food crops were in progress in many parts of the State.

Harvests of paddy, groundnut and ragi crops in many parts of Salem and Coimbatore districts were in progress.

Tobacco was being harvested in Gobichettipalayam taluk of Coimbatore district.

Harvest of samba paddy was in progress in Tiruchirappalli and Lalgudi taluks of Tiruchirappalli district.

Harvest of paddy, sugarcane and other crops was done in parts of Ramanathapuram district, harvest of paddy was in full swing in Tambaraparani Delta of Tirunelveli district. Results of harvests were normal in most parts of the State.

Paddy, Cholan, Cumbu, ragi, small millets, pulses, groundnut, sugarcane, cotton, tobacco, banana were some of the standing crops in the State. The condition of the standing crops were precarious in some parts of the State due to the scarcity of water.

Standing crops like paddy, millets and other pulses were reported to be withering for want of water in some parts of South Arcot, Salem, Coimbatore, Pudukkottai and Ramanathapuram districts.

Most of the standing crops would be ready for harvest by the end of April and only normal outturn is expected in the Rabi Season.

Pest attack on tobacco crop in part of Coimbatore district and 'Bunch Top' disease on Banana crop in Kodaikanal region of Madurai district were some of the handicaps exposed to the steady growth of the crops. While remedial measures were reported to have been taken for the former case by the Agriculture Department, special scheme of eradication of the disease in the latter case was in operation.

In certain villages of Virudhachalam taluk of South Arcot district, paddy crop was withering due to inadequate water-supply. The standing crops in Melur, Dindigul and Vedasandur of Madurai district, taluks were withering. Crops like paddy, gingelly, pulses and groundnut were withering in parts of Karaikudi, Sivagangai, Paramakudi and Aruppukottai taluks of Ramanatha-

Turn system was adopted in all channels of Tiruchirappalli district.

## V. INDUSTRIES.

## ANNUAL SURVEY OF INDUSTRIES.

The Annual Survey of Industries is conducted under the Collection of Statistics Act, 1953 every year.

The factories registered under Section 2 (m) (i) and 2 (m) (ii) of the Factories Act, 1948 are covered by the Annual Survey of Industries. The Survey is conducted in two parts, viz., Census and Non-Census. Under the Census sector, all factories using power and employing 50 or more workers and employing 100 or more workers, not using power are covered. The Non-Census sector comprise of all factories, employing 10 to 49 workers and using power and employing 20 to 99 workers without the aid of power.

The survey excludes from its purview, the units engaged in defence production, storage and distribution of oil, restaurants and services, technical institutions not producing anything for sale or exchange for reasons of security or for their non-manufacturing activity.

The Annual Survey of Industries, 1974-75 has covered 6,664 factories as against 6,458 factories during 1973-74. The productive capital, invested in various manufacturing industries during 1974-75, is Rs. 1,583.10 crores showing an increase of 9.8 per cent by the corresponding productive capital for 1973-74.

The number of employees during 1973-74 increased by 6.5 per cent over 1973-74. The salaries and wages paid to employees also increased by 26.7 per cent over 1973-74. The value of output and the value added by manufacture during 1974-75, showed an increase of 42.1 and 31.1 respectively over 1973-74.

In short, there was a general progress and considerable improvement in the industrial sector of the economy in Tamil Nadu during 1974-75.

## INDUSTRIAL PRODUCTION.

The Index of Industrial production in Tamil Nadu increased from 132.2 points in September 1976 to 149.1 points in December 1976 recording an increase of 16.9 points or 12.8 per cent.

A significant increase in the output of Sugar (Refined) (437.2 per cent), Tea (Processed) (40.3 per cent), Ammonia (65.6 per cent), Urea (55.5 per cent), Pesticides (69.8 per cent), Diesel Engines (80.7 per cent), Power Driven Pumps (38.1 per cent) and Railway wagons (37.2 per cent) was recorded during the period under review.

The industries which showed a declining trend in production during the quarter ended December 1976 were Gypsum (68.9 per cent), Refined oil (46.2 per cent) Coffee cured (85.7 per cent), printing paper (20.0 per cent), Tubes (all types) (37.2 per cent) Coated Abrasives (31.3 per cent), Bonded Abrasives (22.3 per cent) and Transformers (47.2 per cent).

