BUREAU OF STATISTICS AND EVALUATION
GOVERNMENT OF PONDICHERRY

INTRODUCTION

The present issue of the Abstract of Statistics 1967-68 is the eighth in the series. It presents statistics on the various facets of economic and social structure of this Union Territory in a time series with region-wise data for the latest year.

2. The reference period of the data appearing in this issue varies with the nature of the subject. Generally data have been presented for the financial years 1966-67 and 1967-68 or the calendar years 1967 and 1968.

3. The figures, including the totals, have been rounded off neglecting less than half and taking half and more than half as one. Wherever a total differs from the sum of individual figures, the difference, except where otherwise stated, may be taken to be due to such rounding.

4. The valuable Co-operation, extended by Departmental Officials, Mayors of Communes, and members of the public in the collection of data appearing in this issue, is gratefully acknowledged.

5. Although this publication is brought out by an office of the Government of Pondicherry, the views expressed therein are not necessarily those of the Government.

6. Suggestions, if any, for the improvement of this publication will be gratefully accepted.

4. AGRICULTURE

In most of the States, the monthly cultivation accounts maintained by the Karnams (Revenue Department) form the basis of agricultural statistics. Such accounts are not now maintained in this State. However, at the instance of the Bureau of Statistics and Evaluation, the Revenue Department asked the Karnams to furnish data in the forms prescribed by the Ministry of Food and Agriculture, Directorate of Economics and Statistics. The entire State has been surveyed. The extent of wet land, dry land and poramboke are available. There are 30 Karnams in the Revenue Department. The jurisdiction of each Karnam is about 6 square miles. Since monthly cultivation accounts are not maintained, each Karnam supplied some rough estimates for his circle. Based on these returns, the data have been compiled by the Bureau of Statistics and Evaluation.

Figures given in this section relate to land utilisation, area irrigated by different sources, crop acreage and agricultural production for the years 1964-65 to 1967-68 (July to June). For the years 1966-67 and 1967-68 figures for each region have been given. The statistics for the years 1962-63 to 1967-68 in respect of Pondicherry region have been collected by the field staff of the Bureau by complete enumeration under the Scheme 'Collection of Agricultural Statistics'. Hence, the data for the years 1962-63 to 1967-68 are not strictly comparable with those of previous years. Statistics relating to the agricultural machinery and implements and agricultural wages are also included in this section.

Table 4.1: This table is devoted to land utilisation statistics. Generally, the standard definitions of the categories of land adopted in this table are those recommended by the Ministry of Food and Agriculture, Directorate of Economics and Statistics.

Table 4.2: Shows data relating to net area under irrigation according to modes of irrigation, area irrigated with crops more than once during the year being counted once only. Area irrigated by spring-channels, ponds etc., are included in 'Other Sources'.

Table 4.3: This table gives data regarding area under irrigation according to cropwise distribution. Irrigated area sown with crops more than once during the year is counted as separate area for each crop.

Table 4.4: This table furnishes information regarding area under all crops. Total area under crops irrigated and unirrigated is included in this table.

Table 4.5: Gives data relating to the production of principal crops in this State. Production of each crop has been worked out separately for each region on the basis of the estimates of yield per hectare furnished by the Karnams.

Table 4.6: This table furnishes information relating to number of agricultural machinery and implements in Pondicherry, Karaikal, Mahe and Yanam. The figures are according to the Livestock Census, 1966.

Table 4.7: Information regarding the average daily wage rates paid to agricultural and skilled labour at Thirukkanur in Pondicherry Region for the years 1962-63 to 1967-68 is presented in this table.

6. PUBLIC HEALTH AND VITAL STATISTICS

This section is devoted to Medical and Vital Statistics. Information about the number of hospitals, dispensaries, beds and medical personnel have been furnished by the Director of Health and Family Planning Services. Data regarding number of births, deaths by causes and age groups have been compiled from the monthly returns sent by the Mayors to the Office of the Health and Family Planning Services.

Number of hospitals, dispensaries and beds is given in Table 6.1.

Table 6.2 shows the number of Medical personnel.

Table 6.3 furnishes information regarding progress of B. C. G. vaccination in each settlement.

Number of cases treated in Hospitals and dispensaries is given in Table 6.4.

Table 6.5 gives information regarding birth control statistics.

Table 6.6 shows the distribution of live-births, still-births and deaths by settlement.

Table 6.7 presents live birth rate and death rate per thousand population and still birth rate per thousand live and still-births. The formulae used are as follows:

$$\text{Live-birth rate / Death rate per '000 population} = \frac{\text{Total live-births / deaths} \times 1000}{\text{Estimated mid-year population}}$$

$$\text{Still-birth rate per '000 live and still - births} = \frac{\text{Total still-births} \times 1000}{\text{Total live-births} + \text{total still-births}}$$

Straight lines have been fitted up with 1958 as origin.

Table 6.8 and 6.9 deal with the number of deaths due to various causes.

Tables 6.10. to 6.12 deal with the number of deaths by different age groups.

12. CO-OPERATION

The Madras Co-operative Societies Act, 1932 (VI of 1932) was extended to Pondicherry State in 1955. The data presented in this Section give an idea of Progress achieved under Co-operation. The data are given for six years from 1963 to 1968 and give position as on 30th June of each year. Societies are classified into two main categories: credit and non-credit societies. Figures for the year ending 30th June, 1968 are provisional.

Table 12.1 gives information regarding progress in co-operation in general namely, the total number of societies, members, working capital, etc. Working capital is the sum of share capital paid up, deposits, loans, reserve and other funds. 13. LABOUR AND EMPLOYMENT

This section presents data relating to employment in public and private sectors, data relating to employment exchange, and wages paid to agricultural and skilled labourers.

Table 13.1 to 13.3 present results of the census of Government employees. All the employees working in the offices of the Pondicherry State Government and its industrial and commercial undertakings have been included. For this census, those who are on the pay rolls of the establishment have been taken as regular staff. The staff paid from contingencies, work-charged personnel, and those employed on daily wages have been classified as non-regular staff. Casual daily rated labour employed for less than a month and contractor's labour have not been included. The ex-French employees whose payscales start with a minimum of Rs. 300 or more have been taken as gazetted officers. Those who have been confirmed and hold substantively the post against which they are shown, on the date of census, have been taken as permanent. Permanent employees though working temporarily or officiating in any temporary post on the date of census, have also been taken as permanent. All those who are not confirmed and do not hold substantively any post on the date of census have been taken as temporary. Persons appointed in leave arrangements and temporary employees officiating in permanent posts have been shown as temporary. Basic pay includes personal or special pay, if any, but excludes dearness and other allowances.