## VI. HANDLOOM

## PRODUCTION OF HANDLOOM CLOTH

The production of handloom cloth in Tamil Nadu during the quarter ended December 1976 was estimated at 158,083,000 metres as against 158,783,000 metres during the previous quarter. The fall of 0.44 per cent in production even during the two important festivals, viz. Deepavali and Pongal clearly shows the decaying nature of the industry in recent times.

Among the different varieties of handloom cloth produced, sarees alone accounted for 27.40 per cent while dhoties, lungies and towels constituted 15.30 per cent, 16.89 per cent and 14.53 per cent respectively. The remaining 25.88 per cent of production was shared by shirtings, bedsheets, gada, carpets, etc.

Out of the total production, cotton varieties alone constituted the bulk of 86.15 per cent followed by artsilk, mixture and silk at the rate of 6.96 per cent, 6.20 per cent and 0.69 per cent respectively.

During the quarter under review the Government has offered twice the rebate of 10 per cent for the sales through co-operative societies for Deepavali and Pongal festivals. As a result, the average monthly rate of sales to the total available stock in Tamil Nadu for the quarter has increased to 41.80 per cent, when compared to 33.37 per cent effected during the previous quarter.

## VIII. ELECTRICITY.

## ELECTRICITY GENERATION AND CONSUMPTION.

During the quarter ended March 1977, the generation of electricity stood at 1,155 million units as against 1,084 million units in the previous quarter.

The total consumption of electricity rose from 1,547 million units during the quarter ended September 1976 to 1,552 million units during the quarter ended December 1976. The consumption of electricity by the agricultural and industrial sectors declined from 382 million units to 328 million units and from 776 million units to 745 million units respectively. The consumption of electricity by the domestic users and others showed an upward trend.

The total number of villages and hamlets electrified was 63,247 at the end of the quarter ended December 1976. The total number of agricultural pumpsets energised was 7,66,843 at the end of the quarter ended December 1976.

### INDEX NUMBER OF BUILDING COST.

The Index Number of Building Cost in Madras City for the quarter ended September 1976 advanced by three points as compared to the previous quarter due to increase in the prices of building materials like bricks, teak-wood, planks, mild steel, T.W. Plugs, T.W. fillets, Indian water closet, etc., and also due to proportional increase in contingencies and supervision charge.

The index for building labour remained unchanged.

# INDEX NUMBERS OF WHOLESALE PRICES OF FOODGRAINS AND COMMERCIAL PRODUCTS IN TAMIL NADU.

(Prices on 21st August 1939=100)

During the quarter ended March 1977, the index number of wholesale prices of foodgrains fluctuated. As compared with the index for December 1976, the index number declined by 86 points from 1861 in December 1976 to 1775 in March 1977 or by 4.6 per cent. A fall in the prices of rice I and II sorts, cholam and ragi was responsible for the downward trend in the index.

The index number of wholesale prices of commercial products receded by 57 points from 2778 in December 1976 to 2721 in March 1977 or by 2.1 per cent. A fall in the prices of pepper, turmeric, cane jaggery, sugar (open market), castor, coconut, ghee, coconut oil, tobacco and tanned hides and skins contributed for the decline in the index.

## CONSUMER PRICE INDEX NUMBERS FOR INDUSTRIAL WORKERS.

(1960=100)

During the quarter ended March 1977, the Consumer Prices Index numbers for March 1977 as compared to January 1977 advanced in Cuddalore and Madurai centres declined in Tiruchirappalli, Coimbatore and Nagercoil Centres and remained unchanged in Madras City and Coonoor.

As compared with the index for December 1976 the index for March 1977 was higher by two points at Cuddalore, while the index was lower by 33 points at Nagercoil, seven points each at Madras City and Tiruchirappalli, five points at Madurai and by two points each at Coimbatore and Coonoor.

As regards Madras City, the Consumer Price Index number was lower by seven points from 305 in December 1976 to 298 in January 1977. This fall was due mainly to lower prices of rice ragi, bengalgram, dhal, curd, ghee, chillies (dry), ginger (dry and fresh), certain items of vegetables and fruits and gur. The index for February 1977 and March 1977 remained unaltered.

**INDEX NUMBER OF PRICES RECEIVED AND PRICES PAID BY THE FARMER AND THE INDEX NUMBER OF PARITY.**

(1954-55=100)

During the quarter ended March 1977, the index number of farm prices received by the farmer advanced by 21 points from 385 in December 1976 to 406 in March 1977 or by 5.5 per cent.

The Index Number of Prices paid by the farmer (cultivation costs and domestic expenditure) also increased marginally by three points from 531 in December 1976 to 534 in March 1977 or by 0.6 per cent.

Consequently, the index of parity between the prices received by the farmer and the prices paid by the farmer moved up by three points from 73 in December 1976 to 76 in March 1977 or by 4.1 per cent.

## PLANTATION LABOUR.

During the quarter ended September 1976, 308 plantations were registered under the Plantation Act comprising of 143 Tea, 134 Coffee, 27 Rubber and 4 Cinchona plantations in Tamil Nadu. Of these, 247 plantations comprising of 113 Tea, 105 Coffee, 25 Rubber and 4 Cinchona plantations reported statistics relating to labour employed by them.

*Tea plantations.*—The total number of workers employed during the quarter ended September 1976 in Tea plantations was 51,862 as against 52,897 during the quarter ended June 1976. The number of permanent workers employed during the quarter ended September 1976 was, 46,631. The average daily earnings of permanent garden labour men, women and minor workers were Rs. 6.23, Rs. 6.99 and Rs. 4.23 respectively. For outside labour-men-women the earnings were Rs. 5.99 and Rs. 6.86 respectively. Minor workers were not employed.

*Coffee plantations.*—The total number of workers employed during the quarter ended September 1976 was 8,404 as against 7,597 during the previous quarter. The number of permanent workers employed during the quarter under review was 5,159. The average daily earnings of permanent garden labour men, women and minors, were Rs. 5.34, Rs. 4.88 and Rs. 3.66 respectively. The earnings of outside labour-men-women and minors were Rs. 4.34, Rs. 3.93 and Rs. 2.56 respectively.

*Rubber plantations.*—Total number of workers employed during the quarter ended September 1976 in Rubber plantations was 1,451 as against 1,512 during the previous quarter. The number of permanent workers employed during the quarter ended September 1976 was 1,374. The average daily earnings of permanent garden labour, men and women workers, were Rs. 7.66 and Rs. 6.56 respectively. The corresponding earnings for outside labour-men-women were Rs. 7.51 and Rs. 6.59 respectively.

*Cinchona plantations.*—The total number of workers employed during the quarter ended September 1976 in cinchona plantations was 2,222 as against 714 during the previous quarter. The number of permanent workers employed during the quarter ended September 1976 was 1,609. The average daily earnings of permanent garden labour-men, women and minors were Rs. 6.29, Rs. 7.29 and Rs. 7.62 respectively.

## WORKERS IN PLANTATIONS.

Plantation.	Total.		June 1976			Total		September 1976.		
	Number of workers.		Number of permanent workers.		Average daily attendance of permanent workers.	Number of workers.		Number of permanent workers.		Average daily attendance of permanent workers.

## AVERAGE DAILY EARNINGS OF WORKERS IN PLANTATIONS

Category of Plantations	Workers	Average daily earnings			
		June 1976		September 1976	
		Garden Labour	Outside Labour	Garden Labour	Outside Labour
		RS.	RS.	RS.	RS.
Tea .. .. .	Men	6.70	6.22	6.23*	5.99
	Women	6.66	5.72	6.99**	6.86
	Minors	3.74	..	4.23	..
Coffee .. .. .	Men	5.70	4.97	5.34	4.34
	Women	5.04	4.45	4.88	3.93
	Minors	3.82	..	3.66	2.56
Rubber .. .. .	Men	7.49	7.45	7.66	7.51
	Women	6.85	6.60	6.56	6.59
Cinchona .. .. .	Men	4.63	..	6.29***	..
	Women	4.01	..	7.20***	..
	Minors	..	..	7.62***	..

NOTE —\*The decrease in the average daily earnings of men workers during the quarter ended September 1976 was due to reduction of dearness allowance paid to the workers based on the cost of living Index that prevailed during that period.

\*\* The increase in the average daily earnings of women and minor workers during the quarter ended September 1976 was due to incentive payments paid to them. Generally women and minors pluck more green leaf than men workers. Men workers are primarily engaged in cultivation operations of the estates.

\*\*\* The increase in the average daily earnings of men, women and minor workers in cinchona plantations during the quarter ended September 1976 as compared with June 1976, was due to payments of leave with wages, sickness allowance, maternity benefit, way expenses and retrenchment compensation, etc., paid during the quarter in one particular estate.

## XIV. STATE FINANCE.

## RECEIPT AND EXPENDITURE.

The receipts under Revenue Account for 1976-77 was Rs. 6,14,49 lakhs (Revised Estimates) as against Rs. 5,63,36 lakhs (Accounts) for the previous year.

The expenditure under Revenue Account was Rs. 6,27,27 lakhs (Revised Estimates) as against Rs. 5,57,92 lakhs (Accounts) for the previous year.

There was a deficit of Rs. 1,278 lakhs in 1976-77 as against a surplus of Rs. 544 lakhs in the previous year.

## XV. STATE INCOME.

### TREND IN STATE INCOME.

According to quick estimates, the State Income for Tamil Nadu for 1975-76 has shown an increase of 16.2 per cent at current prices over the previous year.

This increase has been attributed to a record production of 77.6 lakh tonnes of foodgrains during the year as against 47.97 lakh tonnes in 1974-75. The increase in agricultural production was accounted for mainly by cereals viz., Rice (+64 per cent), Jowar (+50.0 per cent), Bajra (+60.0 per cent), Maize (+87 per cent) and Ragi (+36.0 per cent) and supplemented by increased production in Groundnut (56.0 per cent), Cotton (+42.0 per cent), Tobacco (+170.0 per cent) Chillies (+24.0 per cent) and Turmeric (+56.0 per cent).

In percentage terms of value for agricultural sector, while there was an increase of 27.1 per cent for Tamil Nadu, there was a decrease of 4.9 per cent for the All India. On the whole, the development in the agricultural front during 1975-76 has been satisfactory for Tamil Nadu.

The other sectors, which have also attributed to the increase, are Manufacturing (Registered (4.7 per cent), construction (7.3 per cent), Transport by other means (13.0 per cent) and trading activities (22.4 per cent).

The performance of production in the traditional industrial goods especially Textiles (5.5 per cent), Mixed fertilizers (531.8 per cent), Cement (8.9 per cent) and Electricity (6.0 per cent), Tea (14.6 per cent) and Coffee (4.1 per cent) and the increased activity in the mining industry (8.2 per cent) supplemented by the industrial discipline enabled the manufacturing sector to forge ahead, in spite of the economic strain suffered during the first half of the year under review. This has proved that the performance of Agricultural Sector during the year was far better than the industrial sector, thereby restoring the tempo of overall economic development in 1975-76, which suffered severe set-back during the previous year.

Construction industry also gathered record momentum in 1975-76, in which the building cost index number for labour registered a steep rise to the extent of 374.8 points in 1975-76 from 241.5 in 1974-75 (1961-62=100).

Transport by other means sector showed an increase of 13.0 per cent, of which the mechanised road transport accounts for a larger share due to increase in fleet strength, expanded operation and revision of fares.

Considering the aspect of growth in real terms, it may be stated that the increase in all sectors other than Agriculture showed a snail's pace resulting very marginal increase of Rs. 2 only in the per capita income in 1975-76 over 1973-74, overcoming the set-back suffered in 1974-75.

Taking an overall view, the real State Income rose by 3.68 per cent in the Fourth Plan period 2.13 per cent between 1966-69 Annual Plans, and 1.18 per cent in the Third Plan.
